We use the LCR, the NSFR and the internal liquidity barometer to monitor our liquidity position and plan funding. Our internal liquidity barometer is used to manage liquidity to internal targets and as a basis to model both Credit Suisse-specific and market-wide stress scenarios and their impact on liquidity and funding, but also to quantify our internal buffer above regulatory liquidity metrics such as those related to the LCR. Our internal barometer framework supports the management of our funding structure. It allows us to manage the time horizon over which the stressed market value of unencumbered assets (including cash) exceeds the aggregate value of contractual outflows of unsecured liabilities plus a conservative forecast of anticipated contingent commitments. This internal barometer framework enables us to manage liquidity to a desired profile under a Credit Suisse-specific or market-wide stress that permits us to continue business activities for a period of time (also known as a liquidity horizon) without changing business plans. Under this framework, we also have short-term targets based on additional stress scenarios to ensure uninterrupted liquidity for short time frames.

We allocate the majority of the balance sheet usage related to our Treasury-managed HQLA portfolio to the business divisions to allow for a more efficient management of their business activities from an overall Group perspective with respect to LCR and Swiss leverage requirements.

Our overall liquidity management framework allows us to run stress analyses on our balance sheet and off-balance sheet positions, which include, but are not limited to, the following:

- A multiple-notch downgrade in the Bank's long-term debt credit ratings, which would require additional funding as a result of certain contingent off-balance sheet obligations;
- Significant withdrawals from private banking client deposits;
- Potential cash outflows associated with the prime brokerage business;
- Over-collateralization of available secured funding;

- Limited availability of capital markets, certificates of deposit and commercial paper;
- Other money market access will be significantly reduced;
- A reduction in funding value of unencumbered assets;
- The inaccessibility of assets held by subsidiaries due to regulatory, operational and other constraints;
- The possibility of providing non-contractual liquidity support in times of market stress, including purchasing our unsecured debt;
- Monitoring the concentration in sources of wholesale funding and thus encourage funding diversification;
- Monitoring the composition and analysis of the unencumbered assets;
- Restricted availability of foreign currency swap markets; and
- Other scenarios as deemed necessary from time to time.

### Governance

Funding, liquidity, capital and our foreign exchange exposures are managed centrally by Treasury. Oversight of these activities is provided by Group CALMC, a committee that includes the chief executive officers (CEOs) of the Group and the divisions, the Chief Financial Officer (CFO), the Chief Risk Officer (CRO) and the Treasurer.

It is Group CALMC's responsibility to review the capital position, balance sheet development, current and prospective funding, interest rate risk and foreign exchange exposure and to define and monitor adherence to internal risk limits. Group CALMC regularly reviews the methodology and assumptions of our liquidity risk management framework and determines the liquidity horizon to be maintained.

All liquidity stress tests are coordinated and overseen by the CRO to ensure a consistent and coordinated approach across all risk disciplines.

### Contingency funding planning

In the event of a liquidity crisis, our Contingency Funding Plan provides for specific actions to be taken depending on the nature of the crisis. Our plan is designed to address ever-increasing liquidity and funding stresses and has pre-defined escalation levels aimed at maximizing the likelihood that we can take certain measures to address liquidity or funding shortfalls. In order to identify a deteriorating liquidity situation, we monitor a set of regulatory and economic liquidity metrics while also seeking the views of our subject matter experts as well as Group and entity senior management, who retain at all times the authority to take remedial actions promptly. In all cases, the plan's primary objectives are to strengthen liquidity (immediate), reduce funding needs (medium term) and assess recovery options (longer term).

## 108 Liquidity and funding management

### Liquidity metrics

#### Liquidity issues in the fourth quarter of 2022

As previously disclosed, during early fourth quarter of 2022, Credit Suisse began experiencing significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits. However, as the quarter progressed, these outflows stabilized to much lower levels but had not yet reversed by year end. While these outflows led us to partially utilize liquidity buffers at the Group and legal entity level, and we fell below certain legal entity-level regulatory requirements, the core requirements of the LCR and the NSFR at the Group level were maintained at all times.

- Refer to "Liquidity issues in the fourth quarter of 2022" in II – Operating and financial review – Credit Suisse – Other Information for further information.

#### Liquidity pool

Treasury manages a sizeable portfolio of HQLA comprised of cash held at central banks and securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top-rated counterparties. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash held at central banks and highly rated government bonds and on short-term reverse repurchase agreements. These government bonds are eligible as collateral for liquidity facilities with various central banks including the Swiss National Bank (SNB), the US Federal Reserve (Fed), the European Central Bank (ECB) and the Bank of England. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities. The liquidity pool may be used to meet the liquidity requirements of our operating companies. All securities, including those obtained from reverse repurchase agreements, are subject to a stress level haircut in our barometer to reflect the risk that emergency funding may not be available at market value in a stress scenario.

We centrally manage this liquidity pool and hold it at our main operating entities. Holding securities in these entities ensures that we can make liquidity and funding available to local entities in need without delay.

As of December 31, 2022, our liquidity pool managed by Treasury and the global liquidity group had an average HQLA value of CHF 118.5 billion, compared to CHF 229.9 billion as of the end of 2021, reflecting the significant decrease in cash deposits and non-renewal of maturing time deposits during early fourth quarter of 2022. The liquidity pool consisted of CHF 62.3 billion of cash held at major central banks, primarily the SNB, the Fed and the ECB, and CHF 56.2 billion market value of securities issued by governments and government agencies, primarily from the US and the UK.

In addition to the above-mentioned liquidity pool, there is also a portfolio of unencumbered liquid assets managed by the businesses, primarily in the Investment Bank division, in cooperation with the global liquidity group. These assets generally include bonds and liquid equity securities that form part of major indices. In coordination with the businesses and the global liquidity group, Treasury can access these assets to generate liquidity. As of December 31, 2022, this portfolio of assets had a market value of CHF 8.0 billion, consisting of CHF 5.6 billion of bonds

and CHF 2.4 billion of liquid equity securities. Under our internal model, an average stress-level haircut of 7% is applied to these assets. The haircuts applied to this portfolio reflect our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities. This portfolio decreased 70% from CHF 26.3 billion, as of the end of 2021, mainly reflecting changes in light of our strategy to resize our prime services franchise.

## Liquidity pool – Group

end of	2022					2021
	Swiss franc	US dollar	Euro	Other currencies	Total	Total
<b>Liquid assets (CHF million)</b>						
Cash held at central banks	27,917	22,591	8,770	2,986	62,264	143,936
Securities	8,843	30,638	5,473	11,267	56,221	85,975
<b>Liquid assets <sup>1</sup></b>	<b>36,760</b>	<b>53,229</b>	<b>14,243</b>	<b>14,253</b>	<b>118,485</b>	<b>229,911</b>

<sup>1</sup> Reflects a pre-cancellation view.

## Liquidity Coverage Ratio

Our calculation methodology for the LCR is prescribed by the Liquidity Ordinance and the FINMA 2015/2 Circular “Liquidity risks – banks,” as amended (Liquidity Circular), and uses a three-month average that is measured using daily calculations during the quarter. The FINMA calculation of HQLA takes into account a cancellation mechanism (post-cancellation view) and is therefore not directly comparable to the assets presented in the financial statements that could potentially be monetized under a severe stress scenario. The cancellation mechanism effectively excludes the impact of certain secured financing transactions from available HQLA and simultaneously adjusts the level of net cash outflows calculated. Application of the cancellation mechanism adjusts both the numerator and denominator of the LCR calculation, meaning that the impact is mostly neutral on the LCR itself.

Our HQLA measurement methodology excludes potentially eligible HQLA available for use by entities of the Group in certain jurisdictions that may not be readily accessible for use by the Group as a whole. These HQLA eligible amounts may be restricted for reasons such as local regulatory requirements, including large exposure requirements, or other binding

constraints that could limit the transferability to other Group entities in other jurisdictions.

On this basis, the level of our three-month daily average LCR was 144% as of the end of 2022, a decrease from 203% as of the end of 2021, representing an average HQLA of CHF 120.0 billion and average net cash outflows of CHF 83.2 billion.

The decrease in the LCR compared to 2021 reflected a significantly lower level of average HQLA, which was partially offset by a reduction in net cash outflows. The lower level of HQLA reflected a decrease in the amount of cash held with central banks and a decrease in the amount of securities held during the period. The decrease in net cash outflows mainly resulted from a decrease in cash outflows from unsecured wholesale funding, primarily driven by decreases in non-operational deposits and unsecured debt, as well as a decrease in net cash outflows from retail deposits. These decreases in net cash outflows were partially offset by lower net cash inflows associated with secured wholesale funding and secured lending activities, as well as a decrease in cash inflows from fully performing exposures.

- Refer to “Liquidity issues in the fourth quarter of 2022” in II – Operating and financial review – Credit Suisse – Other Information for further information.

## Liquidity coverage ratio – Group

end of	2022		2021
	Unweighted value <sup>1</sup>	Weighted value <sup>2</sup>	Weighted value <sup>2</sup>
<b>High-quality liquid assets (CHF million)</b>			
<b>High-quality liquid assets <sup>3</sup></b>	—	<b>119,954</b>	<b>227,193</b>
<b>Cash outflows</b>			
Retail deposits and deposits from small business customers	118,506	13,444	19,555
Unsecured wholesale funding	153,546	58,000	95,093
Secured wholesale funding	50,915	9,692	29,344
Additional requirements	153,272	33,328	35,640
Other contractual funding obligations	43,945	43,945	85,492
Other contingent funding obligations	194,227	2,303	3,663
<b>Total cash outflows</b>	—	<b>160,712</b>	<b>268,787</b>
<b>Cash inflows</b>			
Secured lending	32,744	12,104	40,049
Inflows from fully performing exposures	48,350	22,101	28,270
Other cash inflows	43,305	43,305	88,312
<b>Total cash inflows</b>	<b>124,399</b>	<b>77,510</b>	<b>156,631</b>
<b>Liquidity coverage ratio</b>			
High-quality liquid assets (CHF million)	—	119,954	227,193
Net cash outflows (CHF million)	—	83,202	112,156
<b>Liquidity coverage ratio (%)</b>	—	<b>144</b>	<b>203</b>

Calculated using a three-month average, which is calculated on a daily basis.

- 1 Calculated as outstanding balances maturing or callable within 30 days.
- 2 Calculated after the application of haircuts for high-quality liquid assets or inflow and outflow rates.
- 3 Consists of cash and eligible securities as prescribed by FINMA and reflects a post-cancellation view.

## Net Stable Funding Ratio

Our calculation methodology for the NSFR is prescribed by the Liquidity Ordinance and the Liquidity Circular, including associated disclosure requirements. As of the end of 2022, the level of our NSFR was 117%, a decrease from 127% as of the end of 2021, representing available stable funding (ASF) of CHF 343.2 billion and required stable funding (RSF) of CHF 292.5 billion.

The decrease in the NSFR compared to the end of 2021 reflects a decrease in ASF, partially offset by a decrease in RSF. The decrease in the ASF was mainly attributed to a decrease in our deposits, primarily attributable to significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits during early fourth quarter of 2022. The decrease in RSF was mainly attributable to a decrease in our trading inventory (non-HQLA securities), our loans held to maturity portfolio, our derivatives portfolio due to decreases in our net derivatives receivables and our reverse repurchase transactions backed by HQLA and non-HQLA assets, partially offset by increases in our loans held for sale portfolio.

## Net stable funding ratio – Group

end of	2022	2021
<b>Net stable funding ratio</b>		
Available stable funding (CHF million)	343,158	436,856
Required stable funding (CHF million)	292,524	342,870
Net stable funding ratio (%)	<b>117</b>	<b>127</b>

## Funding management

Treasury is responsible for the development, execution and regular updating of our funding plan. The plan reflects projected business growth, development of the balance sheet, future funding needs and maturity profiles as well as the effects of changing market and regulatory conditions.

The approach to term funding best reflects the sensitivity of both our liabilities and our assets to changes in interest rates. Interest expense on long-term floating-rate debt is monitored and managed relative to certain indices, which historically included inter-bank offered rate (IBOR) benchmarks and is being transitioned to alternative reference rates (ARRs) in place of IBORs. Aligned with regulatory expectations and the USD LIBOR cessation timeline, the Group's IBOR transition program works to coordinate preparations on a firm-wide basis, including Treasury and outstanding debt instruments with a LIBOR-link.

We continually manage the impact of funding spreads through careful management of our liability mix and opportunistic issuance of debt. The effect of funding spreads on interest expense depends on many factors, including market conditions, product type and the absolute level of the indices on which our funding is based.

We diversify our long-term funding sources by issuing structured notes, which are debt securities on which the return is linked to commodities, stocks, indices or currencies or other assets. We generally hedge structured notes with positions in the underlying assets or derivatives.

We also use other collateralized financings, including repurchase agreements and securities lending agreements. The level of our repurchase agreements fluctuates, reflecting market opportunities, client needs for highly liquid collateral, such as US treasuries and agency securities, and the impact of balance sheet and risk-weighted asset limits. In addition, matched book trades, under which securities are purchased under agreements to resell and are simultaneously sold under agreements to repurchase with comparable maturities, earn spreads, are relatively risk free and are generally related to client activity.

### Funding sources

We fund our balance sheet primarily through core customer deposits, long-term debt, including structured notes, and shareholders' equity. We monitor the funding sources, including their concentrations against certain limits, according to their counter-party, currency, tenor, geography and maturity, and whether they are secured or unsecured.

Our balance sheet funding structure diagram is aligned with the NSFR framework. Loans, which comprise the largest component of our illiquid assets, are primarily funded by our core customer deposits. We also fund illiquid assets, including real estate, private equity and other long-term investments as well as the haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

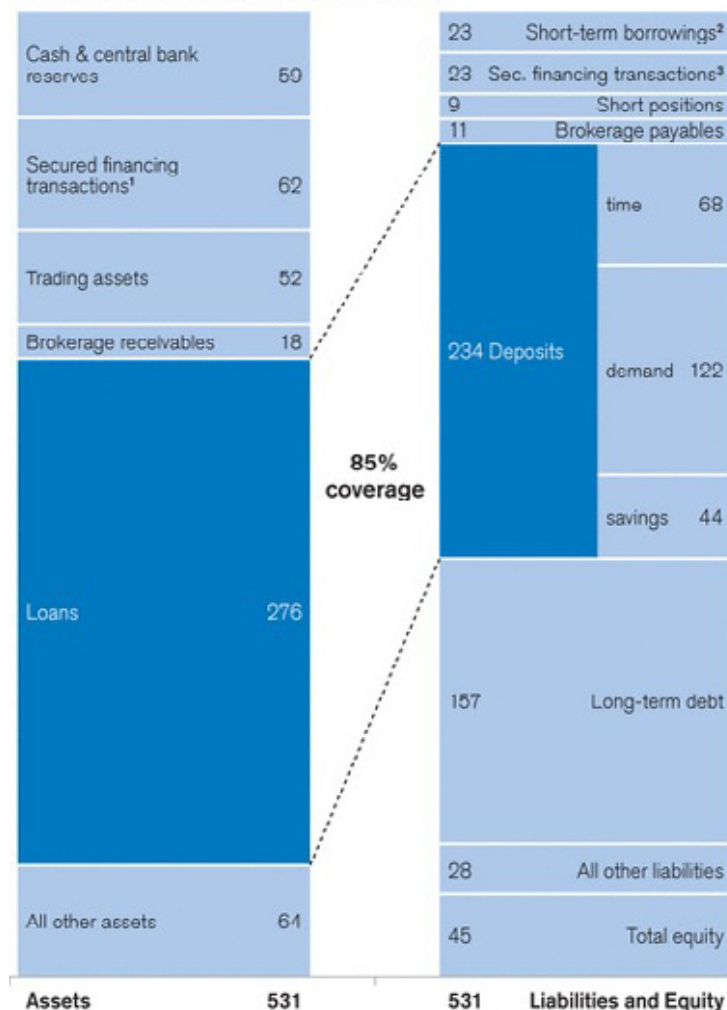

Our core customer deposits totaled CHF 234 billion as of the end of 2022, a decrease compared to CHF 391 billion as of the end of 2021, primarily attributable to significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits during the fourth quarter of 2022. Core customer deposits are from clients with whom we have a broad and long-standing relationship. Core customer deposits exclude certificates of deposits.

Our core customer deposit funding is supplemented by the issuance of long-term debt.

- Refer to the chart “Balance sheet funding structure” and “Balance sheet” in Balance sheet and off-balance sheet for further information.
- Refer to “Liquidity issues in the fourth quarter of 2022” in II – Operating and financial review – Credit Suisse – Other Information for further information.

### Balance sheet funding structure

as of December 31, 2022 (CHF billion)

Our balance sheet funding structure diagram was aligned with the NSFR framework.

<sup>1</sup> Reverse repurchase agreements including securities received as collateral.

<sup>2</sup> Included certificates of deposit (CD), commercial paper (CP) and structured notes up to 1 year.

<sup>3</sup> Repurchase agreements including obligation to return securities received as collateral.

## Funds transfer pricing

We maintain an internal funds transfer pricing system based on market rates. Our funds transfer pricing system is designed to allocate to our businesses all funding costs in a way that incentivizes their efficient use of funding. Our funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet usages and off-balance sheet contingencies. The funds transfer pricing framework ensures full funding costs allocation under normal business conditions, but it is of even greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this framework, our businesses are also credited to the extent they provide long-term stable funding.

## Contractual maturity of assets and liabilities

The following table provides contractual maturities of the assets and liabilities specified as of the end of 2022. The contractual maturities are an important source of information for liquidity risk management. However, liquidity risk is also managed based on an expected maturity that considers counterparty behavior and in addition takes into account certain off-balance sheet items such as derivatives. Liquidity risk management performs extensive analyses of counterparty behavioral assumptions under various stress scenarios.

- Refer to “Contractual obligations and other commercial commitments” in Balance sheet and off-balance sheet and “Note 34 – Guarantees and commitments” in VI – Consolidated financial statements – Credit Suisse Group for further information on contractual maturities of guarantees and commitments.

## Contractual maturity of assets and liabilities

end of 2022	On demand	Less than 1 month	Between 1 to 3 months	Between 3 to 12 months	Between 1 to 5 years	Greater than 5 years	Total
<b>Assets (CHF million)</b>

## 112 Liquidity and funding management

## Structural interest rate management

Structural interest rate risk management optimizes the preservation of earnings stability and net present value across various interest rate scenarios. Exposure to interest rate risk in the banking book arises mainly from loans and deposits (including replicated non-maturing deposits) related to our wealth management businesses. This inherent interest rate risk is aggregated in centrally managed banking books, allowing for the netting of interest rate risk exposures, but leaving the originating business with the responsibility for margin management. The remaining interest rate risk is hedged with interest rate swaps. Interest rate risk exposures from debt funding are usually hedged with interest rate swaps. Furthermore, Treasury manages the interest rate risk of the Group's net shareholders' equity according to the strategy approved by senior management.

## Debt issuances and redemptions

Our long-term debt includes senior, senior bail-in and subordinated debt issued in US-registered offerings and medium-term note programs, euro medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or from our own Swiss covered bond program established in June 2019. Historically, issuances of covered bonds were also made through our own international covered bond program.

The following table provides information on long-term debt issuances, maturities and redemptions in 2022, excluding structured notes.

### Debt issuances and redemptions

in 2022	Senior	Senior bail-in	Sub-ordinated	Long-term debt
<b>Long-term debt (CHF billion, notional value)</b>				
<b>Issuances</b>	<b>9.4</b>	<b>15.7</b>	<b>1.5</b>	<b>26.6</b>
of which unsecured	6.4	15.7	1.5	23.6
of which secured	3.0	0.0	0.0	3.0
<b>Maturities / Redemptions</b>	<b>(8.7)</b>	<b>(8.4)</b>	<b>(1.4)</b>	<b>(18.5)</b>
of which unsecured	(7.9)	(8.4)	(1.4)	(17.7)
of which secured	(0.8)	0.0	0.0	(0.8)

Excludes structured notes.

As of the end of 2022, we had outstanding long-term debt of CHF 157.2 billion, which included senior and subordinated instruments. We had CHF 38.9 billion and CHF 17.6 billion of structured notes and covered bonds outstanding, respectively, as of the end of 2022, compared to CHF 43.1 billion and CHF 15.4 billion, respectively, as of the end of 2021.

- Refer to “Issuances and redemptions” in Capital management – Capital instruments for further information on capital issuances, including buffer and progressive capital instruments.

Short-term borrowings as shown in the balance sheet funding structure diagram decreased 43% to CHF 23.2 billion as of the end of 2022 from CHF 39.8 billion as of the end of 2021, mainly related to maturities of certificates of deposit and structured notes.

We expect the Group's overall funding needs to reduce over time as a result of strategic transformation in line with balance sheet reduction.

- Refer to “Issuances and redemptions” in Capital management – Capital instruments for further information on capital issuances, including low-trigger and high-trigger capital instruments.

## Credit ratings

Our access to the debt capital markets and our borrowing costs depend significantly on our credit ratings. Rating agencies take many factors into consideration in determining a company's rating, including, among others, earnings performance, business mix, market position, ownership, financial strategy, level of capital, risk management policies and practices, management team and the broader outlook for the financial services industry more generally. The rating agencies may raise, lower or withdraw their ratings, or publicly announce an intention to raise or lower their ratings, at any time.

Although retail and private bank deposits are also sensitive to changes in a bank's credit ratings, the cost and availability of other sources of unsecured external funding is generally a direct function of credit ratings. Credit ratings are especially important to us when competing in certain markets and when seeking to engage in longer-term transactions, including over-the-counter (OTC) derivative instruments.

### Credit ratings downgrades in 2022

In May 2022, Standard and Poor's Global Ratings downgraded the long-term issuer credit ratings of Credit Suisse Group AG and Credit Suisse AG, and Fitch Ratings downgraded the long-term issuer default ratings of Credit Suisse Group AG and Credit Suisse AG, in each case by one notch. The outlook on these ratings was revised from “negative” to “stable”. Also in May 2022, Moody's Investors Service affirmed the senior unsecured debt ratings of Credit Suisse Group AG and the long-term senior unsecured debt and deposit ratings of Credit Suisse AG, but the outlook on these ratings was revised from “stable” to “negative”.

In August 2022, Moody's Investors Service downgraded the senior unsecured debt ratings of Credit Suisse Group AG and the long-term senior unsecured debt and deposit ratings of Credit Suisse AG, both by one notch. The "negative" outlook on these ratings was maintained. Standard and Poor's Global Ratings affirmed the long-term issuer credit ratings of Credit Suisse Group AG and Credit Suisse AG, but the outlook on these ratings was revised from "stable" to "negative". Fitch Ratings downgraded the long-term issuer default ratings of Credit Suisse Group AG and the long- and short-term issuer default ratings of Credit Suisse AG, in each case by one notch. The outlook on these ratings was revised from "stable" to "negative".

On November 1, 2022, Moody's Investors Service affirmed the senior unsecured debt ratings of Credit Suisse Group AG and downgraded the long-term senior unsecured debt and deposit ratings of Credit Suisse AG by one notch. Moody's also downgraded all the short-term ratings by one notch and maintained the "negative" outlook on all ratings. Following the affirmation of all ratings and outlooks on October 6, 2022, Standard and Poor's Global Ratings downgraded the long-term issuer credit ratings of Credit Suisse Group AG and the long- and short-term issuer credit ratings of Credit Suisse AG, in each case by one notch on November 1, 2022. The outlook on these ratings was revised from "negative" to "stable".

These downgrades in our ratings increasingly elevated our borrowing costs and limited our ability to renew maturing short-term funding and to access short-term funding markets. The downgrades have increased our cost of capital and adversely affected and may in the future continue to adversely affect the ability of our businesses to sell or market their products, engage in business transactions, particularly financing and derivative transactions, and retain our clients.

Further downgrades could amplify these challenges, require us to post additional collateral or allow counterparties to terminate transactions under certain of our financing and derivative contracts, and this in turn, could reduce our liquidity and negatively impact our operating results and financial position.

#### Collateral requirements

Our internal liquidity barometer takes into consideration contingent events associated with a three-notch downgrade in our credit ratings. According to the specific downgrade risks considered in our internal liquidity barometer and LCR calculations, the maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.6 billion, CHF 0.8 billion and CHF 0.9 billion, respectively, as of the end of 2022. If the downgrade does not involve all three rating agencies, the impact may be smaller.

#### 114 Liquidity and funding management

Potential cash outflows on these derivative contracts associated with a downgrade of our long-term debt credit ratings, such as the requirement to post additional collateral to the counterparty, the loss of re-hypothecation rights on any collateral received and impacts arising from additional termination events, are monitored and taken into account in the calculation of our liquidity requirements. There are additional derivative related risks that do not relate to the downgrade of our long-term debt credit ratings and which may impact our liquidity position, including risks relating to holdings of derivatives collateral or potential movements in the valuation of derivatives positions. The potential outflows resulting across all derivative product types are monitored as part of the LCR scenario parameters and the internal liquidity reporting.

- Refer to "Investor information" in the Appendix for further information on Group and Bank credit ratings.

#### Cash flows from operating, investing and financing activities

As a global financial institution, our cash flows are complex and interrelated and bear little relation to our net earnings and net assets. Consequently, we believe that traditional cash flow analysis is less meaningful in evaluating our liquidity position than the liquidity and funding policies described above. Cash flow analysis may, however, be helpful in highlighting certain macro trends in our business.

For the year ended December 31, 2022, net cash provided by **operating activities** of continuing operations was CHF 13.8 billion, primarily reflecting an increase in net trading assets and liabilities, partially offset by valuation adjustments relating to long-term debt and a decrease in other liabilities. Our operating assets and liabilities vary significantly in the normal course of business due to the amount and timing of cash flows. Management believes cash flows from operations, available cash balances and short-term and long-term borrowings will be sufficient to fund our operating liquidity needs.

Our **investing activities** primarily include originating loans to be held to maturity, other receivables and the investment securities portfolio. For the year ended December 31, 2022, net cash provided by investing activities from continuing operations was CHF 55.5 billion, primarily impacted by a decrease in central bank funds sold, by a decrease in loans and by the proceeds from sales of loans.

Our **financing activities** primarily include the issuance of debt and receipt of customer deposits. We pay annual dividends on our common shares. In 2022, net cash used in financing activities of continuing operations was CHF 163.9 billion, mainly reflecting the decrease in due to banks and customer deposits and the repayment of long-term debt, partially offset by the issuance of long-term debt and the issuance of common shares.

# Capital management

**As of the end of 2022, our BIS CET1 ratio was 14.1%, our BIS CET1 leverage ratio was 5.4% and our BIS tier 1 leverage ratio was 7.7%.**

## Capital strategy

Credit Suisse considers a strong and efficient capital position to be a priority. Through our capital strategy, our goal is to strengthen our capital position and optimize the use of risk-weighted assets (RWA), particularly in light of emerging regulatory capital requirements.

The overall capital needs of Credit Suisse reflect management's regulatory and credit rating objectives as well as our underlying risks. Our framework considers the capital needed to absorb losses, both realized and unrealized, while remaining a strongly capitalized institution. Multi-year projections and capital plans are prepared for the Group and its major subsidiaries and reviewed throughout the year with their regulators. These plans are subject to various stress tests, reflecting both macroeconomic and specific risk scenarios. Capital contingency plans are developed in connection with these stress tests to ensure that possible mitigating actions are consistent with both the amount of capital at risk and the market conditions for accessing additional capital.

## Regulatory framework

Credit Suisse is subject to the Basel framework, as implemented in Switzerland, as well as Swiss legislation and regulations for systemically important banks, which include capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency.

The Basel framework describes a range of options for determining capital requirements in order to provide banks and supervisors the ability to select approaches that are most appropriate for their operations and their financial market infrastructure. In general, Credit Suisse has adopted the most advanced approaches, which align with the way that risk is internally managed and provide the greatest risk sensitivity.

Our capital metrics fluctuate during any reporting period in the ordinary course of business.

## BIS requirements

The BCBS, the standard setting committee within the Bank for International Settlements (BIS), issued the Basel framework, with minimum capital requirements and conservation and countercyclical buffers, risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold adequate capital, mainly in the form of common equity.

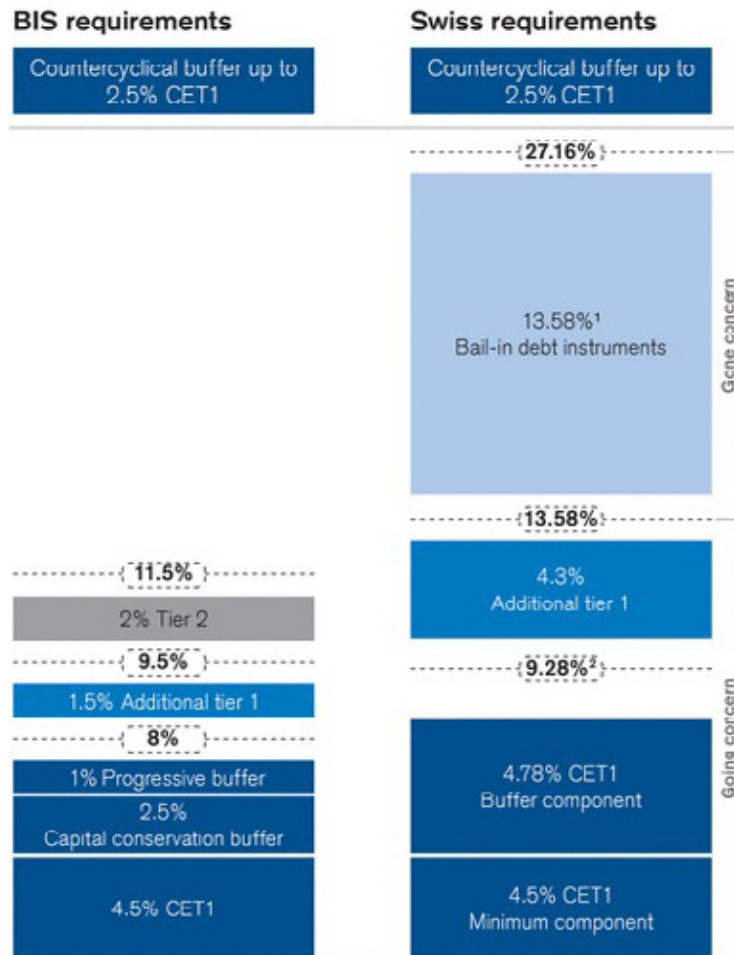

Under the Basel framework, the minimum common equity tier 1 (CET1) requirement is 4.5% of RWA. In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIBs). The Financial Stability Board (FSB) identified Credit Suisse as a G-SIB. A progressive buffer of 1% applied to Credit Suisse in 2022 and will remain unchanged for 2023.

CET1 capital is subject to certain regulatory deductions and other adjustments to common equity, including the deduction of deferred tax assets for tax-loss carry-forwards, goodwill and other intangible assets.

In addition to the CET1 requirements, there is also a requirement for 1.5% of additional tier 1 capital and 2% of tier 2 capital. These requirements may also be met with CET1 capital. To qualify as additional tier 1 under the Basel framework, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125% as well as a trigger at the point of non-viability.

## Capital frameworks for Credit Suisse

Reflects the updated capital and leverage requirements, effective September 30, 2022, resulting from the assessment of surcharges.

<sup>1</sup> Does not include any rebates for resolvability.

<sup>2</sup> Does not include the FINMA Pillar 2 capital add-on relating to the supply chain finance funds matter.

The Basel framework further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1. This requirement is imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of systemwide risk.

Banks are required to maintain a tier 1 leverage ratio of 3%.

### Swiss requirements

The legislation implementing the Basel framework in Switzerland in respect of capital requirements for systemically important banks, including Credit Suisse, goes beyond the Basel minimum standards for systemically important banks.

Under the Capital Adequacy Ordinance, Swiss banks classified as systemically important banks operating internationally, such as Credit Suisse, are subject to two different minimum requirements for loss-absorbing capacity: such banks must hold sufficient

capital that absorbs losses to ensure continuity of service (going concern requirement), and they must issue sufficient debt instruments to fund an orderly resolution without recourse to public resources (gone concern requirement).

Going concern capital and gone concern capital together form our total loss-absorbing capacity (TLAC). The going concern and gone concern requirements are generally aligned with the FSB's total loss-absorbing capacity standard.

Under the Capital Adequacy Ordinance's grandfathering provisions, additional tier 1 capital instruments with a low trigger qualify as going concern capital until their first call date.

Additionally, there are FINMA decrees that apply to Credit Suisse, as a systemically important bank operating internationally, including capital adequacy requirements as well as liquidity and risk diversification requirements.

Banks that do not maintain the minimum requirements may be limited in their ability to pay dividends and make discretionary bonus payments and other earnings distributions.

### Going concern requirements

The going concern requirement for a G-SIB consists of (i) base requirements of 12.86% of RWA and 4.5% of leverage exposure; and (ii) add-ons for market share in the domestic lending and deposit business and for the size of the bank as measured by total exposures (surcharges), which reflect the G-SIB's systemic importance. Currently, for Credit Suisse, the going concern surcharge is 0.72% for the RWA ratio and 0.25% for the leverage ratio. For Credit Suisse, this translates into a going concern requirement before any counter-cyclical buffers of 13.58% of RWA and 4.75% of leverage exposure. The going concern requirement for Credit Suisse shall be met with minimum CET1 capital of 9.28% for the RWA ratio and 3.25% for the leverage ratio, with the remainder to be met with a maximum of 4.3% additional tier 1 capital for the RWA ratio and 1.5% for the leverage ratio. The additional tier 1 capital includes high-trigger capital instruments that would be converted into common equity or written down if the CET1 ratio falls below 7%. Additionally, the going concern requirement may include countercyclical capital buffers, which are applicable to all banks.

### Gone concern requirements

In 2022, the gone concern requirement of a G-SIB was equal to its total going concern requirement. The gone concern requirement does not include any countercyclical buffers. As of December 31, 2022, Credit Suisse was subject to a gone concern requirement of 13.58% of RWA and a 4.75% of leverage exposure, less any capital rebates for resolvability.

- Refer to "Regulatory developments" for additional information.

The gone concern requirement should primarily be fulfilled with bail-in instruments that are designed to absorb losses after the write-down or conversion into equity of regulatory capital of a G-SIB in a restructuring scenario, but before the write-down or conversion into equity of other senior obligations of the G-SIB. Bail-in instruments do not feature capital triggers that may lead to a write-down and/or a conversion into equity outside of restructuring, but only begin to bear losses once the G-SIB is formally in restructuring proceedings and FINMA orders capital measures (i.e., a write-down and/or a conversion into equity) in the restructuring plan.

Bail-in instruments must fulfill certain criteria in order to qualify under the gone concern requirement, including FINMA approval. In addition to bail-in instruments, the gone concern requirement may further be fulfilled with other capital instruments, including CET1, additional tier 1 capital instruments or tier 2 capital instruments.

### FINMA decrees

The SNB designated Credit Suisse as a financial group of systemic importance under applicable Swiss law. FINMA requires the Group to fully comply with the special requirements for systemically important banks operating internationally, which include capital adequacy requirements and also specify liquidity and risk diversification requirements.

In December 2013, FINMA issued a decree (2013 FINMA Decree), specifying capital adequacy requirements for the Bank on a stand-alone basis (Bank parent company), and for the Bank and the Group, each on a consolidated basis, as systemically important banks.

In October 2017, FINMA issued an additional decree with respect to the regulatory capital requirements of the Bank parent company (2017 FINMA Decree), specifying the treatment of investments in subsidiaries for capital adequacy purposes. This decree partially replaced certain aspects of the 2013 FINMA Decree, but all other aspects of that decree remain in force. The changes aim to create a capital adequacy framework for the Bank parent company that is more comparable to relevant international frameworks and does not rely on exemptions from, or corrections of, the basic framework applicable to all Swiss banks. The changes only apply to the going concern capital requirements for the Bank parent company.

The 2017 FINMA Decree requires the Bank parent company to risk-weight both direct and indirect investments in subsidiaries, with the initial risk-weight set at 200%. Beginning in 2019, the risk-weights began to increase over a 10-year period for direct and indirect investments in Swiss subsidiaries by 5% per year and for direct and indirect investments in foreign subsidiaries by 20% per year, up to 250% and 400%, respectively, by 2028. In 2022, investments in Swiss-domiciled subsidiaries were risk-weighted at 220% and investments in foreign-domiciled subsidiaries were risk-weighted at 280%.

The 2017 FINMA Decree also applies an adjustment (referred to as a regulatory filter) to an impact on CET1 capital arising from the accounting change under applicable Swiss banking rules for the Bank parent company's participations in subsidiaries from the portfolio valuation method to the individual valuation method. In contrast to the accounting treatment, the regulatory filter allows Credit Suisse to measure the regulatory capital position as if the Bank parent company had maintained the portfolio valuation method.

The valuation of the Bank parent company's participations in subsidiaries is reviewed for potential impairment on at least an annual basis as of December 31 and at any other time that events or circumstances indicate that the participations' value may be impaired. There were several triggering events during 2022, including the comprehensive strategic review announced on October 27, 2022, adverse market and economic conditions, a decline in the Group's share price and significant outflows of deposits and assets under management in the fourth quarter of 2022. Additionally, the review of the Credit Suisse legal entities' five-year financial plans was conducted in the fourth quarter of 2022. Based on the reviews performed during the year, which included the support of an independent valuation specialist appointed by Credit Suisse to advise on the valuation of certain participations, the Bank parent company recorded a net participation impairment for regulatory purposes of CHF 7.4 billion in 2022.

The Bank parent company's Swiss CET1 ratio increased to 12.2% as of December 31, 2022 from 11.7% as of December 31, 2021, primarily reflecting significantly reduced RWA levels. The Swiss CET1 ratio was also impacted by net losses and significant participation impairments, partially offset by capital contributions from Credit Suisse Group AG relating to the capital increases executed in the fourth quarter of 2022.

- Refer to [credit-suisse.com/regulatorydisclosures](https://www.credit-suisse.com/regulatorydisclosures) for the Bank parent company's regulatory disclosures.

## Swiss capital and leverage requirements for Credit Suisse

As of the end of 2022	Capital ratio	Leverage ratio
<b>Capital components (%)</b>		
CET1 – minimum	4.5	1.5
Additional tier 1 – maximum	3.5	1.5
<b>Minimum component</b>	<b>8.0</b>	<b>3.0</b>
CET1 – minimum	4.78	1.75
Additional tier 1 – maximum	0.8	0.0
<b>Buffer component</b>	<b>5.58</b>	<b>1.75</b>
<b>Going concern</b>	<b>13.58</b>	<b>4.75</b>
of which base requirement	12.86	4.5
of which surcharge	0.72	0.25
<b>Gone concern</b>	<b>13.58</b>	<b>4.75</b>
of which base requirement	12.86	4.5
of which surcharge	0.72	0.25
<b>Total loss-absorbing capacity</b>	<b>27.16</b>	<b>9.5</b>

Reflects the updated capital and leverage requirements resulting from the assessment of surcharges.

Does not include the FINMA Pillar 2 capital add-on of CHF 1.9 billion relating to the supply chain finance funds matter, the effects of the countercyclical buffers and any rebate for resolvability.

As of the end of 2022, for the Group and the Bank, the rebate for resolvability for the capital ratios was 3.113%. For the Group and the Bank, the rebate for resolvability for leverage ratios was 1.0%. Net of these rebates, the gone concern ratios for capital and leverage for the Group and the Bank were 10.468% and 3.75%, respectively.

### Other requirements

Requirements in Switzerland include an extended countercyclical buffer, which is based on the BIS countercyclical buffer that could require banks to hold up to 2.5% of RWA in the form of CET1 capital. The extended countercyclical buffer relates to a requirement that can be imposed by national regulators when credit growth is deemed to be excessive and leading to the build-up of system-wide risk. The Swiss Federal Council has not activated the BIS extended countercyclical buffer for Switzerland.

However, the Swiss Federal Council may from time to time require banks to hold additional CET1 capital for certain credit exposures (Swiss countercyclical capital buffer). Currently, banks, such as Credit Suisse, are required to hold additional CET1 capital amounting to 2.5% of RWA pertaining to mortgage loans that are directly or indirectly secured by residential real estate in Switzerland (Swiss sectoral countercyclical capital buffer).

- Refer to “Regulatory developments” for additional information.

FINMA requirements include capital charges for mortgages that finance owner-occupied residential property in Switzerland (mortgage multiplier). The mortgage multiplier applies for purposes of both BIS and FINMA requirements.

## 118 Capital management

## Other regulatory disclosures

In connection with the Basel framework, certain regulatory disclosures for the Group and certain of its subsidiaries are required. The Group’s Pillar 3 disclosure, regulatory disclosures, additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments and total loss-absorbing capacity-eligible instruments that form part of the eligible capital base and total loss-absorbing capacity resources, G-SIB financial indicators, reconciliation requirements, leverage ratios and certain liquidity disclosures as well as regulatory disclosures for subsidiaries can be found on our website.

- Refer to [credit-suisse.com/regulatorydisclosures](https://www.credit-suisse.com/regulatorydisclosures) for additional information.

## Regulatory developments

In January 2022 and at the request of the Swiss National Bank, the Swiss Federal Council reactivated the Swiss sectoral countercyclical capital buffer, in light of the recent developments in the Swiss real estate and mortgage markets. Effective September 30, 2022, banks, such as Credit Suisse, are required to hold additional CET1 capital amounting to 2.5% of RWA pertaining to mortgage loans that are directly or indirectly secured by residential real estate in Switzerland. The Swiss sectoral countercyclical capital buffer serves to strengthen the banking sector’s resilience in the event of increased vulnerabilities in the Swiss mortgage and residential real estate markets.

In March 2022, FINMA published the results of its annual assessment of the recovery and resolution planning of the Swiss systemically important financial institutions. In accordance with this assessment, effective July 1, 2022, the Group was eligible for the maximum potential rebates for resolvability relating to the gone concern requirement.

In July 2022, FINMA communicated the results of its annual assessment of surcharges for the Group’s market share in Switzerland. In accordance with this assessment, effective June 30, 2022, the Group’s surcharge relating to the RWA ratio decreased from 0.72% to 0.36% and the surcharge relating to the leverage ratio decreased from 0.25% to 0.125%.

In October 2022, FINMA communicated the results of its reassessment of the Group’s surcharges requirement based on leverage exposure. In accordance with this reassessment, effective September 30, 2022, the Group’s surcharge relating to the RWA ratio decreased from 0.72% to 0.36% and the surcharge relating to the leverage ratio decreased from 0.25% to 0.125%. The changes in surcharge requirements for the Group’s market share and leverage exposure resulted in a revised going concern (before any countercyclical buffer) and gone concern requirement of 13.58%, in each case, for the RWA ratio and 4.75%, in each case, for the leverage ratio, excluding rebates for resolvability under the gone concern requirement.

In November 2022, the Swiss Federal Council enacted the revised Bank Law and the revised Banking Ordinance, as well as certain other revised ordinances, effective as of January 1, 2023. Among other things, the revision includes certain amendments to the Banking Ordinance and the Capital Adequacy Ordinance under which the current rebate system on certain capital requirements is replaced by an incentive system. As of January 1, 2023, in accordance with the revised Capital Adequacy Ordinance, the former rebates for resolvability are not applicable and the gone concern capital requirements for the Group and the Bank are reduced from 100% to 75% of the going concern capital requirements, including applicable surcharge requirements for the Group's market share and leverage exposure, subject to a floor of 10% for the RWA ratio and 3.75% for the leverage ratio. This results in a gone concern requirement of 10.185% for the RWA ratio and 3.75% for the leverage ratio. Going forward, FINMA will have the ability to impose additional requirements if resolvability criteria are not met. Systemically important banks operating internationally must submit the documentation on the measures prepared or implemented to meet the resolvability criteria for the first time by the end of June 2024. Accordingly, higher gone concern requirements could be imposed by FINMA after such submission.

## Capital instruments

### Capital increase

On November 23, 2022, the Group held an Extraordinary General Meeting, at which shareholders approved two capital increases. The Group completed the first capital increase on November 25, 2022 by way of a share placement of 462,041,884 newly issued shares to qualified investors resulting in gross proceeds of CHF 1.76 billion. The Group completed the second capital increase by way of a rights offering on December 9, 2022. By the end of the rights exercise period, 98.2% of the rights had been exercised for the issuance of 872,989,594 new shares. The remaining 16,378,864 newly issued shares for which rights were not exercised were sold in the market. The rights offering resulted in gross proceeds for the Group of CHF 2.25 billion. The capital increases resulted in 1,351,410,342 newly issued shares and gross proceeds for the Group of CHF 4.0 billion. Credit Suisse Group AG made capital contributions of CHF 3.89 billion to its wholly owned subsidiary Credit Suisse AG.

### Contingent capital instruments

We have issued high-trigger and low-trigger capital instruments to meet our capital requirements. The principal amount of these trigger instruments is written down to zero upon the occurrence of certain specified triggering events. These events include our CET1 ratio falling below 7% (or any lower applicable minimum

threshold), or a determination by FINMA that write-down is necessary, or that we require public sector capital support, to prevent us from becoming insolvent, bankrupt or unable to pay a material amount of our debts, or other similar circumstances. Write-down can only be prevented if FINMA, at our request, is satisfied that certain conditions exist and write-down is not required. High-trigger instruments are designed to absorb losses before our other capital instruments, including the low-trigger capital instruments. The features of low-trigger capital instruments are described below.

### Higher Trigger Capital Amount

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert into equity or be written down prior to the write-down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion into equity or write-down is referred to as the Higher Trigger Capital Amount.

The following tier 1 capital notes (collectively, Tier 1 Capital Notes), which have a trigger amount of 5.125% and qualify as low trigger capital instruments, were outstanding as of December 31, 2022:

- USD 2.5 billion 6.25% tier 1 capital notes; and
- USD 2.25 billion 7.5% tier 1 capital notes.

The following tier 2 capital notes (collectively, Tier 2 Capital Notes), which have a trigger amount of 5% and qualify as low trigger capital instruments, were outstanding as of December 31, 2022:

- USD 2.5 billion 6.5% tier 2 capital notes.

Each of the series of Tier 1 Capital Notes and Tier 2 Capital Notes qualify as low-trigger capital instruments and have a write-down feature, which means that the full principal amount of the notes will be permanently written down to zero upon the occurrence of specified triggering events. These events occur when the amount of our CET1 ratio, together with an additional ratio described below that takes into account other outstanding capital instruments, falls below 5.125% for the Tier 1 Capital Notes and 5% for the Tier 2 Capital Notes. The write-down can only be prevented if FINMA, at our request, is satisfied that certain conditions exist and determines a write-down is not required. The capital notes will also be written down upon a non-viability event, which occurs when FINMA determines that a write-down is necessary, or that we require extraordinary public sector capital support, to prevent us from becoming insolvent, bankrupt or unable to pay a material amount of our debts, or other similar circumstances.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5.125%, the Higher Trigger Capital Amount was CHF 10.5 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 4.2%, both as of the end of 2022.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5%, the Higher Trigger Capital Amount was CHF 14.7 billion and the Higher Trigger Capital Ratio was 5.9%, both as of the end of 2022.

- Refer to the table “BIS capital metrics – Group” for further information on the BIS metrics used to calculate such measures.

## Issuances and redemptions

- 2 Reflects the partial reversal of the valuation allowance relating to the reassessment of the deferred tax asset as a result of the comprehensive strategic review.
- 3 Reflects the reclassification of deferred tax assets related to the Group's tax election to accelerate the tax loss recognition of a previously recognized deferred tax asset on timing differences in 2021.
- 4 Reflects the regulatory capital impact of the issuance of Mandatory Convertible Notes, net of fees and expenses.
- 5 Reflects regulatory adjustments relating to the initial public offering of Allfunds Group and the subsequent reduction of our equity investment to below 10%.
- 6 Includes the net effect of share-based compensation and a regulatory adjustment of defined benefit pension plan assets.
- 7 Primarily reflects valuation impacts.
- 8 Includes the impact of the prescribed amortization requirement as instruments move closer to their maturity date.

Our CET1 ratio was 14.1% as of the end of 2022 compared to 14.4% as of the end of 2021. Our tier 1 ratio was 20.0% as of the end of 2022 compared to 20.3% as of the end of 2021. Our total capital ratio was 20.0% as of the end of 2022 compared to 20.5% as of the end of 2021.

CET1 capital of CHF 35.3 billion as of the end of 2022 decreased 8% compared to CHF 38.5 billion as of the end of 2021. The decrease in CET1 capital was mainly due to the net loss attributable to shareholders, which included a valuation allowance of CHF 3,655 million relating to the reassessment of deferred tax assets as a result of the comprehensive strategic review. This decrease was partially offset by the issuance of common shares relating to the capital increases and a regulatory adjustment of deferred tax assets relating to net operating losses of CHF 802 million, which included CHF 1,700 million for the partial reversal of the valuation allowance relating to the reassessment of deferred tax assets as a result of the comprehensive strategy review and a deferred tax assets reclassification of CHF (441) million related to the Group's tax election to accelerate the tax loss recognition of a previously recognized deferred tax asset on timing differences in 2021.

Additional tier 1 capital of CHF 14.7 billion as of the end of 2022 decreased 7% compared to CHF 15.8 billion as of the end of 2021, mainly due to redemptions of high-trigger capital instruments and valuation impacts, partially offset by issuances of high-trigger capital instruments.

Tier 2 capital of CHF 0.0 billion as of the end of 2022 decreased 100% compared to CHF 0.5 billion as of the end of 2021, mainly due to the impact of the prescribed amortization requirement as instruments moved closer to their maturity date.

Total eligible capital of CHF 50.0 billion as of the end of 2022 decreased 9% compared to CHF 54.9 billion as of the end of 2021, mainly reflecting the decreases in CET1 capital and additional tier 1 capital.

## Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA, which are categorized as credit, market and operational RWA. When assessing RWA, it is not the nominal size, but rather the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA.

**Credit risk** RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under the Basel framework, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1

capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in credit risk RWA. For measuring the capital requirements related to credit risk, we use the advanced internal ratings-based (A-IRB) approach. Under the A-IRB approach for measuring credit risk, risk weights are determined by using internal risk parameters for probability of default (PD), loss given default (LGD) and effective maturity. The exposure at default (EAD) is either derived from balance sheet values or by using models. For the capital requirements for counterparty credit risk, we use the internal models method (IMM) for the majority of the derivatives and the value-at-risk (VaR) model for securities financing transactions (SFT). We have also implemented the credit valuation adjustment (CVA), which covers the risk of mark-to-market losses on the expected counterparty risk arising from changes in a counterparty's credit spreads.

**Market risk** RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. For calculating the capital requirements related to market risk, the internal models and standardized approaches are used. Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge (IRC), stressed value-at-risk (VaR) and risks not in VaR (RNIV).

The IRC is a regulatory capital charge for default and migration risk on positions in the trading books and is intended to complement additional standards being applied to the VaR modeling framework, including stressed VaR. Stressed VaR replicates a VaR calculation on the Group's current portfolio, taking into account a one-year observation period relating to significant financial stress and helps reduce the pro-cyclicality of the minimum capital requirements for market risk. RNIV and stressed RNIV are risks that are not currently implemented within the Group's VaR model, such as certain basis risks, higher order risks and cross risks.

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception above four in the prior rolling 12-month period. In 2022, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

- Refer to "Market risk" in Risk management for further information.

**Operational risk** RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. We use the advanced measurement approach (AMA) to calculate the operational risk regulatory capital requirements. The AMA model covers our identified operational risk types and applies a loss distribution approach to calculate the forward-looking potential total annual operational loss.

## Risk-weighted assets – Group

as of December 31, 2022 (CHF billion)

<sup>1</sup> Includes primarily trading assets, investment securities and other investments.

<sup>2</sup> Includes central bank funds sold, securities purchased under resale agreements and central bank funds purchased, securities sold under repurchase agreements and securities lending transactions.

## Risk-weighted assets – Group

end of	Wealth Management	Investment Bank	Swiss Bank	Asset Management	Corporate Center	Group
<b>2022 (CHF million)</b>						
Credit risk	35,423	47,005	61,866	6,279	10,442	<b>161,015</b>
Market risk	2,881	10,053	82	52	1,957	<b>15,025</b>
Operational risk	16,245	17,102	7,142	2,002	32,009	<b>74,500</b>
<b>Risk-weighted assets</b>	<b>54,549</b>	<b>74,160</b>	<b>69,090</b>	<b>8,333</b>	<b>44,408</b>	<b>250,540</b>
<b>2021 (CHF million)</b>						
Credit risk	41,061	56,389	61,917	6,395	18,043	<b>183,805</b>
Market risk	2,899	11,524	88	69	1,775	<b>16,355</b>

## Risk-weighted assets movements

RWA decreased 6% to CHF 250.5 billion as of the end of 2022 from CHF 267.8 billion as of the end of 2021, mainly driven by movements in risk levels in credit risk. This decrease was partially offset by increases in internal model and parameter updates in operational and credit risk.

Excluding the foreign exchange impact, the decrease in **credit risk** was primarily driven by movements in risk levels attributable to book size, mainly due to decreases in lending exposures in Wealth Management and the Investment Bank, and the impact of the valuation allowance relating to the reassessment of deferred tax assets as a result of the comprehensive strategic review reflected in the Corporate Center. The movement also included a decrease in derivative exposures and secured financing exposures, mainly in the Investment Bank, including the impact of the substantially completed exit of the prime services franchise and

deleveraging resulting from the significant deposit outflows the Group experiences in the fourth quarter of 2022, and a decrease in our equity exposures relating to the sale of our investment in Allfunds Group reflected in Wealth Management.

Excluding the foreign exchange impact, the decrease in **market risk** was primarily driven by internal model and parameter updates in the Investment Bank, mainly reflecting time series updates as COVID-19 volatility rolled out of the two-year VaR window.

Excluding the foreign exchange impact, the increase in **operational risk** was mainly driven by internal model and parameter updates based on changes made in the AMA model to reflect increased litigation provisions, in addition to the annual recalibration of the model. Allocation to divisions has also changed year-on-year due to annual recalibration of allocation keys performed in the fourth quarter of 2022.

<sup>1</sup> Represents changes in portfolio size.

<sup>2</sup> Represents changes in average risk weighting across credit risk classes.

<sup>3</sup> Represents movements arising from internally driven updates to models and recalibrations of model parameters specific only to Credit Suisse.

<sup>4</sup> Represents movements arising from externally mandated updates to models and recalibrations of model parameters specific only to Credit Suisse.

## 124 Capital management

## Leverage metrics

Credit Suisse has adopted the BIS leverage ratio framework, as issued by the BCBS and implemented in Switzerland by FINMA. Under the BIS framework, the leverage ratio measures tier 1 capital against the end-of-period exposure. As used herein, lever age exposure consists of period-end balance sheet assets and prescribed regulatory adjustments, such as derivative financial instruments, securities financing transactions and off-balance sheet exposures.

### Leverage exposure – Group

end of	2022	2021
<b>Leverage exposure (CHF million)</b>		
Wealth Management	179,378	233,228
Investment Bank	211,601	347,774
Swiss Bank	220,026	247,509
Asset Management	2,499	2,737
Corporate Center	37,047	57,889
<b>Leverage exposure</b>	<b>650,551</b>	<b>889,137</b>

The leverage exposure of CHF 650.6 billion as of the end of 2022 decreased 27% compared to CHF 889.1 billion as of the end of 2021. The movement was mainly due to a decrease in the consolidated balance sheet. The balance sheet decrease was primarily due to lower HQLA, mainly in the Investment Bank and Wealth Management, reflecting a significant reduction in cash held at central banks and reductions in non-HQLA, both as a result of the deposit outflows the Group experiences in the fourth quarter of 2022. The decrease also reflected certain other business reductions.

- Refer to “Balance sheet and off-balance sheet” for further information on the movement in the Group’s consolidated balance sheet.

### Leverage exposure components – Group

end of	2022	2021	% change
<b>Leverage exposure (CHF million)</b>			
<b>Total assets</b>	<b>531,358</b>	<b>755,833</b>	(30)
<b>Adjustments</b>			
Difference in scope of consolidation and tier 1 capital deductions <sup>1</sup>	(8,518)	(9,386)	(9)
Derivative financial instruments	43,642	55,901	(22)
Securities financing transactions	2,402	(8,546)	—
Off-balance sheet exposures	78,811	93,286	(16)
Other	2,856	2,049	39
<b>Total adjustments</b>	<b>119,193</b>	<b>133,304</b>	(11)
<b>Leverage exposure</b>	<b>650,551</b>	<b>889,137</b>	(27)

<sup>1</sup> Includes adjustments for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation and tier 1 capital deductions related to balance sheet assets.

### BIS leverage metrics – Group

end of	2022	2021	% change
<b>Capital and leverage exposure (CHF million)</b>			
CET1 capital	35,290	38,529	(8)
Tier 1 capital	50,026	54,373	(8)
Leverage exposure	650,551	889,137	(27)
<b>Leverage ratios (%)</b>			
CET1 leverage ratio	5.4	4.3	—
Tier 1 leverage ratio	7.7	6.1	—

### BIS leverage ratios – Group

The CET1 leverage ratio was 5.4% as of the end of 2022, compared to 4.3% as of the end of 2021, reflecting significantly lower leverage exposure and higher CET1 capital. The tier 1 leverage ratio was 7.7% as of the end of 2022, compared to 6.1% as of the end of 2021, mainly reflecting significantly lower leverage exposure.

## Swiss metrics

### Swiss capital metrics

As of the end of 2022, our Swiss CET1 capital was CHF 35.3 billion and our Swiss CET1 ratio was 14.1%. Our going concern capital was CHF 50.0 billion and our going concern capital ratio was 19.9%. Our gone concern capital was CHF 49.1 billion and our gone concern capital ratio was 19.6%. Our total loss-absorbing capacity was CHF 99.1 billion and our TLAC ratio was 39.5%.

### Swiss capital metrics – Group

end of	2022	2021	% change
<b>Swiss capital and risk-weighted assets (CHF million)</b>

Rounding differences may occur. Does not include the FINMA Pillar 2 capital add-on relating to the supply chain finance funds matter, the effects of the countercyclical buffers and any rebates for resolvability.

## Swiss leverage metrics

The leverage exposure used in the Swiss leverage ratios is measured on the same period-end basis as the leverage exposure for the BIS leverage ratio. As of the end of 2022, our Swiss CET1 leverage ratio was 5.4%, our going concern leverage ratio was 7.7%, our gone concern leverage ratio was 7.6% and our TLAC leverage ratio was 15.2%.

## Bank regulatory disclosures

The following capital, RWA and leverage disclosures apply to the Bank. The business of the Bank is substantially the same as that of the Group, including business drivers and trends relating to capital, RWA and leverage metrics.

- Refer to “BIS capital metrics”, “Risk-weighted assets”, “Leverage metrics” and “Swiss metrics” for further information.

### BIS capital metrics – Bank

end of	2022	2021	% change
<b>Capital and risk-weighted assets (CHF million)</b>			
CET1 capital	40,987	44,185	(7)
Tier 1 capital	54,843	59,110	(7)
Total eligible capital	54,843	59,589	(8)
Risk-weighted assets	249,536	266,934	(7)
<b>Capital ratios (%)</b>			
CET1 ratio	16.4	16.6	—
Tier 1 ratio	22.0	22.1	—
Total capital ratio	22.0	22.3	—

The Bank’s CET1 ratio was 16.4% as of the end of 2022 compared to 16.6% as of the end of 2021. The Bank’s tier 1 ratio was 22.0% as of the end of 2022 compared to 22.1% as of the end of 2021. The Bank’s total capital ratio was 22.0% as of the end of 2022 compared to 22.3% as of the end of 2021.

CET1 capital of CHF 41.0 billion as of the end of 2022 decreased 7% compared to CHF 44.2 billion as of the end of 2021. The decrease in CET1 capital was mainly due to the net loss attributable to shareholders, which included a valuation allowance of CHF 3,655 million relating to the reassessment of deferred tax assets as a result of the comprehensive strategic review. These decreases were partially offset by a capital contribution from the Group following the Group’s issuance of common shares.

Additional tier 1 capital of CHF 13.9 billion as of the end of 2022 decreased 7% compared to CHF 14.9 billion as of the end of 2021, mainly due to redemptions of high-trigger capital instruments and valuation impacts, partially offset by issuances of high-trigger capital instruments.

### Eligible capital and risk-weighted assets – Bank

end of	2022	2021	% change
<b>Eligible capital (CHF million)</b>			
<b>Total shareholders’ equity</b>	<b>47,871</b>	<b>47,390</b>	<b>1</b>
Regulatory adjustments <sup>1</sup>	(483)	(670)	(28)
Other adjustments <sup>2</sup>	(6,401)	(2,535)	153
<b>CET1 capital</b>	<b>40,987</b>	<b>44,185</b>	<b>(7)</b>
Additional tier 1 instruments	13,856 <sup>3</sup>	14,925	(7)
<b>Additional tier 1 capital</b>	<b>13,856</b>	<b>14,925</b>	<b>(7)</b>
<b>Tier 1 capital</b>	<b>54,843</b>	<b>59,110</b>	<b>(7)</b>
Tier 2 low-trigger capital instruments (5% trigger)	0	479	(100)
<b>Tier 2 capital</b>	<b>0</b>	<b>479</b> <sup>4</sup>	<b>(100)</b>
<b>Total eligible capital</b>	<b>54,843</b>	<b>59,589</b> <sup>4</sup>	<b>(8)</b>
<b>Risk-weighted assets by risk type (CHF million)</b>			
Credit risk	160,011	182,952	(13)
Market risk	15,025	16,355	(8)
Operational risk	74,500	67,627	10
<b>Risk-weighted assets</b>	<b>249,536</b>	<b>266,934</b>	<b>(7)</b>

<sup>1</sup> Includes certain adjustments, such as a cumulative dividend accrual.

<sup>2</sup> Includes certain deductions, such as goodwill, other intangible assets and certain deferred tax assets.

<sup>3</sup> Consists of high-trigger and low-trigger capital instruments. Of this amount, CHF 10.5 billion consists of capital instruments with a capital ratio write-down trigger of 7% and CHF 3.4 billion consists of capital instruments with a capital ratio write-down trigger of 5.125%.

<sup>4</sup> Amounts are shown on a look-through basis. Certain tier 2 instruments were subject to phase out and are no longer eligible as of January 1, 2022. As of 2021, total eligible capital was CHF 59,811 million, including CHF 222 million of such instruments, and the total capital ratio was 22.4%.

Tier 2 capital of CHF 0.0 billion as of the end of 2022 decreased 100% compared to CHF 0.5 billion as of the end of 2021, mainly due to the impact of the prescribed amortization requirement as instruments moved closer to their maturity date.

The Bank’s total eligible capital of CHF 54.8 billion decreased 8% as of the end of 2022 compared to CHF 59.6 billion as of the end of 2021, mainly reflecting the decreases in CET1 capital and additional tier 1 capital.

RWA decreased CHF 17.4 billion to CHF 249.5 billion as of the end of 2022 compared to CHF 266.9 billion as of the end of 2021.

### Leverage exposure components – Bank

## Shareholders' equity

### Group

The Group's total shareholders' equity was CHF 45.1 billion as of the end of 2022 compared to CHF 44.0 billion as of the end of 2021. Total shareholders' equity was positively impacted by gains on fair value elected liabilities relating to credit risk and the CHF 4.0 billion issuance of common shares in connection with the capital increases, offset by the net loss attributable to shareholders and losses on cash flow hedges.

- Refer to the "Consolidated statements of changes in equity" in VI – Consolidated financial statements – Credit Suisse Group for further information on the Group's total shareholders' equity.

### Bank

The Bank's total shareholders' equity was CHF 47.9 billion as of the end of 2022 compared to CHF 47.4 billion as of the end of 2021. Total shareholders' equity was positively impacted by gains on fair value elected liabilities and a capital contribution from the Group following the issuance of common shares, offset by a net loss attributable to shareholders and losses on cash flow hedges.

- Refer to the "Consolidated statements of changes in equity" in VIII – Consolidated financial statements – Credit Suisse (Bank) for further information on the Bank's total shareholders' equity.

<sup>1</sup> Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

## Foreign exchange exposure

Foreign exchange risk associated with investments in branches, subsidiaries and affiliates is managed within defined parameters that create a balance between the interests of stability of capital adequacy ratios and the preservation of Swiss franc shareholders' equity. Foreign exchange risk associated with the nonfunctional currency net assets of branches and subsidiaries is managed through a combination of forward-looking and concurrent backward-looking hedging activity, which is aimed at reducing the foreign exchange rate induced volatility of reported earnings.

## Share purchases

The Swiss Code of Obligations limits a corporation's ability to hold or repurchase its own shares. We may only repurchase shares if we have sufficient free reserves to pay the purchase price, and if the aggregate nominal value of the repurchased shares does not exceed 10% of our nominal share capital. Furthermore, we must create a special reserve in our parent company's financial statements in the amount of the purchase price of the acquired shares. In our consolidated financial statements, own shares are recorded at cost and reported as treasury shares, resulting in a reduction in total shareholders' equity. Shares repurchased by us do not carry any voting rights at shareholders' meetings.

For 2022, there was no publicly announced share repurchase program in place. We purchased 1,388.1 million treasury shares and sold or re-issued 1,347.7 million treasury shares. The treasury shares were purchased through open market transactions, predominantly for market-making purposes and facilitating customer orders and to meet the Group's delivery obligations with respect to share-based compensation. As of December 31, 2022, the Group held 60.9 million treasury shares.

- Refer to "Note 27 – Accumulated other comprehensive income and additional share information" in VI – Consolidated financial statements – Credit Suisse Group for information on movement in treasury shares.

<b>Total share purchases</b>	<b><u>1,388.1</u></b>	<b><u>—</u></b>

**1** We purchased 1,388.1 million shares in 2022 through open market transactions, predominantly for market-making purposes and facilitating customer orders as well as to meet the Group's delivery obligations with respect to share-based compensation.

## Dividends and dividend policy

Under the Swiss Code of Obligations, dividends may be paid out only if and to the extent the corporation has distributable voluntary retained earnings or distributable legal reserves. In addition, for holding companies, legal reserves may be distributed if they exceed, after deduction of any accumulated losses and reserves for own shares held by subsidiaries, 20% of the share capital specified in the commercial register. Furthermore, dividends may be paid out only after shareholder approval. The Board of Directors may propose that a dividend be paid out, but cannot itself set the dividend. In Switzerland, the auditors are required to confirm whether the appropriation of retained earnings is in accordance with Swiss law and the company's articles of incorporation. In practice, the shareholders usually approve the dividend proposal of the Board of Directors. Dividends are usually due and payable after the shareholders' resolution relating to the allocation of profits has been passed. Under the Swiss Code of Obligations, the statute of limitations in respect of claiming the payment of dividends that have been declared is five years.

The dividend payment made in 2022 for the financial year 2021 consisted of a cash distribution of CHF 0.10 per share. 50% of the distribution was paid out of capital contribution reserves, free of Swiss withholding tax and not subject to income tax for Swiss resident individuals holding the shares as a private investment, and 50% was paid out of retained earnings, net of 35% Swiss withholding tax.

Our dividend payment policy seeks to provide investors with an efficient form of capital distribution relative to earnings. Our dividend payment policy is to pay a cash dividend per share, subject to performance and the decision of the Board of Directors and approval of our shareholders in due course.

Our Board of Directors proposes to the shareholders at the Annual General Meeting on April 4, 2023 a cash distribution of CHF 0.05 per share for the financial year 2022, subject to Annual General Meeting approval.

Reflecting our holding company structure, the Group is not an operating company and holds investments in subsidiaries. It is therefore reliant on the dividends of its subsidiaries to pay shareholder dividends and service its long-term debt. The subsidiaries of the Group are generally subject to legal restrictions on the amount of dividends they can pay. The amount of dividends paid by operating subsidiaries is determined after consideration of the expectations for future results and growth of the operating businesses.

- Refer to “Proposed distribution out of capital contribution reserves” in VII – Parent company financial statements – Credit Suisse Group – Proposed appropriation of accumulated losses and capital distribution for further information on dividends.

# Risk management

**As of the end of 2022, the Group had a gross loan portfolio of CHF 265.6 billion, gross impaired loans of CHF 3.4 billion and, in 2022, an average risk management VaR of USD 49 million.**

In 2022, we continued to strengthen our risk management capabilities. These improvements supported the navigation of the macroeconomic/geopolitical turmoil, notably Russia's invasion of Ukraine. We initiated risk appetite adjustments to support the strategic changes of the Group, while continuing to drive our culture transformation.

Our discussion of risk management includes the following main sections:

- **Key risk developments** provides an overview of topics with an actual or potential impact on risk management that have been important for the Group.
- **Risk oversight and governance** provides an overview on oversight, culture and key management bodies and committees covering risk management matters.
- **Risk appetite framework** provides an overview on key aspects and our process of risk appetite setting as well as the types of risk constraints we apply.
- **Risk coverage and management** provides an overview of our main risk types. For each of the risk types presented, we provide our definition of this risk type, sources of this risk, our approach to evaluation and management of this risk and related governance.
- **Risk portfolio analysis** provides quantitative information and discussion of our risk exposure, primarily in relation to credit and market risk.

## Key risk developments

We are closely monitoring the following key risk and global economic developments as well as the potential effects on our operations and businesses, including through the reassessment of financial plans and the development of stress scenarios that take into account potential additional negative impacts.

### Liquidity risk management

As previously disclosed, during early fourth quarter of 2022, Credit Suisse began experiencing significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits. However, as the quarter progressed, these outflows stabilized to much lower levels but had not yet reversed by year end. While these outflows led the bank to partially utilize liquidity buffers at the Group and legal entity level, and we fell below certain legal entity level requirements, at the Group level we always maintained

the core regulatory requirements of the liquidity coverage ratio (LCR) and the net stable funding ratio (NSFR). Remediation plans were prepared, initiated and implemented to mitigate these outflows, including accessing the public and private markets.

### Russia's invasion of Ukraine

In response to Russia's invasion of Ukraine in late February 2022, the US, EU, UK, Switzerland and other countries across the world imposed severe sanctions against Russia's financial system and on Russian government officials and Russian business leaders. We are continuously assessing the impact of sanctions already imposed, Russian government countermeasures and potential future escalations on our exposures and client relationships.

- Refer to "Other information" in II – Operating and financial review – Credit Suisse for further information.

### Inflation concerns and recession risk

In the major economies, annual inflation rates stayed far above central bank target levels for most of 2022 but started to decrease at the end of 2022. In early 2023, energy prices eased and the improved functioning of supply chains reduced the upward pressure on prices of goods. However, price pressures have transitioned to the services sector while low unemployment rates have pushed wages up. The Fed and other major central banks have slowed the pace of monetary policy tightening in late 2022 and early 2023 but have continued to stress that policy interest rates may be further increased. Further significant increases in interest rates carry the risk of triggering a recession. We periodically assess the resilience and potential vulnerabilities in our exposures, should the global economy deteriorate into recession.

### Energy supply disruptions

Russia, which is the major source of European energy imports, has significantly reduced or even halted gas flows through various pipelines to Western Europe. High energy costs are expected to squeeze consumer spending for other goods and services and increase costs across global supply chains. Furthermore, gas-intensive European industries such as chemicals and metals face the challenge of having to adjust to permanently higher energy prices. We assessed the potential portfolio implications on eurozone countries and energy-intensive industries. Also, as part of managing operational resilience and business continuity risks, we are assessing a range of energy supply shortage scenarios and have implemented mitigation measures addressing potential operational disruptions that may occur in European countries where Credit Suisse operates.

## Emerging markets

The challenges facing emerging market countries increased during 2022 and are expected to persist in 2023. In Türkiye and in some Latin American countries such as Brazil and Peru, downside risks driven by elevated debt levels and political and social instability were further exacerbated by high inflation and US dollar appreciation. China's economic activity was also adversely impacted, mainly driven by its zero COVID-19 policy, the real estate sector's troubles and weaker global demand. However, the recently announced relaxation of China's COVID-19 restrictions is expected to stimulate the country's economic recovery and support global economic growth. We continue to closely monitor and conduct frequent reviews into our emerging markets country exposures.

## Cyber risk

The financial industry continues to be increasingly reliant on technology, faces dynamic cyber threats from a variety of actors and new technology vulnerabilities are being discovered. We continue to invest in our information and cybersecurity programs in order to strengthen our ability to anticipate, detect, defend against and recover from cyber attacks. We regularly assess the effectiveness of our key controls and conduct ongoing employee training and awareness activities, including for key management personnel, in order to seek to strengthen resilience of our systems and promote a strong cyber risk culture.

## Swiss property market

Property prices remained on an upward trend in 2022 as a result of continued contained supply despite sharp increases in Swiss mortgage rates. As previously reported, the Swiss Federal Council at the request of the SNB reactivated the Swiss countercyclical capital buffer from September 2022. Since September 30, 2022, banks, such as Credit Suisse, are required to hold additional CET1 capital amounting to 2.5% of RWA pertaining to mortgage loans that are directly or indirectly secured by residential real estate in Switzerland. We regularly monitor risks in our Swiss residential mortgage loan portfolio.

## Strategy execution

On October 27, 2022, Credit Suisse announced a series of decisive actions following a strategic review conducted by the Board of Directors (Board) and Executive Board, focused on a restructuring of the Investment Bank, an accelerated cost transformation, and strengthened and reallocated capital. The strategic transformation entails significant execution risks that could adversely affect the bank. We strengthened our leadership of Credit Suisse through changes in the Board and enhanced our Executive Board with a team bringing relevant experience and a track record of execution. We are regularly monitoring market conditions as well as our operating processes and controls for heightened risk exposures and applying mitigating actions to minimize disruption to our businesses, clients, employees and operational readiness for the execution of our strategic transformation.

## Risk management oversight

Prudent risk-taking in line with the Group's strategic priorities is fundamental to our business and success. The primary objectives of risk management are to protect our financial strength and reputation, while ensuring that capital is well deployed to support business activities in line with the Group strategy. The Group's risk management framework is based on transparency, management accountability and independent oversight.

Risk management is an integral part of the business planning process with strong senior management and Board involvement. We continuously work to strengthen risk management across the Group in an effort to meet the challenges resulting from a volatile market environment and increasing complexity driven by the changing regulatory landscape. Utilizing comprehensive risk management processes and sophisticated control systems, we continuously work to minimize the negative impact that may arise from risk concentrations.

The Group's business operations are designed to facilitate a commitment to conscious and disciplined risk-taking. We believe that independent risk management, compliance and audit processes with proper management accountability are critical to the interests and concerns of stakeholders. The Group's approach to risk management is supported by the following principles:

- Establish a clear risk appetite that sets out the types and levels of risk we are prepared to take;
- Have in place risk management and compliance policies that set out authorities and responsibilities for taking and managing risks;
- Seek to establish resilient risk constraints that promote multiple perspectives on risk and reduce the reliance on single risk measures;
- Actively monitor risks and take mitigating actions where they fall outside accepted levels; and
- Breaches of risk limits, flags or tolerances are identified, analyzed and escalated, and large, repeated or unauthorized exceptions may lead to terminations, adverse adjustments to compensation or other disciplinary action.

## Culture

Our culture encompasses a shared set of values across the Group that fosters the importance, understanding and control of risk.

We seek to promote a strong risk culture where employees are empowered to take accountability for identifying and escalating risks and for challenging inappropriate actions. Expectations on risk culture are regularly communicated by senior management, reinforced through policies and training, and considered in the performance assessment and compensation processes and, with respect to employee conduct, assessed by formal disciplinary review committees. The Group's Code of Conduct is based on our shared corporate values and sets forth the behavioral expectations of our employees and members of the Board, in order to maintain and strengthen our reputation for integrity, fair dealing and measured risk-taking.

In 2022, we strengthened our approach to risk culture with the development of a risk culture framework that is made up of expected organizational “behaviors” and “foundations”. The purpose of our risk culture framework is to help us understand in more detail what a strong risk culture is and to foster it across Credit Suisse. We also started to measure our progress with a risk culture dashboard and developed a comprehensive action plan to increase awareness. As started in 2021, we have continued embedding risk culture into our performance and compensation processes. Additional activities in 2022 focused on addressing the findings from our employee survey to strengthen our culture and to further embed our organizational purpose and values.

- Refer to “Purpose & Strategy” in our Sustainability Report, available on [credit-suisse.com/sustainabilityreport](https://credit-suisse.com/sustainabilityreport), for further information on our approach to culture.

## Governance

Effective governance sets a solid foundation for comprehensive risk management discipline. The Group’s risk governance framework is based on a “three lines of defense” governance model, where each line has a specific role with defined responsibilities and works in close collaboration to identify, assess and mitigate risks.

The first line of defense represents the business area or function that allows the risk to enter the Group from clients, employees or other third parties or events and is responsible for identifying, measuring, managing and reporting risks on a front-to-back basis in line with the Board’s risk appetite. The first line of defense is fully accountable for managing risks inherent in its activities.

The second line of defense consists of independent risk management, compliance and control functions which are responsible for establishing risk management framework and associated control standards, and providing independent challenge to the activities, processes and controls carried out by the first line of defense. In this context, the Risk function (Risk), for example, is responsible for articulating and designing the risk appetite framework across the Group. The second line of defense can perform and complement the responsibility of identification, measurement, management and reporting of risks, while the first line of defense retains the overall accountability for risk management related to its activities. Independent risk management in the second line of defense is not limited to the Risk and Compliance functions.

The third line of defense is the Internal Audit function, which monitors the effectiveness of controls across various functions and operations, including risk management, compliance and governance practices.

The Group’s operations are regulated by authorities in each of the jurisdictions in which we conduct business. Central banks and other bank regulators, financial services agencies, securities agencies and exchanges and self-regulatory organizations

are among the regulatory authorities that oversee our businesses. FINMA is our primary regulator.

- Refer to “Regulation and supervision” in I – Information on the company for further information.

The Group’s governance includes a committee structure and a comprehensive set of corporate policies which are developed, reviewed and approved by the Board, the Executive Board, their respective committees, the Chief Risk Officer of the Group (CRO) and the board of directors of significant subsidiaries, in accordance with their respective responsibilities and levels of authority.

- Refer to “Board of Directors” and “Executive Board” in IV – Corporate Governance for further information.

## Board of Directors

The Board is responsible for our overall strategic direction, supervision and control, and for defining our overall tolerance for risk. In particular, the Board approves the risk management framework and sets overall risk appetite for the Group in consultation with its Risk Committee (Risk Committee), among other responsibilities and authorities defined in the Organizational Guidelines and Regulations (OGR).

The Board has six standing committees: the Governance and Nominations Committee, the Audit Committee, the Compensation Committee, the Conduct and Financial Crime Control Committee, the Risk Committee and the Digital Transformation and Technology Committee. In addition, the Board has one advisory committee, the Sustainability Advisory Committee. These committees assist the Board in fulfilling its oversight responsibilities, including risk management.

- Refer to “Board of Directors” in IV – Corporate Governance for further information.

## Executive Board

The Executive Board is responsible for establishing our strategic business plans, subject to approval by the Board, and implementing such plans. It further reviews and coordinates significant initiatives and approves Group-wide policies. The CRO and the Chief Compliance Officer of the Group (CCO) represent the Risk and Compliance functions, respectively, and provide regular information and reports to the Executive Board and the Board.

The Executive Board currently has five standing committees: the Executive Board Risk Management Committee (ExB RMC), the Group Capital Allocation and Liability Management Committee, the Credit Suisse AG Parent Capital Allocation, Liability and Risk Management Committee, Valuation Risk Management Committee and the Group Conduct Board.

- Refer to “Executive Board” in IV – Corporate Governance for further information.

## Risk function

Risk, headed by the CRO, is an independent global function responsible for providing risk management oversight and establishing a holistic risk and control framework. Risk engages with

the business divisions and aims to provide effective challenge, to enable sustainable and balanced risk taking and support the Group's long-term value creation. As part of this role, the function promotes accountability and risk ownership across the Group, defines, monitors and manages its risk appetite and implements and monitors risk relevant policies and procedures.

The organizational structure of Risk is aligned to oversee the key risk types across the business divisions and legal entities.

## Compliance function

Compliance, headed by the CCO, is an independent global function that works with the businesses to manage risks arising from the potential failure to comply with applicable laws, regulations, rules or market standards. As a second line of defense function, responsibilities include independently assessing compliance risk, executing, monitoring and testing activities and reporting on adherence to our compliance risk appetite and other significant matters to the Board and senior management. Compliance creates, implements and monitors compliance policies and procedures designed to prevent or detect compliance breaches of employees and clients. Compliance is mandated to ensure that regulatory and compliance risks are overseen and managed in the organization and is also responsible for the identification and appropriate remediation of significant breaches of the Group's compliance processes and controls. Compliance runs global risk oversight programs, for example anti-fraud, conflict of interest, cross border and financial crime compliance, and establishes and monitors policies, guidelines, procedures and controls related to potential risks such as money laundering, bribery and corruption and sanctions.

The organizational structure of Compliance is aligned to oversee our divisions as well as our regions and significant legal entities and covers global key compliance topics.

## Risk appetite framework

### Overview

We maintain a comprehensive Group-wide risk appetite framework, which is governed by a global policy and provides a robust foundation for risk appetite setting and management across the Group. A key element of the framework is a detailed statement of the Board-approved risk appetite which is aligned to our financial and capital plans. The framework also encompasses the processes and systems for assessing the appropriate level of risk appetite required to constrain our overall risk profile.

Risk capacity is the maximum level of risk that we can assume, given our current level of resources before breaching any constraints determined by liquidity and capital requirements, the operational environment and our responsibilities to depositors, shareholders, investors and other stakeholders. Risk appetite expresses the aggregate level and types of risk we are willing to assume within our risk capacity to achieve our strategic objectives and business plan. Risk profile is a

point-in-time assessment of our net risk exposures aggregated within and across each relevant risk category and is expressed in a variety of different quantitative risk metrics and qualitative risk observations. The size of our risk profile is restricted to the planned level of our risk appetite through the use of risk constraints, such as limits, flags and tolerances. In response to the Archegos matter and related regulatory observations, in 2022, Credit Suisse launched a proposal to streamline and enhance the suite of quantitative risk constraints. The enhanced risk constraints framework reduces the available constraints from five types to three: limits, flags and tolerances (the latter only for non-financial risk and model risk).

## Key aspects and process

The Group risk appetite framework is governed by an overarching global policy that encompasses the suite of specific policies, processes and systems with which the risk constraints are calibrated and the risk profile is managed. Strategic risk objectives (SROs) are effectively embedded across our organization at the Group, business division and legal entity level through a suite of different types of risk measures (quantitative and qualitative) as part of our efforts to ensure we operate within the thresholds defined by the Board. The SROs are regularly assessed as part of our continuing enhancements to our risk management processes. In February 2023, the Board approved an enhanced set of SROs to support the Group's strategic objectives which consists of:

- promoting stability of earnings to support performance in line with financial objectives;
- ensuring sound management of funding and liquidity in normal and stressed conditions;
- maintaining capital adequacy under both normal and stressed conditions;
- maintaining the integrity of our business and operations;
- controlling concentrations within position risk or revenues which may pose a material risk to the Group; and
- managing environmental, social and governance risks as well as impacts related to the provision of financial services in line with our sustainability principles and commitments.

Group-wide risk appetite is reviewed in partnership with the financial and capital planning process at least annually, based on bottom-up forecasts, risk-reward and divisional objectives that reflect planned risk usage by the businesses and top-down, in alignment with Board-driven strategic risk objectives and risk appetite. Scenario-based stress testing of financial and capital plans is an essential element in the risk appetite calibration process, through which our strategic risk objectives, financial resources and business plans are aligned. The capital plans are also analyzed using our economic capital coverage ratio, which provides a further means of assessing bottom-up risk plans with respect to available capital resources. The Group-wide risk appetite is approved through a number of internal governance forums, including the ExB RMC, the Risk Committee and, subsequently, by the Board. Ad hoc risk appetite reviews may be triggered by material market events, material loss events, material revisions to the financial and capital plans, the internal capital adequacy assessment process (ICAAP) results as well as following breaches of Board-level risk constraints.

The risk appetite statement is the formal plan, approved by the Board, for our Group-wide risk appetite. Legal entity risk appetites are set by the local legal entity board of directors within the limits established by the Group. The top-down and bottom-up risk appetite calibration process includes the following key steps:

#### Top-down:

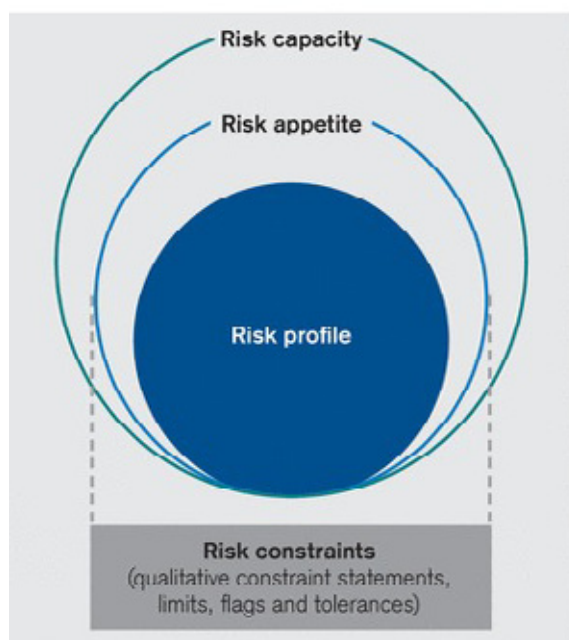

- Group-level strategic risk objectives are agreed by the Board in line with our financial and capital objectives.
- Top-down risk capacities and risk appetites are determined with reference to available resources and key thresholds, such as minimum regulatory requirements.
- A risk appetite statement is determined and approved annually by the Board, and is based on the strategic risk objectives, the comprehensive scenario stress testing of our forecasted financial results and capital requirements, and our economic capital framework. The risk appetite statement comprises quantitative and qualitative risk measures necessary for adequate control of the risk appetite across the organization. A review of the top-down and bottom-up risk appetite levels and their allocation between divisions and legal entities is performed.
- Separate legal entity risk appetite frameworks aligned to local regulatory requirements are in place for material subsidiaries. An integrated annual planning process is designed to ensure that individual legal entity risk appetites are consistent with Group levels.
- Divisional risk committees are responsible for allocating risk appetite within the respective divisions based on individual business line reviews and requirements.

#### Bottom-up:

- Planned risk levels and related risk appetite requests are provided by divisional business experts in conjunction with financial and capital plans in order to promote consistency with the business strategy. Risk plans are reviewed by the relevant risk management committees.
- Bottom-up risk forecasts are aggregated across businesses to assess divisional and Group-wide risk plans and to support management decisions on variations to existing risk appetite levels or the possible implementation of new risk appetite measures.
- The effectiveness of risk appetite in support of business strategy execution and delivery against financial objectives is assessed via a risk appetite effectiveness framework. This framework assists senior management and the Board in ensuring that appropriate levels of risk appetite are set and that the subsequent risk constraints are appropriately calibrated.
- Risk, financial and capital plans are jointly reviewed and approved by the Executive Board and the Board.

The Group-wide risk appetite framework encompasses multiple quantitative and qualitative aspects. The quantitative risk appetite aspects are measured using various metrics, including stress scenario metrics related to capital, earnings and liquidity, RWA and economic risk capital. The qualitative risk appetite aspects are used to monitor adherence to international and local laws and regulations, industry guidelines and internal policies, and are designed to manage and mitigate the Group's conduct and reputational risk.

### Risk appetite framework – key definitions

**Risk capacity** Maximum level of risk that we can assume given our current level of resources before breaching any constraints determined by capital and liquidity requirements, the operational environment and our responsibilities to depositors, shareholders, investors and other stakeholders.

**Risk appetite** Aggregate level and types of risk we are willing to assume within our risk capacity to achieve our strategic objectives and business plan.

**Risk profile** Point-in-time assessment of our net risk exposures aggregated within and across each relevant risk category and expressed in a variety of different quantitative risk metrics and qualitative risk observations.

**Risk constraints** Quantitative and qualitative measures based on forward-looking assumptions that allocate our aggregate risk appetite to businesses, legal entities, risk categories, concentrations and, as appropriate, other levels.

## Risk constraints

A core aspect of our risk appetite framework is a sound system of integrated risk constraints. These allow us to maintain our risk profile within our overall risk appetite, and encourage meaningful discussion between the relevant businesses, Risk functions and members of senior management around the evolution of our risk profile and risk appetite. Considerations include changing external factors (such as market developments, geopolitical conditions and client demand) as well as internal factors (such as financial resources, business needs and strategic views). Our risk appetite framework utilizes a suite of different types of risk constraints to reflect the aggregate risk appetite of the Group and to further cascade risk appetite across our organization, including among business divisions and legal entities. The risk constraints restrict our maximum balance sheet and off-balance sheet exposure given the market environment, business strategy and financial resources available to absorb losses. Different levels of seniority are mapped to each type of risk constraint, which require specific permanent or temporary modification, enforcement and breach response protocols. Risk constraints are monitored on a regular basis as part of our efforts to ensure they continue to fulfill their purposes.

We define the following risk constraint categories:

- **Qualitative constraints** represent constraints that are used to manage identified but unquantifiable or subjective risks, with adherence assessed by the appropriate level of constraint authority.
- **Quantitative constraints** represent constraints that are used to manage identified quantifiable risks and exist in the form of limits, flags and tolerances.

Constraint authority for the risk constraints is determined by the relevant approving body and constraints are currently in effect for all key risk governance bodies and committees including the Board, its Risk Committee and the ExB RMC. The appropriateness of the constraint types for the various risk classes within our risk appetite, including market, credit, non-financial and liquidity risk, is determined considering the respective characteristics of the various risk constraint types.

In general, risk constraints will be set in different ways depending on their respective functions and objectives. For example, certain risk constraints will reflect a maximum risk appetite, whereas others will be set closer to the current usage in order to ensure timely escalation and feedback among the relevant businesses, Risk functions and members of senior management. These considerations also influence the extent to which certain risk constraints may be introduced, modified or retired in response to changing external and internal factors.

We define the following types of risk constraints:

- **Qualitative constraint statements** are required for all qualitative constraints. Qualitative constraint statements need to be specific and to clearly define the respective risk to ensure that the risk profile for unquantifiable or subjective risks is readily assessable.

- **Limits** are specific threshold levels for a given risk metric. Limits are hard or binding thresholds that require discussion to avoid a breach and trigger immediate remediating action if a breach occurs.
- **Flags** are early warning indicators of potentially high utilizations of the Group's actual risk profile compared to its approved risk appetite, which serve primarily as a soft threshold intended to steer risk exposures. Flags can be set to calibrate or test future limits.
- **Tolerances** are designed as management constraints for non-financial risk and model risk management to initiate discussion. Breach of a tolerance level triggers review by the relevant constraint authority.

With respect to limits, flags and tolerances, established criteria are applied in the selection of the appropriate risk constraint, including the assessment of (i) the materiality of the respective risk metric with regard to its contribution to the overall Group risk appetite; (ii) the importance of the risk constraint to the organization from a qualitative perspective; (iii) the characteristic of the respective risk, e.g., risk concentrations or high priority risk for the Group; and (iv) the availability of mitigating actions to manage the risk profile of the Group in relation to the respective risk.

We have established a constraint structure which manages the Group's risk profile using multiple metrics, including VaR, scenario analysis, economic risk capital and various exposure limits at the Group level. The overall risk limits for the Group are set by the Board in consultation with its Risk Committee and are binding. In the fourth quarter of 2022, following significant deposit and net asset outflows as previously disclosed, we observed breaches of our internal Board level liquidity constraints. However, at the Group level, we maintained at all times the core regulatory requirements of the LCR and the NSFR. Additionally, following Russia's invasion of Ukraine, we breached the Russia country risk limit at the Board level, driven by counterparty ratings downgrades. We subsequently reduced the risk exposure, which remediated the breach.

Dedicated constraints are also in place to cover the specific risk profiles of individual businesses and legal entities. In the context of the overall risk appetite of the Group, as defined by the limits set by the Board in consultation with its Risk Committee, the ExB RMC is responsible for allocating key limits to divisions as deemed necessary to manage risk within individual lines of business. The divisional risk management committees and the divisional and legal entity chief risk officers are responsible for allocating risk appetite further within the organization. For this purpose, they use a detailed framework of individual risk limits designed to control risk-taking at a granular level by individual businesses and in the aggregate. The risk constraints are intended to:

- limit overall risk-taking to the Group's risk appetite;

- trigger senior management discussions with the businesses involved, risk management and governance committees in case of substantial change in the overall risk profile;
- promote consistent risk measurement across businesses;
- provide a common framework for the allocation of resources to businesses; and
- provide a basis for protecting the Group’s capital base and meeting strategic risk objectives.

The limit owners are responsible for reviewing warning thresholds for risk limits. They may set warning thresholds for potential limit excesses at any level lower than the approved limits as deemed appropriate after taking into account the nature of the underlying business. A comprehensive risk appetite constraint framework is in place which defines roles and responsibilities, including risk constraint setting and escalation authorities. Risk limit breaches that are not remediated within strictly defined remediation time-lines across all risk limits must be escalated to the CRO and the corresponding divisional Executive Board member.

## Risk coverage and management

We use a wide range of risk management practices to address the variety of risks that arise from our business activities. Policies, processes, standards, risk assessment and measurement methodologies, risk appetite constraints, and risk monitoring and reporting are key components of our risk management practices. Our risk management practices complement each other in our analysis of potential loss, support the identification of interdependencies and interactions of risks across the organization and provide a comprehensive view of our exposures. We regularly review and update our risk management practices to promote consistency with our business activities and relevance to our business and financial strategies. Our main risk types include the following:

- Capital risk
- Credit risk
- Market risk
- Non-financial risk
- Model risk
- Reputational risk
- Climate-related risks
- Business risk
- Fiduciary risk
- Pension risk
- Funding liquidity risk

Funding liquidity risk is the risk that the Group, although solvent, either does not have sufficient financial resources to enable it to meet its obligations as they fall due, or can secure such resources only at excessive cost. Management of funding liquidity risk is described in the “Liquidity and funding management” section of this report.

- Refer to “Liquidity and funding management” for further information on funding liquidity risk.

## Capital risk

### Definition

Capital risk is the risk that we do not have adequate capital to support our activities and maintain the minimum capital requirements. We maintain a robust and comprehensive framework for assessing capital adequacy, defining internal capital targets and ensuring that these capital targets are consistent with our overall risk profile and the current operating environment.

### Sources of capital risk

Capital risk results from the Group’s risk exposures, available capital resources, regulatory requirements and accounting standards.

### Evaluation and management of capital risk

The stress testing framework and economic risk capital are tools used by the Group to evaluate and manage capital risk. Our capital management framework is designed to ensure that we meet all regulatory capital requirements for the Group and its regulated subsidiaries.

- Refer to “Capital strategy” and “Regulatory framework” in Capital management for further information on the management of capital and RWA and regulatory capital requirements.

### Overview of stress testing framework

Stress testing (or scenario analysis) represents a risk management approach that formulates hypothetical questions, including what would happen to our portfolio if, for example, historic or adverse forward-looking events were to occur. A well-developed stress testing framework provides a powerful tool for senior management to identify these risks and also take corrective actions to protect the earnings and capital from undesired impacts.

Stress testing is a fundamental element of our Group-wide risk appetite framework included in overall risk management to ensure that our financial position and risk profile provide sufficient resilience to withstand the impact of severe economic conditions. Stress testing results are monitored against limits, and are used in risk appetite discussions and strategic business planning and to support our ICAAP. The ICAAP aims to identify and accurately assess the significance of material risks faced by the Group. As part of the Group-wide ICAAP process, the bank assesses its present financial position and expected changes to the current business profile, the environment in which it expects to operate, its projected business plans, projected financial position and future planned sources of capital. Within the risk appetite framework, the ExB RMC sets Group-wide and divisional stressed position loss limits to correspond to minimum post-stress capital ratios. Currently, limits are set on the basis of BIS CET1 capital ratios. Stress tests also form an integral part of the Group’s capital planning and the recovery and resolution plan (RRP) process. Within the RRP, stress tests provide the indicative scenario severity required to reach recovery and resolution capital levels.

Stress testing provides key inputs for managing the following objectives of the risk appetite framework:

- Ensuring Group-wide capital adequacy on both a regulatory basis and under stressed conditions: We run a suite of scenarios on forecasted financial metrics such as net revenues, total operating expenses, income before taxes and RWA. The post-stress capital ratios are assessed against the risk appetite of the Group.
- Maintaining stable earnings: We mainly use stress testing to quantitatively assess earnings stability risk. Earnings appetites are established and monitored as part of our efforts to contain excessive risk-taking which could compromise our earnings stability.

We also conduct externally defined stress tests that meet the specific requirements of regulators. For example, as part of various regular stress tests and analyses, FINMA requires a semi-annual loss potential analysis that includes two stress tests. For 2022, the FINMA stress tests included an extreme scenario that sees the world economy experience a severe recession, mainly as a result of the worsening of a European debt crisis, and an alternative scenario with similar severity but opposite evolution of interest rates and inflation (deflation in the former scenario versus supply-driven inflation pressures and rising interest rates in the latter scenario). In 2022, Credit Suisse developed a new persistent stagflation internal scenario to stress capital adequacy as part of its ICAAP. The persistent stagflation scenario envisages continued increases in inflation due to higher commodity prices, supply chain disruptions and overheated labor markets. Aggressive central bank interest rate hikes are envisaged to cause further tightening of financial conditions.

#### Methodology and scope of Group-wide stress testing

Stress tests are carried out to determine stressed position losses, earnings volatility and stressed capital ratios using historical, forward-looking and reverse stress testing scenarios. Stress tests also include the scenario impact on RWA through changes to market, credit and operational components. Scenarios are reviewed and updated regularly as markets and business strategies evolve.

We use historical stress testing scenarios to consider the impact of market shocks from relevant periods of extreme market disturbance. The calibration of internal scenarios is influenced by the identification of the most severe moves that have occurred in recent history. Severe flight to quality (SFTQ) is one of the key scenarios used for Group-wide stress testing and risk appetite setting. It is a combination of market shocks and defaults that reflects conditions similar to what followed the 2008/2009 financial crisis. The SFTQ scenario assumes a severe crash across financial markets, along with stressed default rates.

We use forward-looking stress testing scenarios to complement historical scenarios. The forward-looking scenarios are centered on potential macroeconomic, geopolitical or policy threats. We discuss the backdrop to several forward-looking scenarios, review a wide range of scenarios and select those that are most relevant to the analysis of key macroeconomic shocks. Some examples of forward-looking scenarios include global recessionary trends due to the world moving into US- and China-led economic blocks, a so-called emerging markets economic “hard landing” and the impact of monetary policy changes by central banks.

We also use a flight to quality lite scenario (FTQ Lite), which is a one-in-three years likelihood scenario with a lower severity of impact than SFTQ but with a higher likelihood of occurrence. FTQ Lite is used to test the earnings robustness of the Group.

We use reverse stress testing scenarios to complement traditional stress testing and enhance our understanding of business model vulnerabilities. Reverse stress testing leverages the stress results and outcome as evidenced under severe internal capital scenarios. In addition to the modeled impact generated by the scenario, management will assume further idiosyncratic impacts (e.g., non-financial risk incidents, large counterparty defaults, credit rating downgrades, reputational risk and loss of clients) that would lead to business model failure.

#### Overview of economic risk capital

Economic risk capital measures risks in terms of economic realities rather than regulatory or accounting rules and estimates the amount of capital needed to remain solvent and in business under extreme market, business and operating conditions over the period of one year. This framework allows us to assess, monitor and manage capital adequacy and solvency risk in both “going concern” and “gone concern” scenarios. In a “going concern” scenario, we hold sufficient capital to absorb losses to ensure continuity of service. In a “gone concern” scenario, we hold sufficient capital to absorb unexpected losses at a confidence level of 99.97% and fund an orderly resolution without recourse to public resources. Economic risk capital supplements the Group’s RRP process.

At the level of the Group, economic risk capital is used primarily as a tool for capital management in a “gone concern” scenario, measuring the combined impact from quantifiable risks such as market, credit, operational, pension and expense risk. Additionally, economic risk capital is also used for risk management purposes for specific businesses within the Group.

- Refer to “Capital strategy” and “Regulatory framework” in Capital management for further information on our capital management framework.

---

## Position risk categories

	Risks captured
Credit risk	<ul style="list-style-type: none"><li>• Risk of counterparty defaults relating to credit exposures directly held in the form of lending products (including loans and credit guarantees) or derivatives and shorter-term exposures such as underwriting commitments and trading book inventory, as well as credit exposures relating to issuers of collateral in lombard and share-backed loans, derivatives, reverse repurchase and securities lending transactions; settlement risk is not captured in the economic risk capital framework</li><li>• Potential changes in creditworthiness relating to private banking corporate and retail credit exposures</li></ul>
Non-traded credit spread risk	<ul style="list-style-type: none"><li>• Potential changes in creditworthiness relating to investment banking credit exposures as well as to the credit, debit and funding valuation adjustments</li></ul>
Securitized products	<ul style="list-style-type: none"><li>• Commercial and residential real estate activities, including mortgage-backed securities, mortgage loans and real estate acquired at auction, and other securitized products, including asset-backed securities</li><li>• Benefits from certain market risk hedges</li></ul>
Traded risk	<ul style="list-style-type: none"><li>• Interest rates, credit spreads, foreign exchange rates, equity and commodity prices and volatilities, equity risk arbitrage, life finance and litigation activities, and illiquid hedge fund exposures</li><li>• Risks currently not implemented in our economic risk capital models for traded risks, primarily for fixed income and equity trading, such as certain basis risks, higher order risks and cross risks between asset classes</li></ul>
Equity investments	<ul style="list-style-type: none"><li>• Private equity and other illiquid equity investment exposures</li></ul>

### Methodology and scope of economic risk capital

Our economic risk capital model is a set of methodologies used for measuring quantifiable risks associated with our business activities on a consistent basis. It is calculated separately for position risk (reflecting our exposure to market and credit risks), operational risk and other risks, using appropriate methodologies for each risk category. Economic risk capital is calculated by aggregating position, operational and other risks.

Position risk is the level of unexpected loss from our portfolio of balance sheet and off-balance sheet positions over a one-year holding period and includes market and credit risks. It is calculated at a 99% confidence level for risk management purposes reflecting a “going concern” scenario and at a 99.97% confidence level for capital management purposes reflecting a “gone concern” resolution scenario. Our position risks categories are described in the table “Position risk categories”. To determine our overall position risk, we consider the diversification benefit across risk types. When analyzing position risk for risk management purposes, we look at individual risk types before and after the diversification benefit.

Operational risk is the risk of an adverse impact arising from inadequate or failed internal processes, people or systems, or from external events. We use an internal model to calculate the economic capital requirement for operational risk at a 99.97% confidence level and a one-year holding period.

Other risks covered include expense risk, pension risk, owned real estate risk, foreign exchange risk between available economic capital and economic risk capital, and the benefit from deferred share-based compensation awards.

Available economic capital is our internal view of the capital available to absorb losses based on the reported BIS CET1 capital under the Basel framework, with economic adjustments applied to provide consistency with our economic risk capital.

The economic risk capital coverage ratio operates with a number of distinct bands that serve as key controls for monitoring and managing our operational solvency.

### Governance of capital risk

For capital risk, we have a Group-wide scenario calibration and analysis process, which includes the design of scenarios and the assessment and approval of scenario results. Stress tests are conducted on a regular basis and the results, trend information and supporting analysis are reported to the Board, senior management and regulators. We have a comprehensive set of stress testing models and an established governance for approving new and changed models and methodologies.

### Credit risk

#### Definition

Credit risk is the risk of financial loss arising as a result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, the restructuring of the debtor company or other recovery proceeds from the debtor. A change in the credit quality of a counterparty has an impact on the valuation of assets measured at fair value, with valuation changes recorded in the consolidated statements of operations.

---

## Main sources of credit risk by division

<b>Wealth Management</b>	Lending against financial collateral and real assets (e.g., real estate, ships, yachts and aircraft) and corporate lending including export finance
<b>Investment Bank</b>	Loan underwriting and lending commitments to corporate clients, markets and trading activities including securities financing and derivatives products with global institutional clients, including banks, insurance companies, asset managers and hedge funds; warehouse facilities for the financing of mortgages and other asset types
<b>Swiss Bank</b>	Real estate financing, lending to corporate clients, lending against financial collateral and retail and consumer lending
<b>Corporate Center</b>	Money market exposure through balance sheet management, credit exposure with central counterparties and legacy positions

---

The divisions represent Credit Suisse's organizational structure effective from January 1, 2022 to December 31, 2022. As a result of the announced strategy effective from January 1, 2023 and the new organizational structure, a significant portion of exposures will be transferred from the Investment Bank to the Non-Core Unit which will comprise existing legacy positions and those arising from the new strategy. As a result, the Corporate Centre will also be restructured.

### Sources of credit risk

Credit risk can arise from the execution of our business strategy in the divisions and includes risk positions such as exposures directly held in the form of lending products (including loans, money market deposits and credit guarantees) or traded products (derivatives, securities financing), shorter-term exposures such as underwriting commitments pending distribution, and settlement risk related to the exchange of cash or securities outside of typical delivery versus payment structures. The main sources of credit risk are presented in the table "Main sources of credit risk by division" and comprise existing portfolios of credit exposure in ongoing business, as well as select portfolios of legacy positions which are considered non-core and do not form part of continuing business.

### Evaluation and management of credit risk

We use a credit risk management framework which provides for the consistent evaluation, measurement and management of credit risk across the Group. Assessments of credit risk exposures for internal risk estimates and RWA are calculated based on PD, LGD and EAD models. The credit risk framework incorporates the following core elements:

- counterparty and transaction assessments: application of internal credit ratings (PD), assignment of LGD and EAD values in relation to counterparties and transactions;
- credit limits: establishment of credit limits, including limits based on notional exposure, potential future exposure and stress exposure, subject to approval by delegated authority holders, to serve as primary risk controls on exposures and to prevent undue risk concentrations;
- credit monitoring, impairments and provisions: processes to support the ongoing monitoring and management of credit exposures, supporting the early identification of deterioration and any subsequent impact; and
- risk mitigation: active management of credit exposures through the use of cash sales, participations, collateral, guarantees, insurance or hedging instruments.

In addition to traditional credit exposure measurement, monitoring and management using current and potential future exposure metrics, we perform counterparty and portfolio credit risk assessments of the impact of various internal stress test scenarios. We assess the impact to credit risk exposures arising from market movements in accordance with the scenario narrative, which can further support the identification of concentration or tail risks. Our scenario suite includes historical scenarios as well as forward-looking scenarios which are used across the Risk function.

### Counterparty and transaction assessments

Credit Risk evaluates and assesses counterparties and clients to whom the Group has credit exposures. For the majority of counterparties and clients, Credit Risk uses internally developed statistical rating models to determine internal credit ratings which are intended to reflect the PD of each counterparty. These rating models are backtested against internal experience, validated by a function independent of model development and approved by our main regulators for application in the regulatory capital calculation under the A-IRB approach of the Basel framework. Findings from backtesting serve as a key input for any future rating model developments.

Internal statistical rating models are based on a combination of quantitative factors (e.g., financial fundamentals and market data) and qualitative factors (e.g., credit history and economic trends).

For the remaining counterparties where statistical rating models are not used, internal credit ratings are assigned on the basis of a structured expert approach using a variety of inputs such as peer analyses, industry comparisons, external ratings and research as well as the judgment of expert credit officers.

## Credit Suisse counterparty ratings

Ratings	PD bands (%)	Definition	S&P	Fitch	Moody's	Details
AAA	0.000–0.021	Substantially risk free	AAA	AAA	Aaa	Extremely low risk, very high long-term stability, still solvent under extreme conditions
AA+	0.021–0.027	Minimal risk	AA+	AA+	Aa1	Very low risk, long-term stability, repayment sources sufficient under lasting adverse conditions, extremely high medium-term stability
AA	0.027–0.034		AA	AA	Aa2	
AA-	0.034–0.044		AA-	AA-	Aa3	
A+	0.044–0.056	Modest risk	A+	A+	A1	Low risk, short- and medium-term stability, small adverse developments can be absorbed long term, short- and medium-term solvency preserved in the event of serious difficulties
A	0.056–0.068		A	A	A2	
A-	0.068–0.097		A-	A-	A3	
BBB+	0.097–0.167	Average risk	BBB+	BBB+	Baa1	Medium to low risk, high short-term stability, adequate substance for medium-term survival, very stable short term
BBB	0.167–0.285		BBB	BBB	Baa2	
BBB-	0.285–0.487		BBB-	BBB-	Baa3	
BB+	0.487–0.839	Acceptable risk	BB+	BB+	Ba1	Medium risk, only short-term stability, only capable of absorbing minor adverse developments in the medium term, stable in the short term, no increased credit risks expected within the year
BB	0.839–1.442		BB	BB	Ba2	
BB-	1.442–2.478		BB-	BB-	Ba3	
B+	2.478–4.259	High risk	B+	B+	B1	Increasing risk, limited capability to absorb further unexpected negative developments
B	4.259–7.311		B	B	B2	
B-	7.311–12.550		B-	B-	B3	
CCC+	12.550–21.543	Very high risk	CCC+	CCC+	Caa1	High risk, very limited capability to absorb further unexpected negative developments
CCC	21.543–100.00		CCC	CCC	Caa2	
CCC-	21.543–100.00		CCC-	CCC-	Caa3	
CC	21.543–100.00		CC	CC	Ca	
C	100	Imminent or actual loss	C	C	C	Substantial credit risk has materialized, i.e., counterparty is distressed and/or non-performing. Adequate specific provisions must be made as further adverse developments will result directly in credit losses.
D1	Risk of default has materialized		D	D		
D2						

Transactions rated C are potential problem loans; those rated D1 are non-performing assets and those rated D2 are non-interest earning.

In addition to counterparty ratings, Credit Risk also assesses the risk profile of individual transactions and assigns transaction ratings which reflect specific contractual terms such as seniority, security and collateral.

Internal credit ratings may differ from external credit ratings, where available, and are subject to periodic review. Our internal ratings are mapped to a PD band associated with each rating which is calibrated to historical default experience using internal data and external data sources. Our internal masterscale for credit ratings is shown in the table "Credit Suisse counterparty ratings".

LGD estimates the size of loss that may arise on a credit exposure in the event of a default. We assign LGD on credit exposures based on the structure of the transaction and credit mitigation such as collateral or guarantees. The LGD values are calibrated to reflect a downturn macroeconomic environment and include recovery costs.

EAD represents the expected amount of credit exposure in the event of a default and reflects the current drawn exposure and an expectation regarding the future evolution of the credit exposure. For loan exposures, a credit conversion factor is applied to project the additional drawn amount between current utilization and the approved facility amount. The credit exposure related to traded products such as derivatives is based on a simulation using statistical models.

credit portfolio management, credit policy, management reporting, risk-adjusted performance measurement, economic risk capital measurement and allocation, and financial accounting.

### Credit limits

Our credit exposures are managed at the counterparty and ultimate parent level in accordance with credit limits which apply in relation to notional exposure, potential future exposure and stress exposure where appropriate. Credit limits are established to constrain the lending business where exposure is typically related to committed loan amounts, and similarly in relation to the trading business where exposure is typically subject to model-based estimation of future exposure amounts. Credit limits to counter-parties and groups of connected companies are subject to formal approval under delegated authority, and where significant in terms of size or risk profile, are subject to further escalation to the Group chief credit officer or the CRO. In addition to credit limits based on current or potential credit exposure, divisions may also apply additional limits to constrain risk based on other risk metrics including stress scenario results.

In addition to counterparty and ultimate parent exposures, credit limits and flags are also applied at the portfolio level to monitor and manage risk concentrations such as to specific industries, countries or products. In addition, credit risk concentration is regularly supervised by credit and risk management committees. Breaches of credit limits and other risk

We use internal rating methodologies consistently for the purposes of approval, establishment and monitoring of credit limits,

constraints, including stress scenario impacts, are monitored on an ongoing basis with formal escalation procedures in place. Limit breaches require escalation to the relevant limit setting authority.

## **142 Risk management**

## Credit monitoring, impairments and provisions

A credit quality monitoring process is performed to provide for early identification of possible changes in the creditworthiness of clients, and includes regular asset and collateral quality reviews, business and financial statement analysis, and relevant economic and industry studies. Credit Risk maintains regularly updated watch lists and holds review meetings to re-assess counterparties that could be subject to adverse changes in creditworthiness. The review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment.

In the event that a deterioration in creditworthiness is likely to result in a default, credit exposures are transferred to the regional recovery management functions within Credit Risk. The determination of any allowance for credit losses in relation to such exposures is based on an assessment of the exposure profile and expectations for recovery. The recoverability of loans in recovery management is regularly reviewed. The frequency of the review depends on the individual risk profile of the respective positions.

We have an impairment process for loans valued at amortized cost which are specifically classified as potential problem loans, non-performing loans, non-interest-earning loans or restructured loans. The Group maintains specific allowances for credit losses, which we consider to be a reasonable estimate of losses identified in the existing credit portfolio, and provides for credit losses based on a regular and detailed analysis of all counterparties, taking collateral value into consideration, where applicable. If uncertainty exists as to the repayment of either principal or interest, a specific allowance for credit losses is either created or adjusted accordingly. The specific allowance for credit losses is revalued regularly by the recovery management function depending on the risk profile of the borrower or credit-relevant events. We regularly review the appropriateness of allowances for credit losses.

A general allowance for credit losses is estimated for all loans and other financial assets held at amortized cost and related off-balance sheet credit exposures not specifically identified as impaired. The methodology for the calculation of provisions and allowances for credit losses is a forward-looking expected loss approach which meets the requirements of the current expected credit losses (CECL) approach under US GAAP. The method for determining the inherent credit loss in certain lending portfolios is derived from calculating the expected lifetime credit loss via bespoke models and requires significant management judgment by means of a qualitative overlay process. The forward-looking component of the models is reflected through forecasts of portfolio- and region-specific macroeconomic factors. In addition to these factors for systematic risk, the models contain idiosyncratic risk drivers. Qualitative adjustments reflect remaining idiosyncratic and portfolio-specific risks, which are not captured in the models. The calibration of these models is based on internal and/or external data. PD estimates contain a time-dependent, forward-looking component. LGD estimates can contain loan-specific attributes. In addition, selected LGD models contain a forward-looking component. Similar to LGD models, EAD models can contain loan-specific and/or forward-looking information. Model outputs are subject to a monthly review process, and the related

expected credit loss assessments require approval. We have established governance for approving the Group's provision and allowance for expected credit losses on non-impaired credit exposures and also the scenario weighting probabilities and baseline macroeconomic factors.

- Refer to "Note 20 – Financial instruments held at amortized cost and credit losses" in VI – Consolidated financial statements – Credit Suisse Group for further information on our CECL methodology.

Changes in the credit quality of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance which only includes loans valued on an amortized cost basis.

## Risk mitigation

Drawn and undrawn credit exposures are managed by taking financial and non-financial collateral supported by enforceable legal documentation, as well as by utilizing credit hedging techniques. Financial collateral in the form of cash, marketable securities (e.g., equities, bonds or funds) and guarantees serves to mitigate the inherent risk of credit loss and to improve recoveries in the event of a default. Financial collateral received in the form of securities is subject to controls on eligibility and is supported by frequent market valuation depending on the asset class and are monitored to determine whether any margin calls are required to ensure exposures remain adequately collateralized. Depending on the quality of the collateral, appropriate haircuts are applied for risk management purposes. Collateral monitoring, management and margining are applied to credit exposures resulting from both on balance sheet financing of securities and synthetic financing of positions for clients through derivative contracts.

Non-financial collateral such as residential and commercial real estate, tangible assets (e.g., ships or aircraft), inventories and commodities are valued at the time of credit approval and periodically thereafter depending on the type of credit exposure and collateral coverage ratio.

In addition to collateral, we also utilize credit hedging in the form of protection provided by single-name and index credit default swaps as well as structured hedging and insurance products. Credit hedging is used to mitigate risks arising from the loan portfolio, loan underwriting exposures and counterparty credit risk. Hedging is intended to reduce the risk of loss from a specific counterparty default or broader downturn in markets that impact the overall credit risk portfolio. Credit hedging contracts are typically bilateral or centrally cleared derivative transactions and are subject to collateralized trading arrangements. Hedging risk mitigation is evaluated so that basis or tenor risk can be appropriately identified and managed.

In addition to collateral and hedging strategies, we also actively manage our loan portfolio and may sell or sub-participate positions in the loan portfolio as a further form of risk mitigation.

## Country risk

As part of our overall risk management process, we manage our credit risk exposures to countries under a comprehensive country risk framework. Under the country risk framework, individual

stressed loss limits and potential exposure flags are set on an individual country basis, and exposures are managed on an ongoing basis by a dedicated country risk team. Defined stress scenario analyses are performed on a regular basis. We monitor the concentration of collateral underpinning our OTC derivative and reverse repurchase agreement exposures through monthly reporting, and also monitor the impact of sovereign rating downgrades on collateral eligibility.

### **Governance of credit risk**

Credit risk is managed and controlled by the Credit Risk function and governed by a comprehensive framework of policies and committees. Key processes are reviewed through supervisory checks on a regular basis by Credit Risk, including the Group chief credit officer. Overall, credit risk is managed through a combination of divisional and legal entity risk controls, including by risk management committees and sub-committees, complemented by aggregate views of credit exposure at the Group level.

### **Credit Risk Review**

Governance and supervisory checks within Credit Risk are supplemented by the Credit Risk Review function. The Credit Risk Review function is independent from Credit Risk with a direct functional reporting line to the Risk Committee Chair, administratively reporting to the CRO. Credit Risk Review assesses the Group's credit exposures and practices related to management of credit risk.

## **Market risk**

### **Definition**

Market risk is the risk of financial loss arising from movements in market risk factors. The movements in market risk factors that generate financial losses are considered to be adverse changes in interest rates, credit spreads, foreign exchange rates, equity and commodity prices and other factors, such as market volatility and the correlation of market prices across asset classes. A typical transaction or position in financial instruments may be exposed to a number of different market risk factors. Market risks arise from both our trading and non-trading activities.

### **Traded market risk**

#### **Sources of traded market risk**

Market risks mainly arise from our trading activities, primarily in the Investment Bank. Our trading activities typically include fair-valued positions and risks arising from our involvement in primary and secondary market activities, for client facilitation and market-making purposes, including derivatives markets.

The Group is active globally in the principal trading markets, using a wide range of trading and hedging products, including derivatives and structured products. Structured products are customized transactions often using combinations of financial instruments and are executed to meet specific client or internal needs. As a result of our broad participation in products and markets, the Group's trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations.

The market risks associated with the portfolio, including the embedded derivative elements of our structured products, are actively monitored and managed as part of our overall risk management framework and are reflected in our VaR measures.

### **Evaluation and management of traded market risk**

We use market risk measurement and management methods capable of calculating comparable exposures across our many activities and employ focused tools that can model specific characteristics of certain instruments or portfolios. The tools are used for internal market risk management, internal market risk reporting and external disclosure purposes. Our principal market risk measures for traded market risk are VaR, scenario analysis, as included in our stress testing framework, position risk, as included in our economic risk capital, and sensitivity analysis. These measures complement each other in our market risk assessment and are used to measure traded market risk at the Group level. In addition, a counterparty market risk function is designed to support the management of counterparty risk, leveraging product-related market risk knowledge to complement the credit risk approach. Our risk management practices are regularly reviewed to ensure they remain appropriate and fit for purpose.

### **Measurement of traded market risk using value-at-risk**

VaR is a risk measure that quantifies the potential loss on a given portfolio of financial instruments over a certain holding period that is expected not to be exceeded at a certain confidence level. Positions are aggregated by risk factors rather than by product. For example, interest rate risk VaR captures potential losses driven by fluctuations of interest rates affecting a wide variety of interest rate products (such as interest rate swaps and swaptions) as well as other products (such as foreign exchange derivatives and equity derivatives) for which interest rate risk is not the primary market risk driver. The use of VaR allows the comparison of risk across different businesses. It also provides a means of aggregating and netting a variety of positions within a portfolio to reflect historical correlations between different assets, allowing for a portfolio diversification benefit. Our VaR model is designed to take into account a comprehensive set of risk factors across all asset classes, and includes certain foreign exchange risk and commodity risk within the banking book.

VaR is an important tool in risk management and is used for measuring quantifiable risks from our activities exposed to market risk on a daily basis. In addition, VaR is one of the main risk measures for limit monitoring, financial reporting, calculation of regulatory capital and regulatory backtesting.

Our VaR model is based on historical data moves that derive plausible future trading losses. The model is responsive to changes in market conditions through the use of exponential weighting that applies a greater weight to more recent events, and the use of expected shortfall measures to ensure extreme adverse events are considered in the model. We use the same VaR model for risk management (including limit monitoring and financial reporting), regulatory capital calculation and regulatory backtesting.

purposes, although confidence level, holding period, historical look-back period and the scope of financial instruments considered can be different.

Our risk management VaR uses a rolling two-year historical data-set, a one-day holding period and a 98% confidence level. This means that we would expect daily mark-to-market trading losses to exceed the reported VaR not more than twice on average in 100 trading days over a multi-year observation period. The 98% confidence level VaR is calculated using an equivalent expected shortfall approach. The expected shortfall metric represents the average of the estimated worst losses beyond the confidence level. Risk management VaR is closely aligned to the model we use to measure regulatory VaR for capital purposes. Compared to regulatory VaR, however, it has a wider scope that includes trading book securitizations and banking book positions held at fair value. The scope of our risk management VaR is periodically reviewed to ensure it remains aligned with the internal risk framework and control processes.

For regulatory capital purposes, we operate under the Basel market risk framework which includes the following components for the calculation of regulatory capital: regulatory VaR, stressed VaR, IRC, RNIV, stressed RNIV and a regulatory-prescribed standardized approach for securitizations. The regulatory VaR for capital purposes uses a two-year historical dataset, a ten-day holding period and a 99% confidence level calculated using an expected shortfall approach. This measure is designed to capture risks in the trading book and foreign exchange and commodity risks in the banking book and excludes securitization positions, as these are treated under the securitization approach for regulatory purposes. Stressed VaR replicates the regulatory VaR calculation on the Group's current portfolio over a continuous one-year observation period that reflects a period of significant financial stress for the Group, selected from a longer historical dataset spanning from 2006 to the present. The historical dataset allows for the capturing of a longer history of potential loss events and helps reduce the pro-cyclicality of the minimum capital requirements for market risk. IRC is a regulatory capital charge for default and migration risk on positions in the trading books that may not be captured adequately by the ten-day holding period assumption of regulatory VaR. RNIV captures a variety of risks, such as certain basis risks, higher order risks and cross risks between asset classes, not adequately captured by the VaR model for example due to lack of sufficient historical market data.

Backtesting VaR uses a two-year historical dataset, a one-day holding period and a 99% confidence level calculated using an expected shortfall approach. This measure captures risks in the trading book and includes securitization positions. Backtesting VaR is not a component used for the calculation of regulatory capital but may have an impact through the regulatory capital multiplier if the number of back-testing exceptions exceeds regulatory thresholds.

Assumptions used in our market risk measurement methods for regulatory capital purposes are compliant with the standards published by the BCBS and other international standards for market risk management. We have approval from FINMA, as well as

from other regulators for our subsidiaries, to use our regulatory VaR model in the calculation of market risk capital requirements. Ongoing enhancements to our VaR methodology are subject to regulatory approval or notification depending on their materiality. The model is subject to regular reviews by regulators and the Group's independent Model Risk Management function.

Information required under Pillar 3 of the Basel framework related to market risk is available on our website.

- Refer to “credit-suisse.com/regulatorydisclosures” for further information.
- Refer to “Risk-weighted assets” in Capital management for further information on the use of our regulatory VaR model in the calculation of market risk capital requirements.

### VaR assumptions and limitations

The VaR model uses assumptions and estimates that we believe are reasonable, but VaR only quantifies the potential loss on a portfolio based on historical market conditions. The main assumptions and limitations of VaR as a risk measure are:

- VaR relies on historical data to estimate future changes in market conditions. Historical scenarios may not capture all potential future outcomes, particularly where there are significant changes in market conditions, such as increases in volatilities and changes in the correlation of market prices across asset classes;
- VaR provides an estimate of losses at a specified confidence level; the use of an expected shortfall equivalent measure allows all extreme adverse events to be considered in the model;
- VaR is based on either a one-day (for internal risk management, backtesting and disclosure purposes) or a ten-day (for regulatory capital purposes) holding period. This assumes that risks can be either sold or hedged over the holding period, which may not be possible for all types of exposure, particularly during periods of market illiquidity or turbulence; it also assumes that risks will remain in existence over the entire holding period; and
- VaR is calculated using positions held at the end of each business day and does not include intra-day changes in exposures.

To mitigate some of the VaR limitations and estimate losses associated with market movements that are unusually severe or not reflected in the historical observation period, we use other metrics designed for risk management purposes and described above, including stressed VaR, scenario analysis, as included in our stress testing framework, position risk, as included in our economic risk capital, and sensitivity analysis.

For some risk types there can be insufficient historical data for a calculation within the Group's VaR model. This often happens because underlying instruments may have traded only for a limited time. Where we do not have sufficient market data, the VaR calculation relies on market data proxies or extreme parameter moves. Market data proxies are selected to be as close to the underlying instrument as possible. Where neither a suitable market dataset nor a close proxy is available, extreme market moves are used.

We use a risk factor identification process to identify risks for capture. There are two parts to this process. First, the market data dependency approach systematically determines the risk requirements based on data inputs used by front-office pricing models and compares this with the risk types that are captured by the Group's VaR model and the RNIV framework. Second, the product-based approach is a qualitative analysis of product types undertaken in order to identify the risk types that those product types would be exposed to. A comparison is again made with the risk types that are captured in the VaR and RNIV frameworks. This process identifies risks that are not yet captured in the VaR model or the RNIV framework. A plan for including these risks in either framework can then be devised. RNIV is captured in both our regulatory capital and economic risk capital framework.

### **VaR backtesting**

Backtesting is one of the techniques used to assess the accuracy and performance of our VaR model used by the Group for risk management and regulatory capital purposes and serves to highlight areas of potential enhancements. Backtesting is used by regulators to assess the adequacy of the internal model approach-based regulatory capital held by the Group, the calculation of which includes regulatory VaR and stressed VaR.

Backtesting involves comparing the results produced by the VaR model with the hypothetical trading revenues on the trading book. Hypothetical trading revenues are defined in compliance with regulatory requirements and aligned with the VaR model output by excluding (i) non-market elements (such as fees, commissions, cancellations and terminations, net cost of funding and credit-related valuation adjustments) and (ii) gains and losses from intra-day trading. A backtesting exception occurs when a hypothetical trading loss exceeds the daily VaR estimate.

For capital purposes and in line with BIS requirements, FINMA increases the capital multiplier for every regulatory VaR backtesting exception above four in the prior rolling 12-month period, resulting in an incremental market risk capital requirement for the Group. VaR models with less than five backtesting exceptions are considered by regulators to be classified in a defined "green zone". The "green zone" corresponds to backtesting results that do not themselves suggest a problem with the quality or accuracy of a bank's model.

### **Scenario analysis**

Market risk stress testing and scenarios quantify portfolio impacts under stressed market conditions, expressed as a potential loss number, which can be used in conjunction with other metrics such as market risk sensitivities and VaR to manage the Group's exposure to traded market risk. The analysis performed by the market risk scenarios team supports the daily risk management of specific businesses, as well as their understanding of the impact of scenarios run across the Group, either for internal assessments or for regulatory requests. Stress testing is essential for understanding the impact of large market moves and is particularly important for portfolios that hold complex and exotic instruments, where the risk profile is non-linear or where the value of the positions may

be contingent on several factors (known as cross-risks), or on less liquid risk factors such as correlation.

Market risk stress testing is also used to model potential outcomes and capture vulnerabilities of the trading portfolios around specific macroeconomic or geopolitical events. These outcomes are used to guide business activities and develop risk management strategies during such events and are often supported with risk constraints, which limit potential loss given the likelihood of the event, in line with the Group's risk appetite.

### **Credit, debit and funding valuation adjustments**

Credit valuation adjustments (CVA) are modifications to the measurement of the value of derivative assets used to reflect the credit risk of counterparties.

Debit valuation adjustments (DVA) are modifications to the measurement of the value of derivative liabilities used to reflect an entity's own credit risk.

Funding valuation adjustments (FVA) reflect the fair value costs and benefits of funding associated with (i) any under-collateralized portions of a derivative and (ii) the funding of equivalent transferable collateral where the proceeds of any derivative collateralization cannot be sold or repledged.

These adjustments and their impact on revenues are not captured by the VaR framework.

### **Traded market risk constraints**

Our market risk constraints framework encompasses specific constraints on various market risk measures, including VaR and results of scenario analysis and sensitivity analysis at the Group, Bank, divisional, legal entity, branch and business levels. For example, we have controls over consolidated traded market risk exposures as well as concentrations in the portfolio. Risk constraints are cascaded to lower organizational levels within the businesses. Risk limits are binding and any significant increase in risk exposures is escalated in a timely manner. Market risk limit breaches are subject to a formal escalation procedure and the incremental risk associated with the breach must be approved by the responsible risk manager within the Market Risk function, with escalation to senior management if certain thresholds are exceeded. The majority of the market risk limits are monitored on a daily basis. Limits for which the inherent calculation time is longer or for which the risk profile changes less often are monitored less frequently depending on the nature of the limit (weekly or monthly). The business is mandated to remediate market risk limit breaches within three business days upon notification. Remediation actions that take longer than three days are subject to an out-of-policy remediation process with senior management escalation.

### **Mitigation of traded market risk**

Once a transaction has been executed, it is captured as part of our risk monitoring processes and subject to the market risk constraints framework. Specific policies are in place that are intended to ensure that for any new material and/or unusual transactions,

the Market Risk function has been engaged and appropriate approvals are sought. These transactions are reviewed and approved by the Market Risk function so that the risk profile of the portfolio is in line with the risk appetite after execution.

Traded market risk is mitigated using financial securities, derivatives, insurance contracts or other appropriate means.

### **Governance of traded market risk**

Traded market risk is managed and controlled by the Market Risk function, which includes legal entity and divisional chief risk officers, and governed by a comprehensive framework of policies and committees.

Oversight of the Market Risk function is provided by various committees and supervisory reviews at the Group, legal entity and divisional level, covering the related framework, risk appetite, quantitative approaches, evolving risk profile, material new trades and new business activity. The committees are comprised of senior Market Risk personnel. Relevant topics are escalated to senior management.

The governance framework is designed to ensure appropriate oversight of the Group's traded market risk exposures.

Like other models, our VaR model is subject to internal governance including validation by a team of modeling experts that are independent from the model developers. Validation includes identifying and testing the model's assumptions and limitations, investigating its performance through historical and potential future stress events, and testing that the live implementation of the model behaves as intended. We employ a range of different control processes to help ensure that the models used for traded market risk remain appropriate over time. We have established governance to regularly review model performance and approve any new or amended models.

### **Non-traded market risk**

#### **Sources of non-traded market risk**

Non-traded market risk primarily relates to asset and liability mismatch exposures in our banking book. Our businesses and Treasury have non-traded portfolios that carry market risks, mainly related to changes in interest rates but also to changes in foreign exchange rates.

We assume interest rate risks through lending and deposit-taking, money market and funding activities, and the deployment of our consolidated equity as well as other activities at the divisional level. Non-maturing products, such as savings accounts, have no contractual maturity date or direct market-linked interest rate and are risk-managed on a pooled basis using replication portfolios on behalf of the business divisions. Replication portfolios transform non-maturing products into a series of fixed-term products that approximate the re-pricing and volume behavior of the pooled client transactions.

Information required under Pillar 3 of the Basel framework related to interest rate risk in the banking book (IRRBB) is available on our website.

- Refer to "[credit-suisse.com/regulatorydisclosures](https://www.credit-suisse.com/regulatorydisclosures)" for further information.

The majority of non-traded foreign exchange risk is associated with our investments in foreign branches, subsidiaries and affiliates denominated in currencies other than the reporting currency of the Group (i.e., Swiss francs) and includes related hedges. This is referred to as "structural foreign exchange risk". The remaining non-traded foreign exchange risk relates to our banking book positions other than from our investments in foreign operations and is managed under the risk appetite framework for traded market risk.

### **Evaluation and management of non-traded market risk**

We monitor IRRBB through established systems, processes and controls. Risk measures are provided to estimate the impact of changes in interest rates both in terms of risk to earnings as well as risk to the economic value of the Group's asset and liability position. For the purpose of this disclosure, IRRBB is measured using sensitivity analysis, which measures the potential change in economic value resulting from specified hypothetical shocks to interest rates. It is not a measure of the potential impact on reported earnings in the current period, since it takes into account accrual accounted positions as well as certain positions that are carried at fair value.

While structural foreign exchange risk is specified and measured in terms of sensitivity to hypothetical foreign currency shocks, it is excluded from regulatory market risk measurement. The sensitivity to hypothetical foreign currency shocks is also used to define our risk appetite constraints. Along with the management of the Group's CET1 ratio sensitivity to moves in foreign exchange rates, we measure and monitor sensitivities for several other key metrics, such as leverage ratios.

### **Non-traded market risk constraints**

Non-traded market risk leverages the market risk constraints framework that encompasses specific constraints on various market risk measures, including VaR and results of scenario analysis and sensitivity analysis at the Group, Bank, divisional, legal entity and business levels, as described above for traded market risk constraints. These are supplemented by additional risk controls for structural foreign exchange risk and IRRBB.

### **Mitigation of non-traded market risk**

The Group's risk appetite level for IRRBB is primarily driven by the available capital and is allocated to the Group's material legal entities. The Group does not have a regulatory requirement to hold capital against IRRBB. The economic impacts of adverse shifts in interest rates from FINMA-defined scenarios are significantly below 15% of tier 1 capital, which is the threshold used by FINMA to identify banks that potentially run excessive levels of interest rate risk at group and legal entity levels.

The Group aims to keep a limited risk profile for the economic value of the Group's asset and liability position while maintaining high earnings stability. This is addressed mainly by systematic hedging of issued debt and interest rate risk arising from loans and deposit maturity mismatches in the private banking business. The main instruments used for hedging are interest rate swaps.

Structural foreign exchange risk is actively managed by Treasury through the execution of currency hedges with the aim of neutralizing the sensitivity of the Group's CET1 ratio to adverse movements in foreign exchange rates within parameters set out in the risk appetite framework.

#### **Governance of non-traded market risk**

Non-traded market risk is integrated into the Group's risk appetite framework, including risk constraints under the authority of the Board and the Executive Board. Risk management committees are responsible for the oversight and approval of related risk models, global policies, manuals, guidelines and procedures. Divisional and legal entity risk management committees review non-traded market risk-related matters specific to their local entities and jurisdictions.

### **Non-financial risk**

#### **Definition and sources of non-financial risk**

Non-financial risk is the risk of an adverse direct or indirect impact originating from sources outside the financial markets. Non-financial risk is inherent in most aspects of our business, including the systems and processes that support our activities. It comprises a large number of disparate risks that can manifest in a variety of ways. Examples include the risk of damage to physical assets, business disruption, failures relating to data integrity and trade processing, cyber attacks, internal or external fraudulent or unauthorized transactions, inappropriate cross-border activities, money laundering, improper handling of confidential information, conflicts of interest, improper gifts and entertainment and failure in duties to clients.

Non-financial risk can arise from a wide variety of internal and external forces, including human error, inappropriate conduct, failures in systems, processes and controls, pandemic, deliberate attack or natural and man-made disasters. Outsourcing and external third parties may also create risks around maintaining business processes, system stability, data loss, data management, reputation and regulatory compliance. Certain of the present main categories and sources of non-financial risk are described below.

#### **Operational risk**

Operational risk is the risk of an adverse impact arising from inadequate or failed internal processes, people or systems, or from external events. Operational risk does not include business and reputational risks; however, some operational risks can lead to reputational issues and as such these risks may be closely linked. Operational risk includes but is not limited to technology risk, cyber risk, legal risk, compliance risk, regulatory risk and conduct risk. In addition, management concluded that our internal control

over financial reporting was not effective as of December 31, 2022.

- Refer to "Controls and procedures" in VI – Consolidated financial statements – Credit Suisse Group for further information.

#### **Technology risk**

Technology risk deserves particular attention given the complex technological landscape that covers our business model. Ensuring that confidentiality, integrity and availability of information assets are protected is critical to our operations. Technology risk is the risk that system-related failures, such as service outages or information security incidents, may disrupt business. Technology risk is inherent not only in our IT assets, but also in the people and processes that interact with them including through dependency on third-party suppliers and the worldwide telecommunications infrastructure. We seek to ensure that the data used to support key business processes and reporting is secure, complete, accurate, available, timely and meets appropriate quality and integrity standards. We require our critical IT systems to be identified, secure, resilient and available to support our ongoing operations, decision-making, communications and reporting. Our systems must also have the capabilities, capacity, scalability and adaptability to meet current and future business objectives, the needs of our customers and regulatory and legal expectations. Failure to meet these standards and requirements may result in adverse events that could subject us to reputational damage, fines, litigation, regulatory sanctions, financial losses or loss of market share. Technology risks are managed through our technology risk management program, business continuity management and operational resiliency plans. Technology risks are included as part of our overall non-financial risk assessments based upon a forward-looking approach focusing on the most significant risks in terms of potential impact and likelihood.

#### **Cyber risk**

Cyber risk, which can be driven by people, process and/or technology, is the risk that the Group will be compromised as a result of cyber attacks, security breaches, unauthorized access, loss or destruction of data, unavailability of service, computer viruses, employee misconduct or other events that could have an adverse security or resilience impact. Any such event could subject us to litigation or cause us to suffer a financial loss, a disruption of our businesses, liability to our clients, regulatory intervention or reputational damage. We could also be required to expend significant additional resources to investigate and remediate vulnerabilities or other exposures.

We recognize that cyber risk represents a rapidly evolving external risk landscape. The financial industry continues to face cyber threats from a variety of actors who are driven by monetary, political and other motivations. We actively monitor external and internal incidents and threats and assess and respond accordingly, including modifying our protective measures, to any potential vulnerabilities that this may reveal. We are also an active participant in industry forums and information exchange initiatives and engage in regulatory consultation on this subject.

We have an enterprise-wide cybersecurity strategy to provide strategic guidance as part of our efforts to achieve an optimized end-to-end security and risk competence to enable a secure and innovative business environment, aligned with the Group's risk appetite. A technology security team leverages a wide array of leading technology solutions and industry best practices to support our efforts to manage and maintain a secure information infrastructure, perform vulnerability assessments and detect and respond to information security threats.

We regularly assess the effectiveness of key controls and conduct ongoing employee training and awareness activities, including for key management personnel, in order to embed a strong cyber risk culture. As part of the non-financial risk framework (NFRF), risk management committees are given updates on the broader technology risk exposure.

Significant incidents are escalated to the Risk Committee together with key findings and mitigating actions. Related business continuity and response plans are tested.

#### **Legal risk**

Legal risk is the risk of loss or imposition of damages, fines, penalties or other liability or any other material adverse impact arising from circumstances including the failure to comply with legal obligations, whether contractual, statutory or otherwise, changes in enforcement practices, the making of a legal challenge or claim against us, our inability to enforce legal rights or the failure to take measures to protect our rights.

#### **Compliance risk**

Compliance risk is the risk of legal or regulatory sanctions or financial loss that may result from the failure to comply with applicable laws, regulations, rules or market standards.

#### **Regulatory risk**

Regulatory risk is the risk that changes in laws, regulations, rules or market standards may limit our activities and have a negative effect on our business or our ability to implement strategic initiatives, or can result in an increase in operating costs for the business or make our products and services more expensive for clients.

#### **Conduct risk**

The Group considers conduct risk to be the risk that improper behavior or judgment by our employees may result in a negative financial, non-financial or reputational impact to our clients, employees or the Group, or negatively impact the integrity of the financial markets. Conduct risk may arise from a wide variety of activities and types of behaviors. A Group-wide definition of conduct risk supports the efforts of our employees to have a common understanding of and consistently manage and mitigate our conduct risk. Further, it promotes standards of responsible conduct and ethics in our employees. Managing conduct risk includes consideration of the risks generated by each business and the strength of the associated mitigating controls. Periodic monitoring

of conduct risk metrics is based on thresholds set by severity level, with material trends identified and escalated as appropriate to senior management. Conduct risk is also assessed by reviewing and learning from past incidents within the Group and at other firms in the financial services sector.

The ongoing focus and investment in a strong risk culture is fundamental to the management of conduct risk. The Group's Code of Conduct provides a clear statement on the behavioral expectations, supported by our cultural values.

- Refer to "Culture" in Risk management oversight and to "Corporate governance framework" in IV – Corporate Governance – Overview for further information on our Code of Conduct.

#### **Evaluation and management of non-financial risks**

We aim to maintain the integrity of our business, operations and reputation as a core principle guiding the management and oversight of non-financial risks by ensuring that our day-to-day operations are sustainable and resilient, do not expose us to significant losses and enable our employees to make decisions and conduct business in line with our values and desired reputation as a firm.

Each business area and function is responsible for its risks and the provision of adequate resources and procedures for the management of those risks. They are supported by the designated second line of defense functions responsible for independent risk and compliance oversight, methodologies, tools and reporting within their areas as well as working with management on non-financial risk issues that arise. Businesses and relevant control functions meet regularly to discuss risk issues and identify required actions to mitigate risks.

The Non-Financial Risk function oversees the Group's established NFRF, providing a consistent and unified approach to evaluating and monitoring the Group's non-financial risks. Non-financial risk appetites are established and monitored under the Group-wide risk appetite framework, aligned with the NFRF, which sets common minimum standards across the Group for non-financial risk and control processes and review and challenge activities. Risk and control assessments are in place across all divisions and functions, consisting of the risk and control self-assessments and compliance risk assessments. Key non-financial risks are identified annually and represent the most significant risks requiring senior management attention. Where appropriate, remediation plans are put in place with ownership and ongoing oversight by senior management. In the event of significant internal or external events, risk identification processes are adjusted to assess additional or emerging risk concentrations and related mitigating actions that may be required.

#### **Non-financial risk capital management**

Our activities to manage non-financial risk capital include scenario analysis and operational risk regulatory capital measurement, as further described below. In addition, we transfer the risk of potential losses from non-financial risks to third-party insurance companies in certain instances.

### Non-financial risk scenario analysis

Non-financial risk scenario analysis is a forward-looking tool that is used to identify and measure exposure to a range of potential adverse events, such as unauthorized trading, transaction processing errors and compliance issues. These scenarios help businesses and functions assess the suitability of controls in light of existing risks and estimate hypothetical but plausible risk exposures. Scenarios are developed to support stressed loss projections and capital calculations in response to requirements set by regulatory agencies in the jurisdictions in which we operate.

### Non-financial risk stress loss projections

Operational losses may increase in frequency and magnitude during periods of economic stress and/or market volatility. We estimate the potential operational losses that may be experienced under a range of adverse economic conditions by quantifying historically observed relationships between operational losses and the economy, and through expert consideration of impacts on key non-financial risks. These estimates inform Group-wide stress tests measuring the bank's resilience across a range of economic scenarios.

### Non-financial risk regulatory capital measurement

We use internally validated and approved models to calculate our regulatory capital requirements for non-financial risk (also referred to as "operational risk capital") across the Group and for major legal entities. For Group regulatory capital requirements, we apply the advanced measurement approach (AMA), an internal models-based approach to statistically estimate an operational loss distribution using internal and external loss data. Business experts and senior management review and challenge model parameters in light of changes of business environment and internal control factors to ensure that the capital projection reflects a forward-looking view of risk. Deductions are applied to the regulatory capital requirements to account for the mitigating values of insurance policies held by the bank. The regulatory capital requirement represents the 99.9th percentile of the estimated distribution of total operational losses for the Group over a one-year time horizon. A risk-sensitive approach is applied to allocate capital to the businesses.

### Governance of non-financial risks

Effective governance processes establish clear roles and responsibilities for managing non-financial risks and define appropriate escalation processes for outcomes that are outside expected levels. We utilize a comprehensive set of policies and procedures that set out how employees are expected to conduct their activities, including clearly defined roles and accountability for each of the three lines of defense to achieve appropriate segregation of duties.

The Non-Financial Risk function is responsible for setting minimum standards for managing non-financial risks at the Group level. This includes ensuring the cohesiveness of policies and procedures, tools and practices throughout the Group, particularly with regard to the identification, evaluation, mitigation, monitoring and reporting of these risks. Other second line of defense oversight functions are responsible for setting supplemental policies and procedures where applicable. The Non-Financial Risk function also oversees the global read-across framework, under which

the Group performs comprehensive reviews of risk events and/or emerging risks to identify underlying root causes, and considers their applicability across other divisions, significant legal entities or corporate functions with the goal of minimizing re-occurrence in a sustainable manner through enhancements of processes and/or key controls to support reduction of relevant residual risks.

Non-financial risk exposures, metrics, issues and remediation efforts are discussed in various risk management committees across the organization. Key, significant and trending non-financial risk themes are discussed in governance forums where appropriate, including risk themes that may emerge due to significant internal or external events and any corresponding tactical or strategic control enhancements that may be required in order to maintain adequate internal controls in response to such events.

### Model risk

In line with peer banks, we rely on advanced quantitative models and qualitative estimation approaches across business lines and legal entities to support a broad range of applications, including estimating various forms of financial risk, valuation of securities, stress testing activities, capital adequacy assessments, providing wealth management services to clients and to meet various reporting requirements.

#### Definition and sources of model risk

Model risk is the risk of adverse consequences from decisions made based on model results that may be incorrect, misinterpreted or used inappropriately. All models and qualitative estimation approaches are imperfect approximations and assumptions that are subject to varying degrees of uncertainty in their output depending on, among other factors, the model's complexity and its intended application. As a result, modeling and estimation errors may result in inappropriate business decisions, financial loss, regulatory and reputational risk and incorrect or inadequate capital reporting. Model errors, intrinsic uncertainty and inappropriate use are the primary contributors to aggregate Group-wide model risk.

#### Evaluation and management of model risk

Through our global model risk management and governance framework we seek to identify, measure and mitigate significant risks arising from the use of models embedded within our global model ecosystem. Model risks can be managed through a well-designed and robust model risk management framework, encompassing model governance policies and procedures, model validation best practices and actionable model risk reporting.

Robust model risk management is crucial to ensuring that the Group's model risk is assessed and managed leveraging a central inventory that includes all models used by the Group in order to remain within a defined model risk appetite by focusing on identification, measurement and resolution of model limitations. Under the Group's model governance policies, the Model Risk Management function validates and approves models, including new models and material changes to existing models, in compliance with standards established by regulators. Developers, owners

and model supervisors are responsible for identifying, developing, implementing and testing their models. Model supervisors are responsible for ensuring that models are submitted to the Model Risk Management function to be entered into the Group's model inventory and subsequently validated and approved. The Model Risk Management function is structured to be independent from model users, developers and supervisors.

A rigorous validation practice should ensure that models are conceptually sound, appropriately implemented by model owners and developers and functioning as intended. To accomplish this, model risk management deploys a validation team comprising objective, well-informed subject matter experts with the necessary skills and knowledge to apply effective challenge across model types to mitigate model risk.

In line with the Group model governance policies, all models are risk-tiered based on an internal scoring method which combines model complexity, materiality and reliance to assign models into one of four risk tiers. These inherent risk ratings, or tiers, are used to prioritize models, including resource allocations for validations, periodic reviews and ongoing monitoring as well as to inform the depth of validation activities.

### **Governance of model risk**

Governance is an important aspect of model risk management. Model risk reports are presented and discussed at various model review committees to ensure appropriate oversight of model risk issues, observe progress in corresponding remediation actions and initiate any required escalations.

The Model Risk Management function reviews models, reports model limitations to key stakeholders, tracks remediation plans for validation findings and reports on model risk tolerance and metrics to senior management. The Model Risk Management function oversees controls to facilitate a complete and accurate Group-wide model inventory and coordinates semi-annual attestations by the first line of defense with the aim of achieving completeness and accuracy of its model inventory.

## **Reputational risk**

### **Definition and sources of reputational risk**

Reputational risk is the risk that negative perception by our stakeholders, including clients, counterparties, employees, shareholders, regulators and the general public, may adversely impact client acquisition and damage our business relationships with clients and counterparties, affecting staff morale and reducing access to funding sources.

Reputational risk may arise from a variety of sources, including, but not limited to, the nature or purpose of a proposed transaction or service, the identity or activity of a potential client, the regulatory or political climate in which the business will be transacted, significant public attention surrounding the transaction itself or the potential sustainability risks of a transaction. Sustainability risks

have potentially adverse impacts on the environment, on people or society, which may be caused by, contributed to or directly linked to financial service providers, usually through the activities of their clients. These may manifest themselves as reputational risks, but potentially also other risk types such as credit or non-financial risks. Reputational risk may also arise from reputational damage in the aftermath of a non-financial risk incident, such as cyber crime or the failure by employees to meet expected conduct and ethical standards.

### **Evaluation and management of reputational risk**

Reputational risk is included in the Group's risk appetite framework to ensure that risk-taking is aligned with the approved risk appetite. We highly value our reputation and are fully committed to protecting it through a prudent approach to risk-taking and a responsible approach to business. This is achieved through a culture of risk awareness as well as dedicated processes, resources and policies focused on identifying, evaluating, managing and reporting potential reputational risks. This is also achieved by applying the highest standards of personal accountability and ethical conduct as set out in the Group's Code of Conduct and the Group's approach to cultural values and behaviors. Reputational risk potentially arising from proposed business transactions, client activity or joining initiatives or affiliations (including joining third-party groups, providing support to causes, speaking engagements, charitable donations, political donations directly or through sponsorships) is assessed in the reputational risk review process. The Group's global policy on reputational risk requires employees to be conservative when assessing potential reputational impact and, where certain indicators give rise to potential reputational risk, the relevant business proposal or service must be submitted through the reputational risk review process. This involves a submission by an originator (any employee), approval by a business area head or designee, and its subsequent referral for evaluation by a reputational risk approver or by the respective divisional client risk committee. Reputational risk approvers are experienced and high-ranking senior managers, independent of the business divisions with the authority to approve, reject or impose conditions (also in relation to environmental or social matters) on a transaction or the establishment of a client relationship. In cases of particularly complex or cross-divisional transactions, the decision may be escalated to relevant client risk committees.

For transactions with potential sustainability risks, the internal specialist unit Sustainability Risk evaluates the nature of the transaction and Credit Suisse's role, the identity and activities of the client and the regulatory context of its operations, and assesses the environmental and social aspects of the client's operations, products or services. The team determines whether the client's activities are consistent with the relevant industry standards and whether the potential transaction is compatible with Credit Suisse's policies and guidelines for sensitive sectors. The outcome of this analysis is submitted to the responsible business unit and/or entered into the reputational risk review process for evaluation by a reputational risk approver.

## Governance of reputational risk

The ExB RMC and client risk committees are the governing bodies responsible for the oversight and active discussion of client, transaction and affiliation risks. At the Board level, the Risk Committee assists the Board in fulfilling its reputational risk oversight responsibilities by reviewing and approving the Group's risk appetite framework as well as assessing the adequacy of the management of reputational and sustainability risks.

In order to inform our stakeholders about how we manage some of the sustainability risks inherent to the banking business, we publish our Sustainability Report, in which we also describe our efforts to conduct our operations in a manner that is environmentally and socially responsible and broadly contributes to society.

- Refer to “credit-suisse.com/sustainabilityreport” for our Sustainability Report.

## Climate-related risks

### Definition of climate-related risks

Climate-related risks are the potentially adverse direct and indirect impacts on the Group's financial metrics, operations or reputation due to transition or physical effects of climate change.

Climate-related risks are a core element of sustainability risks. Sustainability risks have potentially adverse impacts on the environment, on people or society, which may be caused by, contributed to or directly linked to financial service providers, usually through the activities of their clients. These may manifest themselves as reputational risks, but potentially also other risk types such as credit or non-financial risks.

### Sources of climate-related risks

Physical risks can arise from climate and weather-related events (e.g., heatwaves, droughts, floods, storms and sea-level rise) and can potentially result in material financial losses, impairing asset values and the creditworthiness of borrowers. Physical climate-related risks can affect us as an organization either directly, through our physical assets, costs and operations, or indirectly, through our financial relationships with our clients. Direct physical risks of climate change are assessed through the business continuity management program alongside other direct physical risks such as natural disasters. With regard to indirect physical risks, we assess climate-related risks by applying physical models to our portfolios, starting with pilot assessments for certain legal entities.

Transition risks can arise from the process of adjustment toward a low-carbon economy through changes in climate policy, technological developments and disruptive business models, and shifting investor and consumer sentiment.

### Evaluation and management of climate-related risks

Climate-related risks are one of the environmental aspects considered as part of Credit Suisse's broader sustainability risk agenda and Credit Suisse recognizes its share of responsibilities in combating climate change by supporting the transition to a low-carbon and climate-resilient economy. As a financial institution,

we are committed to playing our part in addressing this global challenge through our role as a financial intermediary between the economy, the environment and society.

Credit Suisse's climate approach follows three key objectives, which are anchored in our overarching sustainability and climate risk strategy: First, the Group seeks to support its clients' transition to low-carbon and climate-resilient business models by aligning its in-scope corporate lending and investment portfolios to 1.5°C pathways, engaging with clients to understand their financing needs and directing capital toward climate solutions. Second, the Group seeks to achieve its goal of net zero emissions across its own operations and supply chain, and operate its business in an environmentally sustainable manner, and third, the Group is committed to systematically identifying, mitigating and managing potential risks that climate change may pose on its business. In 2022, as part of our climate risk strategy program, we continued to enhance our disclosures incorporating more granular data and portfolio views in connection with the guidelines from the Task-force on Climate-related Financial Disclosures (TCFD).

- Refer to credit-suisse.com/sustainabilityreport for our Sustainability Report and to credit-suisse.com/tcfd for an extract of disclosures in accordance with TCFD.

### Climate-related risk management frameworks and approach to risk management

We have identified sensitive sectors which pose greater environmental and social risks (including impacts to the climate) and have specific policies and guidelines in place, taking into account standards developed by international organizations such as the United Nations, the World Bank or the International Finance Corporation (IFC). These policies and guidelines govern the responsible provision of our financial services to clients within these identified sectors. Our risk management framework incorporates an assessment of whether a transaction or client relationship under review is in line with our sector policies and relevant industry standards and good practice. Consequently, within the reputational risk review process, we evaluate factors such as a company's greenhouse gas footprint or its energy efficiency targets and we assess whether in-scope clients have a plan in place to address climate-related risks.

Climate-related risks are a core element of sustainability risks. The objective of sustainability risk reviews is to identify and prevent adverse impacts on the environment, on people or society through financial services provided for the activities of a bank's clients or prospective clients.

Through our sector policies and guidelines, we have identified business activities and operations that Credit Suisse will not finance. In 2022, we expanded our sector policies to cover the financing of climate-sensitive sectors, including oil sands, deep sea mining, Arctic oil and gas, and palm oil. Also in 2022, Asset Management and Investment Solutions & Sustainability (IS&S) within Wealth Management introduced for selected offerings new policies on Arctic oil and gas and oil sands, effective as of April 2023, as well as a coal phase-out plan by 2030.

In 2022, we further expanded the scope of our client energy transition framework (CETF) to cover the additional sectors of agriculture and petrochemicals. With this, our CETF now covers eight sectors (oil and gas, coal mining, power generation (fossil fuel-based), shipping, aviation, commodities trade finance (fossil fuel-based), agriculture and petrochemicals). The CETF is used to identify priority sectors and includes a methodology to categorize clients that operate in these sectors according to their energy transition readiness. With this approach, we aim to encourage clients to transition along the CETF scale over time and support them through financing and advisory services.

Furthermore, following the net zero trajectory we introduced in 2021 for lending to oil, gas and coal clients, and the Poseidon Principles trajectory for lending to shipping clients, additional Net Zero trajectories have been introduced in 2022 covering lending in the sectors of power generation, automotive, commercial real estate, iron and steel and aluminum. Net zero portfolio trajectories have also been set for Asset Management and discretionary mandates of IS&S within Wealth Management. These net zero frameworks support the management of credit, investment and reputational risks associated to the transition toward a decarbonized economy.

### **Governance of climate-related risks**

Climate change-related responsibilities are included in the Board's Risk Committee charter. Additionally, at the Board level, we have a Sustainability Advisory Committee. At the Executive Board level, the ExB RMC assumes responsibility for the overall climate strategy and is mandated to ensure that the capabilities for the management of relevant long-term risk trends, including climate change, are put in place. Furthermore, key internal policies, both at the Group and legal entity level, have been progressively expanded to incorporate important elements of climate risk management. For complex and high risk client transactions, including clients with business practices associated with material environmental and/or social issues, a comprehensive risk assessment is performed with escalation to relevant client risk committees.

A dedicated Climate Risk function provides specialized capabilities to assess and manage the multifaceted aspects of climate-related risks.

## **Business risk**

### **Definition and sources of business risk**

Business risk is the risk of not achieving our financial goals and ambitions in connection with the Group's strategy and how the business is managed in response to the external operating environment. External factors include both market and economic conditions, as well as shifts in the regulatory environment. Internally, we face risks arising from inappropriate strategic decisions, ineffective implementation of business strategies or an inability to adapt business strategies in response to changes in the operating environment, including in relation to client and competitor behavior.

The Group depends on dividends, distributions and other payments from its subsidiaries and the capital payouts in these subsidiaries might be restricted as a result of regulatory, tax or other constraints. Our businesses are also exposed to a variety of risks that could adversely impact the Group's dividend payments.

Business risk also includes risks associated with the Group's illiquid investments. These investments are defined as investments held in the banking book usually with longer-term time horizons and are not subject to our market risk framework (e.g., VaR measurement). Illiquid investments include private equity, hedge fund and mutual fund seed and co-investments, strategic investments (e.g., joint ventures and minority investments) as well as other investments, such as collateralized loan obligations (CLO) mandated by regulatory risk retention requirements. Trading assets and banking book loans are not covered under the illiquid investment risk framework.

### **Evaluation and management of business risk**

The Group financial plan serves as the basis for the financial goals and ambitions against which the businesses and legal entities are assessed regularly throughout the year. These regular reviews include evaluations of financial performance, capitalization and capital usage, key business risks, overall operating environment and business strategy. This enables management to identify and execute changes to the Group's operations and strategy where needed.

### **Governance of business risk**

Strategic and related financial plans are developed by each division annually and aggregated into a Group financial plan, which is reviewed by the CRO, CFO and CEO before presentation to the full Executive Board and the Board. On a regular basis, the Board and the Executive Board conduct more fundamental in-depth reviews of the Group's strategy and reassess our performance objectives.

- Refer to "Strategy" in I – Information on the company for further information on our revised strategy.

Illiquid investment risk is integrated into the Group's risk appetite framework, including risk constraints under the authority of the Board and Executive Board. The divisional risk management committees and associated sub-committees are responsible for the day-to-day oversight and approval of related risk models, guidelines and procedures.

## **Fiduciary risk**

### **Definition and sources of fiduciary risk**

Fiduciary risk is the risk of financial loss arising when the Group or its employees, acting in a fiduciary capacity as trustee, investment manager or as mandated by law, do not act in the best interest of the client in connection with the provision of advice and/or management of our client's assets including from a product-related market, credit, liquidity, counterparty and non-financial risk perspective.

## Evaluation and management of fiduciary risk

With regard to fiduciary risk that relates to discretionary investment-related activities, assessing investment performance and reviewing forward-looking investment risks in our client portfolios and investment funds is central to our investment oversight program. Areas of focus include:

- Measuring and monitoring investment performance of discretionary client portfolios and investment funds and comparing the returns against benchmarks and peer groups to understand level, sources and drivers of the returns.
- Assessing risk measures such as exposure, sensitivities, stress scenarios, expected volatility and liquidity across our portfolios as part of our efforts to manage the assets in line with the clients' expectations and risk tolerance.
- Treating clients with a prudent standard of care, which includes information disclosure, subscriptions and redemptions processes, trade execution and requiring the highest ethical conduct.
- Ensuring discretionary portfolio managers' investment approach is in accordance with prospectus, regulations and client guidelines.
- Monitoring client investment guidelines or investment fund limits. In certain cases, internal limits or guidelines are also established and monitored.

Fiduciary risks from activities other than discretionary investment management, such as the advised portfolios, are managed and monitored in a similar oversight program. This program is actively managed in cooperation with the Compliance function and is based on the suitability framework.

## Governance of fiduciary risk

Sound governance is essential for all discretionary management activities including trade execution and the investment process. Our program targets daily, monthly or quarterly monitoring of all portfolio management activities with independent analysis provided to senior management. Formal review meetings are in place as part of our efforts to ensure that investment performance and risks are in line with expectations and adequately supervised.

## Pension risk

### Definition and sources of pension risk

Pension risk is the financial risk from contractual or other liabilities to which we are exposed as a sponsor of and/or participant in pension plans. It is the risk that we may be required to make unexpected payments or other contributions to a pension plan because of a potential obligation (i.e., underfunding).

We sponsor three types of pension plans:

- defined benefit plans;
- defined contribution plans; and
- our Swiss savings plan.

Pension risk arises from defined benefit plans and the Swiss savings plan, which has elements of a defined benefit plan. Under

these plans, we, as the plan sponsor, bear the potential risk of having to provide additional funding in the event of a plan shortfall whereby the plan liabilities exceed the plan assets. Under defined contribution plans there is no defined benefit at retirement and the employee bears the investment risk; as a result, the plan sponsor is not responsible for a shortfall. The majority of our pension risk derives from the defined benefit plans in Switzerland, the UK and the US.

Sources of risks can be broadly categorized into asset investment risks (e.g., underperformance of bonds, equities and alternative investments) and liability risks, primarily from changes in interest rates, inflation and longevity.

## Evaluation and management of pension risk

### Pension plan structure

The Group's major pension plans are established as separate entities from the sponsor firm and are governed by trustees who are charged with safeguarding the interests of the plan members pursuant to statutory and regulatory requirements. Risk-taking activity within the Group's pension funds is not typically within the direct control of the sponsor firm. There is however a risk that we, as the plan sponsor, may have a potential obligation to contribute due to underfunding which could have a negative impact on the Group's capital and income before taxes.

### Metrics and targets

Pension risk forms an integral part of the Group's risk appetite assessment with internal macro-economic stress scenarios used for Group-wide stress testing. These are incremental to the assessment performed by the trustees and their external advisers.

Within Risk, pension risk is measured and quantified through both our stress testing framework and internal capital metrics used to assess the Group's capital requirements. These measures are intended to assess the potential impact from the revaluation of pension assets and liabilities on the Group's capital metrics and income before taxes.

## Governance of pension risk

The overall pension risk framework and governance structure of our pension plans consists of three components:

- Trustees have overall responsibility of the pension plan and act on behalf of the beneficiaries of the plan with additional oversight by actuaries and external consultants. Trustees are responsible for ensuring that the pension plan is run properly and the member benefits are secure.
- Depending on the jurisdiction there is oversight provided by senior management, trustees, actuaries and/or advisors in relation to local funding, investment strategy, plan changes or other actions of the pension fund.
- Risk monitors and reports various metrics and analytics to senior management and regulators (e.g., economic risk capital, severe flight to quality and loss potential analysis).

# Risk portfolio analysis

## Credit risk

### Credit risk overview

Transactions that are exposed to potential losses arising as a result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty are subject to credit risk exposure measurement and management.

- Refer to “Note 20 – Financial instruments measured at amortized cost and credit losses” in VI – Consolidated financial statements – Credit Suisse Group for information on credit quality and aging analysis of loans.

For regulatory capital purposes, credit risk comprises several regulatory categories where credit risk measurement and related regulatory capital requirements are subject to different measurement approaches under the Basel framework. Details on regulatory credit risk categories, credit quality indicators and credit risk concentration are available in our disclosures required under Pillar 3 of the Basel framework related to risk, which will be available on our website.

- Refer to “credit-suisse.com/regulatorydisclosures” for further information.

### Loans and irrevocable loan commitments

The following table provides an overview of loans and irrevocable loan commitments by division in accordance with accounting principles generally accepted in the US and are not comparable with the regulatory credit risk exposures presented in our disclosures required under Pillar 3 of the Basel framework.

#### Loans and irrevocable loan commitments

end of	2022	2021
<b>CHF million</b>		
Gross loans	265,599	293,064
Irrevocable loan commitments	112,129	122,559
<b>Total loans and irrevocable loan commitments</b>	<b>377,728</b>	<b>415,623</b>
of which Wealth Management	86,355	113,493
of which Investment Bank	114,885	122,526
of which Swiss Bank	175,240	178,170
of which Asset Management	25	44
of which Corporate Center	1,223	1,390

Divisional metrics reflect where the loans are recorded and managed from a risk management view and do not reflect any revenue sharing arrangements that exist between divisions.

### Loans held-for-sale and traded loans

As of December 31, 2022 and 2021, loans held-for-sale included CHF 23 million and CHF 29 million, respectively, of seasoned US subprime residential mortgages from consolidated variable interest entities (VIE). Traded loans included US subprime residential mortgages of CHF 381 million and CHF 278 million as of December 31, 2022 and 2021, respectively.

### Loans

The table “Loans” provides an overview of our loans by loan classes, impaired loans, the related allowance for credit losses and selected loan metrics by business division. The carrying values of loans and related allowance for credit losses are presented in accordance with generally accepted accounting standards in the US and are not comparable with the regulatory credit risk exposures presented in our disclosures required under Pillar 3 of the Basel framework.

Compared to December 31, 2021, gross loans decreased CHF 27.5 billion to CHF 265.6 billion as of December 31, 2022, mainly driven by decreases in loans collateralized by securities, commercial and industrial loans, loans to the real estate sector and consumer mortgages. The net decrease of CHF 13.6 billion in loans collateralized by securities mainly reflected a decrease in Wealth Management. The net decrease of CHF 7.1 billion in commercial and industrial loans mainly reflected a decrease in Wealth Management, partially offset by an increase in the Investment Bank. Loans to the real estate sector decreased CHF 3.1 billion, primarily in the Swiss Bank and Wealth Management. Consumer mortgages decreased CHF 3.0 billion, primarily in the Swiss Bank.

On a divisional level, decreases in gross loans of CHF 25.0 billion in Wealth Management and CHF 3.3 billion in the Swiss Bank were partially offset by an increase of CHF 1.1 billion in the Investment Bank.

- Refer to “Note 19 – Loans” and “Note 20 – Financial instruments measured at amortized cost and credit losses” in VI – Consolidated financial statements – Credit Suisse Group for further information.

Divisional metrics reflect where the loans are recorded and managed from a risk management view and do not reflect any revenue sharing arrangements that exist between divisions.

<sup>1</sup> Allowance for credit losses is only based on loans that are not carried at fair value.

### Collateralized loans

The table “Collateralized loans” provides an overview of collateralized loans by division. For consumer loans, the balances reflect the gross carrying value of the loan classes “Mortgages” and “Loans collateralized by securities”, of which a significant majority

are fully collateralized. Consumer finance loans are not included as the majority of these loans are unsecured. For corporate & institutional loans, the balances reflect the value of mortgages and financial and other collateral related to secured loans, considered up to the amount of the related loans.

## Collateralized loans

of which secured by financial and other collateral	33,423	18,333	11,749	0	331	63,836

Divisional metrics reflect where the loans are recorded and managed from a risk management view and do not reflect any revenue sharing arrangements that exist between divisions.

- 1 Reflects the gross carrying value of the consumer loan classes “Mortgages” and “Loans collateralized by securities”, before allowance for credit losses.
- 2 Reflects the value of mortgages and financial and other collateral related to secured corporate & institutional loans, considered up to the amount of the related loans. Prior period has been revised.

Within consumer loans, mortgages primarily include mortgages on residential real estate such as single family homes, apartments and holiday homes as well as building loans. Mortgages may also include certain loans that are secured by a combination of mortgages or other real estate titles and other collateral including, e.g., securities, cash deposits or life insurance policies. Loans collateralized by securities primarily include lombard loans secured by well-diversified portfolios of securities and share-backed loans.

Within corporate & institutional loans, mortgage collateral primarily includes income-producing commercial and residential real estate held by corporate & institutional clients. Financial and other collateral includes various types of eligible collateral, e.g., securities, cash deposits, financial receivables related to factoring, certain real assets such as ownership titles in ship and aircraft, inventories and commodities, as well as certain non-tangible securities such as licensing agreements or guarantees.

Financial collateral is subject to frequent market valuation depending on the asset class. In the Group’s private banking, corporate and institutional businesses, all collateral values for loans are regularly reviewed according to the Group’s risk management policies and directives, with maximum review periods determined by collateral type, market liquidity and market transparency. For example, traded securities are revalued on a daily basis and property values are appraised over a medium-term horizon generally exceeding one year considering the characteristics of the

property, current developments in the relevant real estate market and the current level of credit exposure to the borrower. If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be appraised more frequently. Management judgment is applied in assessing whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macroeconomic research. For impaired loans, the fair value of collateral is determined within 90 days of the date the impairment was identified and thereafter regularly revalued by Credit Risk within the impairment review process. In the Group’s investment banking businesses, collateral-dependent loans are appraised on at least an annual basis, or when a loan-relevant event occurs.

As of December 31, 2022, 98% of the aggregate Swiss residential mortgage loan portfolio of CHF 112.6 billion had a loan-to-value (LTV) ratio equal to or lower than 80%. As of December 31, 2021, 98% of the aggregate Swiss residential mortgage loan portfolio of CHF 113.4 billion had an LTV ratio equal to or lower than 80%. For substantially all Swiss residential mortgage loans originated in 2022 and 2021, the average LTV ratio was equal to or lower than 80% at origination. Our LTV ratios are based on the most recent appraised value of the collateral.

## Impaired loans

Compared to December 31, 2021, gross impaired loans increased CHF 657 million to CHF 3.4 billion as of December 31, 2022, mainly driven by higher potential problem loans in Wealth Management, the Investment Bank and the Swiss Bank.

In the Investment Bank, gross impaired loans increased CHF 359 million, mainly reflecting impairments in securitizations relating to

aircraft companies. In Wealth Management, gross impaired loans increased CHF 279 million, primarily driven by newly impaired Russia-related positions in corporate lending, export finance as well as aviation and yacht finance. These increases were partially offset by the resolution of several positions and exposure reductions primarily in European mortgages and share-backed lending.

Divisional metrics reflect where the loans are recorded and managed from a risk management view and do not reflect any revenue sharing arrangements that exist between divisions.

<sup>1</sup> Impaired loans are only based on loans that are not carried at fair value.

<sup>2</sup> Includes gross impaired loans of CHF 224 million and CHF 84 million as of December 31, 2022 and 2021, respectively, which are mostly secured by guarantees provided by investment-grade export credit agencies.

In March 2020, US federal banking regulators issued the “Inter-agency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus (Revised)” (Interagency Statement). According to the Interagency Statement, short-term modifications made on a good faith basis in response to the COVID-19 crisis to borrowers that were otherwise current prior to the relief being granted would not be considered to be troubled debt restructurings. This includes short-term modifications such as payment deferrals, fee waivers,

repayment term extensions or payment delays that are insignificant. The Interagency Statement was developed in consultation with the Financial Accounting Standards Board (FASB) and the Group applied this guidance until December 31, 2022. The Group had granted short-term modifications to certain borrowers due to the COVID-19 crisis in the form of deferrals of capital and interest payments that were within the scope of this guidance and the loans subject to those deferrals were not reported as troubled debt restructurings in restructured loans.

## Allowance for credit losses on loans

Compared to December 31, 2021, the allowance for credit losses increased CHF 66 million to CHF 1.4 billion as of December 31,

2022, primarily reflecting increases in specific provision for expected credit losses, particularly in the Investment Bank.

Divisional metrics reflect where the loans are recorded and managed from a risk management view and do not reflect any revenue sharing arrangements that exist between divisions. Gross loans and gross impaired loans exclude loans carried at fair value and the allowance for credit losses is only based on loans that are not carried at fair value.

## Allowance for credit losses on other financial assets

In 2022, the Investment Bank recorded a release of provision for credit losses of CHF 155 million pertaining to an assessment of the future recoverability of receivables related to Archegos. In 2021, the Investment Bank incurred a provision for credit losses of CHF 4,307 million related to the failure by Archegos to meet its margin commitments. On the Group's consolidated balance sheet as of December 31, 2022 and 2021, the related allowance is included in the allowance for credit losses on brokerage receivables of CHF 4,081 million and CHF 4,186 million, respectively.

- Refer to "Risk factors" in I – Information on the company for information on the Archegos matter.
- Refer to "Note 9 – Provision for credit losses" and "Note 20 – Financial instruments measured at amortized cost and credit losses" in VI – Consolidated financial statements – Credit Suisse Group for further information.

Derivatives are either privately negotiated OTC contracts or standard contracts transacted through regulated exchanges. The most frequently used derivative products include interest rate swaps, cross-currency swaps and credit default swaps (CDS), interest rate and foreign exchange options, foreign exchange forward contracts, and foreign exchange and interest rate futures. In addition, the Group enters into total return swaps on specific assets which offer exposure to price performance of securities to clients, offering synthetic financing arrangements as an alternative to on balance sheet financing of physical securities.

The replacement values of derivative instruments correspond to their fair values at the dates of the consolidated balance sheets and arise from transactions for the account of individual customers and for our own account. Positive replacement values (PRV) constitute an asset, while negative replacement values (NRV) constitute a liability. Fair value does not indicate future gains or losses, but rather premiums paid or received for a derivative instrument at inception, if applicable, and unrealized gains and losses from marking to market all derivatives at a particular point in time. The fair values of derivatives are determined using various

**Derivative instruments**

The Group enters into derivative contracts in the normal course of business for market making, positioning and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate, foreign exchange and credit risk.

methodologies, primarily observable market prices where available and, in their absence, observable market

**160 Risk management**

parameters for instruments with similar characteristics and maturities, net present value analysis or other pricing models as appropriate.

The following table illustrates how credit risk on derivatives receivables is reduced by the use of legally enforceable netting agreements and collateral agreements. Netting agreements allow us to net balances from derivative assets and liabilities transacted with the same counterparty when the netting agreements are legally enforceable. Replacement values are disclosed net of such

agreements in the consolidated balance sheets. Collateral agreements are entered into with certain counterparties based upon the nature of the counterparty and/or the transaction and require the placement of cash or securities with us as collateral for the underlying transaction. The carrying values of derivatives are presented in accordance with generally accepted accounting standards in the US and are not comparable with the derivatives metrics presented in our disclosures required under Pillar 3 of the Basel framework.

<sup>3</sup> Taking into account legally enforceable netting agreements.

Derivative transactions exposed to credit risk are subject to a credit request and approval process, ongoing credit and counterparty monitoring and a credit quality review process. Counterparty credit risk exposures arising from derivatives are subject to division-specific review and oversight, including the estimation of potential loss and downside risk in stress scenarios. The following table represents the rating split of our credit exposure from derivative instruments.

#### Derivative instruments by counterparty credit rating

end of	2022	2021
<b>CHF billion</b>

Credit ratings do not reflect the benefit of collateral received.

<sup>1</sup> Taking into account legally enforceable netting agreements.

Derivative instruments are categorized as exposures from trading activities (trading) and those qualifying for hedge accounting (hedging). Trading includes activities relating to market making, positioning and arbitrage. It also includes economic hedges where the Group enters into derivative contracts for its own risk management purposes, but where the contracts do not qualify for hedge accounting under US GAAP. Hedging includes contracts that qualify for hedge accounting under US GAAP, such as fair value hedges, cash flow hedges and net investment hedges.

- Refer to “Note 28 – Offsetting of financial assets and financial liabilities” in VI – Consolidated financial statements – Credit Suisse Group for further information on offsetting of derivatives.
- Refer to “Note 33 – Derivatives and hedging activities” in VI – Consolidated financial statements – Credit Suisse Group for further information on derivatives, including an overview of derivatives by products categorized for trading and hedging purposes.

#### Forwards and futures

The Group enters into forward purchase and sale contracts for mortgage-backed securities, foreign currencies and commitments to buy or sell commercial and residential mortgages. In addition, we enter into futures contracts on equity-based indices and other financial instruments, as well as options on futures contracts. These contracts are typically entered into to meet the needs of customers, for trading and for hedging purposes.

On forward contracts, the Group is exposed to counterparty credit risk. To mitigate this credit risk, we limit transactions by counterparty, regularly review credit limits and adhere to internally established credit extension policies.

For futures contracts and options on futures contracts, the change in the market value is settled with a clearing broker in cash each day. As a result, our credit risk with the clearing broker is limited to the net positive change in the market value for a single day.

### Swaps

Swap agreements consist primarily of interest rate swaps, CDS, currency and equity swaps. The Group enters into swap agreements for trading and risk management purposes. Interest rate swaps are contractual agreements to exchange interest rate payments based on agreed upon notional amounts and maturities. CDS are contractual agreements in which the buyer of the swap pays a periodic fee in return for a contingent payment by the seller of the swap following a credit event of a reference entity. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt, or failure to meet payment obligations when due. Currency swaps are contractual agreements to exchange payments in different currencies based on agreed notional amounts and currency pairs. Equity swaps are contractual agreements to receive the appreciation or depreciation in value based on a specific strike price on an equity instrument in exchange for paying another rate, which is usually based on an index or interest rate movements.

### Options

We write options specifically designed to meet the needs of customers and for trading purposes. These written options do not expose us to the credit risk of the customer because, if exercised, we and not our counterparty are obligated to perform. At the beginning of the contract period, we receive a cash premium. During the contract period, we bear the risk of unfavorable changes in the value of the financial instruments underlying the options. To manage this market risk, we purchase or sell cash or

derivative financial instruments. Such purchases and sales may include debt and equity securities, forward and futures contracts, swaps and options.

We also purchase options to meet customer needs, for trading purposes and for hedging purposes. For purchased options, we obtain the right to buy or sell the underlying instrument at a fixed price on or before a specified date. During the contract period, our risk is limited to the premium paid. The underlying instruments for these options typically include fixed income and equity securities, foreign currencies and interest rate instruments or indices. Counterparties to these option contracts are regularly reviewed in order to assess creditworthiness.

## Market risk

### Traded market risk

#### Development of traded market risks

The tables entitled “Average one-day, 98% risk management VaR by division” and “One-day, 98% risk management VaR” show our traded market risk exposure, as measured by one-day, 98% risk management VaR in Swiss francs and US dollars. As we measure VaR for internal risk management purposes using the US dollar as the base currency, the VaR figures were translated into Swiss francs using daily foreign exchange translation rates. VaR estimates are computed separately for each risk type and for the whole portfolio. The different risk types are grouped into five categories including interest rate, credit spread, foreign exchange, commodity and equity risks.

Risk management VaR measures the Group’s traded market risk exposure managed under the market risk framework and generally includes the trading book positions and banking book positions held at fair value.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 2022, there were no material changes to our VaR methodology.

#### Average one-day, 98% risk management VaR by division

in	Wealth Management	Investment Bank	Swiss Bank	Asset Management	Corporate Center	Diversification benefit <sup>1</sup>	Credit Suisse
<b>CHF million</b>

Maximum	29	83	41	5	41	— <sup>2</sup>	74
End of period	12	40	30	3	35	(71)	49

Excludes risks associated with counterparty and own credit exposures. Risk management VaR measures the Group's risk exposure managed under the market risk framework and generally includes the trading book positions and banking book positions held at fair value.

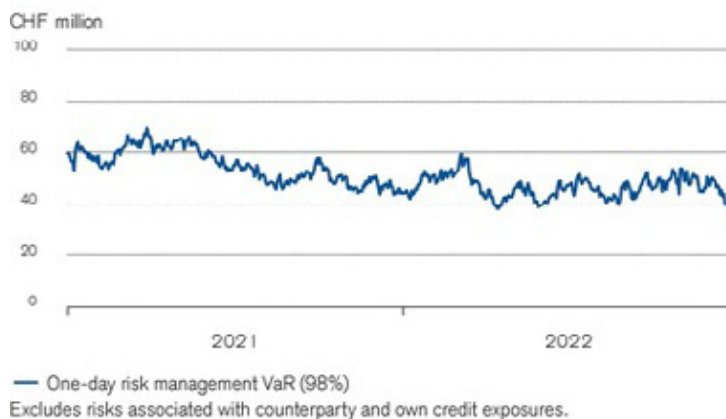

- 1 Diversification benefit represents the reduction in risk that occurs when combining different, not perfectly correlated risk types in the same portfolio and is measured as the difference between the sum of the individual risk types and the risk calculated on the combined portfolio.
- 2 As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

We measure VaR in US dollars, as the majority of our trading activities are conducted in US dollars.

Average risk management VaR of USD 49 million in 2022 decreased 18% compared to 2021, primarily reflecting a reduction in securitized products positions in the Investment Bank and COVID-19 pandemic volatility dates moving out of the recent historical data set of the VaR model. The decrease in credit spread risk management VaR was driven by the aforementioned factors. The increase in foreign exchange risk management VaR was driven by positional changes. The increase in interest rate and equity risk management VaR was driven by the inclusion of volatility observed in the second half of 2022 in the data set.

The chart entitled "Daily risk management VaR" shows the aggregated traded market risk on a consolidated basis.

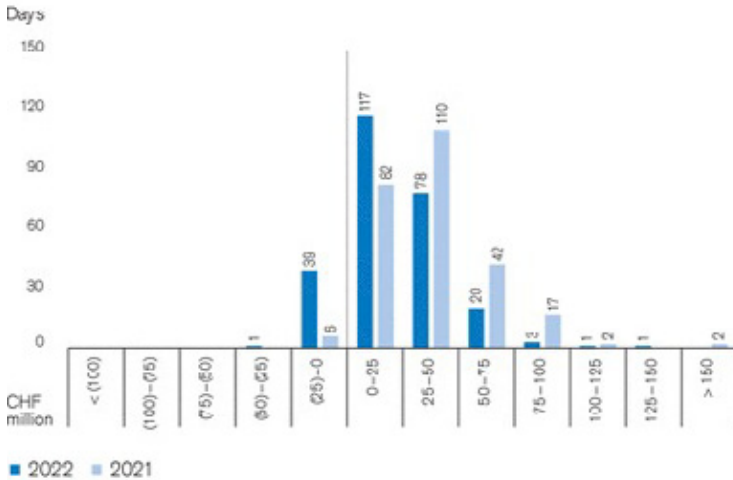

### Daily risk management VaR

The histogram entitled "Actual daily trading revenues" compares the actual daily trading revenues for 2022 with those for 2021. Actual daily trading revenues is an internally used metric, limited to the trading book only, and excludes the cost of carry, credit provisions and internal revenue transfers. The cost of carry is the change in value of the portfolio from one day to the next, assuming all other factors such as market levels and trade population

remain constant, and can be negative or positive. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 2022, we had 40 trading loss days compared to six trading loss days in 2021.

### Actual daily trading revenues

For capital purposes and in line with BIS requirements, FINMA increases the capital multiplier for every regulatory VaR back-testing exception above four in the prior rolling 12-month period, resulting in an incremental market risk capital requirement for the Group. For the rolling 12-month period through the end of 2022, we had one backtesting exception in our regulatory VaR model, and the model remained in the regulatory “green zone”.

- Refer to “Risk-weighted assets” in Capital management for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

### Credit, debit and funding valuation adjustments

VaR excludes the impact of changes in both counterparty and our own credit spreads on derivative products. As of December 31, 2022, the estimated sensitivity implies that a one basis point increase in credit spreads, both counterparty and our own, would have resulted in a CHF 0.6 million gain on the overall derivatives position in our trading businesses. In addition, a one basis point increase in our own credit spread on our fair valued structured notes portfolio (including the impact of hedges) would have resulted in a CHF 11.9 million gain as of December 31, 2022. As of December 31, 2022, the estimated FVA sensitivity implies that a one basis point increase in the fair value funding spread would have resulted in a CHF 0.1 million loss on the overall derivatives position in the investment banking businesses.

### Non-traded market risk

#### Development of interest rate risks in the banking book

Interest rate risk on banking book positions is measured by estimating the impact resulting from a one basis point parallel increase in yield curves on the present value of interest rate-sensitive banking book positions. This is measured on the Group’s entire banking book. Interest rate risk sensitivities disclosed below are in line with our internal risk management view.

- Refer to [credit-suisse.com/regulatorydisclosures](https://www.credit-suisse.com/regulatorydisclosures) for the Group’s publication “Pillar 3 and regulatory disclosures 4Q22 – Credit Suisse Group AG” which includes additional information on regulatory interest rate risk in the banking book in accordance with FINMA guidance.

As of December 31, 2022, the interest rate sensitivity of a one basis point parallel increase in yield curves was negative CHF 5.0 million, compared to negative CHF 3.6 million as of December 31, 2021. The change was mainly driven by a duration increase in net interest income hedging activities in addition to regular management of banking book activities.

### One basis point parallel increase in yield curves by currency – banking book positions

end of	CHF	USD	EUR	Other	Total
<b>2022 (CHF million)</b>					
Impact on present value	(0.6)	(4.3)	0.0	(0.1)	(5.0)
<b>2021 (CHF million)</b>					
Impact on present value	(0.6)	(3.0)	0.2	(0.2)	(3.6)

Interest rate risk on banking book positions is also assessed using other measures, including the potential value change resulting from a significant change in yield curves. The interest rate scenarios disclosed below are aligned to the FINMA guidance for Pillar 3 disclosures. The table “Interest rate scenario results – banking book positions” shows the impact of the FINMA-defined interest rate scenarios on the net present value of our banking book positions excluding additional tier 1 capital instruments (as per Pillar 3 requirements) and including additional tier 1 capital instruments.

As of December 31, 2022, the most adverse economic impact from these scenarios (including additional tier 1 capital instruments) was a loss of CHF 955 million, compared to a loss of CHF 555 million as of December 31, 2021. The change was mainly driven by a duration increase in net interest income hedging activities in addition to regular management of banking book activities.

## Interest rate scenario results – banking book positions

end of	CHF	USD	EUR	Other	Total – Pillar 3 view <sup>1</sup>	Total – Internal view <sup>2</sup>
<b>2022 (CHF million)</b>						
Parallel up	(149)	(1,620)	(6)	(7)	(1,782)	(955)
Parallel down	116	1,803	2	2	1,923	999
Steeper shock <sup>3</sup>	49	12	27	(12)	76	106
Flattener shock <sup>4</sup>	(73)	(371)	(30)	12	(462)	(307)
Rise in short-term interest rates	(106)	(1,030)	(31)	6	(1,161)	(677)
Fall in short-term interest rates	102	1,060	27	(12)	1,177	659
<b>2021 (CHF million)</b>						
Parallel up	(114)	(1,515)	38	(8)	(1,599)	(555)
Parallel down	176	1,788	(28)	79	2,015	834
Steeper shock <sup>3</sup>	(315)	18	(16)	2	(311)	(224)
Flattener shock <sup>4</sup>	304	(309)	26	26	47	190
Rise in short-term interest rates	192	(923)	32	27	(672)	(108)
Fall in short-term interest rates	(205)	1,065	(33)	50	877	264

All scenarios are in line with FINMA guidance (FINMA circular 2019/2).

- 1 Excludes additional tier 1 capital instruments in accordance with Pillar 3 requirements.
- 2 Includes additional tier 1 capital instruments in accordance with the Group's risk management view.
- 3 Reflects a fall in short-term interest rates combined with a rise in long-term interest rates.
- 4 Reflects a rise in short-term interest rates combined with a fall in long-term interest rates.

### Illiquid investments

The Group's illiquid investment positions, which may not be strongly correlated with general equity markets, are measured using internal SFTQ scenario analysis. It is a key scenario that periodically evolves and is used for Group-wide stress testing and risk appetite setting. It is a combination of market shocks and defaults that reflects conditions similar to what followed

the 2008/2009 financial crisis. The SFTQ scenario assumes a severe crash across financial markets, along with sharply increasing default rates. The estimated impact of the current scenario would have been a decrease of CHF 184 million in the value of the illiquid investment portfolio as of December 31, 2022, compared to a decrease of CHF 200 million as of December 31, 2021.

# Balance sheet and off-balance sheet

**As of the end of 2022, total assets of CHF 531.4 billion decreased 30% and total liabilities of CHF 486.0 billion decreased 32% compared to the end of 2021, primarily reflecting lower operating activities.**

The majority of our transactions are recorded on our balance sheet. However, we also enter into transactions that give rise to both on and off-balance sheet exposure.

## Balance sheet

Total assets were CHF 531.4 billion as of the end of 2022, a decrease of CHF 224.5 billion, or 30%, compared to the end of 2021. Excluding the foreign exchange translation impact, total assets decreased CHF 224.7 billion. Cash and due from banks decreased CHF 96.3 billion, or 58%, mainly driven by lower cash positions at the SNB, Bank of Japan and the ECB. Trading assets decreased CHF 45.7 billion, or 41%, primarily reflecting decreases in equity and debt securities and in derivative instruments. Central bank funds sold, securities

purchased under resale agreements and securities borrowing transactions decreased CHF 45.1 billion, or 43%, primarily due to decreases in reverse repurchase transactions from customers and cash collateral. Net loans decreased CHF 27.5 billion, or 9%, mainly driven by decreases in loans collateralized by securities, commercial and industrial loans, loans to the real estate sector and consumer mortgages. Brokerage receivables decreased CHF 2.9 billion, or 17%, mainly reflecting a decrease in margin lending, driven by the impact of resizing the prime services franchise, and lower futures balances, partially offset by an increase in open trades. All other assets decreased CHF 7.0 billion, or 10%, primarily including a decrease of CHF 12.0 billion, or 80%, in securities received as collateral, partially offset by an increase of CHF 5.4 billion, or 13%, in other assets, mainly related to higher loans held-for-sale.

### Balance sheet summary

	2022	end of 2021	2020	% change	
				22 / 21	21 / 20
<b>Assets (CHF million)</b>					
Cash and due from banks	68,478	164,818	139,112	(58)	18

Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions	20,280	35,274	36,994	(43)	(5)
Trading liabilities	18,338	27,535	45,871	(33)	(40)
Long-term debt	157,235	166,896	161,087	(6)	4
Brokerage payables	11,442	13,060	21,653	(12)	(40)
All other liabilities	33,592	57,054	103,075	(41)	(45)
<b>Total liabilities</b>	<b>486,027</b>	<b>711,603</b>	<b>776,024</b>	<b>(32)</b>	<b>(8)</b>
<b>Total shareholders' equity</b>	<b>45,129</b>	<b>43,954</b>	<b>42,677</b>	<b>3</b>	<b>3</b>
Noncontrolling interests	202	276	264	(27)	5
<b>Total equity</b>	<b>45,331</b>	<b>44,230</b>	<b>42,941</b>	<b>2</b>	<b>3</b>
<b>Total liabilities and equity</b>	<b>531,358</b>	<b>755,833</b>	<b>818,965</b>	<b>(30)</b>	<b>(8)</b>

Total liabilities were CHF 486.0 billion as of the end of 2022, a decrease of CHF 225.6 billion, or 32%, compared to the end of 2021. Excluding the foreign exchange translation impact, total liabilities decreased CHF 226.6 billion. Customer deposits decreased CHF 159.6 billion, or 41%, reflecting significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits in the fourth quarter of 2022. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions decreased CHF 15.0 billion, or 43%, mainly reflecting a decrease in cash collateral from customers. Long-term debt decreased CHF 9.7 billion, or 6%, primarily reflecting maturities of senior and subordinated debt and valuation adjustments on senior and subordinated debt, partially offset by issuances of senior and subordinated debt. Trading liabilities decreased CHF 9.2 billion, or 33%, primarily reflecting decreases in short positions and derivative instruments. Due to banks decreased CHF 7.1 billion, or 37%, primarily reflecting a decrease in time deposits, partially offset by an increase in demand deposits. Brokerage payables decreased CHF 1.6 billion, or 12%, primarily due to a decrease in margin lending, partially offset by an increase in open trades. All other liabilities decreased CHF 23.5 billion, or 41%, including a decrease of CHF 12.0 billion, or 80%, in obligation to return securities received as collateral, a decrease of CHF 7.0 billion, or 36%, in short-term borrowings and a decrease of CHF 4.4 billion, or 20%, in other liabilities, mainly related to cash collateral on derivative instruments.

- Refer to “Liquidity and funding management” and “Capital management” for more information, including our funding of the balance sheet and the leverage ratio.

## Off-balance sheet

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an uncon-solidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

## Derivative instruments

We enter into derivative contracts in the normal course of business for market making, positioning and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate, foreign exchange and credit risk.

- Refer to “Derivative instruments” in Risk management – Risk portfolio analysis – Credit risk and “Note 33 – Derivatives and hedging activities” and “Note 36 – Financial instruments” in VI – Consolidated financial statements – Credit Suisse Group for further information.

## Guarantees and similar arrangements

In the ordinary course of business, guarantees and indemnifications are provided that contingently obligate us to make payments to a guaranteed or indemnified party based on changes in an asset, liability or equity security of the guaranteed or indemnified party. We may be contingently obligated to make payments to a guaranteed party based on another entity’s failure to perform, or we may have an indirect guarantee of the indebtedness of others. Guarantees provided include, but are not limited to, customary indemnifications to purchasers in connection with the sale of assets or businesses; to investors in private equity funds sponsored by us regarding potential obligations of their employees to return amounts previously paid as carried interest; and to investors in our securities and other arrangements to provide gross-up payments if there is a withholding or deduction because of a tax assessment or other governmental charge.

In connection with the sale of assets or businesses, we sometimes provide the acquirer with certain indemnification provisions. These indemnification provisions vary by counterparty in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. We closely monitor all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in our consolidated financial statements.

US GAAP requires disclosure of our maximum potential payment obligations under certain guarantees to the extent that it is possible to estimate them and requires recognition of a liability for the fair value of obligations undertaken for guarantees issued or amended after December 31, 2002.

- Refer to “Note 34 – Guarantees and commitments” in VI – Consolidated financial statements – Credit Suisse Group for disclosure of our estimated maximum payment obligations under certain guarantees and related information.

## Representations and warranties on residential mortgage loans sold

In connection with the Investment Bank division’s sale of US residential mortgage loans, we have provided certain representations and warranties relating to the loans sold. We have provided these representations and warranties relating to sales of loans to institutional investors, primarily banks, and non-agency, or private label, securitizations. The loans sold are primarily loans that we have purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, we may be required

to repurchase the related loans or indemnify the investors to make them whole for losses. Whether we will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims made within the statute of limitations (including the likelihood and ability to enforce claims); whether we can successfully claim against parties that sold loans to us and made representations and warranties to us; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

- Refer to “Representations and warranties on residential mortgage loans sold” in Note 34 – Guarantees and commitments in VI – Consolidated financial statements – Credit Suisse Group for further information.

### Involvement with special purpose entities

In the normal course of business, we enter into transactions with, and make use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE’s assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist us and our clients in securitizing financial assets and creating investment products. We also use SPEs for other client-driven activity, such as to facilitate financings, and for Group tax or regulatory purposes.

- Refer to “Note 35 – Transfers of financial assets and variable interest entities” in VI – Consolidated financial statements – Credit Suisse Group for further information.

From time to time, we may issue subordinated and senior securities through SPEs that lend the proceeds to Group entities.

## Contractual obligations and other commercial commitments

In connection with our operating activities, we enter into certain contractual obligations and commitments to fund certain assets. Our contractual obligations and commitments include short and long-term on-balance sheet obligations as well as future contractual interest payments and off-balance sheet obligations. Total obligations decreased CHF 194.4 billion in 2022 to CHF 451.0 billion, primarily reflecting decreases in customer deposits of CHF 159.6 billion to CHF 233.2 billion, in long-term debt of CHF 9.7 billion to CHF 157.2 billion, in trading liabilities of CHF 9.2 billion to CHF 18.3 billion, in due to banks of CHF 7.1 billion to CHF 11.9 billion, in short-term borrowings of CHF 7.0 billion to CHF 12.4 billion and in brokerage payables of CHF 1.6 billion to CHF 11.4 billion.

- Refer to “Note 24 – Leases”, “Note 26 – Long-term debt” and “Note 34 – Guarantees and commitments” in VI – Consolidated financial statements – Credit Suisse Group for further information.

### Contractual obligations and other commercial commitments

<b>Total obligations <sup>7</sup></b>	<b>314,771</b>	<b>48,408</b>	<b>33,174</b>	<b>54,632</b>	<b>450,985</b>	<b>645,370</b>

- Refer to “Debt issuances and redemptions” in Liquidity and funding management – Funding management and “Note 26 – Long-term debt” in VI – Consolidated financial statements – Credit Suisse Group for further information on long-term debt.
- Included non-recourse liabilities from consolidated VIEs of CHF 2,096 million and CHF 1,391 million as of December 31, 2022 and 2021, respectively.
- These obligations are excluded from “Other commitments” in Note 34 – Guarantees and commitments in VI – Consolidated financial statements – Credit Suisse Group.
- Includes interest payments on fixed rate long-term debt, fixed rate interest-bearing deposits (excluding demand deposits) and fixed rate short-term borrowings, which have not been effectively converted to variable rate on an individual instrument level through the use of swaps.
- Due to the non-determinable nature of interest payments, the following notional amounts have been excluded from the table: variable rate long-term debt of CHF 68,362 million, variable rate short-term borrowings of CHF 12,229 million, variable rate interest-bearing deposits and demand deposits of CHF 106,226 million, fixed rate long-term debt and fixed rate interest-bearing deposits converted to variable rate on an individual instrument level through the use of swaps of CHF 96,423 million and CHF 63 million, respectively.
- Purchase obligations include contractual obligations for certain professional services, occupancy, IT and other administrative expenses.
- Excluded total accrued benefit liability for pension and other post-retirement benefit plans of CHF 259 million and CHF 344 million as of December 31, 2022 and 2021, respectively, recorded in other liabilities in the consolidated balance sheets, as the accrued liability does not represent expected liquidity needs. Refer to “Note 32 – Pension and other post-retirement benefits” in VI – Consolidated financial statements – Credit Suisse Group for further information on pension and other post-retirement benefits.

## Corporate Governance

2022 represented an additional year of significant change for the Group's corporate governance, with the election of a new Chairman, the appointment of a new CEO and the announcement of further organizational changes in line with our new strategy.

### Overview

The Group's corporate governance reflects our commitment to safeguard the interests of our stakeholders. Our corporate governance complies with internationally accepted standards, and we recognize the importance of good corporate governance. We know that transparent disclosure of our governance helps stakeholders assess the quality of the Group's corporate governance and assists investors in their investment decisions.

### Corporate Governance developments

The key corporate governance developments for the Group in 2022 and early 2023 included the following:

#### Board of Directors

- Axel Lehmann was elected as Chairman of the Board of Directors (Chairman) at the Annual General Meeting (AGM) on April 29, 2022. Axel Lehmann was initially appointed as Chairman by the Board of Directors (Board) with effect from January 16, 2022, succeeding António Horta-Osório, who resigned from the Board;
- Three new Board members, Mirko Bianchi, Keyu Jin and Amanda Norton, were elected at the 2022 AGM, ensuring that the Board continues to have strong expertise in the areas of finance and risk management and with respect to Asian markets, particularly China, which are important growth areas for the Group; Mirko Bianchi was subsequently appointed Chair of the Audit Committee;
- Long-standing Board members Severin Schwan and Kai Nargolwala did not stand for re-election at the 2022 AGM, nor did Juan Colombas, who had been elected to the Board in October 2021;
- Several leadership changes within the Board have been implemented, including the appointment of Christian Gellerstad as Vice-Chair and Lead Independent Director (former Vice-Chair and Lead Independent Director: Severin Schwan), and Chair of the Compensation Committee (former Chair: Kai Nargolwala), as well as the appointments of Clare Brady as Chair of the Conduct and Financial Crime Control Committee (former Chair: Christian Gellerstad), Richard Meddings as Chair of the Risk Committee (former Chair: Axel Lehmann) and a refreshed composition of the Governance and Nominations Committee; and
- Michael Klein stepped down from the Board and the Compensation Committee on October 27, 2022 in the context of the restructuring of the Group's Investment Bank. It was subsequently announced on February 9, 2023 that, subject to regulatory approval, Michael Klein will join the Executive Board

Remediation Committee (SRRC) at the Executive Board level, chaired by the CRO;

as CEO of Banking, regional CEO of Americas and CEO designate of CS First Boston and that the Group will acquire The Klein Group LLC, a New York-based investment banking boutique and registered broker-dealer, which will be integrated into CS First Boston.

#### Executive Board

- Ulrich Körner, who was serving as the CEO of the Asset Management division, was appointed Group CEO by the Board, effective August 1, 2022, succeeding Thomas Gottstein;
- The Board appointed the following new Executive Board members: Francesco De Ferrari as CEO Wealth Management, effective January 1, 2022, and regional CEO of Europe Middle East and Africa (EMEA), effective August 21, 2022 (after serving in this role on an ad interim basis since January 2022); Joanne Hannaford as Chief Technology & Operations Officer (CTOO) and David Wildermuth as Chief Risk Officer (CRO), both effective January 1, 2022; Christine Graeff as Global Head of People, effective February 1, 2022; Edwin Low as regional CEO of Asia Pacific (APAC), effective June 1, 2022; Markus Diethelm as General Counsel (GC), effective June 15, 2022; Francesca McDonagh as Chief Operating Officer (COO), effective September 19, 2022; Dixit Joshi as Chief Financial Officer (CFO), effective October 1, 2022; and Nita Patel as Chief Compliance Officer (CCO), effective November 1, 2022;
- Individuals who stepped down from the Executive Board during 2022 were Antoinette Poschung, former Global Head of Human Resources; Helman Sitohang, former regional CEO of APAC; Romeo Cerutti, former GC; Thomas Gottstein, former CEO; David Mathers, former CFO; Christian Meissner, former CEO Investment Bank and regional CEO of Americas; and Rafael Lopez Lorenzo, former CCO; and
- The appointment of former Board member Michael Klein to the Executive Board, subject to regulatory approval.

#### Organizational structure

- Changes to the Group's organizational structure were implemented in 2022 following the review of the Group's strategy by the Board during 2021: effective January 1, 2022, the Group was organized into four divisions – Wealth Management, Investment Bank, the Swiss Bank and Asset Management – and four geographic regions – Switzerland, EMEA, APAC and Americas;
- A new Strategic Regulatory Remediation program was launched in the second quarter of 2022, which is intended to strengthen our organization and deliver on regulatory programs. The program is overseen by the Strategic Regulatory

- Following the appointment of Ulrich Körner as the new Group CEO announced in July 2022, a new Group COO function was established and Francesca McDonagh was appointed to this role. The COO supports the CEO in the steering and strategic development of the Group and has responsibility for leading operational and cost transformation, as well as enterprise architecture development, including focusing on organizational design and bank-wide efficiencies;
- Further changes to the Group’s organizational structure were announced in October 2022 after the conclusion of a comprehensive strategic review conducted in the second half of 2022 and the resulting decision by the Board to radically restructure the Investment Bank. Key changes included the carve-out of CS First Boston as a capital markets and advisory business, and the creation of a Capital Release Unit (CRU). The CRU comprises the remaining part of the Group’s Securitized Products Group (SPG) business and a Non-Core Unit (NCU), which has the purpose of releasing capital through the wind-down of non-strategic, low return and higher-risk businesses. The CRU became effective on January 1, 2023; and
- A Group-wide review of our organizational set-up was initiated to reduce layers and duplication across divisions and functions, which is currently in progress and, once completed, is expected to support a more effective and less complex organizational design.

#### Shareholder meetings

- At the AGM on April 29, 2022, shareholders rejected two proposals put forward by shareholders: one for a special audit into the supply chain finance funds (SCFF) and “Suisse Secrets” matters and the other on a change in the Articles of Association (AoA) relating to the Group’s climate strategy and disclosures. In connection with the second matter, the Board proposed to submit the Group’s climate strategy as outlined in the Strategy chapter of the 2022 Task Force on Climate-related Financial Disclosures (TCFD) report, which forms part of the Group’s Sustainability Report, for acceptance by shareholders in a consultative vote at the 2023 AGM; and
- At an Extraordinary General Meeting (EGM) on November 23, 2022, shareholders approved two capital increases with aggregate gross proceeds amounting to CHF 4 billion.

#### Regulatory developments

We regularly monitor developments in corporate governance guidelines, regulations and best practice standards in all jurisdictions relevant to our business operations.

On June 19, 2020, the Swiss Parliament adopted a revision of the Swiss corporate law (Corporate Law Reform), which entered into force on January 1, 2023 (subject to certain transitional provisions). Key changes relate to the improvement of the protection of rights of small shareholders, modernization of the provisions governing shareholders’ meetings, for example, by allowing shareholders’ meetings to take place in a virtual or hybrid meeting format, increased flexibility regarding changes in share capital through the

introduction of a capital range and the strengthening of corporate governance through, for example, embedding the rules formerly covered in the Compensation Ordinance that apply to listed companies into the new Swiss corporate law. As a result of the Corporate Law Reform, Swiss corporations are obliged to amend their articles of association within two years to comply with the revised law. Therefore, the Board of the Group proposes to revise the AoA at the 2023 AGM in line with the revised law and prevailing market standards in Switzerland.

The Corporate Law Reform stipulates “comply or explain” disclosure obligations on gender diversity on the board of directors and executive board of listed companies of at least 30% and 20%, respectively, effective as of January 1, 2021, with ongoing transitional periods before the obligations begin to apply. Credit Suisse already meets the gender requirements for our Board and Executive Board as of December 31, 2022, by having 58% female Board members and 36% female Executive Board members, respectively.

Furthermore, on January 1, 2022, the Swiss Parliament’s counterproposal to the rejected Swiss Responsible Business Initiative entered into force by way of an amendment to the Swiss Code of Obligations and the enactment of a corresponding implementing ordinance. It is based on corresponding EU rules and requires companies of public interest to report annually on certain non-financial matters, including the impact the company’s activity has on environmental, social and governance (ESG) matters. The first report on non-financial matters is due for the 2023 financial year; the first shareholder vote on such report is expected to take place at the 2024 AGM.

#### Governance of crisis management

A crisis is an event that requires critical decisions which cannot be resolved with ordinary management techniques and decision-making authority. Credit Suisse has a Crisis Management Framework (CMF) and robust governance processes in place to enable the effective management of crises. The CMF is a bank-wide approach to crisis management addressing global, regional, location and function levels and provides a pre-defined and documented process to enable Credit Suisse to manage situations or events that have the propensity to become a crisis. It includes the definition of the global Crisis Assessment Team, the global Crisis Management Team (CMT), the crisis management process, roles and responsibilities. The Crisis Assessment Team has the responsibility of assessing the damage or impact or potential impact of an incident, crisis or disaster. It is assigned the task of recommending the invocation of the corresponding CMT. The CMT is the group responsible for overall decision making and coordination of Credit Suisse’s response to a crisis in a timely manner.

The Crisis Assessment Team assesses the impact of a specific crisis event to the firm on a global level and provides recommendations for final decisions to the CMT, whose members include all members of the Executive Board. In the case of a specific crisis event, firm-wide business continuity management response

measures are triggered where appropriate and overseen by the Executive Board. At the Board level, oversight of business continuity management is within the responsibility of the Risk Committee. In any given crisis event, the Board may delegate certain responsibilities to a sub-committee of its members that is authorized to take actions that exceed the mandate of the Executive Board, when decisions are needed in too short a time frame to convene the full Board. Adequate reporting of a crisis to regulators as necessary is part of the CMT process.

In February 2022, the Crisis Assessment Team was invoked due to Russia's invasion of Ukraine. Key priorities in this respect included taking measures to protect the safety and security of impacted employees, assessing and implementing different sanctions imposed by various governments, close monitoring of potential business interruptions and increased cyber threats. The Crisis Assessment Team stood down in September 2022 and business as usual procedures were resumed. In addition, an EMEA Russia Taskforce was established in March 2022 to coordinate divisional and functional Bank-wide activities.

During 2022, Credit Suisse convened an Energy Shortages Taskforce to proactively plan for potential energy supply shortages across continental Europe. Heightened preparations focused on ensuring resilience measures were in place to continue delivering critical services. Measures included reducing building energy consumption, securing backup fuel supplies and determining alternative business strategies should local Credit Suisse locations and work-from-home options be unavailable. No disruptions have been experienced to date and the Energy Shortages Taskforce continues to monitor the situation and to prepare for future occurrences.

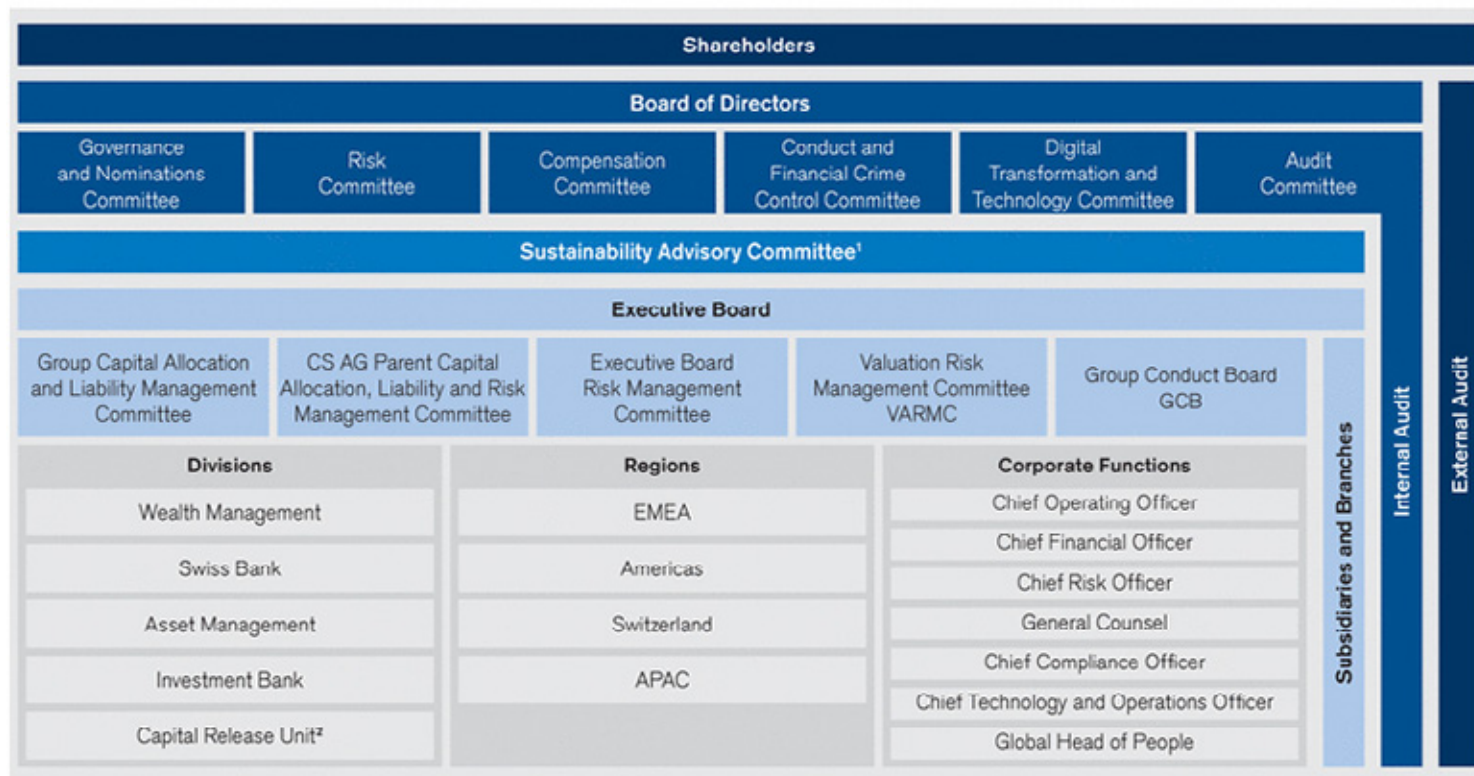

In early 2022, the Board retired the dedicated tactical crisis committee originally established in 2021 for oversight of the Archegos Capital Management (Archegos) and SCFF matters, which later also served for the oversight of a comprehensive Group-wide risk review initiated by the former Chairman and in line with the expectations of the Swiss Financial Market Supervisory Authority FINMA (FINMA). The tactical crisis committee was retired after determining how to implement continued oversight and by handing over the topics and initiatives that required ongoing monitoring to the relevant governance bodies at the Executive Board and/or Board level.

### Corporate Governance Framework

The Group's Corporate Governance Framework consists of its governing bodies and its corporate governance policies and procedures, which define the competencies of the governing bodies and other corporate governance rules, as well as the practices to be followed throughout the Group, in line with Swiss corporate law and international best practice standards for corporate governance. The governing bodies of the Group are:

- the General Meeting of Shareholders;
- the Board of Directors;
- the Executive Board; and
- the external auditors.

### Corporate Governance Framework as of January 1, 2023

<sup>1</sup> Interdisciplinary advisory body formed by the Board, which consists of members of the Board and senior management.

<sup>2</sup> The Capital Release Unit is managed by the CFO but shown as a separate reporting unit for external reporting purposes.

The shareholders elect the members of the Board and the external auditors on an annual basis and approve required resolutions at the AGM, such as the consolidated financial statements, capital increases and Board and Executive Board compensation. The Board is responsible for the overall strategic direction, supervision and control of the Group and appoints the members of the Executive Board. The Executive Board is responsible for the day-to-day operational management of the Group's business and for developing and implementing business plans.

The Group is engaged in the banking business. Effective January 1, 2023, reflecting the strategic announcement on October 27, 2022, the Group is organized into five divisions – Wealth Management, Swiss Bank, Asset Management, Investment Bank and the new CRU.

The global divisions are complemented by the regions to drive cross-divisional collaboration and strengthen legal entity management oversight and regulatory relationships at a regionally aligned level. The Group's banking business is carried out through its legal entities, which are operational in various jurisdictions and subject to the governance rules and supervision of the regulators in those jurisdictions. The Group has identified certain major subsidiary companies, which, in aggregate, account for a significant proportion of the Group's business operations.

These major subsidiaries, which are all subsidiaries of Credit Suisse AG, are: Credit Suisse (Schweiz) AG, Credit Suisse Holdings (USA) Inc. and Credit Suisse International. Corporate governance at these major subsidiaries is closely aligned with the Group's corporate

governance, for example, through the appointment of at least one Board member to the boards of each of these major subsidiaries. In accordance with Swiss banking law, the major subsidiaries are subject to consolidated supervision at the level of the Group and the Bank.

The strategy review, announced in October 2022, has resulted in changes to the Investment Bank business, which is conducted out of several subsidiaries, including Credit Suisse Holdings (USA) Inc. and Credit Suisse International. Consistent with our objective to streamline and optimize our legal entity structure in the context of the Group's strategy, Credit Suisse is conducting a review of the legal entity strategy across regions. The legal entity strategy review will assess the impact on existing legal entities across regions to ensure the legal entity footprint will be adjusted to accommodate changes in the size and scope of the investment banking business. Efforts to optimize the legal entity structure across regions, including the closure of redundant entities, will continue to be a priority. The Group anticipates continued simplification of the global legal entity structure, in line with the new business strategy, which is expected to drive financial efficiency for the Group. Additionally, to facilitate the future separation of the businesses transferring to CS First Boston, an assessment of the requirements is underway to set up the optimal legal entity structure (subject to regulatory approval) across key markets. Any changes to the legal entity structure will continue to align to Group standards of governance and comply with local regulatory requirements.

- Refer to "Strategy" in I – Information on the company for further information.

The Group's corporate governance framework is depicted in the chart above. The duties and responsibilities of the governing bodies are described in further detail in the sections below.

---

## Corporate governance policies

The Group's corporate governance policies and procedures, adopted by the Board, are defined in a series of documents, including the following, which are available on our website at [credit-suisse.com/governance](https://www.credit-suisse.com/governance):

Document	Description	Website
<b>Articles of Association (AoA)</b>	<ul style="list-style-type: none"> <li>• Defines the purpose of the business, the capital structure and the basic organizational framework.</li> <li>• The AoA of Credit Suisse Group AG (Group) are dated December 7, 2022, and the AoA of Credit Suisse AG (Bank) are dated September 4, 2014.</li> </ul>	<a href="https://www.credit-suisse.com/articles">credit-suisse.com/articles</a>
<b>Code of Conduct</b>	<ul style="list-style-type: none"> <li>• Defines the Group's purpose, cultural values and behaviors that members of the Board and all employees are required to follow, including adherence to all relevant laws, regulations and policies, in order to maintain and strengthen our reputation for integrity, fair dealing and measured risk taking.</li> <li>• The Credit Suisse Code of Conduct is available in four languages.</li> </ul>	<a href="https://www.credit-suisse.com/code">credit-suisse.com/code</a>
<b>Organizational Guidelines and Regulations (OGR)</b>	<ul style="list-style-type: none"> <li>• Defines the organizational structure of the Group and the responsibilities and sphere of authority of the Board, its committees and the various senior management bodies within the Group, as well as the relevant reporting procedures.</li> </ul>	<a href="https://www.credit-suisse.com/ogr">credit-suisse.com/ogr</a>
<b>Board charter</b>	<ul style="list-style-type: none"> <li>• Outlines the organization and responsibilities of the Board.</li> </ul>	<a href="https://www.credit-suisse.com/boardcharter">credit-suisse.com/boardcharter</a>
<b>Board committee charters</b>	<ul style="list-style-type: none"> <li>• Defines the organization and responsibilities of the committees.</li> </ul>	<a href="https://www.credit-suisse.com/committeecharter">credit-suisse.com/committeecharter</a>

- Compensation policy**
- Provides a foundation for the development of sound compensation plans and practices.
  - The Compensation policy is updated on an annual basis.

*[credit-suisse.com/compensation policy](https://www.credit-suisse.com/compensation-policy)*

The Board intends to propose amendments to the Group’s AoA for approval by shareholders at the 2023 AGM to adapt to the provisions of the Corporate Law Reform. The amendments include a change to the Group’s purpose to reflect the Group’s ambition to create long-term, sustainable value, an alignment of provisions related to share capital, shareholders’ voting rights, shareholders’ right to raise AGM agenda items or motions, the introduction of a capital range, which allows the Board to increase or decrease the share capital within pre-defined upper and lower limits and replaces the provision related to authorized capital, additional flexibility to hold shareholders’ general meetings in either a hybrid or virtual format, and the adoption of the compensation rules formerly covered in the Compensation Ordinance. The proposed amendments are published on our website along with the 2023 AGM agenda: [credit-suisse.com/ags](https://credit-suisse.com/ags).

The summaries herein of the material provisions of our AoA and the Swiss Code of Obligations do not purport to be complete and are qualified in their entirety by reference to the AoA and the Swiss Code of Obligations.

Credit Suisse Group AG and Credit Suisse AG are registered companies in Switzerland. The Group’s shares are listed on the SIX Swiss Exchange and – in the form of American Depositary Shares (ADS), as evidenced by American Depositary Receipts – on the New York Stock Exchange (NYSE). The business purpose of the Group, as set forth in Article 2 of its AoA, is to hold direct or indirect interests in all types of businesses in Switzerland and abroad, in particular in the areas of banking, finance, asset management and insurance. The business purpose of the Bank, as set forth in Article 2 of its AoA, is to operate as a bank, with all

related banking, finance, consultancy, service and trading activities in Switzerland and abroad. The AoA of the Group and the Bank set forth their powers to establish new businesses, acquire a majority or minority interest in existing businesses and provide related financing as well as acquire, mortgage and sell real estate properties both in Switzerland and abroad.

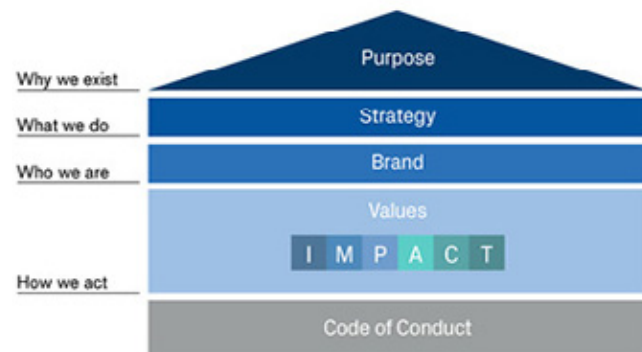

- Refer to “II – Operating and financial review” for a detailed review of our operating results.
- Refer to “Note 41 – Significant subsidiaries and equity method investments” in VI – Consolidated financial statements – Credit Suisse Group for a list of significant subsidiaries and associated entities.

#### Purpose and values

At Credit Suisse, we believe that we have an important role to play in society and in supporting our communities. As a bank, we provide capital, manage and protect wealth, participate in markets and facilitate infrastructure development. This allows us to contribute to sustainable economic growth. Our purpose is at the core of everything we do. It captures for us, for our clients and for other stakeholders “why” Credit Suisse exists as an organization. Our purpose statement is an integral part of the Group’s Code of Conduct. The document “The Credit Suisse Code of Conduct: Our Purpose and Values” reflects our purpose statement and emphasizes our six cultural values of inclusion, meritocracy, partnership, accountability, client focus and trust (IMPACT) and the underlying behaviors that we expect all of our employees and members of the Board to observe. In early 2023, the Code of Conduct was reviewed as part of an annual review. The revised Code of Conduct reinforces our commitment to complying with all applicable laws, regulations and policies in order to safeguard our reputation for integrity, fair dealing and measured risk taking and includes clear guidelines for the escalation of concerns by employees, including concerns regarding the CEO, members of the Executive Board and senior financial officers. The purpose and values framework is shown in the illustration below.

- Refer to [credit-suisse.com/code](https://credit-suisse.com/code) for our Code of Conduct.

#### Credit Suisse Purpose and Values

## Sustainability and Environmental, Social and Governance

Sustainability is an integral part of our value proposition for our clients, shareholders, employees and other stakeholders. Credit Suisse regularly engages with these stakeholders, including shareholders, to align our sustainability strategy, short- to mid-term goals and implementation status with stakeholder expectations. We strive to comply with the cultural values set out in our Code of Conduct in every aspect of our work, including in our relationships with diverse stakeholders. We do so based on a broad understanding of our duties as a financial services provider and employer and as an integral part of the economy, society and the environment. As a global financial institution, we can support our clients in encouraging sustainable production and consumption practices, enabling diversity, equity and inclusion, channeling capital flows toward sustainable finance and encouraging the continued shift toward sustainable and impact investment.

The Group's Sustainability Report continues to reflect the Global Reporting Initiative (GRI) Standards for sustainability reporting and the Sustainability Accounting Standards Board (SASB) Standards while also providing information on the progress we have made in implementing the Principles for Responsible Banking and the Ten Principles of the UN Global Compact, including the measures we have put in place to contribute to the realization of the UN Sustainable Development Goals. As in previous years, we plan to submit our Sustainability Report 2022 to the SIX Swiss Exchange in accordance with the opting-in regulation for companies issuing sustainability reports.

---

### Environmental, Social and Governance activities

During 2022, the Group undertook a wide range of activities that reflect its commitment to the sustainability approach described above and made a number of important achievements toward further embedding ESG considerations in many aspects of our business endeavors. Examples of our key achievements, our adopted disclosure standards and certain ESG ratings considerations are summarized below.

<u>Description</u>	<u>Activity</u>
<b>Select achievements</b>	<ul style="list-style-type: none"><li>introduced a Climate Action Plan, which sets out a pathway toward net zero for in-scope investments in Asset Management and Wealth Management (discretionary mandates managed within Investment Solutions and Sustainability)</li><li>Credit Suisse Asset Management joined the Net Zero Asset Managers initiative, broadening our net zero commitment</li><li>set goals for six sectors, based on our commitment to develop interim 2030 science-based goals for key sectors. In addition, expanded our sector policies to cover additional climate- and nature-sensitive activities</li><li>further progressed toward our representation targets for women globally and Black talent in the US and UK</li><li>held our second Sustainability Week and launched the Center for Sustainability as a pillar of the Credit Suisse Research institute to provide clients and stakeholders with thought leadership and research on emerging sustainability topics</li><li>developed a new Risk Culture Framework to enhance risk management at Credit Suisse</li><li>established more clearly defined ESG metrics into Executive Board compensation</li><li>Continued volunteering efforts by Credit Suisse employees around the world to help charitable causes, drawing on their skills and expertise for the benefit of local communities</li></ul>
<b>Disclosure standards</b>	<ul style="list-style-type: none"><li>continues to disclose information that is pursuant to the World Economic Forum International Business Council Stakeholder Capitalism Metrics alongside reporting according to the SASB Standards (now consolidated into the International Sustainability Standards Board) and reference to the GRI Standards for sustainability reporting</li><li>continues to support the recommendations of the TCFD, where our disclosure is intended to provide transparency on the progress that we have made in addressing significant risks and opportunities arising from climate change</li></ul>
<b>ESG ratings</b>	<ul style="list-style-type: none"><li>assessed by a number of ESG ratings providers such as S&amp;P Global (Corporate Sustainability Assessment), Sustainalytics, MSCI and CDP, and we continue to be included in the FTSE4Good Index Series</li></ul>

The Group's Sustainability Report is available on our website at [credit-suisse.com/sustainabilityreport](https://credit-suisse.com/sustainabilityreport). An overview of Credit Suisse's most recent ESG ratings and its inclusion in sustainability indices is available at: [credit-suisse.com/sustainability-ratings-indices](https://credit-suisse.com/sustainability-ratings-indices).

## Sustainability Governance

Governance of sustainability is exercised through the established governance bodies of the Group, thus integrating sustainability into existing businesses processes and structures, as well as through boards and committees specifically focused on

sustainability topics as described in further detail below. The following chart illustrates the main corporate bodies at Board, Executive Board, and senior management levels that are involved in maintaining robust sustainability governance at Credit Suisse, as reflected in the Sustainability Governance Framework.

### Sustainability Governance Framework

Board of Directors	<b>Board of Directors</b> Approves and monitors the sustainability strategy				
	<b>Sustainability Advisory Committee</b> Assists the Board, in an advisory capacity, in fulfilling its oversight duties with respect to the Group's sustainability strategy, target and program effectiveness	<b>Risk Committee</b> Oversees and reviews the Group's risk management function in the context of sustainability	<b>Conduct and Financial Crime Control Committee</b> Oversees the Group's exposure to financial crime risk in the context of sustainability	<b>Audit Committee</b> Oversees and reviews Group ESG disclosures	<b>Compensation Committee</b> Determines compensation incentives in the context of ESG-related factors
	<b>Executive Board</b> Responsible for the day-to-day operational management and reviews and coordinates significant initiatives, projects and business developments in the field of sustainability				
	<b>Executive Board Risk Management Committee</b> Oversight function with respect to market, credit, reputational and sustainability risk-related matters		<b>Group Conduct Board</b> Oversees how conduct matters are handled and ensures consistency and the alignment of practices across the Group		
	<b>Purpose, Values and Culture Council<sup>1</sup></b> Oversees implementation and embedding of culture across Group		<b>ESG Disclosure &amp; Reporting Steering Committee<sup>2</sup></b> Provides oversight and approval for Group ESG disclosures		
Management	<b>Divisional Risk Management Committees</b>	<b>Divisional Conduct Boards</b>	<b>Sustainability Leadership Committee</b> Responsible for strategy development, progress oversight and identification of growth opportunities		
	<b>Global Client Risk Committee</b>		<b>Functional Conduct Board</b>	<b>Sustainability Operational Committee</b> Oversees initiatives, projects and other strategy execution and framework methodology changes	
	<b>Divisional Client Risk Committees</b>	<b>Regional Conduct Board(s)</b>		<b>Sustainability Framework Committees</b> Reviews and signs off of transactions based on the existing frameworks	
	<b>Climate Risk Strategy Steering Committee</b>			<b>Sustainability (Climate) Risk Executive Leadership Committee</b>	

<sup>1</sup> In 2023, the Purpose, Values and Culture Council will be replaced with the Group Culture and Values Board.

<sup>2</sup> Co-chaired by the CFO and Chief Sustainability Officer.

## Employee relations

As of December 31, 2022, we had 50,480 employees worldwide, of which 16,700 were in Switzerland and 33,780 were abroad. Our corporate titles include managing director, director, vice president, assistant vice president and non-officer staff. The majority of our

employees do not belong to unions. We have not experienced any significant strikes, work stoppages or labor disputes in recent years. We consider our relations with our employees to be good.

- Refer to “Credit Suisse” in II – Operating and financial review for further information on our responsibility as an employer.

## Shareholders

### Capital structure

Our total issued share capital as of December 31, 2022 was CHF 160,086,322 divided into 4,002,158,062 shares, with a nominal value of CHF 0.04 per share. On November 23, 2022, the Group held an EGM, at which shareholders approved two capital increases. The Group completed the first capital increase on November 25, 2022 by way of a share placement of 462,041,884 newly issued shares to qualified investors and a second capital increase by way of a rights offering on December 9, 2022. The two capital increases resulted in 1,351,410,342 newly issued shares. Under the 2021 Share Repurchase Program, Credit Suisse repurchased 25,087,000 of its shares on a second trading line on the SIX Swiss Exchange. These shares were not cancelled by means of a capital reduction and instead used to service employee participation plans.

- Refer to “Share purchases” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management for further information.

- Refer to “Note 17 – Share capital, conditional, conversion and authorized capital” in VII – Parent company financial statements – Credit Suisse Group and our AoA (Articles 26, 26c and 27) for information on changes to our capital structure during the year. Refer to [credit-suisse.com/annualreporting](https://www.credit-suisse.com/annualreporting) for prior year annual reports.

### Shareholder information

#### Shareholder base

We have a broad shareholder base, with the majority of shares owned directly or indirectly by institutional investors outside Switzerland. As of December 31, 2022, 127,369 shareholders were registered in our share register with 2,112,719,852 shares, representing 53% of the total shares issued. The remaining 47% of shares are not registered in our share register. As of December 31, 2022, 212,513,843 or 5.31% of the issued shares were in the form of ADS. The information provided in the following tables reflects the distribution of Group shares as registered in our share register as of December 31, 2022.

■ Private investors  
■ Other investors

**Institutional investors  
by region**  
End of 2022 (in %)

■ North America ■ Switzerland  
■ UK & Ireland ■ Europe  
■ Other

### Shareholder engagement

The Group engages regularly with its shareholders and proxy advisors. The purpose of such engagements is to understand the perspectives of its shareholders, exchange views about the Group's strategy, financial performance, corporate governance and compensation and other matters of importance to the

Group or its shareholders. Shareholder engagement meetings may be attended by the Chairman, the Compensation Committee Chair, the Sustainability Advisory Committee Chair, the CEO, CFO and other members of the Board or senior management. The responsibility for shareholder engagement is overseen by our Investor Relations department. The Group aims to ensure that all shareholders receive the relevant information they need to keep abreast of current Group developments and make informed decisions.

### Information policy

We are committed to an open and fair information policy with our shareholders and other stakeholders. Our Investor Relations and Corporate Communications departments are responsible for addressing inquiries received. All Group shareholders registered in our share register receive an invitation to our AGM, including instructions on how to receive the annual report and other reports. Each registered shareholder may elect to receive the quarterly reports on our financial performance. All of these reports and other information can be accessed on our website at [credit-suisse.com/investors](https://credit-suisse.com/investors).

### Notices required under Swiss law

Notices to shareholders required under Swiss law are made by publication in the Swiss Official Gazette of Commerce. The Board may designate further means of communication for publishing notices to shareholders. Notices required under the listing rules of the SIX Swiss Exchange will either be published in two Swiss newspapers in German and French and sent to the SIX Swiss Exchange or otherwise communicated to the SIX Swiss Exchange in accordance with applicable listing rules. The SIX Swiss Exchange may further disseminate the relevant information.

## Significant shareholders

Under the Swiss Federal Act on Financial Market Infrastructure and Market Conduct in Securities and Derivative Trading (Fin-FMIA), anyone holding shares in a company listed on the SIX Swiss Exchange is required to notify the company and the SIX Swiss Exchange if their holding reaches, falls below or exceeds the following thresholds: 3%, 5%, 10%, 15%, 20%, 25%, 33 $\frac{1}{3}$ %, 50% or 66 $\frac{2}{3}$ % of the voting rights entered into the commercial register, whether or not the voting rights can be exercised (that is, notifications must also include certain derivative holdings such as options or similar instruments). Following receipt of such notification, the company has an obligation to inform the public. In addition, pursuant to the Swiss Code of Obligations, a company must disclose in the notes to its annual consolidated financial statements the identity of any shareholders who own in excess of 5% of its shares. The following provides an overview of the holdings of our significant shareholders, including any rights to purchase or dispose of shares, based on the most recent disclosure notifications. In line with the FinFMIA requirements, the percentages indicated below were calculated in relation to the share capital reflected in the AoA at the time of the disclosure notification. As shareholders are only required to notify the company and the SIX Swiss Exchange if their holding reaches, falls below or exceeds the thresholds listed above, the percentage holdings of our significant shareholders may vary at any given time compared

to the date of submission of the most recent notification for these respective shareholders. The full text of all notifications can be found on our website at [credit-suisse.com/shareholders](http://credit-suisse.com/shareholders). Each share entitles the holder to one vote, except as described below.

- Refer to “Note 3 – Business developments, significant shareholders and sub-sequent events” in VI – Consolidated financial statements – Credit Suisse Group for further information on significant shareholders.

The Group also holds positions in its own shares, including shares acquired through the Share Repurchase Program described above, which are subject to the same disclosure requirements as significant external shareholders. These positions fluctuate and, in addition to the activities from the Share Repurchase Program, primarily reflect activities related to market making, facilitating client orders and satisfying the obligations under our employee compensation plans. Shares held by the Group have no voting rights. As of December 31, 2022, our holdings amounted to 1.96% purchase positions (1.50% registered shares and 0.46% share acquisition rights) and 0.63% sales positions (disposal rights).

- Refer to “Share purchases” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management for further information.

## Cross shareholdings

The Group has no cross shareholdings in excess of 5% of capital or voting rights with any other company.

BlackRock Inc.	March 16, 2021	100.5	4.11	0.93
Harris Associates L.P.	November 9, 2013	81.5	5.17	—
Silchester International Investors LLP	December 7, 2018	77.4	3.03	—

- 1 The approximate shareholding percentages were calculated in relation to the share capital at the time of the relevant disclosure notification. They therefore do not reflect changes in such percentages that would result from changes in the number of outstanding shares, following the date of the disclosure notification.
- 2 Total purchase positions disclosed were 9.88%.
- 3 Total purchase positions disclosed were 4.93% (4.07% in shares and 0.86% voting rights that can be exercised at one's own discretion).
- 4 The 0.07% purchase rights relate to put options and perpetual tier 1 contingent convertible capital notes.

## Shareholder rights

We are fully committed to the principle of equal treatment of all shareholders. The following information summarizes certain shareholder rights at the Group.

### Voting rights and transfer of shares

There is no limitation under Swiss law or the AoA on the right to own Group shares.

In principle, each share represents one vote at the AGM. Shares held by the Group have no voting rights. Shares for which a single shareholder or shareholder group can exercise voting rights may not exceed 2% of the total outstanding share capital, unless one of the exemptions discussed below applies. The restrictions on voting rights do not apply to:

- the exercise of voting rights by the independent proxy as elected by the AGM;
- shares in respect of which the shareholder confirms to us that the shareholder has acquired the shares in the shareholder's name for the shareholder's own account and in respect of which the disclosure requirements in accordance with the FinFMIA and the relevant ordinances and regulations have been fulfilled; or
- shares that are registered in the name of a nominee, provided that this nominee is willing to furnish us, on request, the name, address and shareholdings of any beneficial owner or group of related beneficial owners on behalf of whom the nominee holds 0.5% or more of the total outstanding share capital of the Group.

To execute voting rights, shares need to be registered in the share register directly or in the name of a nominee. In order to be registered in the share register, the purchaser must file a share registration form with the depository bank. The registration of shares in the share register may be requested at any time. Failing such registration, the purchaser may not vote or participate in shareholders' meetings. However, each shareholder, whether registered in the share register or not, is entitled to receive dividends or other distributions approved at the AGM. Transfer restrictions apply regardless of the way and the form in which the registered shares are kept in the accounts and regardless of the provisions applicable to transfers. The transfer of intermediated securities based on Group shares, and the pledging of these intermediated securities as collateral, is based on the provisions of the Swiss Federal Intermediated Securities Act. The transfer or pledging of shares as collateral by means of written assignment is not permitted.

- Refer to [credit-suisse.com/articles](https://www.credit-suisse.com/articles) for information in our AoA (Art. 10 and 14a) on share register and transfer of shares, voting rights and the independent proxy.

### Annual General Meeting

Under Swiss law, the AGM must be held within six months of the end of the fiscal year. Notice of an AGM, including agenda items and proposals submitted by the Board and by shareholders, must be published in the Swiss Official Gazette of Commerce at least 20 days prior to the AGM.

Shares only qualify for voting at an AGM if they are registered in the share register with voting rights in accordance with the registration deadline as set out in the invitation to the AGM.

Pursuant to the articles of association the Board of Directors will specify the applicable regulations for the provision of power of attorney and instructions to the independent proxy (i.e., as part of the invitation to the general meeting).

### Convocation of shareholder meetings

The AGM is convened by the Board or, if necessary, by the statutory auditors, with 20 days' prior notice. The Board is further required to convene an EGM if so resolved at a shareholders' meeting or if so requested by shareholders holding in aggregate at least 10% of the nominal share capital. The request to call an EGM must be submitted in writing to the Board, and, at the same time, Group shares representing at least 10% of the nominal share capital must be deposited for safekeeping. The shares remain in safekeeping until the day after the EGM.

### Request to place an item on the agenda

Shareholders holding shares with an aggregate nominal value of at least CHF 40,000 have the right to request that a specific item be placed on the agenda and voted upon at the AGM. The request to include a particular item on the agenda, together with a relevant proposal, must be submitted in writing to the Board no later than 45 days before the meeting and, at the same time, Group shares with an aggregate nominal value of at least CHF 40,000 must be deposited for safekeeping. The shares remain in safekeeping until the day after the AGM.

In the context of the Corporate Law Reform upon shareholder approval of and the proposed changes to our AoA, the related AGM authorities will change so that one or more shareholders whose combined holdings represent at least 5% of the share capital or votes can request that a shareholders' meeting be called. The request to include a particular item on the agenda of the shareholders' meeting, or the request to include a proposal relating to an agenda item must be submitted in writing together with the relevant proposals. At the same time, shares of the Group representing at least 0.025% of the share capital or votes (which corresponds to a nominal value of approximately CHF 40,000) are to be deposited for safekeeping.

### Virtual meetings during the COVID-19 pandemic

Due to the COVID-19 pandemic, and pursuant to the Swiss Federal Council's related COVID-19 ordinance, the 2022 AGM and EGM were held without the personal attendance of shareholders. Shareholders were represented at the 2022 AGM and EGM exclusively by the independent proxy. Since the COVID-19 ordinance is no longer applicable and the Corporate Law Reform provides for more flexibility in connection with shareholders' meetings, the Board proposes changes to our AoA, which would allow the possibility to hold hybrid and virtual meetings in the event of exceptional circumstances, in addition to physical meetings.

## Shareholders' resolutions that require a vote

A majority of the votes represented	At least two-thirds of the votes represented	At least half of the total share capital and approval by a least three-quarters of the votes represented
<ul style="list-style-type: none"> <li>amendments to the AoA, unless a super-majority is required;</li> <li>election of members of the Board, the Chairman, the members of the Compensation Committee, the independent proxy and statutory auditors;</li> <li>approval of the compensation of the members of the Board and the Executive Board;</li> <li>approval of the annual report and the statutory and consolidated accounts;</li> <li>discharge of the acts of the members of the Board and Executive Board; and</li> <li>determination of the appropriation of retained earnings.</li> </ul>	<ul style="list-style-type: none"> <li>change of the purpose of the company;</li> <li>creation of shares with increased voting powers;</li> <li>implementation of transfer restrictions on shares;</li> <li>increase in conditional and authorized capital;</li> <li>increase in capital by way of conversion of capital surplus or by contribution in kind;</li> <li>restriction or suspension of pre-emptive sub-scription rights;</li> <li>change of location of the principal office; and</li> <li>dissolution of the company without liquidation.</li> </ul>	<ul style="list-style-type: none"> <li>conversion of registered shares into bearer shares;</li> <li>amendments to the AoA relating to registration and voting rights of nominee holders; and</li> <li>dissolution of the company.</li> </ul>

### Quorum requirements

The AGM may, in principle, pass resolutions without regard to the number of shareholders present at the meeting or represented by proxy, except as discussed below. Resolutions and elections generally require the approval of a majority of the votes represented at the meeting, except as otherwise provided by mandatory provisions of law or by the AoA.

A quorum of at least half of the total share capital and the approval of at least seven-eighths of the votes cast is required for amendments to provisions of the AoA relating to voting rights.

### Say-on-Pay

In accordance with the Swiss Code of Best Practice for Corporate Governance, the Group will submit the compensation report (contained in the Compensation section of the 2022 Annual Report) for a consultative, non-binding vote by shareholders at the 2023 AGM. In accordance with Swiss law, the Group will submit the following Board and Executive Board compensation recommendations for binding votes by shareholders at the 2023 AGM:

- For the Board: a maximum amount of compensation for the Board for the period from the 2023 AGM to the 2024 AGM;
- For the Executive Board: a maximum amount of fixed compensation for the Executive Board for the period from the 2023 AGM to the 2024 AGM; and
- For the Executive Board: an aggregate amount of compensation comprising the Transformation Award to be granted in 2023, subject to performance conditions over the three-year period from the beginning of 2023 to the end of 2025.
- Refer to “Say-on-pay vote” in V – Compensation – Compensation framework, policy, and governance for further information on the say-on-pay vote.

### Discharge of the acts of the Board and the Executive Board

According to Swiss law, the AGM has the power to discharge the actions of the members of the Board and the Executive Board. The 2022 AGM granted discharge to the Board and Executive Board for the 2021 financial year, excluding discharge in relation to the SCFF matter. The Board had also proposed to the 2022 AGM to grant discharge for the 2020 financial year, excluding discharge in relation to the SCFF matter, as the discharge proposal was withdrawn from the 2021 AGM agenda. Shareholders did not support the Board’s proposal in this case, however, and voted against the granting of discharge to the members of the Board and the Executive Board for the 2020 financial year.

### Pre-emptive subscription rights and preferential subscription rights

Under Swiss law, any share issue, whether for cash or non-cash consideration or no consideration, is subject to the prior approval of the shareholders. Shareholders of a Swiss corporation have certain pre-emptive subscription rights to subscribe for new issues of shares and certain preferential rights to subscribe for option bonds, convertible bonds or similar debt instruments with option or convertible rights in proportion to the nominal amount of shares held. A resolution adopted at a shareholders’ meeting with a supermajority may, however, limit or suspend pre-emptive subscription rights in certain limited circumstances.

### **Duty to make an offer**

Swiss law provides that anyone who, directly or indirectly or acting in concert with third parties, acquires 33⅓% or more of the voting rights of a listed Swiss company, whether or not such rights are exercisable, must make an offer to acquire all of the listed equity securities of such company, unless the AoA of the company provides otherwise. Our AoA does not include a contrary provision. This mandatory offer obligation may be waived under certain circumstances by the Swiss Takeover Board or FINMA. If no waiver is granted, the mandatory offer must be made pursuant to procedural rules set forth in the FinFMIA and implementing ordinances.

### **Clauses on changes in control**

To the best of our knowledge, there are no agreements in place that could lead to a change in control of the Group. Subject to certain provisions in the Group's employee compensation plans, which allow for the Compensation Committee or Board to determine the treatment of outstanding awards for all employees, including the Executive Board members, in the case of a change in control, there are no provisions that require the payment of extraordinary benefits in the agreements and plans benefiting members of the Board and the Executive Board or any other members of senior management. Specifically, there are no contractually agreed severance payments in the case of a change in control of the Group.

- Refer to "Contract lengths, termination and change in control provisions" in V – Compensation – Supplementary information for further information on the clauses on changes in control.

### **Trading restrictions and blackout periods**

Group employees with access to material, non-public information relating to the Group and its businesses, such as members of the Executive Board, are subject to a number of trading restrictions, including, but not limited to, pre-clearance requirements and regular blackout periods and permitted trading windows. These trading restrictions are also applicable to members of the Board. Group employees that, by nature of their activities, have potentially greater and regular access to material, non-public information relating to the Group (Access Persons), such as members of the Executive Board, are generally prohibited from trading in Group securities for fourteen full calendar days prior to the end of each quarter. Other Group employees are generally prohibited from trading in Group securities for five full business days prior to public announcement of the earnings for the preceding quarter. The permitted trading window reopens one day after the public announcement of the Group's earnings for the preceding quarter. Even during permitted trading windows, Group employees who are in possession of material, non-public information relating to the Group are prohibited from trading in (or suggesting to others that they trade in) any Group securities.

### **Borrowing and raising funds**

Neither Swiss law nor our AoA restrict our power to borrow and raise funds in any way. The decision to borrow funds is passed by or under the direction of our Board, with no shareholders' resolution required.

### **Liquidation**

Under Swiss law and our AoA, the Group may be dissolved at any time by a shareholders' resolution, which must be passed by:

- a supermajority of at least three-quarters of the votes cast at the meeting in the event the Group were to be dissolved by way of liquidation; and
- a supermajority of at least two-thirds of the votes represented and an absolute majority of the par value of the shares represented at the meeting in other cases.

Dissolution by order of FINMA is possible if we become bankrupt. Under Swiss law, any surplus arising out of liquidation (after the settlement of all claims of all creditors) is distributed to shareholders in proportion to the paid-up par value of shares held.

## Board of Directors

### General information

#### Membership and qualifications

The AoA (Chapter IV, Section 2, The Board of Directors, Art. 15.1 of the Group's AoA and Chapter III, Section 6. Board of Directors, Art. 6.1 of the Bank's AoA) provide that the Board shall consist of a minimum of seven members. The Board currently consists of 12 members. We believe that the size of the Board must be such that the committees can be staffed with qualified members. At the same time, the Board must be small enough to ensure an effective and rapid decision-making process. Board members are elected at the AGM by our shareholders individually for a period of one year and are eligible for re-election. In exceptional cases, Board members are elected at an EGM for a period from their election until the next AGM. Shareholders will also elect a member of the Board as the Chairman and each of the members of the Compensation Committee for a period of one year. One year of office is understood to be the period of time from one AGM to the close of the next AGM. Members of the Board shall generally retire after having served on the Board for 12 years. Under certain circumstances, the Board may extend the limit of terms of office for a particular Board member for a maximum of three additional years.

An overview of the Board and the committee membership is shown in the following table. The composition of the Boards of the Group and the Bank is identical.

#### Board composition and succession planning

The Governance and Nominations Committee regularly considers the composition of the Board as a whole and in light of staffing requirements for the committees. The Governance and Nominations Committee recruits and evaluates candidates for Board membership based on criteria as set forth by the OGR (Chapter II Board of Directors, Item 8.2.3). The Governance and Nominations Committee may also retain outside consultants with respect to the identification and recruitment of potential new Board members. In assessing candidates, the Governance and Nominations Committee considers the requisite skills and characteristics of potential Board members as well as the composition of the Board as a whole. Among other considerations, the Governance and Nominations Committee takes into account areas of expertise, management experience, independence and diversity in the context of the needs of the Board to fulfill its responsibilities. The Governance and Nominations Committee also considers other activities and commitments of an individual in order to be satisfied that a proposed member of the Board can devote enough time to a Board position at the Group.

- Refer to "Mandates" for further information.

<sup>1</sup> Chairman as of January 16, 2022.

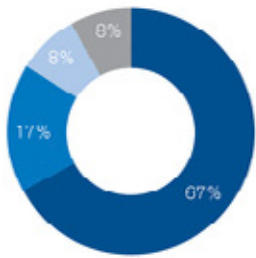

<sup>2</sup> Member of the Investment Banking Strategy Committee (an ad-hoc Board committee) that was chaired by the former Board member Michael Klein.

<sup>3</sup> Vice-Chair and Lead Independent Director.

<sup>4</sup> Subsidiary board memberships: Christian Gellerstad, Credit Suisse Schweiz AG; Blythe Masters, Credit Suisse Holdings (USA), Chair; Richard Meddings, Credit Suisse International and Credit Suisse Securities (Europe) Ltd., Vice Chair; Amanda Norton, Credit Suisse Holdings (USA), Risk Committee Chair; and Ana Paula Pessoa, Brazil Advisory Board, Chair and Credit Suisse Bank (Europe), Chair.

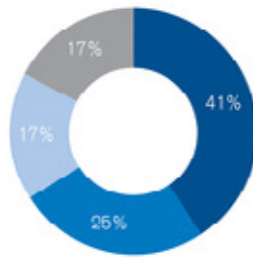

## Board composition as of the end of 2022

### Industry experience

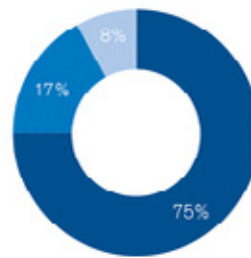

- Financial services
- Government & academia
- Insurance
- Advertising, marketing & media

### Geographical focus<sup>1</sup>

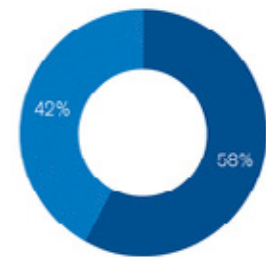

- Americas
- Switzerland
- EMEA
- Asia Pacific

### Length of tenure

- 4 years or less
- Between 5 and 8 years
- Between 9 and 12 years

### Gender diversity

- Female
- Male

<sup>1</sup> Represents the region in which the Board member has mostly focused his or her professional activities and may differ from the individual's nationality

The background, skills and experience of our Board members are diverse and broad and include holding or having held top management positions at financial services and other companies in Switzerland and abroad, as well as leading positions in government, academia and international organizations. The Board is composed of individuals with wide-ranging professional expertise in key areas including the management of client-facing businesses; investment management; finance and/or audit; risk, legal and/or compliance; people, culture and/or compensation; digitalization and/or technology; ESG; and governance, regulatory and/or academia. Diversity of culture, experience and opinion are important aspects of Board composition, as well as gender diversity. While the ratio of female-to-male Board members may vary in any given year, the Board is committed to complying with the gender diversity guidelines as stipulated in the new Swiss corporate law. As shown in the chart above, the Board currently consists of seven female and five male directors. The collective experience and expertise of our Board members as of the end of 2022 across those key areas considered particularly relevant for the Group is illustrated in the following chart.

In areas where the Board's collective experience and expertise may require strengthening, the Board may decide to nominate a new Board member candidate with specialist expertise, engage outside experts or take other measures.

## Board member experience and expertise

(Number of Board members as of the end of 2022; total of 12)

### Leadership experience

Executive-level role in financial industry (>10 years)

Non-executive board member for listed company

### Areas of expertise<sup>1</sup>

Client-Facing Business

Investment Management

Finance and/or Audit

Risk, Legal and/or Compliance

People, Culture and/or Compensation

Digitalization and/or Technology

ESG

Government, Regulatory and/or Academia

<sup>1</sup> Refer to "Biographies of the Board" for individual areas of expertise.

To maintain a high degree of expertise, diversity and independence in the future, the Board has a succession planning process in place to identify potential candidates for the Board at an early stage. With this process, we are well prepared when Board members rotate off the Board. The objectives of the succession planning process are to ensure adequate representation of key Board competencies and a Board composition that is well suited to address future challenges, while maintaining the stability and professionalism of the Board. Potential candidates are evaluated according to criteria defined to assess the candidates' expertise and experience, which include the following:

- proven track record as an executive with relevant leadership credentials gained in an international business environment in financial services or another industry;
- relevant functional skills and credentials in the key areas listed above;
- understanding of global banking, financial markets and financial regulation;
- broad international experience and global business perspective, with a track record of having operated in multiple geographies;
- ability to bring insight and clarity to complex situations and to both challenge and constructively support management;
- high level of integrity and affinity with the Group's values and corporate culture; and
- willingness to commit sufficient time to prepare for and attend Board and committee meetings.

The evaluation of candidates also considers formal independence and other criteria for Board membership, consistent with legal and regulatory requirements and the Swiss Code of Best Practice for Corporate Governance. Furthermore, we believe that other aspects, including team dynamics and personal reputation of Board members, play a critical role in ensuring the effective functioning of the Board. This is why the Group places the utmost importance on the right mix of personalities who are also fully committed to making their blend of specific skills and experience available to the Board.

### **Chairman succession**

Axel Lehmann was elected as a member of the Board by the EGM of October 1, 2021. Effective January 16, 2022, the Board appointed Mr. Lehmann as Chairman and successor to Antonio Horta-Osorio, who resigned as Chairman in January 2022. At the 2022 AGM, Mr. Lehmann was subsequently elected as Chairman.

### **New members and continuing training**

Any newly appointed member is required to participate in an orientation program to become familiar with our legal and organizational structure, strategic plans, business operations and significant financial, risk, compliance and regulatory issues and other important matters relating to the governance of the Group. The orientation program is designed to take into account the new Board member's individual background and level of experience in each specific area. Moreover, the program's focus is aligned with any committee memberships of the person concerned. In addition to the comprehensive orientation program for new Board members, continuous training forms part of the Board and Board committee agendas through topical deep dives, as well as training on specific bank compliance topics relevant to the Board, such as electronic communication, cybersecurity, data protection and personal account trading. The Board and the committees of the Board regularly ask specialists within the Group to speak about specific topics in order to enhance the Board members' understanding of issues that already are, or may become, of particular importance to our business.

### **Meetings**

In 2022, the Board held 28 meetings, including an annual two-day strategy session, the majority of which were held as video or telephone conferences in part due to COVID-19-related travel and other restrictions on holding in-person meetings that remained in place in various jurisdictions in 2022. The members of the Board are encouraged to attend all meetings of the Board and the committees on which they serve. Similar to 2021, there were a relatively high number of Board meetings held during 2022 compared to earlier years, due to the need to call frequent extraordinary meetings in connection with the strategy update and overall challenging situation of the firm, as well as various key leadership changes.

## Meeting attendance – Board and Board committees

Ana Paula Pessoa	26/28	—	24/24	—	—	6/6	—	—	56/58	97

BoD = Board of Directors; GNC = Governance and Nominations Committee; AC = Audit Committee; RC = Risk Committee; CC = Compensation Committee; CFCCC = Conduct and Financial Crime Control Committee; DTCC = Digital Transformation and Technology Committee; SAC = Sustainability Advisory Committee

<sup>1</sup> Owing to changes to the Board and committee composition during the Board period, the maximum and attended meetings per director varies.

All members of the Board are expected to spend the necessary time needed outside of these meetings to discharge their responsibilities appropriately. The Chairman calls the meeting with sufficient notice and prepares an agenda for each meeting. The Chairman may also call extraordinary meetings on short notice, should circumstances require. Any other Board member also has the right to call an extraordinary meeting, if deemed necessary. The Chairman has the discretion to invite members of management or others to attend the meetings. Generally, the members of the Executive Board attend part of the Board meetings to ensure effective interaction with the Board. The Board also holds separate private sessions without management present. Minutes are kept of the proceedings and resolutions of the Board.

From time to time, the Board may make certain decisions via circular resolution, unless a member asks that the matter be discussed in a meeting and not be decided upon by way of written consent. During 2022, the Board resolved five matters via circular resolution. As of the date of the publication of this report, in 2023, the Board has held three meetings, two of which were via video or telephone conference. So far in 2023, there have been no matters resolved via circular resolution.

## Mandates

Our Board members may assume board or executive level or other roles in companies and organizations outside of the Group, which are collectively referred to as mandates. The Swiss Code of Obligations sets out that companies must include provisions in their AoA to set limits on the number of mandates that board members and executive management may hold. According to the Group's AoA (Chapter IV, Section 2, The Board of Directors, Art. 20b), mandates include activities in the most senior executive and management bodies of listed companies and all other legal entities that are obliged to obtain an entry in the Swiss commercial register or a corresponding foreign register. Subject to approval by the AGM, the Group's AoA will be revised such that mandates in the sense of Art. 20b will be deemed to comprise mandates in comparable functions at other enterprises with an economic purpose. Board members are obligated to disclose all mandates to the Group and changes thereto, which occur during their board tenure. Board members wishing to assume a new mandate with a company or organization must first consult with the Chairman before accepting such mandate, in order to ensure there are no conflicts of interest or other issues.

The limitations on mandates assumed by Board members outside of the

Group are summarized in the table below.

---

## Type of mandate and limitation – Board

Type of mandate	Limitation
Listed companies	No more than four other mandates
Other legal entities <sup>1</sup>	No more than five mandates
Legal entities on behalf of the Group <sup>2</sup>	No more than ten mandates
Charitable legal entities <sup>3</sup>	No more than ten mandates

<sup>1</sup> Includes private non-listed companies.

<sup>2</sup> Includes memberships in business and industry associations.

<sup>3</sup> Also includes honorary mandates in cultural or educational organizations.

No Board member holds mandates in excess of these restrictions. The assumption of up to five mandates in different legal entities under common control is deemed to constitute one mandate. The restrictions shown above do not apply to mandates of Board members in legal entities controlled by the Group such as subsidiary boards.

### Overboarding

In addition to reviewing the number of mandates that a Board member concurrently holds with respect to the limitations described above, the Governance and Nominations Committee also considers the specific roles that Board members perform in other companies in order to identify cases of potential overboarding and to ensure that Board members have sufficient time to dedicate to their Credit Suisse Board mandate. Board members are required to disclose any changes in their mandates or changes to their roles within existing mandates as they occur to ensure that such changes would not lead to an overboarding situation. At the 2022 AGM, certain shareholders were critical of the proposed re-election of Ana Paula Pessoa due to concerns about overboarding in consideration of her concurrent mandates on five listed company boards, including Credit Suisse. Ms. Pessoa informed the Group of her intention to step down from the board of the Vinci Group (listed company) effective April 2023, thereby

reducing the number of her listed company mandates to four. She will also step down from the board of Kunumi AI (private company) in April 2023.

### Independence

The Board consists solely of non-executive directors within the Group, of which at least the majority must be determined to be independent. In its independence determination, the Board takes into account the factors set forth in the OGR (Chapter II Board of Directors, Item 3.2), the committee charters and applicable laws, regulations and listing standards. Our independence standards are also periodically measured against other emerging best practice standards.

The Governance and Nominations Committee performs an annual assessment of the independence of each Board member and reports its findings to the Board for the final determination of independence of each individual member. The Board has applied the independence criteria of the SIX Swiss Exchange Directive on Information relating to Corporate Governance, FINMA, the Swiss Code of Best Practice for Corporate Governance and the rules of the NYSE and the Nasdaq Stock Market (Nasdaq) in determining the definition of independence.

Moreover, Board members with immediate family members who would not qualify as independent according to the above listed criteria shall be subject to a three-year cooling-off period for purposes of determining their independence after fulfilment of the independence criteria by the immediate family member. In addition, Board members are not deemed to be independent if they are qualified shareholders of the Group or represent such qualified shareholder. A qualified shareholder holds in excess of 10% of the Group's share capital or may otherwise influence the Group in a significant manner.

---

## Independence criteria applicable to all Board members

### Independence

**In general, a director is considered independent if the director:**

### Criteria

- is not, and has not been for the past three years, employed as an Executive Board member at the Group or any of its subsidiaries or in another significant function at the Group;
- is not, and has not been for the past three years, an employee or affiliate of the Group's external auditor;
- does not, according to the Board's assessment, maintain a material direct or indirect business relationship with the Group or any of its subsidiaries, which causes a conflict of interest due to its nature or extent; and
- is not, or has not been for the past three years, part of an interlocking directorate in which an Executive Board member serves on the compensation committee of another company that employs the Board member.

**Whether or not a relationship between the Group or any of its subsidiaries and a member of the Board is considered material depends in particular on the following factors:**

- the volume and size of any transactions concluded in relation to the financial status and credit standing of the Board member concerned or the organization in which he or she is a partner, significant shareholder or executive officer;
- the terms and conditions applied to such transactions in comparison to those applied to transactions with counterparties of a similar credit standing;
- whether the transactions are subject to the same internal approval processes and procedures as transactions that are concluded with other counterparties;
- whether the transactions are performed in the ordinary course of business; and
- whether the transactions are structured in such a way and on such terms and conditions that the transaction could be concluded with a third party on comparable terms and conditions.

### **Specific independence considerations**

Board members serving on the Audit Committee are subject to independence requirements in addition to those required of other Board members. None of the Audit Committee members may be an affiliated person of the Group or may, directly or indirectly, accept any consulting, advisory or other compensatory fees from us other than their regular compensation as members of the Board and its committees.

For Board members serving on the Compensation Committee, the independence determination considers all factors relevant to determining whether a director has a relationship with the Group that is material to that director's ability to be independent from management in connection with the duties of a Compensation Committee member, including, but not limited to:

- the source of any compensation of the Compensation Committee member, including any consulting, advisory or other compensatory fees paid by the Group to such director; and
- whether the Compensation Committee member is affiliated with the Group, any of its subsidiaries or any affiliates of any of its subsidiaries.

### **Other independence standards**

While the Group is not subject to such standards, the Board acknowledges that some proxy advisors apply different standards for assessing the independence of our Board members, including the length of tenure a Board member has served, the full-time status of a Board Member, annual compensation levels of Board members within a comparable range to executive pay or a Board member's former executive status for periods further back than the preceding three years.

### **Independence determination**

As of December 31, 2022, all members of the Board were determined by the Board to be independent.

### **Conflicts of interest**

According to our OGR (Chapter IX Special provisions, Items 44.1, 44.2), the members of the Board, the Executive Board and the management committees of the divisions, regions and corporate functions are obliged to preserve the interests of the Group. Conflicts of interest of a personal nature, private or professional, potential conflicts of interest and even the appearance of conflicts of interest should be avoided. Any conflicts of interest with respect to a particular transaction, including conflicts of interest of persons or companies with whom the member has close personal relations, should be disclosed to the chair of the relevant governance body prior to the resolution process for such transaction. The affected member shall not become involved in the resolution process for such transaction.

In connection with the definition and ongoing implementation of the recently announced strategic initiatives, the Board has considered a number of potential conflicts of interest involving existing or former Board members in relation to certain projects being executed as part of those initiatives. The Board considered the aforementioned principles in pursuing those projects, supported by independent external advisers, and took measures to address any potential conflicts

of interest in accordance with those principles, including through recusals of interested parties in the decision-making process. The Board will continue to monitor for and take any necessary measures to address any potential conflicts of interest as this implementation progresses.

### **Board leadership**

#### **Chairman of the Board**

The Chairman is a non-executive member of the Board, in accordance with Swiss banking law, and performs his role on a full-time basis, in line with the practice expected by FINMA, our main regulator. The Chairman:

- coordinates the work within the Board;
- works with the committee chairs to coordinate the tasks of the committees;
- ensures that the Board members are provided with the information relevant for performing their duties;
- drives the Board agenda;
- drives key Board topics, especially regarding the strategic development of the Group, succession planning, the structure and organization of the Group, corporate governance, as well as compensation and compensation structure, including the performance evaluation and compensation of the CEO and the Executive Board;
- chairs the Board, the Governance and Nominations Committee and the Shareholder Meetings;
- takes an active role in representing the Group to key shareholders, investors, regulators and supervisors, industry associations and other external stakeholders;
- has no executive function within the Group;
- with the exception of the Governance and Nominations Committee, is not a member of any of the other Board standing committees; and
- may attend all or parts of selected committee meetings as a guest without voting power.

#### **Vice-Chair and Lead Independent Director**

There may be one or more Vice-Chairs. The Vice-Chair:

- is a member of the Board;
- is a designated deputy to the Chairman; and
- assists the Chairman by providing support and advice to the Chairman, assuming the Chairman's role in the event of the Chairman's absence or indisposition and leading the Board accordingly.

According to the Group's OGR (Chapter II Board of Directors, Item 3.4), the Board may appoint a Lead Independent Director. If the Chairman is determined not to be independent by the Board, the Board must appoint a Lead Independent Director. The Lead Independent Director:

- may convene meetings without the Chairman being present;
- takes a leading role among the Board members, particularly when issues between the Chairman and Board members arise (for example, when the Chairman has a conflict of interest);
- leads the Board's annual assessment of the Chairman; and

- ensures that the work of the Board and Board-related processes continue to run smoothly.

Christian Gellerstad currently serves as the Vice-Chair and the Lead Independent Director.

### **Segregation of duties**

In accordance with Swiss banking law, the Group operates under a dual board structure, which strictly segregates the duties of supervision, which are the responsibility of the Board, from the duties of management, which are the responsibility of the Executive Board. The roles of the Chairman (non-executive) and the CEO (executive) are separate and carried out by two different people.

### **Board responsibilities**

In accordance with the OGR (Chapter II Board of Directors, Item 5.1), the Board delegates certain tasks to Board committees and delegates the management of the company and the preparation and implementation of Board resolutions to certain management bodies or executive officers to the extent permitted by law, in particular Article 716a and 716b of the Swiss Code of Obligations, and the AoA (Chapter IV, Section 2, The Board of Directors, Art. 17 of the Group's AoA and Chapter III, Section 6, Board of Directors, Art. 6.3 of the Bank's AoA).

With responsibility for the overall direction, supervision and control of the company, the Board:

- regularly assesses our competitive position and approves our strategic and financial plans and risk appetite statement and overall risk limits;
- appoints or dismisses the CEO and the members of the Executive Board and appoints or dismisses the head of Internal Audit as well as the regulatory auditor;
- receives a status report at each ordinary meeting on our financial results, capital, funding and liquidity situation;
- receives, on a monthly basis, management information packages, which provide detailed information on our performance and financial status, as well as quarterly risk reports outlining recent developments and outlook scenarios;
- is provided by management with regular updates on key issues and significant events, as deemed appropriate or requested;
- has access to all information concerning the Group in order to appropriately discharge its responsibilities;
- reviews and approves significant changes to our structure and organization;

- approves the annual variable compensation for the Group and the divisions and recommends compensation of the Board and Executive Board for shareholder approval at the AGM;
- provides oversight on significant projects including acquisitions, divestitures, investments and other major projects;
- approves the recovery and resolution plans of the Group and its major subsidiaries; and
- along with its committees, is entitled, without consulting with management and at the Group's expense, to engage external legal, financial or other advisors, as it deems appropriate, with respect to any matters within its authority.

### **Management information system**

The Group has a comprehensive management information system in place as part of our efforts to ensure the Board and senior management are provided with the necessary information and reports to carry out their respective oversight and management responsibilities. The Chairman may request additional reports as deemed appropriate.

### **Governance of Group subsidiaries**

The Board assumes oversight responsibility for establishing appropriate governance for Group subsidiaries. The governance of the Group is based on the principles of an integrated oversight and management structure with global scope, which enables management of the Group as one economic unit. The Group sets corporate governance standards to ensure the efficient and harmonized steering of the Group. In accordance with the OGR (Chapter II, Board of Directors, Item 5.1.16), the Board appoints or dismisses the chairperson and the members of the board of directors of the major subsidiaries of the Group and approves their compensation. A policy naming the subsidiaries in scope and providing guidelines for the nomination and compensation process is periodically reviewed by the Board. The governance of the major subsidiaries, subject to compliance with all applicable local laws and regulations, should be consistent with the corporate governance principles of the Group, as reflected in the OGR and other corporate governance documents. In order to facilitate consistency and alignment of Group and subsidiary governance, it is the Group's policy for the Board to appoint at least one Group director to each of the boards of its major subsidiaries. Directors and officers of the Group and its major subsidiaries are committed to ensuring transparency and collaboration throughout the Group.

## **Board evaluation**

The Board conducts a self-assessment once a year, where it reviews its own performance against the responsibilities listed in its charter and the Board's objectives and determines future objectives, including any special focus objectives for the coming year. The performance assessment of the Chairman is led by the Vice-Chair; the Chairman does not participate in the discussion of his own performance. As part of the self-assessment, the Board evaluates its effectiveness with respect to a number of different aspects, including board structure and composition, communication and reporting, agenda setting and continuous improvement. From time to time, the Board may also mandate an external consultant to conduct an external Board effectiveness review rather than performing the annual review as a self-assessment only, in order to get an outside-in view of the Board's effectiveness and benchmark against best practices. On the proposal of the Chairman, the Board mandated an external consultant to perform a Board effectiveness review in 2022. This assessment was conducted in the fourth quarter of 2022 and included an in depth questionnaire completed by all Board members, interviews conducted with the Chairman, the individual Board members, the CEO and certain other Executive Board members and other internal experts, and the participation of the external consultants as observers in Board and Board committee meetings. The findings and recommendations from the external Board effectiveness review were presented and discussed at a Board meeting in December 2022 and addressed, among other topics, the Board's future roadmap and priorities, including focus areas for 2023,

with respect to strategy, the Group's operating model, culture, people development and succession planning and Board composition and committee structure. External Board effectiveness reviews took place in 2017 and 2020, in line with the Board's intention to perform an external Board effectiveness review at least every three years.

## **Board changes**

In addition to Axel Lehmann assuming the role of Chairman as previously mentioned, Mirko Bianchi, Keyu Jin and Amanda Norton were elected as new non-executive Board members at the 2022 AGM and Amanda Norton was also elected as a new Compensation Committee member. Given his extensive finance experience at European financial institutions and former CFO roles, the Board appointed Mirko Bianchi as Chair of the Audit Committee. Richard Meddings, who previously served as Chair of the Audit Committee, was appointed by the Board as Chair of the Risk Committee. Other committee chair changes include the appointment of Clare Brady as Chair of the Conduct and Financial Crime Control Committee and Christian Gellerstad as Chair of the Compensation Committee. Christian Gellerstad was furthermore appointed as Vice-Chair and Lead Independent Director, succeeding Severin Schwan, who did not stand for re-election at the 2022 AGM. At the 2023 AGM, all current Board members are standing for reelection, and there are no new Board candidates proposed for election.

- Refer to "Members of the Board of Directors" table for an overview of all Board members and their current committee appointments.

---

## Board activities

During 2022 and early 2023, the Board focused on a number of key areas, including but not limited to the activities described below. Specifically, the Board:

<u>Activity</u>	<u>Description</u>
<b>Strategy and organization</b>	<ul style="list-style-type: none"><li>monitored the implementation of the strategy and organizational changes decided as a result of the Group strategy review conducted in 2021 and announced in November 2021, including the mandates of the four business divisions and four regions</li><li>launched a further comprehensive strategic review in July 2022, building on themes agreed at the 2022 Board Strategy Workshop in June 2022, with the objective to consider alternatives that go beyond the conclusions of the 2021 strategic review, particularly given the changed economic and market environment, and closely supervised progress of the strategy through a special ad-hoc Board committee, the Investment Banking Strategy Committee (IBSC)</li><li>approved strategy and organizational changes resulting from the 2022 strategic review, including a radical restructuring of the Investment Bank, comprising the carve-out of CS First Boston as a capital markets and advisory business, an accelerated cost transformation, the creation of the CRU and a reallocation of capital to Wealth Management, Swiss Bank, Asset Management and a newly formed Markets business</li><li>reviewed and approved entering into definitive transaction agreements to sell a significant part of the SPG and other related financing businesses to Apollo Global Management (Apollo) as announced in November 2022</li><li>assessed and approved the acquisition of The Klein Group LLC, an investment banking boutique and registered broker-dealer affiliated with former Board member Michael Klein, representing an important step to progress the carve-out of CS First Boston</li><li>supervised the initial phase of the implementation of the strategy and organizational changes and received regular updates on the set-up of the CRU, the progress of the cost transformation program and the restructuring of the Investment Bank</li></ul>
<b>People and culture</b>	<ul style="list-style-type: none"><li>established, together with the Executive Board, a comprehensive risk culture framework based on the principle that “everyone is a risk manager”, which aims to change mindsets, reinforce risk aspects in decision-making and foster prudent risk-taking behaviors across the Group</li><li>received regular progress updates on the various risk culture initiatives, including bank-wide training on “Building a Risk Culture” and a risk culture dashboard, measuring progress linked to the risk culture framework, such as internal audit results and senior leadership role models</li><li>conducted dedicated senior talent review session with the full Board and held several employee engagement events together with the Executive Board</li></ul>
<b>Board and Executive Board succession</b>	<ul style="list-style-type: none"><li>nominated Mirko Bianchi, Keyu Jin and Amanda Norton as new Board members for election at the 2022 AGM</li><li>appointed new Executive Board members during 2022, including the roles of the CEO (Ulrich Körner), COO (Francesca McDonagh), CFO (Dixit Joshi), General Counsel (Markus Diethelm), regional CEO of Asia Pacific (Edwin Low) and CCO (Nita Patel)</li></ul>
<b>Governance and supervision</b>	<ul style="list-style-type: none"><li>approved the set-up of the IBSC as an ad hoc Board committee for the purposes of assisting the Board in overseeing the definition of a new investment banking strategy and approved its terms of reference</li><li>supervised the establishment and execution of the Strategic Regulatory Remediation program intended to strengthen our organization and deliver on regulatory programs</li><li>held dedicated sessions with senior officials from FINMA and the Federal Reserve on their respective annual assessments of the Group</li><li>regularly reviewed and discussed key regulatory correspondence and outcomes from the regulatory engagements of the Chairman, CEO and other Board and Executive Board members</li></ul>
<b>Financial and risk management</b>	<ul style="list-style-type: none"><li>decided to further strengthen the Group’s capital base and support its strategic transformation by completing two capital raises with aggregate gross proceeds of CHF 4 billion through the issuance of new shares to qualified investors and a rights offering to existing shareholders, both of which were approved at the EGM on November 23, 2022</li><li>closely monitored the Group’s liquidity status following the significant deposit and net asset outflows experienced during the fourth quarter of 2022 and measures taken by management to address the situation, including a comprehensive client outreach program</li><li>reviewed and approved the Group’s financial and capital plans and risk appetite for 2023 reflecting the Group’s strategic transformation and targets announced at the October 2022 strategy update</li></ul>
<b>Board effectiveness</b>	<ul style="list-style-type: none"><li>conducted a comprehensive external Board effectiveness review</li></ul>

## **Board committees**

The Board has six standing committees: the Governance and Nominations Committee, the Audit Committee, the Compensation Committee, the Conduct and Financial Crime Control Committee, the Risk Committee and the Digital Transformation and Technology Committee. In addition, the Board has one advisory committee, the Sustainability Advisory Committee. Except for the Compensation Committee members, who are elected by the shareholders on an annual basis, the committee members are appointed by the Board for a term of one year.

At each Board meeting, the Chairs of the committees report to the Board about the activities of the respective committees. In addition, the minutes and documentation of the committee

meetings are accessible to all Board members. Each committee has its own charter, which has been approved by the Board. Each standing committee performs a self-assessment once a year, where it reviews its own performance against the responsibilities listed in its charter and the committee's objectives and determines any special focus objectives for the coming year.

The Board furthermore established an ad-hoc committee of the Board in 2022, the IBSC. The IBSC was formed for the purposes of providing close oversight and guidance on the definition of the future investment banking strategy and structure during the strategy review process. From August 1 through October 26, 2022, the IBSC usually met on a weekly basis. The IBSC was retired after the announcement of the Group's new strategy on October 27, 2022.

---

## Governance and Nominations Committee

The primary function of the Governance and Nominations Committee is to act as a counselor to the Chairman, address key Group corporate governance issues and evaluate and recommend new Board candidates, as well as new Executive Board members.

<u>Topic</u>	<u>Description</u>
<b>Membership</b>	<ul style="list-style-type: none"><li>• consists of the Chairman, the Vice-Chair and other members appointed by the Board</li><li>• may include non-independent Board members; however, the majority of members must qualify as independent</li><li>• currently consists of five members; all of our Governance and Nominations Committee members are independent</li></ul>
<b>Meetings</b>	<ul style="list-style-type: none"><li>• generally meets on a monthly basis</li><li>• the meetings are usually attended by the CEO</li><li>• may also ask other members of management or specialists to attend a meeting</li></ul>
<b>Main duties and responsibilities</b>	<ul style="list-style-type: none"><li>• acts as counselor to the Chairman and supports him in the preparation of Board meetings</li><li>• addresses the corporate governance issues affecting the Group and develops and recommends to the Board corporate governance principles and such other corporate governance-related documents as it deems appropriate for the Group</li><li>• reviews the independence of the Board members annually and recommends its assessment to the Board for final determination</li><li>• is responsible for setting selection criteria for Board membership, which reflects the requirements of applicable laws and regulations, and for identifying, evaluating and nominating candidates for Board membership</li><li>• guides the Board's annual performance assessment of the Chairman, the CEO and the members of the Executive Board</li><li>• proposes to the Board the appointment, replacement or dismissal of members of the Executive Board as well as other appointments requiring endorsement by the Board</li><li>• reviews succession plans with the Chairman and the CEO relating to Executive Board positions and is kept informed of other top management succession plans</li></ul>

## Activities

During 2022 and early 2023, the Governance and Nominations Committee focused on a number of key areas, including but not limited to the activities described below. Specifically, the Governance and Nominations Committee:

<u>Activity</u>	<u>Description</u>
<b>Board member succession</b>	<ul style="list-style-type: none"><li>• established selection criteria, conducted interviews with and assessed the qualifications and suitability of prospective Board member candidates</li><li>• recommended Mirko Bianchi, Keyu Jin and Amanda Norton as new Board member nominees for approval by the Board prior to the 2022 AGM, who, collectively, bring significant experience to the Board with respect to finance, risk management and the Asian markets, particularly for China, and proposed Amanda Norton for election as a Compensation Committee member</li><li>• proposed changes to the committee chairs post the 2022 AGM, including newly elected Board member Mirko Bianchi as Audit Committee Chair, Clare Brady as Conduct and Financial Crime Control Committee Chair, Christian Gellerstad as Compensation Committee Chair, and Richard Meddings as Risk Committee Chair</li><li>• proposed the appointment of Christian Gellerstad as Vice-Chair and Lead Independent Director to succeed Severin Schwan, who did not stand for re-election at the 2022 AGM</li></ul>
<b>Executive Board succession</b>	<ul style="list-style-type: none"><li>• drove the renewal of the Executive Board forward through the assessment and recommendation to the Board of Executive Board changes, including a CEO change, with the recommendation of Ulrich Körner as the new Group CEO</li><li>• interviewed various internal and external candidates in connection with the Executive Board changes highlighted above</li></ul>
<b>Advice and guidance</b>	<ul style="list-style-type: none"><li>• supported the Chairman in preparing for the Board's annual strategy workshop in 2022 together with the Executive Board, at which key strategic priorities were addressed, including the need for a more radical restructuring of the Investment Bank</li><li>• reviewed and provided advice and guidance to the Chairman and CEO in advance of key decisions to be taken by the Board in connection with the strategy review, including the sale of a significant part of SPG to Apollo and the acquisition of The Klein Group LLC</li><li>• provided guidance for the annual performance assessments of the Chairman and the CEO</li></ul>
<b>Corporate governance</b>	<ul style="list-style-type: none"><li>• served as the primary Board oversight body for the Strategic Regulatory Remediation program and provided regular review and challenge to the management with respect to the set-up and progress of the program</li></ul>

- assessed the findings and recommendations of the 2022 external board effectiveness review with respect to Board composition, structure, long-term priorities and focus areas for 2023
- engaged external advisors to provide independent, expert advice to the Board on select strategy and corporate governance topics

---

## Audit Committee

The primary function of the Audit Committee is to assist the Board in fulfilling its oversight role by monitoring and assessing the integrity of the financial statements of the Group.

<u>Topic</u>	<u>Description</u>
<b>Membership</b>	<ul style="list-style-type: none"><li>• consists of at least three members of the Board, all of whom must be independent; currently consists of five members, all of whom are independent</li><li>• the Risk Committee Chair is generally appointed as one of the members of the Audit Committee</li><li>• stipulates that all Audit Committee members must be financially literate. The US Securities and Exchange Commission (SEC) requires disclosure about whether a member of the Audit Committee is an audit committee financial expert within the meaning of the Sarbanes-Oxley Act of 2002 (SOX). The Board has determined that Mirko Bianchi is an audit committee financial expert</li><li>• members may not serve on the Audit Committee of more than two other companies, unless the Board deems that such membership would not impair their ability to serve on our Audit Committee</li></ul>
<b>Meetings</b>	<ul style="list-style-type: none"><li>• the Audit Committee holds meetings at least once each quarter, prior to the publication of our consolidated financial statements</li><li>• typically a number of additional meetings and workshops are convened throughout the year</li><li>• meetings are attended by management representatives, as appropriate, the Head of Internal Audit and senior representatives of the external auditor</li><li>• a private session with Internal Audit and the external auditors is regularly scheduled to provide them with an opportunity to discuss issues with the Audit Committee without management being present</li></ul>
<b>Main duties and responsibilities</b>	<ul style="list-style-type: none"><li>• monitors and assesses the overall integrity of the financial statements as well as disclosures of the financial condition, results of operations and cash flows</li><li>• monitors the adequacy of the financial accounting and reporting processes and the effectiveness of internal controls</li><li>• monitors processes designed to ensure compliance by the Group in all significant respects with legal and regulatory requirements</li><li>• monitors the adequacy of the management of non-financial risks jointly with the Risk Committee</li><li>• reviews jointly with the Conduct and Financial Crime Control Committee any significant matters related to compliance and conduct</li><li>• monitors the qualifications, independence and performance of the external auditors and of Internal Audit</li><li>• is regularly informed about significant projects and initiatives aimed at further improving processes and receives regular updates on significant legal, compliance, disciplinary, tax and regulatory matters</li><li>• has established procedures for the receipt, retention and treatment of complaints of a significant nature regarding accounting, internal accounting controls, auditing or other matters alleging potential misconduct, including a whistleblower hotline</li><li>• reviews the annual Sustainability Report and is informed about evolving standards and practices of sustainability reporting</li><li>• reports committee activities to the Board as deemed appropriate; annually performs a self-assessment and a review of its charter</li></ul>

## Activities

During 2022 and early 2023, the Audit Committee focused on a number of key areas, including but not limited to the activities described below. Specifically, the Audit Committee:

<u>Activity</u>	<u>Description</u>
<b>Quarterly and annual financial reporting</b>	<ul style="list-style-type: none"><li>• performed its regular review of the quarterly and annual financial results and related accounting, reporting and internal control and disclosure matters, as well as matters of significant judgment</li><li>• reviewed and endorsed the Sustainability Report, including TCFD disclosures, the Group's Tax Contribution Report, and the Modern Slavery and Human Trafficking Transparency Statement</li><li>• held specific reviews on certain accounting and reporting matters of particular relevance in 2022 and early 2023, such as the reporting and disclosure following the new organizational structures and the respective restatement of prior periods, the impairment of the deferred tax assets, the increase of litigation provisions and matters raised in SEC comment letters</li><li>• held regular reviews of the Bank parent company's financial statements</li><li>• held various educational sessions (some jointly with the Risk Committee) on selected topics, for example on disclosure requirements and SOX thematic recommendations</li></ul>

- Internal and external audit**

  - received regular updates from the Head of Internal Audit on key audit findings and held a dedicated workshop with the Internal Audit senior leadership team about their risk assessments for the organization, emerging risk and control themes and audit planning and methodology, as well as on organizational matters of the Internal Audit function, such as talent and succession planning
  - received regular updates and reports from PricewaterhouseCoopers AG (PwC)
- Legal, regulatory, compliance and conduct matters**

  - received updates at every meeting from the General Counsel on significant litigation, investigations and regulatory enforcement matters
  - regular reports on key regulatory developments and interactions with our main regulators from the Head of Regulatory Relations
  - maintained a focus at every meeting on key compliance risks and associated internal controls, as well as key compliance programs
  - reviewed the Group's whistleblowing processes and governance, as well as select cases and their resolution
  - received, jointly with the Conduct and Financial Crime Control Committee, updates on significant matters related to compliance and conduct
  - reviewed, jointly with the Risk Committee, the annual assessment of the effectiveness of the internal control system and recommended approval by the Board of the adequacy of the internal control system, according to the requirements of FINMA
- Infrastructure and key change programs**

  - conducted in-depth reviews of the payments processes and systems landscape
  - received an update on financial reporting improvement initiatives, including accounting quality assurance review, progress on reducing general ledger adjustments and target operating model
  - reviewed, jointly with the Risk Committee, the Group's key change programs, including the progress of the Strategic Regulatory Remediation program, the Group's data management strategy, as well as the progress related to the IBOR (interbank offered rate) transition program
  - reviewed the scope and governance of the newly established NCU and the governance around restructuring costs

## **Internal Audit**

Our Internal Audit function comprises a team of approximately 400 professionals, virtually all of whom are directly involved in auditing activities. The Head of Internal Audit reports directly to the Audit Committee Chair and the Audit Committee directs and oversees the activities of the Internal Audit function. In December 2021, the Board, upon the recommendation of the Audit Committee, appointed Mark Hannam as the new Head of Internal Audit, succeeding Rafael Lopez Lorenzo, who was appointed as CCO and member of the Executive Board. Mr. Hannam joined Credit Suisse in April 2022.

Internal Audit performs an independent and objective assurance function that is designed to add value to our operations. Using a systematic approach, the Internal Audit team evaluates and enhances the effectiveness of Credit Suisse's risk management, control and governance processes.

Internal Audit is responsible for carrying out periodic audits in line with the Internal Audit Charter, which is approved by the Audit Committee and available publicly. It regularly and independently assesses the risk exposure of our various business activities, taking into account industry trends, strategic and organizational decisions, best practice and regulatory matters. Based on the results of its assessment, Internal Audit develops detailed annual audit objectives, defining key risk themes and specifying resource requirements for approval by the Audit Committee.

As part of its efforts to achieve best practice, Internal Audit regularly benchmarks its methods and tools against those of its peers. In addition, it submits periodic internal reports and summaries thereof to the management teams as well as the Chairman and the Audit Committee Chair. The Head of Internal Audit provides at least quarterly updates to the Audit Committee or more frequently as appropriate. Internal Audit coordinates its operations with the activities of the external auditor for maximum effect.

The Audit Committee annually assesses the performance and effectiveness of the Internal Audit function. For 2022, the Audit Committee concluded that the Internal Audit function was effective and independent, with the appropriate resources to deliver on the Internal Audit Charter.

## **External Audit**

The Audit Committee is responsible for the oversight of the external auditor. The external auditor reports directly to the Audit Committee and the Board with respect to its audit of the Group's financial statements and is ultimately accountable to the shareholders. The Audit Committee pre-approves the retention of, and fees paid to, the external auditor for all audit and non-audit services.

- Refer to "External audit" in Audit for further information.

---

## Risk Committee

The Risk Committee is responsible for assisting the Board in fulfilling its oversight responsibilities of risk management. These responsibilities include the oversight of the enterprise-wide risk management and practices, the promotion of a sound risk culture with clear accountability and ownership, the review of key risk and resources and the assessment of the effectiveness and efficiency of the Group's Risk function.

<u>Topic</u>	<u>Description</u>
<b>Membership</b>	<ul style="list-style-type: none"><li>• consists of at least three members of the Board; currently consists of five members, all of whom are independent</li><li>• the Audit Committee Chair is generally appointed as one of the members of the Risk Committee</li></ul>
<b>Meeting</b>	<ul style="list-style-type: none"><li>• holds at least four ordinary meetings per year, pursuant to its charter</li><li>• usually convenes for additional meetings throughout the year in order to appropriately discharge its responsibilities</li><li>• the CEO, CRO and other Group business or corporate function representatives will usually attend the meetings, as appropriate</li></ul>
<b>Main duties and responsibilities</b>	<ul style="list-style-type: none"><li>• reviews and assesses the integrity and adequacy of the Risk function of the Group including risk measurement approaches</li><li>• reviews and calibrates risk appetite at the Group level and at the level of key businesses as well as major risk concentrations</li><li>• approves the list of countries and proposes the limits and risk appetites allocated to such countries to the Board</li><li>• assesses the capital and liquidity planning, reviews the contingency funding plan and proposes these plans to the Board for approval</li><li>• regularly reviews relationships with top clients and material transactions from a risk perspective and also reviews the reports on material risk matters by the risk function, significant legal entities, businesses and corporate functions</li><li>• reviews, jointly with the Audit Committee, the annual assessment of the adequacy and effectiveness of the internal control system,</li><li>• the status of major infrastructure and committed change programs, as well as significant matters of non-financial risk</li><li>• reviews and assesses the current state and evolution of the risk culture</li><li>• mandates the Credit Risk Review function to independently assess credit risk management practices</li><li>• reports committee activities to the Board as deemed appropriate; annually performs a self-assessment and a review of its charter</li></ul>

## Activities

During 2022 and early 2023, the Risk Committee focused on a number of key areas, including but not limited to the activities described below. Specifically, the Risk Committee:

<u>Activity</u>	<u>Description</u>
<b>Risk transformation</b>	<ul style="list-style-type: none"><li>• received regular updates from the newly appointed Group CRO on the risk function transformation, including the first 100 days plan, the risk effectiveness review, the planned organizational changes and the forward-looking priorities</li><li>• reviewed the stature of the risk function through regular Group CRO organizational updates covering senior management hires and nominations, attrition levels across all locations and seniority levels, as well as through briefings from the risk senior executives</li><li>• promoted and reviewed the progress in strengthening the risk culture, including the first line of defense responsibility and account-ability and the promotion of a risk culture mindset leveraging the bank's purpose, values and code of conduct</li><li>• promoted and monitored the development and implementation of a firm-wide risk return measure across the organization for assessing clients, transactions and businesses in a consistent manner</li></ul>

**Risk appetite, risk monitoring and risk management frameworks**

- reviewed the risk implications of the new Group strategy on the bank's risk profile and monitored the financial and non-financial risks associated with the execution
- reviewed and recommended the proposed changes to risk appetite, triggered by the evolving geopolitical environment and the bank's strategy positioning, and ensured alignment with the Group business strategy
- endorsed the revised risk appetite framework and limits for 2022, as well as the Group's strategic risk objectives and the risk appetite statement for 2023, including country risk limits
- regularly reviewed top clients, key concentrations, material transactions, businesses, as well as geopolitical events of relevance, including a second line of defense assessment
- supported the Board in reviewing strategically important topics, including adequacy of capital, liquidity and funding of both the Group and the Bank parent company
- monitored the implementation of risk governance enhancements to improve the review, approval and escalation of risk matters
- monitored aspects of the risk management framework, with respect to position, reputational, model and liquidity risk and stress testing
- reviewed, jointly with the Audit Committee, non-financial risk matters, including data management, payments processing, people and outsourcing and endorsed the internal control framework
- regularly reviewed, jointly with the Audit Committee, risks related to Credit Suisse AG, including financial performance, as well as capital and liquidity positions
- received briefings on the energy transition frameworks and commitments and reviewed the associated restrictions on certain business activities in carbon-intensive sectors

**Strategic remediation programs and key initiatives**

- closely monitored the remediation triggered by the Archegos event, with a deep dive into certain activities such as the first line of defense accountability and counterparty risk management
- reviewed, jointly with the Audit Committee, the set-up of the Strategic Regulatory Remediation Office and regularly monitored the progress in key regulatory remediation themes, including counterparty risk, liquidity and clients
- received regular updates on key change programs, including the Fundamental Review of the Trading Book and the IBOR transition programs, jointly with the Audit Committee
- reviewed, jointly with the Audit Committee, the scope and governance of the newly established NCU
- reviewed, jointly with the Digital Transition and Technology Committee, the risk infrastructure transformation, as well as risks related to IT security and cyber risk and related mitigation measures

---

## Compensation Committee

The primary function of the Compensation Committee is to determine, review and propose compensation and related principles for the Group.

<u>Topic</u>	<u>Description</u>
<b>Membership</b>	<ul style="list-style-type: none"><li>• consists of at least three members of the Board, all of whom must be independent</li><li>• currently consists of four members, all of whom are independent</li><li>• members are individually elected by the AGM for a period of one year</li></ul>
<b>Meetings</b>	<ul style="list-style-type: none"><li>• holds at least four meetings per year, pursuant to its charter; additional meetings may be scheduled at any time</li><li>• meetings are attended by external advisors and management representatives, as appropriate</li></ul>
<b>Main duties and responsibilities</b>	<ul style="list-style-type: none"><li>• reviews the Group's compensation policy</li><li>• establishes new compensation plans or amending existing plans and recommends them to the Board for approval</li><li>• reviews the performance of the Group and the divisions and recommends the variable compensation pools for the Group and the divisions to the Board for approval</li><li>• proposes individual compensation for the Board members to the Board</li><li>• discusses and recommends to the Board the Executive Board members' compensation, based on proposals by the CEO, and a proposal for the CEO's compensation</li><li>• reviews and recommends to the Board the compensation for individuals being considered for an Executive Board position</li><li>• reviews and endorses the annual compensation report submitted for a consultative vote by shareholders at the AGM</li><li>• is authorized to retain outside advisors, at the Group's expense, for the purpose of providing guidance to the Compensation Committee as it carries out its responsibilities. Prior to their appointment, the Compensation Committee conducts an independence assessment of the advisors pursuant to the rules of the SEC and the listing standards of the NYSE and Nasdaq</li><li>• reports committee activities to the Board as deemed appropriate; annually performs a self-assessment and a review of its charter</li></ul>

## Activities

During 2022 and early 2023, the Compensation Committee focused on a number of key areas, including but not limited to the activities described below. Specifically, the Compensation Committee:

<u>Activity</u>	<u>Description</u>
<b>Executive Board and Board compensation</b>	<ul style="list-style-type: none"><li>• monitored the implementation of the Executive Board compensation design for 2022 and approved refinements for 2023 and beyond, considering investor feedback and market developments</li><li>• approved a one-time Transformation Award to be granted to the Executive Board and other key members of management that is linked to the successful implementation of the Group's strategic objectives</li><li>• reviewed and recommended approval by the Board of the compensation arrangements for the incoming and outgoing Executive Board members during 2022</li><li>• reviewed and recommended the compensation proposals for the Board and Executive Board to be submitted for approval by share- holders at the 2022 and 2023 AGMs</li></ul>
<b>Shareholder engagement and Say-on-Pay</b>	<ul style="list-style-type: none"><li>• continued proactive engagement with shareholders and proxy advisors on compensation, including holding meetings with shareholders involving the Compensation Committee Chair, the Global Head of People and, in part, the Chairman; feedback and key issues resulting from these meetings were discussed within the full committee</li><li>• considered investor feedback specific to the Transformation Award and introduced respective adjustments to the proposal to share- holders in the lead up to the 2023 AGM</li></ul>
<b>Group compensation</b>	<ul style="list-style-type: none"><li>• determined the variable compensation pool for the Group for 2022, including the allocations to the divisions and corporate functions, which was in aggregate 50% below the pool from the prior year in consideration of the Group's poor financial performance in 2022</li><li>• reviewed the employee compensation framework and agreed on certain simplification measures, including the decision to discontinue performance share awards for 2023 onwards</li><li>• monitored the effectiveness of retention measures implemented during the prior year and employee attrition trends</li></ul>

- reviewed and endorsed enhancements to the Significant Events process introduced in the prior year to improve risk and accountability in compensation and reinforce a risk culture mindset
  - received and assessed periodic reports on industry and regulatory developments, including executive pay trends, competitor practices, key corporate governance developments and regulatory themes with implications for compensation
  - acknowledged and regularly discussed compensation related matters raised by regulators
- Refer to “The Compensation Committee” in V – Compensation – Group compensation framework for information on our compensation approach, principles and objectives and outside advisors.

---

## Conduct and Financial Crime Control Committee

The primary function of the Conduct and Financial Crime Control Committee is to assist the Board in fulfilling its oversight responsibilities with respect to the Group's exposure to financial crime risk.

<u>Topic</u>	<u>Description</u>
<b>Membership</b>	<ul style="list-style-type: none"><li>• consists of at least three members of the Board; currently consists of four members, all of whom are independent</li><li>• may include non-independent members; however, the majority of members must qualify as independent</li><li>• the Chair of the Audit Committee is generally appointed as one of the members of the Conduct and Financial Crime Control Committee</li></ul>
<b>Meetings</b>	<ul style="list-style-type: none"><li>• holds at least four meetings per year, pursuant to its charter</li><li>• may convene for additional meetings throughout the year in order to appropriately discharge its responsibilities</li><li>• meetings are attended by management representatives, representatives of Internal Audit and the Group's external auditors, as appropriate</li></ul>
<b>Main duties and responsibilities</b>	<ul style="list-style-type: none"><li>• reviews and assesses the Group's overall compliance framework for addressing financial crime risk, including policies, procedures and organizational set-up</li><li>• monitors and assesses the effectiveness of financial crime compliance programs, including those with respect to the following areas: anti-money laundering, client identification and know-your-client procedures, client on and off boarding, politically exposed persons, economic and trade sanctions, anti-bribery, anti-corruption and client tax compliance</li><li>• reviews the status of the relevant policies and procedures and the implementation of significant initiatives focused on improving conduct and vigilance within the context of combatting financial crime, including employee awareness and training programs</li><li>• reviews and monitors investigations into allegations of financial crime or other reports of misconduct pertaining to the areas specified above</li><li>• reviews with management, Internal Audit and the external auditors audit findings and recommendations with respect to the areas specified above, including annual regulatory audit reports</li><li>• receives regular updates by management on regulatory, legislative and industry specific developments with respect to the areas specified above</li><li>• reviews jointly with the Audit Committee and/or Risk Committee any matters for which a joint review is determined to be appropriate, including the annual compliance risk assessment and the Group's framework for addressing conduct risk</li><li>• provides support to the Compensation Committee and advice, as relevant and appropriate, with respect to the areas specified above as part of the Group's compensation process</li><li>• reports committee activities to the Board as deemed appropriate; annually performs a self-assessment and a review of its charter</li></ul>

### Activities

During 2022 and early 2023, the Conduct and Financial Crime Control Committee focused on a number of key areas, including but not limited to the activities described below. Specifically, the Conduct and Financial Crime Control Committee:

<u>Activity</u>	<u>Description</u>
<b>Financial Crime Compliance effectiveness</b>	<ul style="list-style-type: none"><li>• reviewed comprehensive financial crime compliance reporting packages from management at every meeting, including financial crime regulation developments, key financial crime compliance performance indicators, the application of the sanctions regimes and global investigations and escalated concerns</li><li>• conducted focused sessions on specific financial crime compliance programs, including processes regarding Politically Exposed Persons</li><li>• received updates from Internal Audit on financial crime compliance-related findings in Internal Audit reports and reviewed the results of the anti-money laundering regulatory audits with PwC</li><li>• held dedicated sessions during 2022 with the divisional CEOs to discuss key financial crime related initiatives and risk culture aspects in their respective divisions</li></ul>
<b>Regulatory driven enhancement</b>	<ul style="list-style-type: none"><li>• continued to closely monitor the progress on our commitments to enhance anti-money laundering and related financial crime compliance processes in connection with FINMA enforcement matters</li></ul>

**programs**

- reviewed the delivery of the remediation efforts to address an enforcement action of the Federal Reserve Bank of New York (FRBNY) and the New York Department of Financial Services issued in November 2020 regarding enhancements to financial crime compliance in our US operations
- held review sessions and challenged the comprehensive program to improve anti-fraud controls
- engaged in dialogue with senior representatives of FINMA on significant matters of financial crime compliance at Credit Suisse

**Financial Crime  
Compliance  
governance**

- assessed the financial crime compliance organizational and governance changes during 2022 following the appointment of a new CCO and other key leadership changes
- held several joint sessions with the Audit Committee, including a joint review of Credit Suisse's Foreign Account Tax Compliance Act and US cross-border compliance activities and the shift of operational activities regarding client lifecycle controls from the second to the first line of defense
- introduced a coordination of financial crime compliance among the committee chairs of the Group's major subsidiaries responsible for the oversight of financial crime compliance

## Digital Transformation and Technology Committee

The Digital Transformation and Technology Committee was established in January 2022 with the primary function of assisting the Board in setting, steering and overseeing the execution of the bank's data, digitalization and technology strategy. The committee is tasked with overseeing the strategically aligned execution of the bank's major digitalization and technology initiatives and setting governance standards for digital transformation across the Group.

<u>Topic</u>	<u>Description</u>
<b>Membership</b>	<ul style="list-style-type: none"><li>• consists of not less than three members; currently consists of four members, all of whom are independent</li><li>• may include non-independent members; however, the majority of members must qualify as independent</li></ul>
<b>Meetings</b>	<ul style="list-style-type: none"><li>• holds at least four ordinary meetings per year, pursuant to its charter</li><li>• the Group CEO and the Group Chief Technology and Operations Officer both shall usually attend the meetings</li></ul>
<b>Main duties and responsibilities</b>	<ul style="list-style-type: none"><li>• oversees and drives the strategic alignment of the Group's technology investments and spend as well as the governance standards for digital transformation across the Group</li><li>• oversees the execution of the Group's major digitalization and technology initiatives and tracks the progress made</li><li>• identifies and assesses opportunities and threats to the Group's business model from the digital transformation</li><li>• works closely with the Risk Committee and Audit Committee in regard to overseeing technology-driven risks</li><li>• obtains independent external perspectives and thought leadership to select technology trends with an impact on the Group and the financial services industry more broadly; and in relation to these trends, critically examines the strategies and activities within the Group</li><li>• review reports by the Chief Technology and Operations Officer on material matters related to digital transformation and technology</li><li>• reports committee activities to the Board as deemed appropriate; annually performs a self-assessment and a review of its charter</li></ul>

### Activities

During 2022 and early 2023, the Digital Transformation and Technology Committee focused on a number of key areas, including but not limited to the activities described below. Specifically, the Digital Transformation and Technology Committee:

<u>Activity</u>	<u>Description</u>
<b>Digital Transformation</b>	<ul style="list-style-type: none"><li>• endorsed the Engineering Strategy defining the core Group-wide capabilities to enable digital transformation</li><li>• reviewed the CTOO transformation program to deliver on CTOO priorities, including digital transformation acceleration, and regularly monitored the progress made on digital milestones commitments</li><li>• received updates on select business initiatives illustrating the digital aspirations and transformation and was presented with target architecture for select corporate functions including Risk and Compliance</li></ul>
<b>Technology</b>	<ul style="list-style-type: none"><li>• received regular briefings by the CTOO on technology initiatives progress, including achieved milestones and main challenges</li><li>• reviewed the proposed governance and framework for investment prioritization, including investments categories and prioritization criteria</li><li>• received updates on the IT spend as part of various CTOO and business updates and provided recommendations as required</li><li>• reviewed the resourcing strategy across the CTOO organization and proposal for vendor management efficiency</li><li>• received deep dive reports on select focus topics including Agile implementation, Payments as a Service, Data Shared Services Strategy and Revised framework for the capitalization of internally developed software, having the Audit and Risk Committee Chairs attend the relevant agenda items</li></ul>
<b>Technology driven risks</b>	<ul style="list-style-type: none"><li>• held a joint session with the Risk Committee to discuss the Risk function IT infrastructure strategy, as well as IT security and cyber risk topics</li><li>• regularly informed the Board on the committee's activities, including technology-driven risks</li></ul>

### **Sustainability Advisory Committee**

The Sustainability Advisory Committee, established in February 2021, assists the Board, in an advisory capacity, in fulfilling its oversight duties in respect of the development and execution of the Group's sustainability strategy and ambitions, and monitoring and assessing the effectiveness of the respective sustainability programs and initiatives. Its responsibilities include advising on the sustainability strategy and ambitions and ensuring actions are being taken to accomplish them, advising on sustainability metrics and tracking and, monitoring related progress, and the engagement with key internal and external stakeholders, including

clients, employees, investors, ESG rating agencies, non-governmental organization, policymakers, regulators, and representatives of the business community and society. Activities of the Sustainability Advisory Committee during 2022 included periodic reviews of the strategy execution progress, receiving updates on the bank's progress with respect to ESG products, services, and advisory, the Diversity & Inclusion strategy and climate-related and sustainability risks, as well as holding a targeted session on the mitigation of greenwashing risk. The committee also received progress updates on the 2022 Sustainability Report, as well as on the 2022 TCFD Report.

### **Former members of the Board**

Information about former members of the Board is available on our website at [credit-suisse.com/annualreporting](http://credit-suisse.com/annualreporting).

### **Honorary Chairman of Credit Suisse Group AG**

Rainer E. Gut, born 1932, Swiss Citizen, was appointed Honorary Chairman of the Group in 2000 after he retired as Chairman, a position he had held from 1986 to 2000. Mr. Gut was a member of the board of Nestlé SA, Vevey, from 1981 to 2005, where he was vice-chairman from 1991 to 2000 and chairman from 2000 to 2005. As Honorary Chairman, Mr. Gut does not have any function in the governance of the Group and does not attend the meetings of the Board.

### **Secretaries of the Board**

Joan E. Belzer, born 1965, Swiss and US citizen

Roman Schärer, born 1981, Swiss citizen

## **206 Corporate Governance**

## Executive Board

### Membership

The Executive Board is the most senior management body of the Group. Its members are appointed by the Board. Prior to the appointment of an Executive Board member, the terms and conditions of the individual's employment contract with the Group are reviewed by the Compensation Committee. The Executive Board currently consists of 11 members. The composition of the Executive Board of the Group and the Bank is identical, with the exception of André Helfenstein, who is a member of the Executive Board of the Group, but not the Bank.

### Executive Board changes

The Group announced a number of changes to the Executive Board for 2022. Effective August 1, 2022, Ulrich Körner was appointed Group CEO by the Board, succeeding Thomas Gottstein, who stepped down from the Executive Board. In addition, the following individuals joined the Executive Board as new members during 2022: Francesco De Ferrari as CEO Wealth

Management, effective January 1, 2022, and regional CEO of EMEA, effective August 21, 2022 (after serving in this role on an ad interim basis since January 2022); Joanne Hannaford as CTOO and David Wildermuth as CRO, both effective January 1, 2022; Christine Graeff as Global Head of People, effective February 1, 2022; Edwin Low as regional CEO of APAC, effective June 1, 2022; Markus Diethelm as GC, effective June 15, 2022; Francesca McDonagh as COO, effective September 19, 2022; Dixit Joshi as CFO, effective October 1, 2022; and Nita Patel as CCO, effective November 1, 2022. The following individuals stepped down from the Executive Board during 2022: Antoinette Poschung, former Global Head of Human Resources, effective February 1, 2022; Helman Sitohang, former regional CEO of APAC, effective June 1, 2022; Romeo Cerutti, former GC, effective June 15, 2022; David Mathers, former CFO, effective October 1, 2022; Christian Meissner, former CEO Investment Bank and regional CEO of Americas, effective October 27, 2022; and Rafael Lopez Lorenzo, former CCO, effective November 1, 2022. In connection with the organizational structure effective as per January 1, 2022, André Helfenstein was appointed regional CEO of Switzerland in addition to his role as CEO Swiss Bank.

---

<sup>1</sup> Subject to regulatory approval.

### Responsibilities

The Executive Board is responsible for the day-to-day operational management of the Group under the leadership of the CEO.

As part of its main duties and responsibilities, the Executive Board:

- establishes the strategic business plans for the Group overall as well as for the principal businesses, subject to approval by the Board;

- appoints and dismisses senior managers, with the exception of managers from Internal Audit, and periodically reviews senior management talent across the Group and talent development programs;
- reviews and approves business transactions, including mergers, acquisitions, establishment of joint ventures and establishment of subsidiary companies; and
- approves key policies for the Group.

- regularly reviews and coordinates significant initiatives, projects and business developments in the divisions and the corporate functions, including important risk management matters;
- regularly reviews the consolidated and divisional financial performance, including progress on key performance indicators, as well as the Group's capital and liquidity positions and those of its major subsidiaries;

#### **Executive Board committees**

The Executive Board has a number of standing committees, which meet regularly throughout the year and/or as required. These committees are:

- Executive Board Risk Management Committee (ExB RMC): co-chaired by the Group's CEO, CRO and CCO: Replaces the Internal Control System and Position & Client Risk cycles of

the former Capital Allocation and Risk Management Committee (CARMC) and the former Executive Board Risk Forum. The ExB RMC is primarily responsible for steering and monitoring the development and execution of the Group’s risk strategy, approving risk appetite across all risk types for the Group and its divisions, as well as reviewing the aggregate and highest risk exposures, major risk concentrations and key non- financial risks. The ExB RMC approves risk limit applications that require final approval by the Risk Committee or the Board. The ExB RMC is also responsible for assessing the appropriateness and efficiency of the internal control system and serves as an escalation point for risk issues raised by subordinated risk committees or Executive Board members.

- Group Capital Allocation and Liability Management Committee (Group CALMC) replaces the Asset & Liability Management cycle of the former CARMC. Group CALMC reviews the funding and balance sheet trends and activities, plans and monitors regulatory and business liquidity requirements and internal and regulatory capital adequacy. Group CALMC also reviews and proposes the contingency funding plan for approval by the Board, reviews the position taking of interest rate risk in the banking book and decides on changes in approaches relating to investment of own equity. Further, it sets internal targets, approves and reviews adherence to internal targets for capital allocation, funding, liquidity and capital management actions, including the review and monitoring of share repurchases.
- The Credit Suisse AG Parent Capital Allocation, Liability and Risk Management Committee (Credit Suisse AG Parent CAL-RMC) reviews the capital, liquidity and funding trends and activities of Credit Suisse AG (Bank parent company). The CS AG Parent CALRMC reviews and challenges the financial and capital plans of major subsidiaries of the Bank parent company, including key risks and key dependencies, such as dividends or other capital repatriations from the major subsidiaries to the Bank parent company, ahead of approvals by the respective subsidiary governance bodies. The committee also monitors and reviews the Bank parent company’s aggregate risk profile, in particular the Bank parent company-specific vulnerabilities, and approves risk appetite for the Bank parent company and its branches.
- Valuation Risk Management Committee (VARMC): the VARMC is responsible for establishing policies regarding the valuation of certain material assets and the policies and calculation methodologies applied in the valuation process. Further, the VARMC is responsible for monitoring and assessing valuation risks, reviewing inventory valuation conclusions and directing the resolution of significant valuation issues.
- Group Conduct Board (GCB): the GCB (co-chaired by the Global Head of People together with one of the other Executive Board members appointed to the GCB on an annually rotating basis) is responsible for overseeing conduct matters and ensuring consistency and alignment of practices across the Group. The GCB oversees the global disciplinary process and measures and serves as a review panel to consider potential significant events and individual compensation. The GCB also reviews findings from conduct related investigations

and considers these in the context of determining disciplinary outcomes.

- Group Values and Culture Board (GVCB): the Executive Board is in the process of setting up the GVCB, which will have responsibility for establishing and determining the governance framework for the management of culture and values related matters throughout the Group. The GVCB will be co-chaired by the CEO, the Global Head of People and the CRO. It is planned that the GVCB will begin activities in the second quarter of 2023.

The Group appoints a conduct and ethics ombudsperson who is accountable directly to the CEO and the GCB. The ombudsperson’s role is to serve as a point of immediate escalation when sexual harassment claims arise and to ensure there is appropriate awareness of and attention to such claims. The ombudsperson works with our Compliance, General Counsel and People functions as well as our business divisions to review our relevant global training programs, policies and protocols, so that they can be further enhanced as part of our efforts to prevent sexual harassment at work and to make sure all cases are managed in a fair, accurate and consistent way within our global framework.

- Refer to “Risk management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on our risk management oversight.

#### Executive Board mandates

Our Executive Board members may, similar to our Board members, assume board or executive level or other roles in companies and organizations outside of the Group, which are collectively referred to as mandates. According to the Group’s AoA (Chapter IV, Section 3, The Executive Board, Art. 20f), the number of mandates Executive Board members may hold in listed companies and other organizations outside of the Group is subject to certain restrictions, in order to comply with the Swiss Code of Obligations and to ensure that our Executive Board members dedicate sufficient time to fulfil their executive roles.

The limitations on mandates assumed by Executive Board members outside of the Group are summarized in the table below.

---

#### Type of mandate and limitation – Executive Board

Type of mandate	Limitation
Listed companies	No more than one other mandate
Other legal entities <sup>1</sup>	No more than two mandates
Legal entities on behalf of the Group <sup>2</sup>	No more than ten mandates
Charitable legal entities <sup>3</sup>	No more than ten mandates

<sup>1</sup> Includes private non-listed companies.

<sup>2</sup> Includes memberships in business and industry associations.

<sup>3</sup> Also includes honorary mandates in cultural or educational organizations.

No Executive Board member holds mandates in excess of these restrictions. The restrictions shown above do not apply to mandates of Executive Board members in legal entities controlled by the Group, such as subsidiary boards.

- Refer to “Mandates” in Board of Directors for further information.

## Audit

### External Audit

External Audit forms an integral part of the Group's corporate governance framework and plays a key role by providing an independent assessment of our operations and internal controls.

- Refer to "Audit Committee" in Board of Directors – Board committees for further information on the responsibilities of the audit committee.

### Principal external auditor

The Group retains a single global audit firm as its principal external auditor to perform both the statutory (financial) audit and the regulatory audit work mandated by FINMA. The AGM elects the statutory auditor annually, while the Board is responsible for the appointment of the regulatory auditor.

Our principal external auditor is PwC, Birchstrasse 160, 8050 Zurich, Switzerland. The mandate was first given to PwC for the fiscal year ending December 31, 2020. The Group is not subject to mandatory external audit firm rotation requirements; however, the lead audit partners are subject to periodic rotation requirements. Audit partner rotation is key to ensuring the highest level of audit quality. In general, audit partners with key roles or signing obligations for the Group or material Group entities are subject to a maximum of five years of service. Audit partners with roles overseeing non-material Group entities or serving a supplemental role are subject to a maximum of seven years of service. Specialist partners, including, but not limited to, IT, valuation, tax and forensic areas are not subject to mandated rotation. The lead Group engagement partners are Matthew Falconer, Global Lead Partner, Matthew Goldman, Group Engagement Partner and Andrin Bernet, Lead Regulatory Audit Partner.

- Refer to "Audit Committee" in Board of Directors – Board committees for further information.

### Governance

The Audit Committee monitors and pre-approves the fees to be paid to the principal external auditor for its services. It has developed and approved a policy on the engagement of public accounting firms that is designed to help ensure that the independence of the external auditor is maintained at all times.

The policy limits the scope of services that the principal external auditor may provide to us or any of our subsidiaries in connection with its audit and stipulates certain permissible types of non-audit services, including audit-related services and tax services that have been pre-approved by the Audit Committee. The principal external auditor is required to report periodically to the Audit Committee about the scope of the services it has provided and the fees for the services it has performed to date. The principal external auditor also provides a report as to its independence to

the Audit Committee at least once a year. In accordance with our pre-approval policy and as in prior years, all non-audit services provided in 2022 were pre-approved.

The fees paid to PwC as the Group's principal external auditors for the financial year 2022 and 2021 are provided in the following table.

### Fees paid to the principal external auditor

for financial year	2022	2021	% change
<b>Fees (CHF million)</b>			
Audit services <sup>1</sup>	76.4	69.2	10
Audit-related services <sup>2</sup>	1.5	2.7	(44)
Tax services <sup>3</sup>	0.2	0.3	(33)

- 1 Audit services include the integrated audit of the Group's consolidated and statutory financial statements, interim reviews and comfort and consent letters. Additionally, they include all assurance and attestation services related to the regulatory filings of the Group and its subsidiaries. Audit fees exclude value-added taxes.
- 2 Audit-related services are primarily in respect of: (i) reports related to the Group's compliance with provisions of agreements or calculations required by agreements; (ii) accounting advice; (iii) audits of private equity funds and employee benefit plans; and (iv) regulatory advisory services.
- 3 Tax services are in respect of tax compliance and consultation services, including: (i) preparation and/or review of tax returns of the Group and its subsidiaries; (ii) assistance with tax audits and appeals; and (iii) confirmations relating to the Qualified Intermediary status of Group entities.

The principal external auditor attends all meetings of the Audit Committee and reports on the findings of its audit and/or interim review work. The Audit Committee reviews the principal external auditor's audit plan on an annual basis and evaluates the performance of the principal external auditor and its senior representatives in fulfilling their responsibilities. Moreover, the Audit Committee recommends to the Board the appointment or replacement of the principal external auditor, subject to shareholder approval as required by Swiss law.

### Special auditor for capital increases

The 2022 AGM re-elected, pursuant to Art. 21 of our AoA, the firm BDO AG, Fabrikstrasse 50, 8031 Zurich, Switzerland, as special auditor for the purposes of issuing the legally required report for capital increases in accordance with Article 652f of the Swiss Code of Obligations, mainly relating to the valuation of companies in consideration of the qualified capital increases involving contributions in kind. BDO AG provided services in 2022 in connection with the Group's capital increases. As part of the amendments to the AoA proposed at the 2023 AGM, the Board proposes to delete Art. 21 of the AoA, thus removing the requirement for an election of the special auditors by the shareholders. While the preparation of an independent report in connection with capital increases is still required, the Board would have the authority to mandate an appropriate third-party to prepare such reports rather than proposing the election of a special auditor at the AGM.

Additional information

### **Banking relationships with Board and Executive Board members and related party transactions**

The Group is a global financial services provider. Many of the members of the Board and the Executive Board, their close family members or companies associated with them maintain banking relationships with us. The Group or any of its banking subsidiaries may from time to time enter into financing and other banking agreements with companies in which current members of the Board or the Executive Board have a significant influence as defined by the SEC, such as holding executive and/or board level roles in these companies. With the exception of the transactions described below, relationships with members of the Board or the Executive Board and such companies were in the ordinary course of business and entered into on an arm's length basis at prevailing market conditions. Also, unless otherwise noted, all loans to members of the Board, members of the Executive Board, their close family members or companies associated with them were made in the ordinary course of business, were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and did not involve more than the normal risk of collectability or present other unfavorable features. As of December 31, 2022, 2021 and 2020, there were no loan exposures to such related parties that were not made in the ordinary course of business and at prevailing market conditions.

- Refer to “Board loans” and “Executive Board loans (audited)” in V – Compensation – Supplementary information for the outstanding loans to members of the Board and the Executive Board.

### **Related party transactions**

On February 9, 2023, the Group announced that it had taken further important steps to progress the carve-out of CS First Boston as a leading capital markets and advisory business through the acquisition of The Klein Group LLC, the investment

banking business as well as the registered broker-dealer of M. Klein & Company LLC (the seller). The Group also announced the appointment of former Board member Michael Klein as CEO of Banking and regional CEO of Americas, as well as designated CEO of CS First Boston and a member of the Executive Board. Both Michael Klein's appointment to the Executive Board and the acquisition of The Klein Group LLC are subject to regulatory approval. In addition, on October 27, 2022, the Group and The Klein Group LLC entered into an engagement letter, under which The Klein Group LLC has been engaged to provide strategic advice and assistance to the Group in connection with the proposed carve-out of CS First Boston, whereby it was agreed that Michael Klein would devote significant time and attention to the services to be provided by The Klein Group LLC to the Group.

- Refer to “Note 31 – Related parties” in VI – Consolidated financial statements – Credit Suisse Group for additional information.

### **Other information**

#### **Complying with rules and regulations**

We fully adhere to Swiss corporate law and the principles set out in the Swiss Code of Best Practice for Corporate Governance, dated August 28, 2014, including its appendix stipulating recommendations on the process for setting compensation for the Board and the Executive Board.

In connection with our primary listing on the SIX Swiss Exchange, we are subject to the Directive on Information relating to Corporate Governance, dated June 18, 2021 (in effect since October 1, 2021). Our shares are also listed on the NYSE in the form of ADS and certain of the Bank's exchange traded notes are listed on Nasdaq. As a result, we are subject to certain US rules and regulations. We adhere to the NYSE's and Nasdaq's corporate governance listing standards (NYSE and Nasdaq standards), with a few exceptions where the rules are not applicable to foreign private issuers.

---

## Regulations

The following are the significant differences between Credit Suisse corporate governance standards and the corporate governance standards applicable to US domestic issuers listed on the NYSE and Nasdaq:

<u>Topic</u>	<u>NYSE and Nasdaq standards</u>	<u>Swiss standards</u>
<b>Approval of employee benefit plans</b>	The NYSE and Nasdaq require shareholder approval of the establishment for, and material revisions to, certain equity compensation plans.	Swiss law requires shareholder approval of the creation for conditional capital used for the issuance of shares for employee benefit plans and other equity compensation plans, as well as approval of the remuneration of executives, but does not require shareholder approval of the terms of such plans.
<b>Risk assessment and management</b>	The NYSE allocates the responsibility for the discussion of guidelines and policies governing the process by which risk assessment and risk management is undertaken to the Audit Committee.	At the level of the Group, these duties are assumed by the Risk Committee, in line with Swiss regulatory standards and expectations. Whereas our Audit Committee members satisfy the NYSE as well as Nasdaq independence requirements, our Risk Committee may include a minority of non-independent members.
<b>Independence of nominating and corporate Governance Committee</b>	The NYSE and Nasdaq require that all members of the nominating and corporate governance committee be independent.	The Group's Governance and Nominations Committee is currently composed entirely of independent members, but according to its charter, may also include non-independent members.
<b>Reporting by the Board</b>	The NYSE requires that certain board committees report specified information directly to shareholders.	Under Swiss law, only the Board reports directly to the shareholders, and the committees submit their reports to the full Board.
<b>Appointment of the external auditor</b>	The NYSE and Nasdaq require that an Audit Committee of a listed company comply with and have the authority necessary to comply with the requirements of Rule 10A-3 of the Securities Exchange Act of 1934. Rule 10A-3 requires the Audit Committee to be directly responsible for the appointment, compensation, retention and oversight of the external auditor unless there is a conflicting requirement under home country law.	Under Swiss law, the appointment of the external auditor for accounting purposes must be approved by the shareholders at the AGM based on the proposal of the Board, upon the recommendation of the Audit Committee.
<b>Audit Committee charter</b>	The Nasdaq requires the Audit Committee to review and assess the adequacy of its charter on an annual basis.	Our Audit Committee's charter only requires review and assessment from time to time in accordance with applicable Swiss laws and regulatory standards.
<b>Executive sessions</b>	The NYSE and Nasdaq require the board of directors to meet regularly in executive sessions composed solely of independent directors. Our Board meets regularly in executive sessions comprising all directors, including any directors determined not to be independent. However, if any item discussed at the meeting raises a conflict of interest for any of our directors, such director may not participate in the related decision making.	In line with Swiss law, the Board must not include any directors who are also members of management.
<b>Quorums</b>	The Nasdaq requires that the company's by-laws provide for a quorum of at least 33 <sup>1</sup> / <sub>3</sub> % of the outstanding shares of the company's common stock for any meeting of the holders of common stock.	Consistent with Swiss corporate law, the Group's AoA (Chapter IV, Section 1, The General Meeting of Shareholders, Art. 12), call for a quorum in certain instances, but do not require a quorum of 33 <sup>1</sup> / <sub>3</sub> % or greater of the holders of the outstanding shares of common stock for any meeting of shareholders.
<b>Independence</b>	The NYSE and Nasdaq specify thresholds for the maximum permissible amount of (i) direct compensation that can be paid by the company to a director or an immediate family member thereof, outside of such director's directorship fees and other permitted payments; and (ii) payments between the company and another company at which such director or an immediate family member thereof is an executive officer, controlling shareholder, partner or employee.	Our independence standards do not specify thresholds for direct compensation or cross-company payments or revenues, but consider these facts in the overall materiality of the business relationship determination for independence purposes.

## Fiduciary duties and indemnification

The Swiss Code of Obligations requires directors and members of senior management to safeguard the interests of the corporation and, in connection with this requirement, imposes the duties of care and loyalty on directors and members of senior management. While Swiss law does not have a specific provision on conflicts of interest, the duties of care and loyalty are generally understood to disqualify directors and members of senior management from participating in decisions that could directly affect them. Directors and members of senior management are personally liable to the corporation for any breach of these provisions.

The Group's AoA and the Bank's AoA do not contain provisions regarding the indemnification of directors and officers. According to Swiss statutory law, an employee has a right to be indemnified by the employer against losses and expenses incurred by such person in the execution of such person's duties under an employment agreement, unless the losses and expenses arise from the employee's gross negligence or willful misconduct. It is our policy to indemnify current and former directors and/or employees against certain losses and expenses in respect of service as a director or employee of the Group, one of the Group's affiliates or another entity that we have approved, subject to specific conditions or exclusions. We maintain directors' and officers' insurance for our directors and officers.

## Fees and charges for holders of ADS

In November 2016, the Group entered into a deposit agreement with The Bank of New York Mellon as depositary for the ADS (Depositary). In February 2022, the deposit agreement with The Bank of New York Mellon was extended for an additional five years, retroactively effective November 22, 2021. In accordance with the deposit agreement, the Depositary may charge holders of our ADS, either directly or indirectly, fees or charges up to the amounts described below.

The Depositary collects its fees and related expenses for the delivery and surrender of ADS directly from investors depositing or surrendering ADS for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees and expenses for making distributions to holders by deducting those fees and expenses from the amounts distributed or by selling a portion of distributable property to pay the fees and expenses. The Depositary may generally refuse to provide any services until its fees for those services are paid.

---

## Fees and charges for holders of ADS

### Fees

USD 5 (or less) per 100 ADS (or portion thereof)	For the issuance of ADS, including issuances resulting from a distribution of shares, share dividends, share splits and other property; for ADS issued upon the exercise of rights; and for the surrender of ADS for cancellation and withdrawal of shares.
USD 0.05 (or less) per ADS Registration or transfer fees	For any distribution of cash to ADS registered holders, including upon the sale of rights or other entitlements. For the transfer and registration of shares on our share register to or from the name of the Depositary or its agent when the holder deposits or withdraws shares.

### Charges

Expenses of the Depositary	For cable and facsimile transmissions (when expressly provided in the deposit agreement); and for converting foreign currency to US dollars.
Taxes and other governmental charges	Paid, as necessary, to the Depositary or the custodian who pays certain charges on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or applicable interest or penalty thereon.
Other charges	Paid, as necessary, to the Depositary or its agents for servicing the deposited shares.

## Amounts paid by the Depositary to the Group

In 2022, in accordance with the deposit agreement, the Depositary made payments to the Group in an aggregated amount of USD 2.6 million. The payments made to the Group comprised annual and revenue sharing payments. The expenses relating to the ADS program are reimbursed separately by the Depositary. The Depositary has also contractually agreed to provide certain ADS program-related services free of charge.

Under certain circumstances, including removal of the Depositary or termination of the ADS program by the Group, the Group is required to repay certain amounts paid to the Group and to compensate the Depositary for payments made or services provided on behalf of the Group.

<b>Supplementary information</b>	<b>246</b>
<b>Report of the Statutory Auditor</b>	<b>253</b>
	<b>219</b>

**Christian Gellerstad**  
Chair of the  
Compensation Committee

**Dear shareholders,**

In 2022 we faced an extremely challenging macro and geopolitical environment, with market uncertainty and client risk aversion impacting client volumes and banking activity. Our Group's performance in this challenging context has been unacceptable, triggering major decisions, starting with a comprehensive transformation strategy announced in October 2022 and the recruitment of a largely new Executive Board team. We are confident that we have laid the foundation for a much more resilient and successful organization, although this transformation journey will undoubtedly require an extraordinary and sustained commitment from our leadership teams and employees across the firm.

Since taking on the role of Chair of the Compensation Committee in April 2022, I have worked with my fellow Board members to address the challenge of combining overarching "pay for performance" requirements with the necessity to maintain an attractive and operational franchise during our transformation. In this balancing act, the Compensation Committee has frequently consulted with shareholders and regulators and has extensively incorporated the feedback received in its deliberation process. This has been extremely valuable in developing our approach to compensation going forward, and I would like to thank all those who took part for their time and commitment.

We remain mindful that our compensation framework and principles must fully align with the experience and successes of our clients and shareholders, and this letter sets out the difficult decisions taken with respect to compensation outcomes for 2022 and introduces our proposed approach for 2023 with the supporting rationale.

We have also made several improvements to this year's compensation report to enhance its clarity and presentation. In particular, we have introduced a new section called "Compensation at a glance", which follows this letter and provides a summary of the 2022 compensation outcomes and proposals for 2023 onwards.

**Group performance and the variable compensation pool**

As explained, the Group's financial results in 2022 included impacts from market-related elements, but also our strategic overhaul resulting in restructuring expenses and impairment of deferred tax assets, as well as the resolution of a number of legacy litigation cases, resulting in an unsatisfactory Group net loss attributable to shareholders of CHF 7.3 billion. In terms of adjusted results, the Group delivered an adjusted full year loss before taxes of CHF 1.2 billion. As a consequence, the Compensation Committee resolved that the Group variable incentive pool should be reduced significantly. The final outcome of CHF 1.0 billion is down 50% from 2021 levels, and down 66% from 2020 levels. This pool level was set at the minimum level considered appropriate to enable the honoring of contractual commitments and payment of formulaic bonuses in the relevant areas, and to keep potential franchise damage through key employee attrition at a manageable level.

- Adjusted results are non-GAAP financial measures. Refer to "Reconciliation of adjustment items" in II – Operating and financial review – Credit Suisse for further information.

In addition, to mitigate the cost and capital impact of variable incentives in 2022, and to strengthen alignment with the longer-term shareholder experience, the Compensation Committee determined that employees with Managing Director and Director titles were granted variable incentive compensation predominantly in the form of deferred share awards. In general, except as contractually required, the cash component was limited to a maximum of CHF 150,000 and, where permitted by local law, delivered as upfront cash awards, which are cash awards that must be repaid (on pro-rata basis) upon a voluntary termination of employment or in the event of other specified repayment conditions.

Moreover, the impact of performance underpins on some outstanding awards, combined with further decrease in our share price, have strongly impacted the value of outstanding deferred awards held by employees, demonstrating inherent alignment with shareholders. For example, the 2022 negative Group Return on Equity (ROE) and the divisional loss before taxes in the Investment Bank division have resulted in a CHF 55 million negative adjustment to outstanding performance share awards pursuant to the terms of the awards. Over the period from 2017 to 2021, the aggregate value of deferred variable compensation awarded has decreased by 63% from their initial grant value, down from CHF 4.7 billion to CHF 1.7 billion, assuming employees sold shares at the earliest opportunity following vesting. Assuming all of the awards initially made remained currently outstanding, and based on a share price at the end of 2022 of CHF 2.76, the aggregate value of deferred compensation would represent approximately CHF 1 billion, approximately 78% lower than the initial grant value.

**Executive Board compensation outcomes**

The threshold levels for each of the financial metrics under the new framework introduced for 2022 were not met. While continued progress against key strategic, cultural and risk objectives resulted in the non-financial elements being assessed close

to target, the formulaic application of the aggregate cap on the Executive Board variable compensation pool of 2% of Group income before taxes resulted in a zero variable compensation pool. As such, aggregate Executive Board compensation for 2022 consisted of CHF 32.2 million of fixed compensation only. This follows two years of constrained compensation levels for the Executive Board.

- Refer to “Compensation outcomes for 2022” in Executive Board compensation for further information.

### **Chief Executive Officer (CEO) compensation**

Mr. Körner was appointed Group CEO on August 1, 2022. His total compensation granted for 2022 amounted to CHF 2.5 million (including compensation for his role as an Executive Board member prior to becoming the Group CEO).

In terms of realized compensation for 2022, the Group CEO received CHF 2.5 million, which comprised CHF 2.3 million of base salary and CHF 0.2 million for pension and benefits.

- Refer to “Compensation of the Group CEO” in Executive Board compensation for further information.

### **Enhancements to the Group and Executive Board compensation framework**

Following the announcement of the revised Group strategy in October 2022, the Compensation Committee undertook a review and simplification of the compensation framework to ensure that it continues to motivate and incentivize employees appropriately. The deferral framework applied to Group employees has been closely aligned to peer practices, and variable incentive compensation has been awarded in a combination of immediate cash awards, deferred cash awards (including, in the form of upfront cash awards), and deferred share awards. For performance year 2022 and onwards, performance share awards and contingent capital awards will no longer be granted to employees including the Executive Board, however any such outstanding awards will continue to vest according to their terms and conditions.

For the Executive Board, the Compensation Committee agreed that the framework implemented in 2022 remains largely fit for purpose. Some refinements have been made to the financial metrics to place more focus on our core businesses over the next few years, while the non-financial elements have been streamlined to focus on critical transformation-related metrics where relevant.

Specifically, for 2023 we have:

- Incorporated financial metrics that reflect the “New Credit Suisse”, which are Core return on tangible equity (RoTE) and Core adjusted income before taxes; and
- Introduced a cost base target as a key yearly milestone to measure the successful execution of the transformation strategy against our cost reduction goals.
- Refer to “Compensation framework for Executive Board members for 2023” in Executive Board Compensation for further information.

In addition, the nature of the transformation announced in October 2022 led the Compensation Committee to re-evaluate the

appropriateness of two compensation design features introduced in 2022, namely the cap on aggregate Executive Board variable incentive compensation of 2% of income before taxes and the relative total shareholder return (RTSR) condition whereby variable compensation would be delivered entirely in the form of deferred share awards in the event of a ranking within the bottom quintile of the defined RTSR peer group. Recognizing that situations may arise where there may be the appearance of a conflict between the shorter-term and longer-term interests of the business, and the one-year focus of the cap and RTSR condition, the Compensation Committee has decided to suspend both features for the period 2023-2025, to ensure the ability to provide market-competitive compensation to our leadership team. While the aggregate cap is temporarily suspended, the individual caps on maximum annual variable incentive awards remain in place, namely 4x base salary for the CEO and 5x base salary for all other Executive Board members, excluding the Transformation Award. The Compensation Committee retains its overall discretion to ensure that compensation outcomes are aligned with underlying performance, and can evaluate extraordinary and unanticipated events in assessing potential adjustments to financial results for the purpose of determining performance against financial incentive targets.

### **Transformation Award for the 2023-2025 turnaround period**

In February 2023, the Compensation Committee granted a one-time Transformation Award to approximately 500 employees globally who hold senior leadership positions and other talent identified as being critical to the “New Credit Suisse” strategy. This will include the Executive Board members, subject to shareholder approval at the 2023 Annual General Meeting (AGM). The purpose of this award is to retain and motivate key managerial, business development, and expert resources across the Group to ensure efficient and timely delivery of the transformation, as well as full achievement of our publicly communicated 2025 Group RoTE and cost base reduction targets. The entire Board of Directors regards this initiative as critical to the successful execution of our strategy and has given it unanimous support.

- Refer to “Compensation at a glance” for further information.

### **CS First Boston incentive award**

In order to incentivize and retain the leadership of CS First Boston, a group of senior leaders is expected to be provided with an equity award to participate in the value of CS First Boston in the event of an initial public offering (IPO). Full details of these awards will be provided in connection with an IPO prospectus, if applicable.

### **Board of Directors compensation**

Aggregate compensation for the Board of Directors (Board), including compensation for certain Group Board members serving on subsidiary boards, was CHF 10.4 million, compared with the amount of CHF 13.0 million that was approved prospectively by shareholders at the 2022 AGM. Given the poor financial performance in 2022 and challenging situation for the firm at the

beginning of the three-year transformation, the Chairman proposed to voluntarily waive his chair fee of CHF 1.5 million for the 2022 AGM to 2023 AGM period, and this proposal was accepted by the Board. Following a benchmarking analysis of board chair pay at leading Swiss companies, the Chairman's total compensation will be adjusted from CHF 4.5 million to CHF 3.8 million starting from the 2023 AGM to 2024 AGM period. To enhance alignment with shareholders, the share portion of the Chairman's fees will be increased from the current 33% to 50%, such that his total compensation will be payable 50% in cash (base fee) and 50% in shares (chair fee), blocked for a period of four years. Furthermore, a new minimum shareholding requirement of 500,000 shares has been introduced for the Chairman, in line with the minimum shareholding requirement applicable to Executive Board members. For the 2023 AGM to 2024 AGM period, the aggregate Board compensation amount is proposed to be kept stable, at CHF 13.0 million.

- Refer to "Board of Directors compensation" for further information.

#### "Say-on-Pay" compensation proposal sat the 2023 AGM

The Compensation Committee and the Board of Directors understand that some of the compensation program actions we have taken diverge from what companies would implement in normal circumstances, but strongly believe that the extraordinary context in which the Group currently operates requires decisive measures. We look forward to the successful completion of our transformation, allowing for a timely return to more conventional compensation outcomes. With this in mind, at the 2023 AGM, we will be seeking shareholder support for the say-on-pay proposals described in the following table:

<u>Approved at 2022 AGM</u>	<u>Proposal for 2023 AGM</u>	<u>Explanation for 2023 proposal</u>
<b>Executive Board compensation</b>		
<ul style="list-style-type: none"> <li>• Fixed compensation for 2022-2023 AGM period: CHF 34 million maximum amount</li> <li>• 2021 STI award CHF 8.6 million</li> <li>• Share-based replacement awards for new members: CHF 12.1 million</li> <li>• Not applicable</li> </ul>	<ul style="list-style-type: none"> <li>• Fixed compensation for 2023-2024 AGM period: CHF 34 million maximum amount</li> <li>• Not applicable</li> <li>• Not applicable</li> <li>• Transformation award (fair value at grant): CHF 30.1 million</li> </ul>	<ul style="list-style-type: none"> <li>• Same level as prior year</li> <li>• Base salary: CHF 2.7 million for CEO with a maximum of CHF/USD 2.2 million for other Executive Board members</li> <li>• Not applicable</li> <li>• Not applicable</li> <li>• Maximum award value at grant of CHF 70 million (if all performance conditions met)</li> </ul>
<b>Board of Directors compensation</b>		
<ul style="list-style-type: none"> <li>• Board compensation for 2022-2023 AGM period: CHF 13 million maximum amount</li> </ul>	<ul style="list-style-type: none"> <li>• Board compensation for 2023-2024 AGM period: CHF 13 million maximum amount</li> </ul>	<ul style="list-style-type: none"> <li>• Same as prior year level</li> <li>• Base Board fee: CHF 250,000 for Board members, CHF 1.9 million for Chairman</li> </ul>

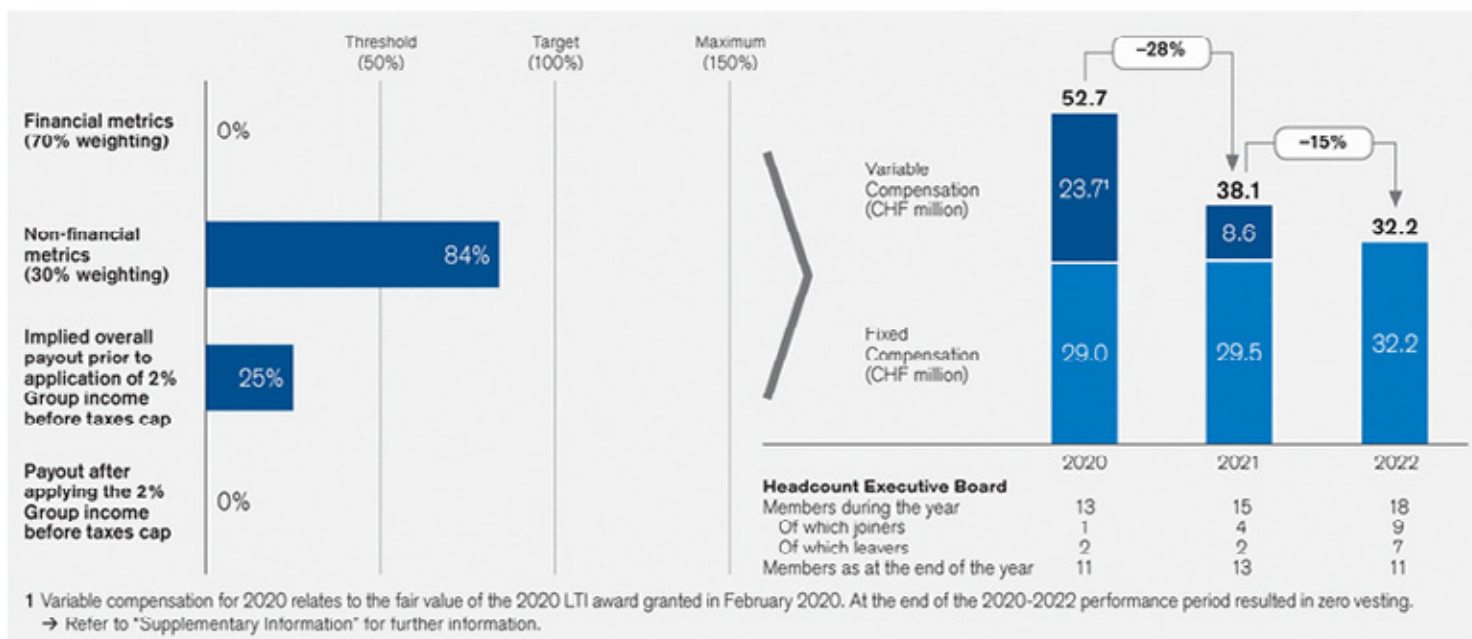

Further information on each of these proposals will be contained in the AGM invitation and will also be available at [credit-suisse.com/agm](https://www.credit-suisse.com/agm).

On behalf of the Compensation Committee, I would like to wholeheartedly thank our employees and the Executive Board for their continued support during this extremely difficult compensation round for Credit Suisse Group, as well as thank shareholders again for their input and feedback over the last 12 months. The Compensation Committee members remain committed to supporting the Group's transformation process and are very confident and truly excited about the journey ahead.

/s/ Christian Gellerstad  
 Christian Gellerstad  
 Chair of the Compensation Committee  
 Member of the Board  
 March 2023

### Executive Board compensation outcomes

The total variable compensation pool for the Executive Board is determined based on the achievement of annual financial (70% weighting) and non-financial objectives (30% weighting). For 2022, none of the threshold performance levels for the financial metrics were met. While the non-financial achievements were close to target, the Compensation Committee also considered the Group’s overall financial and share price performance during 2022. Ultimately, the application of the cap on the Executive Board’s variable compensation pool, based on 2% Group income before taxes, resulted in zero variable compensation for the Executive Board for 2022, given the Group’s reported loss.

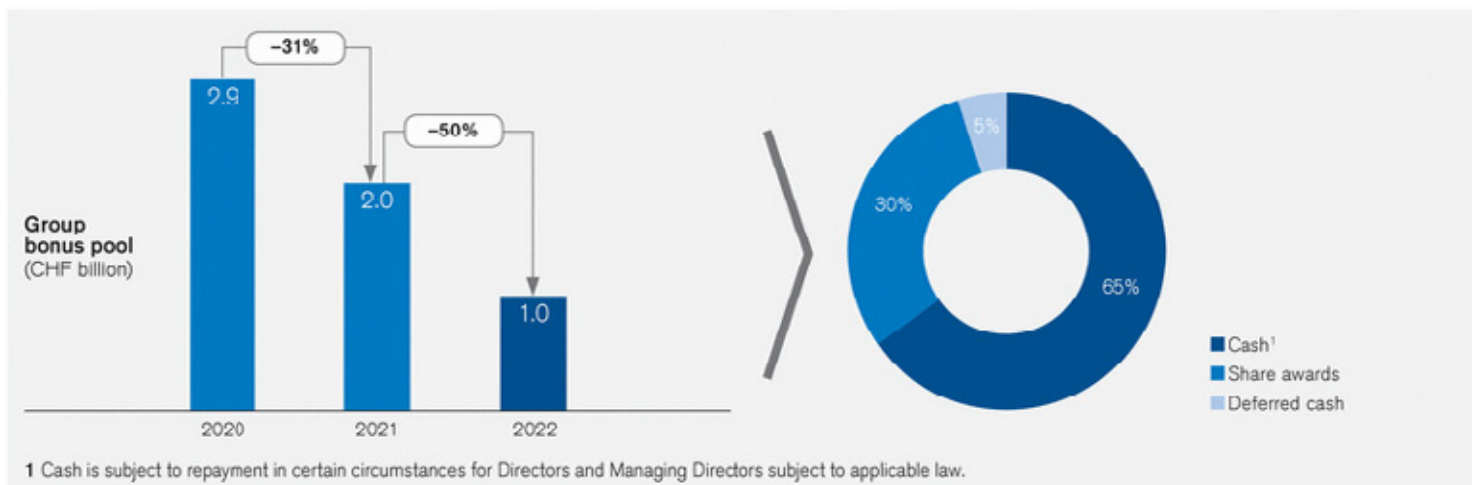

- Refer to "Executive Board compensation" for further information.

### Group variable compensation outcomes

The Group variable incentive compensation awarded for 2022 was significantly constrained by the Group’s poor financial performance.

The total pool of CHF 1,000 million is 50% lower than the 2021 pool and 66% lower than in 2020. Approximately 34% of the variable incentive compensation awarded is deferred, with a vesting period of at least three years after award grant.

Other variable compensation awarded in 2022 included CHF 497 million for the Strategic Delivery Plan (SDP) awards granted to most Managing Directors and Directors to incentivize the longer-term delivery of the Group’s strategy, and CHF 367 million of retention awards to key talent and senior management in the form of deferred cash (subject to clawback) and deferred share-based awards, mostly to employees in the Investment Bank division.

- Refer to “Group compensation” for further information.

## Transformation Award aligned with implementation of the Group's strategy over 2023-2025

The Transformation Award is a one-time award consisting of a deferred share-based award for Executive Board members (subject to shareholder approval at the 2023 AGM) and, for employees who are not members of the Executive Board, a combination of a deferred share-based award and a deferred cash award. The deferred share-based award is subject to achievement of performance conditions being achieved by the end of the 2023-2025 performance period. The Transformation Award is considered critical to retain and motivate key individuals to deliver against our ambitious transformation journey through what is expected to be a highly challenging period. The design is intended to:

- strongly align management's interests with those of shareholders through stretch performance conditions and increased exposure to equity;
- provide a clear focus on return metrics to incentivize sustainable value creation for shareholders;
- motivate delivery of objectives through 2023-2025, to complement the existing annual framework; and
- payout of deferred share-based awards subject to performance conditions, with no payout for results below threshold level.

The eligibility and key features are described in the following table.

	General Features	Executive Board specific features
Quantum	<ul style="list-style-type: none"> <li>▪ Aggregate fair value<sup>1</sup> at grant of CHF 230.3 million (maximum award value of CHF 350 million), including the Executive Board members</li> <li>▪ Typically, approximately 0.4x to 0.9x of annual variable compensation of participant (excluding Executive Board members)</li> <li>▪ The number of shares to be awarded is based on dividing the award value by CHF 3.82<sup>3</sup></li> </ul>	<ul style="list-style-type: none"> <li>▪ Aggregate fair value<sup>1</sup> at grant CHF 30.1 million (maximum award value at grant of CHF 70 million)</li> <li>▪ Median 1.5x yearly target of participant's variable compensation</li> <li>▪ Maximum award value based on share price at end of 2025 is capped at 3x initial award value (i.e. CHF 210 million) and the number of shares vesting will be reduced accordingly if the limit is reached</li> </ul>
Participants	<ul style="list-style-type: none"> <li>▪ ~500 employees in senior leadership positions and identified as critical talent required to deliver the Group's strategic goals, approximately 1% of total employees</li> </ul>	<ul style="list-style-type: none"> <li>▪ All Executive Board members including the Group CEO</li> </ul>
Award type	<ul style="list-style-type: none"> <li>▪ 50% deferred cash / 50% deferred share award (excluding Executive Board members)</li> </ul>	<ul style="list-style-type: none"> <li>▪ 100% deferred share award</li> </ul>
Vesting	<ul style="list-style-type: none"> <li>▪ No vesting of share award if share price is below CHF 3.82<sup>3</sup> as at December 31, 2025</li> <li>▪ Deferred cash award (excluding Executive Board members): ratable vesting over two annual installments from grant</li> <li>▪ Share award: 100% cliff vesting at end of 2025</li> </ul>	<ul style="list-style-type: none"> <li>▪ Share award: 100% cliff vesting at end of 2025</li> </ul>

Deferred share award performance conditions	Measurement period	Weighting	Threshold (33% of award value)	Target* (67% of award value)	Maximum (100% of award value)
Group RoTE (reported)	FY2025	70%	5%	6%	7.5%
Cost base <sup>2</sup> (CHF billion)	FY2025	30%	CHF 15.0	< CHF 14.5	CHF 14.0

\*Performance conditions aligned to 2025 financial targets

<sup>1</sup> The fair value of the Transformation Awards as of the date of grant is determined using a probabilistic valuation method applied by Deloitte LLP.

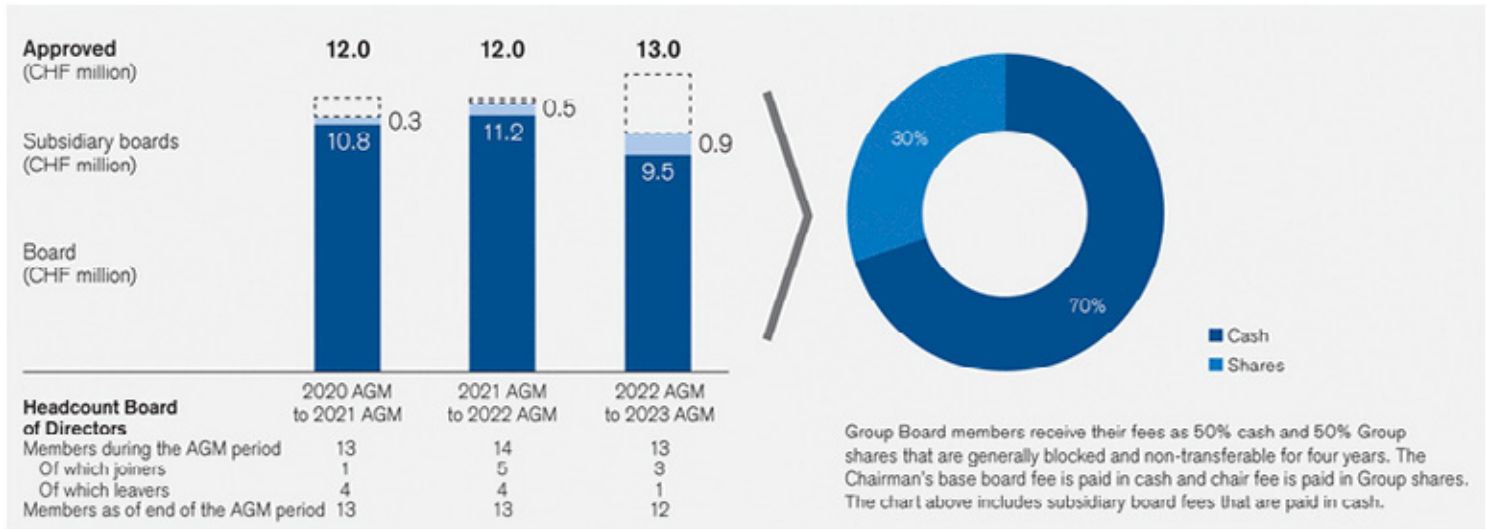

<sup>2</sup> Cost base refers to adjusted operating expenses at constant 2022 FX rates and on constant perimeter, before taking into account the Securitized Products transaction and other divestments.

<sup>3</sup> Price represents the subscription price for private placement to qualified investors in fourth quarter of 2022.

- Refer to "Group compensation" for further information.

## Board of Directors compensation

Aggregate compensation for the Board, including compensation for certain Group Board members serving on subsidiary boards, was CHF 10.4 million, compared with CHF 13.0 million approved by shareholders and CHF 11.7 million paid for the prior year.

- Refer to “Board of Directors compensation” for further information.

## 224 Compensation

Compensation framework, policy, and governance

### Compensation strategy and objectives

Consistent with prior years, our key compensation objectives are to maintain compensation practices that:

- foster a **performance culture** based on merit that differentiates and rewards excellent performance;
- **attract and retain employees**, and motivate them to achieve results with integrity and fairness;
- **balance the mix of fixed and variable** compensation to appropriately reflect the value and responsibility of the role performed, and to influence appropriate behaviors and actions;
- promote **effective risk management** practices that are aligned with the Group's compliance and control cultures;
- create a culture that adheres to **high standards of conduct and behavior aligned with values**, through a system of applying both malus and rewards;
- encourage **teamwork and collaboration** across the Group;
- achieve a **balanced distribution of profitability between shareholders and employees** over the long term, subject to Group performance and market conditions; and
- take into account the long-term performance of the Group, in order to **create sustainable value for shareholders**.

### Executive Board compensation framework

#### Executive Board compensation framework 2022

As set out in the 2021 Compensation Report, a revised framework was introduced for the Executive Board for 2022. The aggregate Executive Board variable compensation pool is determined based on the achievement of annual financial (70% weighting) and non-financial (30% weighting) performance objectives set at the beginning of the year. To determine the aggregate Executive Board variable compensation pool, the Compensation Committee reviews the Group's performance against these objectives at the end of the performance period. In making its assessment, the Compensation Committee also takes into account how the results compare with those delivered in the prior year, relative peer performance, and market positioning and trends. The total pool amount for 2022 was subject to a cap of 2% of Group income before taxes excluding any items that the Compensation Committee determines are not reflective of underlying performance, resulting in no variable compensation awarded for 2022.

#### Executive Board compensation design and refinements for 2023

Following its annual review of the Executive Board compensation framework, the Compensation Committee concluded that the overall Executive Board compensation design remains largely fit for purpose, but that several refinements to the annual framework were required for the period 2023 to 2025. First, the financial

performance conditions used to determine the Executive Board variable compensation pool will focus on Core return on tangible equity and Core adjusted income before taxes, as well as cost base target. Second, the Compensation Committee re-evaluated the appropriateness of two compensation design features introduced in 2022, namely the cap on aggregate Executive Board variable incentive compensation of 2% of income before taxes and the RTSR condition whereby variable compensation would be delivered entirely in the form of deferred share awards in the event of a ranking within the bottom quintile of the defined RTSR peer group. Recognizing that situations may arise where there may be the appearance of a conflict between the shorter-term and longer-term interests of the business, and the one-year focus of the cap and RTSR condition, the Compensation Committee has decided to suspend both features for the period 2023-2025, to ensure the ability to provide market-competitive compensation to our leadership team. While the aggregate cap is temporarily suspended, the individual caps on maximum annual variable incentive awards (excluding the Transformation Award) remain in place, namely 4x base salary for the CEO and 5x base salary for all other Executive Board members. The Compensation Committee retains its overall discretion to ensure that compensation outcomes are aligned with underlying performance, and can evaluate extraordinary and unanticipated events in assessing potential adjustments to financial results for the purpose of determining performance against financial incentive targets.

## Compensation framework for Executive Board members for 2023

Variable compensation for Executive Board members will continue to be granted as 70% in deferred share awards subject to underpins. The remaining portion will be granted as cash awards, with 15% as immediate cash, and 15% deferred cash vesting in equal tranches over the second, third and fourth anniversaries of grant. In line with the simplification of the compensation framework for the overall Group, contingent capital awards (CCA) will no longer form part of the Executive Board compensation design.

Components		Vesting (Year 0 = performance year)						
		Year 0	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Fixed	Salary and RBAs <sup>1</sup>							
	Pension and Benefits							
Variable	Cash (~15% of VC)							
	Deferred Cash (~15% of VC)			1/3	1/3	1/3		
	Share awards (~70% of VC)					1/3	1/3	1/3

**Minimum shareholding requirement**

- Group CEO and Investment Bank CEO<sup>2</sup>: **1,000,000 shares**
- Other Executive Board members: **500,000 shares**

**Share award threshold requirements** – forfeiture of outstanding tranches due for settlement in the following year, if either:

- CET1 ratio falls below FINMA requirement<sup>2</sup> + 50 bps at the end of the year; or
- Reported loss before taxes for the full year.

The Compensation Committee has the discretion to review special circumstances, for example if major legacy items are not reflective of underlying performance.

<sup>1</sup> Role-based allowance (RBA) in relation to one Executive Board member who is classified as a United Kingdom Prudential Regulation Authority Material Risk Taker (UK PRA MRT).

<sup>2</sup> Refers to the statutory minimum requirement plus any additional amount FINMA may require for Credit Suisse specifically. Refer to "Swiss capital and leverage requirements for Credit Suisse" in Ill – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Regulatory framework for further information.

<sup>3</sup> This position was vacant as of December 31, 2022.

Some refinements have been made to the financial metrics for 2023 to place more focus on our core businesses and cost base reduction goals, and the non-financial elements have been streamlined to focus on critical transformation-related metrics where relevant, as shown in the table below.

### Financial metrics (targets to be disclosed retrospectively)

Group metrics	Weighting
• Core return on tangible equity (RoTE) <sup>1</sup>	25%
• Core adjusted income before taxes	15%
• Cost base <sup>2</sup>	10%
• Relative total shareholder return (RTSR) <sup>3,4</sup>	10%
• CET1 capital ratio	10%

### Non-financial metrics

	Weighting
<b>Risk and Control</b>	
• Foster a <b>strong risk culture</b> across the first and second lines of defense	
• Disciplined implementation of and adherence to the <b>financial and non-financial risk frameworks</b>	10%
• Progress against <b>regulatory remediation</b> plans	
<b>Values and Culture</b>	
• <b>Achieve our Diversity and Inclusion goals</b>	
• Improve <b>client and customer satisfaction</b>	10%
• Demonstrate strong <b>leadership</b> with robust succession planning	

- Sustainability**
- Growth in **AuM penetration** according to **Sustainable Investment Framework** classification
  - Growth in **sustainable finance** volume levels, progressing towards our CHF 300 billion goal by 2030
  - Positive contribution to the trajectory of our net zero 2030 and 2050 carbon reduction goals, including adherence to lending objectives in critical areas
  - Support positioning of Credit Suisse in terms of sustainability engagement and thought leadership, measured by external ESG rating agencies, research and thought leadership contributions as well as successful organization of sustainability events
  - No transaction or investment carrying high environmental and social risks that did not follow appropriate governance

10%

- 1 “Core” includes the Group, excluding Non-Core Unit and Securitized Products. The Core RoTE formula assumes that the tax charge for the Group is allocated 100% to the Core Return and that CSG Tangible Equity is used as the denominator in the calculation of the ratio.
- 2 Cost base refers to adjusted operating expenses at constant 2022 FX rates and on constant perimeter, before taking into account the Securitized Products transaction and other divestments.
- 3 Refer to “Competitive Benchmarking” in Group compensation for further information on the selected RTSR peer group.
- 4 RTSR payout schedule consistent with 2022 compensation framework. Refer to “2022 Executive Board summary performance” for further information.

## 226 Compensation

## Group compensation framework

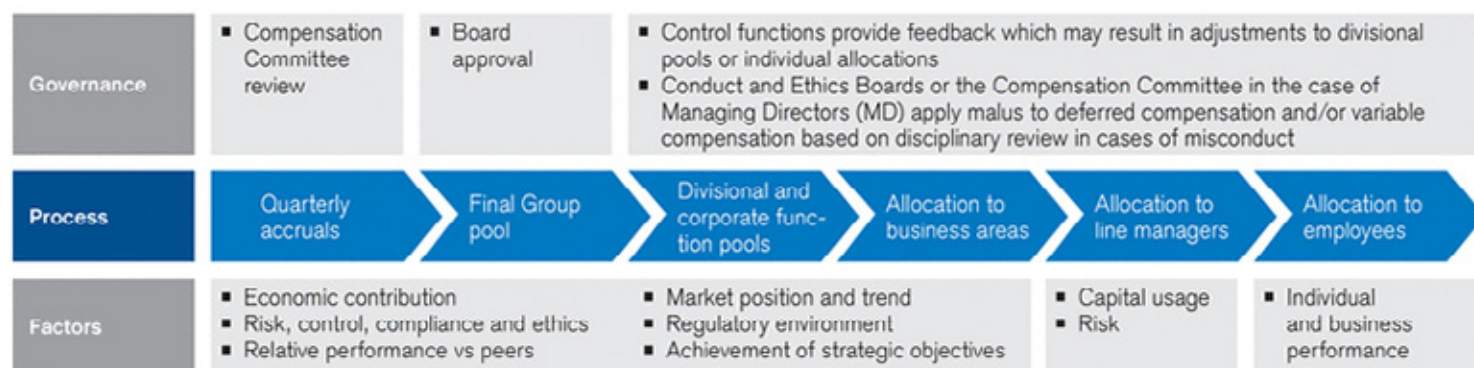

### Determination of Group variable incentive compensation pool

The Group's variable incentive compensation pool for all employees, including the CEO and the other Executive Board members, is determined on an annual basis, with accruals made throughout the year. In determining the Group, divisional and corporate function pools, the Compensation Committee aims to balance the distribution of the Group's profits between shareholders and employees. The factors taken into consideration at the Group level, as well as at the divisional and functional levels, are shown in the illustration below. The primary driver of the initial pool amounts is economic contribution, with non-financial factors taken into consideration to arrive at the final level.

The Compensation Committee regularly reviews the accruals and related financial information and applies adjustments in exceptional circumstances to ensure that the overall size of the pools is consistent with the Group's compensation objectives.

The total amount of the variable incentive compensation pool for the corporate functions is not linked to the performance of the particular divisions that employees of the corporate functions support or oversee, but takes into account the Group-wide financial performance, non-financial factors and changes in headcount. Therefore, employees working in the corporate functions, including those performing control functions, are remunerated independently from the performance of the businesses they oversee or support. As with the business divisions, risk, control, compliance and conduct and ethics considerations and relative performance compared with peers, as well as the market and regulatory environment, are taken into account.

### Determination of variable incentive compensation pools

The key elements of our current Group employees' compensation framework and how they applied to various employee categories are described below.

### Base salaries

All employees are paid a base salary. Salary levels are based on the skills, qualifications and relevant experience of the individual, the responsibilities required by the role and external market factors.

### Role-based allowances

Role-based allowances are a component of fixed compensation awarded to certain employees identified as Material Risk Takers (MRTs) under UK or EU regulatory requirements. These allowances are determined based on the role and organizational responsibility of the individual. Role-based allowances are deemed to be fixed compensation for the purposes of calculating the cap on variable incentive compensation awarded to MRTs as required by the Capital Requirements Directive V (CRD V) and Capital Requirements Regulation (CRR). The deferred cash allowance plan (DCAP) is a form of role-based allowance that is used primarily in the Americas.

### Variable incentive compensation

Variable incentive compensation is paid in cash unless the total compensation awarded to an employee is greater than or equal to CHF 250,000 or the local currency equivalent or USD 250,000 for employees whose total compensation is denominated in US dollars. In these cases, a portion is paid in cash and the balance is deferred, vesting at a later date. For 2022, most Managing Directors and Directors who were granted a variable incentive compensation award received the non-deferred portion in the form of an upfront cash award (UCA). The UCA is a form of variable compensation, where employees receive an immediate cash payment that is subject to repayment during the following three-year period in the event of specified conditions such as a termination of employment by voluntary resignation, a termination for cause, engagement in conduct that is materially detrimental to the Group or other prohibited activity. The repayment amount equals the gross amount of the award, pro-rated based on the portion of time remaining in the three-year period from the departure date until the end of the three-year period.

Generally, employees receive the cash portion of their variable incentive compensation at a regular payroll settlement date close to the grant date. To comply with CRD V requirements, employees who hold material risk taker roles in respect of certain Group subsidiaries in the EU receive shares for 50% of the non-deferred portion of variable incentive compensation that would have been paid to them in cash. These shares are vested at the time of grant but remain blocked, that is, subject to transfer restrictions, for a period of time, generally 12 months.

The Compensation Committee made some refinement to deferral rates for Group employees. For 2022, these deferral rates ranged from 10% to 60% of the variable incentive award, compared with 10% to 50% for 2021. In general, the cash component of the variable incentive compensation for 2022 was limited to a maximum of CHF 150,000 per employee for Managing Directors and Directors and delivered as UCA. For all other employees, the cash component was limited to a maximum of CHF 2 million or the local currency equivalent (or USD 2 million for employees whose total compensation is denominated in US dollars) per employee.

### Compensation components by employee category

Employee category	Total compensation			
	Fixed compensation	Variable compensation		
		Deferred compensation <sup>1</sup>		
	Base salary	Cash <sup>2</sup>	Deferred Cash	Share awards
Managing Directors and Directors including Material Risk Takers and Controllers (MRTCs)				
Other employees, including MRTCs, with total compensation of CHF/USD 250,000 or higher				
Employees with total compensation lower than CHF/USD 250,000				

<sup>1</sup> Deferred compensation is applicable to employees with total compensation of CHF/USD 250,000 or higher.

<sup>2</sup> Includes UCA, which has a repayment condition.

### Deferred compensation: key features

From 2022 onwards, performance share awards and contingent capital awards will no longer be granted, however any such outstanding awards will continue to vest according to the planned schedule.

Award	Delivery <sup>1</sup>	Vesting period <sup>1</sup>
<b>Deferred Cash</b>	<ul style="list-style-type: none"> <li>Cash, deferred</li> </ul>	<ul style="list-style-type: none"> <li>3 years (ratable vesting)</li> <li>4 years (ratable vesting) for CRD V MRTs, Investment Firms Prudential Regime Senior Managers and / or EU Identified Employees (who do not fall into the 5 or 7 years categories below)</li> <li>5 years (ratable vesting) for Prudential Regulation Authority Risk Managers<sup>2</sup> and / or EU Senior Management</li> <li>7 years (ratable vesting over five years, starting on the third anniversary of grant) for Prudential Regulation Authority Senior Managers<sup>3</sup></li> </ul>
<b>Share awards</b>	<ul style="list-style-type: none"> <li>One registered share per award</li> <li>Dividend equivalents (payable upon delivery)</li> </ul>	<ul style="list-style-type: none"> <li>3 years (ratable vesting)</li> <li>4 years (ratable vesting) for CRD V MRTs, Investment Firms Prudential Regime Senior Managers and / or EU Identified Employees who do not fall into the 5 or 7 years categories below</li> <li>5 years (ratable vesting) for Prudential Regulation Authority Risk Managers<sup>2</sup> and / or EU Senior Management</li> <li>7 years (ratable vesting over five years, starting on the third anniversary of grant) for Prudential Regulation Authority Senior Managers<sup>3</sup></li> </ul>

<sup>1</sup> Individuals in certain jurisdictions may be subject to conditions other than those outlined here in order to comply with local legal or regulatory requirements including MRTs / EU Identified Employees who are ineligible to receive interest or dividend payments (or equivalent) during the deferral period on variable compensation instruments awarded.

<sup>2</sup> Risk managers are a subset of the UK PRA MRT population, defined as individuals identified as having responsibility for managing or supervising risk-taking or significant risk functions for the Group's UK entities.

- 3 Senior managers are a subset of the UK PRA MRT population, defined as individuals who retain the greatest influence over the strategic direction of the Group's UK business, and who also perform one or more of the PRA and UK Financial Conduct Authority's designated senior management functions and "prescribed responsibilities" for the relevant UK entities.

**228 Compensation**

Chairman's chair fee <sup>5</sup>	Group shares blocked and non transferable for four years <sup>4</sup>	One installment at end of current board period
1,500,000		

Note: The Vice-Chair and Lead Independent Director received a fee of CHF 125,000 for the 2022 AGM to 2023 AGM period. This fee for this role is in line with market practice.

- 1 As per the 2023 AGM to 2024 AGM period, the Board has approved an increase in the GNC membership fees from CHF 50,000 to CHF 100,000.
  - 2 Committee chairs do not receive committee fees in addition to their chair fees.
  - 3 The Chairman does not receive any additional fees for chairing the GNC.
  - 4 The Compensation Committee may approve exceptions to the blocking period for certain circumstances.
  - 5 Proposal by Chairman to voluntarily waive this fee for the 2022 AGM to 2023 AGM period was accepted by the Board.
- Refer to “Board of Directors compensation” for further information.

## Sustainability in compensation

Environmental, Social and Governance (ESG) related factors are considered in various stages of the compensation process:

- **Group variable incentive pool:** the Compensation Committee considers audit, disciplinary, risk and regulatory-related issues, among other factors, in order to determine appropriate adjustments to the Group, divisional and corporate functions pools. In addition, one of the key drivers of bonus pool development at the divisional level is economic contribution, which factors in the level of risk taken to achieve profitability;
- **Executive Board variable compensation:** Since 2022, 30% of the total Executive Board variable compensation pool is assessed based on ESG-related factors, with measurable objectives within the three non-financial categories of Risk and Control, Values and Culture, and Sustainability;
- **Equal pay policy:** Credit Suisse does not tolerate any form of discrimination, in particular discrimination based on ethnicity, nationality, gender, sexual orientation, gender identity, religion, age, marital or family status, pregnancy, disability, or any other status that is protected by local law. We recognize and value diversity and inclusion as a driver of success. Our policies and practices support a culture of fairness, where employment-related decisions, including decisions on compensation, are based on an individual's qualifications, performance and behavior, or other legitimate business considerations, such as the profitability of the Group or the division and department of the individual, and the strategic needs of the Group. Consistent with our long-term commitment to fair pay, the Compensation Committee reviews our pay practices on a regular basis to identify potential areas requiring more attention. In 2022, we engaged a third-party consultant to conduct a gender pay equity analysis for certain major locations. The analysis confirmed that we provide "equal pay for equal work" for women and men in the same job and at the same level. This analysis covered employees at all levels within the Group, who were based in Switzerland, Germany, Spain, France, the United Kingdom, Hong Kong, India, Italy, Luxembourg, Poland and Singapore. Taking into account factors such as role, experience, tenure, and geography, the analysis concluded that, in these major locations, women earned 99% of what men earned on a total compensation basis. In recognition of Credit Suisse's commitment to gender pay equity, the largest Credit Suisse employing entities in Switzerland were awarded the quality label from the Social Partnership Centre for Equal Pay in the Banking Industry and have been certified with the "Fair Pay" label (most recently in 2021). We will continue to review compensation to ensure that our commitment to equal pay is upheld.

## Compensation Governance

### The Compensation Committee

The Compensation Committee is the supervisory and governing body for compensation policies, practices and plans. In designing and setting compensation, the Compensation Committee aims to make decisions in the best interests of the Group and to align the interests of the Group's employees to those of shareholders and other stakeholders. The Compensation Committee reviews proposals regarding Group, Executive Board and Board compensation, and makes recommendations to the Board for approval. Total Executive Board compensation and Board compensation are also subject to shareholder approval pursuant to Swiss law and the Articles of Association (AoA).

The Compensation Committee consists of at least three members of the Board, all of whom must be independent. The members during the 2022 AGM to 2023 AGM term were Christian Geller-stad (Chair), Iris Bohnet, Michael Klein, Shan Li, and Amanda Norton. Michael Klein ceased to be member on October 27, 2022. The Board has applied the independence criteria of the SIX Swiss Exchange Directive on Information relating to Corporate Governance, the Swiss Financial Market Authority FINMA (FINMA), the Swiss Code of Best Practice for Corporate Governance, and the listing standards of the New York Stock Exchange (NYSE) and the Nasdaq Stock Market (Nasdaq), in determining that all of these individuals are independent.

- Refer to "Independence" in IV – Corporate Governance – Board of Directors for more information on how the Group determines the independence of its Board members.

### Compensation Committee activities

The Chairman and the CEO may attend the Compensation Committee meetings, and the Compensation Committee Chair determines the attendance of other Board members, Executive Board members, senior management, compensation advisers and external legal counsel, as appropriate. The Chairman, CEO, Executive Board members and senior management do not participate in discussions which relate to their own compensation outcomes.

In addition to the 28 investor and proxy adviser meetings held by the Compensation Committee Chair, during 2022, the Compensation Committee held 12 internal meetings and calls, including one workshop, with an overall attendance rate of 91%.

The Compensation Committee's focus areas in 2022 are summarized in the following table:

### Compensation Committee activities in 2022

### Advisers to the Compensation Committee

The Compensation Committee is authorized to retain external advisers to provide support as it carries out its responsibilities. Deloitte LLP (Deloitte) has been retained to assist the Compensation Committee in ensuring that the Group's compensation programs remain competitive, responsive to regulatory developments and in line with the compensation policy. Deloitte has appointed a senior consultant to advise the Compensation Committee. Apart from assisting the Compensation Committee, this senior consultant does not provide any other services to the Group. The Compensation Committee also obtained external legal advice during 2022 on various matters relating to compensation policy and design. Prior to appointment, the Compensation Committee conducted an independence assessment of its advisers pursuant to the rules of the United States Securities and Exchange Commission (SEC) and the listing standards of the NYSE and the Nasdaq.

### Compensation policy

The compensation policy applies to all employees and compensation plans of the Group. It contains a detailed description of the Group's compensation principles and objectives as well as the compensation programs. It also sets out the standards and processes relating to the development, management, implementation, and governance of compensation. The compensation policy is available at [credit-suisse.com/compensation-policy](https://www.credit-suisse.com/compensation-policy).

### Approval authority

The approval authorities for setting the compensation policy and compensation for different groups of employees are defined in the Group's Organizational Guidelines and Regulations and the Compensation Committee charter is available at [credit-suisse.com/governance](https://www.credit-suisse.com/governance).

Action	Compensation Committee	Board
Establish or change the Group's compensation policy	R	A
Establish or change compensation plans	R	A
Set variable incentive compensation pools for the Group and the divisions	R	A
Determine Executive Board compensation, including for the CEO	R	A <sup>1</sup>
Determine Board compensation, including for the Chairman	R	A <sup>1</sup>
Determine compensation for the Head of Internal Audit	A <sup>2</sup>	n/a
Determine compensation for MRTCs and other selected members of management	A	n/a

R = recommendation; A = approval

- 1 Subject to shareholder approval requirement pursuant to the Swiss Code of Obligations and the Articles of Association.
- 2 In consultation with the Audit Committee Chair.

### Provisions of the Articles of Association related to compensation and

**loans**

The AoA contain provisions that govern and outline the principles concerning the compensation of and loans granted to the Board and Executive Board. These are summarized below. The summaries do not purport to be complete and are qualified in their entirety by reference to the AoA. The AoA are available at [credit-suisse.com/articles](http://credit-suisse.com/articles).

### **Say-on-pay vote**

The AGM approves on an annual basis the compensation of the Board in advance for the period up until the next AGM (Art. 8a para. 1 AoA) and the compensation of the Executive Board as a maximum amount or as maximum partial amounts in advance or retroactively for the period described in the proposal of the Board to the AGM (Art. 8b para. 1 AoA). The details on the say-on-pay vote are governed by Art. 8a of the AoA for the compensation of the Board and Art. 8b of the AoA for the compensation of the Executive Board

### **Supplementary amount for new Executive Board members**

If new members join the Executive Board or members of the Executive Board are promoted during the period for which compensation has been approved in advance by the AGM and the compensation approved in advance proves insufficient, a further 30% of the aggregate amounts already approved may be used for the compensation of such members (Art. 8c AoA).

### **Compensation principles**

The compensation of the members of the Board may be paid partly in the form of Group shares (Art. 8a AoA). The compensation of the members of the Executive Board consists of a fixed component and a variable component. The variable component comprises short-term and long-term incentive compensation elements, which may both contain deferred compensation elements and are subject to the achievement of performance targets, which the Board sets on a regular basis. The compensation may be paid partly in the form of Group shares, derivatives based on Group shares or other financial instruments (Art. 8b AoA).

## **232 Compensation**

### **Loans**

The Group may grant loans up to a maximum amount of CHF 20 million to each member of the Board at market conditions (Art. 20d AoA) and to each member of the Executive Board at standard terms that apply in the financial sector (Art. 20h AoA).

### **Risk and control considerations**

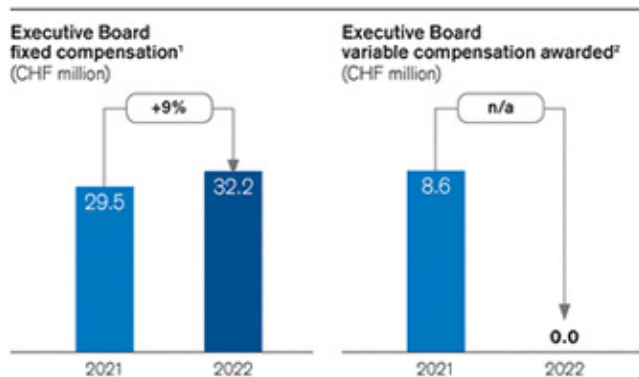

During its annual review of the Group's performance, the Compensation Committee considers input from the Risk Committee Chair with respect to risk considerations, and the Audit Committee Chair with respect to internal control considerations as well as the Conduct and Financial Crime Control Committee Chair with respect to matters concerning financial crime compliance. The Compensation Committee also considers input from various corporate functions including Risk, Compliance, General Counsel, People and Internal Audit, regarding control and compliance issues and any breaches of relevant rules and regulations or the Group's Code of Conduct.

To meet regulatory guidelines regarding employees engaged in risk-taking activities, the Compensation Committee reviews and approves the compensation for employees identified as MRTCs. The Risk Committee is involved in the review process for the compensation of MRTCs.

- Refer to "Focus on risk and control" in Supplementary information for further information.

## Executive Board compensation

### Compensation outcomes for 2022

Figures above may contain rounding differences.

<sup>1</sup> Fixed compensation includes base salary, role-based allowances, and pension and other benefits.

<sup>2</sup> 2021 Executive Board variable compensation includes only the 2021 STI as the 2021 LTI was cancelled.

### Fixed compensation

Total fixed compensation for the Executive Board was CHF 32.2 million in 2022, compared with CHF 29.5 million in 2021.

### Variable compensation

The threshold levels for each of the financial metrics under the new framework introduced for 2022 were not met. While the non-financial elements were assessed being close to target, the formulaic nature of the maximum cap on aggregate Executive Board variable incentive compensation of 2% of Group income before taxes resulted in a zero variable compensation pool for the Executive Board. Therefore, total aggregate Executive Board compensation for 2022 consisted of CHF 32.2 million of fixed compensation only.

The achievement against the financial performance metrics and non-financial assessment are shown in the table below.

### 2022 Executive Board summary performance

Performance criteria	Weighting	Performance levels			Payout level		
		Threshold (50%)	Target (100%)	Maximum (150%)	0%	Threshold (50%)	Target (100%)
<b>Group financial metrics</b>							
Reported return on tangible equity (RoTE)	25%	4.00%	5.30%	8.00%	0%		
Adjusted income before taxes (CHF billion)	25%	2.50	3.75	5.00	0%		
Relative total shareholder return (RTSR)	10%	Above bottom quartile of peer group	Rank 10th of peer group	Top quartile of peer group	0%		
CET1 capital ratio	10%	13.75%	14.125%	14.50%	0%		
Non-financial metrics	30%	See separate description below			84%		
Total	100%				25%		
<b>Total payout after applying the 2% Group income before taxes cap</b>					<b>0%</b>		

**Note:** The Return on tangible equity and the CET1 capital ratio used to assess the 2022 Executive Board performance exclude the impact of the capital raise in fourth quarter of 2022 (CHF 4,014 million), which was not in place when the target was set. Adjusted results and RoTE are non-GAAP financial measures and are used in this table for the purposes of defining performance target levels for compensation. Adjusted results exclude certain items included in our reported results. Refer to “Reconciliation of adjustment items” in II – Operating and financial review – Credit Suisse for further information. RoTE is calculated as net income attributable to shareholders divided by average tangible shareholders’ equity. Tangible shareholders’ equity, a non-GAAP financial measure, is calculated by deducting goodwill and other intangible assets from total shareholders’ equity as presented in our balance sheet.

<b>Non-financial metrics (30% weighting)</b>		<b>Comments</b>
<b>Risk and Control</b>	Implementation / remediation of key regulatory and audit items	<ul style="list-style-type: none"> <li>Percentage of regulatory projects reporting “green” status has increased, while decreased in “red” status</li> <li>Substantial enhancement to management focus, centralization and consistency with Strategic Regulatory Remediation Office</li> <li>Number of negative audits per total audit reports as well as high risk issues have reduced year over year</li> </ul>

	Overall contribution to support positioning Credit Suisse as a sustainability leader	<ul style="list-style-type: none"> <li>Flagship Sustainability publications are in line with expectations, supported by launch of Center for Sustainability</li> <li>Overall external rankings remain stable with two slight rating deteriorations (S&amp;P and CDP) and one improvement (RepRisk)</li> <li>Organization of Sustainability Global events in line with ambition, with main Sustainability event of the year, CS Sustainability Week, which was overall a success and well received by participants</li> </ul>

### **Compensation of the Group CEO**

Mr. Körner assumed the role of Group CEO on August 1, 2022, and was previously in the role of CEO Asset Management on the Executive Board. His total compensation for 2022 was CHF 2.5 million, of which CHF 1.2 million related to his role as Group CEO.

In terms of realized compensation for 2022, Mr. Körner received CHF 2.5 million, which comprised CHF 1.1 million base salary and CHF 0.1 million pension and benefits relating to his role as Group CEO, and CHF 1.2 million base salary and CHF 0.1 million pension and benefits relating to his role prior to having been appointed CEO.

### **Compensation of the highest paid Executive Board member**

The highest paid Executive Board member in 2022 was David Mathers, who stepped down from the role of Chief Financial Officer on September 30, 2022. For 2022, Mr. Mathers was awarded total compensation of CHF 3.9 million, which comprised CHF 2.1 million base salary (including a one-off payment in lieu of annual leave entitlements and notice period payments), CHF 1.5 million role-based allowance and CHF 0.3 million pension and benefits.

Mr. Mathers' total realized compensation for 2022 was CHF 4.3 million and comprised CHF 2.1 million base salary (including a one-off payment in lieu of annual leave entitlements), CHF 1.5 million role-based allowance and CHF 0.5 million in realized variable compensation related to deferred awards from prior years. In addition, Mr. Mathers received CHF 0.3 million in pension and other benefits.

% of total compensation			<b>69%</b>	<b>31%</b>	

For the individuals who joined the Executive Board and the individuals who left the Executive Board during 2021 and 2022, compensation relating to the period during which they were members of the Executive Board and, for leavers, during their respective notice period is included in the table above. All figures stated are based on gross amounts, i.e. before any applicable mandatory tax or social security contributions.

- 1 Other benefits consist of housing allowances, expense allowances and relocation allowances.
- 2 For the total compensation awarded to the members of the Executive Board, the Group made payments of CHF 3.0 million in 2022 (for 2021 CHF 2.3 million) to cover the mandatory employer social security contributions as required under the social security laws applicable to the individual Executive Board members based on their domicile and employment status. These contributions do not form part of the Executive Board members' compensation.
- 3 Following the implementation in 2022 of the revised Executive Board compensation framework, and given that the grant price of share awards is not adjusted to remove the value of future dividend payments, the Compensation Committee decided to discontinue the voluntary separate disclosure of dividend equivalent amounts for share awards granted to Executive Board members, in line with the disclosure for other Group employees. The total fixed compensation amount for 2021 has been revised to conform to the current presentation to exclude CHF 0.51 million in dividend equivalents (of which CHF 0.14 million related to David Mathers and CHF 0.12 million related to joiners and leavers) that were previously disclosed as part of fixed compensation.
- 4 Variable compensation was 0% of total compensation in 2022 and ranged from 6% to 55% in 2021.
- 5 Replacement awards in the form of cash awards and share awards have been granted to individuals joining the Executive Board in 2022 to compensate them for salary replacement and cancellation of bonus and deferred awards by their previous employers. Mrs. Hannaford, Mr. Wildermuth and Mr. De Ferrari were granted awards of CHF 6.03 million, CHF 9.94 million and CHF 3.52 million, respectively, with a potential further amount of up to CHF 1.67 million in share awards for Mr. De Ferrari to be granted in 2023 subject to performance conditions relating to Mr. De Ferrari's previous employer. Replacement awards in relation to Mr. Joshi were valued at CHF 6.97 million and were granted in the first quarter of 2023. These one-time replacement awards did not form part of the compensation in the table above. Considering these payments, the total compensation of the Executive Board for 2022 amounted to CHF 60.35 million. No replacement awards were paid to Executive Board members for 2021.
- 6 No guaranteed bonus or sign-on bonuses were paid to Executive Board members for 2022 and 2021.

**Compensation outcomes for 2022**

<sup>1</sup> Total compensation awarded does not include Transformation Award.

**Total compensation awarded**

Total compensation awarded for 2022 of CHF 9,384 million was 2% lower than the prior year and included CHF 497 million for the Strategic Delivery Plan (SDP) awards granted to most Managing Directors and Directors to incentivize the longer-term delivery of the Group’s strategy. As previously described in the 2021 Compensation Report, the SDP awards were granted in February 2022 and are subject to service conditions and CET1 capital and leverage ratio underpins over the course of 2022-2024, and therefore are reported as part of other variable compensation awarded for 2022.

During 2022, CHF 367 million in retention awards to key talent and senior management in the form of deferred cash (subject to clawback) and deferred share-based awards were awarded, of which CHF 317 million was granted to employees in the Investment Bank division. The focus has been on critical roles where the risk of attrition was high and of immediate concern, and where the respective businesses would be significantly impacted. 1,143 employees received retention awards in 2022. This compares with CHF 395 million in retention awards granted in 2021 to 652 employees in total, of which CHF 299 million was awarded to key talent in the Investment Bank division.

- Refer to “Note 30 – Employee deferred compensation” in VI – Consolidated financial statements – Credit Suisse Group for further information on the SDP and other awards.

## Total compensation awarded

of which guaranteed bonuses	38	30	68	32	31	63

Salaries include role-based allowances.

- 1 Included pension and other post-retirement expense of CHF 501 million and CHF 503 million in 2022 and 2021, respectively.
- 2 Included upfront cash awards of CHF 344 million for 2022 and CHF 799 million for 2021.
- 3 Included replacement awards to compensate employees for the equivalent fair value of deferred awards cancelled by previous employers as well as sign-on payments.

## Median and average employee compensation

For 2022, the median annualized total compensation (excluding pension and benefits and dividend equivalents) of all of our bonus eligible employees of our company (other than the CEO) was CHF 110,000, and the annual total compensation of our CEO was CHF 2.29 million (excluding pension and benefits and dividend equivalents). Based on this information, for 2022, the ratio of the annual total compensation of our CEO to the median annual total compensation of all employees was calculated to be 20.8 to 1. This compared with a ratio 31.1 to 1 for 2021 which was based on annual CEO total compensation of CHF 3.51 million and median annual total compensation of all employees of CHF 113,000.

The average total compensation awarded for 2022 was calculated at approximately CHF 185,895 per employee (full-time equivalents), 2% lower compared with approximately CHF 189,542 per employee for the prior year, as calculated by taking the total compensation awarded for each year and dividing by the number of employees (full-time equivalents) reported at the end of each year. The 2021 average total compensation amount has been restated following the restatement of the 2021 year-end employee (full-time equivalents) to take into account the reduction-in-force program.

## Variable incentive compensation awarded for 2022

As described in the Compensation Policy and Governance section, a key factor in determining the initial Group bonus pool is economic contribution. However, for 2022, sizing the pool purely on financial performance would have led to an inappropriate outcome given the efforts and achievements of the majority of employees and the need to incentivize and retain staff. Therefore, the Compensation Committee considered as a starting point a pool “floor” level of CHF 1.0 billion as appropriate. Although the Group’s performance against ESG-related objectives was in line with target, and the Compensation Committee noted the overall improvement in the Group’s risk culture as indicated by a review of control function feedback, no adjustments to the floor level were made. In considering market trends and positioning, the Compensation Committee acknowledged that peer compensation levels, while down compared with the prior year, were likely to remain relatively high compared with recent historical levels. Nevertheless, the Compensation Committee decided not to make any positive adjustments to the Group variable compensation floor level, which at CHF 1.0 billion, was 50% lower than the prior year pool.

## Number of employees awarded variable incentive and other compensation

	2022			2021		
	MRTCs <sup>1</sup>	Other employees	Total	MRTCs <sup>1</sup>	Other employees	Total
<b>Number of employees awarded variable incentive compensation</b>						
<b>Variable incentive compensation</b>	<b>1,155</b>	<b>36,875</b>	<b>38,030</b>	<b>1,432</b>	<b>43,024</b>	<b>44,456</b>
of which Cash awards <sup>2</sup>	1,155	36,875	38,030	1,432	43,024	44,456

of which Performance share awards	—	—	—	1,266	797	2,063
of which Contingent Capital Awards	—	—	—	1,229	3,869	5,098
<b>Number of employees awarded other variable compensation</b>						
Cash severance	5	252	257	9	258	267
Retention awards	125	1,018	1,143	134	518	652
Strategic Delivery Plan	1,185	4,532	5,717	—	—	—
Guaranteed bonuses	5	140	145	12	156	168
Other <sup>3</sup>	44 <sup>4</sup>	312	356	40 <sup>4</sup>	1,597	1,637

Excluding Executive Board members who were in office on December 31, 2022 or 2021, respectively.

- 1 Excluded individuals who may have been classified as MRTCs according to regulatory requirements of jurisdictions outside of Switzerland, particularly US-based revenue producers in the Investment Bank, who were classified as Covered Employees by the US Federal Reserve.
- 2 Included upfront cash awards.
- 3 Included replacement awards to compensate employees for the equivalent fair value of deferred awards cancelled by previous employers as well as sign-on payments.
- 4 For 2022 and 2021, there were no sign-on payments paid to MRTCs.

### Group compensation and benefits expense

Compensation and benefits expenses recognized in the current year income statement include salaries, role-based allowances, variable compensation, benefits and employer taxes on

compensation. Variable compensation expense reflects the variable cash compensation for the current year and amortization of deferred compensation awards granted in prior years.

## Group compensation and benefits expense

Salaries include role-based allowances. Restructuring expenses in connection with the strategic review of the Group were disclosed separately and were not part of the total compensation expenses.

- 1 Represented deferred fixed cash compensation expense of CHF 214 million and CHF 147 million related to cash awards for 2022 and 2021, respectively.
- 2 Represented the Group's portion of employees' mandatory social security.
- 3 Included pension and other post-retirement expense of CHF 501 million and CHF 503 million in 2022 and 2021, respectively.
- 4 Included CHF 14 million and CHF 8 million of compensation expense associated with replacement cash awards granted in 2022 and 2021, respectively, to compensate employees for the equivalent fair value of deferred awards cancelled by previous employers.
- 5 Included upfront cash awards expense.
- 6 Included CHF 16 million and CHF 13 million of compensation expense associated with replacement share awards granted in 2022 and 2021, respectively, to compensate employees for the equivalent fair value of deferred awards cancelled by previous employers.
- 7 Included sign-on payments.

### Group estimated unrecognized compensation expense

The following table shows the estimated compensation expense that has not yet been recognized through the income statement for deferred compensation awards granted for 2022 and prior years that were outstanding as of December 31, 2022, with

comparative information for 2021. These estimates are based on the fair value of each award on the grant date, taking into account the current estimated outcome of relevant performance criteria and estimated future forfeitures. No estimate has been included for future mark-to-market adjustments.

## Group estimated unrecognized compensation expense

- Included CHF 31 million and CHF 20 million of estimated unrecognized compensation expense associated with replacement share awards granted in 2022 and 2021, respectively, not related to prior years.
- Included estimated unrecognized compensation expense associated with upfront cash awards granted in 2022 and prior years.
- Included CHF 16 million and CHF 11 million of estimated unrecognized compensation expense associated with replacement cash awards granted in 2022 and 2021, respectively, not related to prior years.

## Changes to the value of outstanding deferred awards

Employees experience changes to the value of their deferred compensation awards during the vesting period due to both implicit and explicit value changes. Implicit value changes primarily reflect market-driven effects, such as changes in the Group share price, changes in the value of the CCA and foreign exchange rate movements. Explicit value changes reflect risk adjustments triggered by conditions related to negative performance in the performance-based awards, forfeiture, or the malus provisions in all deferred awards. The final value of an award will only be determined at settlement.

- Refer to “Note 30 – Employee deferred compensation” in VI – Consolidated financial statements – Credit Suisse Group for further information.

The following table provides a comparison of the outstanding deferred compensation awards at the end of 2021 and 2022, indicating the value of changes due to ex post implicit and ex post explicit adjustments. For 2022, the change in value for the outstanding deferred compensation awards was mainly due to implicit adjustments driven primarily by changes in the Group share price, foreign exchange rate movements and changes in the value of CCA. With respect to the explicit adjustments on the value of performance share awards, a negative adjustment of CHF 55 million (based on the share price of CHF 2.76 as at December 31, 2022) was applied resulting from the negative Group ROE and the divisional loss before taxes in the Investment Bank division, with the remaining explicit adjustment related to forfeitures and application of malus provisions.

## Outstanding deferred compensation awards

in / end		Total outstanding end of 2021	Granted in 2022	Paid out in 2022	Ex post explicit adjustments	Ex post implicit adjustments	Total outstanding end of 2022	% of which exposed to ex post explicit adjustments

- Included MRTCs and Executive Board members who were in office on December 31, 2022.
- Included retention awards and upfront cash awards.
- Included retention awards and Strategic Delivery Plan awards.
- Excluded Executive Board members who were in office on December 31, 2022.

### **Transformation Award for 2023-2025**

In February 2023, the Group granted Transformation Awards, in the form of deferred cash and share-based awards, with a total award value at grant of CHF 350 million (fair value at grant of CHF 230.3 million) to employees identified as being critical to the delivery of the transformation strategy. Of the total award value at grant, CHF 70 million relates to the Executive Board and is subject to approval at the AGM 2023. The Transformation Awards are designed to incentivize and reward key contributors for the successful delivery of the Group's transformation strategy and sustainable value creation for shareholders. For employees other than the Executive Board, the Transformation Award was granted in the form of both a deferred cash award and a deferred share award subject to performance conditions. For Executive Board members, the Transformation Award, subject to shareholder approval, will be granted 100% as deferred share-based awards with performance conditions.

The cash component of the Transformation Award vests over two years with one half of the cash awards vesting on each of the second anniversaries of the grant date (ratable vesting), with the exception of awards granted to individuals classified as MRTs, risk manager MRTs or senior managers or equivalents under the requirements of EU Capital Requirements Directive V and UK Investment Firms Prudential Regime.

The deferred share award component of the Transformation Award is scheduled to vest on the third anniversary of the grant date, only if the share price is at CHF 3.82 or higher on December 31, 2025. Further, no portion of the deferred share award would vest if the following threshold performance levels are not achieved:

- The Group's reported Group RoTE is at or above 5%; and
- The Group's cost base does not exceed CHF 15 billion.

The Compensation Committee will ensure that the final Transformation Award vesting outcome is aligned with underlying performance, including consideration of risk and control factors.

- Refer to "Compensation at a glance" for further information.

### **Other awards granted in 2023**

In the first quarter of 2023, the Group granted additional compensation awards to certain employees where attrition remains a concern. Share-based awards of CHF 38 million and deferred cash allowance plan awards of CHF 30 million were granted to key employees. These awards vest over three years.

Supplemental cash allowance awards of CHF 114 million were granted, predominantly to employees with the corporate title of Vice President and below to maintain a market competitive level of total compensation. These cash allowances will vest and are scheduled to be paid during 2023.

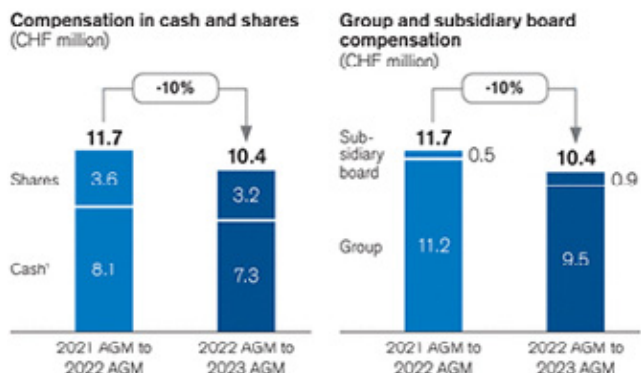

### **Equity award in the event of CS First Boston initial public offering**

In order to incentivize and retain the leadership of CS First Boston, a group of senior leaders is expected to be provided with an equity award to participate in the value of CS First Boston in the event of an IPO. The award is contingent on a successful IPO, and would result in employees being awarded restricted share units in CS First Boston post-IPO. These awards would vest three years post-IPO and be subject to a further holding requirement. A pool for these awards has been determined and is expected to represent up to a maximum of 20% of the shares in CS First Boston for selected existing senior leaders and future senior hires. Any awards granted will be determined by the Group on an entirely discretionary and individualized basis. The maximum value for any employee participating in the plan is capped. Full details of these awards will be provided in the IPO prospectus, if applicable.

## Board of Directors compensation

### Compensation outcomes for 2022

#### Board of Directors compensation

Figures above may contain rounding differences.  
1 Includes pension and other benefits for the period from the 2021 AGM to the 2022 AGM and from the 2022 AGM to the 2023 AGM.

For the period from the 2022 AGM to the 2023 AGM, aggregate compensation to the Board of CHF 10.4 million consisted of CHF 9.5 million related to Group Board memberships and CHF 0.9 million of fees paid to certain Board members for subsidiary board memberships. This compares with the amount of CHF 13.0 million approved prospectively Board by shareholders at the 2022 AGM. The total Board compensation is 10% lower than the prior period, driven by the waiver of the Chairman's chair fee.

While the base Board fee of CHF 250,000 remained consistent with prior years, there were several changes to the Board committee and other fee amounts for the 2022 AGM to 2023 AGM period. These changes consist of the introduction of an annual fee for the Vice Chair and Lead Independent Director, as well as Board committee membership fees for the new Digital Transformation and Technology Committee and the Sustainability Advisory Committee (previously only a chair fee was paid). For an overview of the Board membership fees for the 2022 AGM to 2023 AGM period, refer to the "Compensation framework, policy and governance" section of this report.

For the 2023 AGM to 2024 AGM period, the base Board and committee membership fees are expected to remain unchanged, with the exception of the Governance and Nominations Committee. Due to the increased number of meetings and active role of the Governance and Nominations Committee in overseeing aspects of the Group's transformation, the Board has approved an increase the membership fee for the Governance and Nominations committee from CHF 50,000 to CHF 100,000.

- Refer to IV – Corporate Governance – Board of Directors for further information on the number of meetings and activities.

## Compensation of the Chairman

The Chairman's total compensation for the 2022 AGM to 2023 AGM period consisted of a base fee of CHF 3.0 million payable in cash. Given the poor financial performance in 2022 and challenging situation for the firm at the beginning of the three-year transformation, the Chairman proposed to voluntarily waive his chair fee of CHF 1.5 million for the 2022 AGM to 2023 AGM period, and this proposal was accepted by the Board. Following a benchmarking analysis of board chair pay at leading Swiss companies, the Chairman's total compensation will be adjusted from CHF 4.5 million to CHF 3.8 million starting from the 2023 AGM to 2024 AGM period. To enhance alignment with shareholders, the share portion of the Chairman's fees will be increased from the current 33% to 50%, such that his total compensation will be payable 50% in cash (base fee) and 50% in shares (chair fee), generally blocked for a period of four years. Furthermore, a new minimum shareholding requirement of 500,000 shares has been introduced for the Chairman, in line with the minimum shareholding requirement applicable to Executive Board members. The role of the Chairman is a full-time appointment, and he may also receive benefits from, and make contributions to, the Group pension fund in line with local market practice for the Group. The total compensation paid to the Chairman reflects his full-time status and active role in shaping the Group's strategy, governing the Group's affairs, engaging, and maintaining a close working relationship with the CEO and senior management, and providing supervision, counsel and support, where appropriate. The Chairman coordinates the Board's activities, works with the committee chairs to coordinate the tasks of the committees, and ensures that Board members are provided with sufficient information to perform their duties. The Chairman drives the Board agenda on key topics such as the strategic development of the Group, corporate culture, succession planning and the structure and organization of the Group. He chairs the Board, the Governance and Nominations Committee and the shareholders' meetings. He takes an active role in representing the Group to regulators and supervisors, key shareholders, proxy advisers, investors, government officials and other external stakeholders.

## Compensation of the Vice Chair and Lead Independent Director

The Vice Chair and Lead Independent Director received a fee of CHF 125,000 for this role for the 2022 AGM to 2023 AGM period. This fee is payable 50% in cash and 50% in Group shares, generally blocked for a period of four years. The Vice Chair and Lead Independent Director leads the annual Board assessment of the Chairman, chairs Board meetings in the event the Chairman is not able to for any reason, interviews potential new Board member candidates, and may meet with investors or other external stakeholders independently from the Chairman.

## Compensation of the committee chairs

Committee chair fees are paid for the Audit Committee, the Compensation Committee, the Risk Committee, the Conduct and Financial Crime Control Committee, the Digital Transformation and Technology Committee and the Sustainability Advisory Committee. These fees are fixed in advance and are not linked to the Group's financial performance. In addition to the greater time commitment required to prepare and lead the committee work, the chair fees reflect the engagement of the committee chairs throughout the year as required with regulators, shareholders, the business divisions and corporate functions and other stakeholders. Regulatory developments in the banking industry in recent years have put increasing demands on the Risk and Audit Committee Chairs, in particular, increasing the frequency of interaction with the Group's main regulators on internal control, risk, capital and other matters under the supervision of these committees. Similarly, there has been a continued focus of shareholders and regulators on compensation and therefore high levels of engagement between the Compensation Committee Chair and key shareholders and proxy advisers, as well as with regulators. The Compensation Committee held 12 meetings, and the Compensation Committee Chair personally attended 28 separate meetings with key shareholders and proxy advisers during 2022. The Audit Committee Chair fee takes into consideration the greater number of meetings required of the Audit Committee for the review and approval of the quarterly financial results and related filings, the Audit Committee Chair's supervisory role over the Internal Audit function, and the lead role of the Audit Committee Chair for overseeing investigations into whistleblowing and other escalated matters. The Audit Committee held 24 meetings during 2022. The Risk Committee Chair fee reflects the regular interaction required between the Risk Committee Chair and the Group Chief Risk Officer and other senior managers in the risk management function, as well as the oversight role over the Credit Risk Review function, which reports directly to the Risk Committee Chair. The Risk Committee held 13 meetings during 2022, and in addition, the Risk Committee Chair held numerous meetings with regulators and other stakeholders. The Conduct and Financial Crime Control Committee held six meetings during 2022, plus one meeting of the entire committee with FINMA.

- Refer to the table "Meeting attendance – Board and Board committees" in IV – Corporate Governance – Board of Directors for further information.
- Refer to "Governance of credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management – Credit risk for further information on the Credit Risk Review function.

## Compensation of Board members serving on subsidiary boards

Several Board members also serve as non-executive members on the boards of Group subsidiary companies. This practice is consistent with the Group's legal entity governance principles, which aim to foster a close alignment of the Group's governance practices and those of its significant subsidiary companies.

- Refer to the "Governance of Group subsidiaries" and "Biographies of the Board members" in IV – Corporate Governance – Board of Directors for further information.

With the exception of the Chairman, Board members may receive separate fees paid in cash for serving on subsidiary boards, in addition to their Board fees. These fees are approved by the respective subsidiary boards and are subject to ratification by the Board. All subsidiary board fees are included in the total amount of compensation of the members of the Board proposed for approval by shareholders at every AGM. The Chairman does not receive separate fees for board memberships in other Group companies, as these memberships are included as part of the Chairman's compensation.

Board members appointed to serve on subsidiary boards receive a flat subsidiary board membership fee of CHF 100,000 (or higher amounts if a Board member serves as the chair of the subsidiary board or a committee). This amount is generally less than that received by other non-executive subsidiary board members, given that Board members are already familiar with the Group's entities and activities. Serving on a subsidiary board is nevertheless a significant additional commitment for these Board members, reflected, for example, in the number of subsidiary board meetings held throughout the year as shown in the following table.

### Number of subsidiary board meetings

Subsidiary	Board <sup>1</sup>	Committee <sup>2</sup>	Total
Credit Suisse Bank (Europe), S.A. <sup>3</sup>	9	15	24
Credit Suisse (Schweiz) AG	23	16	39
Credit Suisse International (CSI) / Credit Suisse Securities (Europe) Ltd. (CSSEL)	24	20	44
Credit Suisse Holdings (USA), Inc. <sup>3</sup>	70	14	84

<sup>1</sup> Includes ad hoc meetings and calls.

<sup>2</sup> Includes meetings of the respective subsidiary board's audit and risk committees.

<sup>3</sup> Board and committee meetings held jointly with Credit Suisse (USA) Inc. and Credit Suisse Securities (USA) LLC.

GNC = Governance and Nominations Committee; AC = Audit Committee; CC = Compensation Committee; CFCCC = Conduct and Financial Crime Control Committee; RC = Risk Committee; DTTC = Digital Transformation and Technology Committee; SAC = Sustainability Advisory Committee; C = Chair; M = Member. All figures stated are based on gross amounts, i.e. before any applicable mandatory tax or social security contributions.

- As of December 31, 2022, one-half of the Board member fees to be awarded in Group shares have been delivered to Board members. The applicable Group share price was CHF 3.97. The remaining shares will be delivered to Board members the day after the first quarter of 2023 earnings announcement in April 2023, and the share price for this second share delivery will be determined at that time. Group shares are subject to a four-year blocking period. The Compensation Committee may approve exceptions to the blocking period under certain circumstances.
- The following Board members are currently serving on the boards of several of the Group's most significant subsidiaries: Christian Gellerstad, board member of Credit Suisse (Schweiz) AG (annual fee of CHF 100,000), Blythe Masters, board member and chair of Credit Suisse Holdings (USA), Inc. ("all in" annual fee of USD 300,000), Richard Meddings, board member and vice-chair of Credit Suisse International and Credit Suisse Securities (Europe), Limited (annual fee of GBP 150,000), Amanda Norton, board member and risk committee chair of Credit Suisse Holdings (USA), Inc., effective September 19, 2022 (annual fees of USD 200,000, pro rated from September 19, 2022) and Ana Paula Pessoa, board member and chair of Credit Suisse Bank (Europe), S.A. (annual fee of CHF 150,000) and chair of the Brazil Advisory Board (annual fee of CHF 150,000).
- At the 2022 AGM, shareholders approved a maximum amount of total compensation to be awarded to Board members until the 2023 AGM of CHF 13 million. For the total compensation awarded to members of the Board, the Group will make estimated payments of CHF 0.6 million for the 2022 / 2023 Board period to cover the mandatory employer social security contributions as required under the social security laws applicable to the individual Board members based on their domicile and employment status. These contributions do not form part of the Board members' compensation.
- The Chair fee of the Chairman is set at CHF 1.5 million to be awarded as 100% Group shares. For the 2022 to 2023 AGM period, the Chairman proposed to voluntarily waived his Chair fee of CHF 1.5 million and this proposal was accepted by the Board. The total compensation of the Chairman included estimated benefits for the period from the 2022 AGM to the 2023 AGM of CHF 190,819, including pension and health insurance benefits.
- Mirko Bianchi joined the GNC effective February 1, 2023 and Amanda Norton joined the board effective July 1, 2022; their compensation was pro-rated to reflect this. Michael Klein's compensation was pro-rated to reflect his departure from the Board effective October 27, 2022.
- The aggregate amount of CHF 425,000 for Christian Gellerstad consisted of his Compensation Committee Chair fee of CHF 300,000 and his Vice-Chairman and Lead Independent Director fee of CHF 125,000.

GNC = Governance and Nominations Committee; AC = Audit Committee; CC = Compensation Committee; CFCCC = Conduct and Financial Crime Control Committee; RC = Risk Committee; DTTC = Digital Transformation and Technology Committee; SAC = Sustainability Advisory Committee; C = Chair; M = Member. All figures stated are based on gross amounts, i.e. before any applicable mandatory tax or social security contributions.

- As of December 31, 2021, one-half of the Board member fees to be awarded in Group shares have been delivered to Board members. The applicable Group share price was CHF 9.35. The remaining shares will be delivered to Board members at or around the date of the 2022 AGM, and the share price for this second share delivery will be determined at that time. Group shares are subject to a four-year blocking period.
- Subsidiary board fees were awarded for the following subsidiary and advisory board roles: i) Ms. Brady served from August 19, 2021 until December 2021 as non-executive board member of the UK subsidiaries Credit Suisse International and Credit Suisse Securities (Europe) Limited and receives annual fees of CHF 100,000 for this role; ii) as of January 1, 2022, Mr. Meddings assumed the chair of the UK subsidiaries Credit Suisse International and Credit Suisse Securities (Europe) Limited, subject to regulatory approval, and received an annual chair fee of GBP 250,000 on a pro-rated basis until March 10, 2022, at which time he stepped down as chair of the UK subsidiary, but remains on the board in the role of Vice-Chair, with an annual fee of GBP 150,000, payable on a pro-rated basis from March 10, 2022 to the 2022 AGM; iii) Mr. Colombas was appointed as non-executive chair of the Credit Suisse Bank (Europe), S.A. effective January 2022, subject to regulatory approval, and receives annual fees of CHF 150,000 for this role; iv) Mr. Gellerstad serves as non-executive board member of the Credit Suisse (Schweiz) AG and receives annual fees of CHF 100,000 for this role; v) Ms. Masters serves as non-executive chair of the Credit Suisse Holdings (USA), Inc. (CSH USA), effective January 2022, and receives annual fees of USD 300,000 for this role; vi) Ms. Pessoa served from June 2021 until December 2021 as non-executive chair of Credit Suisse Bank (Europe) S.A. and as chair of the Credit Suisse Brazil Advisory Board effective January 2022, and receives annual fees of CHF 150,000 for each of these roles. All amounts have been pro-rated to reflect the time the respective Board member served on the subsidiary board.
- At the 2021 AGM, shareholders approved a maximum amount of total compensation to be awarded to Board members until the 2022 AGM of CHF 12 million. For the total compensation awarded to members of the Board, the Group will make estimated payments of CHF 0.6 million for the 2021 / 2022 Board period to cover the mandatory employer social security contributions as required under the social security laws applicable to the individual Board members based on their domicile and employment status. These contributions do not form part of the Board members' compensation.

- 4 The Chair fee of the Chairman is set at CHF 1.5 million to be awarded as 100% Group shares. In the case of Mr. Lehmann, this amount had been pro-rated from January 16, 2022 until the 2022 AGM. The total compensation of the Chairman includes benefits for the period from January 16, 2022 to the 2022 AGM of CHF 54,776, including pension and health insurance benefits. Mr. Lehmann furthermore received pro-rated amounts for his Risk Committee membership (October 1-31, 2021), Risk Committee Chair (November 1, 2021 – January 16, 2022), Audit Committee membership (October 1, 2021 – January 16, 2022), Conduct and Financial Crime Control Committee membership (October 1, 2021 – January 16, 2022) and Governance and Nominations Committee membership (November 1, 2021 – January 16, 2022). Upon becoming Chairman, Mr. Lehmann did not receive a separate fee for chairing the Governance and Nominations Committee or serving as the ad interim Risk Committee Chair until the AGM.
- 5 Mr. Horta-Osório served as Chairman and Board member from May 1, 2021 until January 16, 2022. As per terms of his resignation agreement, Mr. Horta-Osório remained at Credit Suisse until January 31, 2022 to ensure a smooth handover to his successor. He received his Chair fee (pro-rated from May 1, 2021 until January 31, 2022) fully in cash.
- 6 Since January 1, 2022, Ms. Masters served as Chair of the new Digital Transformation and Technology Committee and received annual fees of CHF 150,000 for this role or CHF 50,000 for the period from January 1, 2022 to the 2022 AGM.
- 7 In addition to his Audit Committee Chair fee of CHF 400,000, Mr. Meddings received CHF 200,000 or 50% of the annual Risk Committee Chair fee for taking on the role of the Risk Committee Chair on an ad interim basis for the six month period from May 1, 2021 through October 31, 2021. During this period, Mr. Meddings did not receive the regular Risk Committee membership fee. For the period between November 1, 2021 and April 29, 2022, Mr. Meddings received CHF 50,000 or 50% of the regular Risk Committee membership fee.

**Executive Board****Former Executive Board members (audited)**

For 2022, no compensation payments were made to former Executive Board members who left Credit Suisse, which was also the case for 2021. Further, no payments were made to former Executive Board members pursuant to non-compete arrangements.

**Utilization of Executive Board compensation approved at the 2022 AGM**

At the 2022 AGM, shareholders approved a maximum aggregate amount of fixed compensation to be paid to members of the Executive Board for the period from the 2022 AGM to the 2023 AGM of CHF 34.0 million. Of this amount, 3.0 million was anticipated for two potential new roles on the Executive Board. Fixed compensation includes base salaries, role-based allowances, dividend equivalents, pension and other benefits as well as replacement awards granted to new Executive Board members during this period. In line with the AoA, if new members join the Executive Board or members of the Executive Board are promoted during the period for which compensation has already been approved by shareholders, a further 30% of the aggregate amounts already approved may be used for the compensation of such members, which amounted to CHF 10.2 million in addition to the approved CHF 34.0 million amount.

in CHF million

<b>Maximum aggregate fixed compensation approved for the 2022 AGM to 2023 AGM period</b>	<b>34.0</b>
Utilization of approved amount:	
Base salaries, pension and other benefits	26.2
Part of replacement award for new joiner to Executive Board	6.1
<b>Total utilized amount</b>	<b>32.3</b>
Remaining unutilized amount (originally designated for potential new Executive Board role)	1.7
<b>30% supplementary amount for new Executive Board members joining after the 2022 AGM</b>	<b>10.2</b>
Utilization of supplementary amount:	
D. Joshi	1.2
M. Diethelm	1.8
E. Low	1.7
N. Patel	0.9
<b>Total base salaries, pension and other benefits for new joiners</b>	<b>5.6</b>
Part of replacement award to D. Joshi	0.9
<b>Total supplementary funding utilized</b>	<b>6.5</b>
Remaining unutilized amount	3.7
<b>Total fixed compensation amount paid to Executive Board members</b>	<b>38.8</b>

At the 2022 AGM, shareholders also approved an aggregate amount of CHF 12.1 million for share-based replacement awards for new Executive Board members who joined the Executive Board in 2022. This amount was used for such awards granted or to be granted to the new Executive Board members who joined in 2022.

**2020 Long-term incentive awards (LTI awards) (2020-2022 performance period)**

As disclosed in the 2019 Compensation Report, the performance of the 2020 LTI awards is based on RoTE, adjusted tangible book value per share (TBVPS) and RTSR each weighted equally and measured over the three-year period from the beginning of 2020 until the end of 2022. The 2020 LTI awards had an initial aggregate maximum opportunity of CHF 53.75 million approved at the 2020 AGM, and the number of shares granted was calculated by dividing the maximum opportunity by the Group share price at the time of grant. The share price utilized was based on the same methodology used for share-based awards granted to Group employees. At the end of the 2020-2022 performance period, performance had fallen short of the threshold levels for each metric, resulting in zero vesting. As an exception, for the former CFO who was classified as a UK PRA MRT and therefore had 40% of his LTI based on a non-financial assessment. As a result, Mr. Mathers' 2020 LTI was assessed at 7% of his maximum opportunity based on the share price at the end of 2022.

**Cash settlement of share awards**

The Executive Board members are permitted to elect, subject to minimum shareholding requirements, at a predefined date in advance of settlement, to receive their vested share-based awards in the form of shares, cash or 50% in the form of shares and 50% in cash, in each case based on the Group share price at the time of settlement. An election to receive cash is subject to reversal if at the time of settlement, the Group share price is less than 75% of the share price at the time of election. The timing and pricing of settlement will be the same as under the previous award plan and the plans of those below the Executive Board level.

**Contract lengths, termination and change in control provisions**

All members of the Executive Board have employment contracts with the Group that are valid until terminated. The standard notice period for termination of employment by either the Group or the respective Executive Board member is six months. Executive Board members may be subject to a non-compete period of up to 12 months and may be compensated for this period by mutual agreement. In the event of termination, there are no contractual provisions that allow for the payment of severance awards to Executive Board members beyond the regular compensation awarded during the notice period. Pre-defined conditions for all employees, including Executive Board members, apply for the payment of outstanding deferred compensation awards, depending on whether the termination of employment was voluntary, involuntary, by mutual agreement or as the result of a change in control. In case of a termination for cause, any deferred compensation and outstanding awards will be forfeited. There are no other contracts, agreements, or arrangements with the members of the Executive Board that provide for other types of payments or benefits in connection with termination of employment that are not generally available to other employees of the Group.

In the case of a change in control, the treatment of outstanding awards for all employees, including Executive Board members, will be determined by the Board upon recommendation of the Compensation Committee with the aim of maximizing shareholder value, subject to circumstances and prevailing market conditions. There are no provisions in the employment contracts of Executive Board members or any other pre-determined arrangements that require the payment of any type of extraordinary benefits, including special severance awards or transaction premia, in the case of a change in control.

#### Other outstanding awards

As of December 31, 2022, the outstanding cash-based deferred compensation awards granted to certain Executive Board members in prior years comprised contingent capital awards, deferred cash awards and deferred short-term incentive cash awards (STI cash awards). The cumulative value of such cash-based awards

at year-end was CHF 5 million. These amounts include the cash value of dividend equivalents related to unvested share awards at their respective grant dates and at December 31, 2022.

#### Minimum shareholding requirements

For 2022, the shareholding requirements were increased to provide greater alignment with shareholder interests. Given that the majority of the Executive Board members joined the Executive Board during 2022, only two of the eleven members fulfilled the minimum shareholding requirements as of December 31, 2022. This requirement is measured against the number of shares owned plus the number of unvested shares. The CEO and other Executive Board members are not permitted to sell shares until they have met the minimum shareholding requirements, except as necessary to fulfill taxation obligations on the respective shares awarded.

1 Includes shares that were initially granted as deferred compensation and have vested.

2 For 2022, includes unvested shares originating from LTI awards based on performance payout achieved at the end of the applicable three year performance period. For 2021, includes unvested shares originating from LTI opportunities calculated on the basis of maximum opportunity for awards that have not reached the end of their three-year performance period, given that the actual achievement level and associated number of unvested shares cannot be determined until the end of the performance period. For LTI awards that have reached the end of their three-year performance period, the number of unvested shares reflects the actual number of shares earned based on achievement of the performance target levels.

3 Determined based on the number of unvested awards multiplied by the share price at grant.

- 4 For 2022, includes the value of unvested LTI opportunities based on performance payout achieved at the end of the applicable three year performance period. For 2021, includes the value of unvested LTI opportunities. For LTI awards that have reached the end of their three-year performance period, the value is based on the actual number of shares eligible to vest. For LTI opportunities that have not reached the end of their three-year performance period, this is determined based on the number of shares at fair value at the time of grant, multiplied by the share price at the end of the year.

## Executive Board outstanding deferred compensation awards

<sup>1</sup> Included awards granted to Executive Board members with respect to their previous roles prior to joining the Executive Board.

<sup>2</sup> Included Executive Board members who were in office on December 31, 2022.

<sup>3</sup> Included the deferred cash portion of STI awards.

<sup>4</sup> Included the outstanding 2020 LTI opportunity.

### Executive Board loans (audited)

The majority of loans outstanding to Executive Board members are mortgages or loans against securities. Such loans are made on the same terms available to employees under the Group's employee benefit plans. Pursuant to the AoA, each Executive Board member may be granted individual credit facilities or loans up to a maximum of CHF 20 million. As of December 31, 2022, 2021 and 2020, outstanding loans to Executive Board members amounted to CHF 6 million, CHF 18 million and CHF 13 million, respectively. The number of individuals with outstanding loans at the beginning and the end of 2022 was eight and four, respectively, and the highest loan outstanding was CHF 4 million to Mr. Körner.

All mortgage loans to Executive Board members are granted either with variable or fixed interest rates over a certain period. Typically, mortgages are granted for periods of up to ten years. Interest rates applied are based on refinancing costs plus a margin, and interest rates and other terms are consistent with those applicable to other employees. Loans against securities are granted at interest rates and on terms applicable to such loans granted to other employees. The same credit approval and risk assessment procedures apply to Executive Board members as for other employees. Unless otherwise noted, all loans to Executive Board members were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and in consideration of the terms which apply to all Group employees. These loans did not involve more than the normal risk of collectability or present other unfavorable features.

- Refer to "Banking relationships with Board and Executive Board members and related party transactions" in IV – Corporate Governance – Additional information for further information.

## Group

### Compensation awarded to Material Risk Takers and Controllers

Total compensation awarded to MRTCs for 2022 was CHF 1,514 million (excluding the Transformation Award), of which 21% was in the form of variable incentive compensation, with 59% of the variable incentive compensation subject to malus.

Excluding Executive Board members who were in office on December 31, 2022 or 2021, respectively. Of the total compensation awarded to MRTCs for 2022 and 2021, 43% and 35%, respectively, was deferred. Of the total variable incentive compensation awarded to MRTCs for 2022 and 2021, 59% and 41%, respectively, was deferred.

- 1 The number of MRTCs receiving fixed compensation for 2022 and 2021 was 1,577 and 1,480, respectively.
- 2 Included upfront cash awards.
- 3 Included replacement awards to compensate employees for the equivalent fair value of deferred awards cancelled by previous employers as well as sign-on payments.
- 4 For 2022 and 2021, there were no sign-on payments paid to MRTCs.

### Impact of share-based compensation on shareholders' equity

In general, the income statement expense recognition of share-based awards on a pre-tax basis has a neutral impact on shareholders' equity because the reduction to shareholders' equity from the expense recognition is offset by the obligation to deliver shares, which is recognized as an increase to equity by a corresponding amount. Shareholders' equity includes, as additional paid-in capital, the tax benefits associated with the expensing and subsequent settlement of share-based awards.

Since 2017, the Group has been fulfilling its share delivery obligations by purchasing shares in the market. The Group maintained this practice during 2022. Following the 2021 Share Repurchase Program, the Board has decided not to cancel the 25,087,000 shares repurchased under the share buyback program by way of a capital reduction, and the intention is to use these shares exclusively for servicing employee share award plans. Otherwise, the Group will continue covering future share delivery obligations through market purchases.

### Share-based awards outstanding

At the end of 2022, there were 253.9 million share-based awards outstanding, including 147.4 million share awards, 44.6 million performance share awards and 61.9 million SDP share awards.

- Refer to "Note 30 – Employee deferred compensation" in VI – Consolidated financial statements – Credit Suisse Group for further information.

### Subsequent activity

In early 2023, the Group granted approximately 108.9 million new share awards with respect to performance in 2022.

In the first half of 2023, the Group plans to settle 63.8 million deferred awards from prior years, including 47.4 million share awards and 16.5 million performance share awards. The Group will continue to meet this delivery obligation through market purchases.

- Refer to "Share purchases" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management for more information.

## Potential negative adjustments of legacy performance share awards

Performance share awards will no longer be used as a form of deferred compensation award for the 2022 performance year onwards.

Outstanding performance share awards granted for prior years are subject to downward adjustments in the event of a divisional loss or a negative ROE of the Group, whichever results in a larger adjustment. The Compensation Committee has the discretion to exclude extraordinary items from the calculation of divisional losses or Group ROE as it deems appropriate. If the Group reports a negative ROE, the number of outstanding awards is reduced by the same percentage as the negative ROE. The amount of negative adjustment applied in the event of divisional loss is shown in the table below.

### Negative adjustment if division incurs a loss

Division loss before taxes (in CHF billion)	Negative adjustment on award balance (in %)
1.00	15
2.00	30
3.00	45
4.00	60
5.00	75
6.00	90
6.67	100

- Refer to the “Compensation outcomes for 2022” in Group Compensation for further information.

## Competitive benchmarking

The assessment of the economic and competitive environment is an important element of the compensation process as the Group strives for market-informed, competitive compensation levels. Internal expertise and the services of compensation consulting firms are used to benchmark compensation levels against relevant peers, taking into account geographical variations. The Compensation Committee is provided with regular reports from an independent compensation adviser on industry and market trends, including competitor performance and pay trends. The core group considered for the purposes of Group peer benchmarking are Bank of America, Barclays, Citigroup, Deutsche Bank, Goldman Sachs, JPMorgan Chase, Morgan Stanley and UBS. Specific benchmarking may include other peers, depending on the business area or geographic location, as appropriate.

The defined RTSR peer group used in the assessment of Executive Board performance includes Banco Santander, Bank of America, Barclays, BBVA, BNP Paribas, Citigroup, Deutsche Bank, Goldman Sachs, HSBC, ING Group, Intesa Sanpaolo, JPMorgan Chase, Julius Bär, Morgan Stanley, Nordea Bank, NatWest Group, Société Générale, Standard Chartered and UBS, companies chosen based on similarities in geographical coverage and scope of businesses.

For consideration of European and local practices, the Compensation Committee also references a cross-industry peer group of multinational companies headquartered in Europe selected on the basis of comparability to Credit Suisse in size, scale, global scope of operations and economic influence. In addition to the companies already listed previously and those included as part of the RTSR peer group, peers considered for Executive Board compensation include: ABN AMRO Bank, CaixaBank, Commerzbank, Credit Agricole, Danske Bank, KBC Group, Lloyds Banking Group, Skandinaviska Enskilda Banken AB and UniCredit.

## Focus on risk and control

Risk and control considerations are an integral part of the performance assessment and compensation processes. This ensures that the Group’s approach to compensation includes a focus on risk and internal control matters and discourages excessive risk taking. Senior management from the Group’s corporate functions, including Risk, Compliance, General Counsel, People, Internal Audit and Product Control, provide the Compensation Committee with comprehensive feedback on regulatory, audit, disciplinary and risk-related issues, or trends across the Group, relevant to the assessment of the Group’s risk and control culture. Divisions are assessed against risk and conduct measures for the year, and the consolidated findings are presented to the Compensation Committee and the CEO. Based on these assessments, the Compensation Committee considers and approves adjustments to the divisional pool levels.

As approved by the Compensation Committee, Conduct Boards (CBs) have been established at the Group level, for the control functions overall, as well as within each business division. The CBs review disciplinary events and decide on disciplinary sanctions proposed by the recommendation teams, which include representatives from the control functions. As regards to the financial consequences of a disciplinary sanction, the Compensation Committee approves the application of malus for all Managing Directors reporting to an Executive Board member. The Group Conduct Board (GCB) meets regularly to ensure that sanctions applied are in line with the Group’s risk appetite, market practice and regulatory requirements.

Implemented in the fourth quarter of 2021, the Significant Events process is a formal and systematic event-driven approach for categorizing the most serious risk matters to ensure that a review of all employees in proximity is undertaken, including those accountable for the Significant Event. This process is incremental to the existing performance management and disciplinary processes, which continue to exist in parallel.

A Significant Event is defined as an event that results from an insufficient control, control failure or absence of control, or misconduct by employees, and the event meets one of the following criteria:

- Had a significant financial impact (direct loss, provision or restatement) on CS Group of > CHF 50 million;

- Had a significant impact on the reputation of CS Group, or any of its subsidiaries, or is very likely to have such an impact when information becomes public; or
- Had a significant negative impact on the relationship of the Group, or any of its subsidiaries, with regulators (e.g., subjected to a significant investigation or other regulatory action) or with other key stakeholders (e.g., shareholders and other investors, as well as on outcomes for clients of Credit Suisse).

When an incident meets the Group-wide Significant Event criteria, the GCB approves the event for investigation under the Significant Events process. This is then confirmed by the Board Risk Committee. Group Reward (within the People function) have authority to suspend variable compensation payments to employees identified as being proximate to the event, pending completion of the investigation. The GCB reviews and approves proximity findings and compensation adjustment for all employees below

Executive Board level. The Compensation Committee or Advisory Remuneration Committee, as applicable, have oversight over the GCB's decisions. Adjustments may be made to variable compensation (related to the current performance year) or to prior year variable compensation by applying malus/clawback provisions.

### Malus and clawback provisions

All deferred compensation awards granted contain malus provisions that enable the Group to reduce or cancel the awards prior to settlement if the participant engages in certain defined conduct. All variable incentive compensation granted to UK PRA MRTs and employees regulated by the Bank of Italy are subject to clawback. Other EU-regulated employees are also subject to clawback provisions as required by applicable legal or regulatory requirements. Malus and clawback provisions were enforced during 2022.

	<u>Application</u>	<u>Scope/Criteria</u>
<b>Malus</b>	<ul style="list-style-type: none"> <li>• Reduction or cancellation of outstanding deferred awards prior to settlement</li> <li>• Applies to all outstanding deferred awards granted</li> </ul>	<ul style="list-style-type: none"> <li>• Impermissible disclosure or misuse of Group information, or willful engagement in conduct that is materially detrimental to an interest of the Group;</li> <li>• Conduct that evidences serious misbehavior or serious error;</li> <li>• Conduct that causes, could cause or could have caused the Group or any division or region to suffer a significant downturn in financial performance or regulatory capital base;</li> <li>• Significant failure of risk management; or</li> <li>• Conduct that is reviewed by the Group's disciplinary conduct, ethics or similar committee</li> </ul>
<b>Clawback</b>	<ul style="list-style-type: none"> <li>• Claim back of deferred and non-deferred variable compensation after settlement</li> <li>• For UK PRA MRTs, clawback may be applied up to seven years from grant date (or such longer period as may be required)</li> <li>• The Group will apply clawback provisions to the extent permitted under local laws, as required</li> </ul>	<p>For UK PRA MRTs, clawback may be applied in certain situations, including:</p> <ul style="list-style-type: none"> <li>• Conduct which resulted in significant losses to the Group;</li> <li>• Failure to meet appropriate standards of fitness and propriety;</li> <li>• Reasonable evidence of misconduct or misbehavior or a material or serious error;</li> <li>• The Group or relevant business unit suffers a material failure of risk management;</li> <li>• A regulator mandates a significant increase in regulatory capital for the Group or any division or region; or</li> <li>• The individual has contributed to any regulatory sanctions imposed on the Group or division or region</li> </ul> <p>Similar clawback provisions apply for employees regulated by the Bank of Italy and other EU-regulated employees who are subject to a clawback requirement.</p>

### Covered Employees (including Material Risk Takers and Controllers)

Covered employees are subject to a heightened level of scrutiny over the alignment of their compensation with performance and risk considerations.

#### Employee categories

- Covered Employees**
- MRTCs
  - US-based revenue producers in the Investment Bank division

#### Compensation process

##### **Focus on risk assessment**

- Covered employees and their managers are required to define

- MRTCs**
- Members of the Executive Board
  - Employees who report directly to a member of the Executive Board
  - Employees, individually or as part of a group, with the ability to put material amounts of the Group’s capital at risk
  - Top 150 paid employees across the Group based on total compensation
  - Any employee identified as taking or controlling material risks on behalf of the Group, as prescribed by EU / UK regulators
  - Senior relationship managers in the Wealth Management-related businesses
  - Other individuals whose roles have been identified as having a potential impact on the market, reputational and operational risk of the Group
- role-specific risk objectives and to incorporate risk considerations in their performance evaluations and when setting variable incentive compensation
- Types of risks considered vary by role (e.g., reputational, credit, market, operational, liquidity, legal and compliance)
  - Both realized and potential risk outcomes are assessed

## Board

### Board shareholdings

The following table discloses the shareholdings of the Board members, their immediate family, and companies in which they have a controlling interest. As of December 31, 2022, 2021 and 2020, there were no Board members with outstanding options.

#### Board shareholdings by individual

end of	2022	2021
<b>December 31 (shares) <sup>1</sup></b>		
Axel Lehmann	568,066	108,220
Mirko Bianchi <sup>2</sup>	21,676	—
Iris Bohnet	201,502	115,182
Clare Brady	57,985	12,695
Christian Gellerstad	247,267	138,884
Keyu Jin <sup>2</sup>	24,559	—
Shan Li	117,064	49,062
Seraina Macia	190,728	105,035
Blythe Masters	57,918	12,027
Richard Meddings	156,811	58,403
Amanda Norton <sup>2</sup>	18,217	—
Ana Paula Pessoa	118,570	79,404
<b>Total</b>	<b><u>1,780,363</u></b>	<b><u>678,912</u></b> <sup>3</sup>

- 1 Includes Group shares that are subject to a blocking period of up to four years; includes shareholdings of immediate family members.
- 2 Mirko Bianchi, Keyu Jin and Amanda Norton were newly elected at the 2022 AGM.
- 3 Excluded 335,902 shares held by António Horta-Osório, who stepped down as Chairman as of January 16, 2022; 71,465 shares held by Michael Klein, who stepped down as of October 27, 2022; and 422,140 shares held by Kai S. Nargolwala and 199,154 shares held by Severin Schwan, who both did not stand for re-election at the 2022 AGM.

### Board loans

The majority of loans outstanding to members of the Board are mortgages or loans against securities. Such loans are made to Board members on the same terms available to third-party clients. Pursuant to the AoA, each member of the Board may be granted individual credit facilities or loans up to a maximum of CHF 20 million at market conditions. As of December 31, 2022, 2021 and 2020, outstanding loans to Board members amounted to CHF 4 million, CHF 7 million and CHF 4 million, respectively.

## 252 Compensation

Board members with loans do not benefit from employee conditions, but are subject to conditions applied to clients with a comparable credit standing. Unless otherwise noted, all loans to Board members are made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons. Such loans do not involve more than the normal risk of collectability or present other unfavorable features. In addition to the loans listed below, the Group or any of its banking subsidiaries may enter into financing and other banking agreements with companies in which current Board members have a significant influence as defined by the SEC. Examples include holding executive and/or board level roles in these companies. Unless otherwise noted, loans extended by the Group to such companies are also made in the ordinary course of business and at prevailing market conditions. As of December 31, 2022, 2021 and 2020, there was no loan exposure to such related party companies that was not made in the ordinary course of business and at prevailing market conditions.

- Refer to “Banking relationships with Board and Executive Board members and related party transactions” in IV – Corporate Governance – Additional information for further information.

#### Board loans by individual (audited)

end of	2022	2021
<b>December 31 (CHF)</b>		
Christian Gellerstad	3,418,350	3,456,750
Seraina Macia	928,000	936,000
<b>Total</b>	<b><u>4,346,350</u></b>	<b><u>4,392,750</u></b> <sup>1</sup>

Includes loans to immediate family members and companies, in which the respective Board member has an ownership stake of 50% or higher.

- 1 Excluded a loan of CHF 2,477,554 held by António Horta-Osório, who stepped down from the Board as of January 16, 2022.

#### Former members of the Board (audited)

One former member of the Board is eligible to receive office infrastructure and secretarial support. These services are based on existing resources. No other additional fees, severance payments or other forms of compensation were paid to former members of the Board or related parties during 2022 and 2021.

## 256 Consolidated financial statements – Credit Suisse Group

# Controls and procedures

## Evaluation of disclosure controls and procedures

The Group has evaluated the effectiveness of its disclosure controls and procedures as of the end of the period covered by this report under the supervision and with the participation of management, including the Group Chief Executive Officer (CEO) and Chief Financial Officer (CFO), pursuant to Rule 13(a)-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). The Group identified certain material weaknesses in internal control over financial reporting as of December 31, 2021 and, consequently, December 31, 2022, which are described below. As a result of these material weaknesses, the Group CEO and CFO have concluded that, as of December 31, 2022, the Group's disclosure controls and procedures were not effective.

Notwithstanding the existence of these material weaknesses in internal control over financial reporting, the Group confirms that its consolidated financial statements in this Annual Report fairly present, in all material respects, the Group's consolidated financial condition as of December 31, 2022 and 2021, and its consolidated results of operations and cash flows for the years ended December 31, 2022, 2021 and 2020, in conformity with US GAAP, as reflected in PricewaterhouseCoopers AG's (PwC) report on those financial statements.

## Management's report on internal control over financial reporting

The management of the Group is responsible for establishing and maintaining adequate internal control over financial reporting. The Group's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has made an evaluation and assessment of the Group's internal control over financial reporting as of December 31, 2022 using the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control – Integrated Framework (2013)". Based upon its review and evaluation, management, including the Group CEO and CFO, has concluded that, as of December 31, 2022, the Group's internal control over financial reporting was not effective because of the material weaknesses described below. For the same reasons, management has also reassessed its conclusion as to the effectiveness of internal control over

financial reporting as of December 31, 2021, and concluded that internal control over financial reporting was also not effective as of such date.

Management did not design and maintain an effective risk assessment process to identify and analyze the risk of material misstatements in its financial statements and did not design and maintain effective monitoring activities relating to (i) providing sufficient management oversight over the internal control evaluation process to support the company's internal control objectives; (ii) involving appropriate and sufficient management resources to support the risk assessment and monitoring objectives; and (iii) assessing and communicating the severity of deficiencies in a timely manner to those parties responsible for taking corrective action. These material weaknesses contributed to an additional material weakness, as management did not design and maintain effective controls over the classification and presentation of the consolidated statement of cash flows. Specifically, certain control activities over the completeness and the classification and presentation of non-cash items in the consolidated statement of cash flows were not performed on a timely basis or at the appropriate level of precision. This material weakness resulted in the revisions contained in our previously issued consolidated financial statements for the three years ended December 31, 2021 as disclosed in the 2021 Annual Report. Additionally, each of these material weaknesses could result in further misstatements of account balances or disclosures that would result in a material misstatement to the annual consolidated financial statements that would not be prevented or detected.

PwC, the independent registered public accounting firm that audited the financial statements for the year ended December 31, 2022, included in this annual report, has issued an adverse opinion on the effectiveness of the Group's internal control over financial reporting as of December 31, 2022.

## Remediation plans

Management and the Group Audit Committee have worked continuously in recent years to improve the control environment surrounding financial reporting with increased investment and additional resources. Management is committed to maintaining a strong internal control environment and implementing measures designed to help ensure that the material weaknesses are remediated as soon as possible. Management is developing a remediation plan to address the material weaknesses referred to above, including strengthening the risk and control frameworks, and which will build on the significant attention that management has devoted to controls to date. Additionally, we will implement robust controls to ensure that all non-cash items are classified appropriately within the consolidated statement of cash flows.

## Changes in internal control over financial reporting

Other than as described above, there were no changes in the Group's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Group's internal control over financial reporting.

# Report of the Independent Registered Public Accounting Firm

PricewaterhouseCoopers AG, Zurich, Switzerland, PCAOB ID 1358

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and shareholders of Credit Suisse Group AG

### Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Credit Suisse Group AG and its subsidiaries (the "Group") as of December 31, 2022 and 2021, and the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2022, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Group's internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Group as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2022 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Group did not maintain, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the COSO because material weaknesses in internal control over financial reporting existed as of that date related to (i) the effectiveness of the risk assessment process to identify and analyze the risk of material misstatements in the Group's financial statements, (ii) the effectiveness of monitoring activities relating to providing sufficient management oversight over the internal control evaluation process to support the Group's internal control objectives, involving appropriate and sufficient management resources to support the risk assessment and monitoring objectives and assessing and communicating the severity of deficiencies in a timely manner to those parties responsible for taking corrective action and (iii) the effectiveness of controls over the completeness and the classification and presentation of non-cash items in the consolidated statements of cash flows.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. The material weaknesses referred to above are described in the accompanying Management's report on internal control over financial reporting. We considered these material weaknesses in determining the nature, timing, and extent of audit tests applied in our audit of the 2022 consolidated financial statements, and our opinion regarding the effectiveness of the Group's internal control over financial reporting does not affect our opinion on those consolidated financial statements.

The Group's management and we previously concluded that the Group maintained effective internal control over

financial reporting as of December 31, 2021. However, the Group's management and we have subsequently determined that material weaknesses in internal control over financial reporting existed and accordingly concluded that internal control over financial reporting was not effective as of such date.

*Change in Accounting Principle*

As discussed in Note 2 and Note 20 to the consolidated financial statements, the Group changed the manner in which it accounts for credit losses on certain financial instruments in 2020.

PricewaterhouseCoopers AG, Birchstrasse 160, Postfach, 8050 Zurich, Switzerland  
Telephone: +41 58 792 44 00, [www.pwc.ch](http://www.pwc.ch)

PricewaterhouseCoopers AG is a member of the global PricewaterhouseCoopers network of firms, each of which is a separate and independent legal entity.

### **Basis for Opinions**

The Group's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in management's report referred to above. Our responsibility is to express opinions on the Group's consolidated financial statements and on the Group's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Group in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

### **Definition and Limitations of Internal Control over Financial Reporting**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Critical Audit Matters**

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

### **Fair Value of Certain Level 3 Financial Instruments**

As described in Note 36 to the consolidated financial statements, the Group carried CHF 9,312 million of its assets and CHF 9,496 million of its liabilities measured at fair value on a recurring basis that are categorized as level 3 of the fair value hierarchy as of December 31, 2022. For these financial instruments, for which no prices are available and which have significant unobservable inputs, the determination of fair value may require the use of either industry standard models or internally developed proprietary models, as well as subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. The significant unobservable inputs used by management to determine the fair value of certain of these level

3 financial instruments included (i) correlation, (ii) market implied life expectancy, in years, (iii) UK mortality, (iv) price, (v) volatility, and (vi) credit spread.

The principal considerations for our determination that performing procedures relating to the fair value of certain level 3 financial instruments is a critical audit matter are (i) the significant judgment by management in determining the fair value of these financial instruments, which in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating audit evidence related to the fair value of these financial instruments, and (ii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the fair value of financial instruments, including controls over the Group's models, inputs, and data. These procedures also included, among others, for a sample of financial instruments, the involvement of professionals with specialized skill and knowledge to assist in (i) developing an independent estimate of fair value or (ii) testing management's process to determine the fair value of these financial instruments. Developing an independent estimate involved (i) testing the completeness and accuracy of data provided by management, (ii) evaluating and utilizing management's significant unobservable inputs or developing independent significant unobservable inputs, and (iii) comparing management's estimate to the independently developed estimate of fair value. Testing management's process to determine the fair value involved (i) evaluating the reasonableness of management's significant unobservable inputs, (ii) evaluating the appropriateness of the techniques used, and (iii) testing the completeness and accuracy of data used by management to determine the fair value of these instruments.

#### *Allowance for Credit Losses on Certain Collectively Evaluated Corporate and Institutional Loans*

As described in Notes 1 and 20 to the consolidated financial statements, the Group's allowance for credit losses on collectively evaluated corporate and institutional loans was CHF 432 million on corporate and institutional loans held at amortized cost of CHF 107,433 million as of December 31, 2022. The credit loss amounts were based on a forward-looking, lifetime current expected credit losses ("CECL") model by incorporating reasonable and supportable forecasts of future economic conditions available at the reporting date. Expected credit losses were not solely derived from projections of macroeconomic factors. Model overlays based on expert judgment were also applied, considering historical loss experience and industry and counterparty reviews, and were primarily impacting certain corporate and institutional loans portfolios.

The principal considerations for our determination that performing procedures relating to the allowance for credit losses on certain collectively evaluated corporate and institutional loans is a critical audit matter are (i) the significant judgment by management in evaluating model results and assessing the need for overlays to the CECL model output, (ii) the significant judgment and estimation by management in determining an appropriate methodology for the overlays applied, which both in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and in evaluating audit evidence obtained relating to the model results and the appropriateness of overlays to the CECL model output, and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's expected credit loss process, including controls over the Group's models, data, and overlays. The procedures also included, among others, testing management's process for estimating expected credit losses, which included (i) evaluating the appropriateness of the model methodologies used to determine the allowance for credit losses, (ii) testing the completeness and accuracy of data used in the estimate, and (iii) for a sample, evaluating the reasonableness of management's model overlays. The procedures included the use of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of model methodologies and assist in evaluating the audit evidence.

#### *Litigation provisions*

As described in Note 40 to the consolidated financial statements, the Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. As of December 31, 2022, the Group has recorded litigation provisions of CHF 1,172 million. Management's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for which management believes an estimate is possible is zero to CHF 1.2 billion.

The principal considerations for our determination that performing procedures relating to the litigation provisions is a critical audit matter are the significant judgment by management when assessing the likelihood of a loss being incurred and when determining whether a reasonable estimate of the loss or ranges of loss for each claim can be made, which in

**258-II Consolidated financial statements – Credit Suisse Group**

turn led to a high degree of auditor judgment, subjectivity, and effort in evaluating management's assessment of the litigation provisions and related disclosures.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's estimation of the litigation provisions, including controls over determining whether a loss is probable and whether the amount of loss can be reasonably estimated, as well as controls over the related financial statement disclosures. These procedures also included, among others, obtaining and evaluating the letters of audit inquiry with internal and external legal counsel, targeted inquiries with external counsel, evaluating the reasonableness of management's assessment regarding whether an unfavorable outcome is reasonably possible or probable and reasonably estimable, and evaluating the sufficiency of the Group's litigation provisions and related disclosures.

#### *Goodwill Impairment Assessment of the Asset Management and Wealth Management Reporting Units*

As described in Note 21 to the consolidated financial statements, the Group's goodwill balance was CHF 2,903 million as of December 31, 2022, which is allocated to the Group's reporting units, and for which CHF 1,111 million was allocated to the Asset Management reporting unit and CHF 1,304 million was allocated to the Wealth Management reporting unit. Goodwill is reviewed for impairment on an annual basis as of December 31 and at any other time that events or circumstances indicate that the carrying value of goodwill may not be recoverable. In estimating the fair value of its reporting units, management applied a combination of the market approach and the income approach. In determining the estimated fair value, management relied upon its latest five-year financial plan which included significant management assumptions and estimates based on their view of current and future economic conditions and significant assumptions regarding the discount rate under the income approach as well as price to projected earnings and price to book value multiples ("multiples") under the market approach.

The principal considerations for our determination that performing procedures relating to the goodwill impairment assessment of the Asset Management and Wealth Management reporting units is a critical audit matter are (i) the significant judgment by management when developing the fair value measurement of the Asset Management and Wealth Management reporting units, (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions, specifically the five year financial plan, discount rate and multiples, and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls over the valuation of the Asset Management and Wealth Management reporting units. These procedures also included, among others (i) testing management's process for developing the fair value estimate of the Asset Management and Wealth Management reporting units and (ii) developing an independent estimate of fair value for these reporting units. Testing management's process involved (i) evaluating the reasonableness of significant assumptions used by management, specifically the five-year financial plan, discount rate and multiples, (ii) evaluating the appropriateness of the methods used, and (iii) testing the completeness and accuracy of underlying data used in management's model. Developing an independent estimate involved using alternative financial plans, as well as independent discount rate and multiples, and comparing management's estimate to the independently developed estimate. Professionals with specialized skill and knowledge were used to assist in the evaluation of the management's estimate and development of an independent estimate.

The accompanying notes to the consolidated financial statements are an integral part of these statements.

## Notes to the consolidated financial statements

### 1 Summary of significant accounting policies

#### Overview

The accompanying consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). The financial year for the Group ends on December 31. Certain reclassifications have been made to the prior year's consolidated financial statements to conform to the current presentation which had no impact on net income/(loss) or total shareholders' equity.

In preparing the consolidated financial statements, management is required to make estimates and assumptions including, but not limited to, the fair value measurements of certain financial assets and liabilities, the allowance for loan losses, the evaluation of variable interest entities (VIEs), the impairment of assets other than loans, recognition of deferred tax assets, tax uncertainties, pension liabilities and various contingencies. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. While management evaluates its estimates and assumptions on an ongoing basis, actual results could differ materially from management's estimates. Market conditions may increase the risk and complexity of the judgments applied in these estimates.

#### Certain accounting changes

As noted in our 2021 Annual Report, the Group identified an accounting issue that was not material to the prior period financial statements. The Group identified this accounting issue with respect to the net balance sheet treatment relating to the presentation of a limited population of certain securities lending and borrowing activities. As a result, balance sheet and cash flow positions for both assets and liabilities relating to these activities were presented on a gross basis and prior periods were revised in the consolidated financial statements and the related notes.

Beginning with the quarter ended June 30, 2022, the Group has presented these securities lending and borrowing transactions as a single unit of account and as a result these transactions will no longer be presented on a gross basis. The Group did not adjust prior period financial information, which continue to reflect a presentation on a gross basis.

#### Principles of consolidation

The consolidated financial statements include the financial statements of the Group and its subsidiaries. The Group's subsidiaries are entities in which it holds, directly or indirectly, more than 50% of the voting rights or where it exercises control. The Group consolidates limited partnerships in cases where it is the general partner and the limited partners do not have either substantive kick out rights and/or substantive participating rights or is

a limited partner with substantive rights to kick out the general partner or dissolve the partnership and participate in significant decisions made in the ordinary course of business. The Group also consolidates VIEs if the Group is the primary beneficiary in accordance with Accounting Standards Codification (ASC) Topic 810 – Consolidation. The effects of material intercompany transactions and balances have been eliminated.

Where a Group subsidiary is determined to be an investment company as defined by ASC Topic 946 – Financial Services – Investment Companies, interests in other entities held by this Group subsidiary are not consolidated and are carried at fair value.

Group entities that qualify as broker-dealer entities as defined by ASC Topic 940 – Financial Services – Brokers and Dealers do not consolidate investments in voting interest entities that would otherwise qualify for consolidation when the investment is held on a temporary basis for trading purposes. In addition, subsidiaries that are strategic components of a broker-dealer's operations are consolidated regardless of holding intent.

#### Foreign currency translation

Transactions denominated in currencies other than the functional currency of the related entity are recorded by remeasuring them in the functional currency of the related entity using the foreign exchange (FX) rate on the date of the transaction. As of the dates of the consolidated balance sheets, monetary assets and liabilities are reported using the year-end spot foreign exchange rates. Foreign exchange rate differences are recorded in the consolidated statements of operations. Non-monetary assets and liabilities are recorded using the historic exchange rate.

For the purpose of consolidation, the assets and liabilities of Group companies with functional currencies other than the Swiss franc are translated into Swiss franc equivalents using year-end spot foreign exchange rates, whereas revenues and expenses are translated at weighted average foreign exchange rates for the period. Translation adjustments arising from consolidation are included in accumulated other comprehensive income/(loss) (AOCI) within total shareholders' equity. Cumulative translation adjustments are released from AOCI and recorded in the consolidated statements of operations when the Group loses control of a consolidated foreign subsidiary.

#### Fair value measurement and option

The fair value measurement guidance establishes a single authoritative definition of fair value and sets out a framework for measuring fair value. The fair value option creates an alternative measurement treatment for certain financial assets and financial liabilities. The fair value option can be elected at initial recognition of the eligible item or at the date when the Group enters into an agreement which gives rise to an eligible item (e.g., a firm commitment or a written loan commitment). If not elected at

initial recognition, the fair value option can be applied to an item upon certain triggering events that give rise to a new basis of accounting for that item. The application of the fair value option to a financial asset or a financial liability does not change its classification on the balance sheet and the election is irrevocable. Changes in fair value resulting from the election are recorded in trading revenues.

- Refer to “Fair value option” in Note 36 – Financial instruments for further information.

### **Cash and due from banks**

Cash and due from banks consists of currency on hand, demand deposits with banks or other financial institutions and cash equivalents. Cash equivalents are defined as short-term, highly liquid instruments with original maturities of three months or less, which are held for cash management purposes. Restricted cash is any cash or cash equivalent recorded in cash and due from banks subject to restrictions imposed by a governmental or other regulatory agency that require the Group to set aside specified amounts of cash as reserves against transactions and time deposits.

### **Reverse repurchase and repurchase agreements**

Purchases of securities under agreements to resell (reverse repurchase agreements) and securities sold under agreements to repurchase (repurchase agreements) do not constitute economic sales; therefore, they are treated as collateralized financing transactions, which are carried in the consolidated balance sheet at the amount of cash disbursed or received, respectively. Reverse repurchase agreements are recorded as collateralized assets while repurchase agreements are recorded as liabilities. The underlying securities sold continue to be recognized in trading assets or investment securities. The fair value of securities to be repurchased and resold is monitored on a daily basis, and additional collateral is obtained as needed to protect against credit exposure.

Assets and liabilities recorded under these agreements are accounted for on one of two bases, the accrual basis or the fair value basis. Under the accrual basis, interest earned on reverse repurchase agreements and interest incurred on repurchase agreements are reported in interest and dividend income and interest expense, respectively. The Group elects to apply the fair value option to selected agreements pursuant to ASC Topic 825 – Financial Instruments. Under such circumstances, the change in fair value is reported in trading revenues. Accrued interest income and expense are recorded in the same manner as under the accrual method.

Reverse repurchase and repurchase agreements may be netted if they are with the same counterparty, have the same maturity date, settle through the same qualifying clearing institution and are subject to a right of offset allowed by a legally enforceable master netting agreement or a central counterparty’s clearing rules.

### **Securities lending and borrowing transactions**

Securities borrowed and securities loaned that are cash-collateralized are included in the consolidated balance sheet at amounts equal to the cash advanced or received. If securities received as collateral in a securities lending and borrowing transaction may be sold or repledged, they are recorded as securities received as collateral in the consolidated balance sheet and a corresponding liability to return the security is recorded. Securities lending transactions against non-cash collateral in which the Group has the right to resell or repledge the collateral received are recorded at the fair value of the collateral initially received. For securities lending transactions, the Group receives cash or securities collateral in an amount generally in excess of the market value of securities lent. The Group monitors the fair value of securities borrowed and loaned on a daily basis with additional collateral obtained as necessary.

Securities lending and borrowing fees and interest received or paid are recorded in interest and dividend income and interest expense, respectively, on an accrual basis. If the fair value basis of accounting is elected, any resulting change in fair value is reported in trading revenues. Accrued interest income and expense are recorded in the same manner as under the accrual method.

### **Transfers of financial assets**

Transfers of financial assets may involve the sale of these assets to special purpose entities (SPEs), which in turn issue securities to investors. The Group values its beneficial interests in such SPEs at fair value using quoted market prices, if such positions are traded on an active exchange, or financial models that incorporate observable and unobservable inputs, if such positions are not traded on an active exchange.

- Refer to “Note 35 – Transfers of financial assets and variable interest entities” for further information on the Group’s transfer activities.

### **Trading assets and liabilities**

Trading assets and liabilities include debt securities, marketable equity instruments, derivative instruments, certain loans held in broker-dealer entities, commodities and precious metals. Items included in the trading portfolio are carried at fair value. Regular-way security transactions are recorded on a trade-date basis. Unrealized and realized gains and losses on trading positions are recorded in trading revenues.

### **Derivatives**

Freestanding derivative contracts are carried at fair value in the consolidated balance sheets regardless of whether these instruments are held for trading or risk management purposes. Commitments to originate mortgage loans that will be held for sale are considered derivatives for accounting purposes. When derivative features embedded in certain contracts that meet the definition of a derivative are not considered clearly and closely related to the host contract, either the embedded feature is accounted

for separately at fair value or the entire contract, including the embedded feature, is accounted for at fair value. In both cases, changes in fair value are recorded in the consolidated statements of operations. If separated for measurement purposes, the derivative is recorded in the same line item in the consolidated balance sheets as the host contract.

Derivatives classified as trading assets and liabilities include those held for trading purposes and those used for risk management purposes that do not qualify for hedge accounting. Derivatives held for trading purposes arise from proprietary trading activity and from customer-based activity. Realized gains and losses, changes in unrealized gains and losses and interest flows are included in trading revenues. Derivative contracts designated and qualifying as fair value hedges, cash flow hedges or net investment hedges are reported as other assets or other liabilities.

The fair value of exchange-traded derivatives is typically derived from observable market prices and/or observable market parameters. Fair values for over-the-counter (OTC) derivatives are determined on the basis of proprietary models using various input parameters. Derivative contracts are recorded on a net basis per counterparty where a right to offset exists under an enforceable master netting agreement or a central counterparty's clearing rules. Where no such rights exist, fair values are recorded on a gross basis.

Where hedge accounting is applied, the Group formally documents all relationships between hedging instruments and hedged items, including the risk management objectives and strategy for undertaking hedge transactions. At inception of a hedge and on an ongoing basis, the hedge relationship is formally assessed to determine whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items attributable to the hedged risk. The Group discontinues hedge accounting prospectively in the following circumstances:

- (i) the derivative is no longer effective in offsetting changes in the fair value or cash flows of a hedged item (including forecasted transactions);
- (ii) the derivative expires or is sold, terminated or exercised;
- (iii) the derivative is no longer designated as a hedging instrument because it is unlikely that the forecasted transaction will occur; or
- (iv) the designation of the derivative as a hedging instrument is otherwise no longer appropriate.

For derivatives that are designated and qualify as fair value hedges, the carrying values of the underlying hedged items are adjusted to fair value for the risk being hedged. Changes in the fair value of these derivatives are recorded in the same line item of the consolidated statements of operations used to present the changes in the fair value of the hedged item.

When the Group discontinues fair value hedge accounting because it determines that the derivative no longer qualifies as an effective hedge, the derivative will continue to be carried in the consolidated balance sheets at its fair value, and the hedged asset or liability

will no longer be adjusted for changes in fair value attributable to the hedged risk. Interest-related fair value adjustments made to the underlying hedged items will be amortized to the consolidated statements of operations over the remaining life of the hedged item. Any unamortized interest-related fair value adjustment is recorded in the consolidated statements of operations upon sale or extinguishment of the hedged asset or liability, respectively. Any other fair value hedge adjustments remain part of the carrying amount of the hedged asset or liability and are recognized in the consolidated statements of operations upon disposition of the hedged item as part of the gain or loss on disposition.

For hedges of the variability of cash flows from forecasted transactions and floating rate assets or liabilities, the change in the fair value of a designated derivative is recorded in AOCI. These amounts are reclassified into the line item in the consolidated statements of operations in which the hedged item is recorded when the variable cash flow from the hedged item impacts earnings (for example, when periodic settlements on a variable rate asset or liability are recorded in the consolidated statements of operations or when the hedged item is disposed of).

When hedge accounting is discontinued on a cash flow hedge, the net gain or loss will remain in AOCI and be reclassified into the consolidated statements of operations in the same period or periods during which the formerly hedged transaction is reported in the consolidated statements of operations. When the Group discontinues hedge accounting because it is probable that a forecasted transaction will not occur within the specified date or period plus two months, the derivative will continue to be carried in the consolidated balance sheets at its fair value, and gains and losses that were previously recorded in AOCI will be recognized immediately in the consolidated statements of operations.

For hedges of a net investment in a foreign operation, the change in the fair value of the hedging derivative is recorded in AOCI. The Group uses the forward method of determining effectiveness for net investment hedges, which results in the time value portion of a foreign currency forward being reported in AOCI.

#### **Investment securities**

Investment securities include debt securities classified as held-to-maturity and debt securities classified as available-for-sale. Regular-way security transactions are recorded on a trade-date basis.

Debt securities where the Group has the positive intent and ability to hold such securities to maturity are classified as such and are carried at amortized cost, net of any unamortized premium or discount. Debt securities classified as held-to-maturity require an assessment of the current expected credit loss (CECL) at the reporting date.

Debt securities classified as available-for-sale are carried at fair value. Unrealized gains and losses, which represent the difference between fair value and amortized cost, are recorded in AOCI. Amounts reported in AOCI are net of income taxes.

Debt securities classified as available-for-sale are impaired if there is a decline in fair value below amortized cost basis. If the Group intends to sell an impaired security or more likely than not will be required to sell such a security before recovering its amortized cost basis, the entire difference between the amortized cost basis and fair value is recognized as a credit loss. However, if the Group does not intend to sell and is not likely to be required to sell, an assessment is made if a decline in fair value of the security is due to credit-related factors or non-credit related factors. Credit-related impairment is recognized in earnings by recording an allowance for credit losses. Any portion of the unrealized loss that relates to non-credit related factors is recognized in AOCI, net of income taxes.

Amortization of premiums or discounts for debt securities is recorded in interest and dividend income using the effective yield method through the maturity date of the security.

### **Other investments**

Other investments include equity method investments, equity securities without a readily determinable fair value, such as hedge funds, private equity securities and certain investments in non-marketable mutual funds for which the Group has neither significant influence nor control over the investee, and real estate held-for-investment.

Equity method investments are investments for which the Group has the ability to significantly influence the operating and financial policies. Significant influence is typically characterized by ownership of 20% to 50% of the voting stock or in-substance common stock of a corporation or 3% to 5% or more of limited partnership interests. Equity method investments are accounted for under the equity method of accounting or the fair value option, which the Group has elected to apply for selected equity method investments. Under the equity method of accounting, the Group's proportionate share of the profit or loss, and any impairment on the investee, if applicable, is reported in other revenues. Under the fair value option, changes in fair value are reported in other revenues.

Equity securities without a readily determinable fair value are carried at fair value, net asset value practical expedient to estimate fair value or at cost less impairment, adjusted for observable price changes (measurement alternative). Memberships in exchanges are reported at cost, less impairment. Equity securities without a readily determinable fair value held by the Group's subsidiaries that are determined to be investment companies as defined by ASC Topic 946 – Financial Services – Investment Companies are carried at fair value, with changes in fair value recorded in other revenues.

Equity method investments and equity securities without a readily determinable fair value held by subsidiaries that are within the scope of ASC Topic 940 – Financial Services – Brokers and Dealers are measured at fair value and reported in trading assets when the intent of the broker-dealer entity is to hold the asset temporarily for trading purposes. Changes in fair value are reported in trading revenues. Equity securities without a readily

determinable fair value include investments in entities that regularly calculate net asset value per share or its equivalent, with changes in fair value recorded in other revenue.

### **Loans**

#### **Loans held at amortized cost**

Loans which the Group intends to hold until maturity are carried at outstanding principal balances, net of the following items: unamortized premiums, discounts on purchased loans, deferred loan origination fees and direct loan origination costs on originated loans. Interest income is accrued on the unpaid principal balance and net deferred premiums/discounts and fees/costs are amortized as an adjustment to the loan yield over the term of the related loans.

A loan is classified as non-performing and thus considered credit impaired no later than when the contractual payments of principal and/or interest are more than 90 days past due except for sub-prime residential loans which are classified as non-performing no later than when the contractual payments of principal and/or interest are more than 120 days past due. The additional 30 days ensure that these loans are not incorrectly assessed as non-performing during the time when servicing of them typically is being transferred. However, management may determine that a loan should be classified as non-performing notwithstanding that contractual payments of principal and/or interest are less than 90 days past due or, in the case of subprime residential loans, 120 days past due. In addition, the Group continues to add accrued interest receivable to the loan's balance for collection purposes; however, a credit provision is recorded, resulting in no interest income recognition.

A loan can be further downgraded to non-interest-earning when the collection of interest is considered so doubtful that further accrual of interest is deemed inappropriate.

Generally, non-performing loans and non-interest-earning loans may be restored to performing status only when delinquent principal and interest are brought up to date in accordance with the terms of the loan agreement and when certain performance criteria are met.

Interest collected on non-performing loans and non-interest-earning loans is accounted for using the cash basis or the cost recovery method or a combination of both.

Amortization of deferred fees and premiums and discounts ceases while a loan is deemed to be non-performing or non-interest-earning.

Loans that are modified in a troubled debt restructuring are reported as restructured loans. Generally, a restructured loan would have been considered credit-impaired prior to the restructuring. Loans modified in a troubled debt restructuring are no longer considered credit-impaired in the years following the restructuring if the restructured loan carries an interest rate that is equal to or greater than the rate the Group was willing to accept at the time

of the restructuring for a loan with comparable risk and the loan is not credit-impaired based on the terms specified by the restructuring agreement. For loans that have been restructured in a troubled debt restructuring, the applicable loan accounting depends on the loan classification. Loan restructurings may include the receipt of assets in satisfaction of the loan, the modification of loan terms (e.g., reduction of interest rates, extension of maturity dates at a stated interest rate lower than the current market rate for new loans with similar risk, or reduction in principal amounts and/or accrued interest balances) or a combination of both.

Potential problem loans are credit-impaired loans where contractual payments have been received according to schedule, but where doubt exists as to the collection of future contractual payments. Potential problem loans continue to accrue interest.

- Refer to “Note 19 – Loans” for further information.

#### **Credit losses on financial instruments measured at amortized cost**

The credit loss requirements apply to financial assets measured at amortized cost including loans held at amortized cost, net investments in leases as a lessor as well as off-balance sheet credit exposures, such as irrevocable loan commitments, and credit guarantees. The credit loss amounts are based on a forward-looking, lifetime CECL model by incorporating reasonable and supportable forecasts of future economic conditions available at the reporting date. The CECL amounts are estimated over the contractual term of the financial assets taking into account the effect of prepayments. This requires considerable judgment over how changes in macroeconomic factors as well as changes in forward-looking borrower-specific characteristics will affect the CECL amounts.

The Group measures expected credit losses of financial assets on a collective (pool) basis when similar risk characteristics exist. For financial assets that do not share similar risk characteristics, expected credit losses are evaluated on an individual basis. CECL amounts are probability-weighted estimates of potential credit losses based on historical frequency, current trends and conditions as well as forecasted macroeconomic factors, such as gross domestic product, unemployment rates and interest rates.

For financial assets that are performing at the reporting date, the allowance for credit losses is generally measured using a probability of default/loss given default approach under which both probability of default (PD), loss given default (LGD) and exposure at default (EAD) are estimated. For financial assets that are credit-impaired at the reporting date, the Group generally applies a discounted cash flow approach to determine the difference between the gross carrying amount and the present value of estimated future cash flows.

An allowance for credit losses is deducted from the amortized cost basis of the financial asset. Changes in the allowance for credit losses are recorded in the consolidated statement of operations in provision for credit losses or, if related to provisions on past due interest, in net interest income.

For undrawn irrevocable loan commitments, the present value is calculated based on the difference between the contractual cash flows that are due to the Group if the commitment is drawn and the cash flows that the Group expects to receive, in order to estimate the provision for expected credit losses. For credit guarantees, expected credit losses are recognized for the contingency of the credit guarantee. Provisions for off-balance sheet credit exposures are recognized as a provision in other liabilities in the consolidated balance sheets.

Write-off of a financial asset occurs when it is considered certain that there is no possibility of recovering the outstanding principal. If the amount of loss on write-off is greater than the accumulated allowance for credit losses, the difference results in an additional credit loss. The additional credit loss is first recognized as an addition to the allowance; the allowance is then applied against the gross carrying amount. Any repossessed collateral is initially measured at fair value. The subsequent measurement depends on the nature of the collateral. Any uncollectible accrued interest receivable is written off by reversing the related interest income.

Expected recoveries on financial assets previously written off or assessed/planned to be written off have to be reflected in the allowance for credit losses; for this purpose, the amount of expected recoveries cannot exceed the aggregate amounts previously written off or assessed/planned to be written off. Accordingly, expected recoveries from financial assets previously written off may result in an overall negative allowance for credit loss balance.

Prior to January 2020, the allowance for credit losses reflected probable incurred credit losses.

- Refer to “Note 20 – Financial instruments measured at amortized cost and credit losses” for further information.

#### **Loans held-for-sale**

Loans which the Group intends to sell in the foreseeable future are considered held-for-sale and are carried at the lower of amortized cost or market value determined on either an individual method basis, or in the aggregate for pools of similar loans if sold or securitized as a pool. Loans held-for-sale are included in other assets. Adjustments to the lower of amortized cost basis or fair value are presented as a valuation allowance and recorded in other revenue.

#### **Purchased loans with credit deterioration**

A purchased loan measured at amortized cost is considered a purchased loan with credit deterioration if it has experienced more-than-insignificant deterioration in credit quality since origination. At the date of acquisition, the allowance for credit is added to the purchase price of the loan to establish the initial amortized cost basis. Any difference between the amortized cost and the unpaid principal amount is recognized in interest income using the effective interest method. After the purchase date, the allowance for credit losses is adjusted for subsequent changes in estimates of current expected credit losses.

### **Loans held at fair value under the fair value option**

Loans and loan commitments for which the fair value option is elected are reported at fair value with changes in fair value reported in trading revenues. The application of the fair value option does not change the loan's classification. Loan commitments carried at fair value are recorded in other assets or other liabilities, respectively.

### **Goodwill and other intangible assets**

Goodwill arises on the acquisition of subsidiaries or additional ownership of equity method investments. It is measured as the excess of the fair value of the consideration transferred, the fair value of any noncontrolling interest in the acquiree and the fair value of any previously held equity interest in the acquired subsidiary, over the net of the acquisition-date fair values of the identifiable assets acquired and the liabilities assumed. Goodwill is not amortized. Instead, it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. Goodwill is allocated to the Group's reporting units for the purposes of the impairment test.

Other intangible assets may be acquired individually or as part of a group of assets assumed in a business combination. Other intangible assets include but are not limited to: patents, licenses, copyrights, trademarks, branch networks, mortgage servicing rights, customer base and deposit relationships. Acquired intangible assets are initially measured at the amount of cash disbursed or the fair value of other assets distributed. Other intangible assets that have a finite useful life are amortized over that period. Other intangible assets acquired after January 1, 2002 that are determined to have an indefinite useful life are not amortized; instead they are tested for impairment annually, or more frequently if events or changes in circumstances indicate that the indefinite intangible asset may be impaired. Mortgage servicing rights are included in non-amortizing other intangible assets and are carried at fair value, with changes in fair value recognized through earnings in the period in which they occur. Mortgage servicing rights represent the right to perform specified mortgage servicing activities on behalf of third parties. Mortgage servicing rights are either purchased from third parties or retained upon sale of acquired or originated loans.

### **Income taxes**

Deferred tax assets and liabilities are recorded for the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities at the dates of the consolidated balance sheets and their respective tax bases. Deferred tax assets and liabilities are computed using currently enacted tax rates and are recorded in other assets and other liabilities, respectively. Income tax expense or benefit is recorded in income tax expense/(benefit), except to the extent the tax effect relates to transactions recorded directly in total shareholders' equity. Deferred tax assets are reduced by a valuation allowance, if necessary, to the amount that management believes will more likely than not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates in the

period in which changes are approved by the relevant authority. Deferred tax assets and liabilities are presented on a net basis for the same tax-paying component within the same tax jurisdiction.

The Group follows the guidance in ASC Topic 740 – Income Taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions. The Group determines whether it is more likely than not that an income tax position will be sustained upon examination based on the technical merits of the position. Sustainable income tax positions are then measured to determine the amount of benefit eligible for recognition in the consolidated financial statements. Each such sustainable income tax position is measured at the largest amount of benefit that is more likely than not to be realized upon ultimate settlement.

### **Brokerage receivables and brokerage payables**

The Group recognizes receivables and payables from transactions in financial instruments purchased from and sold to customers, banks and broker-dealers. The Group is exposed to risk of loss resulting from the inability of counterparties to pay for or deliver financial instruments purchased or sold, in which case the Group would have to sell or purchase, respectively, these financial instruments at prevailing market prices. To the extent an exchange or clearing organization acts as counterparty to a transaction, credit risk is generally considered to be limited. The Group establishes credit limits for each customer and requires them to maintain margin collateral in compliance with applicable regulatory and internal guidelines. In order to conduct trades with an exchange or a third-party bank, the Group is required to maintain a margin. This is usually in the form of cash and deposited in a separate margin account with the exchange or broker. Brokerage receivables are assessed for impairment applying the CECL model. Write-offs of brokerage receivables occur if the outstanding amounts are considered uncollectible.

### **Premises and equipment**

Premises and equipment (including equipment under operating leases where the Group is the lessor), with the exception of land, are carried at cost less accumulated depreciation.

Buildings are depreciated on a straight-line basis over their estimated useful lives, generally 40 to 67 years, and building improvements are depreciated on a straight-line basis over their estimated useful lives, generally not exceeding five to ten years. Land is carried at historical cost and is not depreciated. Leasehold improvements, such as alterations and improvements to rented premises, are depreciated on a straight-line basis over the shorter of the lease term or estimated useful life, which generally does not exceed ten years. Equipment, such as computers, machinery, furnishings, vehicles and other tangible non-financial assets, is depreciated using the straight-line method over its estimated useful lives, generally three to ten years. Certain leasehold improvements and equipment, such as data center power generators, may have estimated useful lives greater than ten years.

The Group capitalizes costs relating to the acquisition, installation and development of software with a measurable economic benefit, but only if such costs are identifiable and can be reliably measured. The Group depreciates capitalized software costs on a straight-line basis over the estimated useful life of the software, generally not exceeding seven years, taking into consideration the effects of obsolescence, technology, competition and other economic factors.

### Leases

For lessee arrangements, the Group recognizes lease liabilities, which are reported as other liabilities or long-term debt, and right-of-use assets, which are reported as other assets. Lease liabilities are recognized at the lease commencement date based on the present value of future lease payments over the lease term. Right-of-use assets are initially measured based on the lease liability, adjusted for any initial direct costs, any lease payments made prior to lease commencement and for any lease incentives.

- Refer to “Note 23 – Other assets and other liabilities”, “Note 24 – Leases” and “Note 26 – Long-term debt” for further information.

Periods covered by options that permit the Group to extend or terminate a lease are only included in the measurement of right-of-use assets and lease liabilities when it is reasonably certain that the Group would exercise the extension option or would not exercise the termination option. Lease payments which depend on an index or a referenced rate are considered unavoidable and are included in the lease liabilities using the index or rate as of the lease commencement date. Other variable lease payments, as well as subsequent changes in an index or referenced rate, are excluded from the lease liabilities. The Group’s incremental borrowing rate, which is used in determining the present value of lease payments, is derived from information available at the lease commencement date.

Operating lease costs, which include amortization and an interest component, are recognized over the remaining lease term on a straight-line basis. Operating and variable lease costs are recognized in general and administrative expenses.

For sales-type and direct financing leases under lessor arrangements, which are classified as loans, the Group de-recognizes the underlying assets and recognizes a net investment in the lease. The net investment in the lease is calculated as the lease receivable plus the unguaranteed portion of the estimated residual value. The lease receivable is initially measured at the present value of the sum of the future lease payments receivable over the lease term and any portion of the estimated residual value at the end of the lease term that is guaranteed by either the lessee or an unrelated third party. Lease terms may include options that permit the lessee to extend or renew these leases. Such options are only included in the measurement of lease receivables for sales-type and direct financing leases when it is reasonably certain that the lessee would exercise these options. Subsequently, unearned income is amortized to interest income over the lease term using the effective interest method.

- Refer to “Note 19 – Loans”, “Note 20 – Financial instruments measured at amortized cost and credit losses” and “Note 24 – Leases” for further information.

For operating leases under lessor arrangements, the Group continues to recognize the underlying asset and depreciates the asset over its estimated useful life. Lease income is recognized in other income on a straight-line basis over the lease term.

### Recognition of an impairment on non-financial assets

The Group evaluates premises, equipment, right-of-use assets and finite intangible assets for impairment at least annually and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The impairment assessment is performed for a group of assets for which largely separate cash flows can be identified. Where the carrying amount for the group of assets exceeds the fair value, the group of assets is considered impaired and an impairment is recorded in general and administrative expenses. Recognition of an impairment on such assets establishes a new cost base, which is not adjusted for subsequent recoveries in value.

### Customer deposits

Customer deposits represent funds held from customers (both retail and commercial) and banks and consist of interest-bearing demand deposits, savings deposits and time deposits. Interest is accrued based on the contractual provisions of the deposit contract.

### Long-term debt

Total long-term debt is composed of debt issuances that do not contain derivative features as well as hybrid debt. Hybrid debt includes capital instruments as well as those issued as part of the Group’s structured product activities. Long-term debt includes both Swiss franc and foreign currency denominated fixed and variable rate bonds.

The Group actively manages interest rate risk and foreign currency risk on vanilla debt through the use of derivative contracts, primarily interest rate and currency swaps. In particular, fixed rate debt is hedged with receive-fixed, pay-floating interest rate swaps, and the Group applies hedge accounting per the guidance of ASC Topic 815 – Derivatives and Hedging.

For capital management purposes, the Group has outstanding hybrid capital instruments in the form of low- and high-trigger tier 1 and tier 2 capital notes, with a write-off or contingent share conversion feature. Typically, these instruments have an embedded derivative that is bifurcated for accounting purposes. The embedded derivative is measured separately and changes in fair value are recorded in trading revenue. The host contract is generally accounted for under the amortized cost method unless the fair value option has been elected and the entire instrument is carried at fair value.

The Group's long-term debt also includes various equity-linked and other indexed instruments with embedded derivative features, for which payments and redemption values are linked to commodities, stocks, indices, currencies or other assets. The Group elected to account for substantially all of these instruments at fair value.

Changes in the fair value of fair-value option elected instruments are recognized as a component of trading revenues, except for changes in fair value attributed to own credit risk, which is recorded in other comprehensive income (OCI), net of tax, and recycled to trading revenue when the debt is de-recognized.

### **Guarantees**

In cases where the Group acts as a guarantor, the Group recognizes in other liabilities, at the inception of a guarantee, a liability for the fair value of the obligations undertaken in issuing such a guarantee, including its ongoing obligation to perform over the term of the guarantee in the event that certain events or conditions occur. Contingent obligations under issued guarantees not related to a financial obligation such as performance guarantees and non-financial standby letters of credit are assessed for the probability of loss on an ongoing basis. Contingent obligations under issued guarantees related to a financial obligation such as credit guarantees and financial standby letters of credit are assessed for CECL at reporting date.

### **Pension and other post-retirement benefits**

Credit Suisse sponsors a number of post-employment benefit plans for its employees worldwide, which include defined benefit pension plans and other post-employment benefits. The major plans are located in Switzerland, the UK and the US.

The Group uses the projected unit credit actuarial method to determine the present value of its projected benefit obligations (PBO) and the current and past service costs or credits related to its defined benefit and other post-retirement benefit plans. The measurement date used to perform the actuarial valuation is December 31 and is performed by independent qualified actuaries.

Certain key assumptions are used in performing the actuarial valuations. These assumptions must be made concerning the future events that will determine the amount and timing of the benefit payments and thus require significant judgment and estimates by Group management. This includes making assumptions with regard to discount rates, salary increases, interest rate on savings balances, expected long-term rate of return on plan assets and mortality (future life expectancy).

The assumed discount rates reflect the rates at which the pension benefits could be effectively settled. These rates are determined based on yield curves, constructed from high-quality corporate bonds currently available and observable in the market and are expected to be available during the period to maturity of the pension benefits. In countries where there is no deep market in

high-quality corporate bonds with longer durations, the best available market information, including governmental bond yields and risk premiums, is used to construct the yield curve.

Salary increases are determined by reviewing historical practice and external market data as well as considering internal projections.

The interest rate on savings balances is applicable only to the Credit Suisse Swiss pension plan (Swiss pension plan). The Board of Trustees of the Swiss pension plan sets the interest rate to be applied on the accumulated savings balance on an annual basis. Credit Suisse estimates the future interest rate on savings balances, taking into consideration actions and rates approved by the Board of Trustees of the Swiss pension plan and expected future changes in the interest rate environment based on the yield curve used for the discount rate.

The expected long-term rate of return on plan assets is determined on a plan-by-plan basis, taking into account asset allocation, historical rate of return, benchmark indices for similar-type pension plan assets, long-term expectations of future returns and investment strategy.

Mortality assumptions are based on standard mortality tables and standard models and methodologies for projecting future improvements to mortality as developed and published by external independent actuarial societies and actuarial organizations.

Health care cost trend rates are determined by reviewing external data and the Group's own historical trends for health care costs.

The funded status of the Group's defined benefit post-retirement and pension plans is recognized in the consolidated balance sheets.

Actuarial gains and losses in excess of 10% of the greater of the PBO or the market value of plan assets are amortized to net periodic pension and other post-retirement benefit costs on a straight-line basis over the expected average remaining service period of the active participants expected to receive benefits from the plan. If all or almost all of the participants are inactive, the amortization period is based on the average remaining life expectancy of the inactive participants. Prior service costs are amortized on a straight-line basis over the expected average remaining service period of the active participants expected to receive benefits from the plan immediately after the date the plan amendment is adopted. If all or almost all of the participants are inactive, the amortization period is based on the average remaining life expectancy of the inactive participants.

If the cost of settlements is above the threshold, the settlement gain or loss recognized in earnings is the actuarial net gain/loss transferred out of accumulated other comprehensive income. Where only a part of the PBO is settled, the amount recognized in earnings includes a proportionate share of the net actuarial gain/loss recognized in accumulated other comprehensive income equal to the percentage reduction of the PBO. The threshold is defined as the sum of the service cost and interest cost of that year.

The Group records pension expense for defined contribution plans when the employee renders service to the company, essentially coinciding with the cash contributions to the plans.

### **Share-based compensation**

For all share-based awards granted to employees, compensation expense is measured at grant date or modification date based on the fair value of the number of awards for which the requisite service is expected to be rendered and is recognized in the consolidated statements of operations over the required service period.

The incremental tax effects of the difference between the compensation expense recorded in the US GAAP accounts and the tax deduction received, are recorded in the income statement at the point in time the deduction for tax purposes is recorded.

Compensation expense for share-based awards that vest in their entirety at the end of the vesting period (cliff vesting) and awards that vest in annual installments (graded vesting), which only contain a service condition that affects vesting, is recognized on a straight-line basis over the service period for the entire award. However, if awards with graded vesting contain a performance condition, then each installment is expensed as if it were a separate award (“front-loaded” expense recognition). Furthermore, recognition of compensation expense is accelerated to the date an employee becomes eligible for retirement.

Performance share awards contain a performance condition. In the event of either a negative return on equity (ROE) of the Group or a divisional loss, any outstanding performance share awards will be subject to a reduction. The amount of compensation expense recorded includes an estimate of any expected reductions. For each reporting period after the grant date, the expected number of shares to be ultimately delivered upon vesting is reassessed and reflected as an adjustment to the cumulative compensation expense recorded in the income statement. The basis for the ROE calculation may vary from year to year, depending on the Compensation Committee’s determination for the year in which the performance shares are granted.

Certain employees own equity interests in the form of carried interests in certain funds managed by the Group. Expenses recognized under these ownership interests are reflected in the consolidated statements of operations in compensation and benefits.

### **Own shares, own bonds and financial instruments on own shares**

The Group may buy and sell own shares, own bonds and financial instruments on own shares within its normal trading and market-making activities. In addition, the Group may hold its own shares to satisfy commitments arising from employee share-based compensation awards. Own shares are recorded at cost and reported as treasury shares, resulting in a reduction to total shareholders’ equity. Financial instruments on own shares are recorded

as assets or liabilities or as equity when the criteria for equity classification are met. Dividends received by subsidiaries on own shares and unrealized and realized gains and losses on own shares classified in total shareholders’ equity are excluded from the consolidated statements of operations.

Any holdings of bonds issued by any Group entity are eliminated in the consolidated financial statements.

### **Net interest income**

Interest income and interest expense arising from interest-bearing assets and liabilities other than those carried at fair value or the lower of cost or market are accrued, and any related net deferred premiums, discounts, origination fees or costs are amortized as an adjustment to the yield over the life of the related asset and liability. Interest from debt securities and dividends on equity securities carried as trading assets and trading liabilities are recorded in interest and dividend income.

- Refer to “Loans” for further information on interest on loans.

### **Commissions and fees**

Commissions and fees include revenue from contracts with customers. The Group recognizes revenue when it satisfies a contractual performance obligation. The Group satisfies a performance obligation when control of the underlying good or services related to the performance obligation is transferred to the customer. Control is the ability to direct the use of, and obtain substantially all of the remaining benefits from, the good or service. The Group must determine whether control of a good or service is transferred over time. If so, the related revenue is recognized over time as the good or service is transferred to the customer. If not, control of the good or service is transferred at a point in time. The performance obligations are typically satisfied as the services in the contract are rendered. Revenue is measured based on the consideration specified in a contract with a customer, and excludes any amounts collected on behalf of third parties. The transaction price can be a fixed amount or can vary because of performance bonuses or other similar items. Variable consideration is only included in the transaction price once it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the amount of variable consideration is subsequently resolved. Generally, no significant judgement is required with respect to recording variable consideration.

When another party is involved in providing goods or services to a customer, the Group must determine whether the nature of its promise is a performance obligation to provide the specified goods or services itself (that is, the Group is a principal) or to arrange for those goods or services to be provided by the other party (that is, the Group is an agent). The Group determines whether it is a principal or an agent for each specified good or service promised to the customer. Gross presentation (revenue on the revenue line and expense on the expense line) is appropriate

when the Group acts as principal in a transaction. Conversely, net presentation (revenue and expenses reported net) is appropriate when the Group acts as an agent in the transaction.

Transaction-related expenses are expensed as incurred. Underwriting expenses are deferred and recognized along with the underwriting revenue.

- Refer to “Note 14 – Revenue from contracts with customers” for further information.

---

## 2 Recently issued accounting standards

### Recently adopted accounting standards

#### SAB 121 – Accounting for Digital Asset Custodial Relationships

In March 2022, the US Securities and Exchange Commission (SEC) published SEC Staff Accounting Bulletin (SAB) No. 121, “Accounting for Obligations to Safeguard Crypto-Assets an Entity Holds for Platform Users” (SAB 121). SAB 121 introduces interpretive guidance requiring the recognition of a liability and a corresponding asset to account for obligations to safeguard digital assets held for clients. SAB 121 requires additional disclosure of such custodial relationships in the interim and annual financial statements. The guidance within SAB 121 is effective for the interim and annual periods ending after June 15, 2022, with retrospective application to the beginning of the fiscal year. The adoption of SAB 121 did not have a material impact on the Group’s financial position, results of operations or cash flows.

### Standards to be adopted in future periods

#### ASC Topic 326 – Financial Instruments – Credit Losses

In March 2022, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2022-02, “Troubled Debt Restructurings and Vintage Disclosures” (ASU 2022-02), an update to ASC Topic 326 – Financial Instruments – Credit Losses. The amendments in ASU 2022-02 eliminate the accounting guidance for Troubled Debt Restructurings by creditors. The loan refinancing and restructuring guidance in ASC Topic 310 – Receivables will be applied to determine whether a modification results in a new loan or a continuation of an existing loan. The amendments enhance disclosure requirements for certain loan refinancings and restructurings when a borrower is experiencing financial difficulty and require disclosure

of current period gross write-offs by year of origination for financing receivables and net investments in leases.

The amendments are effective for annual reporting periods beginning after December 15, 2022 and for the interim periods within those annual reporting periods. Early adoption is permitted, including in an interim period. The adoption of ASU 2022-02 on January 1, 2023, applying the modified retrospective approach did not have a material impact on the Group’s financial position, results of operations or cash flows.

#### ASC Topic 820 – Fair Value Measurement

In June 2022, the FASB issued ASU 2022-03, “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (ASU 2022-03), an update to ASC Topic 820 – Fair Value Measurement. The amendments in ASU 2022-03 clarify that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. The amendments clarify that an entity cannot, as a separate unit of account, recognize and measure a contractual sale restriction. The amendments require new disclosures related to equity securities subject to contractual sale restrictions, including the fair value of such equity securities, the nature and remaining duration of the corresponding restrictions and any circumstances that could cause a lapse in the restrictions.

The amendments are effective for annual reporting periods beginning after December 15, 2023 and for the interim periods within those annual reporting periods. Early adoption is permitted, including in an interim period. The Group is currently evaluating the impact of the adoption of ASU 2022-03 on the Group’s financial position, results of operations and cash flows.

**Business developments****Strategic review**

On October 27, 2022, Credit Suisse announced a series of decisive actions following a strategic review conducted by the Board of Directors and Executive Board, focused on a restructuring of the Investment Bank, an accelerated cost transformation, and strengthened and reallocated capital. The transformation is intended to be funded through divestments, exits, capital actions and existing resources. As the Group implements these actions, restructuring costs, including from asset impairments and liability valuations, are expected to arise in connection with business activities the Group plans to exit or transfer and their related infrastructure.

Effective January 1, 2023, reflecting the strategic announcement of October 27, 2022, the Group is organized into five divisions – Wealth Management, Swiss Bank, Asset Management and the Investment Bank, as well as a new Capital Release Unit (CRU). Beginning in the first quarter of 2023, the Group’s financial reporting will be presented accordingly. Core results include the results of the divisions and the Corporate Center and exclude the results of the CRU.

**Capital increase**

On November 23, 2022, Credit Suisse Group AG held an Extraordinary General Meeting, at which shareholders approved two capital increases. Credit Suisse Group AG completed the first capital increase on November 25, 2022 by way of a share placement of 462,041,884 newly issued shares to qualified investors resulting in gross proceeds of CHF 1.76 billion. Credit Suisse Group AG completed the second capital increase by way of a rights offering on December 9, 2022. By the end of the rights exercise period, 98.2% of the rights had been exercised for the issuance of 872,989,594 shares. The remaining 16,378,864 newly issued shares for which rights were not exercised were sold in the market. The rights offering resulted in gross proceeds of CHF 2.25 billion. The capital increases resulted in 1,351,410,342 newly issued shares and gross proceeds for Credit Suisse Group AG of CHF 4.0 billion. Credit Suisse Group AG made capital contributions of CHF 3.89 billion to its wholly owned subsidiary Credit Suisse AG.

**Liquidity issues in the fourth quarter of 2022**

As previously disclosed, during early fourth quarter of 2022, Credit Suisse began experiencing significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits. However, as the quarter progressed, these outflows stabilized to much lower levels but had not yet reversed by year end, and customer deposits declined by CHF 138 billion in the fourth quarter of 2022. As is normal practice, the Group also limited its access to the capital markets in the period immediately preceding the Group’s strategy announcements on October 27, 2022.

**Outflows in assets under management in the fourth quarter of 2022**

As previously disclosed, Credit Suisse began experiencing deposit and net asset outflows in early fourth quarter of 2022 at levels that substantially exceeded the rates incurred in the third quarter of 2022. At the Group level, net asset outflows in the fourth quarter of 2022 were approximately 8% of assets under management as of the end of the third quarter of 2022, with approximately two-thirds of these net asset outflows in the quarter concentrated in October 2022.

- Refer to “Note 39 – Assets under management” for further information.

**Sale of CS Trust business**

On September 6, 2022, the Group signed separate agreements with The Bank of N.T. Butterfield & Son Limited (Butterfield) and Gasser Partner Trust reg. (Gasser Partner) for the sale of its global trust business (Credit Suisse Trust, CST). Under separate agreements, Butterfield will acquire CST’s businesses based in Guernsey, Singapore and The Bahamas, while Gasser Partner will acquire CST’s Liechtenstein business.

The transaction with Butterfield is expected to close in 2023 and is subject to customary conditions. The transfer of a majority of the trust structures in Liechtenstein occurred on February 28, 2023, with the expectation that a small number of remaining trust structures will transfer on a rolling basis in the first half of 2023. Upon completion of the transactions, Butterfield and Gasser Partner will take over the ongoing management and administration of most of the trust structures in the respective jurisdictions.

**Allfunds Group**

On October 21, 2022, the Group announced the successful completion of the offering of its entire shareholding in Allfunds Group plc (Allfunds Group), which represented approximately 8.6% of the share capital of Allfunds Group, through an accelerated bookbuild offering to institutional investors. Following the completion of this transaction, the Group no longer holds any shares in Allfunds Group.

**Energy Infrastructure Partners**

On October 21, 2022, the Group entered into an agreement with the managing partners of Energy Infrastructure Partners AG (EIP) to acquire the Group’s remaining 30% stake in EIP. Following the completion of this transaction, the Group no longer holds any shares in EIP.

**Significant shareholders****Significant shareholders registered in the share register**

The following table includes significant shareholders (including nominees) with holdings in Group shares of at least 5% of the voting rights, which were registered in the share register as of December 31, 2022 and 2021, respectively.

## Significant shareholders registered in the share register

end of	2022			2021		
	Number of shares (million)	Total nominal value (CHF million)	Share-holding (%)	Number of shares (million)	Total nominal value (CHF million)	Share-holding (%)
<b>Direct shareholders <sup>1</sup></b>						
Chase Nominees Ltd. <sup>2</sup>	433	17	10.83	304	12	11.48
Nortrust Nominees Ltd. <sup>2</sup>	217	9	5.43	197	8	7.42
The Bank of New York Mellon <sup>2</sup>	213	9	5.31	139	6	5.25

<sup>1</sup> As registered in the share register of the Group on December 31 of the reporting period; includes shareholders registered as nominees.

<sup>2</sup> Nominee holdings exceeding 2% are registered with a right to vote only if the nominee confirms that no individual shareholder holds more than 0.5% of the outstanding share capital or if the nominee discloses the identity of any beneficial owner holding more than 0.5% of the outstanding capital.

### Information received from shareholders not registered in the share register

In addition to the shareholdings registered in the share register of the Group, the Group has obtained and reported to the SIX Swiss Exchange information from its shareholders in accordance with the notification requirements of the Swiss Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading. These shareholders may hold their shareholdings in Group shares through a nominee. The following shareholder notifications relate to registered voting rights exceeding 5% of all voting rights, which are subject to disclosure in the notes to the financial statements in accordance with the Swiss Code of Obligations. The percentage shareholdings below are presented with two decimal places.

In a disclosure report that the Group published on November 17, 2021, the Group was notified that as of November 12, 2021, Qatar Holding LLC, a wholly owned subsidiary of Qatar Investment Authority, held 133.2 million shares, or 5.03% of the voting rights, of the registered Group shares issued as of the date of the notified transaction.

In a disclosure report that the Group published on December 10, 2022, the Group was notified that as of December 9, 2022, the Saudi National Bank held 395.5 million shares, or 9.88% of the voting rights, of the registered Group shares issued as of the date of the notified transaction.

In a disclosure report that the Group published on December 8, 2022, the Group was notified that as of November 29, 2022, Harris Associates L.P.'s holdings of registered Group shares had fallen below the 5% reporting threshold.

### Subsequent events

#### Securitized Products Group

On November 15, 2022, Credit Suisse announced that it had entered into definitive transaction agreements to sell a significant part of its Securitized Products Group (SPG) to entities and funds managed by affiliates of Apollo Global Management. This transaction involves phased closings through the first half of 2023 and represents an important step towards a managed exit from the SPG business and to de-risk the bank. On February 7, 2023, the parties completed the first closing of such transaction and the majority of the assets and professionals associated with the transaction are now part of or managed by ATLAS SP Partners, a new standalone credit firm focused on asset-backed financing and capital markets solutions. On February 23, 2023, the parties completed the second closing of such transaction, with further assets transferred.

#### CS First Boston

On February 9, 2023, the Group announced the acquisition of The Klein Group LLC, the investment banking business as well as the registered broker-dealer of M. Klein & Company LLC (the seller). The purchase price is USD 175 million. To align interests with the Group, the seller will receive a convertible note and a warrant. The note will provide annual payments and convert into, and the warrant entitles the seller to subscribe to, CS First Boston shares at a qualified initial public offering (IPO) or other liquidity event, at the then-valuation of CS First Boston, less a customary discount. The principal amount of the convertible note is expected to be USD 100 million, with the balance being paid in cash dependent on taxes to be paid by the seller at closing. The net present value of the transaction to the Group is expected to be approximately USD 210 million, which also includes interest cost, annual payments on the note and other payments that may in the future become payable in respect of this transaction. The transaction is expected to close in the first half of 2023.

- Refer to "Note 21 – Goodwill" for further information.

---

## 4 Segment information

The Group is a global financial services company domiciled in Switzerland and, effective January 1, 2022 until December 31, 2022, was organized into four divisions – Wealth Management, Investment Bank, Swiss Bank and Asset Management. Prior periods were restated to conform to the current presentation.

- Refer to “Note 3 – Business developments, significant shareholders and subsequent events” for further information on the Group’s divisional organization effective January 1, 2023.

The segment information reflects the Group’s reportable segments and the Corporate Center, which are managed and reported on a pre-tax basis, as follows:

- The **Wealth Management** division offers comprehensive wealth management and investment solutions and tailored financing and advisory services to UHNW and HNW individuals and external asset managers. We serve our clients through coverage areas addressing the geographies of Switzerland, Europe, Middle East and Africa, Asia Pacific and Latin America.
- The **Investment Bank** division offers a broad range of financial products and services. Our suite of products and services includes global securities sales, trading and execution, capital raising and advisory services. Our clients include financial institutions, corporations, governments, sovereigns, UHNW and institutional investors, such as pension funds and hedge funds, financial sponsors and private individuals around the world.
- The **Swiss Bank** division offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients primarily domiciled in our home market of Switzerland. Our private clients business has a leading franchise in Switzerland, including HNW, affluent, retail and small business clients. In addition, we provide consumer finance services through our subsidiary BANK-now and the leading credit card brands through our investment in Swisscard AECS GmbH. Our corporate and institutional clients business serves large corporate clients, small and medium-sized enterprises, institutional clients, financial institutions and commodity traders.
- The **Asset Management** division offers investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals, with a strong presence in our Swiss home market. Backed by the Group’s global presence, Asset Management offers active and passive solutions in traditional investments as well as alternative investments.

Corporate Center included parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that had not been allocated to the segments. In addition, the Corporate Center included

consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

### Revenue sharing and cost allocation

Responsibility for each product is allocated to a specific segment, which records all related revenues and expenses. Revenue-sharing and service level agreements govern the compensation received by one segment for generating revenue or providing services on behalf of another. These agreements are negotiated periodically by the relevant segments on a product-by-product basis. The aim of revenue-sharing and service level agreements is to reflect the pricing structure of unrelated third-party transactions.

Corporate services and business support in finance, operations, human resources, legal, compliance, risk management and IT are provided by corporate functions, and the related costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

### Funding

The Group centrally manages its funding activities. New instruments for funding and capital purposes are primarily issued by Credit Suisse Group AG and are passed on to Credit Suisse AG, the direct bank subsidiary of the Group (the Bank). The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record net revenues and expenses in each of the segments for this capital and funding. The Group’s funds transfer pricing system is designed to allocate funding costs to its businesses in a way that incentivizes their efficient use of funding. The Group’s funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet usages and off-balance sheet contingencies. The funds transfer pricing framework ensures the full funding costs allocation under normal business conditions, but it is of even greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this framework, the Group’s businesses are also credited to the extent they provide long-term stable funding.

**Net revenues and income/(loss) before taxes**

in	2022	2021	2020
<b>Net revenues (CHF million)</b>			
Wealth Management	4,952	7,031	7,081

Other	(675)	(272)	(374)
<b>Interest expense</b>	<b>(6,910)</b>	<b>(3,847)</b>	<b>(5,313)</b>
<b>Net interest income</b>	<b><u>5,341</u></b>	<b><u>5,811</u></b>	<b><u>5,948</u></b>

1 Interest and dividend income is presented on a net basis to align with the presentation of trading revenues for trading assets and liabilities.

## 7 Trading revenues

in	2022	2021	2020
<b>Trading revenues (CHF million) <sup>1</sup></b>			
Interest rate products	(1,374)	1,110	(1,068)
Foreign exchange products	529	1,138	2,587
Equity/index-related products	501	1,614	1,127
Credit products	540	(1,416)	482
Commodity and energy products	8	(6)	62
Other products	(655)	(9)	105
<b>Trading revenues</b>	<b><u>(451)</u></b>	<b><u>2,431</u></b>	<b><u>3,295</u></b>

Represents revenues on a product basis which are not representative of business results within segments, as segment results utilize financial instruments across various product types.

1 The classification of certain product types has been revised, prior periods have been reclassified to conform to the current presentation.

Trading revenues include revenues from trading financial assets and liabilities as follows:

- Equities;
- Commodities;
- Listed and OTC derivatives;
- Derivatives linked to funds of hedge funds and providing financing facilities to funds of hedge funds;

## 6 Commissions and fees

in	2022	2021	2020
<b>Commissions and fees (CHF million)</b>			
Lending business	1,438	1,877	1,631
Investment and portfolio management	3,079	3,497	3,187
Other securities business	61	56	66
Fiduciary business	3,140	3,553	3,253
Underwriting	491	2,493	2,255
Brokerage	2,265	3,069	3,244
Underwriting and brokerage	2,756	5,562	5,499
Other services	1,519	2,173	1,470
<b>Commissions and fees</b>	<b><u>8,853</u></b>	<b><u>13,165</u></b>	<b><u>11,853</u></b>

- Market making in the government bond and associated OTC derivative swap markets;
- Domestic, corporate and sovereign debt, convertible and non-convertible preferred stock and short-term securities such as floating rate notes and commercial paper (CP);
- Market making and positioning in foreign exchange products;
- Credit derivatives on investment grade and high yield credits;
- Trading and securitizing all forms of securities that are based on underlying pools of assets; and
- Life settlement contracts.

Trading revenues also include changes in the fair value of financial assets and liabilities elected to fair value under US GAAP. The main components include certain instruments from the following categories:

- Central bank funds purchased/sold;
- Securities purchased/sold under resale/repurchase agreements;
- Securities borrowing/lending transactions;
- Loans and loan commitments; and
- Customer deposits, short-term borrowings and long-term debt.

## Managing the risks

As a result of the Group's broad involvement in financial products and markets, its trading strategies are correspondingly diverse and exposures are generally spread across a diversified range of risk factors and locations. The Group uses an economic capital limit structure to limit overall risk taking. The level of risk incurred by its divisions is further managed by a variety of factors and specific risk constraints, including consolidated controls over trading exposures. Also, as part of its overall risk management, the Group holds a portfolio of economic hedges. Hedges are impacted by market movements, similar to trading securities, and may result in gains or losses on the hedges which offset losses

### 8 Other revenues

in	2022	2021	2020
<b>Other revenues (CHF million)</b>			
Loans held-for-sale	(133)	(90)	(34)
Long-lived assets held-for-sale	374	232	26
Equity method investments	167	60	(254)

### 9 Provision for credit losses

in	2022	2021	2020
<b>Provision for credit losses (CHF million)</b>			
Loans held at amortized cost	188	(23)	863
Other financial assets held at amortized cost	(132) <sup>1</sup>	4,291 <sup>1</sup>	24
Off-balance sheet credit exposures	(40)	(63)	209
<b>Provision for credit losses</b>	<b>16</b>	<b>4,205</b>	<b>1,096</b>

<sup>1</sup> Primarily reflected a provision/(release of provision) for credit losses of CHF (155) million and CHF 4,307 million in 2022 and 2021, respectively, related to Archegos.

or gains on the portfolios they were designed to economically hedge. The Group manages its trading risk with regard to both market and credit risk. The Group uses market risk measurement and management methods capable of calculating comparable exposures across its many activities and employs focused tools that can model unique characteristics of certain instruments or portfolios.

The principal risk measurement methodology for trading book exposures is value-at-risk. Macroeconomic and specific hedging strategies are in place to manage and mitigate the market and credit risk in the trading book.

### 10 Compensation and benefits

in	2022	2021	2020
<b>Compensation and benefits (CHF million)</b>			
Salaries and variable compensation	7,274	7,533	8,401

<sup>1</sup> Included pension-related expenses/(credits) of CHF (187) million, CHF (166) million and CHF (159) million in 2022, 2021 and 2020, respectively, related to certain components of net periodic benefit costs for defined benefit plans.

## 12 Restructuring expenses

On October 27, 2022, the Group announced certain strategic actions following the comprehensive review conducted by the Board of Directors and the Executive Board, which include measures to reduce the Group's cost base in 2025. The Group estimates restructuring expenses of approximately CHF 2.9 billion over a period from the fourth quarter of 2022 to 2024. The restructuring program announced in November 2021 closed at the end of September 2022. The restructuring program announced in July 2020 closed at the end of June 2021. The Group recorded restructuring expenses of CHF 533 million, CHF 103 million and CHF 157 million in 2022, 2021 and 2020, respectively.

Restructuring expenses may include severance expenses, other personnel-related charges, pension expenses and contract termination costs.

## Restructuring expenses by segment

in	2022	2021	2020
<b>Restructuring expenses by segment (CHF million)</b>

1 The following items for which expense accretion was accelerated in 2022, 2021 and 2020 due to the restructuring of the Group were not included in the restructuring liabilities: unsettled share-based compensation of CHF 95 million, CHF 13 million and CHF 27 million, respectively, which remained classified as a component of total shareholders' equity; other personnel-related charges of CHF 108 million, CHF 7 million and CHF 11 million, respectively, which remained classified as compensation liabilities; unsettled pension obligations of CHF 37 million, CHF (11) million and CHF 38 million, respectively, which remained classified as pension liabilities; and accelerated accumulated depreciation and impairment of CHF 38 million, CHF 32 million and CHF 6 million, respectively, which remained classified as premises and equipment. The settlement date for the unsettled share-based compensation remained unchanged at three years.

2 Reclassified within other liabilities.

### 13 Earnings per share

in	2022	2021	2020
<b>Basic net income/(loss) attributable to shareholders (CHF million)</b>			
Net income/(loss) attributable to shareholders for basic earnings per share	(7,293)	(1,650)	2,669
Available for common shares	<u>(7,293)</u>	<u>(1,650)</u>	<u>2,669</u>
<b>Diluted net income/(loss) attributable to shareholders (CHF million)</b>			
Net income/(loss) attributable to shareholders for diluted earnings per share	(7,293)	(1,650)	2,669
Available for common shares	<u>(7,293)</u>	<u>(1,650)</u>	<u>2,669</u>
<b>Weighted-average shares outstanding (million)</b>			
For basic earnings per share available for common shares	<u>2,862.0</u>	<u>2,627.6</u>	<u>2,624.1</u>
Dilutive share options and warrants	0.0	0.0	1.8
Dilutive share awards	0.0	0.0	67.6
For diluted earnings per share available for common shares <sup>1,2</sup>	<u>2,862.0</u>	<u>2,627.6</u>	<u>2,693.5</u>
<b>Weighted-average shares outstanding for basic/diluted earnings per share available for mandatory convertible notes</b>	<u>—</u>	<u>106.6</u>	<u>—</u>
<b>Earnings/(loss) per share available for common shares (CHF)</b>			
<b>Basic earnings/(loss) per share available for common shares</b>	<u>(2.55)</u>	<u>(0.63)</u>	<u>1.02</u>
<b>Diluted earnings/(loss) per share available for common shares</b>	<u>(2.55)</u>	<u>(0.63)</u>	<u>0.99</u>

Prior periods have been adjusted to reflect the increase in the number of shares outstanding as a result of the discount element in the 2022 rights issue, as required under US GAAP.

- 1 Weighted-average potential common shares related to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 11.3 million, 10.2 million and 6.2 million for 2022, 2021 and 2020, respectively.
- 2 Due to the net losses in 2022 and 2021, 4.6 million and 0.7 million, respectively, of weighted-average share options and warrants outstanding and 40.9 million and 76.5 million, respectively, of weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

---

## 14 Revenue from contracts with customers

Revenue is measured based on the consideration specified in a contract with a customer, and excludes any amounts collected on behalf of third parties. Taxes assessed by a governmental authority that are collected by the Group from a customer and both imposed on and concurrent with a specific revenue-producing transaction are excluded from revenue. The Group recognizes revenue when it satisfies a contractual performance obligation. Variable consideration is only included in the transaction price once it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the amount of variable consideration is subsequently resolved. Generally no significant judgement is required with respect to recording variable consideration.

If a fee is a fixed percentage of a variable account value at contract inception, recognition of the fee revenue is constrained as the contractual consideration is highly susceptible to change due to factors outside of the Group's influence. However, at each performance measurement period end (e.g., end-of-day, end-of-month, end-of-quarter), recognition of the cumulative amount of the consideration to which the Group is entitled is no longer constrained because it is calculated based on a known account value and the fee revenue is no longer variable.

### Nature of services

The following is a description of the principal activities from which the Group generates its revenues from contracts with customers.

The performance obligations are typically satisfied as the services in the contract are rendered. The contract terms are generally such that they do not result in any contract assets. The contracts generally do not include a significant financing component or obligations for refunds or other similar obligations. Any variable consideration included in the transaction price is only recognized when the uncertainty of the amount is resolved and it is probable that a significant reversal of cumulative revenue recognized will not occur.

Credit Suisse's wealth management businesses provide investment services and solutions for clients, including asset management, investment advisory and investment management, wealth planning, and origination and structuring of sophisticated financing transactions. The Group receives for these services investment advisory and investment management fees which are generally reflected in the line item "Investment and portfolio management" in the table "Contracts with customers and disaggregation of revenues" below. Generally, the fee for the service provided is recognized over the period of time the service is provided.

The wealth management businesses also provide comprehensive advisory services and tailored investment and financing solutions to private, corporate and institutional clients. The nature of the services range from investment and wealth management activities, which are services rendered over a period of time according to the contract with the customer, to more transaction-specific

services such as brokerage and sales and trading services and the offer of client-tailored financing products. The services are provided as requested by Credit Suisse's clients, and the fee for the service requested is recognized once the service is provided.

The Group's asset management businesses offer investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals. Fund managers typically enter into a variety of contracts to provide investment management and other services. A fund manager may satisfy its performance obligation independently or may engage a third party to satisfy some or all of a performance obligation on the fund manager's behalf. Although the fund manager may have engaged a third party to provide inputs to the overall investment management services, the contractual obligation to provide investment management services to a customer remains the primary responsibility of the fund manager. As such, the fund manager is acting as a principal in the transaction. As a fund manager, the Group typically receives base management fees and may additionally receive performance-based management fees which are both recognized as "Investment and portfolio management" revenues in the table "Contracts with customers and disaggregation of revenues" below. Base management fees are generally calculated based on the NAV of the customer's investment, which can change during the performance period. Performance-based management fees are variable consideration received by the Group depending on the financial performance of the underlying fund. As both the base management fees and performance-based management fees are variable, the Group recognizes the fees once it is probable that a significant reversal of the revenue recognized will not occur and when the uncertainty of the amount is resolved. The estimate of these variable fees is constrained until the end of the performance measurement period. Generally, the uncertainty is resolved at the end of the performance measurement period and therefore no significant judgement is necessary when recording variable consideration. Under a clawback obligation provision, a fund manager may be required to return certain distributions received from a fund if a specific performance threshold, i.e., benchmark, is not achieved at the end of the lifetime of the fund. The contractual clawback obligation is an additional factor of uncertainty which is considered in the constraint assessment. If the performance-based management fee is earned but the clawback provision has not lapsed, the clawback obligation is accounted for as a refund liability.

The Group's capital markets businesses underwrite and sell securities on behalf of customers. Typically, the fees in these businesses are recognized at a single point in time once the transaction is complete, i.e., when the securities have been placed with investors, and recognized as underwriting revenue. All expenses incurred in satisfying the performance obligation are deferred and recognized once the transaction is complete. Generally Credit Suisse and other banks form a syndicate group to underwrite and place the securities for a customer. The Group may act as the lead or a participating member in the syndicate group. Each member of the syndicate group, including the lead and

participating underwriters, is acting as principal for their proportionate share of the syndication. As a result, the individual underwriters reflect their proportionate share of underwriting revenue and underwriting costs on a gross basis.

The Group also offers brokerage services in its investment banking businesses, including global securities sales, trading and execution, prime brokerage and investment research. For the services provided, such as the execution of client trades in securities or derivatives, the Group typically earns a brokerage commission when the trade is executed. The Group generally acts as an agent when buying or selling exchange-traded cash securities, exchange-traded derivatives or centrally cleared OTC derivatives on behalf of clients.

Credit Suisse's investment banking businesses provide services that include advisory services to clients in connection with corporate finance activities. The term "advisory" includes any type of service the Group provides in an advisory capacity. For these types of services, the Group typically receives a non-refundable retainer fee and/or a success fee which usually represents a percentage of the transaction proceeds if and when the corporate finance activity is completed. Additionally, the contract may contain a milestone fee such as an "announcement fee" that is payable upon the public announcement of the corporate finance activity. Typically the fees in the investment banking business are recognized at a specific point in time once it is determined that the performance obligation related to the transaction has been completed. A contract liability will be recorded if the Group receives a payment such as a retainer fee or announcement fee for an advisory service prior to satisfying the performance obligation. Advisory fees are recognized ratably over time in scenarios where the contracted service of the Group is to act as an advisor over a specified period not related to or dependent on the successful completion of a transaction. Revenues recognized from these services are reflected in the line item "Other Services" in the table below.

#### Contracts with customers and disaggregation of revenues

in	2022	2021	2020
<b>Contracts with customers (CHF million)</b>			
Investment and portfolio management	3,079	3,497	3,187
Other securities business	61	56	66
Underwriting	491	2,493	2,255
Brokerage	2,264	3,067	3,242
Other services	1,509	2,161	1,475
<b>Total revenues from contracts with customers</b>	<b>7,404</b>	<b>11,274</b>	<b>10,225</b>

The table above differs from "Note 6 – Commissions and fees" as it includes only those contracts with customers that are in scope of ASC Topic 606 – Revenue from Contracts with Customers.

#### Contract balances

end of	2022	2021
<b>Contract balances (CHF million)</b>		
Contract receivables	687	865
Contract liabilities	54	55

#### Contract balances

in	4Q22	3Q22	2Q22	1Q22
<b>Revenue recognized (CHF million)</b>				
Revenue recognized in the reporting period included in the contract liabilities balance at the beginning of period	8	11	10	14

The Group did not recognize any revenues in the reporting period from performance obligations satisfied in previous periods.

There were no material net impairment losses on contract receivables in 2022, 2021 or 2020. The Group did not recognize any contract assets during 2022, 2021 or 2020.

#### Capitalized costs

The Group has not incurred costs to obtain a contract nor costs to fulfill a contract that are eligible for capitalization.

#### Remaining performance obligations

ASC Topic 606's practical expedient allows the Group to exclude from its remaining performance obligations disclosure any performance obligations which are part of a contract with an original expected duration of one year or less. Additionally, any variable consideration, for which it is probable that a significant reversal in the amount of cumulative revenue recognized will occur when the uncertainty associated with the variable consideration is subsequently resolved, is not subject to the remaining performance obligations disclosure because such variable consideration is not included in the transaction price (e.g., investment management fees). Upon review, the Group determined that no material remaining performance obligations are in scope of the remaining performance obligations disclosure.

## 15 Securities borrowed, lent and subject to repurchase agreements

end of	2022	2021
<b>Securities borrowed or purchased under agreements to resell (CHF million)</b>		
Central bank funds sold and securities purchased under resale agreements	42,256	65,017
Deposits paid for securities borrowed	16,542	38,889

Deposits received for securities lent	950	15,683
<b>Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions</b>	<b>20,280</b>	<b>35,274</b>

Amounts shown after counterparty and cash collateral netting

Repurchase and reverse repurchase agreements represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activity. These instruments are collateralized principally by government securities and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time.

In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. In the Group's normal course of business, a significant portion of the collateral received that may be sold or repledged has been sold or repledged as of December 31, 2022 and 2021.

## 16 Trading assets and liabilities

<b>Debt securities available-for-sale</b>	<b>683</b>	<b>8</b>	<b>0</b>	<b>0</b>	<b>683</b>	<b>8</b>

Unrealized losses on debt securities as of December 31, 2022 relate to twelve debt security positions held for liquidity purposes. The Group does not intend to sell these investments nor is it more likely than not that the Group will be required to sell these securities before the recovery of their amortized cost basis, which may be at maturity. Management determined that the unrealized losses on these debt securities were attributable to changes in market valuation driven by interest rate movements and not to credit-related factors. As a result, no impairment charges were recorded in the consolidated statements of operations.

- Refer to “Note 20 – Financial instruments measured at amortized cost and credit losses” for further information on debt securities held-to-maturity.

Due from 5 to 10 years	0	0	0.00	697	568	0.36
<b>Total debt securities</b>	<b>921<sup>1</sup></b>	<b>881</b>	<b>3.94</b>	<b>953<sup>2</sup></b>	<b>797</b>	<b>0.36</b>

1 Excluded accrued interest on debt securities held-to-maturity of CHF 10 million.

2 Excluded accrued interest on debt securities available-for-sale of CHF 1 million.

### Allowance for credit losses on debt securities available-for-sale

A credit loss exists if there is a decline in fair value of the security below the amortized cost as a result of the non-collectability of the amounts due in accordance with the contractual terms.

An allowance for expected credit losses is recorded in the consolidated statement of operations in provision for credit losses and

the non-credit-related losses are recorded in AOCI. Subsequent improvements in the estimated credit losses are recorded in the consolidated statement of operations as a reduction in provision for credit losses. A security is written off when a determination is made that the security is uncollectible. As of the end of 2022 and 2021, the Group had no allowance for credit losses on debt securities available-for-sale.

## 18 Other investments

end of	2022	2021
<b>Other investments (CHF million)</b>

## 288 Consolidated financial statements – Credit Suisse Group

## 19 Loans

The Group's loan portfolio is classified into two portfolio segments, consumer loans and corporate & institutional loans. Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions, and governments and public institutions.

For financial reporting purposes, the carrying values of loans and related allowance for credit losses are presented in accordance with US GAAP and are not comparable with the regulatory credit risk exposures presented in our disclosures required under Pillar 3 of the Basel framework.

Other impaired loans	1,461	803
<b>Gross impaired loans <sup>1</sup></b>	<b>3,424</b>	<b>2,767</b>

<sup>1</sup> As of December 31, 2022 and 2021, CHF 130 million and CHF 130 million, respectively, were related to consumer mortgages secured by residential real estate for which formal foreclosure proceedings according to local requirements of the applicable jurisdiction were in process.

In accordance with Group policies, impaired loans include non-accrual loans, comprised of non-performing loans and non-interest-earning loans, as well as restructured loans and potential problem loans.

- Refer to "Loans" in Note 1 – Summary of significant accounting policies for further information on loans and categories of impaired loans.
- Refer to "Note 20 – Financial instruments measured at amortized cost and credit losses" for further information on loans held at amortized cost.

## 20 Financial instruments measured at amortized cost and credit losses

This disclosure provides an overview of the Group's balance sheet positions that include financial assets carried at amortized cost that are subject to the CECL accounting guidance. It includes the following sections:

- Allowance for credit losses (including the methodology for estimating expected credit losses in non-impaired and impaired financial assets and current-period estimates);
- Credit quality information (including monitoring of credit quality and internal ratings);
- Past due financial assets;

- Non-accrual financial assets;
- Collateral-dependent financial assets;
- Off-balance sheet credit exposure; and
- Troubled debt restructurings and modifications.

As of December 31, 2022, the Group had no purchased financial assets with more than insignificant credit deterioration since origination.

- Refer to "Note 1 – Summary of significant accounting policies" for further information on the accounting of financial assets and off-balance sheet credit exposure subject to the CECL accounting guidance.

### Overview of financial instruments measured at amortized cost – by balance sheet position

end of	2022			2021		
	Amortized cost basis <sup>1</sup>	Allowance for credit losses	Net carrying value	Amortized cost basis <sup>1</sup>	Allowance for credit losses	Net carrying value
<b>CHF million</b>						
Cash and due from banks	68,280	0	<b>68,280</b>	164,510	0	<b>164,510</b>
Interest-bearing deposits with banks	441 <sup>2</sup>	0	<b>441</b>	1,323 <sup>4</sup>	0	<b>1,323</b>
Securities purchased under resale agreements and securities borrowing transactions	18,005 <sup>2</sup>	0	<b>18,005</b>	35,283 <sup>4</sup>	0	<b>35,283</b>

<b>Total</b>	<b>387,203</b>	<b>(5,484)</b>	<b>381,719</b>	<b>518,904</b>	<b>(5,513)</b>	<b>513,391</b>

1 Net of unearned income/deferred expenses, as applicable.

2 Excluded accrued interest in the total amount of CHF 549 million, with no related allowance for credit losses. Of the accrued interest balance, CHF 1 million related to interest-bearing deposits with banks, CHF 4 million to securities purchased under resale agreements and securities borrowing transactions, CHF 10 million to debt securities held-to-maturity and CHF 534 million to loans. These accrued interest balances are reported in other assets.

3 Included interest of CHF 103 million on non-accrual loans which were reported as part of the loans' amortized cost balance.

4 Excluded accrued interest in the total amount of CHF 301 million, with no related allowance for credit losses. Of the accrued interest balance, CHF 1 million related to interest-bearing deposits with banks, CHF 1 million to securities purchased under resale agreements and securities borrowing transactions, CHF 295 million to loans and CHF 4 million to brokerage receivables. These accrued interest balances are reported in other assets.

5 Included interest of CHF 86 million on non-accrual loans which were reported as part of the loans' amortized cost balance.

### Allowance for credit losses

#### Estimating expected credit losses – overview

The following key elements and processes of estimating expected credit losses apply to the Group's major classes of financial assets held at amortized cost.

#### Expected credit losses on non-impaired credit exposures

Expected credit loss models for non-impaired credit exposures have three main inputs: (i) PD, (ii) LGD and (iii) EAD. These parameters are derived from internally developed statistical models which are based on historical data and leverage regulatory models under the advanced internal rating-based (A-IRB) approach. Expected credit loss models use forward-looking information to derive point-in-time estimates of forward-looking term structures.

PD estimates are based on statistical rating models and tailored to various categories of counterparties and exposures. These statistical rating models are based on internally and externally compiled data comprising both quantitative and qualitative factors. A migration of a counterparty or exposure between rating classes generally leads to a change in the estimate of the associated PD. Lifetime PDs are estimated considering the expected macroeconomic environment and the contractual maturities of exposures, adjusted for estimated prepayment rates where applicable. Internal credit ratings form a significant input to the model derived CECL PDs. For the majority of counterparties, internal credit ratings are determined via statistical rating models, which are developed under the A-IRB approach of the Basel framework. The models are tailored to the specific business of the respective obligor and are intended to reflect the risk of default over a one-year period of each counterparty. The Group has received approval from its primary regulator to use, and has fully implemented, the A-IRB approach.

LGD estimates the size of the expected loss that may arise on a credit exposure in the event of a default. The Group estimates LGD based on the history of recovery rates of claims against defaulted counterparties, considering, as appropriate, factors such as differences in product structure, collateral type, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. Certain LGD values are also calibrated to reflect the expected macroeconomic environment.

EAD represents the expected amount of credit exposure in the event of a default. It reflects the current drawn exposure with a counterparty and an expectation regarding the future evolution of the credit exposure under the contract or facility, including amortization and prepayments. The EAD of a financial asset is the gross carrying amount at default, which is modeled based on historical data by applying a term structure and considering portfolio-specific factors such as the drawn amount as of the reporting date, the facility limit, amortization schedules, financial collateral and product type. For certain financial assets, the Group determines EAD by modeling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

Where a relationship to macroeconomic indicators is statistically sound and in line with economic expectations, the parameters are modeled accordingly, incorporating the Group's forward-looking forecasts and applying regional segmentations where appropriate.

The ability to forecast credit losses over the reasonable and supportable period is based on the ability to forecast economic activity over a reasonable and supportable time window. The Group's macroeconomic and market variable forecasts for the CECL scenarios cover a five-year time horizon. For periods beyond that reasonable and supportable forecast period, the Group immediately reverts to average economic environment variables as model input factors. In the downside and upside scenarios, mean reversion to the base case projected paths will commence in year three, with full convergence occurring in years four and five for certain macroeconomic factors.

Alternative qualitative estimation approaches are used for certain products. For lombard loans (including share-backed loans), the PD/LGD approach used does not consider the Group's forward-looking forecasts as these are not meaningful for the estimate of expected credit losses in light of the short time-frame considered for closing out positions under daily margining arrangements. For international private residential mortgages and securitizations, the Group applies qualitative approaches where credit specialists follow a structured process and use their expertise and judgment to determine the amounts of expected credit losses.

The Group measures expected credit losses considering the risk of default over the maximum contractual period (including any borrower's extension options) during which it is exposed to credit risk, even if the Group considers a longer period for risk management purposes. The maximum contractual period extends to the date at which the Group has the right to require repayment of an

advance or terminate an irrevocable loan commitment or a credit guarantee.

### **Expected credit losses on impaired credit exposures**

Expected credit losses for individually impaired credit exposures are measured by performing an in-depth review and analysis of these exposures, considering factors such as recovery and exit options as well as collateral and the risk profile of the borrower. The individual measurement of expected credit losses for impaired financial assets also considers reasonable and supportable forward-looking information that is relevant to the individual counterparty (idiosyncratic information) and reflective of the macroeconomic environment that the borrower is exposed to, apart from any historical loss information and current conditions. If there are different scenarios relevant for the individual expected credit loss measurement, they are considered on a probability-weighted basis. The related allowance for credit losses is revalued by the recovery management function, at least annually or more frequently, depending on the risk profile of the borrower or credit-relevant events.

For credit-impaired financial assets, the expected credit loss is measured using (i) the present value of estimated future cash flows discounted at the contractual interest rate of the loan and (ii) the fair market value of collateral where the loan is collateral-dependent. The impaired credit exposures and related allowance are revalued to reflect the passage of time.

For all classes of financial assets, the trigger to detect an impaired credit exposure is non-payment of interest, principal amounts or other contractual payment obligations, or when, for example, the Group may become aware of specific adverse information relating to a counterparty's ability to meet its contractual obligations, despite the current repayment status of its particular credit facility. For credit exposures where repayment is dependent on collateral, a decrease in collateral values can be an additional trigger to detect an impairment. Additional procedures may apply to specific classes of financial assets as described further below.

Troubled debt restructurings, also referred to as restructured loans, are considered impaired credit exposures in line with the Group's policies and subject to individual assessment and provisioning for expected credit losses by the Group's recovery functions. Restructured loans that defaulted again within 12 months from the last restructuring remain impaired or are impaired if they were considered non-impaired at the time of the subsequent default.

### **Macroeconomic scenarios**

The estimation and application of forward-looking information requires quantitative analysis and significant expert judgment. The Group's estimation of expected credit losses is based on a discounted probability-weighted estimate that considers three future macroeconomic scenarios: a baseline scenario, an upside scenario and a downside scenario. The baseline scenario represents the most likely outcome. The two other scenarios represent more optimistic and more pessimistic outcomes, with the downside

scenario being more severe than the upside scenario. The scenarios are probability-weighted according to the Group's best estimate of their relative likelihood based on historical frequency, an assessment of the current business and credit cycles as well as the macroeconomic factor trends.

The scenario design team within the Group's Enterprise Risk Management (ERM) function determines the macroeconomic factors (MEFs) and market projections that are relevant for the Group's three scenarios across the overall credit portfolio subject to the CECL accounting guidance. The scenario design team formulates the baseline scenario projections used for the calculation of expected credit losses from the Group's global chief investment office in-house economic research forecasts and, where deemed appropriate, from external sources such as the Bloomberg consensus of economist forecasts (covering the views of other investment banks and external economic consultancies), forecasts from nonpartisan think tanks, major central banks and multilateral institutions, such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD) and the World Bank. For factors where no in-house or credible external forecasts are available, an internal model is used to calibrate the baseline scenario projections. The downside and upside scenarios are derived from these baseline scenario projections. These three scenario projections are subject to a review and challenge process and any feedback from this process is incorporated into the scenario projections by the ERM scenario design team. The CECL scenario design working group is the governance forum. The working group performs an additional review and challenge and subsequently recommends approval of the MEFs and related market projections as well as the occurrence probability weights that are allocated to the baseline, downside and upside scenarios. MEFs and related market projections as well as the scenario occurrence probability weights used for the calculation of expected credit losses are approved by the Senior Management Approval Committee.

#### Current-period estimate of expected credit losses on non-impaired credit exposures

One of the most significant judgments involved in estimating the Group's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the forecast period, with modeled credit losses being driven primarily by a set of 37 MEFs. The key MEFs used in each of the macroeconomic scenarios for the calculation of the expected credit losses include, but are not limited to, GDP and industrial production growth rates. These MEFs are used in the portfolio- and region-specific CECL models and have been selected based on statistical criteria and expert judgment to explain expected credit losses. The table "Selected macroeconomic factors" includes the Group's forecast of selected MEFs for 2023 and 2024, as estimated as of December 31, 2022. The comparative information includes the forecast of MEFs selected and estimated as of December 31, 2021.

As of December 31, 2022, the forecast macroeconomic scenarios were weighted 50% for the baseline, 40% for the downside and 10% for the upside scenario, unchanged compared to the scenario weightings applicable as of December 31, 2021. The MEFs included in the table represent the four-quarter average forecasts for 2023 and 2024 at the end of each reporting period. These MEFs forecasts are recalibrated on a monthly basis and certain CECL models consume data with a time lag or are influenced by statistical base effects from an earlier period. The quarterly series for China real GDP and world industrial production returned to pre-pandemic levels (i.e., the fourth quarter of 2019) in the second and third quarter of 2020, respectively, while the quarterly series for US real GDP returned to pre-pandemic levels in the first quarter of 2021. The quarterly series for Swiss nominal GDP and EU nominal GDP returned to pre-pandemic levels in the second quarter of 2021, based on the latest published statistical data available. The macroeconomic and market variable projections incorporate adjustments to reflect the impact of accelerated monetary policy tightening by the world's major central banks in response to high inflation rates, the impact of Russia's invasion of Ukraine on energy and food prices as well as the macroeconomic impact of the property sector slowdown in China. While GDP and industrial production growth rates are significant inputs to the forecast models, a range of other inputs are also incorporated for all three scenarios to provide projections for future economic and market conditions. Given the complex nature of the forecasting process, no single economic variable is viewed in isolation or independently of other inputs.

#### Selected macroeconomic factors

December 31, 2022	Forecast 2023	Forecast 2024
<b>US real GDP growth rate (%)</b>		
Downside	(1.7)	0.5
Baseline	0.9	1.5
Upside	1.2	2.0
<b>World industrial production (%)</b>		
Downside	(6.8)	0.4
Baseline	1.2	1.9
Upside	3.9	3.9
<b>China real GDP growth rate (%)</b>		
Downside	(0.9)	2.1
Baseline	4.5	4.9
Upside	6.2	5.8
<b>EU nominal GDP growth rate (%)</b>		
Downside	3.4	2.3
Baseline	5.2	4.1
Upside	5.5	3.8
<b>Swiss nominal GDP growth rate (%)</b>		
Downside	0.0	1.0
Baseline	2.7	2.0
Upside	3.2	2.1

Forecasts represent the four-quarter average estimate of the respective macroeconomic factor as determined at the end of each reporting period.

### Selected macroeconomic factors (continued)

December 31, 2021	Forecast 2022	Forecast 2023
<b>Swiss real GDP growth rate (%)</b>		
Downside	(0.4)	0.3
Baseline	2.5	1.9
Upside	4.3	2.8
<b>Eurozone real GDP growth rate (%)</b>		
Downside	(0.7)	1.4
Baseline	3.8	2.3
Upside	4.2	2.7
<b>US real GDP growth rate (%)</b>		
Downside	0.1	1.4
Baseline	3.8	1.9
Upside	4.5	2.4
<b>UK real GDP growth rate (%)</b>		
Downside	(0.9)	1.0
Baseline	5.0	3.3
Upside	7.8	3.9
<b>World industrial production (%)</b>		
Downside	0.0	2.0
Baseline	3.0	3.0
Upside	4.4	3.7

Forecasts represent the four-quarter average estimate of the respective macroeconomic factor as determined at the end of each reporting period.

Expected credit losses are not solely derived from MEF projections. Model overlays based on expert judgment are also applied, considering historical loss experience and industry and counter-party reviews, and primarily impacting certain corporate and institutional loans portfolios. Such overlays are designed to address circumstances where in management's judgment the CECL model outputs are overly sensitive to the effect of economic inputs that exhibit significant deviation from their long-term historical averages. Overlays may also be used to capture judgment on the economic uncertainty from global or regional developments with severe impacts on economies. The Group's non-specific allowance for expected credit losses on balance sheet and off-balance sheet credit exposures as of December 31, 2022 decreased compared to December 31, 2021. Model overlays were recalibrated during the year to take into account updated input elements based on expert judgment which led to a release. This release of overlays was outweighing the impact of additional stress from macroeconomic factors observable during the year. Overlays continued to be closely aligned with the macroeconomic forecasts and associated scenario weightings.

### Interest income attributable to passage of time

For financial assets held at amortized cost for which the Group measures expected credit losses based on the discounted cash flow methodology the entire change in present value is reported in provision for credit losses.

### Loans held at amortized cost

The Group's loan portfolio is classified into two portfolio segments, consumer loans and corporate & institutional loans. The main risk characteristics are described by individual class of financing receivable for each of these portfolio segments:

#### Consumer loans:

- **Mortgages:** includes lending instruments secured by residential real estate; such credit exposure is sensitive to the level of interest rates and unemployment as well as real estate valuation.
- **Loans collateralized by securities:** primarily includes lending secured by marketable financial collateral (e.g., equities, bonds, investment funds and precious metals); such credit exposure is sensitive to market prices for securities which impact the value of financial collateral.
- **Consumer finance:** includes lending to private individuals such as credit cards, personal loans and leases; such credit exposure is sensitive to MEFs including economic growth, unemployment and interest rates.

#### Corporate & institutional loans:

- **Real estate:** includes lending backed by commercial or income-producing real estate; such credit exposure is sensitive to MEFs including economic growth, unemployment, interest rates and industrial production as well as real estate valuation.
- **Commercial and industrial loans:** includes lending to corporate clients including small and medium-sized enterprises, large corporates and multinational clients; such credit exposure is sensitive to MEFs including economic growth, unemployment and industrial production.
- **Financial institutions:** includes lending to financial institutions such as banks and insurance companies; such credit exposure is sensitive to MEFs including economic growth.
- **Governments and public institutions:** includes lending to central government and state-owned enterprises; such credit exposure is sensitive to MEFs including economic growth.

### Expected credit losses on impaired loans

In addition to the triggers described further above, loans managed on the Swiss platform are reviewed depending on event-driven developments. All corporate and institutional loans are reviewed at least annually based on the borrower's financial statements and any indications of difficulties they may experience. Loans that are not impaired, but which are of special concern due to changes in covenants, downgrades, negative financial news and other adverse developments, are either transferred to recovery management or included on a watch list. All loans on the watch list are reviewed at least quarterly to determine whether they should be released, remain on the watch list or be moved to recovery management. For loans in recovery management from the Swiss platform, larger positions are reviewed on a quarterly basis for any event-driven changes. Otherwise, these loans are reviewed at least annually. All loans in recovery management on international platforms are reviewed on at least a monthly basis.

## Allowance for credit losses – loans held at amortized cost

	2022			2021			2020		
	Consumer	Corporate & institutional	Total	Consumer	Corporate & institutional	Total	Consumer	Corporate & institutional	Total
<b>Allowance for credit losses (CHF million) Balance at beginning of period</b>	<b>357</b>	<b>940</b>	<b>1,297</b>	<b>318</b>	<b>1,218</b>	<b>1,536</b>	<b>241</b>	<b>808</b>	<b>1,049<sup>1</sup></b>

Recoveries	12	3	15	9	5	14	8	5	13
Net write-offs	(53)	(113)	(166)	(46)	(237)	(283)	(79)	(233)	(312)
Foreign currency translation impact and other adjustments, net	0	(7)	(7)	7	12	19	(35)	(66)	(101)
<b>Balance at end of period</b>	<b>359</b>	<b>1,004</b>	<b>1,363</b>	<b>357</b>	<b>940</b>	<b>1,297</b>	<b>318</b>	<b>1,218</b>	<b>1,536</b>
of which individually evaluated	273	572	845	273	512	785	230	636	866
of which collectively evaluated	86	432	518	84	428	512	88	582	670

- 1 Included a net impact of CHF 103 million from the adoption of the new CECL guidance and the related election of the fair value option for certain loans on January 1, 2020, of which CHF 55 million was reflected in consumer loans and CHF 48 million in corporate & institutional loans.
- 2 Represents the current-period net provision for accrued interest on non-accrual loans and lease financing transactions which is recognized as a reversal of interest income.

Gross write-offs of CHF 181 million in 2022 compared to gross write-offs of CHF 297 million in 2021 and were primarily related to corporate & institutional loans in both years. In 2022, gross write-offs in corporate & institutional loans reflected the sale of a facility relating to a coal mining company and write-offs of a loan to a consulting services company, an exposure to a financial institution impacted by sanctions imposed in connection with Russia's invasion of Ukraine and individual positions in

small and medium-sized enterprises, Swiss large corporates and ship finance. Write-offs in consumer loans were mainly related to Swiss consumer finance loans and a European mortgage. In 2021, gross write-offs in corporate & institutional loans were mainly related to positions in commodity trade finance, ship finance, corporate lending, the sale of a real estate-related loan and a position in the US health care sector. Write-offs in consumer loans were mainly related to consumer finance.

## Purchases, reclassifications and sales – loans held at amortized cost

in	2022			2021			2020		
	Consumer	Corporate & institutional	Total	Consumer	Corporate & institutional	Total	Consumer	Corporate & institutional	Total
<b>CHF million</b>									
Purchases <sup>1</sup>	17	4,603	<b>4,620</b>	22	4,361	<b>4,383</b>	45	2,756	<b>2,801</b>
Reclassifications from loans held-for-sale <sup>2</sup>	0	95	<b>95</b>	0	133	<b>133</b>	0	6	<b>6</b>
Reclassifications to loans held-for-sale <sup>3</sup>	0	9,516	<b>9,516</b>	0	4,780	<b>4,780</b>	18	2,007	<b>2,025</b>
Sales <sup>3</sup>	0	2,485	<b>2,485</b>	0	4,442	<b>4,442</b>	18	1,626	<b>1,644</b>

Reclassifications from loans held-for-sale and reclassifications to loans held-for-sale represent non-cash transactions.

- 1 Includes drawdowns under purchased loan commitments.
- 2 Reflects loans previously reclassified to held-for-sale that were not sold and were reclassified back to loans held at amortized cost.
- 3 All loans held at amortized cost which are sold are reclassified to loans held-for-sale on or prior to the date of the sale.

### Debt securities held-to-maturity

In 2022, the Group purchased foreign government debt securities held-to-maturity amounting to CHF 971 million, all related to a portfolio of US Treasury securities.

The Group's debt securities held-to-maturity with a carrying value of CHF 921 million as of December 31, 2022 represent a portfolio of US Treasury securities, all rated "AAA" based on the Group's internal counterparty rating. US Treasury securities have a history of no credit losses and market price movements mainly reflect changes in market interest rates. Based on this history of no credit losses and the Group's view of the current and forecasted economic environment, the Group expects the risk of non-payment for US Treasuries to be zero and does not have an allowance for credit losses for these securities. The credit quality of these securities is monitored on an ongoing basis and the Group's zero-loss expectation is validated on at least a quarterly basis through the Group's governance structure involving the Credit Risk and Treasury functions.

- Refer to "Note 17 – Investment securities" for further information.

### Other financial assets

- The Group's other financial assets include certain balance sheet positions held at amortized cost, each representing its own portfolio segment. They have the following risk characteristics:
- Cash and due from banks and interest-bearing deposits with banks: includes balances held with banks, primarily cash balances with central banks and nostro accounts; such credit exposure is sensitive to the credit rating and profile of the bank or central bank. Cash and due from banks also includes short-term, highly liquid debt instruments with original maturities of three months or less, which are held for cash management purposes; such credit exposure is sensitive to the credit rating and profile of the issuer of the related instrument.
- Reverse repurchase agreements and securities borrowing transactions: includes lending and borrowing of securities against cash or other financial collateral; such credit exposure is sensitive to the credit rating and profile of the counterparty

and relative changes in the valuation of securities and financial collateral.

- Brokerage receivables: includes mainly settlement accounts with brokers and margin accounts; such credit exposure is sensitive to the credit rating and profile of the counterparty.
- Other assets: includes mainly cash collateral, accrued interest, fees receivable, mortgage servicing advances and failed purchases; such credit exposure is sensitive to the credit rating and profile of the related counterparty.

### Allowance for credit losses – other financial assets held at amortized cost

	2022	2021	2020
<b>Allowance for credit losses (CHF million)</b>			
<b>Balance at beginning of period</b>	<b>4,216</b>	<b>55</b>	<b>45</b>
Current-period provision for expected credit losses	(132)	4,291	24
Gross write-offs	(8)	(9)	(12)
Recoveries	0	0	2
Net write-offs	(8)	(9)	(10)
Foreign currency translation impact and other adjustments, net	45	(121)	(4)
<b>Balance at end of period</b>	<b>4,121</b>	<b>4,216</b>	<b>55</b>
of which individually evaluated	4,099	4,202	17
of which collectively evaluated	22	14	38

The current-period provision for expected credit losses on other financial assets held at amortized cost included a release of CHF 155 million in 2022 and a provision of CHF 4,307 million in 2021 related to Archegos Capital Management (Archegos). As of December 31, 2022 and 2021, the allowance for credit losses on brokerage receivables of CHF 4,081 million and CHF 4,186 million, respectively, were primarily related to Archegos.

In 2022 and 2021, the Group purchased other financial assets held at amortized cost amounting to CHF 931 million and CHF 196 million, respectively, primarily related to mortgage servicing advances.

## Credit quality information

### Monitoring of credit quality and internal ratings – Overview

The Group monitors the credit quality of financial assets held at amortized cost through its credit risk management framework, which provides for the consistent evaluation, measurement and management of credit risk across the Group. Assessments of credit risk exposures for internal risk estimates and risk-weighted assets are calculated based on PD, LGD and EAD models.

- Refer to “Expected credit losses on non-impaired credit exposures” for further information on PD, LGD and EAD.

The credit risk management framework incorporates the following core elements:

- Counterparty and transaction assessments: application of internal credit ratings (using PD), assignment of LGD and EAD values in relation to counterparties and transactions;
- Credit limits: establishment of credit limits, including limits based on notional exposure, potential future exposure and stress exposure, subject to approval by delegated authority holders, to serve as primary risk controls on exposures and to prevent undue risk concentrations;
- Credit monitoring, impairments and provisions: processes to support the ongoing monitoring and management of credit exposures, supporting the early identification of deterioration and any subsequent impact; and
- Risk mitigation: active management of risk mitigation provided in relation to credit exposures, including through the use of cash sales, participations, collateral or guarantees or hedging instruments.

In addition to traditional credit exposure measurement, monitoring and management using current and potential future exposure metrics, Credit Risk performs counterparty and portfolio credit risk assessments of the impact of various internal stress test scenarios. Credit Risk assesses the impact to credit risk exposures arising from market movements in accordance with the scenario narrative, which can further support the identification of concentration or tail risks. The scenario suite includes historical scenarios as well as forward-looking scenarios which are used across the Risk function.

Credit Risk evaluates and assesses counterparties and clients to whom the Group has credit exposures, primarily using internal rating models. Credit Risk uses these models to determine internal credit ratings which are intended to reflect the PD of each counterparty.

For a majority of counterparties and clients, internal ratings are based on internally developed statistical models that have been backtested against internal experience and validated by a function independent of model development. Findings from back-testing serve as a key input for any future rating model developments. The Group’s internally developed statistical rating models are based on a combination of quantitative factors (e.g., financial

fundamentals, such as balance sheet information for corporates and loan-to-value (LTV) ratio and the borrower’s income level for mortgage lending, and market data) and qualitative factors (e.g., credit histories from credit reporting bureaus and economic trends).

For the remaining counterparties where statistical rating models are not used, internal credit ratings are assigned on the basis of a structured expert approach using a variety of inputs, such as peer analyses, industry comparisons, external ratings and research as well as the judgment of senior credit officers.

In addition to counterparty ratings, Credit Risk also assesses the risk profile of individual transactions and assigns transaction ratings which reflect specific contractual terms such as seniority, security and collateral.

Internal credit ratings may differ from external credit ratings, where available, and are subject to periodic review depending on exposure type, client segment, collateral or event-driven developments. The Group’s internal ratings are mapped to a PD band associated with each rating which is calibrated to historical default experience using internal data and external data sources. The Group’s internal rating bands are reviewed on an annual basis with reference to extended historical default data and are therefore based on stable long-run averages. Adjustments to PD bands are only made where significant deviations to existing values are detected. The last update was made in 2012 and since then no significant changes to the robust long-run averages have been detected.

For the purpose of the credit quality disclosures included in these financial statements, an equivalent rating based on the Standard & Poor’s rating scale is assigned to the Group’s internal ratings based on the PD band associated with each rating. These internal ratings are used consistently across all classes of financial assets and are aggregated to the credit quality indicators “investment grade” and “non-investment grade”.

The Group uses internal rating methodologies consistently for the purposes of approval, establishment and monitoring of credit limits and credit portfolio management, credit policy, management reporting, risk-adjusted performance measurement, economic risk capital measurement and allocation and financial accounting.

A credit quality monitoring process is performed to provide for early identification of possible changes in the creditworthiness of clients and includes regular asset and collateral quality reviews, business and financial statement analysis and relevant economic and industry studies. Credit Risk maintains regularly updated watch lists and holds review meetings to re-assess counterparties that could be subject to adverse changes in creditworthiness. The review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment.

- Refer to “Expected credit losses on impaired credit exposures” for further information on credit monitoring.

### Credit quality of loans held at amortized cost

The following table presents the Group's carrying value of loans held at amortized cost by aggregated internal counterparty credit ratings "investment grade" and "non-investment grade" that are used as credit quality indicators for the purpose of this disclosure,

by year of origination. Within the line items relating to the origination year, the first year represents the origination year of the current reporting period and the second year represents the origination year of the comparative reporting period.

<sup>1</sup> Excluded accrued interest on loans held at amortized cost of CHF 534 million and CHF 295 million as of December 31, 2022 and 2021, respectively.

As of December 31, 2022 and 2021, the Group did not have any loans that were more than 90 days past due and still accruing interest. Also, the Group did not have any debt securities held-to-maturity or other financial assets held at amortized cost that were past due.

## Non-accrual financial assets

### Overview

Generally, a financial asset is deemed non-accrual and recognition of any interest in the statement of operations is discontinued when the contractual payments of principal and/or interest are more than 90 days past due.

Payments collected on non-accrual financial assets are accounted for using the cash basis or the cost recovery method or a combination of both.

Generally, non-accrual financial assets may be restored to performing status only when delinquent principal and interest are brought up to date in accordance with the terms of the contractual arrangement and when certain performance criteria are met.

- Refer to “Note 1 – Summary of significant accounting policies” for further information on the recognition of write-offs of financial assets and related recoveries.

For loans held at amortized cost, non-accrual loans are comprised of non-performing loans and non-interest-earning loans.

In the Group's recovery management function covering the Investment Bank and parts of Wealth Management, once the credit provision is greater than 90% of the loan's notional amount, a position may be written down to its net carrying value in the subsequent quarter if all recovery options are exhausted. In the Group's recovery management functions for the Swiss Bank and the remaining parts of Wealth Management, write-offs are made based on an individual counterparty assessment. An evaluation is performed on the need for write-offs on impaired loans individually and on an ongoing basis if it is likely that parts of a loan or the entire loan will not be recoverable. Write-offs of residual loan balances are executed once available debt enforcement procedures are exhausted or, in certain cases, upon a restructuring.

### Collateral-dependent financial assets

The Group's collateral-dependent financial assets are managed by a global recovery management function which is divisionally aligned to cover the Investment Bank, Wealth Management and the Swiss Bank.

Collateral-dependent financial assets managed by the recovery management function covering the Investment Bank and parts of Wealth Management mainly include mortgages (including aircraft mortgages), revolving corporate loans, securities borrowing, trade finance exposures and lombard loans. For mortgages, property, aircraft, guarantees and life insurance policies are the main collateral types. For revolving corporate loans, collateral includes mainly cash, inventory, oil and gas reserves and receivables. Securities borrowing exposures are mainly secured by pledged shares, bonds, investment fund units and money market instruments. Trade finance exposures are secured by cash and guarantees. For lombard loans, the Group holds collateral in the form of pledged shares, bonds, investment fund units and money market

instruments as well as cash and life insurance policies. The overall collateral coverage ratio increased from 92% as of December 31, 2021 to 94% as of December 31, 2022, mainly driven by newly impaired highly collateralized securitization exposures relating to aircraft companies.

Collateral-dependent financial assets managed by the recovery management function for the remaining parts of Wealth Management mainly include ship finance exposures, commercial loans, lombard loans, residential mortgages as well as aviation and yacht finance exposures. Ship finance exposures are collateralized by vessel mortgages, corporate guarantees, insurance assignments as well as cash balances, securities deposits or other assets held with the Group. Collateral held against commercial loans include primarily guarantees issued by export credit agencies, other guarantees, private risk insurance, asset pledges and assets held with the Group (e.g., cash, securities deposits and others). Lombard loans are collateralized by pledged financial assets mainly in the form of cash, shares, bonds, investment fund units and money market instruments as well as life insurance policies and bank guarantees. Residential mortgages are secured by mortgage notes on residential real estate, life insurance policies as well as cash balances, securities deposits or other assets held with the Group. Aviation and yacht finance exposures are collateralized by aircraft mortgages of business jets and vessel mortgages on yachts, respectively, as well as corporate and/or personal guarantees, cash balances, securities deposits or other assets held with the Group. Collateral-dependent loans increased in 2022, mainly driven by increases in export finance, yacht finance and aviation finance, partially offset by a decrease in lombard loans. The overall collateral coverage increased from 87% as of December 31, 2021 to 92% as of December 31, 2022, mainly driven by increases in higher collateralized exposures.

Collateral-dependent financial assets managed by the recovery management function for Swiss Bank mainly include residential mortgages and commercial mortgages. Collateral held against residential mortgages includes mainly mortgage notes on residential real estate, pledged capital awards in retirement plans and life insurance policies. For commercial mortgages, collateral held includes primarily mortgage notes on commercial real estate and cash balances, securities deposits or other assets held with the Group. The overall collateral coverage ratio in relation to the collateral-dependent financial assets increased from 86% as of December 31, 2021 to 88% as of December 31, 2022 for residential and commercial mortgages, mainly reflecting portfolio replacements with higher collateralized exposures as well as write-offs related to lower collateralized exposures.

#### Off-balance sheet credit exposures

The Group portfolio comprises off-balance sheet exposures with credit risk in the form of irrevocable commitments, guarantees and similar instruments which are subject to the CECL accounting guidance. The main risk characteristics are as follows:

- Irrevocable commitments are primarily commitments made to corporate and institutional borrowers to provide loans under approved, but undrawn, credit facilities. In addition, the Group

has irrevocable commitments under documentary credits for corporate and institutional clients that facilitate international trade. The related credit risk exposure is to corporate clients, including small and medium-sized enterprises, large corporates and multinational clients who are impacted by macroeconomic and industry-specific factors such as economic growth, unemployment and industrial production.

- Guarantees are provided to third parties which contingently obligate the Group to make payments in the event that the underlying counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The credit risk associated with guarantees is primarily to corporate and institutional clients and financial institutions, which are sensitive to MEFs including economic growth and interest rates.

For off-balance sheet credit exposures, methodology, scenarios and MEFs used to estimate the provision for expected credit losses are the same as those used to estimate the allowance for credit losses for financial assets held at amortized cost. For the EAD models, a credit conversion factor or similar methodology is applied to off-balance sheet credit exposures in order to project the additional drawn amount between current utilization and the committed facility amount.

- Refer to “Allowance for credit losses” for further information on methodology, scenarios and MEFs used to estimate expected credit losses.

In 2022, the loan modifications of the Group mainly included extended loan repayment terms, including postponed loan amortizations and extended maturity dates, interest rate concessions, a

waiver of interest, a reduction of a loan commitment, a subordination of loans and changes in collateral coverage terms.

As of December 31, 2022 and 2021, the Group did not have any commitments to lend additional funds to debtors whose loan terms had been modified in troubled debt restructurings.

In March 2020, US federal banking regulators issued the “Inter-agency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus (Revised)” (Interagency Statement). According to the Interagency Statement, short-term modifications made on a good faith basis in response to the COVID-19 crisis to borrowers that were otherwise current prior to the relief being granted would not

be considered to be troubled debt restructurings. This includes short-term modifications such as payment deferrals, fee waivers, repayment term extensions or payment delays that are insignificant. The Interagency Statement was developed in consultation with the FASB and the Group applied this guidance until December 31, 2022. The Group had granted short-term modifications to certain borrowers due to the COVID-19 crisis in the form of deferrals of capital and interest payments that were within the scope of this guidance and the loans subject to those deferrals were not reported as troubled debt restructurings in restructured loans.

<sup>1</sup> Gross amount of goodwill and accumulated impairment included CHF 12 million related to legacy business transferred to the former Strategic Resolution Unit in 4Q15 and fully written off at the time of transfer, in addition to the divisions disclosed.

In accordance with US GAAP, the Group continually assesses whether or not there has been a triggering event requiring a review of goodwill.

Subsequent to the creation of the new segment structure, effective January 1, 2022, a portion of the Wealth Management business was transferred to the Investment Bank in the second quarter of 2022. Goodwill is reallocated between reporting units on a relative fair value basis. The Group concluded that the goodwill transferred to the Investment Bank reporting unit of CHF 23 million was fully impaired.

The announcement on October 27, 2022 of the strategy and organizational changes as well as adverse market and economic conditions represent triggering events for the third quarter of 2022 for goodwill impairment testing purposes, and under US GAAP, goodwill has to be tested for impairment both before and immediately after a reorganization of reporting units. The review of the Group's five-year financial plan to reflect the announced strategy was finalized in the fourth quarter of 2022.

The Group concluded that the estimated fair value for all of the reporting units with goodwill exceeded their related carrying values and no further impairment was necessary as of December 31, 2022.

The fair values of the Asset Management and Wealth Management reporting units both exceeded their related carrying values by less than 10%. During the fourth quarter of 2022, Credit Suisse experienced a significant level of deposit and assets under management outflows. The goodwill allocated to these reporting units became more sensitive to an impairment due to these outflows and subdued client activity. There is a significant risk of a future goodwill impairment for these reporting units if their future performances do not achieve the financial projections contained within the five-year financial plan.

As a result of the announced strategy and organizational changes, the Private Fund Group business in the Asset Management reporting unit was transferred to the Investment Bank reporting unit effective January 1, 2023, resulting in an initial transfer of approximately CHF 30 million of goodwill between the reporting units. The Group expects a full impairment in the first quarter of 2023 of the goodwill transferred to the Investment Bank.

As a result of the previously announced acquisition of The Klein Group LLC that is expected to close in the first half of 2023, the Investment Bank will initially recognize a goodwill balance of approximately CHF 60 million, which it expects to fully impair upon the closing of the acquisition.

The carrying value of each reporting unit for the purpose of the goodwill impairment test is determined by considering the reporting units' risk-weighted assets usage, leverage ratio exposure, deferred tax assets, goodwill, intangible assets and other common equity tier 1 (CET1) capital relevant adjustments. The residual value between the total of these elements and the Group's shareholders' equity is allocated to the carrying value of the reporting units on a pro-rata basis.

In estimating the fair value of its reporting units, the Group applied a combination of the market approach and the income approach. Under the market approach, consideration is given to price to projected earnings multiples and price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate is applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows, which were determined from the Group's financial plan.

In determining the estimated fair value, the Group relied upon its latest five-year financial plan, which included significant management assumptions and estimates based on its view of current and future economic conditions and regulatory changes.

Estimates of the Group's future earnings potential, and that of the reporting units, involve considerable judgment, including management's view on future changes in market cycles, the regulatory environment and the anticipated result of the implementation of business strategies, competitive factors and assumptions concerning the retention of key employees.

The results of the impairment evaluation of each reporting unit's goodwill would be significantly impacted by adverse changes in the underlying parameters used in the valuation process. If actual outcomes or the future outlook adversely differ from management's best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, the Group could potentially incur material impairment charges in the future.

- Refer to “Note 24 – Leases” for further information on right-of-use assets.

## 24 Leases

The Group enters into both lessee and lessor arrangements.

- Refer to “Note 1 – Summary of significant accounting policies” and “Note 23 – Other assets and other liabilities” for further information.

### Lessee arrangements

The Group primarily enters into operating leases. When a real estate lease has both lease and non-lease components, the Group allocates the consideration in the contract based on the relative standalone selling price. For all leases other than real estate leases, the Group does not separate lease and non-lease components. The Group’s finance leases are not material.

The Group has entered into leases for real estate, equipment and vehicles.

Certain equipment and real estate have subsequently been subleased. Sublease income is recognized in other revenues.

### Lease costs

end of	2022	2021	2020
<b>Lease costs (CHF million)</b>			
Operating lease costs	340	357	369
Variable lease costs	46	52	50
Sublease income	(52)	(57)	(71)
<b>Net lease costs</b>	<b>334</b>	<b>352</b>	<b>348</b>

From time to time, the Group enters into sale-leaseback transactions in which an asset is sold and immediately leased back. If specific criteria are met, the asset is derecognized from the balance sheet and an operating lease is recognized.

During 2022, the Group entered into 12 sale-leaseback transactions with lease terms ranging from 5 to 10 years. During 2021, the Group entered into 13 sale-leaseback transactions with lease terms ranging from 3 to 10 years. During 2020, the Group entered into one sale-leaseback transaction with a lease term of one year.

### Other information

end of	2022	2021	2020
<b>Other information (CHF million)</b>			
Gains/(losses) on sale and leaseback transactions	336	225	15
Cash paid for amounts included in the measurement of operating lease liabilities recorded in operating cash flows	(402)	(399)	(403)

Future interest payable	(365)	(413)
<b>Operating lease liabilities</b>	<b>2,419</b>	<b>2,591</b>

### Lessor arrangements

The Group enters into sales-type, direct financing and operating leases for real estate, equipment and vehicles. When a real estate lease has both lease and non-lease components, the Group allocates the consideration in the contract based on the relative standalone selling price. For all leases other than real estate leases, the Group does not separate lease and non-lease components.

As of December 31, 2022 and 2021, the Group had approximately CHF 1.3 billion and CHF 1.1 billion, respectively, of residual value guarantees associated with lessor arrangements.

The Group’s risk of loss relating to the residual value of leased assets is mitigated through contractual arrangements with manufacturers or suppliers. Leased assets are also monitored through projections of the residual values at lease origination and periodic reviews of residual values.

## Net investments

end of	2022		2021	
	Sales-type leases	Direct financing leases	Sales-type leases	Direct financing leases

Future interest receivable	(97)	(180)	—	(60)	(170)	—
<b>Lease receivables</b>	<b>1,324</b>	<b>2,473</b>	<b>—</b>	<b>1,107</b>	<b>2,395</b>	<b>—</b>

The Group elected the practical expedient to not evaluate whether certain sales taxes and other similar taxes are lessor cost or lessee cost and excludes these costs from being reported as lease income with an associated expense.

The Group enters into leases with fixed or variable lease payments, or with lease payments that depend on an index or a referenced rate which are included in the net investment in the lease at lease commencement, as such payments are considered unavoidable. Other variable lease payments, as well as subsequent changes in an index or referenced rate, are excluded from the net investment in the lease. Lease payments are recorded when due and payable by the lessee.

## Lease income

end of	2022	2021	2020
<b>Lease income (CHF million)</b>			
Interest income on sales-type leases	33	25	19
Interest income on direct financing leases	70	68	74
Lease income from operating leases	67	76	93
Variable lease income	3	1	0
<b>Total lease income</b>	<b>173</b>	<b>170</b>	<b>186</b>

Certain leases include i) termination options that allow lessees to terminate the leases within three months of the commencement date, with a notice period of 30 days; ii) termination options that allow the Group to terminate the lease but do not provide the lessee with the same option; iii) termination penalties; iv) options to prepay the payments for the remaining lease term; or v) options that permit the lessee to purchase the leased asset at market value or at the greater of market value and the net present value of the remaining payments.

The Group may enter into vehicle leases as a lessor with members of the Board of Directors or the Executive Board. The terms of such leases with members of the Board of Directors are similar to those with third parties and the terms of such leases with members of the Executive Board reflect standard employee conditions.

## 25 Deposits

<b>Total structured notes</b>	<b>38,925</b>	<b>43,126</b>

Total long-term debt includes debt issuances managed by Treasury that do not contain derivative features (vanilla debt), as well as hybrid debt instruments with embedded derivatives, which are issued as part of the Group's structured product activities. Long-term debt includes both Swiss franc and foreign exchange denominated fixed and variable rate bonds.

The interest rate ranges presented in the table below are based on the contractual terms of the Group's vanilla debt. Interest rate ranges for future coupon payments on structured products for which fair value has been elected are not included in the table below as these coupons are dependent upon the embedded derivative and prevailing market conditions at the time each coupon is paid. In addition, the effects of derivatives used for hedging are not included in the interest rate ranges on the associated debt.

The maturity of perpetual debt was based on the earliest callable date. The maturity of all other debt is based on contractual maturity and includes certain structured notes that have mandatory early redemption features based on stipulated movements in markets or the occurrence of a market event. Within this population there are approximately CHF 0.8 billion of such notes with a contractual maturity of greater than one year that have an observable likelihood of redemption occurring within one year based on a modelling assessment.

- 1 Excludes structured notes for which fair value has been elected as the related coupons are dependent upon the embedded derivatives and prevailing market conditions at the time each coupon is paid.
- 2 Reflects equity linked notes, where the payout is not fixed.

The Group and the Bank maintain a shelf registration statement with the SEC, which allows each entity to issue, from time to time, senior and subordinated debt securities, warrants and guarantees.

The Bank maintains a euro medium-term note program that allows the Bank to issue senior debt securities.

The Group maintains three senior debt programs that allow the Group to issue senior debt securities with certain features that are designed to allow for statutory bail-in by the Swiss Financial Market Supervisory Authority FINMA (FINMA) under the Swiss banking laws and regulations.

The Bank maintains a JPY 500 billion Samurai shelf registration statement that allows the Bank to issue, from time to time, senior and subordinated debt securities.

- 1 At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 575,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. None of these shares were reserved for capital instruments.
- 2 At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 450,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 111,524,164 of these shares were reserved for capital instruments.

---

## 28 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

The Group uses master netting agreements to mitigate counterparty credit risk in certain transactions, including derivative contracts and securities borrowed, lent and subject to repurchase agreements.

### Derivatives

The Group transacts bilateral OTC derivatives (OTC derivatives) mainly under International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values (PRV/NRV) and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements or terms exist, fair values are recorded on a gross basis.

Exchange-traded derivatives or OTC-cleared derivatives, which are fully margined and for which the daily margin payments constitute settlement of the outstanding exposure, are not included in the offsetting disclosures because they are not subject to offsetting due to the daily settlement. The daily margin payments, which are not settled until the next settlement cycle is conducted, are presented in brokerage receivables or brokerage payables. The notional amount for these daily settled derivatives is included in the fair value of derivative instruments table in "Note 33 – Derivatives and hedging activities".

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcated hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

## Offsetting of derivatives

<sup>1</sup> Prior period has been revised.

<sup>2</sup> Primarily precious metals, commodity and energy products.

<sup>3</sup> Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

### Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by master repurchase agreements. In certain situations, for example, in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Master repurchase agreements also include payment or settlement netting provisions in the normal course of business that

state that all amounts in the same currency payable by each party to the other under any transaction or otherwise under the master repurchase agreement on the same date shall be set off.

As permitted by US GAAP the Group has elected to net transactions under such agreements in the consolidated balance sheet when specific conditions are met. Transactions are netted if, among other conditions, they are executed with the same counterparty, have the same explicit settlement date specified at the

inception of the transactions, are settled through the same securities transfer system and are subject to the same enforceable master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, a significant portion of the collateral received that may be sold or repledged was sold or repledged as of December 31, 2022 and December 31, 2021. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

#### Offsetting of securities purchased under resale agreements and securities borrowing transactions

end of	2022			2021		
	Gross	Offsetting	Net book value	Gross	Offsetting	Net book value
<b>Securities purchased under resale agreements and securities borrowing transactions (CHF billion)</b>						
Securities purchased under resale agreements	47.9	(10.7)	37.2	74.1	(16.6)	57.5

of which securities sold under repurchase agreements and securities lending transactions	31.0	(10.7)	20.3 <sup>2</sup>	51.9	(16.6)	35.3 <sup>2</sup>
of which obligation to return securities received as collateral, at fair value	3.0	0.0	3.0	15.0	0.0	15.0

1 Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

2 CHF 14,042 million and CHF 13,213 million of the total net amount as of the end of 2022 and 2021, respectively, were reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities

lending and borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

<b>Total financial liabilities subject to enforceable master netting agreements</b>	<b>27.4</b>	<b>21.8</b>	<b>0.0</b>	<b>5.6</b>	<b>52.0</b>	<b>45.1</b>	<b>0.1</b>	<b>6.8</b>

1 The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of credit default swaps (CDS) and credit insurance contracts.

Therefore the net exposure presented in the table above is not representative of the Group's counterparty exposure.

<sup>1</sup> The statutory tax rate was 18.5% in 2022 and 2021 and 20% in 2020.

## 2022

**Foreign tax rate differential** of CHF 93 million reflected a foreign tax benefit, primarily driven by losses in higher tax jurisdictions, mainly in the US and the UK, partially offset by profits made in higher tax jurisdictions, mainly in Brazil. The foreign tax rate expense of CHF 3,614 million comprised not only the foreign tax expense based on statutory tax rates but also the tax impacts related to the following reconciling items.

**Other non-deductible expenses** of CHF 306 million included the impact of CHF 189 million relating to non-deductible interest expenses and non-deductible funding costs, CHF 154 million relating to non-deductible legacy litigation provisions, CHF 75 million relating to other non-deductible expenses, CHF 15 million relating to non-deductible UK bank levy costs and various smaller items. These expenses were partially offset by a net benefit of CHF 138 million for the reassessment of the interest cost deductibility relating to the recognition of previously unrecognized tax benefits of non-deductible funding.

**Lower taxed income** of CHF 147 million included a tax benefit of CHF 65 million related to non-taxable life insurance income, CHF 39 million related to non-taxable dividend income, CHF 37 million related to concessionary and lower taxed income and various smaller items.

**Changes in deferred tax valuation allowances** of CHF 4,545 million primarily related to the reassessment of deferred tax assets as a result of the comprehensive strategic review announced on October 27, 2022, primarily due to the limited future taxable income against which deferred tax assets could be utilized. Management considered both positive and negative evidence and concluded that it is more likely than not that a significant portion of the Group's deferred tax assets will not be realized. This resulted in an increase in the valuation allowance of CHF 3,655 million, mainly in respect of two of the Group's operating entities in the US. The net impact also included valuation allowances on deferred tax assets of CHF 850 million related to current year results, mainly in respect of two of the Group's operating entities in Switzerland, three of the Group's operating entities in the US and two of the Group's operating entities in the UK. This also included an increase in the valuation allowance of CHF 40 million relating to year-end reassessments of deferred tax assets.

**Other** of CHF 80 million included an income tax benefit of CHF 180 million relating to return-to-provision adjustments and CHF 36 million relating to tax credits. These benefits were partially offset by CHF 57 million relating to the current year US base erosion and anti-abuse tax (BEAT) provision, CHF 45 million relating to the tax impact of an accounting standard implementation transition adjustment for own credit movements and CHF 27 million relating to unrealized mark-to-market results on share-based compensation. The remaining balance included various smaller items.

## 318 Consolidated financial statements – Credit Suisse Group

## 2021

**Foreign tax rate differential** of CHF 370 million reflected a foreign tax charge primarily driven by losses in higher tax jurisdictions, mainly in the UK, partially offset by profits made in higher tax jurisdictions, such as the US. The foreign tax rate expense of CHF 488 million comprised not only the foreign tax expense based on statutory tax rates but also the tax impacts related to the following reconciling items.

**Other non-deductible expenses** of CHF 386 million included the impact of CHF 200 million relating to non-deductible interest expenses and non-deductible costs related to funding and capital (including a contingency accrual of CHF 11 million), CHF 93 million relating to non-deductible legacy litigation provisions, including amounts relating to the Mozambique matter, CHF 43 million relating to other non-deductible expenses, CHF 39 million relating to non-deductible bank levy costs and other non-deductible compensation expenses and management costs and various other small items.

**Lower taxed income** of CHF 146 million included a tax benefit of CHF 77 million related to non-taxable life insurance income, CHF 41 million related to non-taxable dividend income, CHF 15 million related to concessionary and lower taxed income, CHF 15 million related to exempt income and various smaller items.

**Changes in deferred tax valuation allowances** of CHF 621 million included a tax charge from the increase in valuation allowances on deferred tax assets of CHF 781 million, mainly in respect of two of the Group's operating entities in the UK. This mainly reflected the impact of the loss related to Archehos attributable to the UK operations. Also included was the net impact of the release of valuation allowances on deferred tax assets of CHF 160 million, mainly in respect of one of the Group's operating entities in Switzerland and another of the Group's operating entities in Hong Kong.

**Other** of CHF 174 million included an income tax charge of CHF 100 million relating to withholding taxes, CHF 51 million relating to the tax impact of an accounting standard implementation transition adjustment for own credit movements, CHF 29 million relating to the current year BEAT provision and CHF 14 million relating to own credit valuation movements. These benefits were partially offset by CHF 24 million relating to prior years' adjustments. The remaining balance included various smaller items.

## 2020

**Foreign tax rate differential** of CHF 62 million reflected a foreign tax benefit primarily driven by losses in higher tax jurisdictions, mainly in the UK, and profits incurred in lower tax jurisdictions, mainly in Singapore, partially offset by profits made in higher tax jurisdictions, such as the US. The foreign tax rate expense of CHF 188 million comprised not only the foreign tax expense based on statutory tax rates but also the tax impacts related to the following reconciling items.

**Other non-deductible expenses** of CHF 254 million included the impact of CHF 117 million relating to non-deductible interest expenses and non-deductible costs related to funding and capital (including the impact of a previously unrecognized tax benefit of CHF 157 million relating to the resolution of interest cost deductibility with and between international tax authorities, partially offset by a contingency accrual of CHF 41 million), CHF 68 million relating to non-deductible bank levy costs and other non-deductible compensation expenses and management costs, CHF 46 million relating to non-deductible legacy litigation provisions and CHF 23 million relating to other non-deductible expenses.

**Lower taxed income** of CHF 234 million included a tax benefit of CHF 79 million related to the revaluations of the equity investments in SIX Group AG, Allfunds Group and Pfandbriefbank in Switzerland, CHF 67 million related to concessionary and lower taxed income, CHF 67 million related to non-taxable life insurance income, CHF 19 million related to the transfer of the Invest-lab fund platform to Allfunds Group and various smaller items.

**Changes in deferred tax valuation allowances** of CHF 322 million included a tax charge from the increase in valuation allowances on deferred tax assets of CHF 353 million, mainly in respect of the re-assessment of deferred tax assets reflecting changes in the forecasted future profitability of two of the Group's operating entities in Switzerland of CHF 252 million, and also in respect of one of the Group's operating entities in the UK. Also included was the net impact of the release of valuation allowances on deferred tax assets of CHF 31 million, mainly in respect of one of the Group's operating entities in Hong Kong and another of the Group's operating entities in the UK.

**Other** of CHF 259 million included an income tax benefit from the re-assessment of the BEAT provision for 2019 of CHF 180 million and the impact of a change in US tax rules relating to federal net operating losses (NOL), where federal NOL generated in tax years 2018, 2019 or 2020 can be carried back for five years instead of no carry back before and also the deductible interest expense limitations for the years 2019 and 2020 have been increased from 30% to 50% of adjusted taxable income for the year, which in aggregate resulted in a benefit of CHF 141 million. Additionally, this included an income tax benefit of CHF 82 million relating to prior years' adjustments and a tax benefit of CHF 34 million relating to the beneficial earnings mix of one of the Group's operating entities in Switzerland. These benefits were partially offset by CHF 78 million relating to the tax impact of an accounting standard implementation transition adjustment for own credit movements, CHF 61 million relating to withholding taxes, CHF 26 million relating to the current year BEAT provision and CHF 14 million relating to own credit valuation movements. The remaining balance included various smaller items.

The US tax reform enacted in December 2017 introduced the BEAT tax regime, effective as of January 1, 2018, for which final regulations were issued by the US Department of Treasury on December 2, 2019. Following the publication of the 2019 financial statements, Credit Suisse continued its analysis of the final

regulations, resulting in a revision to the technical application of the prior BEAT estimate. This new information was not available or reasonably knowable at the time of the publication of the 2019 financial statements and resulted in a change of accounting estimate reflected in 2020.

#### Deferred tax assets and liabilities

end of	2022	2021
<b>Deferred tax assets and liabilities (CHF million)</b>		
Compensation and benefits	654	844
Loans	1,151	485
Investment securities	992	1,257
Provisions	648	1,358
Leases	357	367
Derivatives	184	58
Real estate	241	258
Net operating loss carry-forwards	9,435	7,120
Goodwill and intangible assets	67	135
Other	437	171
<b>Gross deferred tax assets before valuation allowance</b>	<b>14,166</b>	<b>12,053</b>
Less valuation allowance	(10,208)	(6,072)
<b>Gross deferred tax assets net of valuation allowance</b>	<b>3,958</b>	<b>5,981</b>
Compensation and benefits	(878)	(973)
Loans	(2,298)	(305)
Investment securities	(744)	(722)
Provisions	(282)	(298)
Leases	(351)	(358)
Derivatives	(286)	(218)
Real estate	(46)	(46)
Other	(146)	(108)
<b>Gross deferred tax liabilities</b>	<b>(5,031)</b>	<b>(3,028)</b>
<b>Net deferred tax assets/(liabilities)</b>	<b>(1,073)</b>	<b>2,953</b>
of which deferred tax assets	305	3,707
of which net operating losses	141	881
of which deductible temporary differences	164	2,826
of which deferred tax liabilities	(1,378)	(754)

Net deferred tax liabilities of CHF 1,073 million as of December 31, 2022 decreased CHF 4,026 million compared to net deferred tax assets of CHF 2,953 million as of December 31, 2021, primarily reflecting the valuation allowances relating to the reassessment of the deferred tax assets as a result of the comprehensive strategic review announced on October 27, 2022, as well as valuation allowances relating to current period results. The movement also reflected tax impacts directly recorded in other comprehensive income, mainly related to own credit movements, partially offset by the impact of foreign exchange translation gains, which were included within the currency translation adjustments, and a pension plan re-measurement.

The Group's valuation allowance against gross deferred tax assets was CHF 10.2 billion as of December 31, 2022 compared to CHF 6.1 billion as of December 31, 2021. This was due to the uncertainty concerning the Group's ability to generate the necessary amount and mix of taxable income in future periods. The

valuation allowance also reflected an increase due to participation impairments in one of the Group's operating entities in Switzerland and a decrease due to valuation allowance adjustments recorded in other comprehensive income, mainly related to own credit movements.

### Unrecognized deferred tax liabilities

As of December 31, 2022, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 18.2 billion. No deferred tax liability was recorded in respect of those amounts, as these earnings are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

### Amounts and expiration dates of net operating loss carry-forwards

end of 2022	Total
<b>Net operating loss carry-forwards (CHF million)</b>	
Due to expire within 1 year	4,081
Due to expire within 2 to 5 years	4,772
Due to expire within 6 to 10 years	12,780
Due to expire within 11 to 20 years	9,118
<b>Amount due to expire</b>	<b>30,751</b>
Amount not due to expire	24,834
<b>Total net operating loss carry-forwards</b>	<b>55,585</b>

### Movements in the valuation allowance

in	2022	2021	2020
<b>Movements (CHF million)</b>			
<b>Balance at beginning of period</b>	<b>6,072</b>	<b>4,465</b>	<b>4,136</b>
Net changes	4,136	1,607	329
<b>Balance at end of period</b>	<b>10,208</b>	<b>6,072</b>	<b>4,465</b>

As part of its normal practice, the Group conducted a detailed evaluation of its expected future results. This evaluation was dependent on management estimates and assumptions in developing the expected future results, which were based on a strategic business planning process influenced by current economic conditions and assumptions of future economic conditions that are subject to change. This evaluation took into account both positive and negative evidence related to expected future taxable income and also considered stress scenarios.

This evaluation has indicated the expected future results that are likely to be earned in jurisdictions where the Group has significant gross deferred tax assets, primarily in the US, Switzerland and the UK. The Group then compared those expected future results with the applicable law governing the utilization of deferred tax assets.

Based on the expected future results in two of the Group's operating entities in Switzerland and given that the Swiss tax law allows for a seven-year carry-forward period for NOLs, a valuation allowance is still required on the deferred tax assets of these entities.

UK tax law allows for an unlimited carry-forward for NOLs, while US tax law allows for a 20-year carry-forward period for NOLs arising prior to 2017, federal NOLs generated in tax years from 2018, 2019 and 2020 to be carried back for five years and no expiry limitations for NOLs that arose in 2018 and subsequent years. However, unlimited and long expiry limitations for NOLs are not expected to have a material impact on the recoverability of the net deferred tax assets as management concluded that there was limited recoverability of the net deferred tax assets in the US and the UK as a result of the comprehensive strategic review announced on October 27, 2022, primarily due to limited future taxable income against which deferred tax assets could be utilized.

### Tax benefits associated with share-based compensation

in	2022	2021	2020
<b>Tax benefits (CHF million)</b>			
Tax benefits recorded in the consolidated statements of operations <sup>1</sup>	221	234	264

<sup>1</sup> Calculated at the statutory tax rate before valuation allowance considerations.

- Refer to "Note 30 – Employee deferred compensation" for further information on share-based compensation.

If, upon settlement of share-based compensation, the tax deduction exceeds the cumulative compensation cost that the Group has recognized in the consolidated financial statements, the utilized tax benefit associated with any excess deduction is considered a "windfall" and recognized in the consolidated statements of operations and reflected as an operating cash inflow in the consolidated statements of cash flows. If, upon settlement, the tax deduction is lower than the cumulative compensation cost that the Group has recognized in the consolidated financial statements, the tax charge associated with the lower deduction is considered a "shortfall". Tax charges arising on shortfalls are recognized in the consolidated statements of operations.

### Uncertain tax positions

US GAAP requires a two-step process in evaluating uncertain income tax positions. In the first step, an enterprise determines whether it is more likely than not that an income tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Income tax positions meeting the more-likely-than-not recognition threshold are then measured to determine the amount of benefit eligible for recognition in the consolidated financial statements. Each income tax position is measured at the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement.

## Reconciliation of gross unrecognized tax benefits

of which, if recognized, would affect the effective tax rate	227	425	382

## Interest and penalties

<u>in</u>	<u>2022</u>	<u>2021</u>	<u>2020</u>
<b>Interest and penalties (CHF million)</b>			
Interest and penalties recognized in the consolidated statements of operations	(5)	3	(16)
Interest and penalties recognized in the consolidated balance sheets	59	64	61

Interest and penalties are reported as tax expense. The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, Germany, Switzerland, the UK and the US. Although the timing

of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease of between zero and CHF 14 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2020 (federal and Zurich cantonal level); Brazil – 2017; the UK – 2012; and the US – 2010.

### 30 Employee deferred compensation

Payment of deferred compensation to employees is determined by the nature of the business, role, location and performance of the employee. Unless there is a contractual obligation, granting deferred compensation is solely at the discretion of the Compensation Committee and senior management. Replacement awards granted as part of a contractual obligation are typically used to compensate new senior employees for forfeited awards from previous employers upon joining the Group. It is the Group's policy not to make multi-year guarantees. The Group fully covered its share delivery obligations through market purchases in 2022, 2021 and 2020.

Compensation expense recognized in the consolidated statement of operations for share-based and other awards that were granted as deferred compensation is recognized in accordance with the specific terms and conditions of each respective award and is primarily recognized over the future requisite service and vesting period, which is determined by the plan, retirement eligibility of employees and certain other terms. All deferred compensation plans are subject to restrictive covenants, which generally include non-compete and non-solicit provisions. Compensation expense for share-based and other awards that were granted as deferred compensation also includes the current estimated outcome of applicable performance criteria, estimated future forfeitures and mark-to-market adjustments for certain cash awards that are still outstanding.

#### Deferred compensation expense

The following tables show the compensation expense for deferred compensation awards granted in 2022 and prior years that was recognized in the consolidated statements of operations during 2022, 2021 and 2020, the total shares delivered, the estimated unrecognized compensation expense for deferred compensation awards granted in 2022 and prior years outstanding as of December 31, 2022 and the remaining requisite service period over which the estimated unrecognized compensation expense will be recognized. The recognition of compensation expense for the deferred compensation awards granted in February 2023 began in 2023 and thus had no impact on the 2022 consolidated financial statements.

#### Deferred compensation expense

in	2022	2021	2020
<b>Deferred compensation expense (CHF million)</b>			
Share awards	307	482	573
Performance share awards	(3) <sup>1</sup>	290	448
Strategic Delivery Plan	248	—	—
Contingent Capital Awards	(3)	202	255
Cash awards	637	350	398
Retention awards	174	123	43
<b>Total deferred compensation expense</b>	<b>1,360</b>	<b>1,447</b>	<b>1,717</b>
<b>Total shares delivered (million)</b>			
Total shares delivered	60.3	58.5	50.7

1 Included downward adjustment applied to outstanding performance share awards.

The estimated unrecognized compensation expense was based on the fair value of each award on the grant date and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

#### Estimated unrecognized deferred compensation

end of	2022
<b>Estimated unrecognized compensation expense (CHF million)</b>	
Share awards	203
Performance share awards	52
Strategic Delivery Plan	254
Contingent Capital Awards	55
Cash awards	586
Retention awards	343
<b>Total</b>	<b>1,493</b>
<b>Aggregate remaining weighted-average requisite service period (years)</b>	
Aggregate remaining weighted-average requisite service period	1.3

Does not include the estimated unrecognized compensation expense relating to grants made in 2023 for 2022.

#### Share awards

Deferred compensation awards are awarded to employees with total compensation of CHF/USD 250,000 or the local currency equivalent or higher. Each share award granted entitles the holder of the award to receive one Group share, subject to service conditions. Share awards vest over three years with one third of the share awards vesting on each of the three anniversaries of the grant date (ratable vesting), with the exception of awards granted to individuals classified as material risk takers (MRTs), risk manager MRTs or senior managers or equivalents under the requirements of EU Capital Requirements Directive V and UK Investment Firms Prudential Regime. Share awards granted to MRTs vest over four years with one quarter of the award vesting on each of the four anniversaries of the grant date. Share awards granted to risk manager MRTs vest over five years with one fifth of the award vesting on each of the five anniversaries of the grant date. Share awards granted to senior managers vest over seven years, with one fifth of the award vesting on each of the

third to seventh anniversaries of the grant date. Share awards are expensed over the service period of the awards. The value of the share awards is solely dependent on the Group share price at the time of delivery.

The Group's share awards include other awards, such as blocked shares and special awards, which may be granted to new employees. Other share awards entitle the holder to receive one Group share and are generally subject to continued employment with the Group, contain restrictive covenants and cancellation provisions and generally vest between zero and five years.

In order to comply with the requirements of EU Capital Requirements Directive V and UK Investment Firms Prudential Regime and other applicable remuneration regulations, employees who hold key roles in respect of certain Group subsidiaries receive shares that are subject to transfer restrictions for 50% of the amount that would have been paid to them in cash. These shares are vested at the time of grant but remain blocked, that is, subject to transfer restrictions, for either six months or one year from the date of grant, depending on the location.

## Share award activities

	2022		2021		2020	
	Number of share awards in million	Weighted-average grant-date fair value in CHF	Number of share awards in million	Weighted-average grant-date fair value in CHF	Number of share awards in million	Weighted-average grant-date fair value in CHF
<b>Share awards</b>						
<b>Balance at beginning of period</b>	<b>143.8</b>	<b>11.27</b>	<b>126.3</b>	<b>11.86</b>	<b>110.5</b>	<b>13.46</b>
Granted	79.8 <sup>1</sup>	6.07	86.4	11.17	69.1	10.61
Settled	(61.1)	11.20	(53.3)	12.44	(47.9)	13.76
Forfeited	(15.1)	10.32	(15.6)	11.52	(5.4)	11.72
<b>Balance at end of period</b>	<b>147.4</b>	<b>8.58</b>	<b>143.8</b>	<b>11.27</b>	<b>126.3</b>	<b>11.86</b>
of which vested	25.9	—	13.1	—	13.5	—
of which unvested	121.5	—	130.7	—	112.8	—

<sup>1</sup> Included an adjustment for share awards granted in the fourth quarter of 2022 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on November 28, 2022. The number of deferred share-based awards held by each individual was increased by 5.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards, thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional shares granted.

## Performance share awards

Performance share awards will no longer be used as a form of deferred compensation award for the 2022 performance year and onwards. In prior years, managing directors and all material risk takers and controllers (employees whose activities are considered to have a potentially material impact on the Group's risk profile) received a portion of their deferred variable compensation in the form of performance share awards. Performance share awards are similar to share awards, except that the full balance of outstanding performance share awards, are subject to performance-based malus provisions.

Outstanding performance share awards granted for prior years are subject to a downward adjustment in the event of a divisional loss by the division in which the employees worked as of December 31, 2022, or a negative ROE of the Group, whichever results in a larger adjustment. For employees in corporate functions and the Asset Resolution Unit, the downward adjustment only applies

in the event of a negative ROE of the Group and is not linked to the performance of the divisions. The basis for the ROE calculation may vary from year to year, depending on the Compensation Committee's determination for the year in which the performance shares are granted. A downward adjustment has been applied to outstanding performance share awards, reflecting the negative Group ROE and full year divisional loss in the Investment Bank for 2022.

## Performance share awards granted for previous years

For compensation year	2022	2021	2020
Performance shares awarded (million)	0.0	19.4	37.8
Value of performance shares awarded (CHF million)	0	161	493

- Included an adjustment for performance share awards granted in the fourth quarter of 2022 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on November 28, 2022. The number of deferred share-based awards held by each individual was increased by 5.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards, thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional performance shares granted.
- Included downward adjustment applied to outstanding performance share awards.

## Strategic Delivery Plan

The Strategic Delivery Plan (SDP) was a one-time share-based award granted in February 2022 to most managing directors and directors to incentivize the longer-term delivery of the Group's strategic plan. SDP awards are subject to service conditions and performance-based metrics over the course of 2022-2024. SDP awards are scheduled to vest on the third anniversary of the grant date, with the exception of awards granted to individuals classified as MRTs, risk manager MRTs or senior managers or equivalents under the requirements of EU Capital Requirements Directive V and UK Investment Firms Prudential Regime. SDP awards granted to MRTs vest in equal annual installments over two years, commencing on the third anniversary from the grant date. SDP awards granted to risk manager MRTs vest in equal annual installments over three years, while SDP awards granted to senior managers vest in equal annual installments over five years, both commencing on the third anniversary from the grant date. Prior to settlement, the principal amount of the SDP awards will be written down to zero and forfeited if any of the following triggering events exist at the end of 2022, 2023 or 2024:

- The Group's reported common equity tier 1 (CET1) capital ratio below the FINMA-prescribed minimum + 50 basis points; or
- The Group's reported CET1 leverage ratio falls below 3.7%.

In addition, the Compensation Committee will review and assess the overall success of the delivery of the strategic plan at a Group level over the three-year period (2022-2024) and may increase the SDP awards up to a maximum of 50% of the initial award amount. Half of the potential uplift would be granted if a predetermined average Group return on tangible equity threshold is achieved, measured over 2023 and 2024. The other half of the uplift may be awarded based on the Compensation Committee's assessment of risk management and other strategic non-financial achievements.

- Included an adjustment for Strategic Delivery Plan awards granted in the fourth quarter of 2022 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on November 28, 2022. The number of deferred share-based awards held by each individual was increased by 5.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards, thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional Strategic Delivery Plan shares granted.

## Contingent Capital Awards

Contingent Capital Awards (CCA) will no longer be used as a form of deferred compensation award for the 2022 performance year and onwards. The Group granted CCA of CHF 75 million and CHF 253 million in 2022 and 2021, respectively, to managing directors and directors as part of the 2021 and 2020 deferred variable compensation and have rights and risks similar to those of certain contingent capital instruments issued by the Group in the market. CCA are scheduled to vest on the third anniversary of the grant date, other than those granted to individuals classified as MRTs, risk manager MRTs or senior managers or equivalents under the requirements of EU Capital Requirements Directive V and UK Investment Firms Prudential Regime. CCA granted to MRTs, risk manager MRTs and

senior managers vest on the fourth, fifth and seventh anniversaries of the grant

date, respectively. CCA awards will be expensed over the vesting period. CCA generally provide a conditional right to receive semi-annual cash payments of interest equivalents until settled, with rates being dependent upon the vesting period and currency of denomination. CCA granted in 2022 and 2021 that vest four, five or seven years from the date of grant are not eligible for semi-annual cash payments of interest equivalents. CCA granted to certain regulated employees that vest over three years are not eligible for semi-annual cash payments of interest equivalents.

- CCA granted in 2022 and 2021 that are denominated in US dollars and vest three years from the date of grant receive interest equivalents at a rate of 4.18% and 3.60% respectively, per annum plus the daily compounded (spread exclusive) US dollar Secured Overnight Financing Rate (SOFR); and
- CCA granted in 2022 and 2021 that are denominated in Swiss francs and vest three years from the date of grant receive interest equivalents at a rate of 3.44% and 3.06% respectively, per annum plus the daily compounded (spread exclusive) Swiss franc Swiss Average Rate Overnight (SARON).

The rates were set in line with market conditions at the time of grant and existing high-trigger and low-trigger contingent capital instruments that the Group has issued.

At settlement, employees will receive either a contingent capital instrument or a cash payment based on the fair value of the CCA. The fair value will be determined by the Group. In the case of a cash settlement, the CCA award will be converted into the local currency of each respective employee.

CCA have loss-absorbing features such that prior to settlement, the principal amount of the CCA would be written down to zero and forfeited if any of the following trigger events were to occur:

- the Group's reported common equity tier 1 (CET1) ratio falls below 7%; or
- FINMA determines that cancellation of the CCA and other similar contingent capital instruments is necessary, or that the Group requires public sector capital support, in either case to prevent it from becoming insolvent or otherwise failing.

#### Cash awards

Cash awards include certain special awards as well as voluntary deferred compensation plans and employee investment plans. For certain special awards, compensation expense was primarily driven by their vesting schedule; for other cash awards, compensation expense was driven by mark to market and performance adjustments, as the majority of the awards are fully vested.

#### Deferred fixed cash awards

The Group granted deferred fixed cash compensation during 2022, 2021 and 2020 of CHF 294 million, CHF 259 million and CHF 120 million, respectively, in the Investment Bank, Wealth Management and Asset Management divisions. This

compensation has been expensed over a three-year vesting period from the grant date. Amortization of this compensation in 2022 totaled CHF 214 million, of which CHF 125 million was related to awards granted in 2022.

#### Upfront cash awards

The Group granted upfront cash awards (UCA) of CHF 799 million and CHF 59 million in 2022 and 2021, respectively. These awards are subject to repayment (clawback) by the employee in the event of voluntary resignation, termination for cause or in connection with other specified events or conditions within three years of the award grant. The amount subject to repayment is reduced in equal monthly installments during the three-year period following the grant date. The expense recognition will occur over the three-year vesting period, subject to service conditions. Amortization of this compensation in 2022 totaled CHF 387 million, of which CHF 355 million was related to awards granted in 2022.

#### Retention awards

The Group granted deferred cash and share retention awards during 2022 of CHF 367 million, mainly in the Investment Bank division. During 2021 and 2020, the Group granted deferred cash and share retention awards of CHF 395 million and CHF 40 million, respectively. These awards are expensed over the applicable vesting period from the grant date. Amortization of these awards in 2022 totaled CHF 174 million, of which CHF 69 million was related to awards granted in 2022.

#### Awards granted for the compensation year 2022

##### Share awards

On February 10, 2023, the Group granted 102.8 million share awards with a total value of CHF 288 million. The estimated unrecognized compensation expense of CHF 262 million was determined based on the fair value of the awards on the grant date, includes the current estimated future forfeitures and will be recognized over the vesting period, subject to early retirement rules. The majority of share awards granted include the right to receive dividend equivalents on vested shares.

The number of share awards granted to employees was generally determined by dividing the deferred component of variable compensation being granted as share awards by the average price of a Group share over the ten consecutive trading days which ended on February 23, 2023. The fair value of each share award was CHF 2.87, the Group share price on the grant date.

#### Share awards granted for previous years

For compensation year	2022	2021	2020
Shares awarded (million)	102.8	27.7	44.6
Value of shares awarded (CHF million)	288	216	592
Fair value of each share awarded (CHF) <sup>1</sup>	2.87	8.61	12.59

<sup>1</sup> Based on the Group's share price on the grant date.

On February 10, 2023, the Group granted 6.1 million blocked shares with a total value of CHF 16 million that vested immediately upon grant, have no future service requirements and were attributed to services performed in 2022.

#### Blocked share awards granted for previous years

For compensation year	2022	2021	2020
Blocked shares awarded (million)	6.1	5.0	2.6
Value of shares awarded (CHF million)	16	41	35

#### Upfront cash awards

In February 2023, certain managing directors and directors were granted CHF 344 million of UCA as part of their 2022 variable compensation.

#### Awards granted in 2023

##### Transformation Awards

In February 2023, the Group granted Transformation Awards, with a total award value of CHF 350 million, to employees identified as being critical to the delivery of the transformation strategy. Of the total award value, CHF 70 million relates to the Executive Board and is subject to approval at the AGM 2023.

For employees other than the Executive Board, the Transformation Award was granted in the form of both a deferred cash award and a deferred share award subject to performance conditions. For Executive Board members, the Transformation Award, subject to shareholder approval, was granted as 100% in the form of a deferred shares.

Transformation Awards are expensed over the service period of the award.

Transformation cash awards vest over two years with one half of the cash awards vesting on each of first and second anniversaries of the grant date (ratable vesting), with the exception of awards granted to individuals classified as MRTs, risk manager MRTs or senior managers or equivalents under the requirements of EU Capital Requirements Directive V and UK Investment Firms Prudential Regime. Transformation Awards granted to MRTs vest over four years with one quarter of the award vesting on each of the four anniversaries of the grant date. Transformation Awards granted to risk manager MRTs vest over five years with one fifth of the award vesting on each of the five anniversaries of the grant date. Transformation Awards granted to senior managers vest over seven years, with one fifth of the award vesting on each of the third to seventh anniversaries of the grant date.

Transformation share-based awards are scheduled to vest if the share price is at CHF 3.82 or higher on December 31, 2025, subject to a cap of three times the initial award grant value. This is applied after taking into account the performance targets, the reported return on tangible equity and cost base for the Group.

##### Other awards

In the first quarter of 2023, the Group granted additional compensation awards to certain employees. Share-based awards of CHF 38 million and deferred fixed cash compensation of CHF 30 million were granted to key employees. These awards will be expensed over a three-year vesting period from the grant date. In addition, Supplemental Cash Allowance Awards of CHF 114 million were granted to certain employees and will be expensed over a nine-month vesting period from the grant date.

---

## 31 Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions, or if another party controls both. The Group's related parties include key management personnel, close family members of key management personnel and entities that are controlled, significantly influenced, or for which significant voting power is held, by key management personnel or their close family members. Key management personnel are those individuals having authority and responsibility for planning, directing and controlling the activities of the Group, that is, members of the Executive Board and the Board of Directors.

### Banking relationships

The Group is a global financial services provider. Many of the members of the Executive Board and the Board of Directors, their close family members or companies associated with them maintain banking relationships with the Group. The Group or any of its banking subsidiaries may from time to time enter into financing and other banking agreements with companies in which current members of the Executive Board or the Board of Directors have a significant influence as defined by the SEC, such as holding executive and/or board level roles in these companies. With the exception of the transactions described below, relationships with members of the Executive Board or the Board of Directors and such companies were in the ordinary course of business and are entered into at prevailing market conditions. Also, unless otherwise noted, all loans to members of the Executive Board, members of the Board of Directors, their close family members or companies associated with them were made in the ordinary course of business, were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and did not involve more than the normal risk of collectability or present other unfavorable features. As of December 31, 2022, 2021 and 2020, there were no loan exposures to such related parties that were not made in the ordinary course of business and at prevailing market conditions.

### CS First Boston

On February 9, 2023, the Group announced that it had taken further important steps to progress the carve-out of CS First Boston as a leading capital markets and advisory business through the acquisition of The Klein Group LLC, the investment banking business as well as the registered broker-dealer of M. Klein & Company LLC (the seller). The Group also announced the appointment of former Board of Directors member Michael Klein as CEO of Banking and regional CEO of Americas, as well as designated CEO of CS First Boston and a member of the Executive Board. Both Michael Klein's appointment to the Executive Board and the acquisition of The Klein Group LLC are subject to regulatory approval. The purchase price is USD 175 million. To align interests with the Group, the seller will receive a convertible

note and a warrant. The note will provide annual payments and convert into, and the warrant entitles the seller to subscribe to, CS First Boston shares at a qualified IPO or other liquidity event, at the then-valuation of CS First Boston, less a customary discount. The principal amount of the convertible note is expected to be USD 100 million, with the balance being paid in cash, dependent on the amount of taxes to be paid by the seller at closing. The net present value of the transaction to the Group is expected to be approximately USD 210 million, which also includes interest cost, annual payments on the note and other payments that may in the future become payable in respect of this transaction. Deutsche Bank AG provided a fairness opinion to the Board of Directors in connection with the acquisition. The transaction is expected to close in the first half of 2023. Following the acquisition's closing, The Klein Group LLC is expected to be fully integrated into CS First Boston. The Group will retain control over the ultimate scope and structure of CS First Boston, including options to attract third-party capital in the future, as announced at the strategy update on October 27, 2022.

In addition, on October 27, 2022, the Group and The Klein Group LLC entered into an engagement letter, under which The Klein Group LLC has been engaged to provide strategic advice and assistance to the Group in connection with the proposed carve-out of CS First Boston, whereby it was agreed that Michael Klein would devote significant time and attention to the services to be provided by The Klein Group LLC to the Group. The purpose of this engagement was to secure Michael Klein's services in relation to the establishment of CS First Boston in the time gap between October 27, 2022 and the effective date of his employment contract as a member of the Executive Board (which is contingent on regulatory approval) and to obtain the support of The Klein Group LLC until closing of the acquisition. The advisory fee under such engagement was USD 10 million.

### Related party loans

#### Executive Board and Board of Directors loans

The majority of loans outstanding to members of the Executive Board and the Board of Directors are mortgages or loans against securities.

All mortgage loans to members of the Executive Board are granted either with variable or fixed interest rates over a certain period. Typically, mortgages are granted for periods of up to ten years. Interest rates applied are based on refinancing costs plus a margin, and interest rates and other terms are consistent with those applicable to other employees. Loans against securities are granted at interest rates and on terms applicable to such loans granted to other employees. The same credit approval and risk assessment procedures apply to members of the Executive Board as for other employees. The highest loan outstanding to an Executive Board member was CHF 4 million to Ulrich Körner as of December 31, 2022.

### Liabilities due to own pension plans

Liabilities due to the Group’s own defined benefit pension plans as of December 31, 2022 and 2021 of CHF 254 million and CHF 331 million, respectively, were reflected in various liability accounts in the Group’s consolidated balance sheets.

The Group sponsors defined contribution pension plans, defined benefit pension plans and other post-retirement defined benefit plans.

### **Defined contribution pension plans**

Defined contribution plans provide each participant with an individual account. The benefits to be provided to a participant are solely based on the contributions made to that employee's account and are affected by income, expenses and gains and losses allocated to the account. As such, there are no stipulations of a defined annuity benefit at retirement and the participants bear the full actuarial as well as investment risk.

The Group contributes to various defined contribution pension plans primarily in Switzerland, the US and the UK as well as other countries throughout the world. During 2022, 2021 and 2020, the Group contributed to these plans and recognized as expense CHF 241 million, CHF 263 million and CHF 299 million, respectively. This includes expenses of CHF 81 million, CHF 100 million and CHF 143 million in 2022, 2021 and 2020, respectively, related to the Swiss defined contribution pension plan which took effect on January 1, 2020. Contributions to the Swiss defined contribution plan are made by employees and the Group. Assets from this plan are paid out as a lump sum on retirement.

### **Defined benefit pension and other post-retirement defined benefit plans**

#### **Defined benefit pension plans**

Defined benefit pension plans are pension plans that define specific benefits for an employee upon that employee's retirement. These benefits are usually determined by taking into account the employee's salary, years of service and age of retirement. Retirees bear neither the actuarial risk (for example, the risk that the retirees of the plan live longer than expected), nor the investment risk (that is, that plan assets invested and associated returns will be insufficient to meet the expected benefits due to low or negative returns on contributions). The Group's funding policy for these plans is in accordance with local laws and tax requirements.

#### **Swiss pension plan**

The Group's most significant defined benefit pension plan, the Credit Suisse Swiss Pension Plan (Swiss pension plan), is located and covers its employees in Switzerland and is set up as a trust domiciled in Zurich. The Swiss pension plan provides benefits in the event of retirement, death and disability and meets or exceeds the minimum benefits required under the Swiss Federal Law on Occupational Retirement, Survivors' and Disability Pension Plans (BVG). Benefits in the Swiss pension plan are determined on the basis of the accumulated employer and employee contributions and accumulated interest credited. The Swiss pension plan is treated as a defined benefit plan under US GAAP, mainly due to a guaranteed minimum return on contributions and guaranteed

payment of lifetime pensions. As of December 31, 2022 and 2021, the Swiss pension plan comprised 62% and 64%, respectively, of all the Group's employees participating in defined benefit plans, 88% and 84%, respectively, of the fair value of plan assets, and 87% and 84%, respectively, of the pension benefit obligation of the Group's defined benefit plans.

Employee contributions in the savings section depend on their age and are determined as a percentage of the pensionable salary. The employees can select between three different levels of contributions which vary between 5% and 14% depending on their age. The Group's contribution varies between 7.5% and 25% of the pensionable salary depending on the employee's age.

The Swiss Federal council sets the minimum statutory interest rate on savings balances on an annual basis that applies to the BVG minimum pensionable salary (1.0% as of January 1, 2023 and 2022). The statutory interest rate on savings balances does not apply to extra mandatory benefits. The Board of Trustees of the Swiss pension fund sets the interest rate to be applied on the accumulated savings balance on an annual basis.

When employees retire, their savings balance is converted into an annuity and the conversion rate is the percentage used to convert the assets accrued in the Swiss pension plan to an annual lifetime retirement pension. The level of the conversion rate depends on the life expectancy of future retirees and on the long-term potential for returns in the capital markets. The Board of Trustees of the Swiss pension plan has the responsibility to set the conversion rates for the plan. Decisions on conversion rates are to be set for a planning horizon of at least eight years.

#### **International pension plans**

Various defined benefit pension plans cover the Group's employees outside Switzerland. These plans provide benefits in the event of retirement, death, disability or termination of employment. Retirement benefits under the international pension plans depend on age, contributions and salary. The Group's principal defined benefit pension plans outside Switzerland are located in the US and in the UK. Both of these plans are funded, closed to new participants and have ceased accruing new benefits. Smaller defined benefit pension plans, both funded and unfunded, are operated in other locations.

#### **Other post-retirement defined benefit plan**

In the US, the Group has a defined benefit plan that provides post-retirement benefits other than pension benefits that primarily focus on health and welfare benefits for certain retired employees. In exchange for the current services provided by the employee, the Group promises to provide health and welfare benefits after the employee retires. The Group's obligation for that compensation is incurred as employees render the services necessary to earn their post-retirement benefits.

## Components of net periodic benefit costs

in	Defined benefit pension plans						Other post-retirement defined benefit plan		
	Switzerland			International			International		
	2022	2021	2020	2022	2021	2020	2022	2021	2020
<b>Net periodic benefit costs (CHF million)</b>									
Service costs on benefit obligation	242	224	203	17	16	15	0	0	0
Interest costs on benefit obligation	41	10	20	59	51	68	3	2	4
Expected return on plan assets	(439)	(421)	(352)	(67)	(65)	(85)	0	0	0
Amortization of recognized prior service cost/(credit)	(88)	(121)	(167)	1	1	1	0	0	0
Amortization of recognized actuarial losses/(gains)	280	355	334	9	14	13	1	1	1
Settlement losses/(gains)	6	10	8	11	8	(1)	0	0	0
Curtailement losses/(gains)	(11)	2	(10)	0	0	0	0	0	0
Special termination benefits	7	16	8	0	0	0	0	0	0
<b>Net periodic benefit costs/(credits)</b>	<b>38</b>	<b>75</b>	<b>44</b>	<b>30</b>	<b>25</b>	<b>11</b>	<b>4</b>	<b>3</b>	<b>5</b>

Service costs on benefit obligation are reflected in compensation and benefits. Other components of net periodic benefit costs are reflected in general and administrative expenses or in restructuring expenses.

### Net periodic benefit costs of defined benefit plans

The net periodic benefit costs for defined benefit pension and other post-retirement defined benefit plans are the costs of the respective plan for a period during which an employee renders services. The actual amount to be recognized is determined using the standard actuarial methodology which considers, among other factors, current service cost, interest cost, expected return on plan assets and the amortization of both prior service costs/(credits) and actuarial losses/(gains) recognized in AOCI.

Service costs on benefit obligation reflected in compensation and benefits – other for 2022, 2021 and 2020 were CHF 259 million, CHF 240 million and CHF 218 million, respectively.

As part of its strategic plan, the Group has launched a number of cost efficiency measures, including headcount reduction. This resulted in curtailment gains of CHF 11 million in 2022, curtailment losses of CHF 2 million in 2021 and curtailment gains of CHF 10 million in 2020. Additional costs of CHF 6 million, CHF 10 million and CHF 8 million in 2022, 2021 and 2020, respectively, related to the settlement of the pension obligation for employees in Switzerland whose employment has effectively been terminated or who have left the Group due to a sale of their business. Special termination benefit costs of CHF 7 million, CHF 16 million and CHF 8 million have been recognized in 2022, 2021 and 2020, respectively, relating to early retirements in Switzerland in the context of the cost efficiency measures.

### Benefit obligation

The benefit obligation is expressed as either accumulated benefit obligation (ABO) or PBO. While the ABO refers to the actuarial present value based on employee services rendered prior to that date and takes into account current and past compensation levels, the PBO also applies an assumption as to future compensation levels.

The “Obligations and funded status of the plans” table shows the changes in the PBO, the ABO, the fair value of plan assets and the amounts recognized in the consolidated balance sheets for the defined benefit pension and other post-retirement defined benefit plans.

US GAAP requires an employer to recognize the funded status of the defined benefit pension and other post-retirement defined benefit plans on the balance sheet. The funded status of these plans is determined as the difference between the fair value of plan assets and the PBO. The funded status may vary from year to year due to changes in the fair value of plan assets and variations of the PBO following changes in the underlying assumptions and membership data used to determine the PBO. In 2022 and 2021, the curtailments, settlements and special termination benefits in Switzerland, which impacted the PBO, related to the headcount reduction in the context of the cost efficiency measures.

1 Including estimated future salary increases.

2 Excluding estimated future salary increases.

The net amount recognized in the consolidated balance sheets as of December 31, 2022 and 2021 for the defined benefit pension plans was an overfunding of CHF 3,965 million and CHF 4,011 million, respectively.

The remeasurement loss on the Swiss pension plan recorded as of December 31, 2022 consisted of losses on the asset portfolio of CHF 2,004 million, partially offset by gains on the PBO of CHF 1,975 million due to changes in financial and demographic assumptions, primarily an increase in the discount rate. The remeasurement gain on the Swiss pension plan recorded as of December 31, 2021 consisted of gains on the asset portfolio of CHF 1,189 million, partially offset by losses on the PBO of CHF 321 million due to changes in financial and demographic

assumptions, primarily an increase in the interest rate on savings balances.

The remeasurement loss on the international pension plans recorded as of December 31, 2022 consisted of losses on the asset portfolio of CHF 1,199 million, partially offset by gains on the PBO of CHF 907 million due to changes in financial and demographic assumptions, primarily an increase in the discount rate and updates on the membership data. The remeasurement loss on the international pension plans recorded as of December 31, 2021 consisted of losses on the asset portfolio of CHF 110 million, partially offset by gains on the PBO of CHF 100 million due to changes in financial and demographic assumptions, primarily an increase in the discount rate and updates on the membership data.

The settlements of CHF 448 million on the international plans recorded as of December 31, 2021 mainly related to settlements in the UK, reflecting an enhanced transfer value exercise, and settlements in the US, reflecting a partial sale of pension obligations sold to a third party insurer.

In 2023, the Group expects to contribute CHF 271 million to the Swiss pension plan, CHF 15 million to the international defined

benefit pension plans and CHF 10 million to other post-retirement defined benefit plans.

#### PBO or ABO in excess of plan assets

The following table shows the aggregate PBO and ABO, as well as the aggregate fair value of plan assets for those plans with PBO in excess of plan assets and those plans with ABO in excess of plan assets as of December 31, 2022 and 2021, respectively.

#### Defined benefit pension plans in which PBO or ABO exceeded plan assets

December 31	International			
	PBO exceeds fair value of plan assets		ABO exceeds fair value of plan assets	
	2022	2021	2022	2021
<b>PBO/ABO exceeded plan assets (CHF million)</b>				
PBO	820	412	157	403
ABO	804	387	142	380
Fair value of plan assets	669	208	6	200

There were no defined benefit pension plans in Switzerland in which the PBO or the ABO exceeded the plan assets.

#### Amounts recognized in AOCI and OCI

The following table shows the actuarial gains/(losses) and the prior service credits/(costs), which were recorded in AOCI and subsequently recognized as components of net periodic benefit costs.

#### Amounts recognized in AOCI, net of tax

end of	Defined benefit pension plans		Other post-retirement defined benefit plan		Total	
	2022	2021	2022	2021	2022	2021
	<b>Amounts recognized in AOCI (CHF million)</b>

## Assumptions

The measurement of both the net periodic benefit costs and the benefit obligation is determined using explicit assumptions, each of which individually represents the best estimate of a particular future event.

### Net periodic benefit cost and benefit obligation assumptions

The assumptions used to determine the benefit obligation as of the measurement date are also used to calculate the net periodic benefit costs for the 12-month period following this date.

The discount rates are determined based on yield curves, constructed from high-quality corporate bonds currently available and observable in the market and are expected to be available during the period to maturity of the pension benefits. In countries where there is no deep market in high-quality corporate bonds with longer durations, the best available market information, including

governmental bond yields and risk premiums, is used to construct the yield curve. Credit Suisse uses the spot rate approach for valuations, whereby individual spot rates on the yield curve are applied to each year's cash flow in measuring the plan's benefit obligation as well as future service costs and interest costs. The assumption pertaining to salary increases is used to calculate the PBO, which is measured using an assumption as to future compensation levels. Credit Suisse estimates the future interest rate on savings balances taking into consideration actions and rates approved by the Board of Trustees of the Swiss pension plan and expected future changes in the interest rate environment. The expected long-term rate of return on plan assets assumption is applied to the market-related value of assets to calculate the expected return on plan assets as a component of the net periodic benefit costs. It is based on long-term expected returns, inflation, interest rates, risk premiums and the pension plan's asset allocation. The estimates take into consideration historical asset category returns.

## Weighted-average assumptions used to determine net periodic benefit costs and benefit obligation

December 31	Defined benefit pension plans						Other post-retirement defined benefit plan

## Mortality tables and life expectancies for major plans

December 31		Life expectancy at age 65 for a male member currently				Life expectancy at age 65 for a female member currently			
		aged 65		aged 45		aged 65		aged 45	
		2022	2021	2022	2021	2022	2021	2022	2021
<b>Life expectancy (years)</b>									
Switzerland	BVG 2020 tables <sup>1</sup>	21.7	21.7	23.4	23.3	23.5	23.4	25.1	25.0
UK	SAPS S3 light tables <sup>2</sup>	23.5	23.5	24.8	24.7	25.1	25.0	26.5	26.4
US	Pri-2012 mortality tables <sup>3</sup>	20.7	20.6	21.9	21.8	22.6	22.5	23.7	23.7

- 1 The BVG 2020 tables were used, which included CMI projections, with a long-term rate of improvement of 1.25% per annum.
- 2 102% of Self-Administered Pension Scheme (SAPS) S3 light tables were used, which included CMI projections, with a long-term rate of improvement of 1.25% per annum.
- 3 The Private retirement plan 2012 (Pri-2012) mortality tables were used, with projections based on the Social Security Administration's intermediate improvement scale.

Mortality assumptions are based on standard mortality tables and standard models and methodologies for projecting future improvements to mortality as developed and published by external independent actuarial societies and actuarial organizations.

Under US GAAP, the assumptions used to value the PBO should always represent the best estimate as of the measurement date. Credit Suisse regularly reviews the actuarial assumptions used to value and measure the defined benefit obligation on a periodic basis as required by US GAAP.

### Health care cost assumptions

The health care cost trend is used to determine the appropriate other post-retirement defined benefit costs. In determining those costs, an annual weighted-average rate is assumed in the cost of covered health care benefits.

The following table provides an overview of the assumed health care cost trend rates.

### Health care cost trend rates

in / end of	2022	2021	2020
<b>Health care cost trend rate (%)</b>			
Annual weighted-average health care cost trend rate <sup>1</sup>	6.3	6.5	7.0

- 1 The annual health care cost trend rate is assumed to decrease gradually to achieve the long-term health care cost trend rate of 4.5% by 2030.

The annual health care cost trend rate used to determine the net periodic defined benefit costs for 2023 is 6.3%.

and corporate financial conditions. Investment risk is measured and monitored on an ongoing basis through periodic asset/liability studies and investment portfolio reviews.

### Plan assets and investment strategy

Plan assets, which are assets that have been segregated and restricted to provide for plan benefits, are measured at their fair value as of the measurement date.

The Swiss defined benefit pension plan employs a total return investment approach, whereby a diversified mix of debt and equity securities, real estate and alternative investments is used to maximize the long-term return of plan assets while incurring a prudent level of risk. The international plans employ asset liability matching strategies, where the portfolios are mostly invested in debt securities with maturity profiles similar to that of the pension plans' expected future cash flows, with the aim of minimizing interest rate and inflation risk. Risk tolerance is established through careful consideration of plan liabilities, plan funded status

As of December 31, 2022 and 2021, the total fair value of Group debt securities included in plan assets of the Group's defined benefit pension plans was CHF 6 million and CHF 5 million, respectively, and the total fair value of Group equity securities and options was CHF 2 million and CHF 3 million, respectively.

### Fair value hierarchy of plan assets

- Refer to "Fair value measurement" in Note 36 – Financial instruments for discussion of the fair value hierarchy.

### Fair value of plan assets

The following tables present the plan assets measured at fair value on a recurring basis as of December 31, 2022 and 2021 for the Group's defined benefit pension plans.

**Plan assets measured at fair value on a recurring basis**

end of	2022					2021				
	Level 1	Level 2	Level 3	Assets measured at net asset value per share	Total	Level 1	Level 2	Level 3	Assets measured at net asset value per share	Total

The Swiss pension fund uses exchange-traded futures and swaps to manage the economic exposure of the portfolio. These futures and swaps decreased the economic exposure to cash and cash equivalents by CHF 223 million and CHF 59 million in 2022 and 2021, respectively, increased the economic exposure to debt securities – corporate bonds by CHF 121 million and CHF 245 million in 2022 and 2021, respectively, increased/(decreased) the economic exposure to equity securities by CHF 21 million and CHF (186) million in 2022 and 2021, respectively, and increased the economic exposure to alternative investments – other by CHF 81 million in 2022.

1 Primarily related to derivative instruments.

## **Qualitative disclosures of valuation techniques used to measure fair value**

### **Cash and cash equivalents**

Cash and cash equivalents includes money market instruments such as bankers' acceptances, certificates of deposit, CP, book claims, treasury bills, other rights and commingled funds. Valuations of money market instruments and commingled funds are generally based on observable inputs.

### **Debt securities**

Debt securities include government and corporate bonds which are generally quoted in active markets or as units in mutual funds. Debt securities for which market prices are not available, are valued based on yields reflecting the perceived risk of the issuer and the maturity of the security, recent disposals in the market or other modeling techniques, which may involve judgment. Units in mutual funds which are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable are measured at fair value using NAV.

### **Equity securities**

Equity securities held include common equity shares, convertible bonds and shares in investment companies and units in mutual funds. The common equity shares are generally traded on public stock exchanges for which quoted prices are regularly available. Convertible bonds are generally valued using observable pricing sources. Shares in investment companies and units in mutual funds, which are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable, are measured at fair value using NAV.

### **Real estate**

Real estate includes direct real estate as well as investments in real estate investment companies, trusts or mutual funds. Direct real estate is initially measured at its transaction price, which is the best estimate of fair value. Thereafter, direct real estate is individually measured at fair value based on a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The

availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. Real estate investment companies, trusts and mutual funds which are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable are measured at fair value using NAV.

### **Alternative investments**

Private equity includes direct investments, investments in partnerships that make private equity and related investments in various portfolio companies and funds and fund of funds partnerships. Private equity consists of both publicly traded securities and private securities. Publicly traded investments that are restricted or that are not quoted in active markets are valued based on publicly available quotes with appropriate adjustments for liquidity or trading restrictions. Private equity is valued taking into account a number of factors, such as the most recent round of financing involving unrelated new investors, earnings multiple analyses using comparable companies or discounted cash flow analyses. Private equity for which a fair value is not readily determinable is measured at fair value using NAV provided by the general partner.

Hedge funds that are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable are measured at fair value using NAV provided by the fund administrator.

### **Derivatives**

Derivatives include both OTC and exchange-traded derivatives. The fair value of OTC derivatives is determined on the basis of inputs that include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity since the required inputs are generally observable in the marketplace. Other more complex derivatives may use unobservable inputs. Such inputs include long-dated volatility assumptions on OTC option transactions and recovery rate assumptions for credit derivative transactions. The fair value of exchange-traded derivatives is typically derived from the observable exchange prices and/or observable inputs.

### Plan asset allocation

The following table shows the plan asset allocation as of the measurement date calculated based on the fair value at that date.

#### Plan asset allocation

December 31	Switzerland		International	
	2022	2021	2022	2021
<b>Weighted-average (%)</b>				
Cash and cash equivalents	1.4	1.6	5.1	2.9
Debt securities	43.4	35.2	89.4	92.9
Equity securities	16.2	27.3	4.5	2.6

### 33 Derivatives and hedging activities

Derivatives are generally either privately negotiated OTC contracts or standard contracts transacted through regulated exchanges. The Group's most frequently used freestanding derivative products, entered into for trading and risk management purposes, include interest rate, credit default and cross-currency swaps, interest rate and foreign exchange options, interest rate and foreign exchange forward contracts and foreign exchange and interest rate futures.

The Group also enters into contracts that are not considered derivatives in their entirety but include embedded derivative features. Such transactions primarily include issued and purchased structured debt instruments where the return may be calculated by reference to an equity security, index or third-party credit risk, or that have non-standard interest or foreign exchange terms.

On the date a derivative contract is entered into, the Group designates it as belonging to one of the following categories:

- trading activities;
- a risk management transaction that does not qualify as a hedge under accounting standards (referred to as an economic hedge);
- a hedge of the fair value of a recognized asset or liability;
- a hedge of the variability of cash flows to be received or paid relating to a recognized asset or liability or a forecasted transaction; or
- a hedge of a net investment in a foreign operation.

#### Trading activities

The Group is active in most of the principal trading markets and transacts in many trading and hedging products. As noted above, this includes the use of swaps, futures, options and structured products, such as custom transactions using combinations of derivatives, in connection with its sales and trading activities. Trading activities include market-making, positioning and arbitrage activities. The majority of the Group's derivatives were used for trading activities.

#### Economic hedges

Economic hedges arise when the Group enters into derivative contracts for its own risk management purposes, but the contracts entered into do not qualify for hedge accounting under US GAAP. These economic hedges include the following types:

- interest rate derivatives to manage net interest rate risk on certain core banking business assets and liabilities;
- foreign exchange derivatives to manage foreign exchange risk on certain core banking business revenue and expense items, as well as on core banking business assets and liabilities;

- credit derivatives to manage credit risk on certain loan portfolios;
- futures to manage risk on equity positions including convertible bonds; and
- equity derivatives to manage equity/index risks on certain structured products.

Derivatives used in economic hedges are included as trading assets or trading liabilities in the consolidated balance sheets.

#### Hedge accounting

##### Fair value hedges

The Group designates fair value hedges as part of an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize fluctuations in earnings that are caused by interest rate volatility. The Group uses derivatives to hedge for changes in fair value as a result of the interest rate risk associated with loans, debt securities held as available-for-sale and long-term debt instruments.

##### Cash flow hedges

The Group hedges the variability in interest cash flows mainly on mortgages, loans and reverse repurchase agreements by using interest rate swaps to convert variable rate assets to fixed rates. Further, the Group uses foreign currency forwards to hedge the foreign currency risk associated with certain forecasted transactions. As of the end of 2022, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was 12 months.

##### Net investment hedges

The Group designates net investment hedges as part of its strategy to hedge selected net investments in foreign operations against adverse movements in foreign exchange rates, typically using forward foreign exchange contracts.

##### Hedge effectiveness assessment

The Group assesses the effectiveness of hedging relationships both prospectively and retrospectively. The prospective assessment is made both at the inception of a hedging relationship and on an ongoing basis, and requires the Group to justify its expectation that the relationship will be highly effective over future periods. The retrospective assessment is also performed on an ongoing basis and requires the Group to determine whether or not the hedging relationship has actually been effective.

## Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and whether the derivative is used for trading purposes or in a qualifying hedging relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

- Refer to “Note 36 – Financial instruments” for further information.

The notional amount, PRV and NRV (trading and hedging) was CHF 14,820.8 billion, CHF 113.7 billion and CHF 112.4 billion, respectively, as of December 31, 2021.

- 1 Relates to derivative contracts that qualify for hedge accounting under US GAAP.
- 2 Prior period has been revised.
- 3 Primarily credit default swaps.
- 4 Primarily precious metals, commodity and energy products.

**Gains or (losses) on fair value hedges**

in	2022	2021	2020
<b>Interest rate products (CHF million)</b>			
Hedged items <sup>1</sup>	5,346	1,673	(1,679)
Derivatives designated as hedging instruments <sup>1</sup>	(5,020)	(1,597)	1,564

The accrued interest on fair value hedges is recorded in net interest income and is excluded from this table.

- 1 Included in net interest income.

## Hedged items in fair value hedges

end of	2022			2021		
	Hedged items		Discontinued hedges <sup>2</sup>	Hedged items		Discontinued hedges <sup>2</sup>
	Carrying amount	Hedging adjustments <sup>1</sup>		Carrying amount	Hedging adjustments <sup>1</sup>	
<b>Assets (CHF billion)</b>						
Investment securities	0.8	(0.1)	0.0	0.8	0.0	0.0
Net loans	29.0	(1.3)	(0.7)	16.6	(0.2)	0.2
<b>Liabilities (CHF billion)</b>						
Long-term debt	77.2	(1.2)	(4.9)	69.4	(0.2)	0.8

1 Relates to the cumulative amount of fair value hedging adjustments included in the carrying amount.

2 Relates to the cumulative amount of fair value hedging adjustments remaining for any hedged items for which hedge accounting has been discontinued.

## Cash flow hedges

in	2022	2021	2020
<b>Interest rate products (CHF million)</b>			
Gains/(losses) recognized in AOCI on derivatives	(474)	(314)	134
Gains/(losses) reclassified from AOCI into interest and dividend income	1,018	7	(70)
<b>Foreign exchange products (CHF million)</b>			
Gains/(losses) recognized in AOCI on derivatives	(56)	(9)	(33)
Trading revenues	0	0	(30)
Total other operating expenses	(60)	34	(2)
Gains/(losses) reclassified from AOCI into income	(60)	34	(32)
Gains/(losses) excluded from the assessment of effectiveness reported in trading revenues <sup>1</sup>	0	0	1

1 Relates to the forward points of a foreign currency forward.

The net loss associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months was CHF 538 million.

## Net investment hedges

in	2022	2021	2020
<b>Foreign exchange products (CHF million)</b>			
Gains/(losses) recognized in the cumulative translation adjustments section of AOCI	(12)	47	458
Gains/(losses) reclassified from the cumulative translation adjustments section of AOCI into other revenues	0	0	10

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

- Refer to “Note 7 – Trading revenues” for gains and losses on trading activities by product type.

## Disclosures relating to contingent credit risk

Certain of the Group’s derivative instruments contain provisions that require the maintenance of contractually specified credit ratings from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreement could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of the contractually specified credit ratings. Such derivative contracts are reflected at close-out costs.

The following table provides the Group’s current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral that could be called by counterparties in the event of a one, two or three-notch downgrade in the contractually specified credit ratings. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

## Contingent credit risk

end of	2022				2021			
	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total
<b>Contingent credit risk (CHF billion)</b>								
Current net exposure	1.2	0.1	0.1	<b>1.4</b>	2.3	0.0	0.3	<b>2.6</b>
Collateral posted	1.0	0.1	–	<b>1.1</b>	1.9	0.0	–	<b>1.9</b>
Impact of a one-notch downgrade event	0.4	0.0	0.1	<b>0.5</b>	0.1	0.0	0.0	<b>0.1</b>
Impact of a two-notch downgrade event	0.5	0.1	0.2	<b>0.8</b>	0.2	0.0	0.0	<b>0.2</b>
Impact of a three-notch downgrade event	0.5	0.1	0.2	<b>0.8</b>	0.7	0.0	0.1	<b>0.8</b>

The impact of a downgrade event reflects the amount of additional collateral required for bilateral counterparties and special purpose entities and the amount of additional termination expenses for accelerated terminations, respectively. Excludes contracts with specified conditions and clauses which, when triggered, would result in a receivable position for the Group.

### Credit derivatives

Credit derivatives are contractual agreements in which the buyer generally pays a fee in exchange for a contingent payment by the seller if there is a credit event on the underlying referenced entity or asset. They are generally privately negotiated OTC contracts, with numerous settlement and payment terms, and most are structured so that they specify the occurrence of an identifiable credit event, which can include bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet obligations when due.

The Group enters into credit derivative contracts in the normal course of business, buying and selling protection to facilitate client transactions and as a market maker. This includes providing structured credit products for its clients to enable them to hedge their credit risk. The referenced instruments of these structured credit products are both investment grade and non-investment grade and could include corporate bonds, sovereign debt, asset-backed securities (ABS) and loans. These instruments can be formed as single items (single-named instruments) or combined on a portfolio basis (multi-named instruments). The Group purchases protection to economically hedge various forms of credit exposure, for example, the economic hedging of loan portfolios or other cash positions. Finally, the Group also takes proprietary positions which can take the form of either purchased or sold protection.

The credit derivatives most commonly transacted by the Group are CDS and credit swaptions. CDSs are contractual agreements in which the buyer of the swap pays an upfront and/or a periodic fee in return for a contingent payment by the seller of the swap following a credit event of the referenced entity or asset. Credit swaptions are options with a specified maturity to buy or sell protection under a CDS on a specific referenced credit event.

In addition, to reduce its credit risk, the Group enters into legally enforceable netting agreements with its derivative counterparties. Collateral on these derivative contracts is usually posted on a net

counterparty basis and cannot be allocated to a particular derivative contract.

- Refer to “Note 28 – Offsetting of financial assets and financial liabilities” for further information on netting.

### Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events. The Group believes that the maximum potential payout is not representative of the actual loss exposure based on historical experience. This amount has not been reduced by the Group’s rights to the underlying assets and the related cash flows. In accordance with most credit derivative contracts, should a credit event (or settlement trigger) occur, the Group is usually liable for the difference between the credit protection sold and the recourse it holds in the value of the underlying assets. The maximum potential amount of future payments has not been reduced for any cash collateral paid to a given counterparty as such payments would be calculated after netting all derivative exposures, including any credit derivatives with that counterparty in accordance with a related master netting agreement. Due to such netting processes, determining the amount of collateral that corresponds to credit derivative exposures only is not possible.

To reflect the quality of the payment risk on credit protection sold, the Group assigns an internally generated rating to those instruments referenced in the contracts. Internal ratings are assigned by experienced credit analysts based on expert judgment that incorporates analysis and evaluation of both quantitative and qualitative factors. The specific factors analyzed, and their relative importance, are dependent on the type of counterparty. The analysis emphasizes a forward-looking approach, concentrating on economic trends and financial fundamentals, and making use of peer analysis, industry comparisons and other quantitative tools. External ratings and market information are also used in the analysis process where available.

## Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold. The maximum potential payout amount of credit protection purchased for each individual identical underlying reference instrument may be greater or lower than the notional amount of protection sold.

The Group also considers estimated recoveries that it would receive if the specified credit event occurred, including both the anticipated value of the underlying referenced asset that would, in most instances, be transferred to the Group and the impact of any purchased protection with an identical reference instrument and product type.

## Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments, and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

The Group purchases its protection from banks and broker dealers, other financial institutions and other counterparties.

## Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

## Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” table. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Total return swaps (TRS) of CHF 5.9 billion and CHF 12.0 billion as of December 31, 2022 and 2021, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

#### 34 Guarantees and commitments

##### Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate the Group to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the

higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group’s current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, derivatives and other guarantees.

##### Guarantees

end of	Maturity less than 1 year	Maturity between 1 to 3 years	Maturity between 3 to 5 years	Maturity greater than 5 years	Total gross amount	Total net amount <sup>1</sup>	Carrying value	Collateral received
<b>2022 (CHF million)</b>

<b>Total guarantees</b>	<b>15,492</b>	<b>6,909</b>	<b>1,620</b>	<b>2,659</b>	<b>26,680</b>	<b>25,563</b>	<b>425</b>	<b>9,408</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

#### 344 Consolidated financial statements – Credit Suisse Group

### **Credit guarantees and similar instruments**

Credit guarantees and similar instruments are contracts that require the Group to make payments should a third party fail to do so under a specified existing credit obligation. The position includes standby letters of credit, commercial and residential mortgage guarantees, credit guarantees to clearing and settlement networks and exchanges and other guarantees associated with VIEs.

Standby letters of credit are made in connection with the corporate lending business and other corporate activities, where the Group provides guarantees to counterparties in the form of standby letters of credit, which represent obligations to make payments to third parties if the counterparties fail to fulfill their obligations under a borrowing arrangement or other contractual obligation.

Commercial and residential mortgage guarantees are made in connection with the Group's commercial mortgage activities in the US, where the Group sells certain commercial and residential mortgages to Fannie Mae and agrees to bear a percentage of the losses triggered by the borrowers failing to perform on the mortgage. The Group also issues guarantees that require it to reimburse Fannie Mae for losses on certain whole loans underlying mortgage-backed securities issued by Fannie Mae, which are triggered by borrowers failing to perform on the underlying mortgages.

The Group also provides guarantees to VIEs and other counter-parties under which it may be required to buy assets from such entities upon the occurrence of certain triggering events such as rating downgrades and/or substantial decreases in the fair value of those assets.

### **Performance guarantees and similar instruments**

Performance guarantees and similar instruments are arrangements that require contingent payments to be made when certain performance-related targets or covenants are not met. Such covenants may include a customer's obligation to deliver certain products and services or to perform under a construction contract. Performance guarantees are frequently executed as part of project finance transactions. The position includes private equity fund guarantees and guarantees related to residential mortgage securitization activities.

For private equity fund guarantees, the Group has provided investors in private equity funds sponsored by a Group entity guarantees on potential obligations of certain general partners to return amounts previously paid as carried interest to those general partners if the performance of the remaining investments declines. To manage its exposure, the Group generally withholds a portion of carried interest distributions to cover any repayment obligations. In addition, pursuant to certain contractual arrangements, the Group is obligated to make cash payments to certain investors in certain private equity funds if specified performance thresholds are not met.

Further, as part of the Group's residential mortgage securitization activities in the US, the Group may guarantee the collection by the servicer and remittance to the securitization trust of prepayment penalties. The Group will have to perform under these guarantees in the event the servicer fails to remit the prepayment penalties.

### **Derivatives**

Derivatives which may also have the characteristics of a guarantee are issued in the ordinary course of business, generally in the form of written put options. Such derivative contracts do not meet the characteristics of a guarantee if they are cash settled and the Group has no basis to conclude it is probable that the counter-parties held, at inception, the underlying instruments related to the derivative contracts. The Group has concluded that these conditions were met for certain active commercial and investment banks and certain other counterparties, and accordingly, the Group has reported such contracts as derivatives only.

The Group manages its exposure to these derivatives by engaging in various hedging strategies to reduce its exposure. For some contracts, such as written interest rate caps or foreign exchange options, the maximum payout is not determinable as interest rates or exchange rates could theoretically rise without limit. For these contracts, notional amounts were disclosed in the table above in order to provide an indication of the underlying exposure. In addition, the Group carries all derivatives at fair value in the consolidated balance sheets and has considered the performance triggers and probabilities of payment when determining those fair values. It is more likely than not that written put options that are in-the-money to the counterparty will be exercised, for which the Group's exposure was limited to the carrying value reflected in the table.

### **Other guarantees**

Other guarantees include bankers' acceptances, residual value guarantees, deposit insurance, contingent considerations in business combinations, the minimum value of an investment in mutual funds or private equity funds and all other guarantees that were not allocated to one of the categories above.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of protected deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guaranteed an amount of up to CHF 6 billion under the regulation applicable until December 31, 2022. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2022 to December 31, 2022 was CHF 0.5 billion. These deposit insurance guarantees were reflected in other guarantees.

On January 1, 2023, a partial revision of the Swiss Federal Law on Banks and Savings Banks (Bank Law) became effective, which included changes to the Swiss deposit insurance guarantee program. Under the revised program, among other changes, the jointly guaranteed amount is now determined as the higher of CHF 6 billion or 1.6% of all protected deposits. The Group's respective share will be approximately CHF 0.6 billion for the period January 1 to June 30, 2023, as per notifications from the administrator of the Swiss deposit insurance program to the Group's Swiss bank subsidiaries. With a transition period until November 30, 2023, banks will have to provide half of the maximum payment obligation as collateral to the administrator of the Swiss deposit insurance program, while the other half will remain subject to the bank's liquidity requirements and will be reflected in other guarantees. Collateral will have to be provided to the Swiss National Bank (SNB) or the SIX Swiss Exchange in the form of high quality liquid securities or Swiss franc cash deposits or to the administrator of the Swiss deposit insurance program in the form of a loan.

#### **Representations and warranties on residential mortgage loans sold**

In connection with the Investment Bank division's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to institutional investors, primarily banks, and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims made within the statute of limitations (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in this Guarantees and commitments disclosure but are addressed in litigation and related loss contingencies and provisions. The Group is involved in litigation relating to representations and warranties on residential mortgages sold.

- Refer to "Note 40 – Litigation" for further information.

#### **Disposal-related contingencies and other indemnifications**

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees are not reflected in the "Guarantees" table and are discussed below.

#### **Disposal-related contingencies**

In connection with the sale of assets or businesses, the Group sometimes provides the acquirer with certain indemnification provisions. These indemnification provisions vary by counter-party in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. The Group closely monitors all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in the Group's consolidated financial statements.

#### **Other indemnifications**

The Group provides indemnifications to certain counterparties in connection with its normal operating activities for which it is not possible to estimate the maximum amount that it could be obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obligation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses and may, as a result of its membership arrangements, be required to perform if another member defaults and available amounts as defined in the relevant exchange's or clearing house's default waterfalls are not sufficient to cover losses of another member's default. The exchange's or clearing house's default management procedures may provide for cash calls to non-defaulting members which may be limited to the amount (or a multiple of the amount) of the Group's contribution to the guarantee fund. However, if these cash calls are not sufficient to cover losses, the default waterfall and default management procedures may foresee further loss allocation. Furthermore, some clearing house arrangements require members to assume a proportionate share of non-default losses, if such losses exceed the specified resources allocated for such purpose by the clearing house. Non-default losses result from the clearing house's investment of guarantee fund contributions and initial margin or are other losses unrelated to the default of a clearing member. The Group has determined that it is not possible to reasonably estimate the maximum potential amount of future payments due under the membership arrangements. In addition, the Group believes that any potential requirement to make payments under these membership arrangements is remote.

#### Other commitments

##### Irrevocable commitments under documentary credits

Irrevocable commitments under documentary credits include exposures from trade finance related to commercial letters of credit under which the Group guarantees payments to exporters against presentation of shipping and other documents.

#### Irrevocable loan commitments

Irrevocable loan commitments are irrevocable credit facilities extended to clients and include fully or partially undrawn commitments that are legally binding and cannot be unconditionally cancelled by the Group. Commitments to originate mortgage loans that will be held for sale are considered derivatives for accounting purposes and are not included in this disclosure. Such commitments are reflected as derivatives in the consolidated balance sheets.

#### Forward reverse repurchase agreements

Forward reverse repurchase agreements represent transactions in which the initial cash exchange of the reverse repurchase transactions takes place on specified future dates. The Group enters into forward reverse repurchase agreements with counterparties that may have existing funded reverse repurchase agreements. Depending on the details of the counterparty contract with Credit Suisse, both a counterparty's existing funded reverse repurchase agreement and any forward reverse repurchase agreements under contract with the same counterparty are considered.

#### Other commitments

Other commitments include contracts that require the Group to make payments should a third party fail to do so under a specified future credit obligation, such as commitments arising from deferred payment letters of credit, e.g., with re-insurance clients. Other commitments also include private equity commitments, firm commitments in underwriting securities as well as commitments from acceptances in circulation and liabilities for call and put options on shares and other equity instruments.

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Irrevocable loan commitments did not include a total gross amount of CHF 129,165 million and CHF 143,992 million of unused credit limits as of the end of 2022 and 2021 respectively, which were revocable at the Group's sole discretion upon notice to the client.

---

## 35 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and for Group tax or regulatory purposes.

### Transfers of financial assets

#### Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, CP and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS) and ABS that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs. Third-party guarantees may further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated

in order to re-securitize an existing security to give the investor an investment with different risk ratings or characteristics.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include managed collateralized loan obligations (CLOs), CLOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CLOs are collateralized by loans transferred to the CLO vehicle and pay a return based on the returns on the loans. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures, investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and loans involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale. Since the Group generally accounts for assets pending transfer, i.e., prior to securitization, at fair value, the Group does not typically recognize significant gains or losses upon the transfer of assets.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2022, 2021 and 2020

## 348 Consolidated financial statements – Credit Suisse Group

securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

## Securitizations

in	2022	2021	2020
<b>Gains/(losses) and cash flows (CHF million)</b>			
<b>CMBS</b>			
Net gain/(loss) <sup>1</sup>	6	(7)	85
Proceeds from transfer of assets <sup>2</sup>	3,401	3,525	9,209
Cash received on interests that continue to be held	49	42	52
<b>RMBS</b>			
Net gain/(loss) <sup>1</sup>	(2)	70	32
Proceeds from transfer of assets <sup>3</sup>	7,534	37,048	23,358
Purchases of previously transferred financial assets or its underlying collateral	0	(1,604)	0
Servicing fees	24	2	2
Cash received on interests that continue to be held	675	1,088	864
<b>Other asset-backed financings</b>			
Net gain <sup>1</sup>	16	65	105
Proceeds from transfer of assets <sup>4</sup>	6,740	12,129	9,564
Purchases of previously transferred financial assets or its underlying collateral	(1,479)	(1,323)	(1,606)
Fees <sup>5</sup>	192	165	148
Cash received on interests that continue to be held	153	14	17

- Includes primarily underwriting revenues, deferred origination fees and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization.
- Included the receipt of non-cash beneficial interests (including risk retention securities) of CHF 512 million, CHF 180 million and CHF 161 million in 2022, 2021 and 2020, respectively.
- Included the receipt of non-cash beneficial interests (including risk retention securities) of CHF 1,081 million, CHF 3,072 million and CHF 3,030 million in 2022, 2021 and 2020, respectively.
- Included the receipt of non-cash beneficial interests (including risk retention securities) of CHF 168 million, CHF 54 million and CHF 9 million in 2022, 2021 and 2020, respectively.
- Represents primarily management fees and performance fees earned for investment management services provided to managed CLOs.

## Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE, which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets. Beneficial interests, which are valued at fair value, include rights to receive all or portions of specified cash inflows received by an SPE, including, but not limited to, senior and subordinated shares of interest, principal, or other cash inflows to be “passed through” or

The Group’s exposure resulting from continuing involvement in transferred financial assets is generally limited to beneficial interests typically held by the Group in the form of instruments issued by SPEs that are senior, subordinated or residual tranches. These instruments are held by the Group typically in connection with its underwriting and market-making activities, primarily reflecting risk retention requirements applicable to certain securitization activities, and are included in trading assets in the consolidated balance sheets. Any changes in the fair value of these beneficial interests are recognized in the consolidated statements of operations.

Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as collateral accounts, or from liquidity facilities, such as lines of credit or liquidity put option of asset purchase agreements. The SPE may also enter into a derivative contract in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors, or to limit or change the credit risk of the SPE. The Group may be the provider of certain credit enhancements as well as the counterparty to any related derivative contract.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to SPEs and the total assets of the SPEs as of December 31, 2022 and 2021, regardless of when the transfer of assets occurred.

## Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	2022	2021
<b>CHF million</b>		
<b>CMBS</b>		
Principal amount outstanding	17,193	15,428
Total assets of SPEs	24,625	23,205
<b>RMBS</b>		
Principal amount outstanding	41,552	56,990
Total assets of SPEs	41,552	56,990
<b>Other asset-backed financings</b>		
Principal amount outstanding	21,939	24,856
Total assets of SPEs	54,609	57,797

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

## Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

“paid through”, premiums due to guarantors, CP obligations, and residual interests, whether in the form of debt or equity.

## Key economic assumptions at the time of transfer

- Refer to “Fair value measurement” in Note 36 – Financial instruments for further information on the fair value hierarchy.

## Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in	2022		2021		2020	
	CMBS	RMBS	CMBS	RMBS	CMBS	RMBS
<b>CHF million, except where indicated</b>						
Fair value of beneficial interests	486	847	196	2,594	342	2,692
of which level 2	415	762	170	2,126	305	2,398
of which level 3	71	85	26	468	37	294
Weighted-average life, in years	4.1	9.5	5.2	5.3	6.4	3.8
Prepayment speed assumption (rate per annum), in % <sup>1</sup>	— <sup>2</sup>	5.0–22.2	— <sup>2</sup>	3.0–37.7	— <sup>2</sup>	1.0–47.0
Cash flow discount rate (rate per annum), in % <sup>3</sup>	3.5–15.7	2.8–53.8	1.8–5.0	1.0–33.4	1.4–20.9	0.2–40.8
Expected credit losses (rate per annum), in % <sup>4</sup>	2.7–5.6	1.3–49.8	0.9–4.3	0.1–32.5	1.9–8.6	1.6–22.9

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

- Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.
- To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.
- The rate is based on the weighted-average yield on the beneficial interests.
- The range of expected credit losses only reflects instruments with an expected credit loss greater than zero unless all of the instruments have an expected credit loss of zero.

## Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of December 31, 2022 and 2021.

## Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

end of	2022			2021		
	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>
<b>CHF million, except where indicated</b>						
Fair value of beneficial interests	517	1,050	519	281	2,310	402
of which non-investment grade	111	137	34	55	370	27
Weighted-average life, in years	2.8	9.0	5.1	3.9	4.7	5.5
Prepayment speed assumption (rate per annum), in % <sup>3</sup>	—	2.4–21.4	—	—	5.1–41.9	—
Impact on fair value from 10% adverse change	—	(16.5)	—	—	(31.1)	—
Impact on fair value from 20% adverse change	—	(32.7)	—	—	(59.8)	—
Cash flow discount rate (rate per annum), in % <sup>4</sup>	5.4–42.1	4.4–29.6	4.1–41.9	1.7–50.7	0.7–35.5	0.3–14.7
Impact on fair value from 10% adverse change	(8.2)	(41.6)	(10.5)	(3.5)	(38.1)	(4.9)
Impact on fair value from 20% adverse change	(16.1)	(79.6)	(20.5)	(6.8)	(73.3)	(9.7)
Expected credit losses (rate per annum), in % <sup>5</sup>	1.1–29.2	1.5–25.5	0.5–37.9	0.6–8.4	0.4–34.2	0.7–13.3
Impact on fair value from 10% adverse change	(4.6)	(19.7)	(5.7)	(2.5)	(28.5)	(4.3)
Impact on fair value from 20% adverse change	(9.1)	(38.2)	(11.1)	(4.9)	(54.8)	(8.4)

- To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.
- CDOs and CLOs within this category are generally structured to be protected from prepayment risk.

- 3 PSA is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the CPR assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.
- 4 The rate is based on the weighted-average yield on the beneficial interests.
- 5 The range of expected credit losses only reflects instruments with an expected credit loss greater than zero unless all of the instruments have an expected credit loss of zero.

**350 Consolidated financial statements – Credit Suisse Group**

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

#### Transfers of financial assets where sale treatment was not achieved

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of December 31, 2022 and 2021.

- Refer to “Note 37 – Assets pledged and collateral” for further information.

#### Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

end of	2022	2021
<b>CHF million</b>		
<b>RMBS</b>		
Other assets	0	257
Liability to SPEs, included in other liabilities	0	(257)
<b>Other asset-backed financings</b>		
Trading assets	366	557
Other assets	154	200
Liability to SPEs, included in other liabilities	(520)	(757)

#### Securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings

For securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings, US GAAP requires the disclosure of the collateral pledged and the associated risks to which a transferor continues to be exposed after the transfer. This provides an understanding of the nature and risks of short-term collateralized financing obtained through these types of transactions.

Securities sold under repurchase agreements and securities lending transactions represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activities. These transactions are collateralized principally by government debt securities, corporate debt securities, asset-backed securities, equity securities and other collateral and have terms ranging from on demand to a longer period of time.

In the event of the Group’s default or a decline in fair value of collateral pledged, the repurchase agreement provides the counter-party with the right to liquidate the collateral held or request additional collateral. Similarly, in the event of the Group’s default, the securities lending transaction provides the counterparty the right to liquidate the securities borrowed.

The following tables provide the gross obligation relating to securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral by the class of collateral pledged and by remaining contractual maturity as of December 31, 2022 and 2021.

#### Securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral – by class of collateral pledged

end of	2022	2021

**Variable interest entities**

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: collateralized debt obligations (CDOs)/CLOs, CP conduits and financial intermediation. VIEs are SPEs that typically either lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. VIEs may be sponsored by the Group or third parties. Such entities are required to be assessed for consolidation, compelling the primary beneficiary to consolidate the VIE. The consolidation assessment requires an entity to determine whether it has the power to direct the activities that most significantly affect the economics of the VIE as well as whether the reporting entity has potentially significant benefits or losses in the VIE. The primary beneficiary assessment must be re-evaluated on an ongoing basis.

Application of the requirements for consolidation of VIEs may require the exercise of significant judgment. In the event consolidation of a VIE is required, the exposure to the Group is limited to that portion of the VIE’s assets attributable to any variable interest held by the Group prior to any risk management activities to hedge the Group’s net exposure. Any interests held in the VIE by third parties, even though consolidated by the Group, will not typically impact its results of operations.

Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investing opportunities, and, as part of these activities, the Group may hold interests in the VIEs.

Securitization-related transactions with VIEs involve selling or purchasing assets as well as possibly entering into related derivatives with those VIEs, providing liquidity, credit or other support. Other transactions with VIEs include derivative transactions in the Group’s capacity as the prime broker. The Group also enters into lending arrangements with VIEs for the purpose of financing projects or the acquisition of assets. Typically, the VIE’s assets are restricted in nature in that they are held primarily to satisfy the obligations of the entity. Further, the Group is involved with VIEs which were formed for the purpose of offering alternative investment solutions to clients. Such VIEs relate primarily to private equity investments, fund-linked vehicles or funds of funds, where the Group acts as structurer, manager, distributor, broker, market maker or liquidity provider.

As a consequence of these activities, the Group holds variable interests in VIEs. Such variable interests consist of financial instruments issued by VIEs and which are held by the Group, certain derivatives with VIEs or loans to VIEs. Guarantees issued by the Group to or on behalf of VIEs may also qualify as variable interests. For such guarantees, including derivatives that act as guarantees, the notional amount of the respective guarantees is presented to represent the exposure. In general, investors in consolidated VIEs do not have recourse to the Group in the event of a default, except where a guarantee was provided to the investors or where the Group is the counterparty to a derivative transaction involving VIEs.

Total assets of consolidated and non-consolidated VIEs for which the Group has involvement represent the total assets of the VIEs even though the Group’s involvement may be significantly less due to interests held by third-party investors. The asset balances for non-consolidated VIEs where the Group has significant involvement represent the most current information available to the Group regarding the remaining principal balance of assets owned. In most cases, the asset balances represent an amortized cost basis without regards to impairments in fair value, unless fair value information is readily available.

The Group's maximum exposure to loss is different from the carrying value of the assets of the VIE. This maximum exposure to loss consists of the carrying value of the Group variable interests held as trading assets, derivatives and loans, the notional amount of guarantees and off-balance sheet commitments to VIEs, rather than the amount of total assets of the VIEs. The maximum exposure to loss does not reflect the Group's risk management activities, including effects from financial instruments that the Group may utilize to economically hedge the risks inherent in these VIEs. The economic risks associated with VIE exposures held by the Group, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

The Group has not provided financial or other support to consolidated or non-consolidated VIEs that it was not contractually required to provide.

### **Collateralized debt and loan obligations**

The Group engages in CDO/CLO transactions to meet client and investor needs, earn fees and sell financial assets and, for CLOs, loans. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction. As part of its structured finance business, the Group purchases loans and other debt obligations from and on behalf of clients for the purpose of securitization. The loans and other debt obligations are sold to VIEs, which in turn issue CDO/ CLOs to fund the purchase of assets such as investment grade and high yield corporate debt instruments.

Typically, the collateral manager in a managed CDO/CLO is deemed to be the entity that has the power to direct the activities that most affect the economics of the entity. In a static CDO/ CLO this "power" role is more difficult to analyze and may be the sponsor of the entity or the CDS counterparty.

CDO/CLOs provide credit risk exposure to a portfolio of ABS or loans (cash CDO/CLOs) or a reference portfolio of securities or loans (synthetic CDO/CLOs). Cash CDO/CLO transactions hold actual securities or loans whereas synthetic CDO/CLO transactions use CDS to exchange the underlying credit risk instead of using cash assets. The Group may also act as a derivative counterparty to the VIEs, which are typically not variable interests, and may invest in portions of the notes or equity issued by the VIEs. The CDO/CLO entities may have actively managed portfolios or static portfolios.

The securities issued by these VIEs are payable solely from the cash flows of the related collateral, and third-party creditors of these VIEs do not have recourse to the Group in the event of default.

The Group's exposure in CDO/CLO transactions is typically limited to interests retained in connection with its underwriting or market-making activities. Unless the Group has been deemed to have "power" over the entity and these interests are potentially significant, the Group is not the primary beneficiary of the vehicle

and does not consolidate the entity. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

### **Commercial paper conduit**

The Group acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine Securitization Ltd (Alpine), a multi-seller asset-backed CP conduit used for client and Group financing purposes. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings on its CP. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. In addition to CP, Alpine may also issue term notes with maturities up to 30 months. The Group (including Alpine) can enter into liquidity facilities with third-party entities pursuant to which it may be required to purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of Alpine's outstanding CP was approximately 249 days as of December 31, 2022, Alpine's CP had exposures mainly in reverse repurchase agreements with a Group entity, solar loans and leases, consumer loans and car loans and leases.

The Group's financial commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Group to provide short-term financing to the CP conduit or to purchase assets from the CP conduit in certain circumstances, including, but not limited to, a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or a default of an underlying asset. In such circumstances, the Group may be viewed as the primary beneficiary of specified assets referenced under liquidity agreements, resulting in consolidation of specified assets, which are included as part of the consolidated VIEs table. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Group enters into liquidity facilities with CP conduits administrated and sponsored by third parties. These third-party CP conduits are considered to be VIEs for accounting purposes. The Group is not the primary beneficiary and generally does not consolidate these third-party CP conduits. The Group's financial

commitment to these third-party CP conduits consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Group to provide short-term financing to the third-party CP conduits or to purchase assets from these CP conduits in certain circumstances, including, but not limited to, a lack of liquidity in the CP market such that the CP conduits cannot refinance their obligations or a default of an underlying asset. As of December 31, 2022, certain liquidity facilities with third-party CP conduits referenced groups of specified assets and liabilities within a VIE for which the Group is the primary beneficiary which required consolidation. The asset-specific credit enhancements, if any, provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit. In some situations, the Group can enter into liquidity facilities with these third-party CP conduits through Alpine.

The Group's economic risks associated with the Alpine CP conduit and the third-party CP conduits are included in the Group's risk management framework including counterparty, economic risk capital and scenario analysis.

### **Financial intermediation**

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, including, but not limited to, economic hedging strategies and collateral arrangements. The Group's economic risks associated with consolidated and non-consolidated VIE exposures arising from financial intermediation, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

Financial intermediation consists of securitizations, funds, loans, and other vehicles.

### **Securitizations**

Securitizations are primarily CMBS, RMBS and ABS vehicles. The Group acts as an underwriter, market maker, liquidity provider, derivative counterparty and/or provider of credit enhancements to VIEs related to certain securitization transactions.

The maximum exposure to loss is the carrying value of the loan securities and derivative positions that are variable interests, if any, plus the exposure arising from any credit enhancements the Group provided. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

The activities that have the most significant impact on the securitization vehicle are the decisions relating to defaulted loans, which

are controlled by the servicer. The party that controls the servicing has the ability to make decisions that significantly affect the result of the activities of the securitization vehicle. If a securitization vehicle has multiple parties that control servicing over specific assets, the Group determines it has power when it has control over the servicing of greater than 50% of the assets in the securitization vehicle. When a servicer or its related party also has an economic interest that has the potential to absorb a significant portion of the gains and/or losses, it will be deemed the primary beneficiary and consolidate the vehicle. If the Group determines that it controls the relevant servicing, it then determines if it has the obligation to absorb losses from, or the right to receive benefits of, the securitization vehicle that could potentially be significant to the vehicle, primarily by evaluating the amount and nature of securities issued by the vehicle that it holds. Factors considered in this analysis include the level of subordination of the securities held as well as the size of the position, based on the percentage of the class of securities and the total deal classes of securities issued. The more subordinated the level of securities held, the more likely it is that the Group will be the primary beneficiary. This consolidation analysis is performed each reporting period based on changes in inventory and the levels of assets remaining in the securitization. The Group typically consolidates securitization vehicles when it is the servicer and has holdings stemming from its role as underwriter. Short-term market-making holdings in vehicles are not typically considered to be potentially significant for the purposes of this assessment.

In the case of re-securitizations of previously issued RMBS securities, the re-securitization vehicles are passive in nature and do not have any significant ongoing activities that require management, and decisions relating to the design of the securitization transaction at its inception are the key power relating to the vehicle. Activities at inception include selecting the assets and determining the capital structure. The power over a re-securitization vehicle is typically shared between the Group and the investor(s) involved in the design and creation of the vehicle. The Group concludes that it is the primary beneficiary of a re-securitization vehicle when it owns substantially all of the bonds issued from the vehicle.

### **Funds**

Funds include investment structures such as mutual funds, funds of funds, private equity funds and fund-linked products where the investors' interest is typically in the form of debt rather than equity, thereby making them VIEs. The Group may have various relationships with such VIEs in the form of structurer, investment advisor, investment manager, administrator, custodian, underwriter, placement agent, market maker and/or as prime broker. These activities include the use of VIEs in structuring fund-linked products, hedge funds of funds or private equity investments to provide clients with investment opportunities in alternative investments. In such transactions, a VIE holds underlying investments and issues securities that provide the investors with a return based on the performance of those investments.

The maximum exposure to loss consists of the fair value of instruments issued by such structures that are held by the Group as a result of underwriting or market-making activities, financing provided to the vehicles and the Group's exposure resulting from principal protection and redemptions features. The investors typically retain the risk of loss on such transactions, but for certain fund types, the Group may provide principal protection on the securities to limit the investors' exposure to downside market risk. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risk of the VIEs.

Another model is used to assess funds for consolidation under US GAAP. Rather than the consolidation model which incorporates power and the potential to absorb significant risk and rewards, a previous consolidation model is used which results in the Group being the primary beneficiary and consolidating the funds if it holds more than 50% of their outstanding issuances.

### **Loans**

The Group provides loans to financing vehicles owned or sponsored by clients or third-parties. These tailored lending arrangements are established to purchase, lease or otherwise finance and manage clients' assets and include financing of specified client assets, of an individual single-asset used by the client or business ventures. The respective owner of the assets or manager of the businesses provides the equity in the vehicle.

The maximum exposure to loss is the carrying value of the Group's loan exposure, which is subject to the same credit risk management procedures as loans issued directly to clients. The clients' creditworthiness is carefully reviewed, loan-to-value ratios are strictly set and, in addition, clients provide equity, additional collateral or guarantees, all of which significantly reduce the Group's exposure. The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of

the Group's risk mitigation efforts, which includes over-collateralization and effective monitoring to ensure that a sufficient loan-to-value ratio is maintained.

The third-party sponsor of the VIE will typically have control over the assets during the life of the structure and have the potential to absorb significant gains and losses; the Group is typically not the primary beneficiary of these structures and will not have to consolidate them. However, a change in the structure, such as a default of the sponsor, may result in the Group gaining control over the assets. If the Group's lending is significant, it may then be required to consolidate the entity.

### **Other**

Other includes additional vehicles where the Group provides financing and trust preferred issuance vehicles. Trust preferred issuance vehicles are utilized to assist the Group in raising capital-efficient financing. The VIE issues preference shares which are guaranteed by the Group and uses the proceeds to purchase the debt of the Group. The Group's guarantee of its own debt is not considered a variable interest and, as it has no holdings in these vehicles, the Group has no maximum exposure to loss. Non-consolidated VIEs include only the total assets of trust preferred issuance vehicles, as the Group has no variable interests with these entities.

### **Consolidated VIEs**

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it is the primary beneficiary.

The consolidated VIEs table provides the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of December 31, 2022 and 2021.

## Non-consolidated VIEs

The non-consolidated VIEs table provides the carrying amounts and classification of the assets of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Total variable interest assets for which the company has involvement represent the carrying value of the variable interests in non-consolidated VIEs that are recorded in the consolidated balance sheet of the Group (for example, direct holdings in investment funds, loans and other receivables).

Maximum exposure to loss represents the carrying value of total variable interest assets in non-consolidated VIEs of the Group and the notional amounts of guarantees and off-balance sheet commitments which are variable interests that have been extended to non-consolidated VIEs. Such amounts, particularly notional amounts of derivatives, guarantees and off-balance sheet commitments, do not represent the anticipated losses in connection with these transactions as they do not take into

consideration the effect of collateral, recoveries or the probability of loss. In addition, they exclude the effect of offsetting financial instruments that are held to mitigate these risks and have not been reduced by unrealized losses previously recorded by the Group in connection with guarantees, off-balance sheet commitments or derivatives.

Total assets of non-consolidated VIEs are the assets of the non-consolidated VIEs themselves and are typically unrelated to the exposures the Group has with these entities due to variable interests held by third-party investors. Accordingly, these amounts are not considered for risk management purposes.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory, certain repurchase financings to funds and single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and/or guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

---

## 36 Financial instruments

The disclosure of the Group's financial instruments includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, level 3 reconciliation; transfers in and out of level 3; qualitative and quantitative disclosures of valuation techniques; qualitative discussion of the range of significant unobservable inputs; and investment funds measured at net asset value per share);
- Fair value option; and
- Financial instruments not carried at fair value.

### Concentration of credit risk

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

The Group has in place a credit risk appetite framework which provides for the oversight and control of concentrations of credit exposures by single name, product, industry, and country. The Group Credit Portfolio Management function under the Global Chief Credit Officer is responsible for monitoring the portfolio and assessing compliance with the framework and the portfolio limits and controls in place. Credit risk concentrations are identified and measured using a range of quantitative tools and metrics and are reported to the Credit Risk Appetite Committee on a monthly basis. The Group Credit Portfolio Management function performs portfolio reviews and detailed analyses of selected segments of the portfolio which are presented to the Credit Risk Appetite Committee and to other governance forums, including the Executive Board Risk Management Committee and the Board's Risk Committee, where appropriate.

From an industry point of view, the combined credit exposure of the Group is diversified. A substantial portion of the credit exposure is with individual clients, particularly through residential mortgages in Switzerland, corporate credit exposures and lombard lending arrangements, or relates to derivative and other financial transactions with financial institutions. In both cases, the customer base is extensive and the number and variety of transactions are broad. For transactions with financial institutions and corporations, the business is also geographically diverse, with operations focused in the Americas, Europe and, to a lesser extent, Asia Pacific.

### Fair value measurement

A significant portion of the Group's financial instruments is carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain short-term borrowings, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivatives and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have significant unobservable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including interest rate, foreign exchange, equity and credit derivatives, certain corporate equity-linked securities, mortgage-related securities, private equity investments and certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments. The fair value measurement disclosures exclude derivative transactions that are daily settled.

The fair value of financial instruments is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as credit valuation adjustments) is considered when measuring the fair value of assets, and the impact of changes in the Group's own credit spreads (known as debit valuation adjustments) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

US GAAP permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default.

Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

### Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Significant unobservable inputs for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

The Group records net open positions at bid prices if long, or at ask prices if short, unless the Group is a market maker in such positions, in which case mid-pricing is utilized. Fair value measurements are not adjusted for transaction costs.

## Qualitative disclosures of valuation techniques

### Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Control functions such as Product Control and Risk Management review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office and control functions such as Product Control and Risk Management to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The valuation results are aggregated for reporting to the Valuation Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever possible, observable market data which may include executed transactions, dealer quotes or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

In general, Product Control utilizes independent pricing service data as part of its review process. Independent pricing service

data is analyzed to ensure that it is representative of fair value, including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates or other inputs. In addition, there may be uncertainty about a valuation resulting from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments and the section “Uncertainty of fair value measurements at the reporting date from the use of significant unobservable inputs” should be read in conjunction with the tables “Assets and liabilities measured at fair value on a recurring basis”, “Quantitative information about level 3 assets measured at fair value on a recurring basis” and “Quantitative information about level 3 liabilities measured at fair value on a recurring basis”.

#### **Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions**

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements included are classified as level 3 in the fair value hierarchy. The significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over-collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

#### **Debt securities**

##### **Foreign governments**

Foreign government debt securities typically have quoted prices in active markets and are mainly categorized as level 1 instruments. Valuations of foreign government debt securities for which market prices are not available are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

##### **Corporates**

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity’s capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include correlation and price. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

##### **RMBS, CMBS and CDO securities**

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs credit spread, default rate, discount rate, prepayment rate and loss severity. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

### **Equity securities**

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple and market comparable price.

### **Derivatives**

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar OTC derivatives with observable inputs to valuation and are included in level 2 of the fair value hierarchy. If the significant inputs used to determine the fair value of the similar OTC derivative are not observable, the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the

majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

The valuation of derivatives includes an adjustment for the cost of funding uncollateralized OTC derivatives.

### **Interest rate derivatives**

OTC vanilla interest rate products, such as interest rate swaps, swaptions and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to basis spread, correlation, credit spread, prepayment rate and volatility skew.

### **Foreign exchange derivatives**

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to, contingent probability, correlation and prepayment rate.

### **Equity and index-related derivatives**

Equity derivatives include a variety of products ranging from vanilla options and swaps to exotic structures with bespoke payoff profiles. The main inputs in the valuation of equity derivatives may include buyback probability, correlation, gap risk, price and volatility.

Generally, the interrelationship between the correlation and volatility is positively correlated.

### **Credit derivatives**

Credit derivatives include index, single-name and multi-name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring inputs such as correlation, credit spread, funding spread, loss severity, prepayment rate and recovery rate. These inputs are generally implied from available market observable data.

### **Other trading assets**

Other trading assets primarily include life settlement and premium finance instruments and RMBS loans. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair

value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

#### **Other investments**

##### **Private equity funds, hedge funds and equity method investment funds**

Equity method investment funds principally include equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published NAVs as permitted by ASC Topic 820 – Fair Value Measurement. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not in line with the fund's observable market data, it is probable that the investment will be sold for an amount other than NAV or other circumstances exist that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs. The investments for which the fair value is measured using the NAV practical expedient are not categorized within the fair value hierarchy.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments.

Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

#### **Life finance instruments**

Life finance instruments include single premium immediate annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

#### **Loans**

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a loan pricing model, which requires estimates of significant inputs including credit conversion factors, credit spreads, recovery rates and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available. The fair value of the consolidated

financial assets of RMBS and CMBS securitization vehicles, which qualify as collateralized financing entities, are measured on the basis of the more observable fair value of the VIEs' financial liabilities.

#### **Short-term borrowings and long-term debt**

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifur-catable and non-bifurcatable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed

above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for short-term borrowings and long-term debt include buyback probability, correlation, credit spread, gap risk, mean reversion, price, recovery rate and volatility.

Generally, the interrelationships between correlation, credit spread, gap risk and volatility inputs are positively correlated.

#### **Other liabilities**

##### **Failed sales**

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

**1** Derivative contracts are reported on a gross basis by level. The impact of netting represents legally enforceable master netting agreements.

**2** In accordance with US GAAP, certain investments that are measured at fair value using the net asset value per share practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the consolidated balance sheet.

**Assets and liabilities measured at fair value on a recurring basis for level 3**

1 Changes in unrealized gains/(losses) on total assets at fair value and changes in unrealized (gains)/losses on total liabilities at fair value relating to assets and liabilities held at period end are included in net revenues or accumulated other comprehensive income. As of 2022, changes in net unrealized gains/(losses) of CHF (472) million and CHF (50) million were recorded in trading revenues and other revenues, respectively, and changes in unrealized (gains)/losses of CHF 413 million were recorded in gains/(losses) on liabilities relating to credit risk in accumulated other comprehensive income/(loss).

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

### **Transfers in and out of level 3**

Transfers into level 3 assets during 2022 were CHF 3,092 million, primarily from trading assets, loans and loans held-for-sale. The transfers were primarily in the GTS, securitized products and APAC Financing Group businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2022 were CHF 2,829 million, primarily in trading assets, loans and loans held-for-sale. The transfers out of level 3 assets were primarily in the GTS and securitized products businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 liabilities during 2022 were CHF 5,202 million, primarily from long-term debt and trading liabilities. These transfers were primarily in structured notes over two years and derivatives arising from a change in the observability of pricing data. Transfers out of level 3 liabilities of CHF 8,979 million in 2022 were primarily from long-term debt and trading liabilities. These transfers were primarily in structured notes over two years and derivatives arising from a change in the observability of pricing data.

Transfers into level 3 assets during 2021 were CHF 2,071 million, primarily from trading assets and loans held-for-sale. The transfers were primarily in the GTS, credit and securitized products businesses due to limited observability of pricing data and

reduced pricing information from external providers. Transfers out of level 3 assets during 2021 were CHF 6,388 million, primarily in trading assets, loans and loans held-for-sale. The transfers out of level 3 assets were primarily in the GTS, securitized products and Asia Pacific strategic products businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

### **Uncertainty of fair value measurements at the reporting date from the use of significant unobservable inputs**

For level 3 assets with a significant unobservable input of buy-back probability, contingent probability, dividend yield, funding spread, mortality rate, price, recovery rate, UK mortality, unadjusted NAV and volatility, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of correlation, credit spread, default rate, discount rate, fund gap risk, gap risk, market implied life expectancy (for life settlement and premium finance instruments), mean reversion, prepayment rate and tax swap rate, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, in general, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input contingent probability, credit spread, fund gap risk, gap risk, market implied life expectancy (for life settlement and premium finance instruments), mortality rate and price would increase the fair value. An increase in the significant unobservable input buyback probability, correlation, discount rate, dividend yield, mean reversion, prepayment rate, recovery rate, UK mortality, unadjusted NAV and volatility would decrease the fair value.

### **Interrelationships between significant unobservable inputs**

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

### **Quantitative disclosures of valuation techniques**

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

**Quantitative information about level 3 assets measured at fair value on a recurring basis**

### **Qualitative discussion of the ranges of significant unobservable inputs**

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above results in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

#### **Basis spread**

Basis spread is the primary significant unobservable input for non-callable constant maturity treasury-constant maturity swap (CMS) products and is used to determine interest rate risk as a result of differing lending and borrowing rates.

#### **Buyback probability**

Buyback probability is the probability assigned to structured notes being unwound prior to their legal maturity.

#### **CDS scale**

CDS scale is a valuation parameter which scales the referenced credit curve (base currency) to reflect a new credit curve representing the currency of the trade.

#### **Contingent probability**

Contingent probability is the primary significant unobservable input for contingent foreign exchange forward trades where the delivery or exercise and the premium payment are contingent on an event such as completion of an M&A deal or regulatory approval for a product.

#### **Correlation**

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation) and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

#### **Credit spread and recovery rate**

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

#### **Default rate and loss severity**

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low PD or guaranteed timely payment of principal and interest, while the higher end of the range relates to collateral with a greater risk of default.

#### **Discount rate**

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

#### **Dividend yield**

An equity forward price is a material component for measuring the fair value of a contract using forward, swap or option pricing models. The forward is generally constructed from expected future dividend payments and their timing, as well as the relevant funding rate for the given asset. Dividend yields are generally quoted as annualized percentages.

#### **EBITDA multiple**

EBITDA multiple is a primary significant unobservable input for some equity deals which are benchmarked using industry comparables. The EBITDA multiple may be preferred over other measures because it is normalized for differences between the accounting policies of similar companies.

#### **Funding gap risk and gap risk**

Gap risk is a significant unobservable input for structures that exhibit market risk to jumps in a reference asset, generally related to certain financing or principal protection trade features.

#### **Funding spread**

Funding spread is the primary significant unobservable input for special purpose vehicle funding facilities. Synthetic funding curves which represent the assets pledged as collateral are used to value structured financing transactions. The curves provide an estimate of where secured funding can be sourced and are expressed as a basis point spread in relation to the referenced benchmark rate.

### **Market implied life expectancy**

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of the insured.

### **Market price of risk**

The market price of risk (MPR) is a significant unobservable input for synthetic credit products where the trades are valued using the rating-based historical default probabilities. MPR is an exponent applied to the historic default probabilities in order to bring the initial swap valuation to zero.

### **Mean reversion**

Mean reversion is the primary significant unobservable input for callable CMS spread exotics and represents the idea that prices and returns eventually move back towards the historical average.

### **Mortality rate**

Mortality rate is the primary significant unobservable input for pension swaps. The expected present value of future cash flow of the trades depend on the mortality of individuals in the pension fund who are grouped into categories such as gender, age, pension amount and other factors. In some cases mortality rates include a “scaler” (also referred to as a loading or multiplier) that align mortality projections with historical experience and calibrate to exit level.

### **Pre-IPO intrinsic option**

Pre-IPO intrinsic option represents the share price of a company in advance of its listing on a public exchange. It is typically a discounted price from the IPO price.

### **Prepayment rate**

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

### **Price**

Bond equivalent price is a primary significant unobservable input for multiple products. Where market prices are not available for an instrument, benchmarking may be utilized to identify comparable issues (same industry and similar product mixes) while

adjustments are considered for differences in deal terms and performance.

### **Settlement lag extension**

For synthetic ABS CDO single tranche trades, settlement lag extension is an unobservable input that represents the delay that may occur between protection buyer calling a credit event and physically receiving the settlement cash from the swap counterparty.

### **Tax swap rate**

The tax swap rate parameter is the interest rate applicable to tax refunds from the Italian tax office, determined annually by the Italian tax authorities and payable to the claimant when refund is made.

### **Terminal growth rate**

The terminal growth rate is the rate at which free cash flows are expected to grow in perpetuity as part of an overall firm valuation process. The terminal growth rate typically parallels the historical inflation rate (2-3%) and is applied to the discounted cash flow model to represent mature stage company valuation.

### **UK Mortality**

UK Mortality is marked using Day-1 Mortality improvements, Mortality Base Tables, and Mortality floor calibrated to reinsurance exit PV by set of Qx Scalars or Multipliers. UK Mortality is updated annually based on changes to ‘Multipliers’ calibrated to actual vs expected pensioner maturities observed for respective pension scheme.

### **Unadjusted NAV**

NAV values are used to price fund units and as an input into fund derivatives. They are considered unobservable when based on NAV statements or estimates received directly from the fund, as opposed to published on a broad market platform, or with a lag to the reporting date.

### **Volatility and volatility skew**

Volatility and its skew are both impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility may vary significantly between different underlying currencies and expiration dates on the options. Similarly, in the case of equity derivatives, the volatility attributed to a structure may vary depending upon the underlying reference name on the derivative.

### Investment funds measured at net asset value per share

Investments in funds held in trading assets and trading liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investments in funds held in other investments principally involves private equity securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the board of directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

### Fair value, unfunded commitments and term of redemption conditions of investment funds measured at NAV per share

end of	2022				2021			
	Non-redeemable	Redeemable	Total fair value	Unfunded commitments	Non-redeemable	Redeemable	Total fair value	Unfunded commitments
<b>Fair value of investment funds and unfunded commitments (CHF million)</b>								
<b>Funds held in trading assets and trading liabilities</b>	<b>128</b>	<b>415</b>	<b>543</b>	<b>14</b>	<b>193</b>	<b>471</b>	<b>664</b>	<b>24</b>

1 CHF 276 million of the underlying assets had known liquidation periods and for CHF 239 million, the timing of liquidation was unknown.

2 CHF 234 million was redeemable on demand with a notice period of primarily less than 30 days.

3 CHF 339 million of the underlying assets had known liquidation periods and for CHF 242 million, the timing of liquidation was unknown.

4 CHF 304 million was redeemable on demand with a notice period of primarily less than 30 days.

### Assets and liabilities measured at fair value on a nonrecurring basis

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances. Nonrecurring measurements reported are as of the end of the period, unless otherwise stated. The market value

for loans held-for-sale and commitments held-for-sale is determined by benchmarking to comparable instruments.

The following table provides the fair value and the fair value hierarchy of all assets and liabilities that were held as of December 31, 2022 and 2021, for which a nonrecurring fair value measurement was recorded.

### Assets and liabilities measured at fair value on a nonrecurring basis

1 Weighted average is calculated based on the fair value of the instruments.

#### Fair value option

The Group has availed itself of the simplification in accounting offered under the fair value option. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. For instruments for which hedge accounting could not be achieved but for which the Group is economically hedged, the Group has generally elected the fair value option. Where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has generally utilized the fair value option to align its financial accounting to its risk management reporting.

The Group elected fair value for certain of its financial statement captions as follows:

#### Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

The Group has elected to account for structured resale agreements and most matched book resale agreements at fair value. These activities are managed on a fair value basis; thus, fair value accounting is deemed more appropriate for reporting purposes. The Group did not elect the fair value option for firm financing resale agreements as these agreements are generally overnight agreements which approximate fair value, but which are not managed on a fair value basis.

### **Other investments**

The Group has elected to account for certain equity method investments at fair value. These activities are managed on a fair value basis; thus, fair value accounting is deemed more appropriate for reporting purposes.

### **Loans**

The Group has elected to account for substantially all commercial loans and loan commitments from the investment banking businesses and certain emerging market loans from the investment banking businesses at fair value. These activities are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes. Additionally, recognition on a fair value basis eliminates the mismatch that existed due to the economic hedging the Group employs to manage these loans. Certain similar loans, such as project finance, lease finance, cash collateralized and some bridge loans, which were eligible for the fair value option, were not elected due to the lack of currently available infrastructure to fair value such loans and/or the inability to economically hedge such loans. Additionally, the Group elected not to account for loans granted by its private, corporate and institutional banking businesses at fair value, such as domestic consumer lending, mortgages and corporate loans, as these loans are not managed on a fair value basis.

### **Other assets**

The Group elected the fair value option for loans held-for-sale, due to the short period over which such loans are held and the intention to sell such loans in the near term. Other assets also include assets of VIEs and mortgage securitizations which do not meet the criteria for sale treatment under US GAAP. The Group did elect the fair value option for these types of transactions.

### **Due to banks and customer deposits**

The Group elected the fair value option for certain time deposits associated with its emerging markets activities. The Group's customer deposits include fund-linked deposits. The Group elected the fair value option for these fund-linked deposits. Fund-linked products are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes.

### **Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions**

The Group has elected to account for structured repurchase agreements and most matched book repurchase agreements at fair value. These activities are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes. The Group did not elect the fair value option for

firm financing repurchase agreements as these agreements are generally overnight agreements which approximate fair value, but which are not managed on a fair value basis.

### **Short-term borrowings**

The Group's short-term borrowings include hybrid debt instruments with embedded derivative features. Some of these embedded derivative features create bifurcable debt instruments. The Group elected the fair value option for some of these instruments as of January 1, 2006, in accordance with the provisions of US GAAP. New bifurcable debt instruments which were entered into in 2006 are carried at fair value. Some hybrid debt instruments do not result in bifurcable debt instruments. US GAAP permits the Group to elect fair value accounting for non-bifurcable hybrid debt instruments. With the exception of certain bifurcable hybrid debt instruments which the Group did not elect to account for at fair value, the Group has elected to account for all hybrid debt instruments held as of January 1, 2007, and hybrid debt instruments originated after January 1, 2007, at fair value. These activities are managed on a fair value basis and fair value accounting was deemed appropriate for reporting purposes. There are two main populations of similar instruments for which fair value accounting was not elected. The first relates to the lending business transacted by the Group's private, corporate and institutional banking businesses, which includes structured deposits and similar investment products. These are managed on a bifurcated or accrual basis and fair value accounting was not considered appropriate. The second is where the instruments were or will be maturing in the near term and their fair value will be realized at that time.

### **Long-term debt**

The Group's long-term debt includes hybrid debt instruments with embedded derivative features as described above in short-term borrowings. The Group's long-term debt also includes debt issuances managed by the Treasury department that do not contain derivative features (vanilla debt). The Group actively manages the interest rate risk on these instruments with derivatives. In particular, fixed-rate debt is hedged with receive-fixed, pay-floating interest rate swaps. The Group elected to fair value fixed-rate debt upon implementation of the fair value option on January 1, 2007, with changes in fair value recognized as a component of trading revenues. The Group did not elect to apply the fair value option to fixed-rate debt issued by the Group since January 1, 2008, but instead applies hedge accounting.

### **Other liabilities**

Other liabilities include liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The Group elected the fair value option for these types of transactions.

## Difference between the aggregate fair value and unpaid principal balances of fair value option-elected financial instruments

end of	2022			2021		
	Aggregate fair value	Aggregate unpaid principal	Difference	Aggregate fair value	Aggregate unpaid principal	Difference
<b>Financial instruments (CHF million)</b>						
Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions	40,793	40,665	128	68,623	68,565	58
Loans	7,358	8,241	(883)	10,243	11,035	(792)
Other assets <sup>1</sup>	8,544	10,937	(2,393)	8,624	10,777	(2,153)
Due to banks and customer deposits	(458)	(562)	104	(493)	(442)	(51)
Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions	(14,042)	(13,933)	(109)	(13,213)	(13,212)	(1)
Short-term borrowings	(6,783)	(6,892)	109	(10,690)	(10,996)	306
Long-term debt <sup>2</sup>	(58,721)	(72,788)	14,067	(68,722)	(71,833)	3,111
Other liabilities	(888)	(1,043)	155	(1,170)	(1,403)	233
Non-accrual loans <sup>3,4</sup>	733	2,213	(1,480)	843	2,657	(1,814)

<sup>1</sup> Primarily loans held-for-sale.

<sup>2</sup> Long-term debt includes both principal-protected and non-principal protected instruments. For non-principal-protected instruments, the original notional amount has been reported in the aggregate unpaid principal.

<sup>3</sup> Generally, a loan is deemed non-accrual when the contractual payments of principal and/or interest are more than 90 days past due.

<sup>4</sup> Included in loans or other assets.

## Gains and losses on financial instruments

of which related to credit risk	(164)	71	(15)

<sup>1</sup> Primarily recognized in net interest income.

<sup>2</sup> Primarily recognized in other revenues.

<sup>3</sup> Primarily recognized in trading revenues.

The impact of credit risk on assets presented in the table above has been calculated as the component of the total change in fair value, excluding the impact of changes in base or risk-free interest rates. The impact of changes in own credit risk on liabilities presented in the table above has been calculated as the difference between the fair values of those instruments as of the reporting date and the theoretical fair values of those instruments calculated by using the yield curve prevailing at the end of the reporting period, adjusted up or down for changes in the Group's own credit spreads from the transition date to the reporting date.

Interest income and expense, which are calculated based on contractual rates specified in the transactions, are recorded in the consolidated statements of operations depending on the nature of the instrument and its related market convention. When interest is included as a component of the change in the instrument's fair value, it is included in trading revenues. Otherwise, it is included

in interest and dividend income or interest expense. Interest and dividend income is recognized separately from trading revenues.

#### Gains and losses attributable to changes in instrument-specific credit risk on fair value option elected liabilities

The following table provides additional information regarding the gains and losses attributable to changes in instrument-specific credit risk on fair value option elected liabilities, which have been recorded in AOCI. The table includes both the amount of change during the period and the cumulative amount that were attributable to the changes in instrument-specific credit risk. In addition, the table includes the gains and losses related to instrument-specific credit risk, which were previously recorded in AOCI but have been transferred to net income during the period.

#### Gains/(losses) attributable to changes in instrument-specific credit risk

### 37 Assets pledged and collateral

#### Assets pledged

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are parenthetically disclosed on the consolidated balance sheet.

#### Assets pledged

end of	2022	2021
<b>CHF million</b>		
Total assets pledged or assigned as collateral	63,111	88,721
of which encumbered	25,445	39,105

#### Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A significant portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet

purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

#### Collateral

end of	2022	2021
<b>CHF million</b>		
Fair value of collateral received with the right to sell or repledge	150,198	289,898
of which sold or repledged	75,819	144,747

#### Other information

end of	2022	2021
<b>CHF million</b>		
Swiss National Bank required minimum liquidity reserves	2,258	2,246
Other restricted cash, securities and receivables <sup>1</sup>	1,247	3,868

- <sup>1</sup> Includes cash, securities and receivables recorded on the Group's consolidated balance sheets and restricted under Swiss or foreign regulations for financial institutions; excludes restricted cash, securities and receivables held on behalf of clients which are not recorded on the Group's consolidated balance sheet.

### 38 Capital adequacy

The Group is subject to the Basel framework, as implemented in Switzerland, as well as Swiss legislation and regulations for systemically important banks, which include capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. The legislation implementing the Basel framework in Switzerland in respect of capital requirements for systemically important banks, including Credit Suisse, goes beyond the Basel minimum standards for systemically important banks. The Group, which is subject to regulation by FINMA, has based its capital adequacy calculations on US GAAP financial statements, as permitted by FINMA Circular 2013/1.

Under the Capital Adequacy Ordinance, Swiss banks classified as systemically important banks operating internationally, such as Credit Suisse, are subject to two different minimum requirements for loss-absorbing capacity: such banks must hold sufficient capital that absorbs losses to ensure continuity of service (going concern requirement), and they must issue sufficient debt instruments to fund an orderly resolution without recourse to public resources (gone concern requirement). Going concern capital and gone concern capital together form the Group's total loss-absorbing capacity (TLAC). The going concern and gone

concern requirements are generally aligned with the Financial Stability Board's total loss-absorbing capacity standard. Under the Capital Adequacy Ordinance's grandfathering provisions, additional tier 1 capital instruments with a low trigger qualify as going concern capital until their first call date. Additionally, there are FINMA decrees that apply to Credit Suisse as a systemically important bank operating internationally, including capital adequacy requirements as well as liquidity and risk diversification requirements. Banks that do not maintain the minimum requirements may be limited in their ability to pay dividends and make discretionary bonus payments and other earnings distributions.

The Group's balance sheet positions and off-balance sheet exposures translate into risk-weighted assets, which are categorized as credit, market and operational risk-weighted assets. When assessing risk-weighted assets, it is not the nominal size, but rather the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the risk-weighted assets.

Leverage exposure consists of period-end balance sheet assets and prescribed regulatory adjustments, such as derivative financial instruments, securities financing transactions and off-balance sheet exposures.

Capital ratios measure the Group's capital components against risk-weighted assets and leverage ratios measure them against the end-of-period leverage exposure.

As of December 31, 2022 and 2021, the Group's capital position exceeded its capital requirements under the regulatory provisions outlined under Swiss Requirements.

#### Broker-dealer operations

Certain of the Group's broker-dealer subsidiaries are also subject to capital adequacy requirements. As of December 31, 2022 and 2021, the Group and its subsidiaries complied with all applicable regulatory capital adequacy requirements.

#### Dividend restrictions

Certain of the Group's subsidiaries are subject to legal restrictions governing the amount of dividends they can pay (for example, pursuant to corporate law as defined by the Swiss Code of Obligations).

Under the Swiss Code of Obligations, dividends may be paid out only if and to the extent the corporation has distributable profits or distributable reserves. For holding companies, legal reserves may be distributed if they exceed, after deduction of any accumulated losses, treasury shares and reserves for own shares held by subsidiaries, 20% of the share capital registered in the commercial register. Furthermore, dividends may be paid out only after shareholder approval.

As of December 31, 2022 and 2021, Credit Suisse Group AG was not subject to restrictions on its ability to pay the proposed dividends.

#### Swiss metrics

end of	2022	2021
<b>Swiss capital (CHF million)</b>		
Swiss CET1 capital	35,290	38,529
Going concern capital	50,026	54,372
Gone concern capital	49,117	46,648 <sup>1</sup>
Total loss-absorbing capacity (TLAC)	99,143	101,020
<b>Swiss risk-weighted assets and leverage exposure (CHF million)</b>		
Swiss risk-weighted assets	250,963	268,418
Leverage exposure	650,551	889,137
<b>Swiss capital ratios (%)</b>		
Swiss CET1 ratio	14.1	14.4
Going concern capital ratio	19.9	20.3
Gone concern capital ratio	19.6	17.4
TLAC ratio	39.5	37.6
<b>Swiss leverage ratios (%)</b>		
Swiss CET1 leverage ratio	5.4	4.3
Going concern leverage ratio	7.7	6.1
Gone concern leverage ratio	7.6	5.2
TLAC leverage ratio	15.2	11.4
<b>Swiss capital ratio requirements (%)</b>		
Swiss CET1 ratio requirement	9.28	10.0
Going concern capital ratio requirement	13.58 <sup>2</sup>	14.3
Gone concern capital ratio requirement	13.58	14.3
TLAC ratio requirement	27.16	28.6
<b>Swiss leverage ratio requirements (%)</b>		
Swiss CET1 leverage ratio requirement	3.25	3.5
Going concern leverage ratio requirement	4.75 <sup>2</sup>	5.0
Gone concern leverage ratio requirement	4.75	5.0
TLAC leverage ratio requirement	9.5	10.0

- Amounts are shown on a look-through basis. Certain tier 2 instruments and their related tier 2 amortization components were subject to phase out and are no longer eligible as of January 1, 2022. As of 2021, gone concern capital was CHF 46,897 million, including CHF 249 million of such instruments.
- The total requirement excluded the FINMA Pillar 2 capital add-on of CHF 1,850 million relating to the supply chain finance funds matter. This Pillar 2 capital add-on equated to an additional Swiss CET1 capital ratio requirement of 74 basis points and an additional Swiss CET1 leverage ratio requirement of 28 basis points.

### 39 Assets under management

The following disclosure provides information regarding client assets, assets under management and net new assets as regulated by FINMA.

#### Assets under management

Assets under management include assets for which the Group provides investment advisory or discretionary asset management services, investment fund assets and assets invested in other investment fund-like pooled investment vehicles managed by the Group. The classification of assets under management is conditional upon the nature of the services provided by the Group and the clients' intentions. Assets are individually assessed on the basis of each client's intentions and objectives and the nature of the banking services provided to that client. In order to be classified as assets under management, the Group must currently or in the foreseeable future expect to provide a service where the involvement of the Group's banking or investment expertise (e.g. as asset manager or investment advisor) is not purely executional or custodial in nature.

Assets under custody are client assets held mainly for execution-related or safekeeping/custody purposes only and therefore are not considered assets under management since the Group does not generally provide asset allocation or financial advice.

Assets of corporate clients and public institutions that are used primarily for cash management or transaction executional purposes for which no investment advice is provided are classified as commercial assets or assets under custody and therefore do not qualify as assets under management.

For the purpose of classifying assets under management, clients with multiple accounts are assessed from an overall relationship perspective. Accounts that are clearly separate from the remainder of the client relationship and represent assets held for custody purposes only are not included as assets under management.

The initial classification of the assets may not be permanent as the nature of the client relationship is reassessed on an on-going basis. If changes in client intent or activity warrant reclassification between client asset categories, the required reclassification adjustments are made immediately when the change in intent or activity occurs. Reclassifications between assets under management and assets held for transaction-related or custodial purposes result in corresponding net asset inflows or outflows.

A portion of the Group's assets under management results from double counting. Double counting arises when assets under management are subject to more than one level of asset management services. Each separate advisory or discretionary service provides additional benefits to the client and represents additional income for the Group. Specifically, double counting primarily results from

the investment of assets under management in collective investment instruments managed by the Group. The extent of double counting is disclosed in the following table.

#### Assets under management

end of	2022	2021
<b>CHF billion</b>		
Assets in collective investment instruments managed by Credit Suisse	196.7	231.8
Assets with discretionary mandates	244.1	294.8
Other assets under management	852.8	1,087.4
<b>Assets under management (including double counting)</b>	<b>1,293.6</b>	<b>1,614.0</b>
of which double counting	32.1	46.2

#### Changes in assets under management

	2022	2021
<b>Assets under management (CHF billion)</b>		
<b>Balance at beginning of period <sup>1</sup></b>	<b>1,614.0</b>	<b>1,511.9</b>
Net new assets/(net asset outflows)	(123.2) <sup>2</sup>	30.9
Market movements, interest, dividends and foreign exchange (170.0)		92.6
of which market movements, interest and dividends <sup>3</sup>	(165.9)	80.8
of which foreign exchange	(4.1)	11.8
Other effects	(27.2)	(21.4)
<b>Balance at end of period</b>	<b>1,293.6</b>	<b>1,614.0</b>

- 1 Including double counting.
- 2 Refer to "Outflows in assets under management in the fourth quarter of 2022" in Note 3 – Business developments, significant shareholders and subsequent events for further information on net asset outflows.
- 3 Net of commissions and other expenses and net of interest expenses charged.

#### Net new assets

Net new assets measure the degree of success in acquiring assets under management or changes in assets under management through warranted reclassifications. The calculation is based on the direct method, taking into account individual cash payments, security deliveries and cash flows resulting from loan increases or repayments.

Interest and dividend income credited to clients and commissions, interest and fees charged for banking services as well as changes in assets under management due to currency and market volatility are not taken into account when calculating net new assets, as such charges or market movements are not directly related to the Group's success in acquiring assets under management. Similarly other effects mainly relate to asset inflows and outflows due to acquisition or divestiture, exit from businesses or markets or exits due to new regulatory requirements and are not taken into account when calculating net new assets. The Group reviews relevant policies regarding client assets on a regular basis.

## Divisional allocation

Assets under management and net new assets for Wealth Management and Swiss Bank are allocated based on the management areas (business areas) that effectively manage the assets. The distribution of net new assets resulting from internal referral arrangements is governed under the net new asset referral

framework, which includes preset percentages for the allocation of net new assets to the businesses.

The allocation of assets under management and net new assets for Asset Management reflects the location where the investment vehicles are managed and where the costs of managing the funds are incurred.

---

## 40 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses, including those disclosed below. Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. This review includes consideration of management's strategy for resolution of matters through settlement or trial, as well as changes in such strategy. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described below include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters below includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or

compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed below the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The following table presents a roll forward of the Group's aggregate litigation provisions.

---

### Litigation provisions

	2022
<b>CHF million</b>	
<b>Balance at beginning of period</b>	<b>1,539</b>
Increase in litigation accruals	1,907
Decrease in litigation accruals	(347)
Decrease for settlements and other cash payments	(1,999)
Foreign exchange translation	72
<b>Balance at end of period</b>	<b>1,172</b>

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed below for which the Group believes an estimate is possible is zero to CHF 1.2 billion.

After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

#### **Mortgage-related matters**

##### **Government and regulatory related matters**

Various financial institutions, including Credit Suisse Securities (USA) LLC (CSS LLC) and certain of its affiliates, have received requests for information from, and/or have been defending civil actions by, certain regulators and/or government entities, including the US Department of Justice (DOJ) and other members of the Residential Mortgage-Backed Securities (RMBS) Working Group of the US Financial Fraud Enforcement Task Force, regarding the origination, purchase, securitization, servicing and trading of subprime and non-subprime residential and commercial mortgages and related issues. CSS LLC and its affiliates are cooperating with such requests for information.

##### **DOJ RMBS settlement**

As previously disclosed, on January 18, 2017, CSS LLC and its current and former US subsidiaries and US affiliates reached a settlement with the DOJ related to its legacy RMBS business, a business conducted through 2007. The settlement resolved potential civil claims by the DOJ related to certain of those Credit Suisse entities' packaging, marketing, structuring, arrangement, underwriting, issuance and sale of RMBS. Pursuant to the terms of the settlement a civil monetary penalty was paid to the DOJ in January 2017. The settlement also required the above-mentioned entities to provide certain levels of consumer relief measures, including affordable housing payments and loan forgiveness, and the DOJ and Credit Suisse agreed to the appointment of an independent monitor to oversee the completion of the consumer relief requirements of the settlement. Credit Suisse continues to evaluate its approach toward satisfying its remaining consumer relief obligations in light of its business reassessment and anticipated related transactions, and Credit Suisse currently anticipates

that it will take much longer than the five-year period provided in the settlement to satisfy in full its obligations in respect of these consumer relief measures and that it may only complete them by 2026 or later, subject to market conditions and the Group's risk appetite. Credit Suisse expects to incur costs in relation to satisfying those obligations. The amount of consumer relief Credit Suisse must provide also increases after 2021 pursuant to the original settlement by 5% per annum of the outstanding amount due until these obligations are settled. The monitor publishes reports periodically on these consumer relief matters.

##### **NJAG litigation**

On December 18, 2013, the New Jersey Attorney General (NJAG), on behalf of the State of New Jersey, filed a civil action in the Superior Court of New Jersey, Chancery Division, Mercer County (SCNJ), against CSS LLC and affiliated entities in their roles as issuer, sponsor, depositor and/or underwriter of RMBS transactions prior to 2008. The complaint, which referenced approximately USD 10 billion of original unpaid principal balance across 13 RMBS issued, sponsored, deposited and underwritten by CSS LLC and its affiliates in 2006 and 2007, alleged that CSS LLC and its affiliates misled investors and engaged in fraud or deceit in connection with the offer and sale of RMBS, and sought an unspecified amount of damages. On October 25, 2022, following a settlement in the amount of USD 495 million, for which Credit Suisse was fully reserved, the SCNJ dismissed with prejudice all claims against CSS LLC and affiliated entities.

##### **Civil litigation**

CSS LLC and/or certain of its affiliates have also been named as defendants in various civil litigation matters related to their roles as issuer, sponsor, depositor, underwriter and/or servicer of RMBS transactions. These cases include or have included class action lawsuits, actions by individual investors in RMBS, actions by monoline insurance companies that guaranteed payments of principal and interest for certain RMBS, and repurchase actions by RMBS trusts, trustees and/or investors. Although the allegations vary by lawsuit, plaintiffs in the class actions and individual investor actions generally allege that the offering documents of securities issued by various RMBS securitization trusts contained material misrepresentations and omissions, including statements regarding the underwriting standards pursuant to which the underlying mortgage loans were issued; monoline insurers generally allege that loans that collateralize RMBS they insured breached representations and warranties made with respect to the loans at the time of securitization and that they were fraudulently induced to enter into the transactions; and repurchase action plaintiffs generally allege breached representations and warranties in respect of mortgage loans and failure to repurchase such mortgage loans as required under the applicable agreements. The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance. Further, unless otherwise stated, amounts attributable to an "operative pleading" for the individual investor actions are not

altered for settlements, dismissals or other occurrences, if any, that may have caused the amounts to change subsequent to the operative pleading. In addition to the mortgage-related actions discussed below, a number of other entities have threatened to assert claims against CSS LLC and/or its affiliates in connection with various RMBS issuances.

#### **Individual investor actions**

CSS LLC as an RMBS issuer, underwriter and/or other participant, along with other defendants, was named as a defendant in an action brought by the Federal Deposit Insurance Corporation (FDIC), as receiver for Colonial Bank, in the US District Court for the Southern District of New York (SDNY), in which claims against CSS LLC related to approximately USD 92 million of the RMBS at issue (approximately 23% of the USD 394 million at issue against all defendants in the operative pleading). On June 28, 2022, CSS LLC and the plaintiffs executed an agreement to settle and dismiss all claims against CSS LLC.

In early March 2022, in an action brought by the FDIC, as receiver for Citizens National Bank and Strategic Capital Bank, in the SDNY, in which claims related to approximately USD 28 million of RMBS at issue, CSS LLC and its affiliates executed an agreement with the plaintiffs to settle and dismiss all claims against CSS LLC and its affiliates.

CSS LLC and certain of its affiliates were the only defendants named in an action brought by IKB Deutsche Industriebank AG and affiliated entities in the Supreme Court for the State of New York, New York County (SCNY), in which claims against CSS LLC and its affiliates related to approximately USD 97 million of RMBS at issue. On April 12, 2022, the parties executed an agreement to settle and dismiss all claims against CSS LLC and its affiliates.

#### **Repurchase litigations**

DLJ Mortgage Capital, Inc. (DLJ) is a defendant in: (i) one action brought by Asset Backed Securities Corporation Home Equity Loan Trust, Series 2006-HE7, in which plaintiff alleges damages of not less than USD 374 million in an amended complaint filed on August 19, 2019; on January 13, 2020, DLJ filed a motion to dismiss; (ii) one action brought by Home Equity Asset Trust, Series 2006-8, in which plaintiff alleges damages of not less than USD 436 million; (iii) one action brought by Home Equity Asset Trust 2007-1, in which plaintiff alleges damages of not less than USD 420 million; on December 27, 2018, the SCNY denied DLJ's motion for partial summary judgment in this action, and the Appellate Division First Department of the SCNY (First Department) affirmed the SCNY's summary judgment order on October 10, 2019; on January 30, 2020, DLJ obtained leave to further appeal to the New York State Court of Appeals; on March 17, 2022, the New York State Court of Appeals reversed the decision of the First Department and ordered that DLJ's motion for partial summary judgment be granted; a non-jury trial in the action was held between January 23 and February 3, 2023, and a decision is pending; (iv) one action brought by Home Equity

Asset Trust 2007-2, in which plaintiff alleges damages of not less than USD 495 million; and (v) one action brought by CSMC Asset-Backed Trust 2007-NC1, in which no damages amount is alleged. These actions are brought in the SCNY and are at various procedural stages.

DLJ is also a defendant in one action brought by Home Equity Asset Trust Series 2007-3, in which plaintiff alleges damages of not less than USD 206 million. On March 5, 2022, DLJ and the plaintiffs executed an agreement to settle this action. The settlement remains subject to approval through a trust instruction proceeding brought in Minnesota state court by the trustee of the plaintiff trust.

DLJ and its affiliate, Select Portfolio Servicing, Inc. (SPS), are defendants in two actions that have been consolidated for certain procedural purposes, including trial, in the SCNY: one action brought by Home Equity Mortgage Trust Series 2006-1, Home Equity Mortgage Trust Series 2006-3 and Home Equity Mortgage Trust Series 2006-4, in which plaintiffs allege damages of not less than USD 730 million, and allege that SPS obstructed the investigation into the full extent of the defects in the mortgage pools by refusing to afford the trustee reasonable access to certain origination files; and one action brought by Home Equity Mortgage Trust Series 2006-5, in which plaintiff alleges damages of not less than USD 500 million, and alleges that SPS likely discovered DLJ's alleged breaches of representations and warranties but did not notify the trustee of such breaches, in alleged violation of its contractual obligations. On April 19, 2021, DLJ, SPS and the plaintiffs executed an agreement to settle both actions for the aggregate amount of USD 500 million, for which Credit Suisse was fully reserved. The settlement remains subject to approval through a trust instruction proceeding brought in Minnesota state court by the trustee of the plaintiff trusts.

Following the earlier dismissal of three consolidated repurchase actions in the SCNY in 2013 and the New York State Court of Appeals' upholding of this dismissal in February 2019, on August 15, 2019, the trustees for Home Equity Asset Trust 2006-5, Home Equity Asset Trust 2006-6 and Home Equity Asset Trust 2006-7 commenced a new repurchase action against DLJ in the SCNY, in which plaintiffs alleged damages of not less than USD 936 million, asserting substantially similar claims against DLJ as those alleged in the three consolidated repurchase actions previously dismissed with prejudice in 2013. On November 25, 2019, the SCNY entered an order dismissing this new action with prejudice. On December 20, 2019, the plaintiffs filed a notice of appeal to the First Department. On November 22, 2022, the plaintiffs withdrew their appeal to the First Department, such that the action is now fully dismissed.

#### **Bank loan litigation**

CSS LLC and certain of its affiliates are the subject of certain litigation relating to certain real estate developments including Yellow-stone Club and Lake Las Vegas as well as other similar real estate

developments. Credit Suisse defendants in these matters arranged, and acted as the agent bank for, syndicated loans provided to borrowers affiliated with such real estate developments, and who have since gone through bankruptcy or foreclosure. Such litigation includes two cases brought in Texas and New York state courts by entities related to Highland Capital Management LP (Highland). In the case in Texas state court, a jury trial was held in December 2014 and a verdict was issued for the plaintiff on its claim for fraudulent inducement by affirmative misrepresentation, but the jury rejected its claim that CSS LLC and an affiliate had committed fraudulent inducement by omission. The Texas judge held a bench trial on Highland's remaining claims in May and June 2015, and entered judgment in the amount of USD 287 million (including prejudgment interest) for the plaintiff on September 4, 2015. Both parties appealed and on February 21, 2018, the appeals court affirmed the lower court's decision. On April 24, 2020, the Texas Supreme Court issued a ruling reversing a portion of the trial court's September 4, 2015 judgment related to the bench trial, thereby dismissing plaintiff's breach of contract, breach of the implied duty of good faith and fair dealing, aiding and abetting fraud, and civil conspiracy claims, including damages of approximately USD 212 million, exclusive of interest, but left standing the separate December 2014 jury verdict for plaintiff on its claims for fraudulent inducement by affirmative misrepresentation. The Texas Supreme Court subsequently remanded the case back to the trial court for further proceedings related to the calculation of damages and interest. On June 25, 2021, the trial court entered a new judgment, which awarded plaintiff a total of approximately USD 121 million. CSS LLC and its affiliates appealed the judgment. On February 14, 2023, the appeals court issued a ruling, reversing in favor of CSS LLC a portion of the trial court's June 25, 2021 judgment related to secondary market purchases, concluding in favor of CSS LLC that the trial court erred by failing to apply certain settlement credits to the December 2014 jury award amount and remanding the case to the trial court to consider the amount of prejudgment interest owed to Highland.

In the case in New York state court, the court granted in part and denied in part CSS LLC and certain of its affiliates' summary judgment motion. Both parties appealed that decision, but the appellate court affirmed the decision in full. The case is currently in discovery.

#### **Tax and securities law matters**

On May 19, 2014, Credit Suisse AG entered into settlement agreements with several US regulators regarding its US cross-border matters. As part of the agreements, Credit Suisse AG, among other things, engaged an independent corporate monitor that reports to the New York State Department of Financial Services. As of July 31, 2018, the monitor concluded both his review and his assignment. Credit Suisse AG continues to report to and cooperate with US authorities in accordance with Credit Suisse AG's obligations under the agreements.

#### **Rates-related matters**

##### **Regulatory matters**

Regulatory authorities in a number of jurisdictions, including the US, UK, EU and Switzerland, have for an extended period of time been conducting investigations into the setting of LIBOR and other reference rates with respect to a number of currencies, as well as the pricing of certain related derivatives. These ongoing investigations have included information requests from regulators regarding LIBOR-setting practices and reviews of the activities of various financial institutions, including Credit Suisse Group AG, which is a member of three LIBOR rate-setting panels (US Dollar LIBOR, Swiss Franc LIBOR and Euro LIBOR). Credit Suisse is cooperating fully with these investigations. In particular, it has been reported that regulators are investigating whether financial institutions engaged in an effort to manipulate LIBOR, either individually or in concert with other institutions, in order to improve market perception of these institutions' financial health and/or to increase the value of their proprietary trading positions. In response to regulatory inquiries, Credit Suisse commissioned a review of these issues. To date, Credit Suisse has seen no evidence to suggest that it is likely to have any material exposure in connection with these issues.

Regulatory authorities in a number of jurisdictions, including the Swiss Competition Commission (COMCO), the European Commission (Commission), the South African Competition Commission and the Brazilian Competition Authority have been conducting investigations into the trading activities, information sharing and the setting of benchmark rates in the foreign exchange (including electronic trading) markets.

On March 31, 2014, COMCO announced its formal investigation of numerous Swiss and international financial institutions, including Credit Suisse Group AG, in relation to the setting of exchange rates in foreign exchange trading. Credit Suisse continues to cooperate with this ongoing investigation.

Credit Suisse Group AG, Credit Suisse AG and Credit Suisse Securities (Europe) Limited (CSSEL) received a Statement of Objections and a Supplemental Statement of Objections from the Commission on July 26, 2018 and March 19, 2021, respectively, alleging that Credit Suisse entities engaged in anticompetitive practices in connection with their foreign exchange trading business. On December 6, 2021, the Commission issued a formal decision imposing a fine of EUR 83.3 million. On February 15, 2022, Credit Suisse appealed this decision to the EU General Court.

The reference rates investigations have also included information requests from regulators concerning supranational, sub-sovereign and agency (SSA) bonds and commodities markets. Credit Suisse Group AG and CSSEL received a Statement of Objections from the Commission on December 20, 2018, alleging that Credit Suisse entities engaged in anticompetitive practices in connection with their SSA bonds trading business. On April 28, 2021, the

Commission issued a formal decision imposing a fine of EUR 11.9 million. On July 8, 2021, Credit Suisse appealed this decision to the EU General Court.

## **Civil litigation**

### **USD LIBOR litigation**

Beginning in 2011, certain Credit Suisse entities were named in various putative class and individual lawsuits filed in the US, alleging banks on the US dollar LIBOR panel manipulated US dollar LIBOR to benefit their reputation and increase profits. All remaining matters have been consolidated for pre-trial purposes into a multi-district litigation in the SDNY.

In a series of rulings between 2013 and 2019 on motions to dismiss, the SDNY (i) narrowed the claims against the Credit Suisse entities and the other defendants (dismissing antitrust, Racketeer Influenced and Corrupt Organizations Act (RICO), Commodity Exchange Act, and state law claims), (ii) narrowed the set of plaintiffs who may bring claims, and (iii) narrowed the set of defendants in the LIBOR actions (including the dismissal of several Credit Suisse entities from various cases on personal jurisdiction and statute of limitation grounds). After a number of putative class and individual plaintiffs appealed the dismissal of their antitrust claims to the United States Court of Appeals for the Second Circuit (Second Circuit), on December 30, 2021, the Second Circuit affirmed in part and reversed in part the district court's decision and remanded the case to the SDNY.

On September 21, 2021, in the putative class action brought in the multi-district litigation in the SDNY by holders of bonds tied to LIBOR, Credit Suisse entered into an agreement to settle all claims. On November 7, 2022, the court entered an order granting preliminary approval to the agreement to settle all claims. The settlement remains subject to final court approval.

Separately, on February 4, 2022, three actions brought by individual plaintiffs, and on November 18, 2022, one additional individual action, were dismissed against Credit Suisse.

On November 17, 2021, in the putative class action brought on behalf of those who lent at rates tied to LIBOR, Credit Suisse entered into an agreement to settle all claims. On March 11, 2022 and July 26, 2022, respectively, the SDNY entered orders granting preliminary and final approval to the agreement to settle all claims.

Separately, on May 4, 2017, the plaintiffs in three putative class actions moved for class certification. On February 28, 2018, the SDNY denied certification in two of the actions and granted certification over a single antitrust claim in an action brought by over-the-counter purchasers of LIBOR-linked derivatives.

### **USD ICE LIBOR litigation**

In January 2019, members of the US dollar Intercontinental Exchange (ICE) LIBOR panel, including Credit Suisse Group AG and certain of its affiliates, were named in three civil putative class action lawsuits alleging that panel banks suppressed US

dollar ICE LIBOR to benefit defendants' trading positions. These actions have been consolidated in the SDNY. On March 26, 2020, the SDNY granted defendants' motion to dismiss, and on February 14, 2022, the Second Circuit dismissed plaintiffs' appeal of the SDNY's decision granting defendants' motion to dismiss.

On August 18, 2020, members of the ICE LIBOR panel, including Credit Suisse Group AG and certain of its affiliates, were named in a civil action in the US District Court for the Northern District of California, alleging that panel banks manipulated ICE LIBOR to profit from variable interest loans and credit cards. On December 23, 2021, the court denied plaintiffs' motion for preliminary and permanent injunctions to enjoin panel banks from continuing to set LIBOR or automatically setting the benchmark to zero each day, and on September 13, 2022, the court granted defendants' motions to dismiss. On October 4, 2022, plaintiffs filed an amended complaint. On November 4, 2022, defendants filed a motion to dismiss the amended complaint.

### **CHF LIBOR litigation**

In February 2015, various banks that served on the Swiss franc LIBOR panel, including Credit Suisse Group AG, were named in a civil putative class action lawsuit filed in the SDNY, alleging manipulation of Swiss franc LIBOR to benefit defendants' trading positions. After defendants' motion to dismiss for lack of subject matter jurisdiction was granted and plaintiffs successfully appealed, on July 13, 2022, Credit Suisse entered into an agreement to settle all claims. On February 15, 2023, the court entered an order granting preliminary approval to the agreement to settle all claims. The settlement remains subject to final court approval.

### **SIBOR/SOR litigation**

In July 2016, various banks that served on the Singapore Interbank Offered Rate (SIBOR) and Singapore Swap Offer Rate (SOR) panels, including Credit Suisse Group AG and affiliates, were named in a civil putative class action lawsuit filed in the SDNY, alleging manipulation of SIBOR and SOR to benefit defendants' trading positions. After defendants' motion to dismiss for lack of subject matter jurisdiction was granted and plaintiffs successfully appealed, on April 22, 2022, Credit Suisse entered into an agreement to settle all claims. On June 9, 2022 and November 29, 2022, respectively, the court entered orders granting preliminary and final approval to the agreement to settle all claims.

### **Foreign exchange litigation**

Credit Suisse Group AG and affiliates as well as other financial institutions have been named in civil lawsuits relating to the alleged manipulation of foreign exchange rates.

The first pending matter is a consolidated class action. In that matter, on September 3, 2019, the SDNY denied plaintiffs' motion for certification of a Rule 23(b)(3) damages class, ruling that proof of both injury and damages must proceed on an individual basis, but granted certification as to two threshold issues concerning the alleged conspiracy. The SDNY also denied plaintiffs'

motion for certification of a second proposed class in its entirety. On February 1, 2022, the SDNY denied the parties' cross-motions for summary judgment. On April 22, 2022, Credit Suisse filed a motion to de-certify the issue class, which was denied on August 31, 2022. A jury trial was held in October 2022 on the issues of whether a conspiracy existed to manipulate bid-ask spreads in the FX market and whether Credit Suisse knowingly participated in any such conspiracy. On October 20, 2022, a verdict was issued in favor of Credit Suisse, finding that Credit Suisse did not knowingly participate in any such conspiracy. On November 10, 2022, plaintiffs moved for a new trial, which was denied on February 16, 2023.

A second pending matter originally named Credit Suisse Group AG and affiliates, as well as other financial institutions, in a civil action filed in the SDNY on November 13, 2018. This action was based on the same alleged conduct as the consolidated class action. After the court granted in part and denied in part defendants' motion to dismiss the second amended complaint, and plaintiffs filed a third amended complaint, on July 27, 2022, Credit Suisse entered into an agreement to settle all claims. On August 31, 2022, pursuant to the settlement agreement, the court dismissed with prejudice plaintiffs' claims against Credit Suisse.

Credit Suisse AG, together with other financial institutions, was also named in a consolidated putative class action in Israel, which made allegations similar to the consolidated class action. On April 4, 2022, Credit Suisse entered into an agreement to settle all claims. The settlement remains subject to court approval.

### **Treasury markets litigation**

CSS LLC, along with over 20 other primary dealers of US treasury securities, was named in a number of putative civil class action complaints in the US relating to the US treasury markets. These complaints generally alleged that the defendants colluded to manipulate US treasury auctions, as well as the pricing of US treasury securities in the when-issued market, with impacts upon related futures and options. These actions were consolidated into a multi-district litigation in the SDNY. On November 15, 2017, plaintiffs filed a consolidated amended class action complaint containing the previously asserted allegations as well as new allegations concerning a group boycott to prevent the emergence of anonymous, all-to-all trading in the secondary market for treasury securities. On May 22, 2018, defendants filed motions to dismiss, which the SDNY granted on March 31, 2021. On May 14, 2021, plaintiffs filed an amended complaint. On August 4, 2021, defendants filed a motion to dismiss. On March 31, 2022, the SDNY granted defendants' motion to dismiss and dismissed with prejudice all claims against the defendants. On April 28, 2022, plaintiffs filed a notice of appeal.

### **SSA bonds litigation**

Credit Suisse Group AG and affiliates, along with other financial institutions and individuals, have been named in several putative class action complaints filed in the SDNY relating to SSA bonds. The complaints generally allege that defendants conspired to fix the prices of SSA bonds sold to and purchased from investors in the

secondary market. These actions have been consolidated in the SDNY. On July 19, 2021, the Second Circuit affirmed the SDNY's September 30, 2019 and March 18, 2020 decisions granting defendants' motions to dismiss. On August 2, 2021, the plaintiffs filed a petition for rehearing en banc and panel rehearing, which the Second Circuit denied on September 2, 2021. On March 3, 2022, plaintiffs moved to vacate the dismissal of their case after the SDNY judge disclosed a conflict. On October 3, 2022, the court denied plaintiffs' motion.

Credit Suisse Group AG and certain of its affiliates, together with other financial institutions, were also named in two Canadian putative class actions, which make allegations similar to the consolidated class action. One putative class action was dismissed against Credit Suisse on February 19, 2020. On October 18, 2022, in the second action, Credit Suisse entered into an agreement to settle all claims. The settlement remains subject to court approval.

### **Bank Bill Swap litigation**

On August 16, 2016, Credit Suisse Group AG and Credit Suisse AG, along with other financial institutions, were named in a putative class action brought in the SDNY, alleging manipulation of the Australian Bank Bill Swap reference rate. After the court granted in part and denied in part defendants' motion to dismiss, on January 21, 2022, Credit Suisse entered into an agreement to settle all claims. On May 11, 2022 and November 2, 2022, respectively, the court entered orders granting preliminary and final approval to the agreement to settle all claims.

### **Credit default swap auction litigation**

On June 30, 2021, Credit Suisse Group AG and affiliates, along with other banks and entities, were named in a putative class action complaint filed in the US District Court for the District of New Mexico alleging manipulation of credit default swap (CDS) final auction prices. On February 4, 2022, plaintiffs voluntarily dismissed their claims against Credit Suisse Group and certain non-Credit Suisse entities and filed an amended complaint naming Credit Suisse AG and affiliates, along with other banks and entities. On April 5, 2022, defendants filed a motion to dismiss.

### **OTC trading cases**

#### **Interest rate swaps litigation**

Credit Suisse Group AG and affiliates, along with other financial institutions, have been named in a consolidated putative civil class action complaint and complaints filed by individual plaintiffs relating to interest rate swaps, alleging that dealer defendants conspired with trading platforms to prevent the development of interest rate swap exchanges. The individual lawsuits were brought by Tera-Exchange LLC, a swap execution facility, and affiliates; Javelin Capital Markets LLC, a swap execution facility, and an affiliate; and trueEX LLC, a swap execution facility, which claim to have suffered lost profits as a result of defendants' alleged conspiracy. All interest rate swap actions have been consolidated in a multi-district litigation in the SDNY.

Defendants moved to dismiss the putative class and individual actions, and the SDNY granted in part and denied in part these motions.

On February 20, 2019, class plaintiffs in the consolidated multi-district litigation filed a motion for class certification. On March 20, 2019, class plaintiffs filed a fourth amended consolidated class action complaint. On January 21, 2022, Credit Suisse entered into an agreement to settle all class action claims. The settlement remains subject to court approval. The individual lawsuits are stayed pending a decision on plaintiffs' motion for class certification.

#### **Credit default swaps litigation**

On June 8, 2017, Credit Suisse Group AG and affiliates, along with other financial institutions, were named in a civil action filed in the SDNY by Tera Group, Inc. and related entities (Tera), alleging violations of antitrust law in connection with the allegation that CDS dealers conspired to block Tera's electronic CDS trading platform from successfully entering the market. On July 30, 2019, the SDNY granted in part and denied in part defendants' motion to dismiss. On January 30, 2020, plaintiffs filed an amended complaint. On April 3, 2020, defendants filed a motion to dismiss.

#### **Stock loan litigation**

Credit Suisse Group AG and certain of its affiliates, as well as other financial institutions, were originally named in a number of civil lawsuits in the SDNY, certain of which are brought by class action plaintiffs alleging that the defendants conspired to keep stock-loan trading in an over-the-counter market and collectively boycotted certain trading platforms that sought to enter the market, and certain of which are brought by trading platforms that sought to enter the market alleging that the defendants collectively boycotted the platforms. After the court denied defendants' motion to dismiss the putative class action and plaintiffs filed a motion for class certification, on January 20, 2022, Credit Suisse entered into an agreement to settle all class action claims. On February 25, 2022, the court entered an order granting preliminary approval to the agreement to settle all class action claims. The settlement remains subject to final court approval.

On October 1, 2021, in a consolidated civil litigation brought in the SDNY by entities that developed a trading platform for stock loans that sought to enter the market, alleging that the defendants collectively boycotted the platform, the court granted defendants' motion to dismiss. On October 25, 2021, plaintiffs filed a notice of appeal.

#### **Odd-lot corporate bond litigation**

On April 21, 2020, CSS LLC and other financial institutions were named in a putative class action complaint filed in the SDNY, alleging a conspiracy among the financial institutions to boycott electronic trading platforms and fix prices in the secondary market for odd-lot corporate bonds. On October 25, 2021, the SDNY granted defendants' motion to dismiss. On November 23, 2021, plaintiffs filed a notice of appeal to the Second Circuit. On

March 1, 2022, plaintiffs moved to stay the appeal so that plaintiffs could move to vacate the dismissal of their case after the SDNY judge disclosed a conflict. The motion to stay the appeal was denied on March 15, 2022. On March 30, 2022, because of the conflict, plaintiffs moved in the district court for an indicative ruling vacating the SDNY's decision dismissing the case. The motion for an indicative ruling was denied on November 10, 2022.

#### **ATA litigation**

A lawsuit was filed on November 10, 2014 in the US District Court for the Eastern District of New York (EDNY) against a number of banks, including Credit Suisse AG, alleging claims under the United States Anti-Terrorism Act (ATA). The action alleges a conspiracy between Iran and various international financial institutions, including the defendants, in which they agreed to alter, falsify or omit information from payment messages that involved Iranian parties for the express purpose of concealing the Iranian parties' financial activities and transactions from detection by US authorities. The complaint, brought by approximately 200 plaintiffs, alleges that this conspiracy has made it possible for Iran to transfer funds to Hezbollah and other terrorist organizations actively engaged in harming US military personnel and civilians. On July 12, 2016, plaintiffs filed a second amended complaint in the EDNY against a number of banks, including Credit Suisse AG, alleging claims under the ATA. On September 14, 2016, Credit Suisse AG and the other defendants filed motions to dismiss the plaintiffs' second amended complaint in the EDNY. On September 16, 2019, the EDNY granted defendants' motion to dismiss. On November 26, 2019, plaintiffs filed a notice of appeal. On January 5, 2023, the United States Court of Appeals for the Second Circuit affirmed the decision granting defendants' motion to dismiss.

Another lawsuit was filed on November 9, 2017 in the SDNY against a number of banks, including Credit Suisse AG, alleging claims under the ATA. On March 2, 2018, Credit Suisse AG and other defendants filed motions to dismiss the plaintiffs' complaint. On March 28, 2019, the SDNY granted the motion to dismiss. Plaintiffs cannot appeal the March 28, 2019 decision until the plaintiffs resolve their remaining claims, which remain pending, against an Iranian bank defendant that defaulted. On April 22, 2019, plaintiffs filed a motion for leave to amend their complaint, which the court denied on February 25, 2020, dismissing the case with prejudice as to Credit Suisse AG and the other moving bank defendants. On June 29, 2021, the court denied the plaintiffs' motion to appeal the court's February 25, 2020 decision.

In December 2018 and April 2019, six additional lawsuits were filed in the EDNY or SDNY against a number of banks, including Credit Suisse AG and, in two instances, Credit Suisse AG, New York Branch alleging claims under the ATA and the Justice Against Sponsors of Terrorism Act. These actions similarly allege a conspiracy between Iran and various international financial institutions, including the defendants, in which they agreed to alter, falsify or omit information from payment messages that involved

Iranian parties, and that this conspiracy made it possible for Iran to transfer funds to terrorist organizations actively engaged in harming US military personnel and civilians, and also assert ATA liability on an aiding and abetting theory. On January 6, 2020, defendants filed a motion to dismiss two of the EDNY cases, which the EDNY granted on June 5, 2020, dismissing the cases as to Credit Suisse AG and most of the other bank defendants. Three of the cases have been stayed pending the United States Supreme Court's decision in an unrelated ATA case, and in the remaining cases, the parties have jointly requested a similar stay.

#### **Customer account matters**

Several clients have claimed that a former relationship manager in Switzerland had exceeded his investment authority in the management of their portfolios, resulting in excessive concentrations of certain exposures and investment losses. Credit Suisse AG is investigating the claims, as well as transactions among the clients. Credit Suisse AG filed a criminal complaint against the former relationship manager with the Geneva Prosecutor's Office upon which the prosecutor initiated a criminal investigation. Several clients of the former relationship manager also filed criminal complaints with the Geneva Prosecutor's Office. On February 9, 2018, the former relationship manager was sentenced to five years in prison by the Geneva criminal court for fraud, forgery and criminal mismanagement and ordered to pay damages of approximately USD 130 million. Several parties have appealed the judgement. On June 26, 2019, the Criminal Court of Appeals of Geneva ruled in the appeal of the judgment against the former relationship manager, upholding the main findings of the Geneva criminal court. Several parties have appealed the decision to the Swiss Federal Supreme Court. On February 19, 2020, the Swiss Federal Supreme Court rendered its judgment on the appeals, substantially confirming the findings of the Criminal Court of Appeals of Geneva.

Civil lawsuits were initiated between August 7, 2017 and August 25, 2017 in the High Court of Singapore and the Supreme Court of Bermuda against Credit Suisse AG and/or certain affiliates, based on the findings established in the criminal proceedings against the former relationship manager.

In Singapore, on August 31, 2018, the civil lawsuit was stayed by an Assistant Registrar of the High Court of Singapore and plaintiffs appealed the decision. On January 18, 2019, the Singapore High Court dismissed the plaintiffs' appeal and upheld the Assistant Registrar's decision to stay the civil proceedings in Singapore. On April 29, 2019, the plaintiffs appealed the decision of the Singapore High Court only with respect to their action against Credit Suisse Trust Limited. On June 21, 2019, the plaintiffs discontinued their action against Credit Suisse AG. On July 3, 2020, the Singapore Court of Appeals granted the plaintiffs' appeal against Credit Suisse Trust Limited and lifted the stay of the civil proceedings, allowing the plaintiffs' civil claim

to proceed in the Singapore High Court. On July 10, 2020, plaintiffs filed an amended statement of claim in the Singapore High Court. On March 9, 2021, the Singapore High Court transferred the civil lawsuit to the Singapore International Commercial Court. On May 27, 2022, the Singapore International Commercial Court granted in part and denied in part plaintiff's application filed on March 30, 2022, to amend its statement of claim, allowing amendments that, among other things, introduce new allegations about Credit Suisse Trust Limited's awareness of the former Credit Suisse AG employee's wrongdoing and that certain employees of Credit Suisse AG and/or other Credit Suisse entities allegedly acted on behalf of Credit Suisse Trust Limited in relation to the administration of the trust. On July 1, 2022, Credit Suisse Trust Limited appealed the court's decision with respect to the allowed amendments. The appeal was dismissed on August 11, 2022. Trial took place in September 2022, with closing submissions filed in November 2022 and closing arguments heard in February 2023.

In Bermuda, in the civil lawsuit brought against a Credit Suisse affiliate, trial took place in the Supreme Court of Bermuda in November and December 2021. The Supreme Court of Bermuda issued a first instance judgment on March 29, 2022, finding for the plaintiff. On May 6, 2022, the Supreme Court of Bermuda issued an order awarding damages of USD 607.35 million to the plaintiff. On May 9, 2022, Credit Suisse Life (Bermuda) Ltd. appealed the decision to the Bermuda Court of Appeal. On July 25, 2022, the Supreme Court of Bermuda granted a stay of execution of its judgment pending appeal on the condition that damages awarded were paid into an escrow account within 42 days. Following satisfaction of the required condition, the Supreme Court of Bermuda granted a stay of execution of the judgment pending appeal.

#### **FIFA-related matters**

In connection with investigations by US government authorities into the involvement of financial institutions in the alleged bribery and corruption surrounding the Fédération Internationale de Football Association (FIFA), Credit Suisse received inquiries regarding its banking relationships with certain individuals and entities associated with FIFA, including but not limited to certain persons and entities named and/or described in the May 20, 2015 indictment and the November 25, 2015 superseding indictment filed by the EDNY US Attorney's Office. The investigations encompassed whether multiple financial institutions, including Credit Suisse, permitted the processing of suspicious or otherwise improper transactions, or failed to observe anti-money laundering laws and regulations, with respect to the accounts of certain persons and entities associated with FIFA. Credit Suisse continues to cooperate with US authorities on this matter. As previously disclosed, the Swiss Financial Market Supervisory Authority FINMA (FINMA) announced the conclusion of its related investigation in 2018.

## Israel Desk matters

Credit Suisse has received governmental and regulatory inquiries concerning cross-border services provided by Credit Suisse's Switzerland-based Israel Desk. Credit Suisse is conducting a review of these issues and has been cooperating with the authorities.

## Mozambique matter

Credit Suisse has been subject to investigations by regulatory and enforcement authorities, as well as civil litigation, regarding certain Credit Suisse entities' arrangement of loan financing to Mozambique state enterprises, ProIndicus S.A. and Empresa Mocambiicana de Atum S.A. (EMATUM), a distribution to private investors of loan participation notes (LPN) related to the EMA-TUM financing in September 2013, and certain Credit Suisse entities' subsequent role in arranging the exchange of those LPNs for Eurobonds issued by the Republic of Mozambique. On January 3, 2019, the EDNY unsealed an indictment against several individuals in connection with the matter, including three former Credit Suisse employees. On May 20, 2019, July 19, 2019 and September 6, 2019, the three former employees pleaded guilty to accepting improper personal benefits in connection with financing transactions carried out with two Mozambique state enterprises.

On October 19, 2021, Credit Suisse reached settlements with the DOJ, the US Securities Exchange Commission (SEC), the UK Financial Conduct Authority (FCA) and FINMA to resolve inquiries by these agencies. Credit Suisse Group AG entered into a three-year Deferred Prosecution Agreement (DPA) with the DOJ in connection with the criminal information charging Credit Suisse Group AG with conspiracy to commit wire fraud and consented to the entry of a Cease and Desist Order by the SEC. Under the terms of the DPA, Credit Suisse Group AG will continue its compliance enhancement and remediation efforts, report to the DOJ on those efforts for three years and undertake additional measures as outlined in the DPA. Credit Suisse also agreed to pay a net penalty to the DOJ of approximately USD 175.5 million, which was payable following the conclusion of the sentencing process. If Credit Suisse Group AG adheres to the DPA's conditions, the charges will be dismissed at the end of the DPA's three-year term. In addition, CSSEL entered into a Plea Agreement and pleaded guilty to one count of conspiracy to violate the US federal wire fraud statute. CSSEL will be bound by the same compliance, remediation and reporting obligations as Credit Suisse Group AG under the DPA. Under the terms of the SEC Cease and Desist Order, Credit Suisse paid a civil penalty of USD 65 million and approximately USD 34 million in disgorgement and pre-judgment interest in connection with violations of the US Securities Exchange Act of 1934 (Exchange Act) and the US Securities Act of 1933 (Securities Act) anti-fraud provisions (Exchange Act Section 10(b) and Rule 10b-5 thereunder and Securities Act Sections 17(a)(1), (2) and (3)) as well as the Exchange Act internal accounting controls and books and records provisions (Sections 13(b)(2)(A) and 13(b)(2)(B)). The

total monetary sanctions paid to the DOJ and SEC, taking into account various credits and offsets, was approximately USD 275 million. Under the terms of the resolution with the DOJ, Credit Suisse was required to pay restitution to any eligible investors in the 2016 Eurobonds issued by the Republic of Mozambique. At a July 22, 2022 hearing, the EDNY approved the joint restitution proposal of the DOJ and Credit Suisse, under which Credit Suisse paid USD 22.6 million in restitution to eligible investors. At the hearing Credit Suisse was also ordered to pay, and subsequently paid, the USD 175.6 million net penalty set out in the DPA and Plea Agreement described above.

In the resolution with the FCA, CSSEL, Credit Suisse International (CSI) and Credit Suisse AG, London Branch agreed that, in respect of these transactions with Mozambique, its UK operations had failed to conduct business with due skill, care and diligence and to take reasonable care to organize and control its affairs responsibly and effectively, with adequate risk management systems. Credit Suisse paid a penalty of approximately USD 200 million and has also agreed with the FCA to forgive USD 200 million of debt owed to Credit Suisse by Mozambique.

FINMA also entered a decree announcing the conclusion of its enforcement proceeding, finding that Credit Suisse AG and Credit Suisse (Schweiz) AG violated the duty to file a suspicious activity report in Switzerland, and Credit Suisse Group AG did not adequately manage and address the risks arising from specific sovereign lending and related securities transactions, and ordering the bank to remediate certain deficiencies. FINMA also arranged for certain existing transactions to be reviewed by the same independent third party on the basis of specific risk criteria, and required enhanced disclosure of certain sovereign transactions until all remedial measures have been satisfactorily implemented. Credit Suisse has completed implementation of the measures required under the FINMA decree. An independent third party appointed by FINMA is reviewing the implementation and effectiveness of these measures.

On February 27, 2019, certain Credit Suisse entities, the same three former employees, and several other unrelated entities were sued in the English High Court by the Republic of Mozambique. On January 21, 2020, the Credit Suisse entities filed their defense. On June 26, 2020, the Credit Suisse entities filed third-party claims against the project contractor and several Mozambique officials. The Republic of Mozambique filed an updated Particulars of Claim on October 27, 2020, and the Credit Suisse entities filed their amended defense and counter-claim on January 15, 2021. Following the announcement of the global regulatory resolution on October 19, 2021, Credit Suisse filed a re-amended defense on December 24, 2021. The Republic of Mozambique seeks a declaration that the sovereign guarantee issued in connection with the ProIndicus loan syndication arranged and funded, in part, by a Credit Suisse subsidiary is void and also seeks damages alleged to have arisen in connection with the transactions involving ProIndicus and EMATUM, and a transaction in which Credit Suisse had no involvement with Mozambique Asset Management S.A. Also on January 15, 2021,

the project contractor filed a cross claim against the Credit Suisse entities (as well as the three former Credit Suisse employees and various Mozambican officials) seeking an indemnity and/ or contribution in the event that the contractor is found liable to the Republic of Mozambique. On August 4, 2022, the Republic of Mozambique filed an updated Particulars of Claim addressing Credit Suisse's October 2021 resolutions with various regulatory and enforcement authorities, and framing its claim for consequential damages. On September 23, 2022, Credit Suisse filed its Re-Amended Defense in response. The English High Court has scheduled trial to begin in October 2023.

On April 27, 2020, Banco Internacional de Moçambique (BIM), a member of the ProIndicus syndicate, brought a claim against certain Credit Suisse entities seeking, contingent on the Republic of Mozambique's claim, a declaration that Credit Suisse is liable to compensate it for alleged losses suffered as a result of any invalidity of the sovereign guarantee. The Credit Suisse entities filed their defense to this claim on August 28, 2020, to which BIM replied on October 16, 2020. Credit Suisse filed an amended defense on December 15, 2021, and BIM filed its amended reply on January 5, 2022.

On December 17, 2020, two members of the ProIndicus syndicate, Beauregarde Holdings LLP and Orobica Holdings LLC (B&O), filed a claim against certain Credit Suisse entities in respect of their interests in the ProIndicus loan, seeking unspecified damages stemming from the alleged loss suffered due to their reliance on representations made by Credit Suisse to the syndicate lenders. Credit Suisse filed their defense to this claim on February 24, 2021. On February 4, 2022, B&O filed an amended claim, and Credit Suisse filed an amended defense on February 18, 2022.

On June 3, 2021, United Bank for Africa PLC (UBA), a member of the ProIndicus syndicate, brought a claim against certain Credit Suisse entities seeking, contingent on the Republic of Mozambique's claim, a declaration that Credit Suisse is liable to compensate it for alleged losses suffered as a result of any invalidity of the sovereign guarantee. The Credit Suisse entities filed their defense to this claim on July 1, 2021 and filed an amended defense on December 15, 2021, and UBA filed its amended reply on January 5, 2022.

On February 23, 2022, Prinvest Holding SAL (Prinvest), the parent company of certain entities involved in the Mozambique transactions, and its owner Iskandar Safa brought a defamation claim in a Lebanese court against CSSEL and Credit Suisse Group AG. The lawsuit alleges damage to the claimants' professional reputation in Lebanon due to statements that were allegedly made by Credit Suisse in documents relating to the October 2021 settlements with global regulators. On August 18, 2022, the parties agreed to a stay of the proceedings until the date of the final judicial determination of the English High Court litigation, including any appeals, and on August 23, 2022, the parties filed an application for a stay with the Lebanese Court.

On November 2, 2022, Jean Boustani, a Prinvest employee who was the lead negotiator on behalf of Prinvest in relation to the Mozambique transactions, brought a defamation claim in a Lebanese court against Credit Suisse Group AG and CSSEL. The lawsuit makes substantially the same allegations as the claim described immediately above.

### **Cross-border private banking matters**

Credit Suisse offices in various locations, including the UK, the Netherlands and France, have been contacted by regulatory and law enforcement authorities that are seeking records and information concerning investigations into our historical private banking services on a cross-border basis and in part through our local branches and banks. A similar inquiry has been opened in Belgium. Credit Suisse has conducted a review of these issues, the UK aspects of which have been closed with no action being taken against the bank, and is continuing to cooperate with the authorities. Credit Suisse applies a strict zero tolerance policy on tax evasion.

On October 21, 2022, Credit Suisse AG entered into a settlement agreement with the Parquet National Financier to resolve a French investigation into alleged aiding and abetting of tax fraud, aggravated money laundering and illegal cross border market access. As part of the settlement, Credit Suisse AG agreed to pay a public interest fine of EUR 123 million, comprising EUR 65.6 million in disgorgement of profits and an additional amount of EUR 57.4 million. In addition, Credit Suisse AG agreed to pay EUR 115 million to the French state as damages. In prior quarters, Credit Suisse had taken litigation provisions totaling CHF 159 million related to this matter. On October 24, 2022, the competent French judge approved this agreement. No admission of wrongdoing was required in connection with the agreement, including no recognition of criminal liability by Credit Suisse.

### **ETN-related litigation**

#### **XIV litigation**

Since March 14, 2018, three class action complaints were filed in the SDNY on behalf of a putative class of purchasers of VelocityShares Daily Inverse VIX Short Term Exchange Traded Notes linked to the S&P 500 VIX Short-Term Futures Index due December 4, 2030 (XIV ETNs). On August 20, 2018, plaintiffs filed a consolidated amended class action complaint, naming Credit Suisse Group AG and certain affiliates and executives, which asserts claims for violations of Sections 9(a)(4), 9(f), 10(b) and 20(a) of the Exchange Act and Rule 10b-5 thereunder and Sections 11 and 15 of the US Securities Act of 1933 and alleges that the defendants are responsible for losses to investors following a decline in the value of XIV ETNs on February 5, 2018. Defendants moved to dismiss the amended complaint on November 2, 2018. On September 25, 2019, the SDNY granted defendants' motion to dismiss and dismissed with prejudice all claims against the defendants. On October 18, 2019, plaintiffs filed a notice of appeal. On April 27, 2021, the Second Circuit issued

an order affirming in part and vacating in part the SDNY's September 25, 2019 decision granting defendants' motion to dismiss with prejudice. On July 1, 2022, plaintiffs filed a motion for class certification.

On June 3, 2019, Credit Suisse AG, an affiliate and executives were named in a separate individual action brought in the SDNY by a purchaser of XIV ETNs, which asserts claims similar to those brought in the consolidated class action complaint as well as additional claims under New York and Pennsylvania state law. On March 30, 2022, the SDNY issued an order granting in part and denying in part defendants' motion to dismiss.

### **DGAZ litigation**

On January 6, 2022, Credit Suisse AG was named in a class action complaint filed in the SDNY brought on behalf of a putative class of short sellers of VelocityShares 3x Inverse Natural Gas Exchange Traded Notes linked to the S&P GSCI Natural Gas Index ER due February 9, 2032 (DGAZ ETNs). The complaint asserts claims for violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder and alleges that Credit Suisse is responsible for losses suffered by short sellers following a June 2020 announcement that Credit Suisse would delist and suspend further issuances of the DGAZ ETNs. On July 11, 2022, Credit Suisse AG filed a motion to dismiss.

### **TWINT**

On November 13, 2018, COMCO announced an investigation into several Swiss financial institutions, including UBS Switzerland AG, Credit Suisse (Schweiz) AG, Aduno Holding AG, PostFinance AG, and Swisscard AECS GmbH. According to COMCO, its investigation is focused on whether these institutions entered into an agreement to boycott mobile payment solutions of international providers, including Apple Pay and Samsung Pay, in order to protect TWINT, their own Swiss payment solution.

### **SWM**

CSI was the defendant in a lawsuit brought by the German public utility company Stadtwerke München GmbH (SWM) in a German court, in connection with a series of interest rate swaps entered into between 2008 and 2012. The claimant alleged breach of an advisory duty to provide both investor- and investment-specific advice, including in particular a duty to disclose the initial mark-to-market value of the trades at inception. In March 2022, after the parties reached a settlement, for which Credit Suisse was fully reserved, the court discontinued the lawsuit.

### **Bulgarian former clients matter**

Credit Suisse AG has been responding to an investigation by the Swiss Office of the Attorney General (SOAG) concerning the diligence and controls applied to a historical relationship with Bulgarian former clients who are alleged to have laundered funds through Credit Suisse AG accounts. On December 17, 2020,

the SOAG brought charges against Credit Suisse AG and other parties. Credit Suisse AG believes its diligence and controls complied with applicable legal requirements and intends to defend itself vigorously. The trial in the Swiss Federal Criminal Court took place in the first quarter of 2022. On June 27, 2022, Credit Suisse AG was convicted in the Swiss Federal Criminal Court of certain historical organizational inadequacies in its anti-money laundering framework and ordered to pay a fine of CHF 2 million. In addition, the court seized certain client assets in the amount of approximately CHF 12 million and ordered Credit Suisse AG to pay a compensatory claim in the amount of approximately CHF 19 million. On July 5, 2022, Credit Suisse AG appealed the decision to the Swiss Federal Court of Appeals.

### **SCFF**

Credit Suisse has received requests for documents and information in connection with inquiries, investigations, enforcement and other actions relating to the supply chain finance funds (SCFF) matter by FINMA, the FCA and other regulatory and governmental agencies. The Luxembourg Commission de Surveillance du Secteur Financier is reviewing the matter through a third party. Credit Suisse is cooperating with these authorities.

On February 28, 2023, FINMA announced the conclusion of its enforcement proceedings against Credit Suisse in connection with the SCFF matter. In its order, FINMA reported that Credit Suisse had seriously breached applicable Swiss supervisory laws in this context with regard to risk management and appropriate operational structures. While FINMA recognized that Credit Suisse has already taken extensive organizational measures based on its own investigation into the SCFF matter, particularly to strengthen its governance and control processes, and FINMA is supportive of these measures, the regulator has ordered certain additional remedial measures. These include a requirement that the most important (approximately 500) business relationships must be reviewed periodically and holistically at the Executive Board level, in particular for counterparty risks, and that Credit Suisse must set up a document defining the responsibilities of approximately 600 of its highest-ranking managers. FINMA will appoint an audit officer to assess compliance with these supervisory measures. Separate from the enforcement proceeding regarding Credit Suisse, FINMA has opened four enforcement proceedings against former managers of Credit Suisse.

Certain civil actions have been filed by fund investors and other parties against Credit Suisse and/or certain officers and directors in various jurisdictions, which make allegations including mis-selling and breaches of duties of care, diligence and other fiduciary duties. Certain investors and other private parties have also filed criminal complaints against Credit Suisse and other parties in connection with this matter.

As this matter develops, Credit Suisse may become subject to additional litigation and regulatory inquiries, investigations and actions.

## Archehos

Credit Suisse has received requests for documents and information in connection with inquiries, investigations and/or actions relating to Credit Suisse's relationship with Archehos Capital Management (Archehos), including from FINMA (assisted by a third party appointed by FINMA), the DOJ, the SEC, the US Federal Reserve, the US Commodity Futures Trading Commission (CFTC), the US Senate Banking Committee, the Prudential Regulation Authority, the FCA, COMCO, the Hong Kong Competition Commission and other regulatory and governmental agencies. Credit Suisse is cooperating with the authorities in these matters.

On November 23, 2022, the US Federal Reserve communicated its intention to progress its investigation of Credit Suisse in relation to Archehos through a resolution that includes monetary penalties and certain remedial measures. The resolution of this matter is subject to ongoing dialogue with the US Federal Reserve and other regulators.

On April 16, 2021, Credit Suisse Group AG and certain current and former executives were named in a putative class action complaint filed in the SDNY by a holder of Credit Suisse American Depositary Receipts, asserting claims for violations of Sections 10(b) and 20(a) of the Exchange Act and Rule 10b-5 thereunder, alleging that defendants violated US securities laws by making material misrepresentations and omissions regarding Credit Suisse's risk management practices, including with respect to the Archehos matter. On September 16, 2022, the parties reached an agreement to settle all claims. On December 23, 2022, the court entered an order granting preliminary approval to the parties' agreement to settle all claims. The settlement remains subject to final court approval.

Additional civil actions relating to Credit Suisse's relationship with Archehos have been filed against Credit Suisse and/or certain officers and directors, including claims for breaches of fiduciary duties.

As this matter develops, Credit Suisse may become subject to additional litigation and regulatory inquiries, investigations, and actions.

## Communications recordkeeping matter

On September 27, 2022, the SEC and the CFTC announced the entry of orders filing and settling charges with several financial institutions, including Credit Suisse, in connection with civil investigations concerning compliance with records preservation requirements relating to business communications sent over unapproved electronic messaging channels. The SEC found that CSS LLC failed to maintain and preserve off-channel communications its employees sent and received on personal devices related to the broker-dealer's business and failed to implement policies and procedures designed to prohibit such communications, thereby leading to CSS LLC's failure to reasonably supervise its employees. CSS LLC paid a civil monetary penalty of USD 125 million to the SEC. The CFTC found similar record-keeping and supervisory failures for CSS LLC, as a futures commission merchant, and CSI, as a swap dealer. CSS LLC and CSI paid a combined civil monetary penalty of USD 75 million to the CFTC. In addition to the monetary penalties, Credit Suisse was ordered to cease and desist from future violations of the relevant recordkeeping provisions, was censured, admitted to the facts in the SEC and CFTC orders and agreed to certain undertakings, including, among other things, the use of an independent compliance consultant to review the bank's policies and procedures relating to the retention of electronic communications found on personal devices and the related framework for addressing non-compliance by employees.

---

## 41 Significant subsidiaries and equity method investments

The entities presented in the table below generally include subsidiaries with total assets over CHF 100 million or net income attributable to shareholders over CHF 10 million. Also included are entities which are deemed regionally significant or otherwise relevant from an operational perspective.

The Group and the Bank have issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities, which as of December 31, 2022 consisted of a single outstanding issuance with a balance of USD 742 million maturing in July 2032.

## 43 Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)

The Group's consolidated financial statements have been prepared in accordance with US GAAP.

FINMA requires Swiss-domiciled banks which present their financial statements under either US GAAP or International Financial Reporting Standards (IFRS) to provide a narrative explanation of the major differences between Swiss GAAP banking law (true and fair view) and its primary accounting standard.

The principal provisions of the Swiss Ordinance on Banks and Savings Banks (Banking Ordinance), the Swiss Financial Market Supervisory Authority's Accounting Ordinance (FINMA Accounting Ordinance) and the FINMA circular 2020/1, "Accounting – banks", governing financial reporting for banks (Swiss GAAP) differ in certain aspects from US GAAP. The following are the major differences:

> Refer to "Note 1 – Summary of significant accounting policies" for a detailed description of the Group's accounting policies.

### Scope of consolidation

Under Swiss GAAP, majority-owned subsidiaries that are not considered long-term investments or do not operate in the core business of the Group are either accounted for as financial investments or as equity method investments. US GAAP has no such exception relating to the consolidation of majority-owned subsidiaries.

### Investments in securities

Under Swiss GAAP, classification and measurement of investments in securities depends on the nature of the investment.

### Non-consolidated participations

Under US GAAP, equity securities where the company has no significant influence and which do not have a readily determinable fair value are measured in accordance with the NAV practical expedient, or by using the measurement alternative or at fair value.

Under Swiss GAAP, investments in equity securities where the company has no significant influence and which are held with the intention of a permanent investment or which are investments in financial industry infrastructure are included in participations irrespective of the percentage ownership of voting shares held. Participations are initially recognized at historical cost and tested for impairment at least annually. The fair value option is not allowed for participations.

Under Swiss GAAP, participations held by a company are tested for impairment on the level of each individual participation. An impairment is recorded if the carrying value of a participation exceeds its fair value. Should the fair value of an impaired participation recover in subsequent periods and such recovery is considered sustainable, the impairment from prior periods can be reversed up to the fair value but not exceeding the historical cost basis. A reversal of an impairment is recorded as extraordinary income in the statements of income.

#### **Available-for-sale debt securities**

Under US GAAP, available-for-sale debt securities are valued at fair value. Unrealized gains and losses due to fluctuations in fair value (including foreign exchange) are not recorded in the consolidated statements of operations but included net of tax in AOCI, which is part of total shareholders' equity. Credit-related impairments may have to be recognized in the consolidated statements of operations if the fair value of an individual debt security decreases below its amortized cost basis due to credit-related factors.

Under Swiss GAAP, available-for-sale securities are accounted for at the lower of amortized cost or market with valuation reductions and recoveries due to market fluctuations recorded in other ordinary expenses and income, respectively. Foreign exchange gains and losses are recognized in net income/(loss) from trading activities and fair value option.

#### **Non-marketable equity securities**

Under US GAAP, equity securities which do not have a readily determinable fair value are measured in accordance with the NAV practical expedient, or by using the measurement alternative or at fair value.

Under Swiss GAAP, non-marketable equity securities where the company has no intent to hold the securities permanently are carried at the lower of cost or market.

#### **Allowances and provisions for credit losses**

Under US GAAP, allowances and provisions for credit losses on financial instruments are estimated based on a CECL model. The credit loss requirements apply to financial assets measured at amortized cost as well as off-balance sheet credit exposures, such as irrevocable loan commitments, credit guarantees and similar instruments. The credit loss requirements are based on a forward-looking, lifetime CECL model by incorporating historical experience, current conditions and reasonable and supportable forecasts of future economic conditions available as of the reporting date.

Under Swiss GAAP, the same impairment model and methodology is applied as under US GAAP. Differences between the two GAAPs result for items which are not measured at amortized cost under US GAAP and therefore not in scope of CECL under US GAAP, but that have to be measured at amortized cost under Swiss GAAP and are therefore in scope of CECL under Swiss GAAP. Such differences in CECL measurement mainly result from loans, irrevocable loan commitments and financial guarantees which are FVO elected under US GAAP and measured at amortized cost under Swiss GAAP.

#### **Fair value option**

Unlike US GAAP, Swiss GAAP generally does not allow the fair value option concept that creates an optional alternative measurement treatment for certain non-trading financial assets and liabilities, guarantees and commitments. The fair value option permits the use of fair value for initial and subsequent measurement with changes in fair value recorded in the consolidated statements of operations.

For issued structured products that meet certain conditions, fair value measurement can be applied. The related changes in fair value of both the embedded derivative and the host contract are recorded in trading revenues, except for fair value adjustments relating to own credit that cannot be recognized in the consolidated statements of income. Impacts of changes in own credit spreads are recognized in the compensation accounts which are either recorded in other assets or other liabilities.

#### **Derivative financial instruments used for fair value hedging**

Under US GAAP, for fair value hedges, the carrying value of the underlying hedged items is adjusted to the change in the fair value of the hedged risk. Changes in the fair value of the related designated derivatives are recorded in the same line item of the consolidated statements of operations as the change in fair value of the hedged risk for the respective assets or liabilities.

Under Swiss GAAP, the carrying value of hedged items is not adjusted. The amount representing the change in fair value of the hedged item with regard to the hedged risk is recorded in the compensation account included in other assets or other liabilities.

#### **Derivative financial instruments used for cash flow hedging**

Under US GAAP, the change in the fair value of a designated derivative of a cash flow hedge is reported in AOCI.

Under Swiss GAAP, the change in the fair value of a designated derivative of a cash flow hedge is recorded in the compensation account included in other assets or other liabilities.

### **Derecognition of financial instruments**

Under US GAAP, financial instruments are only derecognized if the transaction meets the following criteria: (i) the financial asset has been legally isolated from the transferor, (ii) the transferee has the right to repledge or resell the transferred asset, and (iii) the transferor does not maintain effective control over the transferred asset.

Under Swiss GAAP, a financial instrument is derecognized when the economic control has been transferred from the seller to the buyer. A party which has the controlling ability to receive the future returns from the financial instrument and the obligation to absorb the risk of the financial instrument is deemed to have economic control over a financial instrument.

### **Debt issuance costs**

Under US GAAP, debt issuance costs are presented as a direct deduction from the carrying amount of the related debt.

Under Swiss GAAP, debt issuance costs are reported as a balance sheet asset in accrued income and prepaid expenses.

### **Operating leases – lessee arrangements**

Under US GAAP, at commencement of an operating lease, the lessee recognizes a lease liability for future lease payments and a right-of-use asset which reflects the future benefits from the lease contract. The initial lease liability equals the present value of the future lease payments; amounts paid upfront are not included. The right-of-use asset equals the sum of the initial lease liability, initial direct costs and prepaid lease payments, with lease incentives received deducted. Operating lease costs, which include amortization and an interest component, are recognized over the remaining lease term on a straight-line basis. If the reporting entity permanently vacates premises and sub-leases a leased asset to another party at a loss, an impairment is recognized on the right-of-use asset. The impairment is determined as the difference between the carrying value of the right-of-use asset and the present value of the expected sub-lease income over the sub-lease term.

Under Swiss GAAP, at commencement of an operating lease, no right-of-use assets and lease liabilities are recognized on the balance sheet of the lessee. For the calculation of the periodic lease expenses, initial direct costs, lease incentives and prepaid lease payments are considered and the total cost of a lease contract is expensed on a straight-line basis over the lease term. If the reporting entity permanently vacates premises, a provision for future payments under the lease contract is recorded, net of expected sub-lease income.

### **Goodwill amortization**

Under US GAAP, goodwill is not amortized but must be tested for impairment annually or more frequently if an event or change in circumstances indicates that the goodwill may be impaired.

Under Swiss GAAP, goodwill is amortized over its useful life, generally not exceeding five years, except for justified cases where a maximum useful life of up to ten years is acceptable. In addition, goodwill is tested at least annually for impairment.

### **Amortization of intangible assets**

Under US GAAP, intangible assets with indefinite lives are not amortized but are tested for impairment annually or more frequently if an event or change in circumstances indicates that the asset may be impaired.

Under Swiss GAAP, intangible assets are amortized over a useful life, up to a maximum of five years, in justified cases up to a maximum of ten years. In addition, these assets are tested at least annually for impairment.

### **Guarantees**

US GAAP requires all guarantees to be initially recognized at fair value. Upon issuance of a guarantee, the guarantor is required to recognize a liability that reflects the initial fair value; simultaneously, a receivable is recorded to reflect the future guarantee fee income over the entire life of the guarantee.

Under Swiss GAAP, only accrued or prepaid guarantee fees are recorded on the balance sheet. No guarantee liability and receivable for future guarantee fees are recorded upon issuance of a guarantee.

### **Loan origination fees and costs**

US GAAP requires the deferral of fees received upfront and direct costs incurred in connection with the origination of loans not held under the fair value option.

Under Swiss GAAP, only upfront payments or fees that are considered interest-related components are deferred (e.g., premiums and discounts). Fees received from the borrower which are considered service-related fees such as commitment fees, structuring fees and arrangement fees are immediately recognized in commission income.

### **Extraordinary income and expenses**

Unlike US GAAP, Swiss GAAP does report certain expenses or revenues as extraordinary if the recorded income or expense is non-operating and non-recurring.

### **Pensions and post-retirement benefits**

Under US GAAP, the liability and related pension expense is determined based on the projected unit credit actuarial calculation of the benefit obligation.

Under Swiss GAAP, the liability and related pension expense is primarily determined based on the pension plan valuation in accordance with Swiss GAAP FER 26. A pension asset is recorded if a statutory overfunding of a pension plan leads to a future economic benefit, and a pension liability is recorded if a statutory underfunding of a pension plan leads to a future economic obligation. Employer contribution reserves must be capitalized if they represent a future economic benefit. A future economic benefit exists if the employer can reduce its future statutory annual contribution to the pension plan by releasing employer contribution reserves. Pension expenses include the required contributions defined by Swiss law, any additional contribution mandated by the pension fund trustees and any change in value of the pension asset or liability between two measurement dates as determined on the basis of the annual year-end pension plan valuation.

#### **Discontinued operations**

Under US GAAP, the assets and liabilities of a discontinued operation are separated from the ordinary captions of the consolidated balance sheets and are reported as discontinued operations measured at the lower of the carrying value or fair value less cost to sell. Accordingly, income and expense from discontinued operations are reported in a separate line item of the consolidated statements of operations.

Under Swiss GAAP, these positions remain in their initial balance sheet captions until disposed of and continue to be valued according to the respective captions.

#### **Security collateral received in securities lending transactions**

Under US GAAP, security collateral received in securities lending transactions with the right to sell or repledge are recorded

as assets and a corresponding liability to return the collateral is recognized.

Under Swiss GAAP, security collateral received and the obligation to return collateral of securities lending transactions are not recognized on the balance sheet.

#### **Digital assets held in custody**

Under US GAAP, an entity records a liability on its balance sheet for its obligation to safeguard digital assets held as a custodian for its clients, and a corresponding safeguarding asset.

Under Swiss GAAP, the recording of a safeguarding liability and a safeguarding asset for digital assets held as a custodian for its clients is not required.

#### **Loan commitments**

Under US GAAP, loan commitments include all commitments to extend loans, unfunded commitments under commercial lines of credit, revolving credit lines, credit guarantees in the future and overdraft protection agreements, except for commitments that can be revoked by the Group at any time at the Group's sole discretion without prior notice.

Under Swiss GAAP, loan commitments include all commitments to extend loans, unfunded commitments under commercial lines of credit, revolving credit lines, credit guarantees in the future and overdraft protection agreements, except for commitments that can be revoked by the Group at any time at the Group's sole discretion with a notice period not exceeding six weeks.

**1 General information, business developments and subsequent events**

**Company details**

Credit Suisse Group AG is a Swiss holding company incorporated as a joint stock corporation (public limited company) with its registered office in Zurich, Switzerland. The financial statements of Credit Suisse Group AG are prepared in accordance with the regulations of the Swiss Code of Obligations and are stated in Swiss francs (CHF). The financial year ends on December 31.

Credit Suisse Group AG issues high-trigger and low-trigger tier 1 capital notes as well as senior unsecured notes, which qualify as total loss-absorbing capacity (TLAC). The proceeds from such issuances are generally used to acquire internal notes issued by Credit Suisse AG which substantially mirror the terms of the notes issued by Credit Suisse Group AG.

**Number of employees**

The annual average number of employees (full-time equivalents) for the current year exceeded 50 but did not exceed 250. In the previous year the average number of employees did not exceed 50.

**Business developments**

**Strategic review**

On October 27, 2022, Credit Suisse Group AG announced a series of decisive actions following a strategic review conducted by the Board of Directors and Executive Board, focused on a restructuring of the Investment Bank, an accelerated cost transformation, and strengthened and reallocated capital.

**Internal control over financial reporting**

The Credit Suisse Group AG's Board of Directors is responsible for establishing and maintaining adequate internal control over financial reporting which is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Swiss law. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Board of Directors has made an evaluation and assessment of the internal control over financial reporting as of December 31, 2022. Based upon its review and evaluation, the Board of Directors has concluded that, as of December 31, 2022, the Credit

Suisse Group AG's internal control over financial reporting was not effective as it did not design and maintain an effective risk assessment process to identify and analyze the risk of material misstatements in its financial statements. This material weakness could result in misstatements of account balances or disclosures that would result in a material misstatement to the annual financial statements that would not be prevented or detected.

As a consequence, the statutory auditor PricewaterhouseCoopers AG (PwC) has issued a qualified opinion on the existence of an internal control designed for the preparation of the financial statements as of December 31, 2022.

Notwithstanding the existence of that material weaknesses in internal control over financial reporting, the Credit Suisse Group AG confirms that its financial statements as at December 31, 2022 comply with Swiss law as reflected in PwC's report on those financial statements.

The Credit Suisse Group AG's Board of Directors and the Executive Board have worked continuously in recent years to improve the control environment surrounding financial reporting with increased investment and additional resources and are committed to maintaining a strong internal control environment and implementing measures designed to help ensure that the material weaknesses are remediated with the highest priority. The Credit Suisse Group AG's Board of Directors and the Executive Board are developing a remediation plan to address the material weakness referred to above, including strengthening the risk and control framework, and which will build on the significant attention that management has devoted to controls to date.

Other than as described above, there were no changes in the Credit Suisse Group AG's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Credit Suisse Group AG's internal controls over financial reporting.

**Valuation of participations**

The carrying value of Credit Suisse Group AG's participations in subsidiaries is reviewed for potential impairment on at least an annual basis as of December 31 and at any other time that events or circumstances indicate that the participations' value may be impaired. Such events and circumstances during the year, which included increased interest rates, the deterioration of the economic environment, the comprehensive strategic review announced on October 27, 2022, significant deposit and net asset outflows in the fourth quarter as well as the related liquidity issues, were considered triggering events and required reviews of the participations' value. Based on the reviews performed,

Credit Suisse Group AG recorded total participation impairments of CHF 24.5 billion, primarily relating to Credit Suisse AG, for the year 2022.

### **Capital increase**

On November 23, 2022, Credit Suisse Group AG held an Extraordinary General Meeting, at which shareholders approved two capital increases. Credit Suisse Group AG completed the first capital increase on November 25, 2022 by way of a share placement of 462,041,884 newly issued shares to qualified investors resulting in gross proceeds of CHF 1.76 billion. Credit Suisse Group AG completed the second capital increase by way of a rights offering on December 9, 2022. By the end of the rights exercise period, 98.2% of the rights had been exercised for the issuance of 872,989,594 shares. The remaining 16,378,864 newly issued shares for which rights were not exercised were sold in the market. The rights offering resulted in gross proceeds of CHF 2.25 billion. The capital increases resulted in 1,351,410,342 newly issued shares and gross proceeds for Credit Suisse Group AG of CHF 4.0 billion. Credit Suisse Group AG made capital contributions of CHF 3.89 billion to its wholly-owned subsidiary Credit Suisse AG.

### **Sale of CS Trust business**

On September 6, 2022, the Group signed separate agreements with The Bank of N.T. Butterfield & Son Limited (Butterfield) and Gasser Partner Trust reg. (Gasser Partner) for the sale of its global trust business (Credit Suisse Trust, CST), while CST entities will continue to operate with a limited number of clients. Under separate agreements, Butterfield will acquire CST's businesses based in Guernsey, Singapore, and The Bahamas, while Gasser Partner will acquire CST's Liechtenstein business. The transaction with Butterfield is expected to close in 2023 and is subject to customary conditions. The transfer of a majority of the trust structures in Liechtenstein occurred on February 28, 2023, with the expectation that a small number of remaining trust structures will transfer on a rolling basis in the first half of 2023.

### **Subsequent events**

#### **Securitized Products Group**

On November 15, 2022, Credit Suisse announced that it had entered into definitive transaction agreements to sell a significant part of its Securitized Products Group (SPG) to entities and funds managed by affiliates of Apollo Global Management. This transaction involves phased closings through the first half of 2023 and represents an important step towards a managed exit from the SPG business and to de-risk the bank. On February 7, 2023, the parties completed the first closing of such transaction and the majority of the assets and professionals associated with the transaction are now part of or managed by ATLAS SP Partners, a new standalone credit firm focused on asset-backed financing and capital markets solutions. On February 23, 2023, the parties completed the second closing of such transaction, with further assets transferred.

#### **CS First Boston**

On February 9, 2023, Credit Suisse announced the acquisition of The Klein Group LLC, the investment banking business as well as the registered broker-dealer of M. Klein & Company LLC (the seller). The purchase price is USD 175 million. To align interests with Credit Suisse, the seller will receive a convertible note and a warrant. The note will provide annual payments and convert into, and the warrant entitles the seller to subscribe to, CS First Boston shares at a qualified initial public offering or other liquidity event, at the then-valuation of CS First Boston, less a customary discount. The principal amount of the convertible note is expected to be USD 100 million, with the balance being paid in cash dependent on the amount of taxes to be paid by the seller at closing. The net present value of the transaction to Credit Suisse is expected to be approximately USD 210 million, which also includes interest cost, annual payments on the note and other payments that may in the future become payable in respect of this transaction. The transaction is expected to close in the first half of 2023.

---

## **2 Accounting and valuation principles**

These financial statements were prepared in accordance with the provisions of the Swiss Law on Accounting and Financial Reporting (32nd title of the Swiss Code of Obligations).

### **Cash and cash equivalents**

Cash and cash equivalents are carried at nominal value.

### **Derivatives held for hedging purposes**

#### **Interest rate swaps**

Credit Suisse Group AG entered into hedging transactions to hedge interest rate risk exposures from fixed rate liabilities with fixed receiver interest rate swaps with equivalent notionals and

maturities. These hedging relationships are considered to be highly effective over the entire lifetime of the hedge. The hedging instruments follow the accounting treatment of the underlying assets and liabilities, i.e. the accrued net interest and the unamortized day one payments are recognized on the balance sheet as "Accrued income and prepaid expenses" and as "Accrued expenses and deferred income", respectively. The interest and the amortization of the day one payments on the interest rate swaps are recorded as financial expenses in the statement of income. The interest rate swaps were initially recorded at cost. Subsequently, no replacement values and no valuation changes, i.e., change of clean replacement values, are recorded on the balance sheet and in the statement of income of the company.

### **Cross-currency basis swaps**

Credit Suisse Group AG uses cross-currency basis swaps to hedge the foreign currency risk resulting from mismatches between assets and liabilities denominated in non-functional currencies. The cross-currency basis swaps have a notional equivalent to the respective asset and liability currency mismatch. These hedging relationships are considered to be highly effective over the entire lifetime of the hedge and are adjusted as exposure changes to ensure the hedges remain effective. The hedging instruments follow the accounting treatment of the underlying risk hedged. The change of fair value due to change in foreign exchange rates is reflected in other financial income or financial expenses and off-sets with the foreign currency remeasurement effects of the hedged foreign currency exposure. The interest is recorded as financial expenses. The change in fair value due to change in foreign exchange rates and the accrued interest of the cross-currency basis swaps are recognized on the balance sheet as “Accrued income and prepaid expenses” and as “Accrued expenses and deferred income”. The cross-currency basis swaps were initially recorded at cost. Subsequently, no replacement values and no valuation changes due to changes in interest rates, i.e., change of clean replacement values related to interest, are recorded on the balance sheet and in the statement of income of the company.

### **Financial investments**

Financial investments include debt securities with a remaining maturity of more than 12 months after the balance sheet date. These securities are carried at cost. No valuation adjustments or impairment losses were required.

### **Participations**

Participations are valued at historical cost less impairment. For the purpose of impairment testing, with a clearly defined sub-portfolio of economically closely related participations, the portfolio valuation method is applied. Impairment is assessed at each balance sheet date or at any point in time when facts and circumstances would indicate that an event has occurred which triggers an impairment review. The amount of impairment, if any, is assessed on the level of this sub-portfolio and not individually for each participation. All other participations are valued individually.

## **418 Parent company financial statements – Credit Suisse Group**

An impairment is recorded if the carrying value exceeds the fair value of the participation sub-portfolio. If the fair value of participations recovers significantly and is considered sustainable, a prior period impairment can be reversed up to the historical cost value of the participations.

### **Intangible assets**

Intangible assets are amortized over a period of five years. Intangible assets are tested for impairment annually, or more frequently if events or changes in circumstances indicate that the intangible assets may be impaired.

### **Interest-bearing liabilities**

Short-term and long-term interest-bearing liabilities are carried at nominal value. Issuance costs and discounts are recognized as prepaid expenses and are amortized on a straight-line basis over the contractual term of the notes. Premiums are recognized as accrued expenses and are amortized on a straight-line basis over the contractual term of the notes.

### **Treasury shares**

Own shares are recorded at cost and reported as treasury shares, resulting in a reduction to total shareholders' equity. Realized gains and losses on the sale of own shares are recognized through the statement of income as other financial income or financial expenses.

### **Revenue recognition**

Revenues are recognized when they are realized or realizable, and are earned. Dividend income is recorded in the reporting period in which the dividend is declared.

### **Foreign currency translations**

Assets and liabilities denominated in foreign currencies are translated into Swiss francs at the exchange rates prevailing at year-end, with the exception of non-monetary assets and liabilities, which are maintained in Swiss francs at historical exchange rates. All currency translation effects are recognized in other financial income or financial expenses.

Due to banks	2,303	7,312
<b>Short-term interest-bearing liabilities</b>	<b>12,293</b>	<b>12,190</b>

#### 16 Long-term interest-bearing liabilities

The high-trigger and low-trigger tier 1 capital notes issued by Credit Suisse Group AG are perpetual securities and have no fixed or final maturity date. Subject to the satisfaction of certain conditions, they may be redeemed, at the option of the issuer, on the first call date or as specified thereafter in the terms of the note.

The high-trigger tier 1 capital notes mandatorily are permanently written down to zero, as provided in the terms of the respective instrument, upon the occurrence of certain specified triggering events. These events include the Group's consolidated common equity tier 1 (CET1) ratio falling below 7%, or a determination by the Swiss Financial Market Supervisory Authority FINMA (FINMA) that write-down is necessary, or that Credit Suisse Group AG requires extraordinary public sector capital support, to prevent Credit Suisse Group AG from becoming insolvent, bankrupt or unable to pay a material amount of its debt, or other similar circumstances. Write-down can only be prevented if FINMA, at Credit Suisse Group AG's request, is satisfied that certain conditions exist and determines that a write-down is not required. High-trigger instruments are designed to absorb losses before other capital instruments, including the low-trigger capital instruments.

The low-trigger tier 1 capital notes have a write-down feature, which means that interest on the notes shall cease to accrue and the full principal amount of the notes will be permanently written down to zero upon the occurrence of certain specified triggering events, also called write-down events. A write-down event will occur if the sum of the Group's consolidated CET1 ratio and

#### 15 Accrued expenses and deferred income

end of	2022	2021
<b>Accrued expenses and deferred income (CHF million)</b>		
Accrued interest expense	891	679
Deferred fees on debt securities	220	200
Derivatives held for hedging purposes	98	6
Unamortized discount on debt securities	36	24
Accrued personnel and other operating expenses	29	61
Unamortized premium on notes issued	11	17
Other	2	1
<b>Accrued expenses and deferred income</b>	<b>1,287</b>	<b>988</b>

the Higher Trigger Capital Ratio (i.e., the ratio of Higher Trigger Capital Amount to the aggregate of all risk-weighted assets of the Group) as of any quarterly balance sheet date or interim capital report date is below 5.125%. A write-down event will also occur if FINMA determines that a write-down of the notes is necessary, or that Credit Suisse Group AG requires extraordinary public sector capital support to prevent Credit Suisse Group AG from becoming insolvent, bankrupt or unable to pay a material part of its debts, or other similar circumstances. Write-down can only be prevented if FINMA, at the Group's request, is satisfied that certain conditions exist and determines that a conversion or write-down is not required.

In addition to the high-trigger and low-trigger tier 1 capital notes, Credit Suisse Group AG has issued senior unsecured notes, which qualify as TLAC. The senior unsecured notes have a fixed maturity date and can be redeemed, at the option of the issuer, at a call date, if specified in the applicable terms and conditions. The senior unsecured notes are bail-in debt instruments that are designed to absorb losses after the cancellation of Credit Suisse Group AG's equity instruments and after the write-down or conversion into equity of regulatory capital (including high-trigger and low-trigger tier 1 capital notes) in restructuring proceedings with respect to Credit Suisse Group AG. Bail-in debt instruments do not feature capital triggers that may lead to a write-down and/or a conversion into equity outside of restructuring, but only begin to bear losses once Credit Suisse Group AG is formally in restructuring proceedings and FINMA orders capital measures (i.e., a write-down and/or a conversion into equity) in the restructuring plan.

<b>Balance as of December 31, 2021</b>		<u>775</u>	<u>74,743,509</u>	<u>10.36</u>

2022: Highest price CHF 9.54, paid on January 14 and lowest price CHF 3.44 paid on November 25 in a market transaction.

2021: Highest price CHF 13.02, paid on March 10 and lowest price CHF 8.44 paid on December 20 in a market transaction.

<sup>1</sup> Representing share award settlements.

## 20 Significant shareholders

end of	2022			2021		
	Number of shares (million)	Total nominal value (CHF million)	Share- holding (%)	Number of shares (million)	Total nominal value (CHF million)	Share- holding (%)
<b>Direct shareholders <sup>1</sup></b>						
Chase Nominees Ltd. <sup>2</sup>	433	17	10.83	304	12	11.48
Nortrust Nominees Ltd. <sup>2</sup>	217	9	5.43	197	8	7.42
The Bank of New York Mellon <sup>2</sup>	213	9	5.31	139	6	5.25

<sup>1</sup> As registered in the share register of the Group on December 31 of the reporting period; includes shareholders registered as nominees.

<sup>2</sup> Nominee holdings exceeding 2% are registered with a right to vote only if the nominee confirms that no individual shareholder holds more than 0.5% of the outstanding share capital or if the nominee discloses the identity of any beneficial owner holding more than 0.5% of the outstanding capital.

• Refer to "Note 3 – Business developments, significant shareholders and subsequent events" in VI – Consolidated financial statements – Credit Suisse Group for information received from shareholders not registered in the share register of Credit Suisse Group AG.

## 21 Assets subject to retention of title

As of December 31, 2022 and 2021, cash and cash equivalents in the amount of CHF 5 million were held in an escrow account.

## 424 Parent company financial statements – Credit Suisse Group

## 22 Contingent liabilities

As of December 31, 2022 and 2021, aggregate indemnity liabilities, guarantees and other contingent liabilities (net of exposures recorded as liabilities) were CHF 812 million and CHF 5,897 million, respectively. Credit Suisse Group AG has entered into these contingent liabilities on behalf of its subsidiaries.

Contingent liabilities include guarantees for obligations, performance-related guarantees and letters of comfort. Contingencies with a stated amount are included in the above reported amounts. In some instances, however, the amount of exposure of Credit Suisse Group AG is not specified but relates to specific circumstances such as the solvency of subsidiaries, and therefore no amount is included in the above figures.

### Value-added tax

The company belongs to the Swiss value-added tax group of Credit Suisse Group, and thus carries joint liability to the Swiss federal tax authority for value-added tax debts of the entire Group. As of December 31, 2022 and 2021, Credit Suisse Group AG has not recorded any contingent liabilities with regard to value-added tax.

## 23 Assets and liabilities with related parties

end of	2022	2021
<b>Assets (CHF million)</b>		
Cash and cash equivalents	2,083	5,955
Other short-term receivables	10,174	5,211
Accrued income and prepaid expenses	829	667
<b>Total current assets – related parties</b>	<b>13,086</b>	<b>11,833</b>
Financial investments	56,573	50,167
Participations	29,838	50,254
<b>Total noncurrent assets – related parties</b>	<b>86,411</b>	<b>100,421</b>
<b>Total assets – related parties</b>	<b>99,497</b>	<b>112,254</b>
<b>Liabilities (CHF million)</b>		
Short-term interest-bearing liabilities	2,303	7,312
Other short-term liabilities	27	7
Accrued expenses and deferred income <sup>1</sup>	357	248
<b>Total short-term liabilities – related parties</b>	<b>2,687</b>	<b>7,567</b>
<b>Total liabilities – related parties</b>	<b>2,687</b>	<b>7,567</b>

The assets and liabilities represent the amounts due from and due to group companies, except where indicated.

<sup>1</sup> Included amounts due to management bodies of CHF 3 million at December 31, 2022 and CHF 17 million at December 31, 2021, respectively.

## Swiss pension plan

The employees of Credit Suisse Group AG are covered by the pension plan of the “Pensionskasse der Credit Suisse Group (Schweiz)” (the Swiss pension plan). Most of the Swiss subsidiaries of Credit Suisse Group AG and a few companies that have close business and financial ties with Credit Suisse Group AG participate in this plan. The Swiss pension plan is an independent self-insured pension plan set up as a trust and qualifies as a defined contribution plan (savings plan) under Swiss law.

The Swiss pension plan’s annual financial statements are prepared in accordance with Swiss GAAP FER 26 based on the full population of covered employees. Individual annual financial statements for each participating company are not prepared. As a multi-employer plan with unrestricted joint liability for all participating companies, the economic interest in the Swiss pension plan’s over- or underfunding is allocated to each participating company based on an allocation key determined by the plan. As of December 31, 2022 and 2021, Credit Suisse Group AG has not recorded any contingent liabilities with regard to the Swiss pension plan.

## 24 Subordinated assets and liabilities

end of	2022	2021
<b>Subordinated assets and liabilities (CHF million)</b>		
Subordinated assets	66,463	55,706
Subordinated liabilities	16,244	15,971

Includes accrued interest.

Group-internal funding related to loss-absorbing instruments has been aligned to international standards for internal TLAC instruments and to article 126b of the Swiss Capital Adequacy Ordinance, effective January 1, 2020. Due to this alignment, the bail-in debt instruments issued by Credit Suisse AG to Credit Suisse Group AG are permanently subordinated.

## 25 Shareholdings

### Executive Board shareholdings

The shareholdings of the Executive Board members, their immediate family and companies in which they have a controlling

interest as well as the value of the unvested share-based compensation awards held by Executive Board members as of December 31, 2022 and 2021, are disclosed in the table below.

### Executive Board holdings and values of deferred share-based awards by individual

**1** Includes shares that were initially granted as deferred compensation and have vested.

**2** For 2022, includes unvested shares originating from LTI awards based on performance payout achieved at the end of the applicable three year performance period. For 2021, includes unvested shares originating from LTI opportunities calculated on the basis of maximum opportunity for awards that have not reached the end of their three-year performance period, given that the actual achievement level and associated number of unvested shares cannot be determined until the end of the performance period. For LTI awards that have reached the end of their three-year performance period, the number of unvested shares reflects the actual number of shares earned based on achievement of the performance target levels.

**3** Determined based on the number of unvested awards multiplied by the share price at grant.

**4** For 2022, includes the value of unvested LTI opportunities based on performance payout achieved at the end of the applicable three year performance period. For 2021, includes the value of unvested LTI opportunities. For LTI awards that have reached the end of their three-year performance period, the value is based on the actual number of shares eligible to vest. For LTI opportunities that have not reached the end of their three-year performance period, this is determined based on the number of shares at fair value at the time of grant, multiplied by the share price at the end of the year.

## 426 Parent company financial statements – Credit Suisse Group

## Board of Directors shareholdings

The shareholdings of the Board of Directors members, their immediate family and companies in which they have a controlling interest are disclosed in the following table. As of December 31, 2022 and 2021, there were no Board of Directors members with outstanding options.

## Board of Directors shareholdings by individual

end of	2022	2021
<b>December 31 (shares) <sup>1</sup></b>		
Axel Lehmann	568,066	108,220
Mirko Bianchi <sup>2</sup>	21,676	—

## Controls and procedures

### Evaluation of disclosure controls and procedures

The Bank has evaluated the effectiveness of its disclosure controls and procedures as of the end of the period covered by this report under the supervision and with the participation of management, including the Bank Chief Executive Officer (CEO) and Chief Financial Officer (CFO), pursuant to Rule 13(a)-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). The Bank identified certain material weaknesses in internal control over financial reporting as of December 31, 2021 and, consequently, December 31, 2022, which are described below. As a result of these material weaknesses, the Bank CEO and CFO have concluded that, as of December 31, 2022, the Bank's disclosure controls and procedures were not effective.

Notwithstanding the existence of these material weaknesses in internal control over financial reporting, the Bank confirms that its consolidated financial statements in this Annual Report fairly present, in all material respects, the Bank's consolidated financial condition as of December 31, 2022 and 2021, and its consolidated results of operations and cash flows for the years ended December 31, 2022, 2021 and 2020, in conformity with US GAAP, as reflected in PricewaterhouseCoopers AG's (PwC) report on those financial statements.

### Management's report on internal control over financial reporting

The management of the Bank is responsible for establishing and maintaining adequate internal control over financial reporting. The Bank's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance the policies or procedures may deteriorate.

Management has made an evaluation and assessment of the Bank's internal control over financial reporting as of December 31, 2022 using the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control – Integrated Framework (2013)". Based upon its review and evaluation, management, including the Bank CEO and CFO, has concluded that, as of December 31, 2022, the Bank's internal control over financial reporting was not effective because of the material weaknesses described below. For the same reasons, management has also reassessed its conclusion as to the effectiveness of internal control over financial reporting as of December 31, 2021, and concluded that internal control over financial reporting was also not effective as of such date.

Management did not design and maintain an effective risk assessment process to identify and analyze the risk of material misstatements in its financial statements and did not design and maintain effective monitoring activities relating to (i) providing sufficient management oversight over the internal control evaluation process to support the company's internal control objectives; (ii) involving appropriate and sufficient management resources to support the risk assessment and monitoring objectives; and (iii) assessing and communicating the severity of deficiencies in a timely manner to those parties responsible for taking corrective action. These material weaknesses contributed to an additional material weakness, as management did not design and maintain effective controls over the classification and presentation of the consolidated statement of cash flows. Specifically, certain control activities over the completeness and the classification and presentation of non-cash items in the consolidated statement of cash flows were not performed on a timely basis or at the appropriate level of precision. This material weakness resulted in the revisions contained in our previously issued consolidated financial statements for the three years ended December 31, 2021 as disclosed in the 2021 Annual Report. Additionally, each of these material weaknesses could result in further misstatements of account balances or disclosures that would result in a material misstatement to the annual consolidated financial statements that would not be prevented or detected.

PwC, the independent registered public accounting firm that audited the financial statements for the year ended December 31, 2022, included in this annual report, has issued an adverse opinion on the effectiveness of the Bank's internal control over financial reporting as of December 31, 2022.

### Remediation plans

Management and the Bank Audit Committee have worked continuously in recent years to improve the control environment surrounding financial reporting with increased investment and additional resources. Management is committed to maintaining a strong internal control environment and implementing measures designed to help ensure that the material weaknesses are remediated as soon as possible. Management is developing a remediation plan to address the material weaknesses referred to above, including strengthening the risk and control frameworks, and which will build on the significant attention that management has devoted to controls to date. Additionally, we will implement robust controls to ensure that all non-cash items are classified appropriately within the consolidated statement of cash flows.

### Changes in internal control over financial reporting

Other than as described above, there were no changes in the Bank's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Bank's internal control over financial reporting.

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and shareholders of Credit Suisse AG

### Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Credit Suisse AG and its subsidiaries (the "Bank") as of December 31, 2022 and 2021, and the related consolidated statements of operations, comprehensive income, changes in equity and cash flows for each of the three years in the period ended December 31, 2022, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Bank's internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Bank as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2022 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Bank did not maintain, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the COSO because material weaknesses in internal control over financial reporting existed as of that date related to (i) the effectiveness of the risk assessment process to identify and analyze the risk of material misstatements in the Bank's financial statements, (ii) the effectiveness of monitoring activities relating to providing sufficient management oversight over the internal control evaluation process to support the Bank's internal control objectives, involving appropriate and sufficient management resources to support the risk assessment and monitoring objectives and assessing and communicating the severity of deficiencies in a timely manner to those parties responsible for taking corrective action and (iii) the effectiveness of controls over the completeness and the classification and presentation of non-cash items in the consolidated statements of cash flows.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. The material weaknesses referred to above are described in the accompanying Management's report on internal control over financial reporting. We considered these material weaknesses in determining the nature, timing, and extent of audit tests applied in our audit of the 2022 consolidated financial statements, and our opinion regarding the effectiveness of the Bank's internal control over financial reporting does not affect our opinion on those consolidated financial statements.

The Bank's management and we previously concluded that the Bank maintained effective internal control over financial reporting as of December 31, 2021. However, the Bank's management and we have subsequently determined that material weaknesses in internal control over financial reporting existed and accordingly concluded that internal control over financial reporting was not effective as of such date.

### Change in Accounting Principle

As discussed in Note 2 and Note 19 to the consolidated financial statements, the Bank changed the manner in which it accounts for credit losses on certain financial instruments in 2020.

PricewaterhouseCoopers AG, Birchstrasse 160, Postfach, 8050 Zurich, Switzerland

PricewaterhouseCoopers AG is a member of the global PricewaterhouseCoopers network of firms, each of which is a separate and independent legal entity.

#### Basis for Opinions

The Bank's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in management's report referred to above. Our responsibility is to express opinions on the Bank's consolidated financial statements and on the Bank's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Bank in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

#### Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

#### Fair Value of Certain Level 3 Financial Instruments

As described in Note 35 to the consolidated financial statements, the Bank carried CHF 9,313 million of its assets and CHF 9,523 million of its liabilities measured at fair value on a recurring basis that are categorized as level 3 of the fair value hierarchy as of December 31, 2022. For these financial instruments, for which no prices are available and which have significant unobservable inputs, the determination of fair value may require the use of either industry standard models or internally developed proprietary models, as well as subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. The significant unobservable inputs used by management to determine the fair value of certain of these level

2 Credit Suisse AG | Report of Independent Registered Public Accounting Firm

3 financial instruments included (i) correlation, (ii) market implied life expectancy, in years, (iii) UK mortality, (iv) price, (v) volatility, and (vi) credit spread.

The principal considerations for our determination that performing procedures relating to the fair value of certain level 3 financial instruments is a critical audit matter are (i) the significant judgment by management in determining the fair value of these financial instruments, which in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating audit evidence related to the fair value of these financial instruments, and (ii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the fair value of financial instruments, including controls over the Bank's models, inputs, and data. These procedures also included, among others, for a sample of financial instruments, the involvement of professionals with specialized skill and knowledge to assist in (i) developing an independent estimate of fair value or (ii) testing management's process to determine the fair value of these financial instruments. Developing an independent estimate involved (i) testing the completeness and accuracy of data provided by management, (ii) evaluating and utilizing management's significant unobservable inputs or developing independent significant unobservable inputs, and (iii) comparing management's estimate to the independently developed estimate of fair value. Testing management's process to determine the fair value involved (i) evaluating the reasonableness of management's significant unobservable inputs, (ii) evaluating the appropriateness of the techniques used, and (iii) testing the completeness and accuracy of data used by management to determine the fair value of these instruments.

#### *Allowance for Credit Losses on Certain Collectively Evaluated Corporate and Institutional Loans*

As described in Notes 1 and 19 to the consolidated financial statements, the Bank's allowance for credit losses on collectively evaluated corporate and institutional loans was CHF 431 million on corporate and institutional loans held at amortized cost of CHF 107,421 million as of December 31, 2022. The credit loss amounts were based on a forward-looking, lifetime current expected credit losses ("CECL") model by incorporating reasonable and supportable forecasts of future economic conditions available at the reporting date. Expected credit losses were not solely derived from projections of macroeconomic factors. Model overlays based on expert judgment were also applied, considering historical loss experience and industry and counterparty reviews, and were primarily impacting certain corporate and institutional loans portfolios.

The principal considerations for our determination that performing procedures relating to the allowance for credit losses on certain collectively evaluated corporate and institutional loans is a critical audit matter are (i) the significant judgment by management in evaluating model results and assessing the need for overlays to the CECL model output, (ii) the significant judgment and estimation by management in determining an appropriate methodology for the overlays applied, which both in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and in evaluating audit evidence obtained relating to the model results and the appropriateness of overlays to the CECL model output, and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's expected credit loss process, including controls over the Bank's models, data, and overlays. The procedures also included, among others, testing management's process for estimating expected credit losses, which included (i) evaluating the appropriateness of the model methodologies used to determine the allowance for credit losses, (ii) testing the completeness and accuracy of data used in the estimate, and (iii) for a sample, evaluating the reasonableness of management's model overlays. The procedures included the use of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of model methodologies and assist in evaluating the audit evidence.

#### *Litigation provisions*

As described in Note 39 to the consolidated financial statements, the Bank is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Bank's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. As of December 31, 2022, the Bank has recorded litigation provisions of CHF 1,125 million. Management's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for which management believes an estimate is possible is zero to CHF 0.9 billion.

The principal considerations for our determination that performing procedures relating to the litigation provisions is a critical audit matter are the significant judgment by management when assessing the likelihood of a loss being incurred and when determining whether a reasonable estimate of the loss or ranges of loss for each claim can be made, which in

turn led to a high degree of auditor judgment, subjectivity, and effort in evaluating management's assessment of the litigation provisions and related disclosures.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's estimation of the litigation provisions, including controls over determining whether a loss is probable and whether the amount of loss can be reasonably estimated, as well as controls over the related financial statement disclosures. These procedures also included, among others, obtaining and evaluating the letters of audit inquiry with internal and external legal counsel, targeted inquiries with external counsel, evaluating the reasonableness of management's assessment regarding whether an unfavorable outcome is reasonably possible or probable and reasonably estimable, and evaluating the sufficiency of the Bank's litigation provisions and related disclosures.

*Goodwill Impairment Assessment of the Asset Management and Wealth Management Reporting Units*

As described in Note 20 to the consolidated financial statements, the Bank's goodwill balance was CHF 2,868 million as of December 31, 2022, which is allocated to the Group's reporting units, and for which CHF 1,100 million was allocated to the Asset Management reporting unit and CHF 1,281 million was allocated to the Wealth Management reporting unit. Goodwill is reviewed for impairment on an annual basis as of December 31 and at any other time that events or circumstances indicate that the carrying value of goodwill may not be recoverable. In estimating the fair value of its reporting units, management applied a combination of the market approach and the income approach. In determining the estimated fair value, management relied upon its latest five-year financial plan which included significant management assumptions and estimates based on their view of current and future economic conditions and significant assumptions regarding the discount rate under the income approach as well as price to projected earnings and price to book value multiples ("multiples") under the market approach.

The principal considerations for our determination that performing procedures relating to the goodwill impairment assessment of the Asset Management and Wealth Management reporting units is a critical audit matter are (i) the significant judgment by management when developing the fair value measurement of the Asset Management and Wealth Management reporting units, (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions, specifically the five-year financial plan, discount rate and multiples, and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls over the valuation of the Asset Management and Wealth Management reporting units. These procedures also included, among others (i) testing management's process for developing the fair value estimate of the Asset Management and Wealth Management reporting units and (ii) developing an independent estimate of fair value for these reporting units. Testing management's process involved (i) evaluating the reasonableness of significant assumptions used by management, specifically the five-year financial plan, discount rate and multiples, (ii) evaluating the appropriateness of the methods used, and (iii) testing the completeness and accuracy of underlying data used in management's model. Developing an independent estimate involved using alternative financial plans, as well as independent discount rate and multiples, and comparing management's estimate to the independently developed estimate. Professionals with specialized skill and knowledge were used to assist in the evaluation of the management's estimate and development of an independent estimate.

---

**1 Summary of significant accounting policies**
**Overview**

The accompanying consolidated financial statements of Credit Suisse AG (the Bank), the direct bank subsidiary of Credit Suisse Group AG (the Group), are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). The financial year for the Bank ends on December 31. Certain reclassifications have been made to the prior year's consolidated financial statements to conform to the current presentation which had no impact on net income/ (loss) or total shareholders' equity.

In preparing the consolidated financial statements, management is required to make estimates and assumptions including, but not limited to, the fair value measurements of certain financial assets and liabilities, the allowance for credit losses, the evaluation of variable interest entities (VIEs), the impairment of assets other than loans, recognition of deferred tax assets, tax uncertainties, pension liabilities and various contingencies. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. While management evaluates its estimates and assumptions on an ongoing basis, actual results could differ materially from management's estimates. Market conditions may increase the risk and complexity of the judgments applied in these estimates.

- Refer to "Note 1 – Summary of significant accounting policies" in VI – Consolidated financial statements – Credit Suisse Group for a summary of significant accounting policies, with the exception of the following accounting policies.

**Certain accounting changes**

As noted in our 2021 Annual Report, the Bank identified an accounting issue that was not material to the prior period financial statements. The Bank identified this accounting issue with respect to the net balance sheet treatment relating to the presentation of a limited population of certain securities lending and borrowing activities. As a result, balance sheet and cash flow positions for both assets and liabilities relating to these activities were presented on a gross basis and prior periods were revised in the consolidated financial statements and the related notes.

Beginning with the half-year ended June 30, 2022, the Bank has presented these securities lending and borrowing transactions as a single unit of account and as a result these transactions will no longer be presented on a gross basis. The Bank did not adjust

prior period financial information, which continue to reflect a presentation on a gross basis.

**Pension and other post-retirement benefits**

Credit Suisse sponsors a Group defined benefit pension plan in Switzerland that covers eligible employees of the Bank domiciled in Switzerland. The Bank also has single-employer defined benefit pension plans and defined contribution pension plans in Switzerland and other countries around the world.

For the Bank's participation in the Group defined benefit pension plan, no retirement benefit obligation is recognized in the consolidated balance sheets of the Bank and defined contribution accounting is applied, as the Bank is not the sponsoring entity of the Group plan.

For single-employer defined benefit plans, the Bank uses the projected unit credit actuarial method to determine the present value of its projected benefit obligations (PBO) and the current and past service costs or credits related to its defined benefit and other post-retirement benefit plans. The measurement date used to perform the actuarial valuation is December 31 and is performed by independent qualified actuaries.

- Refer to "Pension and other post-retirement benefits" in VI – Consolidated financial statements – Credit Suisse Group – Note 1 – Summary of significant accounting policies for further information.

**Own shares, own bonds and financial instruments on Group shares**

The Bank's shares are wholly owned by Credit Suisse Group AG and are not subject to trading. The Bank may buy and sell Credit Suisse Group AG shares (Group shares) and Group bonds, own bonds and financial instruments on Group shares within its normal trading and market-making activities. In addition, the Bank may hold Group shares to economically hedge commitments arising from employee share-based compensation awards. Group shares are reported as trading assets, unless those shares are held to economically hedge share award obligations. Hedging shares are reported as treasury shares, resulting in a reduction to total shareholder's equity. Financial instruments on Group shares are recorded as assets or liabilities and carried at fair value. Dividends received on Group shares and unrealized and realized gains and losses on Group shares are recorded according to the classification of the shares as trading assets or treasury shares. Purchases of bonds originally issued by the Bank are recorded as an extinguishment of debt.

---

**2 Recently issued accounting standards**

- Refer to "Note 2 – Recently issued accounting standards" in VI – Consolidated financial statements – Credit Suisse Group for recently adopted accounting standards and standards to be adopted in future periods.

The impact on the Bank's and Group's financial position, results of operations or cash flows was or is expected to be identical.

3 Business developments, significant shareholders and subsequent events

- Refer to “Note 3 – Business developments, significant shareholders and subsequent events” in VI – Consolidated financial statements – Credit Suisse Group for further information.

4 Segment information

For the purposes of the presentation of reportable segments, the Bank has included accounts of affiliate entities wholly owned by the same parent which are managed together with the operating segments of the Bank.

- Refer to “Note 4 – Segment information” in VI – Consolidated financial statements – Credit Suisse Group for further information.

**Net revenues and income/(loss) before taxes**

in	2022	2021	2020
<b>Net revenues (CHF million)</b>

Adjustments <sup>1</sup>	(1,275)	(1,205)	(2,248)
<b>Income/(loss) before taxes</b>	<b>(3,331)</b>	<b>(91)</b>	<b>3,211</b>

- 1 Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice versa, and certain revenues and expenses that were not allocated to the segments, including such items relating to the Asset Resolution Unit.

**Total assets**

end of	2022	2021
<b>Total assets (CHF million)</b>		
Wealth Management	150,411	201,326
Investment Bank	146,846	274,112
Swiss Bank	197,059	221,478
Asset Management	3,373	3,603
Adjustments <sup>1</sup>	32,350	58,695
<b>Total assets</b>	<b>530,039</b>	<b>759,214</b>

- 1 Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice versa, and certain revenues and expenses that were not allocated to the segments, including such items relating to the Asset Resolution Unit.

**Net revenues and income/(loss) before taxes by geographical location**

in	2022	2021	2020
<b>Net revenues (CHF million)</b>			
Switzerland	7,154	8,382	8,659
EMEA	523	2,916	3,162
Americas	6,134	8,896	7,765
Asia Pacific	1,402	2,848	2,917
<b>Net revenues</b>	<b>15,213</b>	<b>23,042</b>	<b>22,503</b>
<b>Income/(loss) before taxes (CHF million)</b>			
Switzerland	543	1,659	2,477
EMEA	(2,907)	(5,554)	(847)
Americas	374	3,574	1,419
Asia Pacific	(1,341)	230	162
<b>Income/(loss) before taxes</b>	<b>(3,331)</b>	<b>(91)</b>	<b>3,211</b>

The designation of net revenues and income/(loss) before taxes is based on the location of the office recording the transactions. This presentation does not reflect the way the Bank is managed.

**Total assets by geographical location**

end of	2022	2021
<b>Total assets (CHF million)</b>		
Switzerland	201,752	259,874
EMEA	93,767	163,539
Americas	181,228	249,680
Asia Pacific	53,292	86,121
<b>Total assets</b>	<b>530,039</b>	<b>759,214</b>

The designation of total assets by region is based upon customer domicile.

## 5 Net interest income

in	2022	2021	2020
<b>Net interest income (CHF million)</b>			
Loans	5,900	4,993	5,694
Investment securities	14	1	3
Trading assets, net of trading liabilities <sup>1</sup>	2,540	2,839	3,158
Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions	2,135	1,172	1,596
Other	1,676	588	769
<b>Interest and dividend income</b>	<b>12,265</b>	<b>9,593</b>	<b>11,220</b>
Deposits	(1,749)	(151)	(1,107)
Short-term borrowings	(227)	3	(170)
Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions	(769)	(812)	(908)
Long-term debt	(3,438)	(2,437)	(2,702)
Other	(685)	(271)	(373)
<b>Interest expense</b>	<b>(6,868)</b>	<b>(3,668)</b>	<b>(5,260)</b>
<b>Net interest income</b>	<b>5,397</b>	<b>5,925</b>	<b>5,960</b>

1 Interest and dividend income is presented on a net basis to align with the presentation of trading revenues for trading assets and liabilities.

## 6 Commissions and fees

in	2022	2021	2020
<b>Commissions and fees (CHF million)</b>			
Lending business	1,431	1,870	1,612
Investment and portfolio management	3,028	3,401	3,087
Other securities business	61	59	73
<b>Fiduciary business</b>	<b>3,089</b>	<b>3,460</b>	<b>3,160</b>
Underwriting	560	2,560	2,348
Brokerage	2,265	3,088	3,246
Underwriting and brokerage	2,825	5,648	5,594
Other services	1,516	2,202	1,484
<b>Commissions and fees</b>	<b>8,861</b>	<b>13,180</b>	<b>11,850</b>

## 7 Trading revenues

in	2022	2021	2020
<b>Trading revenues (CHF million) <sup>1</sup></b>			
Interest rate products	(1,367)	1,081	(1,158)
Foreign exchange products	521	1,133	2,596
Equity/index-related products	427	1,589	1,092
Credit products	540	(1,416)	482
Commodity and energy products	8	(6)	62
Other products	(654)	(10)	104
<b>Trading revenues</b>	<b>(525)</b>	<b>2,371</b>	<b>3,178</b>

Represents revenues on a product basis which are not representative of business results within segments, as segment results utilize financial instruments across various product types.

- The classification of certain product types has been revised, prior periods have been reclassified to conform to the current presentation.
- Refer to "Note 7 – Trading revenues" in VI – Consolidated financial statements – Credit Suisse Group for further information.

## 8 Other revenues

in	2022	2021	2020
<b>Other revenues (CHF million)</b>			
Loans held-for-sale	(133)	(90)	(34)
Long-lived assets held-for-sale	355	232	26
Equity method investments	167	60	(255)
Other investments	(38)	256	769
Other	1,129	1,108	1,009
<b>Other revenues</b>	<b>1,480</b>	<b>1,566</b>	<b>1,515</b>

## 9 Provision for credit losses

in	2022	2021	2020
<b>Provision for credit losses (CHF million)</b>			
Loans held at amortized cost	190	(23)	863
Other financial assets held at amortized cost	(135) <sup>1</sup>	4,295 <sup>1</sup>	19
Off-balance sheet credit exposures	(40)	(63)	210
<b>Provision for credit losses</b>	<b>15</b>	<b>4,209</b>	<b>1,092</b>

- Primarily reflected a provision/(release of provision) for credit losses of CHF (155) million and CHF 4,307 million in 2022 and 2021, respectively, related to Archegos.

## 10 Compensation and benefits

in	2022	2021	2020
<b>Compensation and benefits (CHF million)</b>			
Salaries and variable compensation	6,376	6,730	7,521
Social security	508	530	559
Other <sup>1</sup>	805	751	780
<b>Compensation and benefits</b>	<b>7,689</b>	<b>8,011</b>	<b>8,860</b>

<sup>1</sup> Included pension-related expenses of CHF 440 million, CHF 497 million and CHF 503 million in 2022, 2021 and 2020, respectively, relating to service costs for defined benefit pension plans and employer contributions for defined contribution pension plans.

## 12 Restructuring expenses

On October 27, 2022, the Bank announced certain strategic actions and completed the restructuring program announced on November 4, 2021 at the end of September 2022. Restructuring expenses of CHF 467 million, CHF 113 million and CHF 122 million were recognized in 2022, 2021 and 2020, respectively.

- Refer to “Note 12 – Restructuring expenses” in VI – Consolidated financial statements – Credit Suisse Group for further information.

### Restructuring expenses by segment

in	2022	2021	2020
<b>Restructuring expenses by segment (CHF million)</b>			
Wealth Management	109	19	41
Investment Bank	327	71	48

1 The following items for which expense accretion was accelerated in 2022, 2021 and 2020 due to the restructuring of the Bank were not included in the restructuring liabilities: unsettled share-based compensation of CHF 94 million, CHF 13 million and CHF 25 million, respectively, which remained classified as a component of total shareholders' equity; other personnel-related charges of CHF 106 million, CHF 7 million and CHF 11 million, respectively, which remained classified as compensation liabilities; unsettled pension obligations of CHF 8 million, CHF 4 million and CHF 8 million, respectively, which remained classified as pension liabilities; and accelerated accumulated depreciation and impairment of CHF 36 million, CHF 31 million and CHF 6 million, respectively, which remained classified as premises and equipment. The settlement date for the unsettled share-based compensation remained unchanged at three years.

2 Reclassified within other liabilities.

## 13 Revenue from contracts with customers

- Refer to "Note 14 – Revenue from contracts with customers" in VI – Consoli-dated financial statements – Credit Suisse Group for further information.

The Bank's contract terms are generally such that they do not result in any contract assets.

There were no material net impairment losses on contract receivables in 2022, 2021 or 2020. The Bank did not recognize any revenues in the reporting period from performance obligations satisfied in previous periods.

## Contracts with customers and disaggregation of revenues

in	2022	2021	2020
<b>Contracts with customers (CHF million)</b>			
Investment and portfolio management	3,028	3,401	3,087
Other securities business	61	61	73
Underwriting	560	2,560	2,348
Brokerage	2,264	3,087	3,243
Other services	1,566	2,244	1,566
<b>Total revenues from contracts with customers</b>	<b>7,479</b>	<b>11,353</b>	<b>10,317</b>

The table above differs from "Note 6 – Commissions and fees" as it includes only those contracts with customers that are in scope of ASC Topic 606 – Revenue from Contracts with Customers.

## Contract balances

end of	2022	2021
<b>Contract balances (CHF million)</b>		
Contract receivables	686	865
Contract liabilities	54	55

## Contract balances

in	4Q22	3Q22	2Q22	1Q22
<b>Revenue recognized (CHF million)</b>				
Revenue recognized in the reporting period included in the contract liabilities balance at the beginning of period	8	11	10	14

## Capitalized costs

The Bank has not incurred costs to obtain a contract nor costs to fulfill a contract that are eligible for capitalization.

## Remaining performance obligations

ASC Topic 606's practical expedient allows the Bank to exclude from its remaining performance obligations disclosure any performance obligations which are part of a contract with an original expected duration of one year or less. Additionally, any variable consideration, for which it is probable that a significant reversal in the amount of cumulative revenue recognized will occur when the uncertainty associated with the variable consideration is subsequently resolved, is not subject to the remaining performance obligations disclosure because such variable consideration is not included in the transaction price (e.g., investment management fees). Upon review, the Bank determined that no material remaining performance obligations are in scope of the remaining performance obligations disclosure.

14 Securities borrowed, lent and subject to repurchase agreements

end of	2022	2021
<b>Securities borrowed or purchased under agreements to resell (CHF million)</b>		
Central bank funds sold and securities purchased under resale agreements	42,256	65,017

Reclassifications from loans held-for-sale and reclassifications to loans held-for-sale represent non-cash transactions.

- Includes drawdowns under purchased loan commitments.
- Reflects loans previously reclassified to held-for-sale that were not sold and were reclassified back to loans held at amortized cost.
- All loans held at amortized cost which are sold are reclassified to loans held-for-sale on or prior to the date of the sale.

#### Debt securities held-to-maturity

In 2022, the Bank purchased foreign government debt securities held-to-maturity amounting to CHF 971 million, all related to a portfolio of US Treasury securities.

The Bank’s debt securities held-to-maturity with a carrying value of CHF 921 million as of December 31, 2022 represent a portfolio of US Treasury securities, all rated “AAA” based on the Bank’s internal counterparty rating. US Treasury securities have a history of no credit losses and market price movements mainly reflect changes in market interest rates. Based on this history of no credit losses and the Bank’s view of the current and forecasted economic environment, the Bank expects the risk of non-payment for US Treasuries to be zero and does not have an allowance for credit losses for these securities. The credit quality of these securities is monitored on an ongoing basis and the Bank’s zero-loss expectation is validated on at least a quarterly basis through the Bank’s governance structure involving the Credit Risk and Treasury functions.

- Refer to “Note 16 – Investment securities” for further information.

#### Other financial assets

The current-period provision for expected credit losses on other financial assets held at amortized cost includes a release of CHF 155 million in 2022 and a provision of CHF 4,307 million in 2021 related to Archegos Capital Management (Archegos). As of

December 31, 2022 and 2021, the allowance for credit losses on brokerage receivables of CHF 4,081 million and CHF 4,186 million, respectively, were primarily related to Archegos.

#### Allowance for credit losses – other financial assets held at amortized cost

of which collectively evaluated	22	14	33

In 2022 and 2021, the Bank purchased other financial assets held at amortized cost amounting to CHF 931 million and CHF 196 million, respectively, primarily related to mortgage servicing advances.

## Credit quality information

### Credit quality of loans held at amortized cost

The following table presents the Bank's carrying value of loans held at amortized cost by aggregated internal counterparty credit ratings "investment grade" and "non-investment grade" that are

used as credit quality indicators for the purpose of this disclosure, by year of origination. Within the line items relating to the origination year, the first year represents the origination year of the current reporting period and the second year represents the origination year of the comparative reporting period.

<sup>1</sup> Excluded accrued interest on loans held at amortized cost of CHF 534 million and CHF 295 million as of December 31, 2022 and 2021, respectively.

### Credit quality of other financial assets held at amortized cost

The following table presents the Bank's carrying value of other financial assets held at amortized cost by aggregated internal counterparty credit ratings "investment grade" and

"non-investment grade", by year of origination. Within the line items relating to the origination year, the first year represents the origination year of the current reporting period and the second year represents the origination year of the comparative reporting period.

In 2022, the loan modifications of the Bank mainly included extended loan repayment terms, including postponed loan amortizations and extended maturity dates, interest rate concessions, a waiver of interest, a reduction of a loan commitment, a subordination of loans and changes in collateral coverage terms.

As of December 31, 2022 and 2021, the Bank did not have any commitments to lend additional funds to debtors whose loan terms had been modified in troubled debt restructurings.

## 20 Goodwill

of which structured notes	9,380	7,860	5,241	2,893	3,076	10,475	38,925

The maturity of perpetual debt is based on the earliest callable date. The maturity of all other debt is based on contractual maturity and includes certain structured notes that have mandatory early redemption features based on stipulated movements in markets or the occurrence of a market event. Within this population there are approximately CHF 0.8 billion of such notes with a contractual maturity of greater than one year that have an observable likelihood of redemption occurring within one year based on a modelling assessment.

- 1 Excludes structured notes for which fair value has been elected as the related coupons are dependent upon the embedded derivatives and prevailing market conditions at the time each coupon is paid.
- 2 Reflects equity linked notes, where the payout is not fixed.

- Refer to “Note 26 – Long-term debt” in VI – Consolidated financial statements – Credit Suisse Group for further information.

<sup>1</sup> The statutory tax rate was 18.5% in 2022 and 2021 and 20% in 2020.

**2022**

**Foreign tax rate differential** of CHF 127 million reflected a foreign tax benefit primarily driven by losses in higher tax jurisdictions, mainly in the US and the UK, partially offset by profits made in higher tax jurisdictions, mainly in Brazil. The foreign tax rate expense of CHF 3,604 million comprised not only the foreign tax expense based on statutory tax rates but also the tax impacts related to the following reconciling items.

**Other non-deductible expenses** of CHF 303 million included the impact of CHF 196 million relating to non-deductible interest expenses and non-deductible funding costs, CHF 154 million relating to non-deductible legacy litigation provisions, CHF 74

million relating to other non-deductible expenses, CHF 8 million relating to non-deductible UK bank levy costs and various smaller items. These expenses were partially offset by the net benefit of CHF 138 million for the reassessment of the interest cost deductibility relating to the recognition of previously unrecognized tax benefits of non-deductible funding.

**Lower taxed income** of CHF 144 million included a tax benefit of CHF 65 million related to non-taxable life insurance income, CHF 39 million related to non-taxable dividend income, CHF 36 million related to concessionary and lower taxed income and various smaller items.

**Changes in deferred tax valuation allowances** of CHF 4,512 million primarily related to the reassessment of deferred tax assets as a result of the comprehensive strategic review announced on October 27, 2022, primarily due to the limited future taxable income against which deferred tax assets could be utilized. Management considered both positive and negative evidence and concluded that it is more likely than not that a significant portion of the Bank's deferred tax assets will not be realized. This resulted in an increase in the valuation allowance of CHF 3,655 million, mainly in respect of two of the Bank's operating entities in the US. The net impact also included valuation allowances on deferred tax assets of CHF 817 million related to the current year results, mainly in respect of one of the Bank's operating entities in Switzerland, three of the Bank's operating entities in the US and two of the Bank's operating entities in the UK. This also included an increase in the valuation allowance of CHF 40 million relating to year-end reassessments of deferred tax assets.

**Other** of CHF 75 million included an income tax benefit of CHF 172 million relating to return-to-provision adjustments and CHF 24 million relating to tax credits. These benefits were partially offset by CHF 57 million relating to the current year US base erosion and anti-abuse tax (BEAT) provision, CHF 45 million relating to the tax impact of an accounting standard implementation transition adjustment for own credit movements and CHF 24 million relating to unrealized mark-to-market results on share-based compensation. The remaining balance included various smaller items.

## 2021

**Foreign tax rate differential** of CHF 92 million reflected a foreign tax charge primarily driven by losses in higher tax jurisdictions, mainly in the UK, partially offset by profits made in higher tax jurisdictions, such as the US. The foreign tax rate expense of CHF 480 million comprised not only the foreign tax expense based on statutory tax rates but also the tax impacts related to the following reconciling items.

**Other non-deductible expenses** of CHF 369 million included the impact of CHF 200 million relating to non-deductible interest expenses and non-deductible costs related to funding and capital (including a contingency accrual of CHF 11 million), CHF 93 million relating to non-deductible legacy litigation provisions, including amounts relating to the Mozambique matter, CHF 39 million relating to non-deductible UK bank levy costs and other non-deductible compensation expenses and management costs,

CHF 28 million relating to other non-deductible expenses and various smaller items.

**Lower taxed income** of CHF 129 million included a tax benefit of CHF 77 million related to non-taxable life insurance income, CHF 41 million related to non-taxable dividend income, CHF 5 million related to concessionary and lower taxed income, CHF 5 million related to exempt income and various smaller items.

**Changes in deferred tax valuation allowances** of CHF 612 million included a tax charge from the increase in valuation allowances on deferred tax assets of CHF 771 million, mainly in respect of two of the Bank's operating entities in the UK. This mainly reflected the impact of the loss related to Archegos attributable to the UK operations. Also included was the net impact of the release of valuation allowances on deferred tax assets of CHF 159 million, mainly in respect of one of the Bank's operating entities in Switzerland and another of the Bank's operating entities in Hong Kong.

**Other** of CHF 154 million included an income charge of CHF 100 million relating to withholding taxes, CHF 51 million relating to the tax impact of an accounting standard implementation transition adjustment for own credit movements and CHF 29 million relating to the current year BEAT provision. These charges were partially offset by CHF 30 million relating to prior years' adjustments. The remaining balance included various smaller items.

## 2020

**Foreign tax rate differential** of CHF 64 million reflected a foreign tax benefit primarily driven by losses in higher tax jurisdictions, mainly in the UK, and profits incurred in lower tax jurisdictions, mainly in Singapore, partially offset by profits made in higher tax jurisdictions, such as the US. The foreign tax rate expense of CHF 179 million comprised not only the foreign tax expense based on statutory tax rates but also the tax impacts related to the following reconciling items.

**Other non-deductible expenses** of CHF 253 million included the impact of CHF 117 million relating to non-deductible interest expenses and non-deductible costs related to funding and capital (including the impact of a previously unrecognized tax benefit of CHF 157 million relating to the resolution of interest costs deductibility with and between international tax authorities, partially offset by a contingency accrual of CHF 41 million), CHF 68 million relating to non-deductible bank levy costs and other non-deductible compensation expenses and management

costs, CHF 46 million relating to non-deductible legacy litigation provisions and CHF 23 million relating to other non-deductible expenses.

**Lower taxed income** of CHF 221 million included a tax benefit of CHF 79 million related to the revaluations of the equity investments in the SIX Swiss Exchange (SIX) Group AG, Allfunds Group and Pfandbriefbank in Switzerland, CHF 53 million related to concessionary and lower taxed income, CHF 67 million related to non-taxable life insurance income, CHF 19 million related to the transfer of the InvestLab fund platform to Allfunds Group and various smaller items.

**Changes in deferred tax valuation allowances** of CHF 281 million included a tax charge from the increase in valuation allowances on deferred tax assets of CHF 312 million, mainly in respect of the re-assessment of deferred tax assets reflecting changes in the future profitability of one of the Bank's operating entities in Switzerland of CHF 222 million, and also in respect of one of the Bank's operating entities in the UK. Also included was the net impact of the release of valuation allowances on deferred tax assets of CHF 31 million, mainly in respect of one of the Bank's operating entities in Hong Kong and another of the Bank's operating entities in the UK.

**Other** of CHF 277 million included an income tax benefit from the re-assessment of the BEAT provision for 2019 of CHF 180 million and the impact of a change in US tax rules relating to federal net operating losses (NOL), where federal NOL generated in tax years 2018, 2019, or 2020 can be carried back for five years instead of no carry back before and also the deductible interest expense limitations for the years 2019 and 2020 have been increased from 30% to 50% of adjusted taxable income for the year, which in aggregate resulted in a benefit of CHF 141 million. Additionally, this included an income tax benefit of CHF 80 million relating to prior years' adjustments and a tax benefit of CHF 34 million relating to the beneficial earnings mix of one of the Bank's operating entities in Switzerland. These benefits were partially offset by CHF 78 million relating to the tax impact of an accounting standard implementation transition adjustment for own credit movements, CHF 61 million relating to withholding taxes, CHF 26 million relating to the current year BEAT provision and the remaining balance included various smaller items.

The US tax reform enacted in December 2017 introduced the BEAT tax regime, effective as of January 1, 2018, for which final regulations were issued by the US Department of Treasury on December 2, 2019. Following the publication of the 2019 financial statements, Credit Suisse continued its analysis of the final regulations, resulting in a revision to the technical application of the prior BEAT estimate. This new information was not available or reasonably knowable at the time of the publication of the 2019 financial statements and resulted in a change of accounting estimate reflected in 2020.

## Deferred tax assets and liabilities

end of	2022	2021
<b>Deferred tax assets and liabilities (CHF million)</b>		
Compensation and benefits	638	832
Loans	209	319
Investment securities	992	1,257
Provisions	641	1,357
Leases	229	228
Derivatives	38	46
Real estate	229	250
Net operating loss carry-forwards	7,720	6,382
Goodwill and intangible assets	67	135
Other	418	151
<b>Gross deferred tax assets before valuation allowance</b>	<b>11,181</b>	<b>10,957</b>
Less valuation allowance	(8,488)	(5,338)
<b>Gross deferred tax assets net of valuation allowance</b>	<b>2,693</b>	<b>5,619</b>
Compensation and benefits	(202)	(355)
Loans	(1,190)	(131)
Investment securities	(744)	(722)
Provisions	(282)	(297)
Leases	(219)	(216)
Derivatives	(286)	(218)
Real estate	(43)	(38)
Other	(138)	(98)
<b>Gross deferred tax liabilities</b>	<b>(3,104)</b>	<b>(2,075)</b>
<b>Net deferred tax assets/(liabilities)</b>	<b>(411)</b>	<b>3,544</b>
of which deferred tax assets	259	3,666
of which net operating losses	138	877
of which deductible temporary differences	121	2,789
of which deferred tax liabilities	(670)	(122)

Net deferred tax liabilities of CHF 411 million as of December 31, 2022 decreased CHF 3,955 million compared to net deferred tax assets of CHF 3,544 million as of December 31, 2021, primarily reflecting the valuation allowances relating to the reassessment of the deferred tax assets as a result of the comprehensive strategic review announced on October 27, 2022, as well as valuation allowances relating to current period results. The movement also reflected tax impacts directly recorded in other comprehensive income, mainly related to own credit movements, partially offset by the impact of foreign exchange translation gains, which were included within the currency translation adjustments, and a pension plan re-measurement.

The Bank's valuation allowance against gross deferred tax assets was CHF 8.5 billion as of December 31, 2022 compared to CHF 5.3 billion as of December 31, 2021. This was due to the uncertainty concerning the Bank's ability to generate the necessary amount and mix of taxable income in future periods. The valuation allowance also reflected a decrease due to valuation allowance adjustments recorded in other comprehensive income, mainly related to own credit movements.

## Unrecognized deferred tax liabilities

As of December 31, 2022, the Bank had accumulated undistributed earnings from foreign subsidiaries of CHF 17.8 billion. No deferred tax liability was recorded in respect of those amounts, as these earnings are considered indefinitely reinvested. The Bank would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

### Amounts and expiration dates of net operating loss carry-forwards

end of 2022	Total

- Refer to “Note 29 – Employee deferred compensation” for further information on share-based compensation.

of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease of between zero and CHF 14 million in unrecognized tax benefits within 12 months of the reporting date.

The Bank remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2020 (federal and Zurich cantonal level); Brazil – 2017; the UK – 2012; and the US – 2010.

- Refer to “Note 29 – Tax” in VI – Consolidated financial statements – Credit Suisse Group for further information.

**Deferred compensation expense**

The following tables show the compensation expense for deferred compensation awards granted in 2022 and prior years that was recognized in the consolidated statements of operations during 2022, 2021 and 2020, the total shares delivered, the estimated unrecognized compensation expense for deferred compensation awards granted in 2022 and prior years outstanding as of December 31, 2022 and the remaining requisite service period over which the estimated unrecognized compensation expense will be recognized. The recognition of compensation expense for the deferred compensation awards granted in February 2023 began in 2023 and thus had no impact on the 2022 consolidated financial statements.

- Refer to “Note 30 – Employee deferred compensation” in VI – Consolidated financial statements – Credit Suisse Group for further information on our various awards programs.

## Strategic Delivery Plan

### Strategic Delivery Plan activities

	2022	
	Number of Strategic Delivery Plan awards in million	Weighted-average grant-date fair value in CHF
<b>Share Delivery Plan</b>		
<b>Balance at beginning of period</b>	—	—
Granted	62.6 <sup>1</sup>	8.12
Settled	0.0	0.00
Forfeited	(3.8)	8.42
<b>Balance at end of period</b>	<b>58.8</b>	<b>8.10</b>
of which vested	6.8	—
of which unvested	52.0	—

- Included an adjustment for Strategic Delivery Plan awards granted in the fourth quarter of 2022 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on November 28, 2022. The number of deferred share-based awards held by each individual was increased by 5.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards, thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional Strategic Delivery Plan shares granted.

### Contingent Capital Awards

Contingent Capital Awards (CCA) will no longer be used as a form of deferred compensation award for the 2022 performance year and onwards. The Bank granted CCA of CHF 71 million and CHF 245 million in 2022 and 2021, respectively.

### Cash awards

#### Deferred fixed cash awards

The Bank granted deferred fixed cash compensation during 2022, 2021 and 2020 of CHF 294 million, CHF 259 million and CHF 120 million, respectively, in the Investment Bank, Wealth Management and Asset Management divisions. This compensation has been expensed over a three-year vesting period from the grant date. Amortization of this compensation in 2022 totaled CHF 214 million, of which CHF 125 million was related to awards granted in 2022.

#### Upfront cash awards

The Bank granted upfront cash awards (UCA) of CHF 797 million and CHF 59 million in 2022 and 2021, respectively. These awards are subject to repayment (clawback) by the employee in the event of voluntary resignation, termination for cause or in connection with other specified events or conditions within three years of the award grant. The amount subject to repayment is reduced in equal monthly installments during the three-year period following the grant date. The expense recognition will occur over the three-year vesting period, subject to service conditions. Amortization of this compensation in 2022 totaled CHF 372 million, of which CHF 339 million was related to awards granted in 2022.

#### Retention awards

The Bank granted deferred cash and share retention awards during 2022 of CHF 355 million, mainly in the Investment Bank division. During 2021 and 2020, the Bank granted deferred cash and share retention awards of CHF 395 million and CHF 40 million, respectively. These awards are expensed over the applicable vesting period from the grant date. Amortization of these awards in 2022 totaled CHF 170 million, of which CHF 65 million was related to awards granted in 2022.

### Awards granted for the compensation year 2022

#### Share awards

On February 10, 2023, the Bank granted 95.3 million share awards with a total value of CHF 267 million. The estimated unrecognized compensation expense of CHF 243 million was

determined based on the fair value of the awards on the grant date, includes the current estimated future forfeitures and will be recognized over the vesting period, subject to early retirement rules.

#### Share awards granted for previous years

For compensation year	2022	2021	2020
Shares awarded (million)	95.3	26.9	43.5
Value of shares awarded (CHF million)	267	210	576

On February 10, 2023, the Bank granted 5.2 million blocked shares with a total value of CHF 14 million that vested immediately upon grant, have no future service requirements and were attributed to services performed in 2022.

#### Blocked share awards granted for previous years

For compensation year	2022	2021	2020
Blocked shares awarded (million)	5.2	4.6	2.3
Value of shares awarded (CHF million)	14	38	31

#### Upfront cash awards

In February 2023, certain managing directors and directors were granted CHF 321 million of UCA as part of their 2022 variable compensation.

### Awards granted in 2023

#### Transformation Awards

In February 2023, the Bank granted Transformation Awards, with a total award value of CHF 260 million, to employees identified as being critical to the delivery of the transformation strategy.

For employees other than the Executive Board, the Transformation Award was granted in the form of both a deferred cash award and a deferred share award subject to performance conditions.

#### Other awards

In the first quarter of 2023, the Bank granted additional compensation awards to certain employees. Share-based awards of CHF 38 million and deferred fixed cash compensation of CHF 30 million were granted to key employees. These awards will be expensed over a three-year vesting period from the grant date. In addition, Supplemental Cash Allowance Awards of CHF 114 million were granted to certain employees and will be expensed over a nine-month vesting period from the grant date.

The Group owns all of the Bank's outstanding voting registered shares. The Bank is involved in significant financing and other transactions with subsidiaries of the Group. The Bank generally enters into these transactions in the ordinary course of business and believes that these transactions are generally on market terms that could be obtained from unrelated third parties.

- Refer to "Note 31 – Related parties" in VI – Consolidated financial statements – Credit Suisse Group for further information.

- Revised.
- The number of individuals with outstanding loans was three at the beginning of the year and two at the end of the year.

#### Liabilities due to own pension plans

Liabilities due to the Bank's own defined benefit pension plans as of December 31, 2022 and 2021 of CHF 254 million and CHF 331 million, respectively, were reflected in various liability accounts in the Bank's consolidated balance sheets.

The Bank participates in a defined benefit pension plan sponsored by the Group and has defined contribution pension plans, single-employer defined benefit pension plans and other post-retirement defined benefit plans. The Bank's principal plans are located in Switzerland, the US and the UK.

- Refer to "Note 32 – Pension and other post-retirement benefits" in VI – Consolidated financial statements – Credit Suisse Group for further information on pension and other post-retirement benefits.

#### **Defined contribution pension plans**

The Bank contributes to various defined contribution pension plans primarily in Switzerland, the US and the UK as well as other countries throughout the world. During 2022, 2021 and 2020, the Bank contributed to these plans and recognized as expense CHF 211 million, CHF 235 million and CHF 240 million, respectively. This included expenses of CHF 69 million, CHF 89 million and CHF 96 million in 2022, 2021 and 2020, respectively, related to the Swiss defined contribution pension plan which took effect on January 1, 2020. Contributions to the Swiss defined contribution plan are made by employees and the Group. Assets from this plan are paid out as a lump sum on retirement.

#### **Defined benefit pension and other post-retirement benefit plans**

##### **Defined benefit pension plans**

##### **Group pension plan**

The Bank covers pension requirements for its employees in Switzerland by participating in a defined benefit pension plan sponsored by the Group (Group plan), the Group's most significant defined benefit pension plan. The Group plan provides benefits in the event of retirement, death and disability. Various legal entities within the Group participate in the Group plan, which is set up as an independent trust domiciled in Zurich. Benefits in the Group plan are determined on the basis of the accumulated employer and employee contributions and accumulated interest credited. In accordance with US GAAP, the Group accounts for the Group plan as a single-employer defined benefit pension plan and uses the projected unit credit actuarial method to determine the net periodic benefit costs, the PBO and the accumulated benefit obligation (ABO). The Bank accounts for the defined benefit pension plan sponsored by the Group as a multi-employer pension plan because other legal entities within the Group also participate in the Group plan and the assets contributed by the Bank are not segregated into a separate account or restricted to provide benefits only to employees of the Bank. The assets contributed by the Bank are commingled with the assets contributed by the other legal entities of the Group and can be used to provide benefits to any employee of any participating legal entity. The Bank's

contributions to the Group plan comprise 83% of the total cash contributions contributed to the Group plan by all participating legal entities on an annual basis.

The Bank accounts for the Group plan on a defined contribution basis whereby it only recognizes the amounts required to be contributed to the Group plan during the period as net periodic pension expense and only recognizes a liability for any contributions due and unpaid. No other expenses or balance sheet amounts related to the Group plan were recognized by the Bank. In the savings section of the Group plan, the Bank's contribution varies between 7.5% and 25.0% of the pensionable salary depending on the employee's age.

During 2022, 2021 and 2020, the Bank contributed and recognized as expense CHF 215 million, CHF 248 million and CHF 249 million to the Group plan, respectively. The Bank expects to contribute CHF 225 million to the Group plan during 2023.

##### **International pension plans**

Various defined benefit pension plans cover the Bank's employees outside Switzerland. These plans provide benefits in the event of retirement, death, disability or termination of employment. Retirement benefits under the plans depend on age, contributions and salary. The Bank's principal defined benefit pension plans outside Switzerland are located in the US and in the UK. Both plans are funded, closed to new participants and have ceased accruing new benefits. Smaller defined benefit pension plans, both funded and unfunded, are operated in other locations.

##### **Other post-retirement defined benefit plan**

In the US, the Bank has a defined benefit plan that provides post-retirement benefits other than pension benefits that primarily focus on health and welfare benefits for certain retired employees. In exchange for the current services provided by the employee, the Bank promises to provide health and welfare benefits after the employee retires. The Bank's obligation for that compensation is incurred as employees render the services necessary to earn their post-retirement benefits.

##### **Net periodic benefit costs of defined benefit plans**

The net periodic benefit costs for defined benefit pension and other post-retirement defined benefit plans are the costs of the respective plan for a period during which an employee renders services. The actual amount to be recognized is determined using the standard actuarial methodology which considers, among other factors, current service cost, interest cost, expected return on plan assets and the amortization of both prior service costs/(credits) and actuarial losses/(gains) recognized in AOCI.

## Components of net periodic benefit costs

in	International single-employer defined benefit pension plans			Other post-retirement defined benefit plan		
	2022	2021	2020	2022	2021	2020
<b>Net periodic benefit costs (CHF million)</b>						
Service costs on benefit obligation	14	14	14	0	0	0
Interest costs on benefit obligation	58	49	68	3	2	4
Expected return on plan assets	(67)	(65)	(85)	0	0	0
Amortization of recognized prior service cost/(credit)	1	1	1	0	0	0
Amortization of recognized actuarial losses/(gains)	9	14	13	1	1	1
Settlement losses/(gains)	11	8	(1)	0	0	0
<b>Net periodic benefit costs/(credits)</b>	<b>26</b>	<b>21</b>	<b>10</b>	<b>4</b>	<b>3</b>	<b>5</b>

Service costs on benefit obligation are reflected in compensation and benefits. Other components of net periodic benefit costs are reflected in general and administrative expenses.

### Benefit obligation

The “Obligations and funded status of the plans” table shows the changes in the PBO, the ABO, the fair value of plan assets and the amounts recognized in the consolidated balance sheets for the international single-employer defined benefit pension plans and other post-retirement defined benefit plans.

## Obligations and funded status of the plans

in / end of	International single-employer defined benefit pension plans		Other post-retirement defined benefit plan	
	2022	2021	2022	2021
<b>PBO (CHF million) <sup>1</sup></b>				
<b>Beginning of the measurement period</b>	<b>3,022</b>	<b>3,475</b>	<b>140</b>	<b>156</b>

Exchange rate gains/(losses)	(262)	132	0	0
<b>End of the measurement period</b>	<b>2,316</b>	<b>3,802</b>	<b>0</b>	<b>0</b>
<b>Total funded status recognized (CHF million)</b>				
Funded status of the plan – over/(underfunded)	419	780	(107)	(140)
<b>Funded status recognized in the consolidated balance sheet as of December 31</b>	<b>419</b>	<b>780</b>	<b>(107)</b>	<b>(140)</b>
<b>Total amount recognized (CHF million)</b>				
Noncurrent assets	559	975	0	0
Current liabilities	(7)	(7)	(10)	(10)
Noncurrent liabilities	(133)	(188)	(97)	(130)
<b>Net amount recognized in the consolidated balance sheet as of December 31</b>	<b>419</b>	<b>780</b>	<b>(107)</b>	<b>(140)</b>
<b>ABO (CHF million) <sup>2</sup></b>				
<b>End of the measurement period</b>	<b>1,880</b>	<b>2,996</b>	<b>107</b>	<b>140</b>

1 Including estimated future salary increases.

2 Excluding estimated future salary increases.

The net amount recognized in the consolidated balance sheets as of December 31, 2022 and 2021 was an overfunding of CHF 312 million and CHF 640 million, respectively.

The settlements of CHF 448 million on the international plans recorded as of December 31, 2021 mainly related to settlements in the UK, reflecting an enhanced transfer value exercise, and settlements in the US, reflecting a partial sale of pension obligations sold to a third party insurer.

In 2023, the Bank expects to contribute CHF 14 million to the international single-employer defined benefit pension plans and CHF 10 million to other post-retirement defined benefit plans.

### PBO or ABO in excess of plan assets

The following table shows the aggregate PBO and ABO, as well as the aggregate fair value of plan assets for those plans with PBO in excess of plan assets and those plans with ABO in excess of plan assets as of December 31, 2022 and 2021, respectively.

## Defined benefit pension plans in which PBO or ABO exceeded plan assets

December 31	PBO exceeds fair value of plan assets		ABO exceeds fair value of plan assets	
	2022	2021	2022	2021
<b>PBO/ABO exceeded plan assets (CHF million)</b>				
PBO	809	402	146	393
ABO	797	382	135	375
Fair value of plan assets	669	208	6	200

## Amounts recognized in AOCI and OCI

The following table shows the actuarial gains/(losses) and the prior service credits/(costs), which were recorded in AOCI and subsequently recognized as components of net periodic benefit costs.

## Amounts recognized in AOCI, net of tax

end of	International single-employer defined benefit pension plans		Other post-retirement defined benefit plan		Total	
	2022	2021	2022	2021	2022	2021
<b>Amounts recognized in AOCI (CHF million)</b>						
Actuarial gains/(losses)	(576)	(402)	(6)	(27)	(582)	(429)
Prior service credits/(costs)	(12)	(9)	3	3	(9)	(6)
<b>Total</b>	<b>(588)</b>	<b>(411)</b>	<b>(3)</b>	<b>(24)</b>	<b>(591)</b>	<b>(435)</b>

The following table shows the changes in other comprehensive income (OCI) due to actuarial gains/(losses), the prior service credits/(costs) recognized in AOCI during 2022 and 2021 as well

as the amortization of the aforementioned items as components of net periodic benefit costs for these periods.

## Amounts recognized in OCI

in	International single-employer defined benefit pension plans			Other post-retirement defined benefit plan			Total net
	Gross	Tax	Net	Gross	Tax	Net	
<b>2022 (CHF million)</b>							
Actuarial gains/(losses)	(284)	94	(190)	27	(7)	20	(170)
Prior service credits/(costs)	(4)	0	(4)	0	0	0	(4)
Amortization of actuarial losses/(gains)	9	(1)	8	1	0	1	9
Amortization of prior service costs/(credits)	1	0	1	0	0	0	1
Immediate recognition due to curtailment/settlement	11	(3)	8	0	0	0	8
<b>Total</b>	<b>(267)</b>	<b>90</b>	<b>(177)</b>	<b>28</b>	<b>(7)</b>	<b>21</b>	<b>(156)</b>
<b>2021 (CHF million)</b>							
Actuarial gains/(losses)	(10)	12	2	14	(3)	11	13
Prior service credits/(costs)	4	(1)	3	0	0	0	3
Amortization of actuarial losses/(gains)	14	(3)	11	1	0	1	12
Amortization of prior service costs/(credits)	1	0	1	0	0	0	1
Immediate recognition due to curtailment/settlement	8	(1)	7	0	0	0	7
<b>Total</b>	<b>17</b>	<b>7</b>	<b>24</b>	<b>15</b>	<b>(3)</b>	<b>12</b>	<b>36</b>

## Assumptions

The measurement of both the net periodic benefit costs and the benefit obligation is determined using explicit assumptions, each of which individually represents the best estimate of a particular future event.

### Weighted-average assumptions used to determine net periodic benefit costs and benefit obligation

December 31	International single-employer defined benefit pension plans			Other post-retirement defined benefit plan		
	2022	2021	2020	2022	2021	2020
<b>Net periodic benefit cost (%)</b>						
Discount rate – service cost	2.90	2.64	2.62	—	—	—
Discount rate – interest cost	2.10	1.56	2.37	2.23	1.74	2.77
Salary increases	3.32	2.97	2.84	—	—	—
Expected long-term rate of return on plan assets	2.01	1.79	2.37	—	—	—
<b>Benefit obligation (%)</b>						
Discount rate	4.75	2.13	1.66	5.18	2.89	2.55
Salary increases	3.18	3.32	2.97	—	—	—

### Mortality tables and life expectancies for major plans

December 31		Life expectancy at age 65 for a male member currently				Life expectancy at age 65 for a female member currently			
		aged 65		aged 45		aged 65		aged 45	
		2022	2021	2022	2021	2022	2021	2022	2021
<b>Life expectancy (years)</b>									
UK	SAPS S3 light tables <sup>1</sup>	23.5	23.5	24.8	24.7	25.1	25.0	26.5	26.4
US	Pri-2012 mortality tables <sup>2</sup>	20.7	20.6	21.9	21.8	22.6	22.5	23.7	23.7

- 102% of Self-Administered Pension Scheme (SAPS) S3 light tables were used, which included CMI projections, with a long-term rate of improvement of 1.25% per annum.
- The Private retirement plan 2012 (Pri-2012) mortality tables were used, with projections based on the Social Security Administration's intermediate improvement scale.

### Health care cost assumptions

The health care cost trend is used to determine the appropriate other post-retirement defined benefit costs. In determining those costs, an annual weighted-average rate is assumed in the cost of covered health care benefits.

The following table provides an overview of the assumed health care cost trend rates.

### Health care cost trend rates

in / end of	2022	2021	2020
<b>Health care cost trend rate (%)</b>			
Annual weighted-average health care cost trend rate <sup>1</sup>	6.3	6.5	7.0

- The annual health care cost trend rate is assumed to decrease gradually to achieve the long-term health care cost trend rate of 4.5% by 2030.

The annual health care cost trend rate used to determine the net periodic defined benefit costs for 2023 is 6.3%.

### Plan assets and investment strategy

As of December 31, 2022 and 2021, no Group debt or equity securities were included in plan assets for the international single-employer defined benefit pension plans.

## Fair value of plan assets

The following table presents the plan assets measured at fair value on a recurring basis as of December 31, 2022 and 2021, for the Bank's defined benefit pension plans.

### Plan assets measured at fair value on a recurring basis

end of	2022					2021				
	Level 1	Level 2	Level 3	Assets measured at net asset value per share	Total	Level 1	Level 2	Level 3	Assets measured at net asset value per share	Total
<b>Plan assets at fair value (CHF million)</b>										
Cash and cash equivalents	28	90	0	0	118	9	101	0	0	110

The notional amount, PRV and NRV (trading and hedging) was CHF 14,825.7 billion, CHF 113.8 billion and CHF 112.4 billion, respectively, as of December 31, 2021.

- 1 Relates to derivative contracts that qualify for hedge accounting under US GAAP.
- 2 Prior period has been revised.
- 3 Primarily credit default swaps.
- 4 Primarily precious metals, commodity and energy products.

**Gains or (losses) on fair value hedges**

in	2022	2021	2020
<b>Interest rate products (CHF million)</b>			
Hedged items <sup>1</sup>	4,677	1,523	(1,679)
Derivatives designated as hedging instruments <sup>1</sup>	(4,355)	(1,448)	1,564

The accrued interest on fair value hedges is recorded in net interest income and is excluded from this table.

- 1 Included in net interest income.

## Hedged items in fair value hedges

end of	2022			2021		
	Hedged items		Discontinued hedges <sup>2</sup>	Hedged items		Discontinued hedges <sup>2</sup>
	Carrying amount	Hedging adjustments <sup>1</sup>		Carrying amount	Hedging adjustments <sup>1</sup>	
<b>Assets (CHF billion)</b>						
Investment securities	0.8	(0.1)	0.0	0.8	0.0	0.0
Net loans	29.0	(1.3)	(0.7)	16.6	(0.2)	0.2
<b>Liabilities (CHF billion)</b>						
Long-term debt	72.0	(1.0)	(4.4)	65.6	(0.1)	0.8

1 Relates to the cumulative amount of fair value hedging adjustments included in the carrying amount.

2 Relates to the cumulative amount of fair value hedging adjustments remaining for any hedged items for which hedge accounting has been discontinued.

## Cash flow hedges

in	2022	2021	2020
<b>Interest rate products (CHF million)</b>			
Gains/(losses) recognized in AOCI on derivatives	(474)	(314)	134
Gains/(losses) reclassified from AOCI into interest and dividend income	1,018	7	(70)
<b>Foreign exchange products (CHF million)</b>			
Gains/(losses) recognized in AOCI on derivatives	(56)	(9)	(33)
Trading revenues	0	0	(30)
Total other operating expenses	(60)	34	(2)
Gains/(losses) reclassified from AOCI into income	(60)	34	(32)
Gains/(losses) excluded from the assessment of effectiveness reported in trading revenues <sup>1</sup>	0	0	1

1 Relates to the forward points of a foreign currency forward.

The net loss associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months was CHF 538 million.

## Net investment hedges

in	2022	2021	2020
<b>Foreign exchange products (CHF million)</b>			
Gains/(losses) recognized in the cumulative translation adjustments section of AOCI	(15)	51	451
Gains/(losses) reclassified from the cumulative translation adjustments section of AOCI into other revenues	0	0	10

## Contingent credit risk

end of	2022				2021			
	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total
	<b>Contingent credit risk (CHF billion)</b>							
Current net exposure	1.2	0.1	0.1	1.4	2.3	0.0	0.3	2.6
Collateral posted	1.0	0.1	—	1.1	1.9	0.0	—	1.9

The Bank includes all derivative instruments not included in hedge accounting relationships in its trading activities.

- Refer to “Note 7 – Trading revenues” for gains and losses on trading activities by product type.

## Disclosures relating to contingent credit risk

The following table provides the Bank’s current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and special purpose entities (SPEs) that include credit support agreements, the related collateral posted and the additional collateral that could be called by counterparties in a one, two or three-notch downgrade in the contractually specified credit ratings. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the negative replacement value and a percentage of the notional value of the derivative.

Impact of a one-notch downgrade event	<u>0.4</u>	<u>0.0</u>	<u>0.1</u>	<u>0.5</u>	<u>0.1</u>	<u>0.0</u>	<u>0.0</u>	<u>0.1</u>
Impact of a two-notch downgrade event	<u>0.5</u>	<u>0.1</u>	<u>0.2</u>	<u>0.8</u>	<u>0.2</u>	<u>0.0</u>	<u>0.0</u>	<u>0.2</u>
Impact of a three-notch downgrade event	<u>0.5</u>	<u>0.1</u>	<u>0.2</u>	<u>0.8</u>	<u>0.7</u>	<u>0.0</u>	<u>0.1</u>	<u>0.8</u>

The impact of a downgrade event reflects the amount of additional collateral required for bilateral counterparties and special purpose entities and the amount of additional termination expenses for accelerated terminations, respectively.

**480 Consolidated financial statements – Credit Suisse (Bank)**

## Credit derivatives

- Refer to “Note 33 – Derivatives and hedging activities” in VI – Consolidated financial statements – Credit Suisse Group for further information.

## Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” table. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its

underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Total return swaps (TRS) of CHF 5.9 billion and CHF 12.0 billion as of December 31, 2022 and 2021, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

1 Total net amount is computed as the gross amount less any participations.

2 Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Bank had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

- Refer to “Note 34 – Guarantees and commitments” in VI – Consolidated financial statements – Credit Suisse Group for further information.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of protected deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guaranteed an amount of up to CHF 6 billion under the regulation applicable until December 31, 2022. Upon occurrence of a payout event triggered by a specified restriction of business imposed by the Swiss Financial Market Supervisory Authority FINMA (FINMA) or by the compulsory liquidation of another deposit-taking bank, the Bank’s contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA’s estimate for the Bank, the Bank’s share in the deposit insurance guarantee program for the period July 1, 2022 to December 31, 2022 was CHF 0.5 billion. These deposit insurance guarantees were reflected in other guarantees.

On January 1, 2023, a partial revision of the Swiss Federal Law on Banks and Savings Banks (Bank Law) became effective, which included changes to the Swiss deposit insurance guarantee program. Under the revised program, among other changes,

the jointly guaranteed amount is now determined as the higher of CHF 6 billion or 1.6% of all protected deposits. The Bank’s respective share will be approximately CHF 0.6 billion for the period January 1 to June 30, 2023, as per notifications from the administrator of the Swiss deposit insurance program to the Bank and its Swiss bank subsidiaries. With a transition period until November 30, 2023, banks will have to provide half of the maximum payment obligation as collateral to the administrator of the Swiss deposit insurance program, while the other half will remain subject to the bank’s liquidity requirements and will be reflected in other guarantees. Collateral will have to be provided to the Swiss National Bank (SNB) or the SIX Swiss Exchange in the form of high quality liquid securities or Swiss franc cash deposits or to the administrator of the Swiss deposit insurance program in the form of a loan.

**Representations and warranties on residential mortgage loans sold**

In connection with the Investment Bank division’s sale of US residential mortgage loans, the Bank has provided certain representations and warranties relating to the loans sold.

## Other commitments

end of	Maturity less than 1 year	Maturity between 1 to 3 years	Maturity between 3 to 5 years	Maturity greater than 5 years	Total gross amount	Total net amount <sup>1</sup>
<b>2022 (CHF million)</b>

<b>Total other commitments</b>	<b>28,342</b>	<b>44,275</b>	<b>43,859</b>	<b>11,857</b>	<b>128,333</b>	<b>123,745</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Irrevocable loan commitments did not include a total gross amount of CHF 129,224 million and CHF 144,079 million of unused credit limits as of December 31, 2022 and 2021, respectively, which were revocable at the Bank's sole discretion upon notice to the client.

## Transfers of financial assets

- Refer to “Note 35 – Transfers of financial assets and variable interest entities” in VI – Credit Suisse Group – Consolidated financial statements for further information.

**Securizations**

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2022, 2021 and 2020 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Bank and the SPEs used in any securitizations in which the Bank still has continuing involvement, regardless of when the securitization occurred.

**Securizations**

in	2022	2021	2020
<b>Gains/(losses) and cash flows (CHF million)</b>			
<b>CMBS</b>			
Net gain/(loss) <sup>1</sup>	6	(7)	85
Proceeds from transfer of assets <sup>2</sup>	3,401	3,525	9,209
Cash received on interests that continue to be held	49	42	52
<b>RMBS</b>			
Net gain/(loss) <sup>1</sup>	(2)	70	32
Proceeds from transfer of assets <sup>3</sup>	7,534	37,048	23,358
Purchases of previously transferred financial assets or its underlying collateral	0	(1,604)	0
Servicing fees	24	2	2
Cash received on interests that continue to be held	675	1,088	864
<b>Other asset-backed financings</b>			
Net gain <sup>1</sup>	16	65	105
Proceeds from transfer of assets <sup>4</sup>	6,740	12,129	9,564
Purchases of previously transferred financial assets or its underlying collateral	(1,479)	(1,323)	(1,606)
Fees <sup>5</sup>	192	165	148
Cash received on interests that continue to be held	153	14	17

- Includes primarily underwriting revenues, deferred origination fees and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization.
- Included the receipt of non-cash beneficial interests (including risk retention securities) of CHF 512 million, CHF 180 million and CHF 161 million in 2022, 2021 and 2020, respectively.
- Included the receipt of non-cash beneficial interests (including risk retention securities) of CHF 1,081 million, CHF 3,072 million and CHF 3,030 million in 2022, 2021 and 2020, respectively.
- Included the receipt of non-cash beneficial interests (including risk retention securities) of CHF 168 million, CHF 54 million and CHF 9 million in 2022, 2021 and 2020, respectively.
- Represents primarily management fees and performance fees earned for investment management services provided to managed CLOs.

**Continuing involvement in transferred financial assets**

The following table provides the outstanding principal balance of assets to which the Bank continued to be exposed after the transfer of the financial assets to SPEs and the total assets of the SPEs as of December 31, 2022 and 2021, regardless of when the transfer of assets occurred.

**Principal amounts outstanding and total assets of SPEs resulting from continuing involvement**

end of	2022	2021
<b>CHF million</b>		
<b>CMBS</b>		
Principal amount outstanding	17,193	15,428
Total assets of SPEs	24,625	23,205
<b>RMBS</b>		
Principal amount outstanding	41,552	56,990
Total assets of SPEs	41,552	56,990
<b>Other asset-backed financings</b>		
Principal amount outstanding	21,939	24,856
Total assets of SPEs	54,609	57,797

Principal amount outstanding relates to assets transferred from the Bank and does not include principal amounts for assets transferred from third parties.

**Fair value of beneficial interests**

The fair value measurement of beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Bank may utilize to hedge the inherent risks.

**Key economic assumptions at the time of transfer**

- Refer to “Note 35 – Financial instruments” for further information on the fair value hierarchy.

## Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in CHF million, except where indicated	2022		2021		2020	
	CMBS	RMBS	CMBS	RMBS	CMBS	RMBS
Fair value of beneficial interests	486	847	196	2,594	342	2,692
of which level 2	415	762	170	2,126	305	2,398
of which level 3	71	85	26	468	37	294
Weighted-average life, in years	4.1	9.5	5.2	5.3	6.4	3.8
Prepayment speed assumption (rate per annum), in % <sup>1</sup>	— <sup>2</sup>	5.0–22.2	— <sup>2</sup>	3.0–37.7	— <sup>2</sup>	1.0–47.0
Cash flow discount rate (rate per annum), in % <sup>3</sup>	3.5–15.7	2.8–53.8	1.8–5.0	1.0–33.4	1.4–20.9	0.2–40.8
Expected credit losses (rate per annum), in % <sup>4</sup>	2.7–5.6	1.3–49.8	0.9–4.3	0.1–32.5	1.9–8.6	1.6–22.9

Transfers of assets in which the Bank does not have beneficial interests are not included in this table.

- Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.
- To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.
- The rate was based on the weighted-average yield on the beneficial interests.
- The range of expected credit losses only reflects instruments with an expected credit loss greater than zero unless all of the instruments have an expected credit loss of zero.

## Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of December 31, 2022 and 2021.

## Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

<sup>2</sup> Includes overnight transactions.

- Refer to “Note 27 – Offsetting of financial assets and financial liabilities” for further information on the gross amount of securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral and the net amounts disclosed in the consolidated balance sheets.

#### Variable interest entities

- Refer to “Note 35 – Transfers of financial assets and variable interest entities” in VI – Consolidated financial statements – Credit Suisse Group for further information.

#### Commercial paper conduit

The Bank acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine Securitization Ltd (Alpine), a multi-seller asset-backed commercial paper (CP) conduit used for client and Bank financing purposes. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings on its CP. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. In addition to CP, Alpine may also issue term notes with maturities up to 30 months. The Bank (including Alpine) can enter into liquidity facilities with third-party entities pursuant to which it may be required to purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Bank. However, its assets are available to satisfy only the claims of its creditors. In addition, the Bank, as administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Bank is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of Alpine’s outstanding CP was approximately 249 days as of December 31, 2022. Alpine’s CP had exposures mainly in reverse repurchase agreements with a Bank entity, solar loans and leases, consumer loans and car loans and leases.

The Bank’s financial commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Bank to provide short-term financing to the CP conduit or to purchase

assets from the CP conduit in certain circumstances, including, but not limited to, a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or a default of an underlying asset. In such circumstances, the Bank may be viewed as the primary beneficiary of specified assets referenced under liquidity agreements, resulting in consolidation of specified assets, which are included as part of the consolidated VIEs table. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Bank reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Bank enters into liquidity facilities with CP conduits administrated and sponsored by third parties. These third-party CP conduits are considered to be VIEs for accounting purposes. The Bank is not the primary beneficiary and generally does not consolidate these third-party CP conduits. The Bank’s financial commitment to these third-party CP conduits consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Bank to provide short-term financing to the third-party CP conduits or to purchase assets from these CP conduits in certain circumstances, including, but not limited to, a lack of liquidity in the CP market such that the CP conduits cannot refinance their obligations or a default of an underlying asset. As of December 31, 2022, certain liquidity facilities with third-party CP conduits referenced groups of specified assets and liabilities within a VIE for which the Group is the primary beneficiary which required consolidation. The asset-specific credit enhancements, if any, provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Bank reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit. In some situations, the Bank can enter into liquidity facilities with these third-party CP conduits through Alpine.

The Bank’s economic risks associated with the Alpine CP conduit and the third-party CP conduits are included in the Bank’s risk management framework including counterparty, economic risk capital and scenario analysis.

## Consolidated VIEs

The Bank has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Bank consolidates all VIEs related to financial intermediation for which it is the primary beneficiary.

The consolidated VIEs table provides the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of December 31, 2022 and 2021.

## Non-consolidated VIEs

The non-consolidated VIEs table provides the carrying amounts and classification of the assets of variable interests recorded in the Bank's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Bank's interest is in the form of securities held in the Bank's inventory, certain repurchase financings to funds and single-asset financing vehicles not sponsored by the Bank to which the Bank provides financing but has very little risk of loss due to over-collateralization and/or guarantees, failed sales where the Bank does not have any other holdings and other entities out of scope.

<sup>2</sup> Primarily includes cash collateral on derivative instruments and interest and fee payables.

## 500 Consolidated financial statements – Credit Suisse (Bank)

## 36 Assets pledged and collateral

### Assets pledged

The Bank pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are parenthetically disclosed on the consolidated balance sheet.

### Assets pledged

end of	2022	2021
<b>CHF million</b>		
Total assets pledged or assigned as collateral	63,111	88,721
of which encumbered	<u>25,445</u>	<u>39,105</u>

### Collateral

The Bank receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A significant portion of the collateral and securities received by the Bank was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

### Collateral

end of	2022	2021
<b>CHF million</b>		
Fair value of collateral received with the right to sell or repledge	150,198	289,898
of which sold or repledged	<u>75,819</u>	<u>144,747</u>

### Other information

end of	2022	2021
<b>CHF million</b>		
Swiss National Bank required minimum liquidity reserves	2,258	2,246
Other restricted cash, securities and receivables <sup>1</sup>	<u>812</u>	<u>3,423</u>

- <sup>1</sup> Includes cash, securities and receivables recorded on the Group's consolidated balance sheets and restricted under Swiss or foreign regulations for financial institutions; excludes restricted cash, securities and receivables held on behalf of clients which are not recorded on the Group's consolidated balance sheet.
- Refer to "Note 37 – Assets pledged and collateral" in VI – Consolidated financial statements – Credit Suisse Group for further information.

## 37 Capital adequacy

The Bank is subject to the Basel framework, as implemented in Switzerland, as well as Swiss legislation and regulations for systemically important banks. The Bank, which is subject to regulation by FINMA, has based its capital adequacy calculations on US GAAP financial statements, as permitted by FINMA Circular 2013/1.

- Refer to "Note 38 – Capital adequacy" in VI – Consolidated financial statements – Credit Suisse Group for further information.

As of December 31, 2022 and 2021, the Bank's capital position exceeded its capital requirements under the regulatory provisions outlined under Swiss Requirements.

### Broker-dealer operations

Certain of the Bank's broker-dealer subsidiaries are also subject to capital adequacy requirements. As of December 31, 2022 and 2021, the Bank and its subsidiaries complied with all applicable regulatory capital adequacy requirements.

### Dividend restrictions

Certain of the Bank's subsidiaries are subject to legal restrictions governing the amount of dividends they can pay (for example, pursuant to corporate law as defined by the Swiss Code of Obligations).

As of December 31, 2022 and 2021, Credit Suisse AG was not subject to restrictions on its ability to pay the proposed dividends.

## Swiss metrics

end of	2022	2021
<b>Swiss capital (CHF million)</b>		
Swiss CET1 capital	40,987	44,185
Going concern capital	54,843	59,110
Gone concern capital	42,930	41,316 <sup>1</sup>
Total loss-absorbing capacity (TLAC)	97,773	100,426
<b>Swiss risk-weighted assets and leverage exposure (CHF million)</b>		
Swiss risk-weighted assets	249,953	267,558
Leverage exposure	653,551	895,810
<b>Swiss capital ratios (%)</b>		
Swiss CET1 ratio	16.4	16.5
Going concern capital ratio	21.9	22.1
Gone concern capital ratio	17.2	15.4
TLAC ratio	39.1	37.5
<b>Swiss leverage ratios (%)</b>		
Swiss CET1 leverage ratio	6.3	4.9
Going concern leverage ratio	8.4	6.6
Gone concern leverage ratio	6.6	4.6
TLAC leverage ratio	15.0	11.2
<b>Swiss capital ratio requirements (%)</b>		
Swiss CET1 ratio requirement	9.28	10.0
Going concern capital ratio requirement	13.58 <sup>2</sup>	14.3
Gone concern capital ratio requirement	13.58	14.3
TLAC ratio requirement	27.16	28.6
<b>Swiss leverage ratio requirements (%)</b>		
Swiss CET1 leverage ratio requirement	3.25	3.5
Going concern leverage ratio requirement	4.75 <sup>2</sup>	5.0
Gone concern leverage ratio requirement	4.75	5.0
TLAC leverage ratio requirement	9.5	10.0

- Amounts are shown on a look-through basis. Certain tier 2 instruments and their related tier 2 amortization components were subject to phase out and are no longer eligible as of January 1, 2022. As of 2021, gone concern capital was CHF 41,565 million, including CHF 249 million of such instruments.
- The total requirement excluded the FINMA Pillar 2 capital add-on of CHF 1,850 million relating to the supply chain finance funds matter. This Pillar 2 capital add-on equated to an additional Swiss CET1 capital ratio requirement of 74 basis points and an additional Swiss CET1 leverage ratio requirement of 28 basis points.

## 39 Litigation

- Refer to “Note 40 – Litigation” in VI – Consolidated financial statements – Credit Suisse Group for further information.

The Bank’s estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed below for which the Bank believes an estimate is possible is zero to CHF 0.9 billion.

## 38 Assets under management

The following disclosure provides information regarding client assets, assets under management and net new assets as regulated by FINMA.

- Refer to “Note 39 – Assets under management” in VI – Consolidated financial statements – Credit Suisse Group for further information.

## Assets under management

end of	2022	2021
<b>CHF billion</b>		
Assets in collective investment instruments managed by Credit Suisse	194.6	228.9
Assets with discretionary mandates	244.1	294.8
Other assets under management	852.8	1,087.3
<b>Assets under management (including double counting)</b>	<b>1,291.5</b>	<b>1,611.0</b>
of which double counting	31.9	45.9

## Changes in assets under management

	2022	2021
<b>Assets under management (CHF billion)</b>		
<b>Balance at beginning of period <sup>1</sup></b>	<b>1,611.0</b>	<b>1,507.0</b>
Net new assets/(net asset outflows)	(122.5)	33.2
Market movements, interest, dividends and foreign exchange	(169.9)	92.4
of which market movements, interest and dividends <sup>2</sup>	(165.9)	80.7
of which foreign exchange	(4.0)	11.7
Other effects	(27.1)	(21.6)
<b>Balance at end of period</b>	<b>1,291.5</b>	<b>1,611.0</b>

- Including double counting.
- Net of commissions and other expenses and net of interest expenses charged.

## Litigation provisions

	2022
<b>CHF million</b>	
<b>Balance at beginning of period</b>	<b>1,533</b>
Increase in litigation accruals	1,849
Decrease in litigation accruals	(341)
Decrease for settlements and other cash payments	(1,990)
Foreign exchange translation	74
<b>Balance at end of period</b>	<b>1,125</b>

40 Significant subsidiaries and equity method investments

The entities presented in the table below generally include subsidiaries with total assets over CHF 100 million or net income attributable to shareholders over CHF 10 million. Also included

are entities which are deemed regionally significant or otherwise relevant from an operational perspective.

Off-balance sheet transactions

	2022	2021
<b>CHF million</b>		
Contingent liabilities	12,800	14,318
Irrevocable commitments	83,583	91,928
Obligations for calls on shares and additional payments	2	9

Contingent liabilities include guarantees for obligations, performance-related guarantees and letters of comfort issued to third parties. Contingencies with a stated amount are included in the off-balance sheet section of the financial statements. In some instances, the exposure of Credit Suisse AG (Bank parent company) is not defined as an amount but relates to specific circumstances such as the solvency of subsidiaries or the performance of a service.

### Joint and several liability

The Bank parent company entered into a contractual arrangement under which it assumed joint and several liability with respect to liabilities of Credit Suisse (Schweiz) AG arising in connection with Credit Suisse (Schweiz) AG's roles under the international covered bonds program.

The Bank parent company is a member of Credit Suisse Group AG's Swiss value added tax (VAT) group and therefore subject to joint and several liability according to the Swiss VAT Act.

### Deposit insurance guarantee programs

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the pay-out of protected deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank.

In Switzerland, deposit-taking banks and securities dealers jointly guaranteed an amount of up to CHF 6 billion under the regulation

applicable until December 31, 2022. Upon occurrence of a pay-out event triggered by a specified restriction of business imposed by the Swiss Financial Market Supervisory Authority FINMA (FINMA) or by the compulsory liquidation of another deposit-taking bank, the Bank parent company's contribution will be calculated based on its share of protected deposits in proportion to total protected deposits. Based on FINMA's estimate for the Bank parent company, the bank's share in the deposit insurance guarantee program for the period July 1, 2022 to December 31, 2022 was CHF 42 million. This deposit insurance guarantee is reflected in irrevocable commitments.

On January 1, 2023, a partial revision of the Swiss Federal Law on Banks and Savings Banks (Bank Law) became effective, which included changes to the Swiss deposit insurance guarantee program. Under the revised program, among other changes, the jointly guaranteed amount is now determined as the higher of CHF 6 billion or 1.6% of all protected deposits.

The amendments also require all member banks to deposit collateral equal to 50% of the Bank's deposit insurance contribution amount in the form of HQLA securities or Swiss francs with a secure third party custodian. Banks will need to comply with this collateralization requirement by the end of November 2023. The reduction in HQLA securities or Swiss francs provided as collateral under the Swiss deposit insurance program due to this new requirement will be partially compensated by a reduced outflow factor applied to the Bank's deposit insurance contribution amount.

- Refer to "Note 25 – Amounts receivable from and amounts payable to related parties" for further information on off-balance sheet transactions.

### Statement of changes in equity

	Share capital	Legal capital reserves	Legal income reserves	Free reserves	Accumulated losses carried forward	Net profit/(loss)	Total shareholders' equity

- 1 Included capital contribution reserves of CHF 38,970 million at the beginning of the period and CHF 34,790 million at the end of the period. Distributions from capital contribution reserves are free of Swiss withholding tax.
- 2 Represented a-fond-perdu contributions in cash by Credit Suisse Group AG of CHF 1,730 million on November 25, 2022 and CHF 2,160 million on December 9, 2022 to capital contribution reserves.
- 3 Included capital contribution reserves of CHF 7,500 million at the end of the period. Distributions from capital contribution reserves are free of Swiss withholding tax.
- 4 Transfer of legal reserves to free reserves and accumulated losses as approved by the extraordinary meeting of shareholders on April 29, 2022.

## 1 Company details, business developments and subsequent events

**Company details**

Credit Suisse AG (Bank parent company) is a Swiss bank incorporated as a joint stock corporation (public limited company) with its registered office in Zurich, Switzerland.

The Bank parent company is a wholly owned subsidiary of Credit Suisse Group AG (Group parent company) domiciled in Switzerland.

**Number of employees**

end of	2022	2021
<b>Full-time equivalents</b>		
Switzerland	5,680	5,480
Abroad	3,800	3,950
<b>Total</b>	<b>9,480</b>	<b>9,430</b>

**Business developments****Credit Suisse Group strategic review**

On October 27, 2022, Credit Suisse announced a series of decisive actions following a strategic review conducted by its Board of Directors and Executive Board, focused on a restructuring of the Investment Bank, an accelerated cost transformation, and strengthened and reallocated capital. The transformation is intended to be funded through divestments, exits, the capital actions and existing resources. As the Group implements these actions, restructuring costs, including from asset impairments and liability valuations, are expected to arise in connection with business activities the Group plans to exit or transfer and their related infrastructure.

**Internal control over financial reporting**

The Bank parent company's Board of Directors is responsible for establishing and maintaining adequate internal control over financial reporting which is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Swiss law. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Board of Directors has made an evaluation and assessment of the internal control over financial reporting as of December 31, 2022. Based upon its review and evaluation, the Board of Directors has concluded that, as of December 31, 2022, the Bank parent company's internal control over financial reporting was not effective as it did not design and maintain an effective risk

assessment process to identify and analyze the risk of material misstatements in its financial statements. This material weakness could result in misstatements of account balances or disclosures that would result in a material misstatement to the annual financial statements that would not be prevented or detected.

As a consequence, the statutory auditor PricewaterhouseCoopers AG (PwC) has issued a qualified opinion on the existence of an internal control designed for the preparation of the financial statements as of December 31, 2022.

Notwithstanding the existence of that material weaknesses in internal control over financial reporting, the Bank parent company confirms that its financial statements as at December 31, 2022 comply with Swiss law as reflected in PwC's report on those financial statements.

The Bank parent company's Board of Directors and the Executive Board have worked continuously in recent years to improve the control environment surrounding financial reporting with increased investment and additional resources and are committed to maintaining a strong internal control environment and implementing measures designed to help ensure that the material weaknesses are remediated with the highest priority. The Bank parent company's Board of Directors and the Executive Board are developing a remediation plan to address the material weakness referred to above, including strengthening the risk and control framework, and which will build on the significant attention that management has devoted to controls to date.

Other than as described above, there were no changes in the Bank parent company's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Bank parent company's internal controls over financial reporting.

**Valuation of participations**

The carrying value of the Bank parent company's participations in subsidiaries is reviewed for potential impairment on at least an annual basis as of December 31 and at any other time that events or circumstances indicate that the participations' value may be impaired. During 2022, adverse market and economic conditions as well as the announcement on October 27, 2022 regarding the updated strategy, the organizational changes and planned business exits, primarily with regard to the Investment Bank division, were triggering events.

Based on the reviews performed, which included the support of an independent valuation specialist appointed by Credit Suisse, the Bank parent company recorded participation impairments of CHF 11.9 billion for the year 2022, which are reflected in the statement of income in impairment of participations, depreciation and amortization of tangible fixed assets and intangible assets.

Impairments of CHF 10.8 billion were recorded against the participation in Credit Suisse Holdings (USA) Inc. and CHF 1.1 billion on other entities.

### **Capital increase**

On November 23, 2022, the Group held an Extraordinary General Meeting, at which shareholders approved two capital increases. The Group completed the first capital increase on November 25, 2022 by way of a share placement of 462,041,884 newly issued shares to qualified investors resulting in gross proceeds of CHF 1.76 billion. The Group completed the second capital increase by way of a rights offering on December 9, 2022. By the end of the rights exercise period, 98.2% of the rights had been exercised for the issuance of 872,989,594 shares. The remaining 16,378,864 newly issued shares for which rights were not exercised were sold in the market. The rights offering resulted in gross proceeds for the Group of CHF 2.25 billion. The capital increases resulted in 1,351,410,342 newly issued shares and gross proceeds for the Group of CHF 4.0 billion. Credit Suisse Group AG made capital contributions of CHF 3.89 billion to the Bank parent company.

### **Liquidity issues in the fourth quarter of 2022**

During early fourth quarter of 2022, Credit Suisse began experiencing significantly higher withdrawals of cash deposits as well as non-renewal of maturing time deposits. However, as the quarter progressed, these outflows stabilized to much lower levels but had not yet reversed by year end. As is normal practice, the Group also limited its access to the capital markets in the period immediately preceding the strategy announcements the Group made on October 27, 2022. These developments also adversely impacted the Bank parent company.

### **Outflows in assets under management in the fourth quarter of 2022**

As previously disclosed for the Group, Credit Suisse began experiencing deposit and net asset outflows in early fourth quarter of 2022 at levels that substantially exceeded the rates incurred in the third quarter of 2022. At the Group level, approximately two-thirds of these net asset outflows in the quarter concentrated in October 2022. The Bank parent company was affected by net asset outflows. Net asset outflows for the year represented approximately 14% of assets under management reported as of the end of 2021.

- Refer to “Note 28 – Assets under management” for further information.

### **Allfunds Group**

In the fourth quarter of 2022, the Bank parent company sold its entire participation in Allfunds Group plc (Allfunds Group), which represented approximately 8.6% of the share capital of Allfunds Group, through an accelerated bookbuild offering to institutional investors. Following the completion of this transaction, the Bank parent company no longer holds any shares in Allfunds Group.

### **Supply chain finance fund matter**

As previously reported, early March 2021, the boards of four supply chain finance funds (SCFF) managed by certain Bank subsidiaries decided to suspend redemptions and subscriptions of those funds to protect the interests of the funds’ investors, to terminate the SCFF and to proceed to their liquidation.

Beginning in the fourth quarter of 2021, the Bank introduced a fee waiver program for clients impacted by this matter wherein certain commissions and fees arising from current and future business transactions may be reimbursed on a quarterly basis, provided certain conditions are met. The Bank parent company incurred negative revenues of CHF 74 million in 2022 relating to this fee waiver program.

### **Subsequent events**

#### **Securitized Products Group**

On November 15, 2022, Credit Suisse announced that it entered into definitive transaction agreements to sell a significant part of its Securitized Products Group (SPG) to entities and funds managed by affiliates of Apollo Global Management. This transaction involves phased closings through the first half of 2023 and represents an important step towards a managed exit from the SPG business and to de-risk the bank. On February 7, 2023, the parties completed the first closing of such transaction and the majority of the assets and professionals associated with the transaction are now part of or managed by ATLAS SP Partners, a new standalone credit firm focused on asset-backed financing and capital markets solutions. On February 23, 2023, the parties completed the second closing of such transaction, with further assets transferred.

#### **CS First Boston**

On February 9, 2023, the Group announced that it has taken further steps to progress the carveout of CS First Boston as a leading capital markets and advisory business through the acquisition of The Klein Group LLC, the investment banking business as well as the registered broker-dealer of M. Klein & Company LLC (the seller). The purchase price is USD 175 million. To align interests with the Group, the seller will receive a convertible note and a warrant. The note will provide annual payments and convert into, and the warrant entitles the seller to subscribe to, CS First Boston shares at a qualified initial public offering or other liquidity event, at the then-valuation of CS First Boston, less a customary discount. The principal amount of the convertible note is expected to be USD 100 million, with the balance being paid in cash dependent taxes to be paid by the seller at closing. The net present value of the transaction to the Group is expected to be approximately USD 210 million, which also includes interest cost, annual payments on the note and other payments that may in the future become payable in respect of this transaction. The transaction is expected to close in the first half of 2023.

## Summary of significant accounting and valuation principles

### Basis for accounting

The Bank parent company's standalone financial statements are prepared in accordance with the accounting rules of the Swiss Federal Law on Banks and Savings Banks (Bank Law), the corresponding Implementing Ordinance (Banking Ordinance), the Swiss Financial Market Supervisory Authority's Accounting Ordinance (FINMA Accounting Ordinance) and FINMA circular 2020/1, "Accounting – banks" (Swiss GAAP statutory) as applicable for the preparation of reliable assessment statutory single-entity financial statements (*Statutarischer Einzelabschluss mit zuverlässiger Darstellung*). Supplemental information on unsecured senior debt and structured notes as provided in Note 19 is not a required disclosure under these rules.

The financial year for the Bank parent company ends on December 31.

The consolidated financial statements of Credit Suisse AG and its subsidiaries (Bank) are prepared in accordance with accounting principles generally accepted in the US (US GAAP), which differ in certain material respects from Swiss GAAP statutory.

- Refer to "Note 1 – Summary of significant accounting policies" in VIII – Consolidated financial statements – Credit Suisse (Bank) for a detailed description of the Bank's accounting and valuation principles.
- Refer to "Note 41 – Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)" in VIII – Consolidated financial statements – Credit Suisse (Bank) for information on significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view).

In addition to preparing its own consolidated US GAAP financial statements, Credit Suisse AG is included in the scope of the published annual report of Credit Suisse Group AG, which includes a Group management report and consolidated financial statements prepared under US GAAP. The Bank parent company has no listed shares outstanding. Accordingly, the Bank parent company is exempt from providing certain disclosures in its standalone annual report, such as a management report, a statement of cash flows and certain notes to the financial statements.

Certain reclassifications were made to the prior year's financial statements to conform to the current year's presentation and had no impact on net profit/(loss) or total shareholders' equity.

### Recording of transactions

Transactions are generally recognized on a trade date basis at the point in time when they become legally binding unless specific guidance is provided for settlement date accounting, such as for issuances of debt and structured notes.

### Foreign currency translations

The Bank parent company's reporting currency is Swiss francs (CHF); branches of the Bank parent company can have a functional currency other than Swiss francs.

Transactions denominated in currencies other than the functional currency of the related head office or branch are recorded by remeasuring them in the functional currency of the related head office or branch using the foreign exchange rate on the date of the transaction. As of the date of the balance sheet, monetary assets and liabilities, such as receivables and payables, are reported using the year-end spot foreign exchange rates. Gains and losses from foreign exchange rate differences are recorded in the statement of income in net income/(loss) from trading activities and fair value option. Non-monetary assets and liabilities are recorded using the historic exchange rate.

Assets and liabilities of foreign branches with functional currencies other than the Swiss franc are translated into Swiss franc equivalents using year-end spot foreign exchange rates, whereas revenues and expenses are translated at weighted average foreign exchange rates for the period. All foreign exchange translation effects are recognized in the statement of income in net income/(loss) from trading activities and fair value option.

The following table provides the foreign exchange rates applied for the preparation of the Bank parent company's standalone financial statements.

### Foreign exchange rates

	End of	
	2022	2021
1 USD / 1 CHF	0.92	0.91
1 EUR / 1 CHF	0.99	1.03
1 GBP / 1 CHF	1.12	1.24
100 JPY / 1 CHF	0.70	0.79

### Cash and other liquid assets

Cash and other liquid assets are recognized at their nominal value less any necessary allowance for credit losses.

### Due from banks

Amounts due from banks, including interest due but not paid, are recognized at their nominal value less any necessary allowance for credit losses.

### Securities lending and borrowing, repurchase and reverse repurchase agreements

Securities lending and borrowing as well as repurchase and reverse repurchase agreements are recorded at the nominal value of the cash amounts exchanged less any necessary allowance for credit losses.

### Due from customers and mortgage loans

Amounts due from customers and mortgage loans, including interest due but not paid, are recognized at their nominal value less any necessary allowance for credit losses.

### **Allowance for credit losses and non-accrual financial assets**

The current expected credit loss (CECL) requirements in accordance with US GAAP as allowed under the Swiss GAAP statutory accounting rules for banks apply to all financial assets and off-balance sheet exposures measured at amortized cost or nominal value less allowance for credit losses. The expected credit loss amounts are based on a forward-looking, lifetime CECL model by incorporating reasonable and supportable forecasts of future economic conditions available at the reporting date. The expected credit loss amounts are estimated over the contractual term of the financial assets, taking into account the effect of prepayments. This requires considerable judgment over how changes in macroeconomic factors (MEFs) as well as changes in forward-looking borrower-specific characteristics will affect the expected credit loss amounts.

The Bank parent company measures expected credit losses of financial assets on a collective (pool) basis when similar risk characteristics exist. For financial assets which do not share similar risk characteristics, expected credit losses are evaluated on an individual basis. Expected credit loss amounts are probability-weighted estimates of potential credit losses based on historical frequency, current trends and conditions as well as forecasted MEFs, such as gross domestic product (GDP), unemployment rates and interest rates.

For financial assets that are performing at the reporting date, the allowance for credit losses is generally measured using a probability of default (PD)/loss given default (LGD) approach under which PD, LGD and exposure at default (EAD) are estimated. For financial assets that are credit-impaired at the reporting date, the Bank parent company generally applies a discounted cash flow approach to determine the difference between the gross carrying amount and the present value of estimated future cash flows.

An allowance for credit losses is deducted from the amortized cost base or nominal value, respectively, of the financial asset. Changes in the allowance for credit losses are recorded in the statement of income in (increase)/release of allowance for default risks and losses from interest activities, or, if related to provisions for off-balance sheet credit exposures, in increase/(release) of provisions and other valuation adjustments, and losses.

Accrued interest from financial assets is recognized in the balance sheet in accrued income and prepaid expenses. Current expected credit losses are calculated on accrued interest receivables and any uncollectible accrued interest receivables are written off by reversing the related interest income.

Write-off of a financial asset occurs when it is considered certain that there is no possibility of recovering the outstanding principal. If the amount of loss on write-off is greater than the accumulated allowance for credit losses, the difference results in an additional credit loss. The additional credit loss is first recognized as an addition to the allowance; the allowance is then applied against the gross carrying amount. Any repossessed collateral is initially

measured at fair value. The subsequent measurement depends on the nature of the collateral.

Expected recoveries on financial assets previously written off have to be reflected in the allowance for credit losses; for this purpose, the amount of expected recoveries cannot exceed the aggregate amounts previously written off. Accordingly, expected recoveries from financial assets previously written off may result in an overall negative allowance for credit loss balance.

The Bank parent company's loan portfolios are reflected in the balance sheet in due from customers, due from banks and mortgage loans. A loan is classified as non-performing and thus considered credit impaired no later than when the contractual payments of principal and/or interest are more than 90 days past due. However, management may determine that a loan should be classified as non-performing notwithstanding that contractual payments of principal and/or interest are less than 90 days past due. The Bank parent company continues to add accrued interest receivable to the loan's unpaid principal balance for collection purposes; however, a credit provision is recorded, resulting in no interest income recognition. A loan can be further downgraded to non-interest-earning when the collection of interest is considered so doubtful that further accrual of interest is deemed inappropriate. Generally, non-performing loans and non-interest-earning loans may be restored to performing status only when delinquent principal and interest are brought up to date in accordance with the terms of the loan agreement and when certain performance criteria are met. Interest collected on non-performing loans and non-interest-earning loans is accounted for using the cash basis or the cost recovery method or a combination of both.

### **Trading assets and liabilities**

In order to qualify as trading activity, positions (assets and liabilities) have to be actively managed with the objective of realizing gains from fluctuations in market prices, which includes an ongoing willingness to increase, decrease, close or hedge risk positions. Trading positions also include positions held with the intention of generating gains from arbitrage. The designation as trading position has to be made, and documented accordingly, upon conclusion of the transaction.

Trading securities are carried at fair value with changes in fair value recorded in the statement of income in net income/(loss) from trading activities and fair value option. The fair value is determined using either the price set on a price-efficient and liquid market or a price calculated using a valuation model.

Interest and dividend income resulting from trading positions is recorded in gross income from interest activities. Refinancing costs are not charged to net income from trading activities and fair value option.

Reclassifications between trading assets, financial investments and participations are allowed. Reclassifications between financial investments and participations are recorded at the carrying value.

Reclassifications between trading assets and financial investments or participations, respectively, are recorded at the fair value valid at the time when the decision to reclassify is made. Resulting gains or losses are recognized applying the same accounting principles as for the recognition of results from the disposal of such assets.

### **Derivative financial instruments and hedge accounting**

Derivative financial instruments consist of trading and hedging instruments.

Positive and negative replacement values of outstanding derivative financial instruments arising from transactions for the Bank parent company's own account are disclosed as separate line items in the balance sheet, with related fair value changes recorded in net income from trading activities and fair value option.

Replacement values of derivative financial instruments arising from transactions for the account of customers are recognized only if a risk exists that a customer or other counterparty (e.g., exchange, exchange member, issuer of the instrument or broker) of a transaction is no longer able to meet its obligations, resulting in an exposure to loss for the Bank parent company during the remaining term of the contract.

Hedge accounting is determined, tested for effectiveness and disclosed in accordance with US GAAP as allowed under the Swiss GAAP statutory accounting rules for banks. Derivative financial instruments used as hedging instruments in hedging relationships are always recorded at fair value.

For fair value hedges, gains and losses resulting from the valuation of the hedging instruments are recorded in the same statement of income line items in which gains and losses from the hedged items are recognized. Valuation impacts resulting from fair valuing the risk being hedged of the hedged items are not recorded as an adjustment to the carrying value of the hedged items but are recorded in the compensation account included in other assets or other liabilities.

For cash flow hedges, gains and losses resulting from the valuation of the hedging instruments are deferred and recorded in the compensation account included in other assets or other liabilities. The deferred amounts are released and recorded in the statement of income in the same period when the cash flows from the hedged transactions or hedged items are recognized in earnings.

### **Other financial instruments held at fair value and liabilities from other financial instruments held at fair value**

Financial instruments which are not part of the trading portfolio may be measured at fair value and classified in other financial instruments held at fair value or liabilities from other financial instruments held at fair value if all of the following conditions are met:

- The financial instruments are valued at fair value and are subject to risk management corresponding to that for trading positions including a documented risk management and investment strategy which ensures appropriate recognition, measurement and limitation of the miscellaneous risks.

- An economic hedging relationship between the financial instruments on the asset side and the financial instruments on the liability side exists and gains and losses from the fair valuation of these financial instruments are largely offset (avoidance of an accounting mismatch).
- Impacts of changes in own credit spreads on the fair value of an issued debt instrument following initial recognition cannot be reflected in the statement of income. Impacts of changes in own credit spreads are recognized in the compensation account.

Changes in fair value are recorded in net income from trading activities and fair value option.

### **Financial investments**

Equity securities which do not qualify as trading securities are included in financial investments and measured at the lower of cost or market value (LOCOM). Valuation adjustments are recorded in other ordinary income or other ordinary expenses.

Debt securities which do not qualify as trading securities are included in financial investments and further classified into debt securities held-to-maturity, which the Bank parent company intends to hold until maturity, and debt securities available-for-sale, which the Bank parent company does not intend to hold until maturity.

Debt securities held-to-maturity are measured at amortized cost less allowance for credit losses. An allowance for credit losses related to default risk is reported in the statement of income in increase/(release) of allowance for default risks and losses from interest activities. If debt securities held-to-maturity are sold or repaid before original maturity, the interest component of any realized gains or losses is deferred and amortized over the remaining original life of the debt security.

Debt securities available-for-sale are measured at the lower of amortized cost or market value (LOACOM). Valuation adjustments for credit- and market-related adjustments are recorded in other ordinary income or other ordinary expenses.

### **Participations**

Equity securities in a company which are owned by the Bank parent company qualify as a participation if these securities are held for the purpose of permanent investment, irrespective of the percentage of voting shares held, or, if these equity securities are in a banking and financial market infrastructure enterprise, in particular participations in joint organizations. Participations can be held by the Bank parent company in Switzerland and its foreign branches.

Participations are measured at acquisition cost less any impairments. Goodwill and intangible assets related to the acquisition of a participation are part of the participation's historical cost under Swiss GAAP statutory and not separately identified and recorded. Impairment is assessed individually for each participation at each balance sheet date or at any point in time when facts and circumstances would indicate that an event has occurred which triggers an impairment review. An impairment is recorded if the carrying

value exceeds the fair value of a participation. If the fair value of a participation recovers significantly and is considered sustainable, a prior period impairment can be reversed up to the historical cost value of the participation.

Dividends received from participations are generally recorded as dividend income. If dividend payments from a participation are made in the form of a capital repayment from paid-in capital or if the dividends do not result from sustainable profits and represent repayment of capital previously contributed to the respective participation such dividends are recorded as a reduction of the carrying value of the respective participation.

#### **Other assets and other liabilities**

Other assets and other liabilities are generally recorded at cost or nominal value. Other assets and other liabilities include the net balance of the compensation accounts. The compensation account assets and liabilities include changes in the book values of assets and liabilities that are not recognized in the statement of income of a reporting period. In particular, the compensation accounts are used to record the hedge effectiveness, impacts from changes in own credit spreads and deferred gains or losses from the sale of debt securities held-to-maturity. The gross amounts of compensation account assets and liabilities are offset and reported net on the balance sheet either in other assets or in other liabilities.

#### **Due to banks**

Amounts due to banks are recognized at their nominal value.

#### **Customer deposits**

Amounts due in respect of customer deposits are recognized at their nominal value.

#### **Bonds and mortgage-backed bonds**

Bonds and mortgage-backed bonds are carried at amortized cost. Debt issuance costs are recorded in accrued income and prepaid expenses.

#### **Provisions**

Provisions are recorded to cover specific risks related to a past event prior to the balance sheet date. Further, provisions for probable obligations and for expected credit losses on off-balance sheet credit exposures are recorded. Provisions represent a probable obligation for which the amount and/or due date are uncertain but can be reasonably estimated. Where the time factor has a material impact, the amount of the provision is discounted.

Provisions which are no longer economically necessary and which are not used in the same reporting period to cover probable obligations of the same nature are released to income:

- tax provisions through line item taxes;
- provisions for pension benefit obligations through personnel expenses; and
- provisions for current and expected credit losses related to off-balance sheet credit exposures and other provisions including

litigation provisions through line item increase/(release) of provisions and other value adjustments, and losses.

#### **Commission income**

Commission income is recognized when arrangements exist, services have been rendered, the revenue is fixed or determinable and collectability is reasonably assured. As applicable, commissions and fees are recognized ratably over the service period and either accrued or deferred in the balance sheet in the line items accrued income and prepaid expenses and accrued expenses and deferred income, respectively.

Commission income and commission expense are generally recorded on a gross basis in the statement of income.

#### **Income tax accounting**

Income taxes are based on the tax laws of each tax jurisdiction and are expensed in the period in which the taxable profits are made.

Tax provisions are recognized in the statement of income in the line item taxes and included in provisions on the balance sheet.

In line with the accounting rules for single-entity statutory financial statements, deferred tax assets on net operating losses are not recognized. Deferred taxation items for temporary differences between the carrying value of an asset or a liability under Swiss GAAP statutory and the respective value for tax reporting, i.e., its tax base, are also not recognized.

#### **Extraordinary income and expense**

The recognition of extraordinary income or expense is limited to transactions which are non-recurring and non-operating, such as the disposal of fixed assets or participations, the reversal of prior-period impairment on participations, or income and expense related to other reporting periods if they account for the correction of errors with regard to non-operating transactions of prior periods.

#### **Contingent liabilities and irrevocable commitments**

Contingent liabilities are recorded as off-balance sheet transactions at their maximum potential payment amounts. Irrevocable commitments are recorded as off-balance sheet transactions at their nominal values, except for irrevocable loan commitments that are cancellable with a notice period of six weeks or less. As necessary, related provisions are recorded on the balance sheet in line item provisions.

For undrawn irrevocable loan commitments, the expected credit loss amount is calculated based on the difference between the contractual cash flows that are due to the Bank parent company if the commitment is drawn and the cash flows that the Bank parent company expects to receive, in order to estimate the provision for expected credit losses. For credit guarantees, expected credit losses are recognized for the contingency of the credit guarantee. Provisions for off-balance sheet credit exposures are recognized on the balance sheet in provisions.

## Capital adequacy disclosures

Capital adequacy disclosures for the Group and the Bank parent company are presented in the publications “Pillar 3 and regulatory disclosures – Credit Suisse Group AG” and “Regulatory disclosures – Subsidiaries”, respectively.

- Refer to [credit-suisse.com/regulatorydisclosures](https://www.credit-suisse.com/regulatorydisclosures) for additional information.

## Prior period information

In 2022, the statement of income item “Increase/(release) of provisions and other valuation adjustments, and losses” included additional expenses of CHF 37 million related to 2021 to reflect the impact of a correction in loan commitments that are subject to the expected credit loss approach.

- Refer to “Note 8 – Increase/(release) of provisions and other valuation adjustments, losses and extraordinary income and expenses” and “Note 20 – Provisions and allowance for credit losses” for further information.

For the year ended December 31, 2021, the carrying value of due from customers secured by other collateral was revised from CHF 79,239 million to CHF 87,188 million, reflecting an increase of CHF 7,949 million due to a reassessment of collateral, with the corresponding unsecured exposure reduced by the same amount. Accordingly, the allowance for credit losses on loans and receivables secured by other collateral was revised from CHF 459 million to CHF 604 million, reflecting an increase of CHF 145 million, with the corresponding allowance for credit losses on unsecured loans and receivables reduced by the same amount.

- Refer to “Note 11 – Collateral and impaired loans and receivables” for further information.

For the year ended December 31, 2021, the notional amount of “Interest rate products – Options bought and sold (OTC)” was revised from CHF 162,050 million to CHF 214,558 million, within the corresponding positive replacement value revised from CHF 1,265 million to CHF 1,736 million and the negative replacement value revised from CHF 1,074 million to CHF 1,545 million. Further, the notional amount of “Precious metal products – Options bought and sold (OTC)” was revised from CHF 10,560 million to CHF 11,442 million. With the revision of the positive and negative replacement values, corresponding changes were made to the disclosure of model-based replacement values and the disclosure of replacement values before consideration of master netting agreements.

- Refer to “Note 13 – Derivative financial instruments” for further information.

As noted in our 2021 Annual Report, the Bank parent company identified an accounting issue that was not material to the prior period financial statements. The Bank parent company identified this accounting issue with respect to the net balance sheet treatment relating to the presentation of a limited population of certain securities lending and borrowing activities. As a result, the balance sheet positions for assets and liabilities from securities lending and borrowing, repurchase and reverse repurchase agreements and the related note disclosure related to these activities were presented on a gross basis and prior periods were revised. Beginning with the quarter ended June 30, 2022, the Bank parent company has recorded these securities lending and borrowing transactions as a single unit of account and as a result these transactions will no longer be presented on a gross basis. The Bank parent company did not adjust prior period financial information, which continue to reflect a presentation on a gross basis.

---

## 3 Risk management, derivatives and hedging activities

### Risk management

#### Governance

The risk governance framework of the Bank parent company and its consolidated subsidiaries (the Bank) is based on a “three lines of defense” governance model, where each line has a specific role with defined responsibilities and works in close collaboration to identify, assess and mitigate risks.

The first line of defense represents the function or business area that allows the risk to enter the Bank from clients, employees or other third parties or events and is responsible for identifying, measuring, managing and reporting risks on a front-to-back basis in line with the Board’s risk appetite. The first line of defense is fully accountable for managing risks inherent in its activities.

The second line of defense consists of independent risk management, compliance and control functions which are responsible for establishing risk management framework and associated control standards, and providing independent challenge to the activities,

processes and controls carried out by the first line of defense. In this context, the Risk function (Risk), for example, is responsible for articulating and designing the risk appetite framework across the Bank. The second line of defense can perform and complement the responsibility of identification, measurement, management and reporting of risks, while the first line of defense retains the overall accountability for risk management related to its activities. Independent risk management in the second line of defense is not limited to the Risk and Compliance functions. Instead, it comprises all relevant standard setting and independent review and challenge activities over processes and controls carried out by the first line of defense in relation to the risks faced.

The third line of defense is the Internal Audit function, which monitors the effectiveness of controls across various functions and operations, including risk management, compliance and governance practices.

Risk management of the Bank is aligned to the overall risk management governance of the Group. All members of the Board and the Executive Board of the Bank are also members of the Board

and the Executive Board of the Group. The Bank's governance includes a committee structure and a comprehensive set of corporate policies which are developed, reviewed and approved by the Board, the Executive Board, their respective committees, the Chief Risk Officer of the Group (CRO) and the board of directors of significant subsidiaries, in accordance with their respective responsibilities and levels of authority.

### **Board of Directors**

The Board is responsible for the Bank's overall strategic direction, supervision and control, and for defining the Bank's overall tolerance for risk. In particular, the Board approves the risk management framework and sets overall risk appetite for the Group in consultation with its Risk Committee, among other responsibilities and authorities defined in the Organizational Guidelines and Regulations (OGR).

The **Risk Committee** is responsible for assisting the Board in fulfilling its oversight responsibilities of risk management. These responsibilities include the oversight of the enterprise-wide risk management and practices, the promotion of a sound risk culture with clear accountability and ownership, the review of key risks and resources, and the assessment of the effectiveness and efficiency of the Group's risk function.

The **Audit Committee** is responsible for assisting the Board in fulfilling its oversight duties by monitoring management's approach with respect to financial reporting, internal controls, accounting and legal and regulatory compliance. Additionally, the Audit Committee monitors the qualifications, independence and performance of external auditors and Internal Audit.

The **Conduct and Financial Crime Control Committee** is responsible for assisting the Board in fulfilling its oversight duties with respect to the Bank's exposure to financial crime risk. It is tasked with monitoring and assessing the effectiveness of financial crime compliance programs and initiatives focused on improving conduct and vigilance within the context of combatting financial crime.

The **Compensation Committee** is responsible for determining, reviewing and proposing compensation and related principles for the Bank. Under the compensation risk framework, various corporate functions including Risk, Compliance, General Counsel, People, Internal Audit and Product Control, provide input for the assessment of the divisions' overall risk and conduct performance and determine an overall risk rating. The overall risk rating is shared and discussed with the chairs of the Audit Committee, Conduct and Financial Crime Control Committee and Risk Committee, and is contemplated as part of the divisions' and certain individuals' performance.

The **Digital Transformation and Technology Committee** is responsible for assisting the Board in setting, steering and overseeing the execution of the bank's data, digitalization and technology strategy. The committee is tasked with overseeing the strategically aligned execution of the bank's major digitalization

and technology initiatives as well as governance standards for digital transformation across the bank.

### **Executive Board**

The Executive Board is responsible for establishing the Bank's strategic business plans, subject to approval by the Board, and implementing such plans. It further reviews and coordinates significant initiatives and approves bank-wide policies. The CRO and the Chief Compliance Officer of the Group (CCO) represent the Risk and Compliance functions, respectively, and provide regular information and reports to the Executive Board and the Board.

The **Executive Board Risk Management Committee (ExB RMC)**, co-chaired by the Group's CEO, CRO and CCO, is primarily responsible for steering and monitoring the development and execution of the Group's risk management strategy, approving risk appetite for financial and non-financial risks under its authority, monitoring risk appetite metrics including limit breaches and remediation, as well as reviewing the aggregate and highest risk exposures and risk concentrations. The ExB RMC approves applications for risk limits that require final approval by the Risk Committee or the Board. The ExB RMC is also responsible for reviewing and assessing the internal control system and resolving risk issues raised by subordinated risk committees or ExB RMC members, or escalation to the Board.

The **Group Capital Allocation and Liability Management Committee (Group CALMC)** reviews the funding and balance sheet trends and activities, plans and monitors regulatory and business liquidity requirements and internal and regulatory capital adequacy. Group CALMC also reviews and proposes the contingency funding plan for approval by the Board, reviews the position taking of interest rate risk in the banking book and decides on changes in approaches relating to investment of own equity. Further, it sets internal targets, approves and reviews adherence to internal targets for capital allocation, funding, liquidity and capital management actions, including the review and monitoring of share repurchases.

The **Credit Suisse AG Parent Capital Allocation, Liability and Risk Management Committee (Credit Suisse AG Parent CALRMC)** reviews the capital, liquidity and funding trends and activities of Credit Suisse AG (Bank parent company). The Credit Suisse AG Parent CALRMC reviews and challenges the financial and capital plans of major subsidiaries of the Bank parent company, including key risks and key dependencies, such as dividends or other capital repatriations from the major subsidiaries to the Bank parent company, ahead of approvals by the respective subsidiary governance bodies. The committee also monitors and reviews the Bank parent company's aggregate risk profile, in particular the Bank parent company-specific vulnerabilities, and approves risk appetite for the Bank parent company and its branches.

The **Valuation Risk Management Committee (VARMC)** is responsible for establishing policies regarding the valuation of

certain material assets and the policies and calculation methodologies applied in the valuation process. Further, VARMC is responsible for monitoring and assessing valuation risks, reviewing inventory valuation conclusions and directing the resolution of significant inventory valuation issues.

### **Risk appetite framework**

The Bank maintains a comprehensive Bank-wide risk appetite framework, which is governed by a global policy and provides a robust foundation for risk appetite setting and management across the Bank. A key element of the framework is a detailed statement of the Board-approved risk appetite which is aligned to the Bank's financial and capital plans. The framework also encompasses the processes and systems for assessing the appropriate level of risk appetite required to constrain the Bank's overall risk profile.

The Bank's risk appetite framework is governed by an overarching global policy that encompasses the suite of specific policies, processes and systems, with which the risk constraints are calibrated and the risk profile is managed. Strategic risk objectives (SROs) are effectively embedded across the organization at the Bank, business division and legal entity level through a suite of different types of risk measures (quantitative and qualitative) as part of the Bank's efforts to ensure it operates within the thresholds defined by the Board. The SROs are regularly assessed as part of the continuing enhancements to the Bank's risk management processes. In February 2023, the Board approved an enhanced set of SROs to support the Bank's strategic objectives, which consist of:

- promoting stability of earnings to support performance in line with financial objectives;
- ensuring sound management of funding and liquidity in normal and stressed conditions;
- maintaining capital adequacy under both normal and stressed conditions;
- maintaining the integrity of the Bank's business and operations;
- controlling concentrations within position risk or revenues which may pose a material risk to the Bank;
- managing environmental, social and governance risks as well as impacts related to the provision of financial services in line with our sustainability principles and commitments; and
- managing intercompany risk.

Bank-wide risk appetite is determined in partnership with the financial and capital planning process at least annually, based on bottom-up forecasts, risk-reward and divisional objectives that reflect planned risk usage by the businesses and top-down, in alignment with Board-driven strategic risk objectives and risk appetite. Scenario-based stress testing of financial and capital plans is an essential element in the risk appetite calibration process, through which the strategic risk objectives, financial resources and business plans are aligned. The risk appetite is approved through a number of internal governance forums, including the Credit Suisse AG Parent CALRMC, the Risk Committee and, subsequently, by the Board. Ad hoc risk appetite reviews may be triggered by material market events, material loss

events, material revisions to the financial and capital plans, the internal capital adequacy assessment process (ICAAP) results as well as following breaches of Board-level risk constraints.

The risk appetite statement is the formal plan, approved by the Board, for Bank-wide risk appetite. Legal entity risk appetites are set by the local legal entity board of directors within the limits established by the Bank.

A core aspect of the Bank's risk appetite framework is a sound system of integrated risk constraints. These allow the Bank to maintain the risk profile within its overall risk appetite, and encourage meaningful discussion between the relevant businesses, Risk functions and members of senior management around the evolution of the Bank's risk profile and risk appetite. Considerations include changing external factors (such as market developments, geopolitical conditions and client demand) as well as internal factors (such as financial resources, business needs and strategic views). The Bank's risk appetite framework utilizes a suite of different types of risk constraints to reflect the aggregate risk appetite of the Bank. The risk constraints restrict the Bank's maximum balance sheet and off-balance sheet exposure given the market environment, business strategy and financial resources available to absorb losses.

### **Risk coverage and management**

The Bank uses a wide range of risk management practices to address the variety of risks that arise from its business activities. Policies, processes, standards, risk assessment and measurement methodologies, risk appetite constraints, and risk monitoring and reporting are key components of its risk management practices. The Bank's risk management practices complement each other in the Bank's analysis of potential loss, support the identification of interdependencies and interactions of risks across the organization and provide a comprehensive view of its exposures. The Bank regularly reviews and updates its risk management practices to promote consistency with its business activities and relevance to its business and financial strategies. The Bank's main risk types include the following:

- Capital risk
- Credit risk
- Market risk
- Funding liquidity risk
- Non-financial risk
- Model risk
- Reputational risk
- Climate-related risks
- Business risk
- Fiduciary risk
- Pension risk

Climate-related risks are a core element of sustainability risks. Sustainability risks are potentially adverse impacts on the environment, on people or society, which may be caused by, contributed to or directly linked to financial service providers, usually through the activities of their clients. These may manifest themselves as

reputational risks, but potentially also other risk types such as credit or non-financial risks. Credit Suisse considers sustainability risks in its Group-wide reputational risk review process.

- Refer to “Reputational risk” for further information on sustainability risks.

### **Capital risk**

Capital risk is the risk that the Bank does not have adequate capital to support its activities and maintain the minimum capital requirements. The Bank maintains a robust and comprehensive framework for assessing capital adequacy, defining internal capital targets and ensuring that these capital targets are consistent with the Bank’s overall risk profile and the current operating environment.

Capital risk results from the Bank’s risk exposures, available capital resources, regulatory requirements and accounting standards.

The stress testing framework and economic risk capital are tools used by the Bank to evaluate and manage capital risk. The capital management framework is designed to ensure that the Bank meets all regulatory capital requirements for the Bank and its regulated subsidiaries.

### **Stress testing framework**

Stress testing (or scenario analysis) represents a risk management approach that formulates hypothetical questions, including what would happen to the Bank’s portfolio if, for example, historic or adverse forward-looking events were to occur.

Stress testing is a fundamental element of the Bank-wide risk appetite framework included in overall risk management to ensure that the Bank’s financial position and risk profile provide sufficient resilience to withstand the impact of severe economic conditions. Stress testing results are monitored against limits, and are used in risk appetite discussions and strategic business planning and to support the Bank’s ICAAP. Within the risk appetite framework, the ExB RMC sets Bank-wide and divisional stressed position loss limits to correspond to minimum post-stress capital ratios.

### **Economic risk capital**

Economic risk capital estimates the amount of capital needed to remain solvent and in business under extreme market, business and operating conditions over the period of one year, given a target financial strength (the Bank’s long-term credit rating). This framework allows the Bank to assess, monitor and manage capital adequacy and solvency risk in both “going concern” and “gone concern” scenarios.

### **Credit risk**

Credit risk is the risk of financial loss arising as a result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty.

Credit risk can arise from the execution of the Bank’s business strategy in the divisions and includes risk positions such as exposures directly held in the form of lending products (including

loans, money market deposits and credit guarantees) or traded products (derivatives, securities financing), shorter-term exposures such as underwriting commitments pending distribution, and settlement risk related to the exchange of cash or securities outside of typical delivery versus payment structures.

The Bank uses a credit risk management framework which provides for the consistent evaluation, measurement and management of credit risk across the Bank. Assessment of credit risk exposures for internal risk estimates and risk-weighted assets are calculated based on probability of default (PD), loss given default (LGD) and exposure at default (EAD) models. The credit risk framework incorporates the following core elements:

- counterparty and transaction assessments: application of internal credit ratings (PD), assignment of LGD and EAD values in relation to counterparties and transactions;
- credit limits: establishment of credit limits, including limits based on notional exposure, potential future exposure and stress exposure, subject to approval by delegated authority holders, to serve as primary risk controls on exposures and to prevent undue risk concentrations;
- credit monitoring, impairments and provisions: processes to support the ongoing monitoring and management of credit exposures, supporting the early identification of deterioration and any subsequent impact; and
- risk mitigation: active management of credit exposures through the use of cash sales, participations, collateral, guarantees, insurance or hedging instruments.

In addition to traditional credit exposure measurement, monitoring and management using current and potential future exposure metrics, Credit Risk performs counterparty and portfolio credit risk assessments of the impact of various internal stress test scenarios. Credit Risk assesses the impact to credit risk exposures arising from market movements in accordance with the scenario narrative, which can further support the identification of concentration or tail risks. Its scenario suite includes historical scenarios as well as forward-looking scenarios which are used across the Risk function.

### **Counterparty and transaction assessments**

The Bank evaluates and assesses counterparties and clients to whom it has credit exposures. For the majority of counterparties and clients, the Bank uses internally developed statistical rating models to determine internal credit ratings which are used across the Risk function.

- Refer to “Credit quality information” in Note 21 – Expected credit losses and credit quality for further information on counterparty transaction assessments.

### **Credit limits**

Credit exposures are managed at the counterparty and ultimate parent level in accordance with credit limits which apply in relation to notional exposure, potential future exposure and stress exposure where appropriate. Credit limits are established to constrain the lending business where exposure is typically related to committed loan amounts, and similarly in relation to the trading business where exposure is typically subject to model-based

estimation of future exposure amounts. Credit limits to counter-parties and groups of connected companies are subject to formal approval under delegated authority within the divisions where the credit exposures are generated, and, where significant in terms of size or risk profile, are subject to further escalation to the Group chief credit officer or the CRO.

In addition to counterparty and ultimate parent exposures, credit limits and flags are also applied at the portfolio level to monitor and manage risk concentrations such as to specific industries, countries or products. In addition, credit risk concentration is regularly supervised by credit and risk management committees. Breaches of credit limits and other risk constraints, including stress scenario impacts, are monitored on an ongoing basis with formal escalation procedures in place. Limit breaches require escalation to the relevant limit setting authority.

### **Credit monitoring, impairments and provisions**

A credit quality monitoring process is performed to provide for early identification of possible changes in the creditworthiness of clients, and includes regular asset and collateral quality reviews, business and financial statement analysis, and relevant economic and industry studies. Credit Risk maintains regularly updated watch lists and holds review meetings to re-assess counterparties that could be subject to adverse changes in creditworthiness. The review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment.

In the event that a deterioration in creditworthiness is likely to result in a default, credit exposures are transferred to the regional recovery management functions within Credit Risk. The determination of any allowance for credit losses in relation to such exposures is based on an assessment of the exposure profile and expectations for recovery. The recoverability of loans in recovery management is regularly reviewed. The frequency of reviews depends on the individual risk profile of the respective positions.

The Bank has an impairment process for loans valued at amortized cost which are specifically classified as potential problem loans, non-performing loans, non-interest-earning loans or restructured loans. The Bank maintains specific allowances for credit losses, which the Bank considers to be a reasonable estimate of losses identified in the existing credit portfolio, and provides for credit losses based on a regular and detailed analysis of all counterparties, taking collateral value into consideration, where applicable. If uncertainty exists as to the repayment of either principal or interest, a specific allowance for credit losses is either created or adjusted accordingly. The specific allowance for credit losses is revalued regularly by the recovery management function depending on the risk profile of the borrower or credit-relevant events. The Bank regularly reviews the appropriateness of allowances for credit losses.

- Refer to “Estimating expected credit losses” in Note 21 – Expected credit losses and credit quality for further information on expected credit losses under the CECL accounting guidance.

### **Risk mitigation**

Drawn and undrawn credit exposures are managed by taking financial and non-financial collateral supported by enforceable

legal documentation, as well as by utilizing credit hedging techniques. Financial collateral in the form of cash, marketable securities (e.g., equities, bonds or funds) and guarantees serves to mitigate the inherent risk of credit loss and to improve recoveries in the event of a default. Financial collateral received in the form of securities is subject to controls on eligibility and is supported by frequent market valuation depending on the asset class and are monitored to determine whether any margin calls are required to ensure exposures remain adequately collateralized. Depending on the quality of the collateral, appropriate haircuts are applied for risk management purposes. Collateral monitoring, management and margining are applied to credit exposures resulting from both on balance sheet financing of securities and synthetic financing of positions for clients through derivative contracts.

Non-financial collateral such as residential and commercial real estate, tangible assets (e.g., ships or aircraft), inventories and commodities are valued at the time of credit approval and periodically thereafter depending on the type of credit exposure and collateral coverage ratio.

In addition to collateral, the Bank also utilizes credit hedging in the form of protection provided by single-name and index credit default swaps as well as structured hedging and insurance products. Credit hedging is used to mitigate risks arising from the loan portfolio, loan underwriting exposures and counterparty credit risk. Hedging is intended to reduce the risk of loss from a specific counterparty default or broader downturn in markets that impacts the overall credit risk portfolio. Credit hedging contracts are typically bilateral or centrally cleared derivative transactions and are subject to collateralized trading arrangements. The Bank evaluates hedging risk mitigation so that basis or tenor risk can be appropriately identified and managed.

In addition to collateral and hedging strategies, the Bank also actively manages its loan portfolio and may sell or sub-participate positions in the loan portfolio as a further form of risk mitigation.

### **Market risk**

Market risk is the risk of financial loss arising from movements in market risk factors. The movements in market risk factors that generate financial losses are considered to be adverse changes in interest rates, credit spreads, foreign exchange rates, equity and commodity prices and other factors, such as market volatility and the correlation of market prices across asset classes. A typical transaction or position in financial instruments may be exposed to a number of different market risk factors. Market risks arise from both trading and non-trading activities.

Traded market risks mainly arise from the Bank’s trading activities, primarily in the Investment Bank.

Non-traded market risk primarily relates to asset and liability mismatch exposures in the Bank’s banking books. The Bank’s businesses and Treasury have non-traded portfolios that carry market risks, mainly related to changes in interest rates but also to changes in foreign exchange rates.

The Bank uses market risk measurement and management methods capable of calculating comparable exposures across its many activities and employs focused tools that can model specific characteristics of certain instruments or portfolios. The tools are used for internal market risk management, internal market risk reporting and external disclosure purposes. The Bank's principal market risk measures for traded market risk are VaR, scenario analysis, as included in the stress testing framework, position risk, as included in the Bank's economic risk capital, and sensitivity analysis. These measures complement each other in the Bank's market risk assessment and are used to measure traded market risk at the Bank level. In addition, a counterparty market risk function is designed to support the management of counterparty risk, leveraging product-related market risk knowledge to complement the credit risk approach. The Bank's risk management practices are regularly reviewed to ensure they remain appropriate and fit for purpose.

Non-maturing products, such as savings accounts, have no contractual maturity date or direct market-linked interest rate and are risk-managed on a pooled basis using replication portfolios on behalf of the business divisions. Replication portfolios transform non-maturing products into a series of fixed-term products that approximate the re-pricing and volume behavior of the pooled client transactions.

Structural foreign exchange risk is a market risk stemming from the Bank's investments in foreign operations denominated in currencies other than the reporting currency of the Bank, net of hedges, and is subject to fluctuations in exchange rates. The risk is actively monitored by Treasury to ensure that the level of sensitivity of the Bank's CET1 ratio to adverse movements in foreign exchange rates is within parameters set out in the risk appetite framework. Non-structural foreign exchange risk relates to the foreign currency risk from banking book positions other than from the Bank's investment in foreign operations. This risk is managed under the Bank's traded market risk constraints framework.

### **Funding liquidity risk**

Funding liquidity risk is the risk that the Bank, although solvent, either does not have sufficient financial resources to enable it to meet its obligations as they fall due, or can secure such resources only at excessive cost.

The liquidity and funding strategy is approved by the Group CALMC and overseen by the Board. The implementation and execution of the funding and liquidity strategy is managed by Treasury. The global liquidity group centralizes control of liability and collateral management with the aim of optimizing liquidity sourcing, funding costs and the high-quality liquid assets (HQLA) portfolio within Treasury. Treasury ensures adherence to the Bank's funding policy and the global liquidity group is focused on the efficient coordination of the short-term unsecured and secured funding desks. This approach enhances the Bank's ability to manage potential liquidity and funding risks and to promptly adjust its liquidity and funding levels to meet stress situations. The Bank's liquidity and funding profile is regularly reported to the Credit Suisse AG Parent CAL-RMC, the Group CALMC and the Board, who define the Bank's

risk tolerance, including liquidity risk, and set parameters for the balance sheet and funding usage of its businesses. The Board is responsible for defining the Bank's overall risk tolerance in the form of a risk appetite statement.

### **Non-financial risk**

Non-financial risk is the risk of an adverse direct or indirect impact originating from sources outside the financial markets, including but not limited to operational risk, technology risk, cyber risk, compliance risk, regulatory risk, legal risk and conduct risk. Non-financial risk is inherent in most aspects of the Bank's business, including the systems and processes that support its activities. It comprises a large number of disparate risks that can manifest in a variety of ways. Examples include the risk of damage to physical assets, business disruption, failures relating to data integrity and trade processing, cyber attacks, internal or external fraudulent or unauthorized transactions, inappropriate cross-border activities, money laundering, improper handling of confidential information, conflicts of interest, improper gifts and entertainment and failure in duties to clients.

Non-financial risk can arise from a wide variety of internal and external forces, including human error, inappropriate conduct, failures in systems, processes and controls, pandemic, deliberate attack or natural and man-made disasters. Outsourcing and external third parties may also create risks around maintaining business processes, system stability, data loss, data management, reputation and regulatory compliance.

Each business area and function is responsible for its non-financial risks and the provision of adequate resources and procedures for the management of those risks. They are supported by the designated second line of defense functions responsible for independent risk and compliance oversight, methodologies, tools and reporting within their areas as well as working with management on non-financial risk issues that arise. Businesses and relevant control functions meet regularly to discuss risk issues and identify required actions to mitigate risks.

The Non-Financial Risk function oversees the Bank's established non-financial risk framework (NFRF), providing a consistent and unified approach to evaluating and monitoring the Bank's non-financial risks. Non-financial risk appetites are established and monitored under the Bank-wide risk appetite framework, aligned with the NFRF, which sets common minimum standards across the Bank for non-financial risk and control processes and review and challenge activities.

The Bank's activities to manage non-financial risk capital include scenario analysis and operational risk regulatory capital measurement. In addition, the Bank transfers the risk of potential losses from certain non-financial risks to third-party insurance companies in certain instances.

Non-financial risk scenario analysis is a forward-looking tool that is used to identify and measure exposure to a range of potential adverse events, such as unauthorized trading, transaction processing errors and compliance issues. These scenarios help businesses

and functions assess the suitability of controls in light of existing risks and estimate hypothetical but plausible risk exposures. Scenarios are developed to support stressed loss projections and capital calculations in response to requirements set by regulatory agencies in the jurisdictions in which the Bank operates.

The Bank uses internally validated and approved models to calculate its regulatory capital requirements for non-financial risk (also referred to as “operational risk capital”) across the Bank and for major legal entities. For Bank regulatory capital requirements, a model under the advanced measurement approach (AMA) is applied.

Operational risk capital for the Bank parent company is determined using an income-based allocation of Group-level capital. The ratio of the three-year average of gross income (as defined for calculating the basic indicator approach for operational risk capital under the Basel framework) between the Bank parent company and the Group defines an allocation key used to scale the Group AMA value to reported levels for the Bank parent company. In line with the Group, the operational risk capital for the Bank parent company is now reported in US dollars.

### **Model risk**

Model risk is the risk of adverse consequences from decisions made based on model results that may be incorrect, misinterpreted or used inappropriately. All models and qualitative estimation approaches are imperfect approximations and assumptions that are subject to varying degrees of uncertainty in their output depending on, among other factors, the model’s complexity and its intended application. As a result, modeling and estimation errors may result in inappropriate business decisions, financial loss, regulatory and reputational risk and incorrect or inadequate capital reporting. Model errors, intrinsic uncertainty and inappropriate use are the primary contributors to aggregate Bank-wide model risk. This framework is owned by the Model Risk Management function, which is structured as a second line of defense independent from the first line of defense, i.e., the model users, developers and supervisors who own, develop, implement and maintain models.

Through the global model risk management and governance framework the Bank seeks to identify, measure and mitigate significant risks arising from the use of models embedded within the Bank’s global model ecosystem. Model risks can be managed through a well-designed and robust model risk management framework, encompassing model governance policies and procedures, model validation best practices and actionable model risk reporting.

The Model Risk Management function is responsible for overseeing model risk at Credit Suisse and ensuring compliance with model governance policies and standards. The Model Risk Management function reviews models, reports model limitations to key stakeholders, tracks remediation plans for validation findings and reports on model risk tolerances and metrics to senior management. The Model Risk Management function oversees controls to facilitate a complete and accurate Bank-wide model inventory and coordinates semi-annual attestations by the first line of defense with the aim of achieving completeness and accuracy of its model inventory.

### **Reputational risk**

Reputational risk is the risk that negative perception by the Bank’s stakeholders, including clients, counterparties, employees, shareholders, regulators and the general public, may adversely impact client acquisition and damage the Bank’s business relationships with clients and counterparties, affecting staff morale and reducing access to funding sources.

Reputational risk may arise from a variety of sources, including, but not limited to, the nature or purpose of a proposed transaction or service, the identity or activity of a potential client, the regulatory or political climate in which the business will be transacted, significant public attention surrounding the transaction itself or the potential sustainability risks of a transaction. Sustainability risks have potentially adverse impacts on the environment, on people or society, which may be caused by, contributed to or directly linked to financial service providers, usually through the activities of their clients. These may manifest themselves as reputational risks, but potentially also as other risk types such as credit or non-financial risks. Reputational risk may also arise from reputational damage in the aftermath of a non-financial risk incident, such as cyber crime or the failure by employees to meet expected conduct and ethical standards.

Reputational risk is included in the Bank’s risk appetite framework to ensure that risk-taking is aligned with the approved risk appetite. The Bank highly values its reputation and is fully committed to protecting it through a prudent approach to risk-taking and a responsible approach to business. This is achieved through a culture of risk awareness as well as dedicated processes, resources and policies focused on identifying, evaluating, managing and reporting potential reputational risks. This is also achieved by applying the highest standards of personal accountability and ethical conduct as set out in the Group’s Code of Conduct and the Group’s approach to cultural values and behaviors. Reputational risk potentially arising from proposed business transactions, client activity or joining initiatives or affiliations (including joining third party groups, providing support to causes, speaking engagements, charitable donations, political donations directly or through sponsorships) is assessed in the reputational risk review process. The Group’s global policy on reputational risk requires employees to be conservative when assessing potential reputational impact and, where certain indicators give rise to potential reputational risk, the relevant business proposal or service must be submitted through the reputational risk review process.

For transactions with potential sustainability risks, the internal specialist unit Sustainability Risk evaluates the nature of the transaction and Credit Suisse’s role, the identity and activities of the client and the regulatory context of its operations, and assesses the environmental and social aspects of the client’s operations, products or services. The team determines whether the client’s activities are consistent with the relevant industry standards and whether the potential transaction is compatible with Credit Suisse’s policies and guidelines for sensitive sectors. The outcome of this analysis is submitted to the responsible business unit and/or entered into the reputational risk review process.

## Climate-related risks

Climate-related risks are the potentially adverse direct and indirect impacts on the Bank's financial metrics, operations or reputation due to transition or physical effects of climate change. Climate-related risks are a core element of sustainability risks.

The Bank publishes its climate-related disclosures following the structure provided by the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). These are included in Credit Suisse's Sustainability Report as well as in the TCFD Report. The disclosures include quantitative metrics alongside explanations of the frameworks relied upon, and Credit Suisse's overall climate strategy.

- Refer to [credit-suisse.com/sustainabilityreport](https://credit-suisse.com/sustainabilityreport) for the Group's Sustainability Report 2022 and to [credit-suisse.com/tcfcd](https://credit-suisse.com/tcfcd) for an extract of disclosures in accordance with TCFD.

## Business risk

Business risk is the risk of not achieving the financial goals and ambitions in connection with the Bank's strategy and how the business is managed in response to the external operating environment. External factors include both market and economic conditions, as well as shifts in the regulatory environment. Internally, the Bank faces risks arising from inappropriate strategic decisions, ineffective implementation of business strategies or an inability to adapt business strategies in response to changes in the operating environment, including in relation to client and competitor behavior.

The Bank's businesses are also exposed to a variety of risks that could adversely impact its dividend payments or share buyback programs, including risks associated with the illiquid investments of the Bank. These investments are defined as investments held in the banking book usually with a longer-term time horizon and are not subject to the Bank's market risk framework (e.g., VaR measurement). Illiquid investments include private equity, hedge fund and mutual fund seed and co-investments, strategic investments (e.g., joint ventures and minority investments) as well as other investments, such as collateralized loan obligations mandated by regulatory risk retention requirements. Trading assets and banking book loans are not covered under the illiquid investment risk framework.

Strategic and related financial plans are developed by each division annually and aggregated into a Group financial plan, which is reviewed by the CRO, CFO and the Chief Executive Officer (CEO) before presentation to the full Executive Board and the Board. The divisions and legal entities, including the Bank parent company, operate a parallel and integrated planning process. The Group financial plan serves as the basis for the financial goals and ambitions against which the businesses and legal entities, including the Bank parent company, are assessed regularly throughout the year. These regular reviews include evaluations of financial performance, capitalization and capital usage, key business risks, overall operating environment and business strategy. This enables management to identify and execute changes to the Group's operations and strategy where needed.

## Fiduciary risk

Fiduciary risk is the risk of financial loss arising when the Bank or its employees, acting in a fiduciary capacity as trustee, investment manager or as mandated by law, do not act in the best interest of the client in connection with the provision of advice and/or management of its client's assets including from a product-related market, credit, liquidity, counterparty and non-financial risk perspective.

With regard to fiduciary risk that relates to discretionary investment-related activities, assessing investment performance and reviewing forward-looking investment risks in client portfolios and investment funds is central to the Bank's investment oversight program. This program targets daily, monthly or quarterly monitoring of all portfolio management activities with independent analysis provided to senior management. Formal review meetings are in place as part of the Bank's efforts to ensure that investment performance and risks are in line with expectations and adequately supervised.

Fiduciary risks from activities other than discretionary investment management, such as the advised portfolios, are managed and monitored in a similar oversight program. This program is actively managed in cooperation with the Bank's compliance function and is based on the suitability framework.

## Pension risk

Pension risk is the financial risk from contractual or other liabilities to which the Bank is exposed as a sponsor of and/or participant in pension plans. It is the risk that the Bank may be required to make unexpected payments or other contributions to a pension plan because of a potential obligation (i.e., underfunding).

Sources of risks can be broadly categorized into asset investment risks (e.g., underperformance of bonds, equities and alternative investments) and liability risks, primarily from changes in interest rates, inflation and longevity.

## Use of derivative financial instruments and hedge accounting

### Business policy for use of derivative financial instruments

Derivatives are generally either privately negotiated over-the-counter (OTC) contracts or standard contracts transacted through regulated exchanges. The Bank parent company's most frequently used freestanding derivative products, entered into for trading and risk management purposes, include interest rate, credit default and cross-currency swaps, interest rate and foreign exchange options, foreign exchange forward contracts and foreign exchange and interest rate futures.

On the date a derivative contract is entered into, the Bank parent company designates it as belonging to one of the following categories: trading activities; a risk management transaction that does not qualify as a hedge under accounting standards (referred to as an economic hedge);

a hedge of the fair value of a recognized asset or liability; or a hedge of the variability of cash flows to be received or paid relating to a recognized asset or liability or a forecasted transaction.

### Economic hedges

Economic hedges arise when the Bank parent company enters into derivative contracts for its own risk management purposes, but the economic relationships do not qualify for hedge accounting. These economic hedges include the following types:

- interest rate derivatives to manage net interest rate risk on certain core banking business assets and liabilities;
- foreign exchange derivatives to manage foreign exchange risk on certain core banking business revenue and expense items, core banking business assets and liabilities; as well as selected foreign participations against adverse movements in foreign exchange rates;
- credit derivatives to manage credit risk on certain loan portfolios; and
- futures to manage risk on equity positions including convertible bonds.

Derivatives used in economic hedges are included as trading assets or trading liabilities in the balance sheet.

### Hedge accounting

Hedge accounting for the Bank parent company is determined, recorded and disclosed in accordance with US GAAP as allowed under Swiss GAAP statutory accounting rules for banks.

- Refer to “Note 13 – Derivative financial instruments” for further information on hedge accounting.

### Fair value hedges

The Bank designates fair value hedges as part of an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize fluctuations in earnings that are caused by interest rate volatility. The Bank uses derivatives to hedge for changes in fair value as a result of the interest rate risk associated with loans, debt securities held as available-for-sale and long-term debt instruments.

### Cash flow hedges

The Bank hedges the variability in interest cash flows mainly on mortgages, loans and reverse repurchase agreements by using interest rate swaps to convert variable rate assets to fixed rates.

### Hedge effectiveness assessment

The Bank parent company assesses the effectiveness of hedging relationships both prospectively and retrospectively. The prospective assessment is made both at the inception of a hedging relationship and on an ongoing basis, and requires the Bank parent company to justify its expectation that the relationship will be highly effective over future periods. The retrospective assessment is also performed on an ongoing basis and requires the Bank parent company to determine whether or not the hedging relationship has actually been effective.

## 4 Net income from interest activities

Net income from interest activities for 2021 included an increase of allowance for default risks of CHF 298 million from the adoption of the CECL accounting guidance on January 1, 2021.

### Negative interest income and expense

<u>in</u>	<u>2022</u>	<u>2021</u>
<b>CHF million</b>		
Negative interest income debited to interest income	(224)	(367)
Negative interest expenses credited to interest expense	<u>101</u>	<u>151</u>

Negative interest income is debited to interest income and negative interest expense is credited to interest expense.

5 Net income/(loss) from trading activities and fair value option

in	2022	2021
<b>By risk of underlying instruments (CHF million)</b>		
Interest rate products <sup>1</sup>	(3,219)	(336)
Equity products <sup>1</sup>	(721)	(149)
Foreign exchange	914	905
Precious metals	(73)	5
Commodities <sup>2</sup>	8	(3)
Credit products	530	(1,380)
Other products	(2)	22
<b>Net income/(loss) from trading activities and fair value option</b>	<b><u>(2,563)</u></b>	<b><u>(936)</u></b>
of which net income/(loss) from liabilities valued under the fair value option	<u>5,750</u>	<u>(2,750)</u>

- 1 Includes trading income/(loss) from related fund investments.  
2 Includes energy products.

Trading activities at the Bank parent company level are monitored and managed for legal entity-specific treasury, risk management and capital adequacy purposes and are not measured along divisional or individual business lines. The trading activities of the divisions or individual businesses are monitored and managed mainly at the Group level on the basis of US GAAP financial metrics.

6 Personnel expenses

in	2022	2021
<b>CHF million</b>		
Salaries	1,454	1,480
of which variable compensation expenses <sup>1</sup>	123	259
Social benefit expenses	241	267
of which pension and other post-retirement expenses	135	155
Other personnel expenses	161	73
<b>Personnel expenses</b>	<b><u>1,856</u></b>	<b><u>1,820</u></b>

- 1 Includes current and deferred variable compensation expenses.

7 General and administrative expenses

in	2022	2021
<b>CHF million</b>		
Occupancy expenses	139	137
Information and communication technology expenses	105	89
Furniture and equipment	10	10
Fees to external audit companies	49	45
of which fees for financial and regulatory audits <sup>1</sup>	48	44
of which fees for other services	1	1
Other operating expenses <sup>2</sup>	3,889	4,042
<b>General and administrative expenses</b>	<b><u>4,192</u></b>	<b><u>4,323</u></b>

- 1 Represents total fees for financial statement, regulatory and related audit services paid by legal entity Credit Suisse AG to external audit companies.  
2 Partially related to operating expenses charged by affiliated companies for services provided to the Bank parent company.

8 Increase/(release) of provisions and other valuation adjustments, losses and extraordinary income and expenses

**Increase/(release) of provisions and other valuation adjustments, and losses**

in	2022	2021
<b>CHF million</b>		
Increase/(release) of provisions	283 <sup>1</sup>	114 <sup>2</sup>
Other losses	4	6
<b>Increase/(release) of provisions and other valuation adjustments, and losses</b>	<b><u>287</u></b>	<b><u>120</u></b>

- 1 Primarily related to increases in litigation provisions, partially offset by a net release of provisions for off-balance sheet default risks. In 2022, provisions for off-balance sheet default risks included additional expenses of CHF 37 million related to the prior year. Refer to "Prior period information" in Note 2 – Accounting and valuation principles for further information.  
2 Primarily related to increases in litigation provisions, partially offset by a net release of provisions for off-balance sheet default risks. In 2021, provisions for off-balance sheet default risks included an expense of CHF 13 million from the adoption of the CECL accounting guidance on January 1, 2021.

**Extraordinary income and expenses**

in	2022	2021
<b>CHF million</b>		
Gains realized from the disposal of participations	5	218 <sup>1</sup>
Gains realized from the disposal of tangible fixed assets <sup>2</sup>	271	199
<b>Extraordinary income</b>	<b><u>276</u></b>	<b><u>417</u></b>
Losses realized from the disposal of participations	(62) <sup>3</sup>	0
<b>Extraordinary expenses</b>	<b><u>(62)</u></b>	<b><u>0</u></b>

- 1 Included a gain of CHF 166 million related to the partial sales of Allfunds Group and a gain of CHF 51 million related to the sale of Credit Suisse Life & Pensions AG.  
2 Includes realized gains from the sale of real estate (bank premises).  
3 Reflects a realized loss from the sale of the residual stake in Allfunds Group.

9 Taxes

in	<u>2022</u>	<u>2021</u>
<b>CHF million</b>		
Current income tax (expense)/benefit	241	(203)
Non-income-based tax (expense)/benefit <sup>1</sup>	(32)	(40)
<b>Taxes</b>	<u><u>209</u></u>	<u><u>(243)</u></u>

<sup>1</sup> Includes capital taxes and other non-income based taxes such as UK bank levy costs.

For the financial years ended December 31, 2022 and 2021, the average tax rate, defined as income tax expense divided by the sum of profit before income tax, was 2% and (2)%, respectively. Income tax expense for the financial years ended December 31, 2022 and 2021 reflected a benefit of CHF 203 million and CHF 82 million, respectively, from the utilization of tax losses carried forward. The calculation is based on statutory tax rates applied to the taxable profit against which tax loss carry forwards were utilized.

10 Assets and liabilities from securities lending and borrowing, repurchase and reverse repurchase agreements

end of	<u>2022</u>	<u>2021</u>
<b>CHF million</b>		
Carrying value of receivables from cash collateral paid for securities borrowed and reverse repurchase agreements – gross	59,439	94,414
Impact from master netting agreements	(7,059)	(7,374)

of which mortgage loans	5,025	0	5,025	0	5,025

- 1 Includes the market value of collateral up to the amount of the outstanding related loans and receivables. For mortgage loans, the market value of collateral is determined at the time of granting the loan and thereafter regularly reviewed according to the Bank parent company's risk management policies and directives, with maximum review periods determined by property type, market liquidity and market transparency. For impaired mortgage loans, the market value of collateral is determined annually or more frequently by credit risk management within the impairment review process.
- 2 Other collateral includes various types of eligible collateral, e.g., securities, cash deposits, financial receivables related to factoring, certain real assets such as ownership titles in ship and aircraft, inventories and commodities, as well as certain non-tangible securities such as licensing agreements or guarantees.
- 3 Prior period has been revised. Refer to "Prior period information" in Note 2 – Accounting and valuation principles for further information.

<b>Other liabilities</b>	<b>525</b>	<b>652</b>

- 1 Includes changes in the book value of assets and liabilities that are not recognized in the statement of income, such as impacts from hedge accounting, impacts from changes in own credit spreads and deferred gains or losses from the sale of debt securities held-to-maturity.
- 2 Includes receivables from settlement accounts, security deposits and guarantee funds, coupons, internal clearing accounts and other miscellaneous assets.
- 3 Includes payables from internal clearing accounts, accounts payable for goods and services purchased and other miscellaneous liabilities.

## 17 Pension plans

As of December 31, 2022 and 2021, the Bank parent company did not have any liabilities due to own pension plans.

- Refer to “Note 31 – Pension and other post-retirement benefits” in VIII – Consolidated financial statements – Credit Suisse (Bank) for further information.

### Swiss pension plans

The Bank parent company’s employees are covered by the pension plan of the “Pensionskasse der Credit Suisse Group (Schweiz)” and “Pensionskasse 2 der Credit Suisse Group (Schweiz)” (the Swiss pension plans). Most of the Group’s Swiss subsidiaries and a few companies that have close business and financial ties with the Group participate in both plans. The Swiss pension plans are independent self-insured pension plans set up as trusts and qualify as defined contribution plans (savings plans) under Swiss law.

### Employer contribution reserves

end of / in	Employer contribution reserves – notional		Amount subject to waiver		Employer contribution reserves – net <sup>1</sup>		Increase/(Release) of employer contribution reserves included in personnel expenses	
	2022	2021	2022	2021	2022	2021	2022	2021
<b>CHF million</b>								
Swiss pension plans	27	25	0	0	27	25	0	0
<b>Total</b>	<b>27</b>	<b>25</b>	<b>0</b>	<b>0</b>	<b>27</b>	<b>25</b>	<b>0</b>	<b>0</b>

- 1 In line with Swiss GAAP statutory accounting guidance, contributions to the employer contribution reserves are not recorded in the Bank parent company’s statutory balance sheet.

## 16 Assets pledged

end of	2022		2021	
	Carrying value	Actual liabilities	Carrying value	Actual liabilities
<b>CHF million <sup>1</sup></b>				
Due from banks	0	0	32	32
Due from customers	103	103	0	0
Trading assets	965	883	1,276	706
<b>Assets pledged</b>	<b>1,068</b>	<b>986</b>	<b>1,308</b>	<b>738</b>

- 1 Excludes assets pledged in connection with securities lending and borrowing, repurchase agreements and reverse repurchase agreements.

The Swiss pension plans’ annual financial statements are prepared in accordance with Swiss GAAP FER 26 based on the full population of covered employees. Individual annual financial statements for each participating company are not prepared. As multi-employer plans with unrestricted joint liability for all participating companies, the economic interest in the Swiss pension plans’ over- or underfunding is allocated to each participating company based on allocation keys determined by the plans.

### International pension plans

The Bank parent company’s international employees are covered by mandatory and supplementary pension plans in various locations. These are defined benefit and defined contribution plans, which cover benefits such as disability, old age and death, termination and sickness.

**Pension plan economic benefit/(obligation), pension contributions and pension expenses**

Other provisions	302	(311)	3	0	3	492	(170)	319 <sup>5</sup>
<b>Provisions</b>	<b>544</b>	<b>(382)</b>	<b>(1)</b>	<b>30</b>	<b>3</b>	<b>621</b>	<b>(252)</b>	<b>563</b>

1 Discounted at rates between 2.30% and 8.30%.

2 Provisions are mainly related to irrevocable loan commitments and guarantees. Partially discounted at rates between 1.00% and 15.00%.

3 Changes in provisions for off-balance sheet default risks on non-impaired financial instruments are reflected as a net charge or a net release. The net release included additional expenses of CHF 37 million related to prior year. Refer to "Prior period information" in Note 2 – Accounting and valuation principles for further information.

4 Provisions are not discounted due to their short-term nature.

5 Included litigation provisions of CHF 298 million and CHF 284 million as of December 31, 2022 and 2021, respectively. Partially discounted at rates between 1.80% and 7.93%.

### Allowance for credit losses

	Balance at beginning of period	Utilized for purpose <sup>1</sup>	Reclassifications	Foreign exchange translation differences	Recoveries, interest past due <sup>2</sup>	New charges to income statement <sup>3</sup>	Releases to income statement <sup>3</sup>	Balance at end of period
<b>2022 (CHF million)</b>								
Due from banks	32	0	0	0	0	0	(31)	1
Due from customers	1,666	(193)	4	(12)	146	638	(215)	2,034

Mortgage loans	39	(12)	0	0	3	0	(12)	18
Accrued income and prepaid expenses	3	0	0	1	0	2	(1)	5
<b>Allowance for credit losses</b>	<b>1,740</b>	<b>(205)</b>	<b>4</b>	<b>(11)</b>	<b>149</b>	<b>640</b>	<b>(259)</b>	<b>2,058</b>
of which allowance for credit losses from impaired receivables	1,302	(205)	4	(9)	149	639	(217)	1,663
of which allowance for expected credit losses	438	0	0	(2)	0	1	(42)	395

- 1 Reflects write-offs.
- 2 Includes increases and releases of allowances for interest on non-accrual loans and receivables.
- 3 Changes in allowance for expected credit losses on non-impaired financial assets are recorded as a net charge or a net release per balance sheet position.

## Write-offs

In the Bank parent company's recovery management function covering the Investment Bank and parts of Wealth Management, once the credit provision is greater than 90% of the loan's notional amount, a position may be written down to its net carrying value in the subsequent quarter if all recovery options are exhausted. In the Bank parent company's recovery management functions for the remaining parts of Wealth Management, write-offs are made based on an individual counterparty assessment. An evaluation is performed on the need for write-offs on impaired loans individually and on an ongoing basis, if it is likely that parts of a loan or the entire loan will not be recoverable. Write-offs of residual loan balances are executed once available debt enforcement procedures are exhausted or, in certain cases, upon a restructuring.

Gross write-offs on loans included in the allowance for credit losses year-on-year movements are reflected in the column "Utilized for purpose". Gross write-offs of CHF 205 million in 2022 compared to gross write-offs of CHF 315 million in 2021. In 2022, gross write-offs were mainly related to the sale of coal mining facilities and to individual positions in the consulting services sector, European mortgages and ship finance. In 2021, gross write-offs mainly resulted from the sale of corporate & institutional loans related to a conglomerate in the Asia Pacific region and a real estate company. Write-offs also included positions in ship finance and corporate lending.

Uncollectible accrued interest receivables are written off by reversing net interest income from interest activities.

---

## 21 Expected credit losses and credit quality

This disclosure provides an overview of the Bank parent company's balance sheet positions that include financial assets subject to the CECL accounting guidance. It includes the following main subjects:

- A tabular overview of financial assets subject to the expected credit loss approach and related purchases and sales with counterparties that are not part of Credit Suisse Group;
- A description of the main classes of financial assets subject to the expected credit loss approach, including the main risk characteristics (including the methodology for estimating expected credit losses on non-impaired and impaired financial assets and current-period estimates);
- A description of the methodology for estimating expected credit losses, including disclosures relevant for the Bank

parent company's current-period estimate of expected credit losses;

- Credit quality information (including monitoring of credit quality and internal ratings); and
- Past due financial assets.

As of December 31, 2022, the Bank parent company had no purchased financial assets with more than insignificant credit deterioration since origination.

Financial receivables and debt securities held with entities under common control are not subject to the CECL accounting guidance and related disclosures.

- 1 Excludes balances with entities under common control which are not subject to the CECL accounting guidance and related disclosures. Reflects the nominal value except where indicated.
- 2 Includes allowances for credit losses on impaired receivables (specific allowances for credit losses) and allowances for expected credit losses (non-specific allowances for credit losses).
- 3 Excluded accrued interest before allowance for credit losses in the total amount of CHF 399 million and a related allowance for credit losses of CHF 1 million. These accrued interest balances are reported in the balance sheet in accrued income and prepaid expenses in accordance with Swiss GAAP statutory guidance.
- 4 Excluded accrued interest before allowance for credit losses in the total amount of CHF 254 million and a related allowance for credit losses of CHF 1 million. These accrued interest balances are reported in the balance sheet in accrued income and prepaid expenses in accordance with Swiss GAAP statutory guidance.
- 5 Includes only debt securities held-to-maturity. The gross amount reflects the amortized cost base.
- 6 The gross amount reflects the nominal value or cost base.

In 2022 and 2021, the following purchases and sales of financial assets subject to the CECL accounting guidance were carried out by the Bank parent company and affected the asset base subject to the estimate of the allowances for expected credit losses.

### Purchases and sales

in	2022		2021	
	Purchases	Sales <sup>1</sup>	Purchases	Sales <sup>1</sup>
<b>CHF million</b>				
Due from customers	0	2,391	282 <sup>2</sup>	4,591

Financial investments <sup>3</sup>	<u>971</u>	<u>0</u>	<u>0</u>	<u>0</u>

- 1 Excludes the sub-participation of loans in syndication-like financings where the Bank parent company is the originator of the loan.
- 2 Includes drawdowns under purchased loan commitments.
- 3 Includes only debt securities held-to-maturity.

institutions. The main risk characteristics of each of these sub-categories and the line items of the Bank parent company's balance sheet, which include these portfolios, are described below:

- Mortgages includes lending instruments secured by residential real estate; such credit exposure is sensitive to the level of interest rates and unemployment as well as real estate valuation. Mortgages are reported in mortgage loans, except for building loans, which are reported in due from customers.
- Loans collateralized by securities primarily includes lending secured by marketable financial collateral (e.g., equities, bonds, investment funds and precious metals); such credit exposure is sensitive to market prices for securities which impact the value of financial collateral. All loans collateralized by securities are reported in due from customers.
- Consumer finance includes lending to private individuals such as personal loans; such credit exposure is sensitive to MEFs, including economic growth, unemployment and interest rates. All consumer finance loans are reported in due from customers.

## **Main classes of financial assets subject to expected credit loss measurement and risk characteristics**

### **Loans**

The Bank parent company's loan portfolios, the main class of financial assets subject to the CECL accounting guidance, are reflected in the balance sheet in due from customers, due from banks and mortgage loans. For the US GAAP CECL accounting guidance applied by the Group and its subsidiaries, loans, which include sales-type and direct financing leases, are classified into two broad categories, consumer loans and corporate & institutional loans. Consumer loans include mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans include real estate loans, commercial and industrial loans, loans to financial institutions and loans to governments and public

- Real estate includes lending backed by commercial or income-producing real estate; such credit exposure is sensitive to MEFs, including economic growth, unemployment, interest rates and industrial production as well as real estate valuation. A majority of real estate loans are reported in due from customers, with the remaining balance in mortgage loans.
- Commercial and industrial loans includes lending to corporate clients including small and medium-sized enterprises, large corporates and multinational clients; such credit exposure is sensitive to MEFs, including economic growth, unemployment and industrial production. Most of the commercial and industrial loans are reported in due from customers, with the remaining balance in mortgage loans.
- Financial institutions includes lending to financial institutions such as banks and insurance companies; such credit exposure

is sensitive to MEFs, including economic growth. Most of the loans to financial institutions are reported in due from customers, with the remaining balances in due from banks and mortgage loans.

- Governments and public institutions includes lending to central government and state-owned enterprises; such credit exposure is sensitive to MEFs, including economic growth. All loans to governments and public institutions are reported in due from customers.

As of December 31, 2022, loans collateralized by securities, commercial and industrial loans and loans to financial institutions were the largest sub-categories within the loan portfolio of the Bank parent company.

#### **Financial investments – debt securities held-to-maturity**

In 2022, the Bank parent company purchased US Treasury securities amounting to CHF 971 million. As of December 31, 2022, these US Treasury securities held-to-maturity had a carrying value of CHF 921 million and were rated “AAA” based on the Bank parent company’s internal counterparty rating. US Treasury securities have a history of no credit losses and market price movements mainly reflect changes in market interest rates. Based on this history of no credit losses and the Bank parent company’s view of the current and forecasted economic environment, the Bank parent company expects the risk of non-payment for US Treasuries to be zero and does not have an allowance for credit losses for these securities. The credit quality of these securities is monitored on an ongoing basis and the zero-loss expectation is validated on at least a quarterly basis through the Bank parent company’s governance structure involving the Credit Risk and Treasury functions.

As of December 31, 2021, the Bank parent company held a portfolio of debt securities held-to-maturity that represented positions in a commercial paper with a single issuer with original maturities up to three months which are held as collateral in a secured structured credit-linked loan transaction for a client. These commercial papers met the requirement of a cash equivalent under US GAAP, were highly rated and also qualified as high quality liquid assets. As of December 31, 2021, the carrying value of this portfolio of debt securities held-to-maturity was CHF 305 million, with no related allowance for credit losses.

#### **Other classes of financial assets**

Other classes of financial assets subject to the CECL accounting guidance, which are not reported as loans or debt securities held-to-maturity described above, include mainly the following balance sheet positions and related risk characteristics:

- Cash and other liquid assets includes primarily cash balances with central banks; such credit exposure is sensitive to the credit rating and profile of the central bank.
- Due from banks includes balances held with banks. In addition to certain loans to financial institutions described further above, due from banks includes primarily nostro accounts as well as settlement accounts and margin accounts with broker

banks; such credit exposure is sensitive to the credit rating and profile of the counterparty bank.

- Due from customers includes balances held with customers. In addition to the non-mortgage loans described further above, due from customers includes primarily settlement accounts and margin accounts with non-bank brokers; such credit exposure is sensitive to the credit rating and profile of the related counterparty.
- Securities borrowing and reverse repurchase agreements includes lending and borrowing of securities against cash or other financial collateral; such credit exposure is sensitive to the credit rating and profile of the counterparty and relative changes in the valuation of securities and financial collateral.

#### **Estimating expected credit losses**

The following key elements and processes of estimating expected credit losses apply to the Bank parent company’s major classes of financial assets that are subject to the CECL accounting guidance.

#### **Expected credit losses on non-impaired credit exposures**

Expected credit loss models for non-impaired credit exposures have three main inputs: (i) PD, (ii) LGD and (iii) EAD. These parameters are derived from internally developed statistical models which are based on historical data and leverage regulatory models under the advanced internal ratings-based (A-IRB) approach. Expected credit loss models use forward-looking information to derive point-in-time estimates of forward-looking term structures.

PD estimates are based on statistical rating models and tailored to various categories of counterparties and exposures. These statistical rating models are based on internally and externally compiled data comprising both quantitative and qualitative factors. A migration of a counterparty or exposure between rating classes generally leads to a change in the estimate of the associated PD. Lifetime PDs are estimated considering the expected macroeconomic environment and the contractual maturities of exposures, adjusted for estimated prepayment rates where applicable. Internal credit ratings form a significant input to the model derived CECL PDs. For the majority of counterparties, internal credit ratings are determined via statistical rating models, which are developed under the A-IRB approach of the Basel framework. The models are tailored to the specific business of the respective obligor and are intended to reflect the risk of default over a one-year period of each counterparty. The Bank parent company has received approval from its primary regulator to use, and has fully implemented, the A-IRB approach.

LGD estimates the size of the expected loss that may arise on a credit exposure in the event of a default. The Bank parent company estimates LGD based on the history of recovery rates of claims against defaulted counterparties, considering, as appropriate, factors such as differences in product structure, collateral type, seniority of the claim, counterparty industry and recovery

costs of any collateral that is integral to the financial asset. Certain LGD values are also calibrated to reflect the expected macro-economic environment.

EAD represents the expected amount of credit exposure in the event of a default. It reflects the current drawn exposure with a counterparty and an expectation regarding the future evolution of the credit exposure under the contract or facility, including amortization and prepayments. The EAD of a financial asset is the gross carrying amount at default, which is modeled based on historical data by applying a term structure and considering portfolio-specific factors such as the drawn amount as of the reporting date, the facility limit, amortization schedules, financial collateral and product type. For certain financial assets, the Bank parent company determines EAD by modeling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

Where a relationship to macroeconomic indicators is statistically sound and in line with economic expectations, the parameters are modeled accordingly, incorporating the Bank parent company's forward-looking forecasts and applying regional segmentations where appropriate.

The ability to forecast credit losses over the reasonable and supportable period is based on the ability to forecast economic activity over a reasonable and supportable time window. The Bank parent company's macroeconomic and market variable forecasts for the CECL scenarios cover a five-year time horizon. For periods beyond that reasonable and supportable forecast period, the Bank parent company immediately reverts to average economic environment variables as model input factors. In the downside and upside scenarios, mean reversion to the base case projected paths will commence in year three, with full convergence occurring in years four and five for certain macroeconomic factors.

Alternative qualitative estimation approaches are used for certain products. For lombard loans (including share-backed loans), the PD/LGD approach used does not consider the Bank parent company's forward-looking forecasts as these are not meaningful for the estimate of expected credit losses in light of the short time-frame considered for closing out positions under daily margining arrangements. For international private residential mortgages and securitizations, the Bank parent company applies qualitative approaches where credit specialists follow a structured process and use their expertise and judgment to determine the amounts of expected credit losses.

The Bank parent company measures expected credit losses considering the risk of default over the maximum contractual period (including any borrower's extension options) during which it is exposed to credit risk, even if the Bank parent company considers a longer period for risk management purposes. The maximum contractual period extends to the date at which the Bank parent company has the right to require repayment of an advance or terminate an irrevocable loan commitment or a credit guarantee.

For off-balance sheet credit exposures, methodology, scenarios and MEFs used to estimate the provision for expected credit losses are the same as those used to estimate the allowance for credit losses for financial assets held at amortized cost. For the EAD models, a credit conversion factor or similar methodology is applied to off-balance sheet credit exposures in order to project the additional drawn amount between current utilization and the committed facility amount.

### **Expected credit losses on impaired credit exposures**

Expected credit losses for individually impaired credit exposures are measured by performing an in-depth review and analysis of these exposures, considering factors such as recovery and exit options as well as collateral and the risk profile of the borrower. The individual measurement of expected credit losses for impaired financial assets also considers reasonable and supportable forward-looking information that is relevant to the individual counterparty (idiosyncratic information) and reflective of the macroeconomic environment that the borrower is exposed to, apart from any historical loss information and current conditions. If there are different scenarios relevant for the individual expected credit loss measurement, they are considered on a probability-weighted basis. The related allowance for credit losses is revalued by the recovery management function, at least annually or more frequently, depending on the risk profile of the borrower or credit-relevant events.

For credit-impaired financial assets, the expected credit loss is measured using (i) the present value of estimated future cash flows discounted at the contractual interest rate of the loan, (ii) the fair market value of collateral where the loan is collateral-dependent, (iii) the market price if a loan is traded and/or a market price can be readily determined for a related instrument or (iv) alternative recovery valuation methods such as multiples and liquidation values of assets. The impaired credit exposures and related allowance are revalued to reflect the passage of time.

For all classes of financial assets, the trigger to detect an impaired credit exposure is non-payment of interest, principal amounts or other contractual payment obligations, or when, for example, the Bank parent company may become aware of specific adverse information relating to a counterparty's ability to meet its contractual obligations, despite the current repayment status of its particular credit facility. For credit exposures where repayment is dependent on collateral, a decrease in collateral values can be an additional trigger to detect an impairment.

Restructured loans are considered impaired credit exposures in line with the bank's policies and subject to individual assessment and provisioning for expected credit losses by the recovery management function.

In addition, loans managed on the Swiss platform are reviewed depending on event-driven developments. All corporate and institutional loans are reviewed at least annually based on the borrower's financial statements and any indications of difficulties they may experience. Loans that are not impaired, but which are of

special concern due to changes in covenants, downgrades, negative financial news and other adverse developments, are either transferred to recovery management or included on a watch list. All loans on the watch list are reviewed at least quarterly to determine whether they should be released, remain on the watch list or be moved to recovery management. For loans in recovery management from the Swiss platform, larger positions are reviewed on a quarterly basis for any event-driven changes. Otherwise, these loans are reviewed at least annually. All loans in recovery management on international platforms are reviewed on at least a monthly basis.

### Macroeconomic scenarios

The estimation and application of forward-looking information requires quantitative analysis and significant expert judgment. The Bank parent company's estimation of expected credit losses is based on a discounted probability-weighted estimate that considers three future macroeconomic scenarios: a baseline scenario, an upside scenario and a downside scenario. The baseline scenario represents the most likely outcome. The two other scenarios represent more optimistic and more pessimistic outcomes, with the downside scenario being more severe than the upside scenario. The scenarios are probability-weighted according to the Bank parent company's best estimate of their relative likelihood based on historical frequency, an assessment of the current business and credit cycles as well as the macroeconomic factor trends.

The scenario design team within the Group's Enterprise Risk Management (ERM) function determines the macroeconomic factors (MEFs) and market projections that are relevant for the Bank parent company's three scenarios across the overall credit portfolio subject to the CECL accounting guidance. The scenario design team formulates the baseline scenario projections used for the calculation of expected credit losses from the Group's global chief investment office in-house economic research forecasts and, where deemed appropriate, from external sources such as the Bloomberg consensus of economist forecasts (covering the views of other investment banks and external economic consultancies), forecasts from nonpartisan think tanks, major central banks and multilateral institutions, such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD) and the World Bank. For factors where no in-house or credible external forecasts are available, an internal model is used to calibrate the baseline scenario projections. The downside and upside scenarios are derived from these baseline scenario projections. These three scenario projections are subject to a review and challenge process and any feedback from this process is incorporated into the scenario projections by the ERM scenario design team. The CECL scenario design working group is the governance forum. The working group performs an additional review and challenge and subsequently recommends

approval of the MEFs and related market projections as well as the occurrence probability weights that are allocated to the baseline, downside and upside scenarios. MEFs and related market projections as well as the scenario occurrence probability weights used for the calculation of expected credit losses are approved by the Senior Management Approval Committee.

### Current-period estimate of expected credit losses on non-impaired credit exposures

One of the most significant judgments involved in estimating the Bank parent company's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the forecast period, with modeled credit losses being driven primarily by a set of 34 MEFs. The key MEFs used in each of the macro-economic scenarios for the calculation of the expected credit losses include, but are not limited to, GDP and industrial production growth rates. These MEFs are used in the portfolio- and region-specific CECL models and have been selected based on statistical criteria and expert judgment to explain expected credit losses. The table "Selected macroeconomic factors" includes the Bank parent company's forecast of selected MEFs for 2023 and 2024, as estimated as of December 31, 2022. The comparative information includes the forecast of MEFs selected and estimated as of December 31, 2021.

As of December 31, 2022, the forecast macroeconomic scenarios were weighted 50% for the baseline, 40% for the downside and 10% for the upside scenario, unchanged compared to the scenario weightings applicable as of December 31, 2021. The MEFs included in the table represent the four-quarter average forecasts for 2023 and 2024 at the end of each reporting period. These MEFs forecasts are recalibrated on a monthly basis and certain CECL models consume data with a time lag or are influenced by statistical base effects from an earlier period. The quarterly series for China real GDP and world industrial production returned to pre-pandemic levels (i.e., the fourth quarter of 2019) in the second and third quarter of 2020, respectively, while the quarterly series for US real GDP returned to pre-pandemic levels in the first quarter of 2021, based on the latest published statistical data available. The macroeconomic and market variable projections incorporate adjustments to reflect the impact of accelerated monetary policy tightening by the world's major central banks in response to high inflation rates, the impact of Russia's invasion of Ukraine on energy and food prices as well as the macroeconomic impact of the property sector slowdown in China. While GDP and industrial production growth rates as well as unemployment rates are significant inputs to the forecast models, a range of other inputs are also incorporated for all three scenarios to provide projections for future economic and market conditions. Given the complex nature of the forecasting process, no single economic variable is viewed in isolation or independently of other inputs.

## Selected macroeconomic factors

	Forecast 2023	Forecast 2024
<b>end of 2022</b>		
<b>US real GDP growth rate (%)</b>		
Downside	(1.7)	0.5
Baseline	0.9	1.5

Downside	0.0	2.0
Baseline	3.0	3.0
Upside	4.4	3.7

Forecasts represent the four-quarter average estimate of the respective macroeconomic factor as determined at the end of each reporting period.

Expected credit losses are not solely derived from MEF projections. Model overlays based on expert judgment are also applied, considering historical loss experience and industry and counter-party reviews, and primarily impacting certain corporate and institutional loans portfolios. Such overlays are designed to address circumstances where in management's judgment the CECL model outputs are overly sensitive to the effect of economic inputs that exhibit significant deviation from their long-term historical averages. Overlays may also be used to capture judgment on the economic uncertainty from global or regional developments with severe impacts on economies. The Bank parent company's non-specific allowance for expected credit losses on balance sheet and off-balance sheet credit exposures as of December 31, 2022 decreased compared to December 31, 2021. Model overlays were recalibrated during the year to take into account updated input elements based on expert judgment which led to a release. Overlays continued to be closely aligned with the macro-economic forecasts and associated scenario weightings.

### Interest income attributable to the passage of time

For financial assets held at amortized cost, for which the Bank parent company measures expected credit losses based on the discounted cash flow methodology, the entire change in present value is reported in the statement of income in (increase)/release of allowance for default risks and losses from interest activities.

## Credit quality information

The Bank parent company monitors the credit quality of financial assets held at amortized cost with the application of the Group credit risk management framework, which provides for the consistent evaluation, measurement and management of credit risk across the Bank.

Evaluation, measurement and management of credit exposures recorded in the Bank parent company follows the same approach as for the Group and reflects the specific exposure profile of the legal entity. Assessments of credit risk exposures for internal risk estimates and risk-weighted assets are calculated based on PD, LGD and EAD models.

- Refer to “Expected credit losses on non-impaired credit exposures” for further information on PD, LGD and EAD.

The credit risk management framework incorporates the following core elements:

- Counterparty and transaction assessments: application of internal credit ratings (using PD), assignment of LGD and EAD values in relation to counterparties and transactions;
- Credit limits: establishment of credit limits, including limits based on notional exposure, potential future exposure and stress exposure, subject to approval by delegated authority holders, to serve as primary risk controls on exposures and to prevent undue risk concentrations;
- Credit monitoring, impairments and provisions: processes to support the ongoing monitoring and management of credit exposures, supporting the early identification of deterioration and any subsequent impact; and
- Risk mitigation: active management of risk mitigation provided in relation to credit exposures, including through the use of cash sales, participations, collateral or guarantees or hedging instruments.

In addition to traditional credit exposure measurement, monitoring and management using current and potential future exposure metrics, Credit Risk performs counterparty and portfolio credit risk assessments of the impact of various internal stress test scenarios. Credit Risk assesses the impact to credit risk exposures arising from market movements in accordance with the scenario narrative, which can further support the identification of concentration or tail risks. The scenario suite includes historical scenarios as well as forward-looking scenarios which are used across the Risk function.

Credit Risk evaluates and assesses counterparties and clients to whom the Bank parent company has credit exposures, primarily using internal rating models. Credit Risk uses these models to determine internal credit ratings which are intended to reflect the PD of each counterparty.

For a majority of counterparties and clients, internal ratings are based on internally developed statistical models that have been

backtested against internal experience and validated by a function independent of model development. Findings from backtesting serve as a key input for any future rating model developments. The Bank parent company’s internally developed statistical rating models are based on a combination of quantitative factors (e.g., financial fundamentals, such as balance sheet information for corporates and loan-to-value (LTV) ratio and the borrower’s income level for mortgage lending, and market data) and qualitative factors (e.g., credit histories from credit reporting bureaus and economic trends).

For the remaining counterparties where statistical rating models are not used, internal credit ratings are assigned on the basis of a structured expert approach using a variety of inputs, such as peer analyses, industry comparisons, external ratings and research as well as the judgment of senior credit officers.

In addition to counterparty ratings, Credit Risk also assesses the risk profile of individual transactions and assigns transaction ratings which reflect specific contractual terms such as seniority, security and collateral.

Internal credit ratings may differ from external credit ratings, where available, and are subject to periodic review depending on exposure type, client segment, collateral or event-driven developments. The Bank parent company’s internal ratings are mapped to a PD band associated with each rating which is calibrated to historical default experience using internal data and external data sources. The Bank parent company’s internal rating bands are reviewed on an annual basis with reference to extended historical default data and are therefore based on stable long-run averages. Adjustments to PD bands are only made where significant deviations to existing values are detected. The last update was made in 2012 and since then no significant changes to the robust long-run averages have been detected.

The Bank parent company uses internal rating methodologies consistently for the purposes of approval, establishment and monitoring of credit limits and credit portfolio management, credit policy, management reporting, risk-adjusted performance measurement, economic risk capital measurement and allocation and financial accounting.

A credit quality monitoring process is performed to provide for early identification of possible changes in the creditworthiness of clients and includes regular asset and collateral quality reviews, business and financial statement analysis and relevant economic and industry studies. Credit Risk maintains regularly updated watch lists and holds review meetings to re-assess counterparties that could be subject to adverse changes in creditworthiness. The review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment.

- Refer to “Expected credit losses on impaired exposures” for further information on credit monitoring.

## Past due financial assets

Generally, a financial asset is deemed past due if the principal and/or interest payment has not been received on its due date.

### Past due financial assets

end of	Current	Past due				Total	Total
		Up to 30 days	31-60 days	61-90 days	More than 90 days		
<b>2022 (CHF million) <sup>1</sup></b>							
Due from banks	1,013	0	0	0	0	0	<b>1,013 <sup>2</sup></b>
Due from customers	83,120	296	2	46	1,835	2,179	<b>85,299 <sup>2</sup></b>
Mortgage loans	4,953	0	0	0	98	98	<b>5,051 <sup>2</sup></b>

Excludes balances with entities under common control which are not subject to the CECL accounting guidance and related disclosures. Excludes financing receivables with an original maturity of less than one year which are not subject to disclosure of past due amounts under the CECL accounting guidance.

<sup>1</sup> Reflects gross amounts before allowance for credit losses.

<sup>2</sup> Excluded accrued interest in the total amount of CHF 395 million and CHF 253 million as of December 31, 2022 and 2021, respectively.

<sup>3</sup> Includes only debt securities held-to-maturity.

As of December 31, 2022 and 2021, the Bank parent company did not have any financial assets subject to the CECL

accounting guidance that were more than 90 days past due and still accruing interest.

## 22 Composition of share capital, conversion and reserve capital

end of	2022		2021	
	Quantity	Total nominal value (CHF million)	Quantity	Total nominal value (CHF million)
<b>Share capital</b>				
Registered shares (at CHF 1 par value per share)	4,399,680,200	4,400 <sup>1</sup>	4,399,680,200	4,400 <sup>1</sup>
<b>Total share capital</b>		<b>4,400</b>		<b>4,400</b>
<b>Conversion and reserve capital</b>				
Unlimited conversion capital (at CHF 1 par value per share) <sup>2</sup>	unlimited	unlimited	unlimited	unlimited
Reserve capital (at CHF 1 par value per share) <sup>3</sup>	4,399,665,200	4,400	4,399,665,200	4,400
of which used for capital increases	0	0	0	0
of which reserved for planned capital increases	0	0	0	0

<sup>1</sup> The dividend eligible capital equals the total nominal value. As of December 31, 2022 and 2021, the total nominal value of registered shares was CHF 4,399,680,200 and fully paid.

<sup>2</sup> For information on principal characteristics of unlimited conversion capital, refer to Article 4d in the Articles of Association of the Bank parent company.

<sup>3</sup> For information on principal characteristics of reserve capital, refer to Article 4e in the Articles of Association of the Bank parent company.

## Non-distributable reserves

As of December 31, 2022 and 2021, the amount of non-distributable reserves in accordance with the Swiss Code of Obligations and the Bank parent company's articles of association was CHF 2,200 million. Not reflected in this amount are reserves

which the Bank parent company is required to retain in order to meet the regulatory capital requirements as a going concern.

## Transactions with shareholders

<sup>1</sup> All shares with voting rights.

<sup>2</sup> Pro-forma numbers calculated based on the percentage interest held in Group shares as per the share register of the Group on December 31 of the reporting period. Includes shareholders registered as nominees.

<sup>3</sup> Nominee holdings exceeding 2% are registered with a right to vote only if the nominee confirms that no individual shareholder holds more than 0.5% of the outstanding share capital or if the nominee discloses the identity of any beneficial owner holding more than 0.5% of the outstanding capital.

## Information received from shareholders of the Group not registered in the share register

In addition to the shareholdings registered in the share register of the Group, the Group has obtained and reported to the SIX Swiss Exchange information from its shareholders in accordance with the notification requirements of the Swiss Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading. These shareholders may hold their shareholdings in Group shares through a nominee. The following shareholder notifications relate to registered voting rights exceeding 5% of all voting rights, which are subject to disclosure in the notes to the financial statements in accordance with Swiss GAAP statutory. The percentage shareholdings below are presented with two decimal places.

In a disclosure report that the Group published on November 17, 2021, the Group was notified that as of November 12, 2021, Qatar Holding LLC, a wholly-owned subsidiary of Qatar Investment Authority, held 133.2 million shares, or 5.03% of the voting rights, of the registered Group shares issued as of the date of the notified transaction.

In a disclosure report that the Group published on December 10, 2022, the Group was notified that as of December 9, 2022, the Saudi National Bank held 395.5 million shares, or 9.88% of the voting rights, of the registered Group shares issued as of the date of the notified transaction.

In a disclosure report that the Group published on December 8, 2022, the Group was notified that as of November 29, 2022, Harris Associates L.P.'s holdings of registered Group shares had fallen below the 5% reporting threshold.

## Shareholders with a qualified participation

As of December 31, 2022, Credit Suisse Group AG as direct shareholder of Credit Suisse AG is the only shareholder with a qualified participation in accordance with Bank Law.

- Refer to "Note 25 – Amounts receivable from and amounts payable to related parties" for further information on shareholders with a qualified participation.

## 548 Parent company financial statements – Credit Suisse (Bank)

## 24 Shareholdings of the Board of Directors, Executive Board and employees and information on compensation plans

- Refer to “V – Compensation” for a comprehensive disclosure of compensation to the Board of Directors and the Executive Board of Credit Suisse Group AG.
- Refer to “Note 25 – Shareholdings” in VII – Parent company financial statements – Credit Suisse Group for information on shareholdings of the Board of Directors and the Executive Board of the Bank parent company.

In 2022 and 2021, the Bank parent company’s total expenses related to deferred compensation plans were CHF 63 million and CHF 129 million, respectively.

For 2022 and 2021, all share-based compensation plans of the Bank parent company were either settled in shares of the Group parent company (Group shares) or in cash on the basis of the fair value of the Group shares.

### Share-based awards outstanding

end of	2022		2021	
	Number of share-based awards outstanding in million	Fair value in CHF million	Number of share-based awards outstanding in million	Fair value in CHF million
<b>Share-based awards<sup>1</sup></b>				
Employees	46.3	128	37.8	336
<b>Share-based awards outstanding</b>	<b>46.3</b>	<b>128</b>	<b>37.8</b>	<b>336</b>

- <sup>1</sup> All share-based compensation plans of the Bank parent company are plans based on virtual shares and either settled in shares of the Group or in cash on the basis of the fair value of the Group shares.

All members of the Board of Directors and the Executive Board of the Bank parent company are also members of the Board of Directors and the Executive Board of the Group parent company. Compensation to members of the Executive Board is determined by the Group parent company on the basis of their overall function and responsibilities in the Group and paid by different legal entities of the Group depending on work location, local contracts, laws and regulations. A presentation of deferred share-based compensation awards to members of the Executive Board recorded by the Bank parent company would not appropriately reflect the Executive Board of the Bank parent company, as it would only consider those members for whom compensation is administrated by the Bank parent company.

As of December 31, 2022 and 2021, the Bank parent company did not have any option plans with outstanding options.

### Compensation plans

In 2022, the Bank parent company granted share awards, performance share awards, strategic delivery plan award and Contingent Capital Awards (CCA) as deferred compensation on February 11, 2022.

Deferred compensation is awarded to employees with total compensation greater than or equal to CHF/USD 250,000 or the local currency equivalent. Employees with total compensation below CHF/USD 250,000 or the local currency equivalent received variable incentive compensation in the form of an immediate cash award. Performance share awards were granted to managing directors and material risk takers and controllers, CCA were granted to managing directors and directors.

### Share awards

Share awards granted in February 2022 are similar to those granted in February 2021. Each share award granted entitles the holder of the award to receive one Group share, subject to service conditions. Share awards vest over three years with one third of the share awards vesting on each of the three anniversaries of the grant date (ratable vesting), with the exception of awards granted to individuals classified as material risk takers (MRTs), risk manager material risk takers (MRTs) or senior managers or equivalents under the EU or UK Capital Requirements Directive V-related provisions. Share awards granted to MRTs vest over four years with one quarter of the award vesting on each of the four anniversaries of the grant date. Share awards granted to risk manager MRTs vest over five years with one fifth of the award vesting on each of the five anniversaries of the grant date. Share awards granted to senior managers vest over seven years, with one fifth of the award vesting on each of the third to seventh anniversaries of the grant date. Share awards are expensed over the service period of the awards. The value of the share awards is solely dependent on the Group share price at the time of delivery.

The share awards include other awards, such as blocked shares and special awards, which may be granted to new employees. These awards entitle the holder to receive one Group share and are generally subject to continued employment with the Bank parent company, contain restrictive covenants and cancellation provisions and generally vest between zero and five years.

On February 11, 2022, the Bank parent company granted 4.1 million share awards with a total value of CHF 35 million. The number of share awards granted to employees was generally determined by dividing the deferred component of variable compensation being granted as share awards by the average price of a Group share over the ten consecutive trading days ended February 24, 2022. The fair value of each share award was CHF 8.61, the Group share price on the grant date. The majority of share awards granted include the right to receive dividend equivalents on vested shares.

### Performance share awards

Certain employees received a portion of their deferred variable compensation in the form of performance share awards. Performance share awards are similar to share awards, except that the full balance of outstanding performance share awards, including

those awarded in prior years, are subject to performance-based malus provisions.

Outstanding performance share awards are subject to a downward adjustment in the event of a divisional loss by the division in which the employees worked as of December 31, 2022, or a negative return on equity (ROE) of the Group, whichever results in a larger adjustment. For employees in corporate functions and the Asset Resolution Unit, the downward adjustment only applies in the event of a negative ROE of the Group and is not linked to the performance of the divisions. The basis for the ROE calculation may vary from year to year, depending on the Compensation Committee's determination for the year in which the performance shares are granted.

A downward adjustment has been applied to outstanding performance share awards, reflecting the negative RoE of the Group and the divisional loss of the Investment Bank for the year 2022.

On February 11, 2022, the Bank parent company granted 2.4 million performance share awards with a total value of CHF 21 million. The number of performance share awards granted to employees was generally determined by dividing the deferred component of variable compensation being granted as performance share awards by the average price of a Group share over the ten consecutive trading days ended February 24, 2022. The fair value of each performance share award was CHF 8.61, the Group share price on the grant date. The majority of performance share awards granted include the right to receive dividend equivalents on vested shares.

### Strategic Delivery Plan

Strategic Delivery Plan (SDP) awards were one-off share-based awards granted in February 2022 to certain employees to incentivize the longer-term delivery of the Group's strategic plan. The SDP awards are subject to service conditions and performance-based metrics over the course of 2022-2024. SDP awards are scheduled to vest on the third anniversary of the grant date, with the exception of awards granted to individuals classified as material risk takers (MRTs), risk manager MRTs or senior managers or equivalents under the EU or UK Capital Requirements Directive V related provisions. SDP awards granted to MRTs vest in equal annual installments over two years, commencing on the third anniversary from the grant date. SDP awards granted to risk manager MRTs vest in equal annual installments over three years, while SDP awards granted to senior managers vest in equal annual installments over five years, both commencing on the third anniversary from the grant date. Prior to settlement, the principal amount of the SDP awards will be written down to zero and forfeited if any of the following triggering events exist at the end of 2023, 2024 or 2025:

- The Group's reported CET1 capital ratio below the FINMA-prescribed minimum + 50 basis points; or
- The Group's reported common equity tier 1 (CET1) leverage ratio falls below 3.7%.

In addition, the Compensation Committee will review and assess the overall success of the delivery of the strategic plan at a Group

level over the three-year period (2022-2024) and may increase the SDP awards up to a maximum of 50% of the initial award amount. Half of the potential uplift would be granted if a predetermined average Group return on tangible equity threshold is achieved, measured over the key strategic implementation years 2023 and 2024. The other half of the uplift may be awarded based on the Compensation Committee's assessment of risk management and other strategic non-financial achievements.

On February 11, 2022, the Bank parent company granted 16.3 million SDP awards with a total value of CHF 140 million. The number of SDP awards granted to employees was generally determined by dividing the deferred component of variable compensation being granted as SDP awards by the average price of a Group share over the ten consecutive trading days which ended on February 24, 2022. The fair value of each SDP award was CHF 8.61, the Group share price on the grant date.

The majority of SDP awards granted include the right to receive dividend equivalents on vested shares.

### Contingent Capital Awards

CCA were granted in February 2022 and 2021 to certain employees as part of the 2021 and 2020 deferred variable compensation and have rights and risks similar to those of certain contingent capital instruments issued by the Group in the market. CCA are scheduled to vest on the third anniversary of the grant date, other than those granted to individuals classified as MRTs, risk manager MRTs or senior managers or equivalents under the EU or UK Capital Requirements Directive V-related provisions. CCA granted to MRTs, risk manager MRTs or senior managers vest on the fifth and seventh anniversaries of the grant date, respectively. CCA will be expensed over the vesting period. CCA generally provide a conditional right to receive semi-annual cash payments of interest equivalents until settled, with rates being dependent upon the vesting period and currency of denomination. CCA granted in 2022 and 2021 that vest four, five or seven years from the date of grant are not eligible for semi-annual cash payments of interest equivalents. CCA granted to certain regulated employees that vest over three years are not eligible for semi-annual cash payments of interest equivalents.

- CCA granted in 2022 and 2021 that are denominated in US dollars and vest three years from the date of grant receive interest equivalents at a rate of 4.18% and 3.60%, respectively, per annum plus the daily compounded (spread exclusive) US dollar Secured Overnight Financing Rate (SOFR); and
- CCA granted in 2022 and 2021 that are denominated in Swiss francs and vest three years from the date of grant receive interest equivalents at a rate of 3.44% and 3.06%, respectively, per annum plus the daily compounded (spread exclusive) Swiss franc Swiss Average Rate Overnight (SARON).

The rates were set in line with market conditions at the time of grant and existing high-trigger and low-trigger contingent capital instruments that the Group has issued.

At settlement, employees will receive either a contingent capital instrument or a cash payment based on the fair value of the CCA. The fair value will be determined by the Group. In the case of a cash settlement, the CCA award will be converted into the local currency of each respective employee.

CCA have loss-absorbing features such that prior to settlement, the principal amount of the CCA would be written down to zero and forfeited if any of the following trigger events were to occur:

- the Group's reported common equity tier 1 (CET1) ratio falls below 7%; or
- FINMA determines that cancellation of the CCA and other similar contingent capital instruments is necessary, or that the Group requires public sector capital support, in either case to prevent it from becoming insolvent or otherwise failing.

On February 11, 2022, the Bank parent company awarded CHF 8 million and USD 7 million of CCA that are expensed over the vesting period from the grant date.

### Deferred fixed cash awards

In 2022, the Bank parent company granted CHF 29 million of deferred fixed cash to certain employees. This compensation is expensed over a three-year vesting period from the grant date.

### Upfront cash awards

In February 2022, the Bank parent company granted CHF 197 million of upfront cash awards to certain employees as part of the cash component of their 2021 variable compensation. These awards are subject to repayment (clawback) by the employee in the event of voluntary resignation, termination for cause or in connection with other specified events or conditions within three years of the award grant. The amount subject to repayment is reduced in equal monthly instalments during the three-year period following the grant date.

### Other cash awards

Other cash awards include special awards, capital opportunity facility awards, voluntary deferred compensation plans, employee investment plans as well as certain share and performance share awards settled in cash.

## 25 Amounts receivable from and amounts payable to related parties

end of	2022		2021	
	Amounts receivable	Amounts payable	Amounts receivable	Amounts payable
<b>CHF million</b>				
Shareholders with a qualified participation	1,962	66,489	1,725	55,705

Affiliated companies	1,422	584	1,260	476
Members of governing bodies <sup>1</sup>	10	33	23	62

<sup>1</sup> Includes both the governing bodies of the Bank parent company (Credit Suisse AG) and the governing bodies of the Group holding company (Credit Suisse Group AG). Governing bodies include members of the Board of Directors, the Executive Board and the statutory auditors and companies controlled by members of each of these bodies.

### Significant off-balance sheet transactions

As part of the normal course of business, the Bank parent company issues guarantees and loan commitments and enters into other agreements with group companies which are recorded as off-balance sheet transactions by the Bank parent company. As of December 31, 2022 and 2021, the Bank parent company had contingent liabilities of CHF 7,590 million and CHF 9,151 million, respectively, and irrevocable loan commitments of CHF 4,286 million and CHF 6,873 million, respectively, of which substantially all were related to transactions with group companies. As of December 31, 2022 and 2021, the Bank parent company also had liabilities for calls on shares and other equity instruments of CHF 2 million and CHF 6 million, respectively, with a group company.

As shareholder of Credit Suisse International, an unlimited company incorporated in England and Wales, the Bank parent

company has joint and several unlimited obligations to meet any insufficiency in the assets in the event of liquidation.

### Additional information on related party transactions

For loans and other banking services, members of the Executive Board, employees and former employees may benefit from preferential terms available to all employees in certain jurisdictions as part of Bank parent company's employee benefit plans. Transactions with related parties are entered into at prevailing market conditions.

- Refer to "Off-balance sheet transactions" and "CS First Boston" in Note 1 – Company details, business developments and subsequent events – Subsequent events for further information on related party transactions.
- Refer to "Note 30 – Related parties" in VIII – Consolidated financial statements – Credit Suisse (Bank) for further information on related party transactions and Executive Board and Board of Directors loans.

<b>Fiduciary transactions</b>	<b>2,754</b>	<b>1,834</b>

## 28 Assets under management

### Assets under management

Assets under management include assets for which the Bank parent company provides investment advisory or discretionary asset management services, investment fund assets and assets invested in other investment-fund-like pooled investment vehicles managed by the Bank parent company. The classification of assets under management is conditional upon the nature of the services provided by the Bank parent company and the clients' intentions. Assets are individually assessed on the basis of each client's intentions and objectives and the nature of the banking services provided to that client. In order to be classified as assets under management, the Bank parent company must currently or in the foreseeable future expect to provide a service where the involvement of the Bank parent company's banking or investment expertise (e.g., as asset manager or investment advisor) is not purely executional or custodial in nature.

Assets under custody are client assets held mainly for execution-related or safekeeping/custody purposes only and therefore are not considered assets under management since the Bank parent company does not generally provide asset allocation or financial advice.

Assets of corporate clients and public institutions that are used primarily for cash management or transaction executional purposes for which no investment advice is provided are classified as commercial assets or assets under custody and therefore do not qualify as assets under management.

For the purpose of classifying assets under management, clients with multiple accounts are assessed from an overall relationship perspective. Accounts that are clearly separate from the remainder of the client relationship and represent assets held for custody purposes only are not included as assets under management.

The initial classification of the assets may not be permanent as the nature of the client relationship is reassessed on an on-going basis. If changes in client intent or activity warrant reclassification between client asset categories, the required reclassification adjustments are made immediately when the change in intent or activity occurs. Reclassifications between assets under management and assets held for transaction-related or custodial purposes result in corresponding net asset inflows or outflows.

A portion of the Bank parent company's assets under management results from double counting. Double counting arises when assets under management are subject to more than one level of asset management services. Each separate advisory or discretionary service provides additional benefits to the client and

represents additional income for the Bank parent company. Specifically, double counting primarily results from the investment of assets under management in collective investment instruments managed by the Bank parent company. The extent of double counting is disclosed in the following table.

#### Assets under management

end of	2022	2021
<b>CHF billion</b>		
Assets in collective investment instruments managed by Credit Suisse AG	0.1	0.2
Assets with discretionary mandates	90.6	108.2
Other assets under management	274.9	396.2
<b>Assets under management</b>	<b>365.6</b>	<b>504.6</b>
of which double counting	0	0

#### Changes in assets under management

	2022	2021
<b>CHF billion</b>		
<b>Balance at beginning of period <sup>1</sup></b>	<b>504.6</b>	<b>482.5</b>
Net new assets/(net asset outflows)	(68.2)	10.6
Market movements, interest, dividends and foreign exchange	(53.6)	19.2
of which market movements, interest and dividends <sup>2</sup>	(52.6)	8.5
of which foreign exchange	(1.0)	10.7
Other effects	(17.2) <sup>3</sup>	(7.7) <sup>4</sup>
<b>Balance at end of period <sup>1</sup></b>	<b>365.6</b>	<b>504.6</b>

- 1 Including double counting.
- 2 Net of commissions and other expenses and net of interest expenses charged.
- 3 Included mainly structural outflows of CHF 14.6 billion related to sanctions imposed in connection with Russia's invasion of Ukraine and CHF 2.0 billion related to the exit of the Sub-Sahara excluding South Africa market as a result of the Group's strategic review.
- 4 Included mainly structural outflows of CHF 2.7 billion related to the exit of a business and of CHF 2.6 billion related to the liquidation of the supply chain finance funds.

#### Net new assets

Net new assets measure the degree of success in acquiring assets under management or changes in assets under management through warranted reclassifications. The calculation is based on the direct method, taking into account individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients and commissions, interest and fees charged for banking services are not taken into account when calculating net new assets, as such charges are not directly related to the Bank parent company's success in acquiring assets under management. Similarly, changes in assets under management due to currency and market volatility as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

- Refer to "Business developments" in Note 1 – Company details, business developments and subsequent events for further information.

<b>Total net</b>	<b>5,341</b>	<b>1.10</b>	<b>5,811</b>	<b>1.00</b>	<b>5,948</b>	<b>1.00</b>

The average rates earned and paid on related assets and liabilities can fluctuate within wide ranges and are influenced by several key factors. The most significant factor is changes in global interest rates. Additional factors include changes in the

geographic and product mix of the Group's business, and foreign exchange rate movements between the Swiss franc and the currency of the underlying individual assets and liabilities.

## Selected margin information

in	2022	2021	2020
<b>Selected margin information (average rate in %)</b>			
Switzerland	(0.05)	0.37	0.17
Foreign	1.48	1.20	1.23
<b>Net interest margin</b>	<b>0.98</b>	<b>0.95</b>	<b>0.94</b>

The US Federal Reserve raised the target range of the federal funds rate to 0.25% to 0.50% in March 2022, 0.75% to 1.00% in May 2022, 1.50% to 1.75% in June 2022, 2.25% to 2.50% in July 2022, 3.00% to 3.25% in September 2022, 3.75% to 4.00% in November 2022 and 4.25% to 4.50% in December 2022.

The Swiss National Bank (SNB) raised the SNB policy rate to (0.25)% in June 2022, to 0.50% in September 2022 and to 1.00% in December 2022.

The European Central Bank changed the fixed rate tenders to 0.50% in July 2022, to 1.25% in September 2022, to 2.00% in October 2022 and to 2.50% in December 2022.

The Bank of England raised the bank rate to 0.50% in February 2022, to 0.75% in March 2022, to 1.00% in May 2022, to 1.25% in June 2022, to 1.75% in August 2022, to 2.25% in September 2022, to 3.00% in November 2022 and to 3.50% in December 2022.

<b>Total deposits</b>	<b>382,654</b>	<b>1,746</b>	<b>0.5%</b>	<b>416,919</b>	<b>159</b>	<b>0.0%</b>	<b>411,755</b>	<b>1,113</b>	<b>0.3%</b>

Deposits by foreign depositors in Swiss offices amounted to CHF 39.8 billion, CHF 80.2 billion and CHF 73.1 billion as of December 31, 2022, 2021 and 2020, respectively.

1 Monthly averages have been used where daily averages are unavailable.

## Uninsured and insured deposits

	2022	2021	2020
<b>Deposits (CHF million)</b>			
Uninsured deposits <sup>1</sup>	209,309	365,809	368,943
Insured deposits <sup>2</sup>	35,831	45,975	38,401
<b>Total deposits</b>	<b>245,140</b>	<b>411,784</b>	<b>407,344</b>

- 1 Uninsured deposits are the portion of deposits per client that exceed insurance limits of insurance regimes from countries in which Credit Suisse holds deposits. In addition, uninsured deposits include all deposits which are not covered by an insurance regime.
- 2 The majority of insured deposits is held in Switzerland and Guernsey. For Switzerland and Guernsey the insurance limit per client is CHF 100,000 and GBP 50,000, respectively.

## Maturities of uninsured time deposits

in	2022
<b>Time deposits (CHF million)</b>	
3 months or less	56,241
Over 3 through 6 months	8,245
Over 6 through 12 months	8,491
Over 12 months	1,759
<b>Total uninsured time deposits <sup>1</sup></b>	<b>74,736</b>

Uninsured time deposits are calculated based on the percentage of time deposits to total deposits and they are allocated to the maturities buckets on the basis of total time deposits.

As of the end of 2022, there were no US time deposits that were in excess of the Federal Deposit Insurance Corporation insurance limit or similar state deposit insurance regime.

- 1 Time deposits that are uninsured (including, for example, US time deposits in uninsured accounts, non-US time deposits in uninsured accounts or non-US time deposits in excess of any country-specific insurance fund limit).

## Statistical information – Bank

Statistical information for the Group is required under the SEC's subpart 1400 of Regulation S-K. Statistical information for the Bank is not

The principal differences relate to intercompany eliminations. Certain statistical information is also included in VIII – Consolidated financial statements – Credit Suisse (Bank), including Notes 5 – Net interest income, 16 – Investment securities, 18 – Loans, 19 – Financial

## Other information

### Exchange controls

There are no restrictions presently in force under our Articles of Association or Swiss law that limit the right of non-resident or foreign owners to hold our securities freely or, when entitled, to vote their securities freely. The Swiss federal government may from time to time impose sanctions, including exchange control restrictions, on particular countries, regimes, organizations or persons. A current list, in German, of such sanctions can be found at [www.seco-admin.ch](http://www.seco-admin.ch). Other than these sanctions, there are currently no Swiss exchange control laws or laws restricting the import or export of capital, including, but not limited to, the remittance of dividends, interest or other payments to non-resident holders of our securities.

### American Depositary Shares

Under Swiss law, holders of American Depositary Shares (ADS) are not shareholders and are not recorded in our share register. A nominee for the ADS depository is the registered holder of the shares underlying the ADS. Rights of ADS holders to exercise voting rights, receive dividends and other matters are governed by the deposit agreement pursuant to which the ADS are issued. Under such deposit agreement, the ADS depository shall not vote or attempt to exercise the right to vote that attaches to the shares underlying the ADS, for purposes of establishing a quorum or otherwise, other than in accordance with instructions given by ADS holders and received by the ADS depository, or exercise any discretion as to voting the shares underlying the ADS. For further information relating to our ADS, see our Registration Statement on Form F-6 filed with the SEC.

### Taxation

The following summary contains a description of the principal Swiss and US federal income tax consequences of the acquisition, ownership and disposition of our shares or ADS (Shares), but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a decision to own or dispose of Shares. In particular, the summary is directed only to holders that hold Shares as capital assets and does not address tax considerations applicable to investors that may be subject to special tax rules, such as banks, tax-exempt entities, insurance companies, dealers in securities or currencies, traders in securities electing to mark to market, persons that actually or constructively own a participation in our stock that qualifies for reduced taxation, persons that hold Shares as a position in a “straddle” or “conversion” transaction, or as part of a “synthetic security” or other integrated financial transaction, persons that own or are treated as owning 10% or more of our stock by vote or value, or persons that have a “functional currency” other than the Swiss franc or US dollar.

This summary is based on the current tax laws of Switzerland and the US, including the current “Convention Between the United States of America and the Swiss Confederation for the Avoidance of Double Taxation with Respect to Taxes on Income” (Double Taxation Treaty), the “Agreement on the Automatic Exchange of Information in Tax Matters with the European Union” (AEOI) and similar bilateral treaties with partner states, the US Internal Revenue Code of 1986, as amended (IR Code), existing and proposed regulations thereunder, published rulings and court decisions, all of which are subject to change, possibly with retroactive effect.

This discussion does not generally address any aspects of Swiss taxation other than income and capital taxation, withholding taxes and stamp duties upon transfer of Shares or any aspects of US taxation other than federal income taxation. Prospective investors are urged to consult their tax advisors regarding the Swiss federal, cantonal and communal and the US federal, state and local and other tax consequences of acquiring, owning and disposing of Shares.

### Swiss taxation

#### Swiss withholding tax on dividends and other distributions

Dividends on the Shares made or paid by us out of reserves from capital contributions (*Reserven aus Kapitaleinlagen*), distributions on the Shares made or paid by us based upon a reduction in the nominal value of the Shares (*Nennwertrückzahlungen*), and the purchase price for Shares repurchased by us for a capital reduction paid out of reserves from capital contributions and the nominal value of Shares will be exempt from Swiss withholding tax.

Dividends and other cash or in-kind distributions (including scrip or stock dividends) on the Shares made or paid by us out of profit or reserves (other than reserves from capital contributions) and the purchase price less the nominal value for Shares repurchased by us for a capital reduction paid out of profit or reserves (other than reserves from capital contributions) are subject to Swiss withholding tax, currently at a rate of 35%. If we pay a dividend on the Shares out of reserves from capital contributions, we will be required to simultaneously pay a dividend on the Shares out of profit or reserves (other than reserves from capital contributions) of at least the same amount. If we repurchase Shares for a capital reduction, we must pay at least half of the purchase price, less the nominal value of the Shares repurchased for such capital reduction, out of reserves from capital contributions, and may not pay more than half of the purchase price, less the nominal value of the Shares repurchased for such capital reduction, out of profit or reserves (other than reserves from capital contributions). Capital gains realized on the sale or other disposition of Shares in the secondary market are not subject to Swiss withholding tax. Any Swiss withholding tax described above must be deducted by us on the gross taxable amount of the dividend or other distribution or the purchase price, as applicable, and be remitted by us to the Swiss Federal Tax Administration.

**Persons resident in Switzerland and persons resident outside of Switzerland who hold Shares in a business carried on through a permanent establishment in Switzerland**

The relevant Swiss tax authority will refund or credit the Swiss withholding tax deducted by us on the taxable amounts of any dividend or other distribution on any Share, or the purchase price for any Share repurchased by us for a capital reduction, in full to a person who (i) is resident in Switzerland or is resident outside of Switzerland but holds (or, in the case of any such repurchase, held) such Share in a business carried on through a permanent establishment in Switzerland for tax purposes, and (ii) among other things, is the beneficial owner of such dividend or other distribution on, or such purchase price for, such Share repurchased by us for a capital reduction, and duly reports such dividend or other distribution or purchase price, as applicable, in their income tax return or their financial statements, as applicable, for the relevant taxation period.

**Persons resident outside Switzerland who do not hold Shares in a business carried on through a permanent establishment in Switzerland**

In the case of Swiss withholding tax deducted by us on the taxable amounts of any dividend or other distribution on the Shares, or the purchase price for Shares repurchased for a capital reduction, a person who (i) is not resident in Switzerland and (ii) does not hold (or, in the case of a repurchase of Shares for a capital reduction, did not hold) such Shares in a business carried on through a permanent establishment in Switzerland for tax purposes, may be entitled to a full or partial refund of such Swiss withholding tax, if the country in which such person resides for tax purposes has entered into a bilateral treaty for the avoidance of double taxation with Switzerland, such person is the beneficial owner of such dividend or other distribution or such purchase price and the conditions of the applicable treaty are met. A reduction of any such Swiss withholding tax at source is not provided for by Switzerland for portfolio holdings and, therefore, is not permissible. Holders of Shares should be aware that the procedures for claiming treaty benefits (and the time frame required for obtaining a tax refund) may differ from country to country and should consult their own legal, financial or tax advisors regarding the procedures for claiming a refund of any Swiss withholding tax.

**Residents of the US**

In the case of Swiss withholding tax deducted by us on the taxable amounts of any dividend or other distribution on Shares, or the purchase price for Shares repurchased for a capital reduction, a person who (i) is (x) a resident of the US for purposes of the Double Taxation Treaty without taxable presence in Switzerland to which such Shares are attributable or (y) a qualified US pension fund and (ii) is (or, in the case of any such repurchase, at the time of such repurchase, was) the beneficial owner of such Shares and is the beneficial owner of such dividend or other distribution or purchase price, as applicable, and meets the conditions of the Double Taxation Treaty, may apply for a full refund of such Swiss withholding tax in the case of qualified US pension funds or in excess of the amount of the 15% treaty rate in all other cases.

The claim for refund must be filed on Swiss Tax Form 82 (82C for corporations, 82I for individuals, 82E for other entities and 82R for regulated investment companies), which forms may, together with an instruction form, be downloaded from the Swiss Federal Tax Administration's website, obtained from any Swiss consulate general in the US, or obtained from the Swiss Federal Tax Administration at the address below. Four copies of the applicable form must be duly completed and signed before a notary public of the US, and three of such completed and signed copies must be sent to the Swiss Federal Tax Administration, Eigerstrasse 65, 3003, Bern, Switzerland. The form must be accompanied by suitable evidence of deduction of the Swiss withholding tax, such as certificates of deduction, bank vouchers or credit slips. The form must be filed no later than December 31 of the third year following the calendar year in which the dividend or other distribution subject to the Swiss withholding tax became payable.

**Income tax on dividends and other distributions**

**Shares held by Swiss resident individuals as private assets**

For holders of Shares who (i) are individuals resident in Switzerland for tax purposes and (ii) hold such Shares as private assets, dividends and other distributions on Shares made or paid by us out of reserves from capital contributions (*Reserven aus Kapital-einlagen*), distributions on Shares made or paid by us based upon a reduction in the nominal value of Shares (*Nennwertrückzahlungen*), and the purchase price for Shares repurchased by us for a capital reduction paid out of reserves from capital contributions and the nominal value of Shares are exempt from Swiss federal, cantonal and communal income taxes. For such holders, all other dividends and other distributions and the purchase price for Shares repurchased by us for a capital reduction not paid out of reserves from capital contributions and the nominal value of Shares are subject to Swiss federal, cantonal, and communal income taxes. If we pay a dividend on the Shares out of reserves from capital contributions, we will be required to simultaneously pay a dividend on the Shares out of profit or reserves (other than reserves from capital contributions) of at least the same amount. If we repurchase Shares for a capital reduction, we must pay at least half of the purchase price, less the nominal value of the Shares repurchased for such capital reduction, out of reserves from capital contributions, and may not pay more than half of the purchase price, less the nominal value of the Shares repurchased for such capital reduction, out of profit or reserves (other than reserves from capital contributions).

**Shares held as assets of a Swiss business**

Corporate taxpayers resident in Switzerland, individual taxpayers resident in Switzerland who hold Shares as assets of a Swiss business, and corporate and individual taxpayers resident outside Switzerland who hold Shares as part of a business carried on through a permanent establishment in Switzerland for tax purposes, are required to recognize payments of dividends and other distributions on such Shares (including repayment of the nominal value of such Shares and distributions on such Shares out of reserves from capital contributions), and the purchase price for any such Shares repurchased by us for a capital reduction, in their income statement for the relevant taxation period, and

are taxed on any net taxable earnings on such Shares (including such payments) for such taxation period at the then prevailing tax rates. This taxation also applies to Swiss resident individuals who, for Swiss income tax purposes, are classified as “professional securities dealers” for reasons of, among other things, frequent dealings, or leveraged transactions, in securities.

A holder of Shares that is (i) a Swiss corporation or a Swiss co-operative or (ii) a non-Swiss corporation or a non-Swiss co-operative that holds such Shares as part of a business carried on through a permanent establishment in Switzerland for tax purposes, may benefit from relief from taxation of dividends and other distributions on such Shares (including repayment of the nominal value of such Shares and distributions on such Shares out of reserves from capital contributions), and the purchase price for any such Shares repurchased by us for a capital reduction by way of a participation exemption (*Beteiligungsabzug*), if at the time of such dividend or other distribution or such repurchase, such Shares have a market value of at least CHF 1 million.

#### **Shares held by persons resident outside of Switzerland who are not engaged in a business carried on through a permanent establishment in Switzerland**

A holder of Shares who (i) is not a resident of Switzerland for tax purposes and (ii) during the relevant taxation period has not engaged in a business carried on through a permanent establishment in Switzerland for tax purposes to which such Shares are attributable, will not be subject to any Swiss federal, cantonal or communal income tax as a result of the receipt of dividends or other distributions on such Shares, or the purchase price for any such Shares repurchased by us for a capital reduction.

- Refer to “Swiss withholding tax on dividends and other distributions” for a summary of the taxation treatment of dividends and other distributions on Shares and the purchase price received for Shares repurchased by us for capital reduction.

#### **Capital gains tax realized on Shares**

##### **Shares held by Swiss resident individuals as private assets**

A capital gain realized by a holder of Shares (other than a capital gain on the sale of Shares to us for a capital reduction) who (i) is an individual resident in Switzerland for tax purposes and (ii) holds such Shares as private assets is classified as a tax-exempt private capital gain and a capital loss realized by such a holder will be classified as a non-tax-deductible private capital loss for purposes of Swiss federal, cantonal and communal income tax.

- Refer to “Shares held as assets of a Swiss business” for information on the taxation of individuals classified as “professional securities dealers”.
- Refer to “Shares held by Swiss resident individuals as private assets – Income tax on dividends and other distributions for information on the taxation of the purchase price received for Shares repurchased by us for a capital reduction.

##### **Shares held as assets of a Swiss business**

Corporate taxpayers resident in Switzerland, individual taxpayers resident in Switzerland who hold Shares as part of a business in Switzerland, and individual and corporate taxpayers resident outside

purposes, are required to recognize any gain or loss realized on the sale or other disposition of such Shares in their income statement for the relevant taxation period, and will be taxed on any net taxable earnings on such Shares (including such gain or loss) for such taxation period at the then prevailing tax rates. This taxation also applies to Swiss resident individuals who, for Swiss income tax purposes, are classified as “professional securities dealers” for reasons of, among other things, frequent dealings, or leveraged transactions, in securities.

#### **Shares held by persons resident outside of Switzerland who are not engaged in a business carried on through a permanent establishment in Switzerland**

A holder of Shares who (i) is not resident in Switzerland for tax purposes and (ii) during the relevant taxation period has not engaged in a business carried on through a permanent establishment in Switzerland for tax purposes to which such Shares are attributable, will not be subject to any Swiss federal, cantonal or communal income tax as a result of any gain realized on the sale or other disposition of such Shares.

- Refer to “Swiss withholding tax on dividends and other distributions” for a summary of the taxation treatment of purchase price received for Shares repurchased by us for a capital reduction.

#### **Wealth and capital taxes**

##### **Shares held by Swiss resident individuals as private investments**

A holder of Shares who is an individual resident in Switzerland for tax purposes and who holds the Shares as private assets is required to include the Shares in taxable wealth for purposes of cantonal and communal taxable wealth taxes.

##### **Shares held as assets of a Swiss business**

Corporate taxpayers resident in Switzerland, individual taxpayers resident in Switzerland who hold Shares as assets of a Swiss business, and corporate and individual taxpayers resident outside Switzerland who hold Shares as part of a business carried on through a permanent establishment in Switzerland for tax purposes, are required to include the Shares in taxable wealth or taxable assets, as applicable, in the relevant tax period for purposes of cantonal and communal individual wealth tax or capital tax, as applicable.

#### **Non-resident individuals and legal entities**

A holder of Shares who (i) is not a resident of Switzerland for tax purposes and (ii) during the relevant taxation period has not engaged in a business carried on through a permanent establishment in Switzerland for tax purposes to which such Shares are attributable, will not be subject to any cantonal or communal wealth tax or capital tax as a result of the holding of Shares.

#### **Swiss securities turnover tax**

The trading of Shares in the secondary market is subject to Swiss securities turnover tax (*Umsatzabgabe*), currently at a rate of 0.15% of the consideration paid for the Shares traded, if a securities dealer (as defined in the Swiss Act on Stamp Duties

Switzerland who hold Shares as part of a business carried on through a permanent establishment in Switzerland for tax

**566 Other information**

of June 27, 1973, as amended) in Switzerland or the Principality of Liechtenstein is a party to, or acts as an intermediary for, the transaction and no statutory exemption applies in respect of one or both of the parties to the transaction. In such case and subject to any applicable statutory exemptions, typically half of the Swiss securities turnover tax is charged to one party to the transaction and the other half to the other party.

#### **Automatic exchange of information**

In Switzerland, the Multilateral Convention on Mutual Administrative Assistance in Tax Matters (MAC) and the Multilateral Competent Authority Agreement (MCAA), together with the Federal Act on the International Automatic Exchange of Information in Tax Matters and its implementing ordinance, form the legal basis for the Organisation of Economic Co-operation and Development (OECD) regime on automatic exchange of information for tax purposes. Based on the MCAA and a number of bilateral automatic exchange of information agreements, Switzerland collects and exchanges information with more than 100 Participating Jurisdictions, including all EU member states, in respect of financial assets held in, and income derived thereon and credited to, accounts (including Shares held in any such accounts) maintained in Switzerland for the benefit of clients (i.e., entities or individuals) tax resident in these Participating Jurisdictions. An up-to-date list of the AEOI agreements to which Switzerland is a party that are in effect, or have been entered into but are not yet in effect, can be found on the website of the State Secretariat for International Financial Matters SIF.

#### **Swiss facilitation of the implementation of the US Foreign Account Tax Compliance Act**

Switzerland has concluded an a “Model 2” intergovernmental agreement with the US to facilitate the implementation of US Foreign Account Tax Compliance Act (FATCA). The agreement ensures that accounts held by US persons maintaining accounts with financial assets (including Shares held in any such accounts) with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance on the basis of the US-Switzerland Double Tax Treaty. Since it was amended in 2019, the Treaty includes a mechanism for the exchange of information in tax matters upon request between Switzerland and the United States, allowing the United States to make group requests under FATCA concerning non-consenting US accounts and non-consenting non-participating foreign financial institutions for periods from June 30, 2014. Furthermore, on October 8, 2014, the Swiss Federal Council approved a mandate for negotiations with the United States regarding a “Model 1” intergovernmental agreement that would replace the existing agreement and that would change from the current direct notification-based regime to a regime where the relevant information is sent to the Swiss Federal Tax Administration, which in turn provides the information to the US tax authorities. It is not yet known when negotiations will continue and, if they do, if and when any new regime would come into force.

#### **US federal income tax**

For purposes of this discussion, a “US Holder” is any beneficial owner of Shares that is: (i) a citizen or resident of the US; (ii) a corporation organized under the laws of the US or any political subdivision thereof; or (iii) any other person that is subject to US federal income tax on a net income basis in respect of Shares. A “Non-US Holder” is any beneficial owner of Shares that is a foreign corporation or non-resident alien individual.

#### **Taxation of dividends**

##### **US Holders**

For US federal income tax purposes, a US Holder will be required to include the full amount (before reduction for Swiss federal withholding tax) of a dividend paid with respect to Shares, generally as ordinary income. Subject to certain exceptions for short-term and hedged positions, the US dollar amount of dividends received by an individual with respect to our Shares will be subject to taxation at a maximum rate of 20% if the dividends are “qualified dividends”. Dividends paid on the Shares will be treated as qualified dividends if we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, a passive foreign investment company (PFIC). Based on our audited consolidated financial statements, we believe that the Group was not treated as a PFIC for US federal income tax purposes with respect to our 2022 or 2021 taxable years. In addition, based on the audited consolidated financial statements of the Group and our current expectations regarding the value and nature of our assets and the sources and nature of our income, we do not anticipate the Group becoming a PFIC for the 2023 taxable year. Holders of our Shares should consult their own tax advisors regarding the availability of the reduced dividend tax rate in light of the considerations discussed above and their own particular circumstances. For this purpose, a “dividend” will include any distribution paid by us with respect to Shares, but only to the extent such distribution is not in excess of our current and accumulated earnings and profits as defined for US federal income tax purposes. Under the IR Code, dividend payments by us on Shares are not eligible for the dividends received deduction generally allowed to corporate shareholders. Any distribution that exceeds our earnings and profits will be treated as a non-taxable return of capital to the extent of the US Holder’s tax basis in Shares and thereafter as capital gain. Because we do not intend to maintain calculations of our earnings and profits on the basis of US federal income tax principles, a US Holder should expect that any information reporting it receives may treat the full amount of any distribution paid as a dividend.

Subject to the limitations and conditions provided in the IR Code, a US Holder may deduct from its US federal taxable income, or claim as a credit against its US federal income tax liability, the Swiss federal withholding tax withheld. These limitations and conditions include new requirements recently adopted by the US Internal Revenue Service (IRS), and any Swiss tax will need to satisfy these requirements in order to be eligible to be a creditable

tax for a US Holder. In the case of a US Holder that is eligible for, and properly elects, the benefits of the Treaty, Swiss tax on dividends will be treated as meeting the new requirements and therefore as a creditable tax. In the case of all other US Holders, the application of these requirements to the Swiss tax on dividends is uncertain and we have not determined whether these requirements have been met. If the Swiss dividend tax is not a creditable tax for a US Holder or the US Holder does not elect to claim a foreign tax credit for any foreign income taxes paid or accrued in the same taxable year, the US Holder may be able to deduct the Swiss tax in computing such US Holder's taxable income for US federal income tax purposes. Dividend distributions will constitute income from sources outside the United States and, for US Holders that elect to claim foreign tax credits, generally will constitute "passive category income" for foreign tax credit purposes.

In general, a US Holder will be required to determine the amount of any dividend paid in Swiss francs by translating the Swiss francs into US dollars at the "spot rate" of exchange on the date of receipt. The tax basis of Swiss francs received by the US Holder generally will equal the US dollar equivalent of such Swiss francs, translated at the spot rate of exchange on the date such Swiss franc dividends are received. Upon a subsequent exchange of such Swiss francs for US dollars, or upon the use of such Swiss francs to purchase property, a US Holder will generally recognize ordinary income or loss in the amount equal to the difference between such US Holder's tax basis for the Swiss francs and the US dollars received or, if property is received, the fair market value of the property. In addition, a US Holder may be required to recognize US-source foreign currency gain or loss on the receipt of a refund in respect of Swiss federal withholding tax to the extent the US dollar value of the refund differs from the US dollar equivalent of the amount on the date of receipt of the underlying dividend.

#### **Non-US Holders**

Dividends paid to a Non-US Holder in respect of Shares will generally not be subject to US federal income tax unless such

dividends are effectively connected with the conduct of a trade or business within the US by such Non-US Holder.

#### **Capital gains tax upon disposal of shares**

##### **US Holders**

A gain or loss realized by a US Holder on the sale or other disposition of Shares will be subject to US federal income taxation as a capital gain or loss in an amount equal to the difference between the US Holder's basis in Shares and the amount realized on the disposition. Such gain or loss will generally be a long-term capital gain or loss if the US Holder holds the Shares for more than one year. A long-term capital gain realized by a US Holder that is an individual generally is subject to taxation at reduced rates.

##### **Non-US Holders**

A Non-US Holder will generally not be subject to US federal income tax in respect of gains realized on a sale or other disposition of Shares unless the gain is effectively connected with a trade or business of the Non-US Holder in the US.

#### **Backup withholding tax and information reporting requirements**

Dividends paid on, and proceeds from the sale or other disposition of, Shares paid to a US Holder generally may be subject to the information reporting requirements of the IR Code and may be subject to backup withholding unless the holder: (i) establishes that it is an exempt holder; or (ii) provides an accurate taxpayer identification number on a properly completed US Internal Revenue Service (IRS) Form W-9 and certifies that no loss of exemption from backup withholding has occurred. The amount of any backup withholding from a payment to a holder will be allowed as a credit against the US Holder's US federal income tax liability and may entitle such holder to a refund, provided that certain required information is furnished to the IRS.

A Non-US Holder may be required to comply with certification and identification procedures in order to establish its exemption from information reporting and backup withholding.

### **Listing details**

Credit Suisse Group's shares are listed on the SIX Swiss Exchange under the symbol "CSGN". The Group's ADS are traded on the New York Stock Exchange (NYSE) under the symbol "CS".

The Group's shares are in registered form with a par value of CHF 0.04 per share.

### **Trading in our own shares**

The Group buys and sells its own shares and derivatives on its own shares within its normal trading and market-making activities mainly through its UK and Swiss broker-dealer operations. The Group buys and sells its shares and derivatives on these shares to facilitate customer orders, to provide liquidity as a market maker and to hedge derivative instruments.

The net long or short position held by the Group's bank subsidiaries in the Group's own shares remains at non-material levels relative to the number of the Group's outstanding shares, due in part to Swiss Financial Market Supervisory Authority FINMA (FINMA) regulations requiring a 100% capital charge to the relevant legal entity for the entire net position in the Group's shares. In addition to FINMA rules, the Group's trading in its own shares in the Swiss market is subject to regulation under the Swiss Federal Act on Financial Market Infrastructure and Market Conduct in Securities and Derivatives Trading, the rules of the SIX Swiss Exchange and the European Exchange electronic exchange, and the Swiss Bankers Association Code of Conduct for Securities Dealers. Trading is also limited by the Group's risk management limits, internal capital allocation rules, balance sheet requirements, counterparty restrictions and other internal regulations and guidelines. Swiss law further limits the Group's ability to hold or repurchase its own shares.

The Group may from time to time place orders for its own shares to satisfy obligations under various employee and management incentive share plans, and potentially for shares to be used as payment in acquisitions. In addition, the Group may purchase shares with the intent of cancellation. In Switzerland, the purchase of shares for cancellation is typically done under a separate program from the repurchase of shares to be re-issued under employee and management incentive share plans.

- Refer to "Share purchases" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management for further information on trading in the Group's shares and shares purchases.

### **Property and equipment**

Our principal executive offices, which we own, are located at Paradeplatz 8, Zurich, Switzerland. As of the end of 2022, we maintained 272 offices and branches worldwide, of which approximately 58% were located in Switzerland.

As of the end of 2022, approximately 15% of our worldwide offices and branches were owned directly by us, with the remainder being held under commercial leases. With respect to those held under commercial leases, 46% of the related lease commitments expire after 2027. The book value of the ten largest owned properties was approximately CHF 0.5 billion as of the end of 2022. None of our principal facilities are subject to mortgages or other security interests granted to secure indebtedness to financial institutions.

We believe that our current facilities are adequate for existing operations. Management regularly evaluates our operating facilities for suitability, market presence, renovation and maintenance.

#### A-4 List of abbreviations

## Glossary

### A

---

**Advanced execution services® (AES®)** AES® is a suite of algorithmic trading strategies, tools and analytics operated by Credit Suisse to facilitate global equity trading. By employing algorithms to execute client orders and limit volatility, AES® helps institutions and hedge funds reduce market impact. Credit Suisse provides access to over 100 trading destinations in over 40 countries and six continents.

**Advanced internal ratings-based approach (A-IRB)** Under the A-IRB approach, risk weights are determined by using internal risk parameters. We have received approval from FINMA to use, and have fully implemented, the A-IRB approach whereby we provide our own estimates for probability of default (PD), loss given default (LGD) and exposure at default (EAD). We use the A-IRB approach to determine our institutional credit risk and most of our retail credit risk.

**Advanced measurement approach (AMA)** The AMA is used for measuring operational risk. The methodology is based upon the identification of a number of key risk scenarios that describe the major operational risks we face. Groups of senior staff review each scenario and discuss the likelihood of occurrence and the potential severity of loss. Internal and external loss data, along with certain business environment and internal control factors, such as self-assessment results and key risk indicators, are considered as part of this process. Based on the output from these meetings, we enter the scenario parameters into an operational risk model that generates a loss distribution from which the level of capital required to cover operational risk is determined. We have received approval from FINMA to use an internal model for the calculation of operational risk capital, which is aligned with the requirements of the AMA under the Basel framework.

**Affluent and retail clients** We define affluent and retail clients as individuals having assets under management below CHF 1 million.

**American Depositary Shares (ADS)** An ADS, which is evidenced by an American Depositary Receipt, is a negotiable certificate issued by a depositary bank that represents all or part of an underlying share of a foreign-based company held in custody.

---

### B

---

**Backtesting** Backtesting is one of the techniques used to assess the accuracy and performance of VaR models. Backtesting is used by regulators to assess the adequacy of regulatory capital held by a bank. It involves comparing of the results produced by the VaR model with the hypothetical trading revenues on the trading book. VaR models that experience less than five exceptions in a rolling 12-month period are considered by regulators to be classified in a defined “green zone”. The “green zone” corresponds to backtesting results that do not themselves suggest a problem with the quality or accuracy of a bank’s model.

**Bank for International Settlements (BIS)** The Bank for International Settlements (BIS) serves central banks in their pursuit of monetary and financial stability, fosters international cooperation in those areas and acts as a bank for central banks.

**Basel III** In December 2010, the Basel Committee on Banking Supervision (BCBS) issued the Basel III framework, which is a comprehensive set of reform measures to strengthen the regulation, supervision and risk management of the banking sector. These measures aim to improve the banking sector’s ability to absorb shocks arising from financial and economic stress, whatever the source, improve risk management and governance and strengthen banks’ transparency and disclosures. The phase-in period for Basel III was January 1, 2013 through January 1, 2019.

**Basel Committee on Banking Supervision (BCBS)** The Basel Committee on Banking Supervision (BCBS) provides a forum for regular cooperation on banking supervisory matters. Its objective is to enhance the understanding of key supervisory issues and improve the quality of banking supervision worldwide. It seeks to do so by exchanging information on national supervisory issues, approaches and techniques, with a view to promoting common understanding. At times, the BCBS uses this common understanding to develop guidelines and supervisory standards in areas where they are considered desirable. In this regard, the BCBS is best known for its international standards on capital adequacy, the Core Principles for Effective Banking Supervision and the Concordat on cross-border banking supervision.

---

---

## C

**Current expected credit losses (CECL)** CECL is a FASB accounting standard which requires the measurement of all expected credit losses for financial instruments measured at amortized cost and held at the reporting date over the remaining contractual life (considering the effect of prepayments) based on historical experience, current conditions and reasonable and supportable forecasts. The CECL standard has replaced the previous incurred loss methodology for recognizing credit losses.

**CET1 ratio** CET1 ratio means the ratio (expressed as a percentage) of CET1 capital divided by risk-weighted assets.

**Collateralized debt obligation (CDO)** A CDO is a type of structured asset-backed security whose value and payments are derived from a portfolio of underlying fixed-income assets.

**Commercial mortgage-backed securities (CMBS)** CMBS are a type of mortgage-backed security that is secured by loans on commercial property and can provide liquidity to real estate investors and commercial lenders.

**Commercial paper (CP)** Commercial paper is an unsecured money-market security with a fixed maturity of 1 to 364 days, issued by large banks and corporations to raise funds to meet short term debt obligations.

**Constant prepayment rate (CPR)** CPR is a loan prepayment rate that is equal to the proportion of the principal of a pool of loans that is assumed to be paid off prematurely in each period. The calculation of this estimate is based on a number of factors such as historical prepayment rates for previous loans that are similar to ones in the pool and on future economic outlooks.

**Credit default swap (CDS)** A CDS is a contractual agreement in which the buyer of the swap pays a periodic fee in return for a contingent payment by the seller of the swap following a credit event of a reference entity. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet payment obligations when due.

**Credit valuation adjustment (CVA)** The CVA represents the market value of counterparty credit risk for uncollateralized OTC derivative instruments.

---

## D

**Debit valuation adjustment** The debit valuation adjustment represents the market value of our own credit risk for uncollateralized OTC derivative instruments.

**Derivatives** Derivatives are financial instruments or contracts that meet all of the following three characteristics: (1) their value changes in response to changes in an underlying price, such as interest rate, security price, foreign exchange rate, credit rating/price or index; (2) they require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and (3) their terms require or permit net settlement (US GAAP) or they settle at a future date (IFRS).

---

## E

**Exposure at default (EAD)** The EAD represents the expected amount of credit exposure in the event of a default and reflects the current drawn exposure and an expectation regarding the future evolution of the credit exposure. For loan exposures, a credit conversion factor is applied to project the additional drawn amount. The credit conversion factor related to traded products such as derivatives is based on a simulation using statistical models.

---

## F

**Fair value** The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

---

## G

**G7** The G7 is a group of finance ministers from seven industrialized nations: the US, UK, France, Germany, Italy, Canada and Japan.

**G20** The G20 is a group of finance ministers and central bank governors from 19 countries (Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Republic of Korea, Mexico, Russia, Saudi Arabia, South Africa, Türkiye, the UK and the US) and the EU.

---

## H

**Haircut** The percentage by which an asset's market value is reduced for the purpose of calculating capital, margin requirements and collateral levels. This is used to provide a cushion when lending against collateral to account for possible adverse movements in the value of the collateral.

**Higher Trigger Capital Amount** The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert into equity or be written down prior to the write-down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion into equity or write-down is referred to as the Higher Trigger Capital Amount.

**High-net-worth individuals (HNWI)** We define high-net-worth individuals as individuals having assets under management in excess of CHF 1 million.

---

## I

**Incremental risk charge (IRC)** The IRC represents an estimate of the issuer default and migration risk of positions in the trading book over a one-year capital horizon at a 99.9% confidence level, taking into account the liquidity horizons of individual positions. This includes sovereign debt, but excludes securitizations and correlation products.

---

---

**L**

---

**Liquidity coverage ratio (LCR)** The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet liquidity needs for a 30-day time horizon under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. The ratio of liquid assets over net cash outflows should be at least 100%.

**Lombard loan** A loan granted against pledged collateral in the form of securities.

**London Interbank Offered Rate (LIBOR)** LIBOR is a daily reference rate based on the interest rates at which banks borrow unsecured funds from other banks in the London wholesale money market.

**Loss given default (LGD)** LGD parameters consider seniority, collateral, counterparty industry and, in certain cases, fair value markdowns. LGD estimates are based on an empirical analysis of historical loss rates and are calibrated to reflect time and cost of recovery as well as economic downturn conditions. For much of the loan portfolio of private banking, corporate and institutional businesses, the LGD is primarily dependent upon the type and amount of collateral pledged. For other retail credit risk, predominantly loans secured by financial collateral, pool LGDs differentiate between standard and higher risks, as well as domestic and foreign transactions. The credit approval and collateral monitoring processes are based on loan-to-value (LTV) limits. For mortgages (residential or commercial), recovery rates are differentiated by type of property.

---

**M**

---

**Material risk takers and controllers (MRTC)** MRTC are employees who, either individually or as a part of a group, are considered to have a potentially material impact on the Group's risk profile.

---

**N**

---

**Negative replacement value (NRV)** NRV represents the negative fair value of a derivative financial instrument at a given financial reporting date. A negative replacement value reflects the amount payable to the counterparty if the derivative transaction were to be settled at the reporting date, or alternatively, the cost at a given reporting date to close an open derivative position with a fully offsetting transaction.

**Net stable funding ratio (NSFR)** The NSFR is intended to ensure that banks maintain a structurally sound long-term funding profile beyond one year and is a complementary measure to the LCR. It is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The standard is defined as the ratio of available stable funding over the amount of required stable funding. The ratio should always be at least 100%.

---

**N (continued)**

---

**Netting agreements** Netting agreements are contracts between two parties where under certain circumstances, such as insolvency, bankruptcy or any other credit event, mutual claims from outstanding business transactions can be offset against each other. The inclusion of a legally binding netting agreement reduces the default risk from a gross to a net amount.

---

**O**

---

**Over-the-counter (OTC)** Over-the-counter securities and derivatives are not traded on an exchange but via private contracts between counterparties.

---

**P**

---

**Position risk** Component of the economic capital framework, which is used to assess, monitor and report risk exposures throughout the Group. Position risk is the level of unexpected loss in economic value on our portfolio of positions over a one-year horizon which is exceeded with a given small probability (1% for risk management purposes; 0.03% for capital management purposes).

**Positive replacement value (PRV)** PRV represents the positive fair value of a derivative financial instrument at a given reporting date. A positive replacement value reflects the amount receivable from the counterparty if the derivative transaction were to be settled at the reporting date, or alternatively, the cost at a given reporting date to enter into the exact same transaction for the residual term, if the existing counterparty should default.

**Probability of default (PD)** PD parameters capture the risk of a counterparty defaulting over a one-year time horizon. PD estimates are based on time-weighted averages of historical default rates by rating grade, with low-default-portfolio estimation techniques applied for higher quality rating grades. Each PD reflects the internal rating for the relevant obligor.

---

**R**

---

**Regulatory VaR** Regulatory VaR is a version of VaR that uses an exponential weighting technique that automatically increases VaR where recent short-term market volatility is greater than long-term volatility in the two-year dataset. Regulatory VaR uses an expected shortfall calculation based on average losses, and a ten-day holding period. This results in a more responsive VaR model, as the overall increases in market volatility are reflected almost immediately in the regulatory VaR model.

**Repurchase agreements** Repurchase agreements are securities sold under agreements to repurchase substantially identical securities. These transactions normally do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the balance sheet at the amount of cash received (liability) and cash disbursed (asset), respectively.

**Residential mortgage-backed securities (RMBS)** RMBS are a type of mortgage-backed security composed of a wide array of different non-commercial mortgage debts. They securitize the mortgage payments of non-commercial real estate. Different residential mortgages with varying credit ratings are pooled together and sold in tranches to investors.

---

---

**R (continued)**

---

**Reverse repurchase agreements** Reverse repurchase agreements are purchases of securities under agreements to resell substantially identical securities. These transactions normally do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the balance sheet at the amount of cash received (liability) and cash disbursed (asset), respectively.

**Risk management VaR** Risk management VaR is a version of VaR that uses an exponential weighting technique that automatically adjusts VaR where recent short-term market volatility differs from long-term volatility in the two-year dataset. Risk management VaR uses an expected shortfall calculation based on average losses, and a one-day holding period. This results in a more responsive VaR model, as the overall changes in market volatility are reflected almost immediately in the risk management VaR model.

**Risk mitigation** Risk mitigation refers to measures undertaken by the Group or the Bank to actively manage its risk exposure. For credit risk exposure, such measures would normally include utilizing credit hedges and collateral, such as cash and marketable securities. Credit hedges represent the notional exposure that can be transferred to other market counterparties, generally through the use of credit default swaps. In addition, risk mitigation also includes the active management of a loan portfolio by selling or sub-participating positions.

**Risk not in VaR (RNIV)** RNIV captures a variety of risks, such as certain basis risks, higher order risks and cross risks between asset classes, not adequately captured by the VaR model for example due to lack of sufficient or accurate risk or historical market data.

**Risk-weighted assets (RWA)** The value of the Group's assets weighted according to certain identified risks for compliance with regulatory provisions.

---

**S**

---

**Stressed VaR** Stressed VaR replicates a VaR calculation on the current portfolio of the Group or the Bank, taking into account a one-year observation period relating to significant financial stress; it helps reduce the pro-cyclicality of the minimum capital requirements for market risk.

**Swiss Financial Market Supervisory Authority FINMA**

**(FINMA)** FINMA, as an independent supervisory authority, protects creditors, investors and policy holders, ensuring the smooth functioning of the financial markets and preserving their reputation. In its role as state supervisory authority, FINMA acts as an oversight authority of banks, insurance companies, exchanges, securities dealers, collective investment schemes, distributors and insurance intermediaries. It is responsible for combating money laundering and, where necessary, conducts restructuring and bankruptcy proceedings and issues operating licenses for companies in the supervised sectors. Through its supervisory activities, it ensures that supervised institutions comply with the requisite laws, ordinances, directives and regulations and continues to fulfill the licensing requirements. FINMA also acts as a regulatory body; it participates in legislative procedures, issues its own ordinances and circulars where authorized to do so, and is responsible for the recognition of self-regulatory standards.

---

**T**

---

**“Too Big to Fail”** In 2011, the Swiss Parliament passed legislation relating to big banks. The legislation includes capital and liquidity requirements and rules regarding risk diversification and emergency plans designed to maintain systemically relevant functions even in the event of threatened insolvency.

**Total loss-absorbing capacity (TLAC)** TLAC is a regulatory requirement designed to ensure that Global Systemically Important Banks (G-SIBs) have the loss-absorbing and recapitalization capacity so that, in an immediately following resolution, critical functions can continue without requiring taxpayer support or threatening financial stability.

**Total return swap (TRS)** A TRS is a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loans or bonds.

---

**U**

---

**Ultra-high-net-worth individuals (UHNWI)** Ultra-high-net-worth individuals have assets under management in excess of CHF 50 million or total wealth exceeding CHF 250 million.

---

**V**

---

**Value-at-risk (VaR)** VaR is a technique used to measure the potential loss in fair value of financial instruments based on a statistical analysis of historical price trends and volatilities. VaR as a concept is applicable for all financial risk types with adequate price histories; the use of VaR allows the comparison of risk across different businesses.

### Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, targets or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “may,” “could,” “achieves,” “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, targets, goals, expectations, estimates and intentions expressed in such forward-looking statements. Additionally, many of these factors are beyond our control. These factors include, but are not limited to:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility, increases in inflation and interest rate fluctuations or developments affecting interest rate levels;
- the ongoing significant negative consequences, including reputational harm, of the Archegos and supply chain finance funds matters, as well as other recent events, and our ability to successfully resolve these matters;
- the impact of media reports and social media speculation about our business and its performance;
- the extent of outflows of deposits and assets or future net new asset generation across our divisions;
- our ability to improve our risk management procedures and policies and hedging strategies;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular, but not limited to, the risk of negative impacts of COVID-19 on the global economy and financial markets, Russia’s invasion of Ukraine, the resulting sanctions from the US, EU, UK, Switzerland and other countries and the risk of continued slow economic recovery or downturn in the EU, the US or other developed countries or in emerging markets in 2023 and beyond;
- the emergence of widespread health emergencies, infectious diseases or pandemics, such as COVID-19, and the actions that may be taken by governmental authorities to contain the outbreak or to counter its impact;

- our ability to successfully implement the divestment of any non-core business;
- the future level of any impairments and write-downs resulting from strategy changes and their implementation;
- the ability of counterparties to meet their obligations to us and the adequacy of our allowance for credit losses;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies;
- the effects of currency fluctuations, including the related impact on our business, financial condition and results of operations due to moves in foreign exchange rates;
- geopolitical and diplomatic tensions, instabilities and conflicts, including war, civil unrest, terrorist activity, sanctions or other geopolitical events or escalations of hostilities, such as Russia’s invasion of Ukraine;
- political, social and environmental developments, including climate change and evolving ESG-related disclosure standards;
- the ability to appropriately address social, environmental and sustainability concerns that may arise from our business activities;
- the effects of, and the uncertainty arising from, the UK’s withdrawal from the EU;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyber attacks, information or security breaches or technology failures on our reputation, business or operations, the risk of which is increased while large portions of our employees work remotely;
- the adverse resolution of litigation, regulatory proceedings and other contingencies;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting or tax standards, policies or practices in countries in which we conduct our operations;
- the discontinuation of LIBOR and other interbank offered rates and the transition to alternative reference rates;
- the potential effects of changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to protect our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes instituted by us, our counterparties or competitors;

- potential risks and uncertainties relating to the severity of impacts from the COVID-19 pandemic, including potential material adverse effects on our business, financial condition and results of operations;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic initiatives, including those related to our targets, ambitions and goals, such as our financial ambitions as well as various goals and commitments to incorporate certain environmental, social and governance considerations into our business strategy, products, services and risk management processes;
- our ability to achieve our announced comprehensive new strategic direction for the Group and significant changes to its structure and organization;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in *I – Information on the company – Risk factors*.

**Credit Suisse Group AG**

**Articles of Association**

Articles of Association of Credit Suisse Group AG

## **I. Corporate name, registered office, duration and purpose**

### **Art. 1 Corporate name, registered office and duration**

A stock corporation under the name Credit Suisse Group AG (Credit Suisse Group SA) (Credit Suisse Group Ltd.) (the “Company”) is established with its registered office in Zurich, Switzerland. Its duration is unlimited.

### **Art. 2 Purpose**

- 1 The purpose of the Company is to hold direct or indirect interests in all types of businesses in Switzerland and abroad, in particular in the areas of banking, finance, asset management and insurance. The Company has the power to establish new businesses, acquire a majority or minority interest in existing businesses and provide related financing.
- 2 The Company has the power to acquire, mortgage and sell real estate properties, both in Switzerland and abroad.

## **II. Share capital and shares**

### **Art. 3 Share capital and shares**

- 1 The fully paid-in share capital amounts to CHF 160,086,322.48 and is divided into 4,002,158,062 registered shares with a par value of CHF 0.04 each.
- 2 Upon a resolution being passed by the Shareholders’ Meeting, registered shares may be converted into bearer shares.
- 3 The Company may issue its shares in the form of single certificates, global certificates or uncertificated securities. The Company may convert the shares it issued in one form into another form at any time and without the approval of shareholders. Shareholders have no right to demand that issued shares be converted into another form. Shareholders may, however, at any time request that the Company issue a certificate for the registered shares that they hold according to the Share Register.
- 4 The Company recognizes only one representative for each share.

### **Art. 4 Share Register and transfer of shares**

- 1 The Company recognizes as a shareholder the person whose name is entered in the Share Register.
- 2 A person who has acquired registered shares will, upon application, be entered without limitation in the Share Register as having voting rights provided that he or she expressly states that he or she has acquired the shares concerned in his or her own name for his or her own account.
- 3 Any person not expressly stating in his or her application for registration that the shares concerned have been acquired for his or her own account (hereinafter “nominees”) may be entered for a maximum of 2% of the total outstanding share capital with voting rights in the Share Register. In excess of this limit, registered shares held by a nominee will only be granted voting rights if such nominee declares in writing that he or she is prepared to disclose the name, address and shareholding of any person for whose account he or she is holding 0.5% or more of the outstanding share capital. Art.10, Section 2 shall apply correspondingly to nominees who are related to one another through capital ownership or voting rights or have a common management or are otherwise interrelated.
- 4 The transfer restrictions apply regardless of the way and the form in which the registered shares are kept in the accounts, and regardless of the provisions applicable to transfers.

- 5 The transfer of intermediated securities based on the Company's shares, and the pledging of these intermediated securities as collateral, shall be based on the provisions of the Swiss Federal Intermediated Securities Act. Transfer or pledging as collateral by means of written assignment are not permitted.
- 6 The Board of Directors will issue the necessary directives to ensure that the aforementioned provisions are complied with.

### **III. Debt capital**

#### **Art. 5 Bond issues**

The Company may issue bonds, with or without security, including warrants and convertible issues, and may guarantee such issues by its subsidiaries.

### **IV. The governing bodies of the Company**

#### **Art. 6 The governing bodies of the Company shall be the following:**

1. The General Meeting of Shareholders ("Shareholders' Meeting");
2. The Board of Directors;
3. The Executive Board;
4. The Independent Auditors.

#### **1. The Shareholders' Meeting**

##### **Art. 7 Authority and duty to call a Shareholders' Meeting**

- 1 The Shareholders' Meeting shall ordinarily be called by the Board of Directors.
- 2 The ordinary Shareholders' Meeting shall take place annually within six months after the close of the business year.
- 3 Extraordinary Shareholders' Meetings shall take place as necessary. One or more shareholders whose combined holdings represent at least 10 percent of the share capital can also request that a Shareholders' Meeting be called.
- 4 Shareholders representing shares with a par value of CHF 40,000 may require that a particular item appear on the agenda of the Shareholders' Meeting.
- 5 The request to call a Shareholders' Meeting must be submitted in writing and at the same time shares of the Company representing at least 10 percent of the share capital are to be deposited. The request to include a particular item on the agenda of the Shareholders' Meeting, together with the relevant proposals, must be submitted in writing and at the same time shares of the Company with a par value of at least CHF 40,000 are to be deposited for safekeeping. The shares are to remain in safekeeping until the day after the Shareholders' Meeting.
- 6 The request to include a particular item on the agenda, together with the relevant proposals, must be submitted to the Board of Directors not later than 45 days before the date of the Shareholders' Meeting.

## **Art. 8 Powers**

The Shareholders' Meeting has the following powers which may not be delegated:

1. amending the Articles of Association;
2. electing the Members of the Board of Directors, the Chairperson, and the Members of the Compensation Committee. Art. 15, Section 3 and Art. 20a, Section 3 shall be reserved;
3. electing the independent proxy. Art. 14a, Section 2 shall be reserved;
4. electing the Independent Auditors and Special Auditors;
5. approving the management report, the consolidated financial statements and the annual statutory financial statements;
6. determining the allocation of the disposable profit;
7. formally discharging the actions of the Members of the Board of Directors and the Executive Board;
8. approving the compensation of the Board of Directors and the Executive Board; and
9. passing resolutions on all matters which have been reserved to its authority by law or by these Articles of Association or which have been submitted to the Shareholders' Meeting by the Board of Directors.

### **Art. 8a Approval of the compensation of the Board of Directors**

- 1 The Shareholders' Meeting approves on an annual basis the compensation of the Board of Directors in advance for the period up until the next ordinary Shareholders' Meeting.
- 2 The compensation may be paid partly in the form of participation rights in the Company. If so, the Board of Directors shall determine the conditions, including any disposal restrictions.
- 3 Members of the Board of Directors may also be paid compensation from other Group companies as long as this is included in the approved compensation as per Section 1.
- 4 If the Shareholders' Meeting refuses to approve the proposal of the Board of Directors pursuant to Section 1, the Board of Directors may submit a new proposal to a subsequent extraordinary Shareholders' Meeting or to the next ordinary Shareholders' Meeting.

### **Art. 8b Approval of the compensation of the Executive Board**

- 1 The Shareholders' Meeting approves on an annual basis the compensation of the Executive Board as a maximum amount or as maximum partial amounts in advance or retroactively for the period described in the proposal of the Board of Directors.
- 2 Insofar as the compensation is approved in advance, the Shareholders' Meeting shall in addition hold an advisory vote on the compensation report for this period.
- 3 The compensation consists of a fixed component and a variable component. The variable component comprises both short-term incentive compensation elements (which may contain deferred compensation elements with a qualifying period of up to three years from the date of grant) and long-term incentive compensation elements (which may contain deferred compensation elements with a longer qualifying period of at least three years from the date of grant). The variable component is dependent upon the attainment of individual and collective, short-term and long-term performance targets, which the Board of Directors sets on a regular basis.
- 4 The compensation may be paid partly in the form of participation rights in the Company or in the form of derivatives based on such participation rights or other financial instruments.

- 5 Conditional and deferred compensation components should be factored into the compensation at their fair value at date of grant. The Board of Directors determines grant, vesting, blocking, exercise and forfeiture conditions; they may provide for continuation, acceleration or removal of vesting and exercise conditions, for payment or grant of compensation assuming target achievement or for forfeiture in the event of pre-determined events such as a termination of an employment or mandate agreement.
- 6 Members of the Executive Board may also receive compensation from other Group companies as long as this is included in the approved compensation as per Section 1.
- 7 If the Shareholders' Meeting refuses to approve the proposal of the Board of Directors pursuant to Section 1, the Board of Directors may submit a new proposal for approval to a subsequent extraordinary Shareholders' Meeting or to the next ordinary Shareholders' Meeting.

**Art. 8c Reserve for changes to the Executive Board**

- 1 If the Shareholders' Meeting has approved in advance a maximum amount for the full or partial compensation of the Executive Board, the Company may use an additional maximum 30% of this amount per compensation period during the relevant compensation periods for the full or partial compensation of persons who have been newly appointed to the Executive Board or promoted within the Executive Board.
- 2 The additional amount may only be used if the compensation of the Executive Board approved by the Shareholders' Meeting in advance proves insufficient for the compensation of the new or promoted Members in the period until the next vote of the Shareholders' Meeting.
- 3 Where the payment of compensation is concerned, the other provisions of the Articles of Association apply *mutatis mutandis*.

**Art. 9 Notice of Shareholders' Meetings**

- 1 Notice of the Shareholders' Meeting must be given at least 20 days before the Shareholders' Meeting takes place. Notice of the meeting is to be published in the Swiss Gazette of Commerce (Schweizerisches Handelsamtsblatt).
- 2 The notice of the meeting must include the items on the agenda, the proposals submitted by the Board of Directors and by shareholders who have required that a meeting be held or that a particular item be included on the agenda.
- 3 No resolutions can be passed on proposals of which due notice has not been given, with the exception of those concerning the calling of an extraordinary Shareholders' Meeting or the carrying out of a special audit.

**Art. 10 Voting rights**

- 1 Subject to the provisions of Art. 4, Section 3 every share carries one vote at the Shareholders' Meeting. However, except as set out in Sections 3-5 below, the shares for which a single shareholder can directly or indirectly exercise voting rights for his or her own shares or as a proxy may not exceed 2 percent of the total outstanding share capital.
- 2 For the purposes of the restrictions on voting rights as laid down in Section 1 above, legal entities, partnerships or groups of joint owners or other groups in which individuals or legal entities are related to one another through capital ownership or voting rights or have a common management or are otherwise interrelated shall be regarded as being a single shareholder. The same shall apply to individuals, legal entities or partnerships that act in concert (especially as a syndicate) with intent to evade the limitation on voting rights.
- 3 The restrictions on voting rights do not apply to the exercise of voting rights by the independent proxy; for the instructing shareholders Section 1 and Section 2 remain reserved.

- 4 Nor do the restrictions on voting rights apply to shares in respect of which the shareholder confirms to the Company in the application for registration that he or she has acquired the shares in his or her name for his or her own account and in respect of which the disclosure requirement set out in Section 6 below has been satisfied.
- 5 In addition, the restrictions on voting rights do not apply to shares which are registered in the name of a nominee, provided that this nominee furnishes the Company with the name, address and shareholding of the person(s) (as per definition in Section 2 above) for whose account he or she holds 0.5 percent or more of the total share capital outstanding at the time and for which he or she (or the beneficial owner, as appropriate) has satisfied the disclosure requirement set out in section 6 below. The Board of Directors has the right to conclude agreements with nominees concerning both their disclosure requirement and the exercise of voting rights.
- 6 The disclosure obligation must be discharged in accordance with Art. 120 of the Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading of 19 June 2015 and the relevant ordinances and regulations.
- 7 The Board of Directors shall issue regulations regarding the proof of share ownership which is necessary in order to obtain voting cards.

**Art. 11 Chairperson, tellers, minutes taker**

- 1 The Chairperson of the Board of Directors shall chair the Shareholders' Meeting; in his or her absence, a Vice-Chairperson or another member designated by the Board of Directors take the chair.
- 2 The Shareholders' Meeting shall elect by a show of hands the tellers to count the votes at the meeting. Members of the Board of Directors, the Independent Auditors and employees of the Company shall not be eligible to act as tellers.
- 3 The Board of Directors shall nominate a secretary to take the minutes.

**Art. 12 Quorums**

- 1 The Shareholders' Meeting may in principle pass resolutions without regard to the number of shareholders present at the Shareholders' Meeting or represented by proxy.
- 2 Representation of at least half of the share capital is required for:
  - conversion of registered shares into bearer shares;
  - amendments to Art. 4, Section 3
  - amendments to Art. 10, Sections 1-6
  - dissolution of the Company.
- 3 This Article is subject to the mandatory provisions of the law and other provisions of these articles of association.

**Art. 13 Resolutions/required majorities**

- 1 Resolutions and elections by the Shareholders' Meeting require the approval of an absolute majority of the votes represented at the Shareholders' Meeting, except as otherwise prescribed by mandatory provisions of law or by other provisions of these articles of association. In the case of an equality of votes, elections and resolutions shall be decided by the casting vote of the person chairing the Shareholders' Meeting.
- 2 The conversion of registered shares into bearer shares, the dissolution of the Company and amendments to Art. 4, Section 3 of these articles of association require the approval of at least three-quarters of the votes cast. Amendments to Art. 10, Sections 1-6 require the approval of at least seven-eighths of the votes cast.

- 3 The Chairperson may allow elections and ballots to be conducted by a show of hands, by written ballot or by electronic means. He or she has all the powers required to conduct the Shareholders' Meeting in an orderly fashion.

**Art. 14 Minutes**

The person chairing the Shareholders' Meeting and the minutes taker of the Shareholders' Meeting are to sign the minutes of the Shareholders' Meeting.

**Art. 14a Independent proxy**

- 1 The independent proxy is elected by the Shareholders' Meeting for a term of office lasting until the close of the next ordinary Shareholders' Meeting.
- 2 Should the office of the independent proxy become vacant, the Board of Directors shall appoint a replacement for the next Shareholders' Meeting.
- 3 Individual persons as well as legal entities or partnerships may stand for election; they shall also be eligible for re-election.
- 4 The Board of Directors shall regulate the electronic submission of power of attorney and instructions to the independent proxy.

**2. The Board of Directors**

**Art. 15 Election and term of office**

- 1 The Board of Directors shall consist of a minimum of seven Members.
- 2 The Chairperson and the other Members of the Board of Directors are elected individually by the Shareholders' Meeting for a term lasting until the close of the next ordinary Shareholders' Meeting; they shall also be eligible for re-election.
- 3 Should the office of the Chairperson become vacant, the Board of Directors shall from among its Members appoint a replacement for the remaining term of office.

**Art. 16 Powers and responsibilities**

- 1 The Board of Directors shall decide on all matters which have not been reserved for or conferred on another governing body of the Company by law by these articles of association or by other regulations.
- 2 The Board of Directors determines those who have signatory power and the nature of the signatory power required. A document signed on behalf of the Company is binding on the Company only when it carries the signatures of two authorized signatories.

**Art. 17 Delegation of powers**

The Board of Directors may delegate the management of the Company wholly or partly to committees of the Board of Directors, individual Members of the Board or to other natural persons, in accordance with the regulations governing the conduct of business of the Company, as long as this delegation of powers does not conflict with any mandatory statutory provisions.

#### **Art. 18 Quorum/required majorities**

- 1 A majority of the Members of the Board of Directors must be present in order to pass resolutions; there is no presence quorum requirement for resolutions on authorized capital increases, for resolutions on amendments and acknowledgements by the Board of Directors in connection with capital increases, or for the acknowledgement of an event triggering conversion of the conversion capital. For resolutions carried out by circular letter, a majority of the Members of the Board of Directors must cast their votes.
- 2 Resolutions of the Board of Directors require the approval of an absolute majority of the votes cast. In the case of an equality of votes, decisions shall be determined by the casting vote of the person chairing the meeting.

#### **Art. 19 Minutes**

Minutes shall be kept of the proceedings and resolutions of the Board of Directors. The minutes shall be signed by the person chairing the meeting and the secretary.

#### **Art. 20 Compensation-related tasks of the Board of Directors**

- 1 The Board of Directors shall submit the compensation of the Board of Directors and the compensation of the Executive Board as per Art. 8a and Art. 8b to the Shareholders' Meeting each year for approval. In its proposal for the compensation of the Executive Board as per Art. 8b, Section 1, the Board of Directors designates the period to which the approval is to relate.
- 2 The Board of Directors shall determine the compensation of the individual Members of the Board of Directors and the Executive Board within the framework of the overall amounts as per Art. 8a-8c.
- 3 The Board of Directors adopts the annual compensation report.
- 4 The Board of Directors shall issue an internal regulation governing the organization of the Compensation Committee.

#### **Art. 20a Compensation Committee**

- 1 The Compensation Committee shall consist of at least three Members of the Board of Directors.
- 2 The Members of the Compensation Committee are elected by the Shareholders' Meeting for a term of office lasting until the close of the next ordinary Shareholders' Meeting. They shall also be eligible for re-election.
- 3 If the office of a Member of the Compensation Committee should become vacant, the Board of Directors shall appoint a replacement from among its Members for the remaining term of office.
- 4 The Compensation Committee shall support the Board of Directors in the following tasks:
  - a. determination and regular revision of the compensation strategy and compensation guidelines of the Company, as well as the corresponding performance criteria;
  - b. preparation of proposals to the Shareholders' Meeting on the compensation of the Board of Directors and the Executive Board; and
  - c. preparation of the Compensation Report.

The Compensation Committee may also submit proposals and recommendations relating to other compensation matters to the Board of Directors.

- 5 The Board of Directors may assign other tasks and competencies to the Compensation Committee.

#### **Art. 20b Mandates outside the Company**

- 1 Each Member of the Board of Directors may assume no more than four other mandates in listed companies and no more than five other mandates in other legal entities.
- 2 The following mandates are exempt from this restriction:
  - a. mandates in legal entities that are controlled by the Company or that control the Company;
  - b. mandates in legal entities not belonging to the Group that are exercised at the request or order of the Company or one of its controlled legal entities; each Member of the Board of Directors may exercise a maximum of ten such mandates; and
  - c. honorary mandates in charitable legal entities; each Member of the Board of Directors may exercise a maximum of ten such mandates.
- 3 Mandates in the sense of Art. 20b are deemed to comprise activities in the most senior executive and management bodies of legal entities that are obliged to obtain an entry in the Commercial Register or a corresponding foreign register. The assumption of up to five mandates in different legal entities under common control is deemed to constitute one mandate.

#### **Art. 20c Compensation agreements**

- 1 The Company or its Group companies may conclude agreements with Members of the Board of Directors with respect to their mandate and compensation.
- 2 The duration of such agreements and their termination shall comply with the term of office as well as the prevailing legislation. Such contracts may not exceed the term of office as per Art. 15, Section 2.

#### **Art. 20d Credit facilities and loans**

The Company may grant individual credit facilities and loans to each Member of the Board of Directors up to a maximum of CHF 20,000,000 at market conditions.

### **3. The Executive Board**

#### **Art. 20e Appointment, powers**

The Board of Directors appoints an Executive Board that assumes responsibility for managing and representing the Company in accordance with the regulations governing the conduct of business issued by the Board of Directors.

#### **Art. 20f Number of permissible mandates outside the Company**

- 1 Each Member of the Executive Board may assume no more than one other mandate in a listed company and no more than two other mandates in other legal entities.
- 2 The provisions of Art. 20b, Sections 2-3 shall apply analogously.

#### **Art. 20g Compensation agreements**

- 1 The agreements that form the basis for the compensation of Members of the Executive Board are open-ended, with a maximum notice period of 12 months.
- 2 The agreement of a post-contractual prohibition of competition is permissible as long as it is agreed for a maximum of one year and the corresponding compensation does not exceed the amount that the Member of the Executive Board has received as compensation in the twelve months prior to the termination of the employment contract with the Company.

#### **Art. 20h Credit facilities and loans**

The Company may grant individual credit facilities and loans to each Member of the Executive Board up to a maximum of CHF 20,000,000 at standard terms that apply in the financial sector.

#### **4. The Independent Auditors and the Special Auditors**

##### **Art. 21 Appointment and duties**

- 1 The Independent Auditors shall be elected by the Shareholders' Meeting for one year and shall be responsible for carrying out all functions and duties incumbent upon them by law.
- 2 The Special Auditors shall be elected by the Shareholders' Meeting for the term of one year and shall be responsible for the special audit reports in connection with qualified capital increases (Art. 652f CO).

#### **V. Financial year and allocation of the net profit**

##### **Art. 22 Financial year**

The Company's financial year shall be determined by the Board of Directors.

##### **Art. 23 Allocation of disposable profit**

The allocation of the disposable profit shall be made by the Shareholders' Meeting. The distributions of a dividend and the establishment and utilization of special reserves, if any, shall be decided by the Shareholders' Meeting in accordance with Art. 671 ff of the Swiss Code of Obligations.

#### **VI. Dissolution and liquidation of the Company**

**Art. 24** Should the Company be dissolved, the Board of Directors shall carry out the liquidation unless the Shareholders' Meeting decides otherwise.

#### **VII. Official notices and announcements**

##### **Art. 25 Publication**

- 1 The Swiss Official Gazette of Commerce (Schweizerisches Handelsamtsblatt) shall be the official medium for publication of the Company's notices and announcements.
- 2 Notices and announcements to the shareholders shall be made in the Swiss Official Gazette of Commerce (Schweizerisches Handelsamtsblatt), insofar as the law does not prescribe some other manner of publication.

#### **VIII. Transitional regulations**

##### **Art. 26 Conditional capital**

- 1 The Company's share capital pursuant to Art. 3 of the Articles of Association shall be increased by an amount not exceeding CHF 12 000 000 through the issue of a maximum of

300 000 000 registered shares, to be fully paid in, each with a par value of CHF 0.04 through the voluntary or compulsory exercise of conversion rights and/or warrants granted in connection with bonds or other financial market instruments of Credit Suisse Group AG, or any of its Group companies, or through compulsory conversion of contingent convertible bonds (CoCos) or other financial market instruments of Credit Suisse Group AG, or any of its Group companies, that allow for contingent compulsory conversion into shares of the Company.

Shareholders' subscription rights are excluded. Holders of financial market instruments with conversion features and/or of warrants are entitled to subscribe to the new shares. The Board of Directors fixes the conversion/warrant conditions.

The acquisition of shares through the exercise of conversion rights and/or warrants, or through the conversion of financial market instruments with conversion features, and any subsequent transfer of the shares are subject to the restrictions set out under Art. 4 of these Articles of Association.

- 2 Contingent capital pursuant to Art. 26 of the Articles of Association is made available, subject to para. 3, exclusively for the purpose of increasing share capital through the conversion of bonds or other financial market instruments of Credit Suisse Group AG, or any of its Group companies, that allow for contingent compulsory conversion into the Company's shares and that are issued in order to fulfil or maintain compliance with regulatory requirements of the Company and/or any of its Group companies (contingent convertible bonds).

The Board of Directors is authorized when issuing such contingent convertible bonds to exclude shareholders' preferential subscription rights if these bonds are issued on the national or international capital markets (including private placements with selected strategic investors).

If preferential subscription rights are restricted or excluded by resolution of the Board of Directors when contingent convertible bonds are issued:

- (i) the contingent convertible bonds must be issued at prevailing market conditions,
- (ii) the setting of the issue price of the new shares must take due account of the stock market price of the shares and/or comparable instruments priced by the market at the time of issue or time of conversion, and
- (iii) conditional conversion features may remain in place indefinitely.

- 3 Deleted

**Art. 26a Deleted**

**Art. 26b Deleted**

**Art. 26c Conversion capital**

- 1 The Company's share capital pursuant to Art. 3 of the Articles of Association shall be increased by an amount not exceeding CHF 6,000,000 through the issue of a maximum of 150,000,000 registered shares, to be fully paid in, each with a par value of CHF 0.04, through the compulsory conversion upon occurrence of the trigger event of claims arising out of contingent convertible bonds (CoCos) of Credit Suisse Group AG or any of its Group companies, or of other financial market instruments of Credit Suisse Group AG or any of its Group companies, that provide for a contingent or unconditional compulsory conversion into shares of the Company.
- 2 Shareholders' preemptive rights are excluded. Holders of financial market instruments with conversion features are entitled to subscribe to the new shares.
- 3 Shareholders' preferential subscription rights with regard to financial market instruments with conversion features will be granted. If a quick placement of contingent convertible bonds (CoCos) in large tranches is required, the Board of Directors is authorized to exclude shareholders' preferential subscription rights. In such circumstances, these contingent convertible bonds (CoCos) must be issued at prevailing market conditions.

- 4 The Board of Directors determines the issue price of the new shares taking due account of the stock market price of the shares and/or comparable instruments.
- 5 The acquisition of shares through the conversion of financial market instruments with conversion features, and any subsequent transfer of the shares are subject to the restrictions set out under Art. 4 of these Articles of Association.

**Art. 27 Authorized capital**

- 1 The Board of Directors is authorized, at any time until April 29, 2024, to increase the share capital, as per Art. 3 of the Articles of Association to a maximum of CHF 5,000,000 through the issuance of a maximum of 125,000,000 registered shares, to be fully paid up, each with a par value of CHF 0.04. Increases by underwriting as well as partial increases are permissible. The issue price, the time of dividend entitlement, and the type of contribution will be determined by the Board of Directors. Upon acquisition, the new shares will be subject to the transfer restrictions pursuant to Art. 4 of the Articles of Association.
- 2 The Board of Directors is authorized to exclude shareholders' subscription rights in favor of third parties if the new registered shares are used for (a) the acquisition of companies, segments of companies or participations in the banking, finance, asset management or insurance industries through an exchange of shares or (b) the financing/refinancing of the acquisition of companies, segments of companies or participations in these industries, or new investment plans. If commitments to service convertible bonds or bonds with warrants are assumed in connection with company takeovers or investment plans, the Board of Directors is authorized, for the purpose of fulfilling delivery commitments under such bonds, to issue new shares excluding the subscription rights of shareholders.
- 3 The Board of Directors may allow subscription rights that are not exercised to expire without compensation, or it may sell the subscription rights or the registered shares for which they were granted at market conditions on the market or otherwise use them in the interest of the Company.

## **Preamble**

### **Corporate governance**

Together with the Articles of Association, the Code of Conduct, the BoD and Committee Charters, and the Compensation Policy, the OGR defines the corporate governance guidelines of the Group. These form the basis for effective and efficient corporate governance of the Group.

### **Group**

The Group consists of CSG and all its direct and indirect subsidiaries, which together form one economic unit.

### **CSG**

CSG is a holding company domiciled in Zurich, Switzerland. Its statutory purpose is to hold direct or indirect interest in all types of businesses in Switzerland and abroad, in particular in the areas of banking, finance, asset management and insurance. CSG sets standards for the Group to allow for an efficient and harmonized steering of the Group.

### **Governance principles**

The governance of the Group is based on the principles of an integrated oversight and management structure with global scope. In particular, as an organization active in the financial services industry, Swiss regulatory principles of consolidated supervision apply to the Group governance and organization. Corporate bodies and officers are, subject to applicable local laws, regulations and best practice standards, bound to ensure transparency and collaboration throughout the Group, in particular through the appropriate flow of information and cooperation within and across all businesses and organizational structures. In addition, it is an important principle that conflicting interests shall, to the extent possible, be avoided, disclosed and aligned.

### **Business**

The Group is engaged in the banking business, which is primarily performed through CS and its Major Subsidiaries. CS is domiciled in Zurich, Switzerland. The statutory purpose is the operation of a bank, and its scope of operations extends to all types of banking, financial, advisory, service, and trading activities in Switzerland and abroad. CS and its subsidiaries are provided with infrastructure and other services through the service company Credit Suisse Services AG, Switzerland.

**Group structure**

The Group is structured into four Divisions (Wealth Management; Investment Bank; Swiss Bank; and Asset Management), four geographic Regions (Switzerland; EMEA; APAC; and Americas) and Corporate Functions. In addition, there is a CRU for the purposes of releasing capital from non-core businesses. The Regions reinforce the Group's integrated model of global businesses and support the Divisions and Corporate Functions across the various businesses, in particular in terms of market, client and talent development. In addition, the Regions oversee the legal entities, maintain the relationship with the regulators and ensure a robust risk-based control environment. The Corporate Functions provide products, infrastructure and services to the Divisions and Regions, as well as perform control activities independent from the Divisions and Regions. The Divisions and Regions coordinate their activities in collaboration with the Corporate Functions where appropriate.

**Division Wealth Management**

WM provides private banking and wealth management capabilities to clients globally (except United States of America).

**Division Investment Bank**

IB offers a broad range of financial products and services focused on client-driven businesses and also supports WM and its clients.

Financial products and services include global securities sales, trading and execution, capital raising and advisory services for clients such as financial institutions, corporations, governments, sovereigns, ultra-high-net-worth and institutional investors, including pension funds and hedge funds, financial sponsors and private individuals around the world.

**Division Swiss Bank**

SB provides domestic personal & business clients, private clients, corporate and institutional banking capabilities to clients in Switzerland.

**Division Asset Management**

AM provides investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals.

**Capital Release Unit**

CRU comprises a NCU and the Group's residual Securitized Products business. The NCU's purpose is to release capital through the wind-down of non-strategic, low return and higher-risk business.

## **I. Introduction**

### **1. Scope and content**

- 1.1 The OGR establishes the duties and responsibilities of the BoD and its committees, the Chairman, the CEO, the ExB, and the ExB committees, as well as certain executive functions of the Group. It further establishes the duties and responsibilities of the Corporate Functions, the Divisional CEOs, the Divisional MCs, the Divisional RMCs, the Regional CEOs, the Regional MCs, and Internal Audit.
- 1.2 The OGR shall be applicable to CSG and CS. As long as the BoDs and ExBs of CSG and CS are mainly composed of the same persons, the meetings of the BoDs respectively ExBs shall be held for both companies simultaneously and with the same agenda, and the minutes of these meetings shall reflect the decisions taken for both companies, except for specific items which are different for each company (e.g. statutory financial statements, preparation of shareholder meetings). The same principle applies to the activities and meetings of the BoD and ExB committees.
- 1.3 To the extent permitted by local law and regulatory guidelines, the organizational regulations of the other direct and indirect subsidiaries and other enterprises owned or controlled by CSG shall reflect the same principles and rules as stated in this OGR.
- 1.4 CSG controls directly or indirectly all of its subsidiaries and sets standards for the Group to allow for an efficient and harmonized steering of the Group. Notwithstanding this, the legal independence of all subsidiaries and the provisions of applicable local laws, rules and regulations relating to them must be observed to the extent legally required. Each subsidiary may establish additional separate regulations to regulate business specific to such entity.
- 1.5 Governance bodies and officers are, subject to applicable local laws, rules and regulations, bound to ensure transparency and collaboration within the Group. Governance bodies and officers may have multiple responsibilities and reporting lines within the Group.
- 1.6 The responsibilities and authorities set out in these regulations including the annexes may only be delegated if expressly permitted herein or with the explicit approval or ratification by the BoD for a specific transaction or activity.
- 1.7 Notwithstanding any delegation of authority or approval process provided for in these regulations, no person shall participate in the approval, execution or implementation of any transaction (including the opening, closing or managing of a client's account) or otherwise have any responsibility for or role in the execution or implementation of any such transaction, if such participation, responsibility or role would cause such person or any entity within the Group to violate any law or regulation to which such person or entity is subject.
- 1.8 CSG may allocate full management responsibility over its directly held subsidiaries to CS. The ExB shall decide to which extent they shall be integrated in CS's management processes.

## **2. Approval procedures for urgent business matters**

- 2.1 Should immediate action be required to ensure the conclusion of an urgent business matter, which lies in the authority of the BoD, provided that the BoD is not in a position to act in time (e.g. lack of a quorum) and there is no clear indication that the BoD would not approve the respective proposal, the matter may as an exception be approved by the Chairman. To the extent possible, available BoD members shall be consulted.
- 2.2 Should immediate action be required to ensure the conclusion of an urgent business matter which lies in the authority of a particular body or executive function, provided that the authorized body or executive function is not in a position to act in time and there is no clear indication that the business matter contains excessive risks or the authorized body or executive function would not approve the respective business matter, and there are no other instructions from the CEO or the responsible ExB member, the respective business matter may as an exception be approved by the body or executive function one level below the authorized body or executive function. In any event, the CEO or the responsible ExB member, to the extent possible, must be consulted.
- 2.3 If the procedure outlined in section 2.1 and 2.2 is applied, the BoD or the authorized body or executive function (as applicable) must be advised of such transaction or business matter at the earliest opportunity.

## II. Board of Directors

### 3. Organization

3.1 The BoD shall consist of at least seven members. In this regard, the BoD considers the principle that the BoD should be of an appropriate size to ensure a qualified composition of the Committees on the one hand and an efficient decision making process on the other.

The BoD shall consist of at least a majority of independent directors as determined by the BoD taking into account the factors set forth below, the charters of the committees of the BoD and any applicable laws and regulations, in particular the SIX Exchange Directive on Information relating to Corporate Governance, the Swiss Code of Best Practice, the New York Stock Exchange Corporate Governance Listing Standards and the SOX rules.

3.2 In general, a director is considered independent, if he

- is not, and has not been for the past three years, employed as an ExB member at CSG or any of its subsidiaries or in another significant function at the Group;
- is not, and has not been for the past three years, an employee or affiliate of CSG's external auditor;
- does not, according to the BoD's assessment, maintain a material direct or indirect business relationship with CSG or any of its subsidiaries which causes a conflict of interest due to its nature or extent;
- is not, or has not been for the past three years, part of an interlocking directorate in which an ExB member serves on the compensation committee of another company that employs the BoD member.

BoD members with immediate family members who would not qualify as independent according to the above listed criteria shall be subject to a three-year cooling-off period for purposes of determining their independence after fulfilment of the independence criteria by the immediate family member.

3.3 The BoD shall discharge its responsibilities as a joint board or through committees elected by the AGM or appointed by the BoD respectively from among its members.

3.4 The BoD proposes to the AGM the election of the Chairman and appoints one or more vice-chairs and the chairs of the committees of the BoD from among its members for a term until the end of the next AGM.

3.5 The BoD may appoint a Lead Independent Director. If the Chairman is deemed non-independent by the BoD, the BoD must appoint a Lead Independent Director.

The Lead Independent Director primarily supports the Chairman in respect of the work of the BoD, mediates in cases of conflicts between the Chairman and the BoD and leads the performance assessment process of the Chairman.

The Lead Independent Director may convene for meetings without the Chairman being present.

3.6 The BoD shall designate one or more Secretaries who need not be a member of the BoD.

3.7 A member of the BoD shall generally retire at the AGM of the year in which he has been serving on the BoD for 12 years. Under certain circumstances, the BoD may extend the limit of terms of office for a particular member of the BoD for a maximum of three years.

3.8 Otherwise, the BoD shall organize itself.

#### **4. Chairman**

- 4.1 The Chairman – or in his absence one of the vice-chairs – presides over the meetings of the BoD. The Chairman shall prepare an agenda in advance of each meeting in coordination with the CEO.
- 4.2 The Chairman co-ordinates the work of the BoD and the committees and ensures that the BoD members are provided with timely information relevant for appropriately performing their duties and responsibilities.
- 4.3 The Chairman leads the preparations of the AGM and oversees the implementation of the resolutions taken by shareholders.
- 4.4 The Chairman challenges and supports the CEO and the ExB in developing the strategic business plans and financial objectives of the Group. The Chairman is also actively involved in establishing succession plans for the CEO and other key management positions. Within the scope of his duties of overall direction and supervision, the Chairman may attend meetings of the ExB, however not on a regular basis, but has no voting rights.
- 4.5 The Chairman represents the Group and the BoD to shareholders, clients, employees, and other stakeholders.
- 4.6 The Chairman is supported by the Chairman's Office whose composition, duties and responsibilities he determines as deemed appropriate.

#### **5. Responsibilities and authorities**

- 5.1 The BoD shall be responsible for the overall direction, supervision and control of CSG, CS and its management. In particular, the members of the BoD shall jointly discharge the following actions:
  - 5.1.1 determine the principal organization and governance of the Group;
  - 5.1.2 establish general accounting, financial control and planning principles and policies;
  - 5.1.3 prepare and approve the annual report, annual financial statements and the agenda of the AGM including the proposal by the BoD;
  - 5.1.4 appoint or dismiss the CEO and the members of the ExB and grant them collective signing authority, exercisable jointly by two, for CSG and CS;
  - 5.1.5 appoint or dismiss the Head of Internal Audit as well as appoint the regulatory auditor upon proposal by the AC;
  - 5.1.6 approve the principles for the business policy, the objectives, the strategy, the annual business and financial plans including the principal risk management strategy for the business activities;
  - 5.1.7 approve the risk management framework, annual risk appetite and the overall risk limits, including appetites for the strategic risk objectives, as well as specific appetites covering financial and non-financial risk;
  - 5.1.8 approve the capital and liquidity planning, the liquidity risk tolerances, the liquidity management strategies and key liquidity policies including the Contingency Funding Plan;
  - 5.1.9 approve country risk appetites upon proposal by the RC if not otherwise delegated (see annex A II);

- 5.1.10 perform and document a systematic risk analysis as the basis for an appropriate ICS and regularly review its appropriateness and efficiency;
- 5.1.11 supervise the implementation of appropriate processes and measures designed to ensure that employees on all levels are aware of and understand their responsibilities and tasks with regard to ICS processes;
- 5.1.12 approve the compensation principles, the Compensation Policy and key elements of management and employee compensation plans and amendments thereto and of significant fringe benefit or welfare plans;
- 5.1.13 set the overall amounts of compensation of the BoD and the ExB in accordance with Art. 20 Para. 1 of the AoA of CSG;
- 5.1.14 set the compensation of the individual BoD members, the CEO, and individual ExB members within the framework of the overall amounts that apply as per Art. 20 Para. 2 of the AoA of CSG;
- 5.1.15 approve the overall variable compensation pool and the key sub-pools;
- 5.1.16 appoint or dismiss the chair and the members of the BoD of the Major Subsidiaries and other subsidiaries of strategic importance of the Group and approve their remuneration, subject to local law and regulations. Guidelines for the nomination and the remuneration process shall be set forth in a policy;
- 5.1.17 approve the Recovery and Resolution Plans of the Group and the Major Subsidiaries in accordance with regulatory requirements;
- 5.1.18 approve actions and transactions and receive reports in accordance with Annex A.

## **6. Monitoring, access to information, reports**

- 6.1 The BoD shall monitor that the CEO and the ExB pursue the business policy and strategy effectively and in accordance with all applicable laws, the AoA, the Code of Conduct and all additional internal regulations, and ensure compliance with applicable laws, rules and regulations.
- 6.2 The members of the BoD shall have access to all information concerning the Group as far as necessary to fulfil their duties as a BoD member. The Chairman approves requests made by a member of the BoD to review internal documents outside a BoD or committee meeting. BoD members with functional duties may review any internal documents at any time without the approval of the Chairman, if needed to fulfil their functional duties.
- 6.3 The BoD shall receive the following reports:
  - 6.3.1 risk reports at least on a quarterly basis providing an overview on key changes in the risk profile;
  - 6.3.2 monthly financial reports providing an overview on the financial performance (overall and on a divisional and regional basis), liquidity and capital adequacy;
  - 6.3.3 regulatory reports, including the quarterly large exposure report, the annual Long Form Report issued by the external auditor, and reports on significant other regulatory issues as soon as practicable;
  - 6.3.4 annual Comprehensive Auditor's Report issued by the external auditor providing a summary of findings from the audits of the consolidated financial statements of CSG and CS;
  - 6.3.5 annual Compliance Report, ICS Report, and Governance Report (including report on compliance with principles of consolidated supervision);

- 6.3.6 periodic reports on significant human resources matters;
- 6.3.7 other reports on material extraordinary events and actions taken as soon as practicable;
- 6.3.8 all information of Major Subsidiaries (e.g. minutes of the BoD, reports and other information prepared for management purposes).
- 6.4 The Chairman may request additional reports as deemed appropriate.

## **7. Committees**

- 7.1 The BoD establishes the following regular committees composed by the members of the BoD and approves their charters:
  - the Governance and Nominations Committee
  - the Audit Committee
  - the Compensation Committee
  - the Risk Committee
  - the Conduct and Financial Crime Control Committee
  - the Digital Transformation and Technology Committee

The BoD may establish such other committees with such other charters as the BoD deems appropriate.

- 7.2 The committees shall consist of not less than three members and generally no more than half of the total number of BoD members.
- 7.3 With the exception of the CC, the members of the committees are appointed by the BoD at its constitutive meeting for a term until the end of the next AGM. Should the office of a member of a committee become vacant, the BoD may appoint a replacement from among its members for the remaining term of office. The committees shall organize themselves according to their charters.
- 7.4 The members of the CC are elected individually by the AGM for a term until the end of the next AGM. Should the office of a member of the CC become vacant, the BoD shall appoint a replacement from among its members for the remaining term of office. The CC shall organize itself according to its charter.
- 7.5 The chairs of the committees shall regularly inform the BoD on material matters discussed at the committee meetings.

## **8. Governance and Nominations Committee**

- 8.1 The GNC shall generally consist of the Chairman, the Vice-Chair(s), the Lead Independent Director, the chairs of selected BoD committees and may also include additional BoD members. The GNC may include non-independent BoD members, however the majority of the members must qualify as independent. It shall establish its own charter to be submitted to the BoD for approval.
- 8.2 The GNC shall, in particular, have the following responsibilities:
  - 8.2.1 act as counselor to the Chairman and facilitate the dialogue between the members of the BoD and the Chairman;

- 8.2.2 discuss with the CEO and assess any significant appointment proposal to be submitted to the BoD for approval, in particular appointments to the ExB and the appointment of the head of Internal Audit;
- 8.2.3 develop criteria and assess candidates for a BoD membership on the basis of a requirements profile drawn up by the GNC. The requirements profile for BoD candidates takes into account all applicable laws and provisions as well as aspects relevant for ensuring an appropriate degree of diversity. The GNC reviews both internal and external proposals and submits potential candidates to the BoD for proposal to the AGM;
- 8.2.4 ensure the maintenance of high standards of corporate governance and make proposals to the BoD on corporate governance issues, in particular BoD member independence, the adherence to corporate governance provisions applicable to individual BoD members and BoD committee composition.

## **9. Audit Committee**

- 9.1 All members of the AC need to be independent in the meaning of article 3.2 of this OGR. The chair of the RC shall generally be appointed as one of the members of the AC. It shall establish its own charter to be submitted to the BoD for approval. The members of the AC shall satisfy all additional independence and qualification requirements as set forth in the charter of the AC. The composition of the AC shall differ sufficiently from the other committees.
- 9.2 The AC shall, in particular, have the following responsibilities:
  - 9.2.1 review the annual report, the annual financial statements and related resolutions proposed for the AGM;
  - 9.2.2 review the quarterly financial statements;
  - 9.2.3 review the ExB's report on internal controls over financial reporting (SOX 404) and the annual Compliance Report;
  - 9.2.4 review the quality, independence and performance of the internal and external audit function;
  - 9.2.5 take note of significant extraordinary reports submitted to regulators;
  - 9.2.6 review the findings of Internal Audit and the external auditors and approve their annual audit objectives;
  - 9.2.7 review and assess components of the ICS addressing compliance processes and controls;
  - 9.2.8 review jointly with the RC the annual assessment of the adequacy and effectiveness of the ICS, the status of major infrastructure and committed change programs, as well as the control functions' input into remuneration;
  - 9.2.9 review jointly with the RC other significant matters of non-financial risk as appropriate;
  - 9.2.10 submit to the BoD upon consultation of the GNC proposals for the appointment of the Head of Internal Audit;
  - 9.2.11 propose the regulatory auditor for appointment by the BoD;
  - 9.2.12 review reports by the GC on material legal and regulatory matters; and
  - 9.2.13 review reports by the CCO on material compliance matters, including matters raised by way of the whistleblower process.

## **10. Compensation Committee**

- 10.1 All members of the CC need to be independent in the meaning of article 3.2 of this OGR. It shall establish its own charter to be submitted to the BoD for approval.
- 10.2 The CC shall, in particular, have the following responsibilities:
- 10.2.1 review the Group's compensation principles and submit them to the BoD for approval;
- 10.2.2 review the Group's Compensation Policy and submit it to the BoD for approval;
- 10.2.3 discuss and determine amendments to existing or the establishment of new management and employee compensation plans and of significant fringe benefit or welfare plans and submit key elements of such plans and any significant amendments thereto to the BoD for approval;
- 10.2.4 propose compensation for the BoD members, the CEO and the ExB members (including newly appointed ExB members) for proposal to the AGM for approval;
- 10.2.5 review and propose the overall variable compensation pool and the key sub-pools to the BoD for approval and provide the BoD with a review of the compensation process on an annual basis;
- 10.2.6 review and approve the compensation proposals for other individuals (e.g. individuals classified as "Covered Employees") as stipulated in the CC Charter;
- 10.2.7 receive periodic information on employee expense regulations;
- 10.2.8 inform the BoD on the decisions taken, review and propose any mandatory public disclosure of management compensation as well as the annual compensation report.

## **11. Risk Committee**

- 11.1 With the exception of the chair of the RC, the RC may include non-independent BoD members, however the majority of the members must qualify as independent. The chair of the AC shall generally be appointed as one of the members of the RC. The RC shall establish its own charter to be submitted to the BoD for approval. The members of the RC shall satisfy all additional qualification requirements as set forth in the RC charter.
- 11.2 The RC shall, in particular, have the following responsibilities:
- 11.2.1 review and assess the integrity and adequacy of the risk management function of the Group, including risk measurement approaches;
- 11.2.2 review and calibrate:
- the risk appetite at the level of the Group as well as at the level of key businesses considering capital, liquidity, funding, credit, market, model and climate risks, illiquid investment activities, and jointly with the AC, significant matters of non-financial risk as appropriate; and
  - major risk concentrations;
- 11.2.3 approve the list of countries to be monitored with internal country limits and propose the country risk appetites to the BoD insofar as this authority has not been delegated (see Annex A II);
- 11.2.4 assess the capital and liquidity planning and report to the BoD, review the Contingency Funding Plan and propose to the BoD for approval;
- 11.2.5 review regularly relationships with top clients and material transactions from a risk perspective;

- 11.2.6 review and assess the business continuity management, risk measurement and management with respect to the ICS, and annually the firm-wide risk management framework;
- 11.2.7 review jointly with the AC the annual assessment of the adequacy and effectiveness of the ICS, the status of major infrastructure and committed change programs, as well as the control functions' input into remuneration;
- 11.2.8 review and assess the current state and evolution of the risk culture;
- 11.2.9 review the reports on material risk matters by the risk function, significant Group legal entities, Group business and Corporate Functions; and
- 11.2.10 mandate the Credit Risk Review function.

#### **11a. Credit Risk Review**

- 11a.1 Credit Risk Review is given its mandate from the RC to independently assess the Group's credit risk management practices, identify issues impacting the quality of credit risk management, and report its findings to the RC.
- 11a.2 The Global Head of Credit Risk Review functionally reports to the chair of the RC, and the Credit Risk Review team administratively is part of the CRO function.
- 11a.3 The Global Head of Credit Risk Review is appointed by the RC, in consultation with the CRO.
- 11a.4 The RC approves the annual review plan, budget and compensation for the Credit Risk Review team.
- 11a.5 Credit Risk Review has unrestricted access to all information, systems, and employees required to fulfill its mandate.
- 11a.6 Credit Risk Review has the final decision on the reporting of credit risk related findings and risk rating changes as a result of its review process. Credit Risk Review shall prepare its reports independently, and the content of these reports will be distributed to senior management and RC as set forth in the mandate.

#### **12. Conduct and Financial Crime Control Committee**

- 12.1 The CFCCC may include non-independent BoD members, however the majority of the members must qualify as independent. The chair of the AC shall generally be appointed as one of the members of the CFCCC. The CFCCC shall establish its own charter to be submitted to the BoD for approval.
- 12.2 The CFCCC shall, in particular, have the following responsibilities:
  - 12.2.1 review the Group's overall compliance framework for addressing financial crime risk;
  - 12.2.2 assess the effectiveness of financial crime compliance programs, including those with respect to the following areas:
    - anti-money laundering;
    - client identification and know-your-client (KYC);
    - client on and off boarding;
    - politically exposed persons (PEP);
    - economic and trade sanctions;

- anti-bribery and anti-corruption; and
  - client tax compliance.
- 12.2.3 review reports by the CCO and senior business leaders on material matters related to financial crime compliance, including matters concerning employee conduct;
- 12.2.4 review the findings of Internal Audit and the external auditors related to financial crime compliance;
- 12.2.5 in the compensation process, provide input to the CC with respect to relevant financial crime compliance issues, as well as provide support and advice to the CC;
- 12.2.6 conduct joint reviews with the AC and/or RC as appropriate.

### **13. Digital Transformation and Technology Committee**

- 13.1 The DTTC may include non-independent BoD members. The DTTC shall establish its own charter to be submitted to the BoD for approval.
- 13.2 The DTTC shall, in particular, have the following responsibilities:
- 13.2.1 oversee and drive the strategic alignment of the Group's technology investments and spend as well as the governance standards for digital transformation across the Group;
- 13.2.2 oversee the execution of the Group's major digitalization and technology initiatives and tracks the progress made;
- 13.2.3 identify and assess opportunities and threats to the Group's business model from the digital transformation;
- 13.2.4 work closely with the RC and AC in regards of overseeing technology-driven risks;
- 13.2.5 obtain independent external perspectives and thought leadership to select technology trends with impact on the Group and the financial services industry more broadly; and in relation to these trends, critically examine the strategies and activities within the Group;
- 13.2.6 review reports by the CTOO on material matters related to digital transformation and technology.

### **14. Sustainability Advisory Committee**

- 14.1 The SAC is an interdisciplinary body, which acts as an advisor to the BoD. The SAC consists of no less than three BoD members, including the BoD Sustainability Leader. Additionally, the SAC includes the Chief Sustainability Officer and selected members of the Executive Board, two of which are the Group CEO and the CRO, and may include other members. The SAC shall establish its own charter to be submitted to the BoD for approval. Otherwise, the regulations regarding the committees shall be applicable mutatis mutandis.
- 14.2 The SAC shall support and advise the BoD as follows: (1) observation and assessment of the general business relevant environment and trends regarding sustainability; (2) development of recommendations to the BoD in relation to the execution of the Group's sustainability strategy and targets; and (3) monitoring and assessing the effectiveness of the sustainability initiatives and programs within the Group.
- 14.3 The SAC shall have the right to obtain the necessary information from internal stakeholders of the Group and shall be empowered to engage with external experts.

### **III. Management organization**

#### **15. General provisions**

- 15.1 The ExB shall have the overall responsibility for the operational management of the Group.
- 15.2 The businesses of the Group are managed through four Divisions. They are supported by designated Corporate Functions, which provide products, infrastructure and services to the Divisions, as well as perform control activities, independent from the Divisions. In addition, there is a CRU for the purposes of releasing capital from non-core businesses. The Regions reinforce the Group's integrated model of global businesses and support the Divisions and Corporate Functions across the various businesses, in particular in terms of market, client and talent development. In addition, the Regions oversee the legal entities, maintain the relationship with the regulators and ensure a robust risk-based control environment. The Divisions and Regions coordinate their activities in collaboration with the Corporate Functions where appropriate.

#### **16. Chief Executive Officer**

- 16.1 The CEO shall be appointed by the BoD and may not be a member of the BoD.
- 16.2 The CEO shall, in particular, have the following authorities and responsibilities with the right to delegate the performance and implementation of such authorities and responsibilities further:
  - 16.2.1 designate, upon consultation with and approval by the Chairman, a deputy who shall exercise all responsibilities and authorities in case the CEO may not be able to exercise his function;
  - 16.2.2 establish a management organization that avoids the creation or appearance of conflicts of interests and enables the Group to effectively operate its businesses as one economic unit in accordance with the strategy approved by the BoD. In particular, he shall establish a risk management function, a legal function and a compliance function independent from any business line;
  - 16.2.3 issue policies necessary for the management and operation of the Group, to the extent that this is not the responsibility of the BoD;
  - 16.2.4 supervise the business activities and be responsible for the implementation of resolutions of the BoD and its committees;
  - 16.2.5 approve actions and transactions and receive reports in line with annex A;
  - 16.2.6 ensure that the reporting duties to the BoD and its committees as stipulated in sections 6.3 and 8 through 13 of this OGR as well as the applicable committee charters are fulfilled.

#### **17. Executive Board**

- 17.1 The ExB members are appointed by the BoD. In general, the ExB is composed of the Divisional CEOs, the Regional CEOs and the heads of the Corporate Functions. The CEO shall act as the chair of the ExB. Otherwise, the ExB shall organize itself.

- 17.2 The CEO shall have a right to veto any decision taken by the ExB. He shall inform the Chairman on any such vetoes.
- 17.3 The ExB shall, in particular, have the following authorities and responsibilities:
- 17.3.1 regularly review and co-ordinate significant initiatives, projects and business developments in and across the Divisions, Regions and Corporate Functions and reconcile any issues;
- 17.3.2 regularly review the consolidated and divisional financial performance;
- 17.3.3 establish annually the strategic business plans, performance targets and budgets, including resource allocation, for the Group as a whole, as well as the Divisions and the Regions, subject to approval by the BoD, and implement such plans;
- 17.3.4 grant corporate titles for CSG and CS and signatory power for CS in line with section 43;
- 17.3.5 approve the annual capital expenditure plan and establish the approval authorities for investments within the approved plan as well as extraordinary investments in line with section 15 of annex A;
- 17.3.6 approve key policies for the Group, in particular, the Group Policy on Inter-Company Guarantees and the Group Policy on Capital of Branches and Subsidiaries;
- 17.3.7 appoint the Group's representatives in important commissions or organizations;
- 17.3.8 approve actions and transactions and receive reports in line with annex A.
- 17.4 Any member of the ExB must notify the CEO promptly and the ExB at the next opportunity of any extraordinary events or risks occurring in the course of ongoing business activities.
- 17.5 All board and similar mandates, held by a member of the ExB by virtue of that member's office, shall be relinquished upon termination of service within the Group, unless otherwise determined by the GNC in consultation with the CEO.

#### **18. ExB committees**

The ExB establishes the following regular committees and approves their Terms of Reference:

- the ExB RMC;
- the Group CALMC;
- the CS AG Parent CALRMC;
- the VARMC; and
- the GCB.

#### **19. ExB Risk Management Committee**

- 19.1 The ExB RMC shall consist of the members of the ExB and such other members as the CEO shall appoint. The CEO, CRO and CCO shall serve as co-chairs. Each of the co-chairs shall have a right to veto any decision taken by the ExB RMC individually and shall inform the RC chair on the respective matter in the event such veto is used. The ExB RMC shall generally meet on a monthly basis. Otherwise, the ExB RMC shall organize itself.
- 19.2 The ExB RMC may establish sub-committees to monitor specific risks or sub-committees within Divisions, Regions or subsidiaries and may delegate relevant authorities to these sub-committees as required. Such sub-committees inform the ExB RMC on a regular basis.

- 19.3 The ExB RMC shall approve actions and transactions and receive reports in line with annex A.
- 19.4 The ExB RMC shall approve all risk limit applications requiring final approval by the RC or the BoD.
- 19.5 The ExB RMC shall, in particular, have the following authorities and responsibilities:
  - 19.5.1 steer and monitor the development and execution of the bank's risk management strategy, in line with the risk management framework approved by the BoD;
  - 19.5.2 review and approve risk appetite under ExB RMC authority and recommend approvals to the BoD. This covers financial and non-financial risks;
  - 19.5.3 monitor risk appetite metrics, including limit breaches and remediation;
  - 19.5.4 monitor and review the aggregate and top risk exposures as well as risk concentrations;
  - 19.5.5 review the Group's key businesses with focus on key risks and mitigation and monitor and review key risk trends and emerging risks;
  - 19.5.6 review and assess the ICS;
  - 19.5.7 review risk relevant regulatory developments, commitments and remediation; and
  - 19.5.8 review and resolve risk escalations from any ExB RMC sub-committee or any ExB RMC member and escalate risk issues requiring additional oversight to the responsible BoD committee or to the full BoD.

## **20. Group Capital Allocation and Liability Management Committee**

- 20.1 The CEO shall appoint the members of the Group CALMC, which shall include the CFO, CRO and the Divisional CEOs and may include other ExB members. The CFO shall serve as chair. The Group CALMC shall meet at least on a quarterly basis. Otherwise the Group CALMC shall organize itself.
- 20.2 The Group CALMC shall, in particular, have the following delegable authorities and responsibilities related to funding, liquidity and capital matters:
  - 20.2.1 review the funding and balance sheet trends and activities;
  - 20.2.2 plan and monitor regulatory and business liquidity requirements;
  - 20.2.3 plan and monitor internal and regulatory capital adequacy as well as Leverage and RWA utilization including direct responsibility over central hedging activities and delegation authority on local hedging initiatives;
  - 20.2.4 approve the Group Policy on Funding Authority in line with section 26.2.5;
  - 20.2.5 review and propose the Group and CS AG Parent contingency funding plan for approval by the BoD;
  - 20.2.6 be responsible for the interest rate risk in the banking books position taking and decides on changes to approaches related to the investments of own equity;
  - 20.2.7 set targets, approve and review adherence to targets for capital allocation, funding, liquidity and capital management actions including the review and monitoring of share re-purchases;
  - 20.2.8 maintain an optimized global booking model with established booking principles and review and challenge migration initiatives; and

20.2.9 oversees different initiatives focused on solving pre-defined areas negatively affecting our Group Effective Tax Rate and hence negatively affecting our Group Return on Tangible Equity.

## **21. CS AG Parent Capital Allocation, Liability and Risk Management Committee**

- 21.1 The Head of Risk for CS AG Parent and Head of Treasury in CFO shall be appointed as members and co-chairs of the CS AG Parent CALRMC. Each of the co-chairs shall have a right to veto any decision taken by CS AG Parent CALRMC individually and shall inform the CRO and CFO on the respective matter in the event such veto is used. The CS AG Parent CALRMC shall meet at least on a bi-monthly basis. Otherwise, the CS AG Parent CALRMC shall organize itself.
- 21.2 The CS AG Parent CALRMC shall, in particular, have the following authorities and responsibilities related to capital management, liquidity management and risk management matters of CS AG Parent:
- 21.2.1 review and approve all risk limit applications for CS AG Parent requiring final approval by the BoD;
- 21.2.2 setting risk standards and strategies for CS AG Parent complementing the overall Group risk management with considerations regarding CS AG Parent-specific vulnerabilities;
- 21.2.3 review and resolve issues pertaining to risks of CS AG Parent escalated by the risk functions of any Division, Region, Corporate Function or branch. Provide notification of risk issues requiring additional oversight to the ExB RMC;
- 21.2.4 serve as the risk appetite authority for CS AG Parent and its branches, within the risk appetite approved by the BoD. Review the risk appetite with focus on the key risk types (1) Credit Risk, (2) Market Risk, (3) Non-Traded Market Risk, (4) Country Risk, (5) Business Risk, (6) Non-Financial Risk and (7) Enterprise Risk, including the dependencies with regulatory capital constraints;
- 21.2.5 monitor and review the CS AG Parent aggregate risk profile, in particular the CS AG Parent-specific vulnerabilities;
- 21.2.6 review elevated or emerging risks, in particular portfolio risks that can pose a threat to the CS AG Parent's financial resilience;
- 21.2.7 monitor key risk trends and metrics, including limit breaches and remediation pertaining to CS AG Parent;
- 21.2.8 review the risks associated with key CS AG Parent-booked businesses and holding company activities with focus on CS AG Parent-specific vulnerabilities and mitigation;
- 21.2.9 review the capital, liquidity and funding trends and activities of CS AG Parent;
- 21.2.10 review the existing business booked into CS AG Parent to ensure the ability to generate an appropriate risk/return, subject to broader accounting, tax or other financial and/or capital objectives; and
- 21.2.11 review and challenge the Major Subsidiary financial and capital plans, including key risks and key dependencies, such as dividends or other capital repatriations from the Major Subsidiaries to CS AG Parent, ahead of approvals by the respective Major Subsidiary governance bodies.

## **22. Valuation Risk Management Committee**

- 22.1 The CEO shall appoint a minimum of five members from the ExB and senior management to form the VARMC. The CFO shall generally be appointed as a member and chair the VARMC. Otherwise, the VARMC shall organize itself.
- 22.2 The VARMC shall, in particular, have the following delegable authorities and responsibilities: It regularly reviews the Inventory Valuation Reviews, establishes policies regarding the valuation of certain important assets and the policies and calculation methodologies applied in the valuation process, and monitors and assesses valuation risks.

## **23. Group Conduct Board**

- 23.1 The CEO shall appoint a minimum of five members from the ExB and senior management to form the GCB. The Global Head of People, GC, CCO, CFO and CRO shall generally be appointed as members and the Global Head of People shall co-chair the GCB together with one of the other ExB members on an annually rotating basis. Otherwise, the GCB shall organize itself.
- 23.2 The GCB shall, in particular, have the following authorities and responsibilities:
  - 23.2.1 establish and determine a governance framework for the management of conduct matters throughout the Group;
  - 23.2.2 oversee the global disciplinary process, ensuring it is applied in a fair and consistent manner and ensuring cross-divisional and cross-regional harmonization and alignment;
  - 23.2.3 review disciplinary measures and serve as the decision body for disciplinary matters escalated from the Divisions, Regions and Corporate Functions (subject to escalation to the ExB);
  - 23.2.4 serve as a review panel to consider potential significant events and make recommendations to the CC on individual compensation outcomes;
  - 23.2.5 review findings from conduct related investigations and consider these in the context of determining disciplinary outcomes;
  - 23.2.6 report on progress to key stakeholders.

## **24. Other Committees**

- 24.1 The CEO may establish further ExB committees if deemed appropriate.

## **IV. Corporate Functions**

### **25. General provisions**

- 25.1 While the Divisions and Regions remain responsible for certain critical operational functions, the Corporate Functions are consolidated at Group level.
- 25.2 The CEO allocates the management of such consolidated Corporate Functions to the CFO, the COO, the GC, the CRO, the CCO, the CTOO, and the Global Head of People.
- 25.3 The CFO, the COO, the GC, the CRO, the CCO, the CTOO, and the Global Head of People shall have the authority to issue policies for their respective functions as well as for areas where the execution of specific duties within their functions is allocated to the Divisions or Regions.
- 25.4 The CEO may designate other Corporate Functions and appoint the heads of such Corporate Functions.

### **26. Chief Operating Officer**

- 26.1 The COO shall be appointed by the BoD and shall report directly to the CEO.
- 26.2 The COO shall, in particular, have the following authorities and responsibilities (“COO duties”), with the right to delegate the performance and implementation of such COO duties further:
  - 26.2.1 establish an organizational basis to manage all administrative and operational matters of the Group, i.e. including in subsidiaries and branches, as well as all other business areas allocated to the COO;
  - 26.2.2 support the CEO in the steering and strategic development of the Group;
  - 26.2.3 lead operational and cost transformation programs;
  - 26.2.4 manage Group programs focusing on key front-to-back value chains, organizational design (together with the Global Head of People), Group wide efficiencies (together with CFO), as well as oversight of the operational and capital expenditure strategy (together with CTOO and CFO);
  - 26.2.5 oversee the change portfolio strategy and prioritization, including execution of key investment programs and continuous improvement of the change management process and assurance of a holistic Group wide perspective across lines of defense;
  - 26.2.6 manage the Group wide shared services functions, Group Business Support Services and Procurement;
  - 26.2.7 manage the Group functions of Global Sustainability, Global Marketing, Corporate Communications and Group Strategy & Development;
  - 26.2.8 facilitate collaboration between the COO functions of the Divisions, Regions and Corporate Functions, in alignment with the respective Divisional and Regional CEOs and Corporate Function Heads; and
  - 26.2.9 execute other responsibilities delegated by the BoD or the CEO.

## **27. Chief Financial Officer**

- 27.1 The CFO shall be appointed by the BoD and shall report directly to the CEO.
- 27.2 The CFO shall, in particular, have the following authorities and responsibilities (“CFO duties”), with the right to delegate the performance and implementation of such CFO duties further:
- 27.2.1 establish an organizational basis to manage all financial matters of the Group, i.e. including in subsidiaries and branches, as well as all other business areas allocated to the CFO;
- 27.2.2 establish a controlling, accounting, product control, tax, treasury and investor relation function;
- 27.2.3 ensure transparent and timely financial reporting (accounting policies, statutory and consolidated financial statements) internally as well as to the public and regulators in line with legal and regulatory requirements as well as best practice;
- 27.2.4 ensure together with the GC, CRO and CCO that all regulatory reports are filed on a timely basis;
- 27.2.5 develop and propose to the Group CALMC for approval the Group Policy on Funding Authority defining in particular the authorities and responsibilities for:
- the use of money market and capital market instruments and derivatives for the management of the balance sheet;
  - the use of capital market transactions, the issuance and sale of notes, bonds, preferred shares and similar securities;
  - the issuance of structured notes; and
  - borrowings by the Group.
- 27.2.6 manage regulatory and business liquidity and capital adequacy within the general bands set by the regulators, the BoD and the ExB RMC;
- 27.2.7 Establish and manage the CRU, which shall be overseen by a CRU Executive Committee, chaired by the CFO and consisting of the Head of the CRU, the Head of Securitized Products and other senior managers. The primary authorities and responsibilities of the CRU are to:
- execute measures to release capital from the NCU portfolio of non-strategic, low return assets;
  - oversee the residual trading assets from the Securitized Products business in accordance with the terms and conditions defined in the relevant agreement(s); and
  - manage the Group’s Legal Entity Program and other activities within the scope of the CRU.
- 27.2.8 approve actions and transactions and receive reports in line with Annex A;
- 27.2.9 appoint and oversee the divisional and regional CFOs; and
- 27.2.10 execute other responsibilities delegated by the BoD or the CEO.

## **28. General Counsel**

- 28.1 The GC shall be appointed by the BoD and shall report directly to the CEO.
- 28.2 The GC shall have all necessary authorities for legal matters within the Group. In particular, the GC shall have the following authorities and responsibilities (“GC duties”), with the right to delegate the performance and implementation of such GC duties further:
- 28.2.1 establish an organizational basis for the management of all legal matters of the Group, i.e. including in subsidiaries and branches, independent from any business line;

- 28.2.2 manage the Global Litigation and Investigations function, responsible for handling affirmative and defensive civil litigation, arbitrations, and mediations, as well as regulatory and governmental inquiries, investigations and enforcement proceedings and for conducting internal investigations, in conjunction with the CCO Investigations function as deemed appropriate;
- 28.2.3 manage Public Policy and – together with the responsible Regional CEO – Regulatory Affairs;
- 28.2.4 be responsible for the representation of the Group vis à vis the lead regulators (excluding CRO related matters; see section 28, and CFO related matters; see section 26) and coordinate with the CCO and Regional CEOs the representation of the Group vis à vis other regulators and governmental authorities;
- 28.2.5 ensure, together with the CFO, CCO and CRO function that all regulatory reports are filed on a timely basis;
- 28.2.6 ensure, together with the Divisional CEOs, the Regional CEOs, the CCO and CRO that all license requirements are continuously adhered to;
- 28.2.7 manage security services;
- 28.2.8 appoint and oversee the divisional and regional GCs;
- 28.2.9 execute other responsibilities delegated by the BoD or the CEO.

## **29. Chief Risk Officer**

- 29.1 The CRO shall be appointed by the BoD and shall report directly to the CEO.
- 29.2 The CRO shall, in particular, have the following authorities and responsibilities (“CRO duties”), with the right to delegate the performance and implementation of such CRO duties further:
  - 29.2.1 establish an organizational basis to manage all financial and non-financial risk management matters of the Group, i.e. including in subsidiaries and branches, and also including an appropriate credit risk management, market risk management, liquidity risk management, and non-financial risk management function, all of which shall be independent from any business line;
  - 29.2.2 establish a risk reporting system that ensures, in particular, that relevant information on the risk portfolio is provided to the ExB on a regular basis;
  - 29.2.3 designate a Chief Credit Officer, who shall have the authority to approve actions and transactions with material impact on global portfolio limits, in line with the credit risk policy;
  - 29.2.4 appoint and oversee the Divisional and Regional CROs, who shall have the authority to approve actions and transactions in line with Annex A;
  - 29.2.5 represent the Group vis-a-vis the lead regulators in technical risk management related matters;
  - 29.2.6 ensure, together with the CFO, CCO and the GC that all regulatory reports are filed on a timely basis;
  - 29.2.7 ensure, together with the Divisional CEOs, the Regional CEOs, the CCO and GC, that all license requirements are continuously adhered to;
  - 29.2.8 establish a RPSC and appoint its chair and members. The RPSC shall, in particular, have the following authorities and responsibilities:
    - review major risk management processes;

- issue general instructions, standards and processes concerning risk management;
- approve material changes in market, credit and operational risk management standards and policies and related methodology with notification to the ExB RMC and the chairman of the RC;
- review and approve procedures for analyzing and monitoring the risk portfolio;
- review and approve risk measurement principles and key parameter changes; and
- review and approve the standards for the computation of the amount of risk capital for all types of transactions.

29.2.9 approve actions and transactions and receive reports in line with annex A;

29.2.10 facilitate that the risk governance bodies of the Major Subsidiaries determine their respective governance framework for the adoption of global policies and for the issuance of subsidiary specific policies;

29.2.11 execute other responsibilities delegated by the BoD or the CEO.

### **30. Chief Compliance Officer**

30.1 The CCO shall be appointed by the BoD and shall report directly to the CEO.

30.2 The CCO shall, in particular, have the following authorities and responsibilities (“CCO duties”) with the right to delegate the performance and implementation of such CCO duties further:

30.2.1 establish an organizational basis to manage all compliance matters of the Group independent from any business line;

30.2.2 establish a compliance reporting system that ensures that relevant information on compliance matters is provided to the ExB on a regular basis;

30.2.3 set global compliance standards, frameworks and policies, and oversee global compliance programs and compliance risk monitoring, including setting standards for adherence to the principles of consolidated supervision and overseeing their implementation;

30.2.4 coordinate together with the GC, the Divisional CEOs and the Regional CEOs the representation of the Group vis-a-vis other regulators and authorities in Regions where Regulatory Affairs is not present or does not hold the day-to-day relationship;

30.2.5 ensure, together with the CFO, CRO and the GC that all regulatory reports are filed on a timely basis;

30.2.6 ensure together with the Divisional CEOs, the Regional CEOs, CRO and GC that all license requirements are continuously adhered to;

30.2.7 appoint and oversee the CCOs for each Division and Region, Financial Crime Compliance, and Central Compliance;

30.2.8 execute other responsibilities delegated by the BoD or the CEO.

### **31. Chief Technology and Operations Officer**

31.1 The CTOO shall be appointed by the BoD and shall report directly to the CEO.

31.2 The CTOO shall, in particular, have the following authorities and responsibilities (“CTOO duties”), with the right to delegate the performance and implementation of such CTOO duties further:

- 31.2.1 establish an organizational basis to manage all IT matters and deliver and maintain effective IT solutions for critical business initiatives within the Group, i.e. including subsidiaries and branches;
- 31.2.2 drive and manage the digital transformation of the Group;
- 31.2.3 be responsible for the new business process and policy;
- 31.2.4 run global operations;
- 31.2.5 be responsible for BCM;
- 31.2.6 appoint and oversee the divisional and regional CTOO functions;
- 31.2.7 execute other responsibilities delegated by the BoD or the CEO.

### **32. Global Head of People**

- 32.1 The Global Head of People shall be appointed by the BoD and shall report directly to the CEO.
- 32.2 The Global Head of People shall, in particular, have the following authorities and responsibilities (“People duties”), with the right to delegate the performance and implementation of such People duties further:
  - 32.2.1 establish an organizational basis to manage all People matters of the Group, i.e. including in subsidiaries and branches, as well as other business areas allocated to the Global Head of People;
  - 32.2.2 be responsible, together with the Divisional CEOs, the Regional CEOs and heads of the Corporate Functions, for the implementation of all Group policies related to People, as well as to ensure ethical value and professional standards (Code of Conduct);
  - 32.2.3 appoint and oversee the divisional and regional heads of People;
  - 32.2.4 execute other responsibilities delegated by the BoD or the CEO.

## **V. Divisions**

### **33. General provisions**

- 33.1 While the CEO and the members of the ExB have the overall management responsibility for the Group, the responsibility for the operational management of the Divisions and the subsidiaries and branches, for which the management has been allocated to the Divisions, lies with the Divisional CEOs.
- 33.2 The Divisional CEOs shall establish for their Divisions their own MC. They shall be responsible for establishing an efficient organizational and management structure in the Division. The Divisional CEO consults with the ExB prior to making significant changes to the organizational and management structure in the Divisions.

### **34. Divisional CEOs**

- 34.1 The Divisional CEOs shall be appointed by the BoD and report directly to the CEO.
- 34.2 The Divisional CEOs shall be responsible for the operational management of the businesses and subsidiaries and branches allocated to their Division. They shall, in particular, have the following authorities and responsibilities ('Divisional CEOs duties') with the right to delegate the performance and implementation of such Divisional CEOs duties further:
  - 34.2.1 establish an adequate organizational basis to manage the divisional businesses and subsidiaries and branches allocated to such Division; with regard to the subsidiaries and branches they shall consult with the responsible Regional CEO;
  - 34.2.2 appoint the managers of the divisional business areas;
  - 34.2.3 receive reports and manage matters escalated from the divisional business areas;
  - 34.2.4 issue policies, in coordination with the CCO, necessary for the management and operation of the Division, to the extent that it is not the responsibility of the BoD, the CEO or the ExB;
  - 34.2.5 actively co-ordinate business activities with the other Divisional CEOs, the responsible Regional CEOs and the responsible Business Heads;
  - 34.2.6 coordinate with the GC and the responsible Regional CEOs the representation of the Group vis à vis other regulators and authorities in regions where Regulatory Affairs is not present in the respective region or does not hold the day-to day relationship;
  - 34.2.7 ensure, together with the GC, the CCO, the CRO and the responsible Regional CEOs that all license requirements are continuously adhered to; and
  - 34.2.8 execute other responsibilities and authorities delegated by the BoD or the CEO.

### **35. Divisional Management Committee**

- 35.1 The Divisional MC shall consist of the Divisional CEO and other members from Divisional management appointed by the Divisional CEO upon consultation with and approval by the CEO. The Divisional CEO shall act as the chair of the MC. Otherwise, the MC shall organize itself.
- 35.2 The Divisional MC shall, in particular, have the following delegable authorities and responsibilities:
  - 35.2.1 regularly review and co-ordinate significant initiatives, projects, and business developments in the Divisions and efficiently reconcile any arising issues; and
  - 35.2.2 develop the divisional strategic business plan and budget for approval by the ExB.
- 35.3 Any MC member must notify the Divisional CEO promptly and the MC at the next opportunity of any extraordinary risks occurring in the course of ongoing business activities.

### **36. Divisional Risk Management Committee**

- 36.1 The Divisional CEO shall establish a Divisional RMC for his area of responsibilities, which shall consist of the Divisional Head, members from the Divisional MC, selected members of senior management as well as representatives from relevant Regions and Corporate Functions. The Divisional RMC may hold meetings jointly with other Divisional RMCs and/or RMCs of the major subsidiaries. Other than that, the Divisional RMC may organize itself.
- 36.2 The Divisional RMC shall, in particular, have the following delegable authorities and responsibilities:
  - 36.2.1 regularly review and discuss Division specific market and credit risk matters;
  - 36.2.2 perform tasks delegated to it by the ExB RMC;
  - 36.2.3 set limits to control or cap businesses as appropriate;
  - 36.2.4 regularly review and discuss Division specific operational risks, legal and compliance issues and internal control matters if these tasks are not performed by another divisional committee;
  - 36.2.5 ensure that significant divisional risks are escalated to the ExB RMC or other bodies at CS level as appropriate.

## **VI. Regional management**

### **37. General provisions**

- 37.1 Each of the four geographic regions (Switzerland, EMEA, APAC, Americas) is led by a Regional CEO. Given the particular position as home market of the Group, supplementary regulations may be set forth for the Region Switzerland, which may also deviate from the following regulations. They need to be approved by the ExB.
- 37.2 The Regional CEOs shall establish their own Regional MCs. They are responsible for an efficient organizational and management structure in the Region. The Regional CEOs consult with the ExB prior to making significant changes to the organizational and management structure in the Regions.

### **38. Regional Chief Executive Officer**

- 38.1 The Regional CEOs shall be appointed by the BoD and shall report directly to the CEO.
- 38.2 The Regional CEOs shall, in particular, have the following authorities and responsibilities (“Regional CEO duties”) as it relates to their Region with the right to delegate the performance and implementation of such Regional CEO duties further:
  - 38.2.1 issue policies necessary for the management and operation of their Region, to the extent that it is not the responsibility of the BoD, the CEO, the ExB or a Division and to the extent it does not concern the responsibility of a Corporate Function;
  - 38.2.2 be responsible for the management of the Region and establish an appropriate management organization for the countries, subsidiaries and branches in their Region. Appoint, upon consultation and approval by the CEO, the country heads and appoint and oversee the management of the subsidiaries, branches and representative offices;
  - 38.2.3 determine – together with the Divisional CEOs concerned and within the overall risk limits framework as approved by the BoD – the risk limits for countries with an increased risk profile in their Region and be responsible for monitoring such risk limits;
  - 38.2.4 receive reports and manage matters escalated from the countries, subsidiaries, branches and representative offices in their Region;
  - 38.2.5 foster the business development of the Group in their Region by driving and coordinating cross-divisional collaboration, as well as by fostering business growth and key client coverage in their Region;
  - 38.2.6 oversee risk management activities in their Region, and decide – together with the Divisional CEOs concerned – in particular on sensitive transactions and the on-boarding of high-risk clients. In addition, review – together with the Divisional CEOs concerned – high-risk client relationships over the life cycle. Coordinate any necessary action with the Divisions and Corporate Functions concerned;
  - 38.2.7 represent the Group vis-a-vis authorities and key clients in their Region, individually or jointly with divisional or Corporate Functions representatives as appropriate;

- 38.2.8 have ultimate responsibility for Legal Entity oversight and the relationship with regulators in their Region, with the exception of the relationship vis-a-vis the lead regulator (see also sections 27.2.4 and 29.2.4); responsible – together with the GC – for regulatory affairs in their Region;
- 38.2.9 decide – together with the Divisional CEO concerned – on hires or dismissals of employees with key functions (e.g. employees classified as “material risk takers and controllers”) in their Region, including promotion, variable compensation and disciplinary measures of such individuals;
- 38.2.10 are responsible – in close cooperation with the Divisional CEOs and the Global Head of People—for the Regional leadership bench and talent strategy in their Region; ensure a consistent employee value proposition and an adequate firm-wide corporate culture in their Region.

### **39. Regional Management Committee**

- 39.1 The Regional MCs shall consist of the Regional CEO and representatives of the Divisions, Corporate Functions, significant subsidiaries and country management appointed by the Regional CEO upon consultation with and approval by the CEO. The Regional CEO shall act as the chair of the Regional MC. Otherwise the Regional MC shall organize itself.
- 39.2 The regional MC shall, in particular, have the following authorities and responsibilities:
  - 39.2.1 regularly review and co-ordinate significant cross-divisional initiatives, projects, business developments in their Region and efficiently reconcile any arising issues;
  - 39.2.2 regularly review and assess regulatory and Legal Entity oversight;
  - 39.2.3 provide the Divisions with information relevant for the strategic business plan and financial plans.
- 39.3 Any Regional MC member must notify the Regional CEO promptly and the Regional MC at the next opportunity of any extraordinary risks occurring in the course of ongoing business activities.

## **VII. Subsidiary and branch governance**

### **40. General provisions**

- 40.1 Governance of Group subsidiaries and branches is based on the principles of consolidated supervision and an integrated oversight and management structure with global scope.
- 40.2 Subject to the applicable local laws, regulations and best practice standards, directors and officers of Group subsidiaries and branches are bound to ensure transparency and collaboration throughout the Group, in particular through the appropriate flow of information and cooperation within and across all business and organizational structures.

### **41. Subsidiary governance**

- 41.1 The BoD designates those subsidiaries through which, collectively, the majority of the Group's banking operations are conducted, as Major Subsidiaries, and in agreement with the CEO and consistent with applicable local law and regulations, may allocate certain responsibilities to these Major Subsidiaries.
- 41.2 The BoD approves the nominations and dismissals of the members of the board of the Major Subsidiaries and approves their remuneration. Major Subsidiaries shall furthermore be subject to a set of minimum governance standards, which are periodically reviewed and approved by the BoD.
- 41.3 Each Major Subsidiary shall have its own governance documents. These shall comply with all applicable local law and regulations and, to the extent possible, be consistent with the same principles and rules as stated in this OGR.
- 41.4 In order to ensure a transparent flow of information, meeting documentation and other information prepared for management purposes of Major Subsidiaries shall be shared with the supervisory and management bodies of the Group.
- 41.5 Further, CSG shall be informed about any material matter of a Major Subsidiary. Prior to a substantial decision of a Major Subsidiary, CSG shall be consulted at the earliest opportunity as specified by the governance documents of the relevant subsidiary.
- 41.6 The BoD may at any time define certain other subsidiaries and governance bodies as strategically important. They are – mutatis mutandis – subject to the regulations set forth in this section.

### **42. Branch governance**

- 42.1 The ExB shall determine the governance and oversee the management of the Group's branches and representative offices, in line with applicable legal and regulatory requirements.
- 42.2 The Regional CEO of the Region, in which the branch is operating, shall determine the reporting lines for Branch Managers and the responsibility for the management of the branch's business operations;
- 42.3 The Regional CEOs consider size and complexity of the branch's organization and the materiality of its business operations. The ExB may classify branches with the most material operations as "Material Branches". They are subject to a set of minimum governance standards. The ExB may apply the same or other governance standards for other branches.

- 42.4 With respect to the management and oversight of the Material Branches, the following minimum governance standards shall apply:
- 42.4.1 the Regional CEO of the Region, in which the branch is operating, shall, upon consultation with the ExB, appoint the general manager of the branch (the “Branch Manager”). The Regional CEO shall serve as line manager to these Branch Managers or may delegate this responsibility. Branch Managers shall generally not also serve as officers of a Major Subsidiary or in a control function role. Branch Managers shall have the authority and responsibility for the management of branch matters and escalation of such to the Regional CEO or delegate;
  - 42.4.2 the relevant Corporate Functions shall, upon consultation with the Branch Manager and, if appropriate, the Regional CEO or delegate, appoint a Branch CRO, CFO, CCO and GC, and may appoint other officers;
  - 42.4.3 the Branch Manager shall establish a Branch Management Committee and, together with the Branch CRO, a Branch Risk Management Committee. The Branch Manager may establish further branch committees;
  - 42.4.4 the responsibility for capital, liquidity and financial matters of the branches shall be with the CFO function; and
  - 42.4.5 the mandates of the Branch Managers and other Branch management functions of the Material Branches may be defined in further detail, subject to approval by the ExB.
- 42.5 For branches not designated as material branches and representative offices, the Regional CEO of the Region, in which the branch or representative office is operating, shall appoint the Branch Manager or head of the representative office.

## **VIII. Internal Audit**

### **43. Internal Audit**

- 43.1 Internal Audit shall systematically, objectively and independently assess whether major risks are appropriately identified and managed, the internal control system is effective, the governance processes established ensure compliance with applicable policies, laws and regulations, and management performs efficient monitoring and oversight.
- 43.2 Internal Audit is mandated by and reports to the AC. The Head of Internal Audit shall report directly to the chair of the AC. The Head of Internal Audit shall have unrestricted access to all information and all employees as it is required to perform his tasks.
- 43.3 The Head of Internal Audit shall be appointed by the BoD upon proposal by the AC and upon consultation by the GNC.
- 43.4 The authorities and responsibilities as well as the working procedures of Internal Audit shall be outlined in the charter of the AC and the Regulations for Internal Audit as adopted by the AC.
- 43.5 Internal Audit shall prepare its reports independently. The reports shall be distributed to executive bodies and ExB members as set forth in the Regulations for Internal Audit.
- 43.6 As set forth in the charter of the AC and in the Regulations for Internal Audit Internal Audit shall regularly submit reports to the AC on significant findings, the achievement of its annual audit objectives, and other matters as deemed appropriate.
- 43.7 Any member of the ExB may submit a request to the chair of the AC or, in his absence, to the Chairman, for Internal Audit to carry out a special project or investigation.

## **IX. Special provisions**

### **44. Conflicts of interest**

- 44.1 The members of the BoD, the ExB, the Divisional and Regional MCs, the MCs of the Corporate Functions and all committees named herein are obliged to preserve the interests of the Group.
- 44.2 Conflicts of interest of a personal nature, private or professional, potential conflicts of interest and even the appearance of conflicts of interest should be avoided. Any conflicts of interest with respect to a particular transaction, including conflicts of interest of persons or companies with whom the member has close personal relations, should be disclosed to the chair of the relevant body prior to the resolution process for such transaction. The affected member shall not become involved in the resolution process for such transaction.
- 44.3 With respect to conflicts of interest arising because a member of a body is also a member of another body or company within the Group, which is involved or affected by the transaction or matter to be decided, the following principles shall apply:
  - 44.3.1 the member concerned shall disclose the conflict of interest and a personal assessment thereof in advance to the chairman of the relevant body and subsequently to that body itself unless this is obvious;
  - 44.3.2 the relevant body shall take the interest of the other body or company into consideration and make reasonable efforts to find a solution that aligns the common interests of both bodies or companies as much as possible; and
  - 44.3.3 if no solution according to OGR 44.3.2 can be found, the conflicted member shall generally abstain from voting.

### **45. Titles, signing authorities and Powers of Attorney**

- 45.1 Corporate titles of the Group and signing authority on behalf of CS
  - 45.1.1 The BoD appoints the CEO and the members of the ExB and grants them full signing authority exercisable jointly by two.
  - 45.1.2 The ExB promotes MDR, MDA, DIR, VP, AVP, ASO and ANL.
  - 45.1.3 The ExB may grant joint signing authority to MDR, MDA, DIR and VP in line with the AoA of CS.
  - 45.1.4 The ExB may grant joint power of procuration (dual authorization) (i.e. Prokura according to Art 458ff of the Swiss Code of Obligations) to AVP, ASO and ANL in line with the AoA of CS.
  - 45.1.5 The ExB may grant limited signing authority (dual authorization) in the form of a commercial mandate (i.e. Handlungsvollmacht according to Art 462 of the Swiss Code of Obligation) to employees without a corporate title.
  - 45.1.6 The ExB may establish policies to further detail signing authorities.

45.2 Special provisions for signing authority on behalf of CSG

45.2.1 The approval of any signing authority (joint signing authority, joint power of procurement and commercial mandates) on behalf of CSG are approved by the BoD.

45.3 Functional titles

45.3.1 The ExB shall establish a policy to guide the use of functional titles within the Group.

45.4 Powers of Attorney

45.4.1 Powers of Attorney may be granted as set forth below to third parties, who may also be employees of the Group, authorizing such third parties to individually or jointly execute documents or take other actions in connection with actions and transactions approved consistent with the OGR.

45.4.2 Members of the ExB or the Divisional and Regional MC as well as the heads of the Corporate Functions and their direct reports may, jointly by two, grant Powers of Attorney or

- designate certain employees with a corporate title of AVP or higher in the GC area to be authorized to grant, jointly by two, Powers of Attorney on behalf of CSG or CS. This primarily applies to the granting of Power of Attorney in legal proceedings;
- designate certain employees with a corporate title of VP or higher in the Divisions, Regions or Corporate Functions to be authorized to grant, jointly by two, Powers of Attorney on behalf of CSG or CS. This applies to the granting of Power of Attorney not related to legal proceedings.

45.4.3 Powers of Attorney for the acts of any branch of CS outside Switzerland may be granted by two authorized signatories of such branch, one of which must be the branch manager or an MDR.

**46. Meetings and minutes**

46.1 Meetings of the BoD and its Committees

46.1.1 The BoD shall hold at least six ordinary meetings per year. The frequency of the meetings of the committees of the BoD shall be defined in the charter of the respective committee.

46.1.2 Extraordinary meetings of the BoD and its committees shall be held upon request by the chair of the respective body or any other member.

46.1.3 The meetings shall be called by the respective chair; sufficient notice of meetings shall be given prior to the meeting date and shall contain the items on the agenda.

46.1.4 The BoD and each committee shall designate a secretary who need not be a member of such body.

46.1.5 Preparatory documents for the meeting shall be made available in a timely manner. In principle, business matters asking for a formal decision may not be decided upon without advance documentation.

46.1.6 The respective chair shall decide as to the attendance of ExB members and senior management members at meetings.

46.1.7 Subject to statutory provisions to the contrary, the majority of the members of the respective body must be present for the purpose of passing resolutions. Participation via telephone or video-conference is permitted and deemed as attendance, whereby personal presence is preferred.

- 46.1.8 A majority of the members of the BoD must be present in order to pass resolutions. The majority of the votes of the members present shall be necessary to pass a resolution. In the event of deadlock, the chair of the meeting shall cast the deciding vote.
- 46.1.9 Resolutions of the BoD or a committee may also be passed by way of written consent provided the text of the resolution is sent to all members of the respective body and provided that a majority of the members cast a vote. The procedure for circular resolutions should be restricted to the following cases: administrative and routine matters, matters of increased urgency, and matters with respect to which the core content has already been discussed by the BoD. Any member shall have the right to request, within the period stipulated for the vote, that the matter be discussed in a meeting.
- 46.1.10 The minutes of the BoD and its committees shall document all decisions made and reflect in a general matter the considerations made which led to the decisions taken.
- 46.1.11 The minutes of the BoD and its committees shall be signed by the chair and the secretary of the respective body. They shall be made available for review prior to the next meeting and approved thereat.
- 46.2 Meetings of ExB and other bodies reflected in the OGR
- 46.2.1 The CEO and the respective chair determine the frequency of meetings of the ExB and other bodies reflected in this OGR.
- 46.2.2 The ExB and other bodies reflected in the OGR may, unless otherwise instructed by the CEO or the respective chair or without being explicitly requested by an ExB member, record the resolutions only.
- 46.2.3 Otherwise the rules set out above for the meetings of the BoD and its committees shall in analogy be applicable to the meetings of the ExB and other bodies reflected in the OGR.
- 46.2.4 A majority of the members of the ExB and its committees must be present in order to pass resolutions. The majority of the votes of the members present shall be necessary to pass a resolution.

#### **47. Financial year**

The financial year is identical with the calendar year (1st of January until 31st of December).

## **Annex A – Approval authorities**

### **I. Authority for credit transactions and credit limits**

#### **1. General provisions**

- 1.1 The management of credit risk is a joint responsibility between the Divisions and CRM. The ultimate credit risk decision generally lies with the Division, with CRM intervention being necessary in cases of material impacts on global portfolio limits. After credit assessment and endorsement by the respective front management, all credit exposures require approval under the authorities designated by the CRO, the Chief Credit Officer and Divisional CROs (subject to the provisions set out below). CRM can delegate authorities for the approval of credit transactions with fully standardized approval procedures to defined individuals from the front organization.
- 1.2 The CRO establishes and approves the Global Credit Risk Policy. The Chief Credit Officer –in consultation with the CRO – details the Global Credit Policy further by establishing divisional sub-policies.
- 1.3 All loans and other credit limits must be approved and documented and periodically reviewed in an independent credit review process in accordance with the policies set forth by the Chief Credit Officer.
- 1.4 The total credit limit for a client, or in the case of client groups, the aggregate of all total credit limits or transactions is relevant for the determination of the approval authority. This does not apply to credit transactions for which the CRM sets up fully standardized procedures for approval by representatives of the relevant front organization.

#### **2. Approval authorities**

- 2.1 The Chief Credit Officer has approval authority up to USD 3bn. Credit limits and underwritings exceeding this threshold are to be approved by the CRO.
- 2.2 The Divisional CROs have approval authority up to USD 2bn for investment grade and USD 1.5bn for non-investment grade.
- 2.3 Upon consultation with the CRO, the Chief Credit Officer shall establish a policy outlining the approval limits to be delegated to credit specialists, special managing bodies within CRM or defined representatives of the front organization. The maximum limit to be delegated may not exceed USD 2bn in aggregate. The policy shall also regulate the approval authorities establishing provision on credit positions, other actions in connection with credit recovery situation, temporary limit excesses and account overdrafts.
- 2.4 Upon consultation with the Chief Credit Officer, the Divisional CROs shall establish a policy outlining the approval limits to be delegated to credit specialists in their respective Divisions.
- 2.5 Any transaction which results in a counterparty exposure exceeding 25% of the available CET1 capital is subject to review by the CFO.

- 2.6 The anticipated hold level for underwritings is generally to be achieved within 90 days but may vary depending on the nature of the transaction. During a prescribed period, underwriting positions may be exempt from certain limits if approved by the ExB RMC or its delegates.
- 2.7 The RC may temporarily approve higher approval authorities.
- 2.8 Subject to the endorsement by the CRO, the Divisional CROs shall establish, in accordance with OGR section 2.2, the authority for approving urgent credit transactions for their respective Divisions.

## **II. Authority for country risk appetites**

### **3. Approval authorities**

- 3.1 For the countries determined by the BoD according to section 5.1.9 of this OGR country risk appetites shall be approved at least on an annual basis. Approval authority for the country risk appetites is governed as follows:
  - 3.1.1 Upon recommendation of the RC, the BoD approves the list of countries where authorities are delegated.
  - 3.1.2 Approval of country risk appetites by the BoD is to be given upon the recommendation of the RC.
  - 3.1.3 An overall Group Reserve may be established and is governed by the ExB RMC, which may further sub-delegate the authority.
  - 3.1.4 Allocation of country risk appetites to the Divisions is determined by the ExB RMC, which may further sub-delegate the authority.
- 3.2 The country ratings are approved by the Group Chief Credit Officer.

## **III. Trading activities**

### **4. Trading activities**

- 4.1 The ExB RMC may establish trading risk and position limits for the Divisions and the major subsidiaries within the Group and may delegate the monitoring of such limits as appropriate.
- 4.2 The ExB RMC shall ensure that appropriate approval processes for transactions executed under these trading risk limits are established.
- 4.3 The CRO may approve temporary excesses of any trading risk and position limit up to a maximum of 10% until the next ExB RMC meeting, with immediate notice to the CEO, and with information to the ExB RMC and the BoD at its next meeting.
- 4.4 The CRO signs off on the incremental risk associated with excesses of ExB RMC limits and approves the remediation plan with immediate notice to the CEO and subsequent information to the ExB RMC and the BoD at the next opportunity.

## **IV. Illiquid investments**

### **5. General provisions**

- 5.1 The illiquid investment limit covers transactions which due to their characteristics and risk profile are not subject to ExB RMC approved processes for trading activities outlined in section III of annex A and are not subject to the approval authorities outlined in section V of annex A.
- 5.2 The illiquid investment limit covers in particular seed money investments, private equity investments, including investments in portfolio companies and funds, and other illiquid investments, as well as investments pursued for bank strategic reasons, which are subject to section V below.

### **6. Approval authorities**

- 6.1 The illiquid investment limit is approved by the BoD upon recommendation by the RC.
- 6.2 The ExB RMC shall allocate the illiquid investment limit to the Divisions in relation to their requirements. It may introduce restrictions to using the limit e.g. in terms of industry or type of business. The ExB RMC receives regular updates on the exposure under the illiquid investment limit.
- 6.3 The Divisions shall establish a governance model regarding investments under the illiquid investment limit as delegated to them by the ExB RMC. In particular, the Divisions shall establish rules as to approval authorities as well as information and escalation processes.

## **V. Formations, liquidations, mergers, acquisitions, divestitures, long-term participations and other actions and transactions, legal cases**

### **7. General provisions**

- 7.1 The approval authorities as outlined herein are required for the actions and transactions described in sections 8 to 11b. They do not apply to transactions accounted for under the illiquid investment limit or investments made for trading purposes.
- 7.2 Notwithstanding anything to the contrary in section V or elsewhere in this OGR, the CFO or his delegate may approve any of the actions or transactions in sections 8 to 11b of annex A when they are taken or entered into in the context of or incidental to other actions and transactions that were previously approved in accordance with the OGR, with periodic information to the CEO.
- 7.3 When any approval or denial is given by the CFO's delegate, he must give regular information to the CFO.
- 7.4 A "Non-operating Subsidiary" is any subsidiary that is both (a) not regulated and (b) and has no material contact with third parties. A subsidiary that is not a Non-operating Subsidiary is an "Operating Subsidiary". "Regulated" means regulated or licensed in any jurisdiction as a bank, securities firm or other financial services provider.

## **8. Formation and liquidation of subsidiaries**

- 8.1 When directly or indirectly wholly owned by the Group and provided the formation or liquidation of the subsidiary will not result in a significant change to the organizational structure, the action shall be approved by the CFO or his delegate.
- 8.2 The formation or liquidation of a Non-Operating Subsidiary shall be approved by the CFO or his delegate.
- 8.3 Otherwise the formation or liquidation shall be approved in accordance with the approval authorities in section 12 of annex A, where the relevant total amount of the transaction is,
  - a) in the case of a formation, the total amount of capital to be initially provided (or anticipated to be provided in the short term) to such subsidiary by CSG, CS or one of its subsidiaries, and
  - b) in the case of a liquidation, the estimated value of the direct or indirect interest in the subsidiary at the time the determination to liquidate is made.

## **9. Merger, consolidation or similar transaction; acquisition or divestiture of a subsidiary, interest in a subsidiary or assets constituting a business**

- 9.1 When solely among any of the direct or indirect wholly owned subsidiaries, except when such transaction results in a significant change to the organizational structure, the action or transaction shall be approved by the CFO or his delegate.
- 9.2 When, in connection with the day-to-day management of a line of business, a Non-operating Subsidiary is to be merged, consolidated, or be party to a similar transaction with a third party, the action or transaction shall be approved by the CFO or his delegate.
- 9.3 When, in connection with the day-to-day management of a line of business, a Non-operating Subsidiary, an interest in a Non-operating Subsidiary or assets constituting a business that is not regulated in the meaning of section 7.4 of annex A is to be acquired from or divested to a third party, the action or transaction shall be approved by the CFO or his delegate.
- 9.4 Otherwise the action or transaction shall be approved in accordance with the approval authorities in section 12 of annex A, where the relevant total amount of the transaction is,
  - a) in the case of a merger, consolidation or similar transaction, the difference between the estimated value of the resulting merged, consolidated, similarly combined entity or interest in such entity and the estimated value of the Group's direct or indirect interest in any subsidiary that was a party to such merger, consolidation or similar transaction prior to such transaction, and
  - b) in the case of an acquisition or divestiture, the estimated value of/price paid for the subsidiary, interest in a subsidiary or assets constituting a business.

## **10. Acquisition or divestiture of a long-term participation**

- 10.1 A long-term participation is generally an equity investment or equity-like investment (e.g. convertible debt instrument, call options, warrants) (collectively, an "Equity-Like Long-term Participation") made by CSG or any of its subsidiaries for strategic reasons in a third party entity. Thereby it is not relevant whether or not the long-term participation is consolidated within the Group.

10.2 An acquisition or a divestiture of a long-term participation must be approved as follows:

- a) When the estimated value of/price paid for the long-term participation being acquired or divested is less than CHF 2m, such transaction shall be approved by the responsible member of a Divisional MC, with information to the Divisional CEOs, the CEO and the CFO.
- b) When a) above is inapplicable, a long-term participation is being acquired or divested in connection with the day-to-day management of a business line and such participation is in an entity that (i) is not regulated in the meaning of section 7.4 of annex A and (ii) has no material contact with third parties, the transaction shall be approved by the CFO or his delegate.
- c) Otherwise the transaction shall be approved in accordance with the approval authorities in section 12 of annex A, where the relevant total amount of the transaction is the estimated value of/price paid for the long-term participation.
- d) In case of an acquisition of an Equity-Like Long-term Participation, such transaction shall be approved according to a), b) or c) above both: (i) at the time of the acquisition of the Equity-Like Long-term Participation; and (ii) at the time it is intended to exercise the Equity-Like Long-term Participation into an equity participation within the meaning of Section 10.1.

#### **11. Establishment or closure of branches and representative offices**

- 11.1 The establishment or closure of a branch or a representative office of CSG, CS, and other direct subsidiaries of CSG shall be approved by the CEO upon consultation with the ExB and the responsible Regional CEO.
- 11.2 If not explicitly regulated otherwise or governed elsewhere, the establishment or closure of a branch or representative office of an Operating Subsidiary of CS shall be approved by the CFO or his delegate, upon consultation with the responsible Regional CEO and in consideration of the relevant subsidiary specific regulations.
- 11.3 The establishment or closure of a branch or representative office of a Non-operating Subsidiary of CSG or CS shall be approved by the CFO or his delegate.

#### **11b. Legal cases**

Settlements in respect of significant legal proceedings are reviewed by the GC and decided by the ExB where the sum involved is CHF 250m or more. The BoD is informed in accordance with sections 16.2.6 and 6.3. The conclusion of a settlement that has a significant impact on the strategy or reputation of the Group is subject to the approval of the BoD if the sum involved is CHF 500m or more.

## 12. Approval authorities

Unless provided otherwise by section V of annex A, approval authority is governed as follows:

<u>Transaction value</u>	<u>CFO or delegate</u>	<u>CEO</u>	<u>ExB</u>	<u>Chairman</u>	<u>BoD</u>
≤/ < CHF 50m	D	I	—	—	—
> CHF 50m ≤/ < CHF 100m		D	I	—	—
> CHF 100m ≤/ < CHF 250m			D	C	I
> CHF 250m					D

D = Decision; C = Consultation; I = Information

## VI. Reputational risks

### 13. Reputational risk management

13.1 Reputational risk management shall be regulated in a policy (GP-00103).

## VII. Financing matters and capital expenditures

### 14. Financing of CSG, CS and its subsidiaries

- 14.1 The use of money market instruments and capital market transactions, the issuance and sale of bonds, structured notes and similar securities is governed by the Group Policy on Funding Authority.
- 14.2 The conclusion or extension of a loan agreement or a guarantee agreement in connection with a loan agreement of a subsidiary and draw-downs under such agreements are governed by the Group Policy on Funding Authority and the Policy on Inter-Company Guarantees.
- 14.3 Issuance of comfort letters, regulatory keep-well letters and similar documents on behalf of CSG or CS require approval by the CFO. Issuance of comfort letters, regulatory keep-well letters and similar documents on behalf of subsidiaries require approval by the CFO or his delegate.

### 15. Capital expenditures

- 15.1 The annual financial planning process for the Group shall include the planning of capital expenditure projects (in particular investments in IT and in Group owned real estate) as well as the total financial framework for capital expenditures.
- 15.2 The ExB shall approve the capital expenditure plan for the Group. The ExB shall further establish a policy outlining the authority for the approval of individual investments under the approved plan as well as the authority for approval of expenditures outside the approved plan.
- 15.3 For each project or investment, a written capital expenditure application prepared in accordance with the applicable policies must be submitted for review to the approving member of management or management body.
- 15.4 The authority for the purchase of real estate at auctions in connection with repossession proceedings against banking clients or the acquisition of such real estate (under such circumstances) shall be determined by the ExB RMC.

## **Annex B – Approval authorities for Credit Suisse Group AG specific matters**

### **I. Capital structure of CSG**

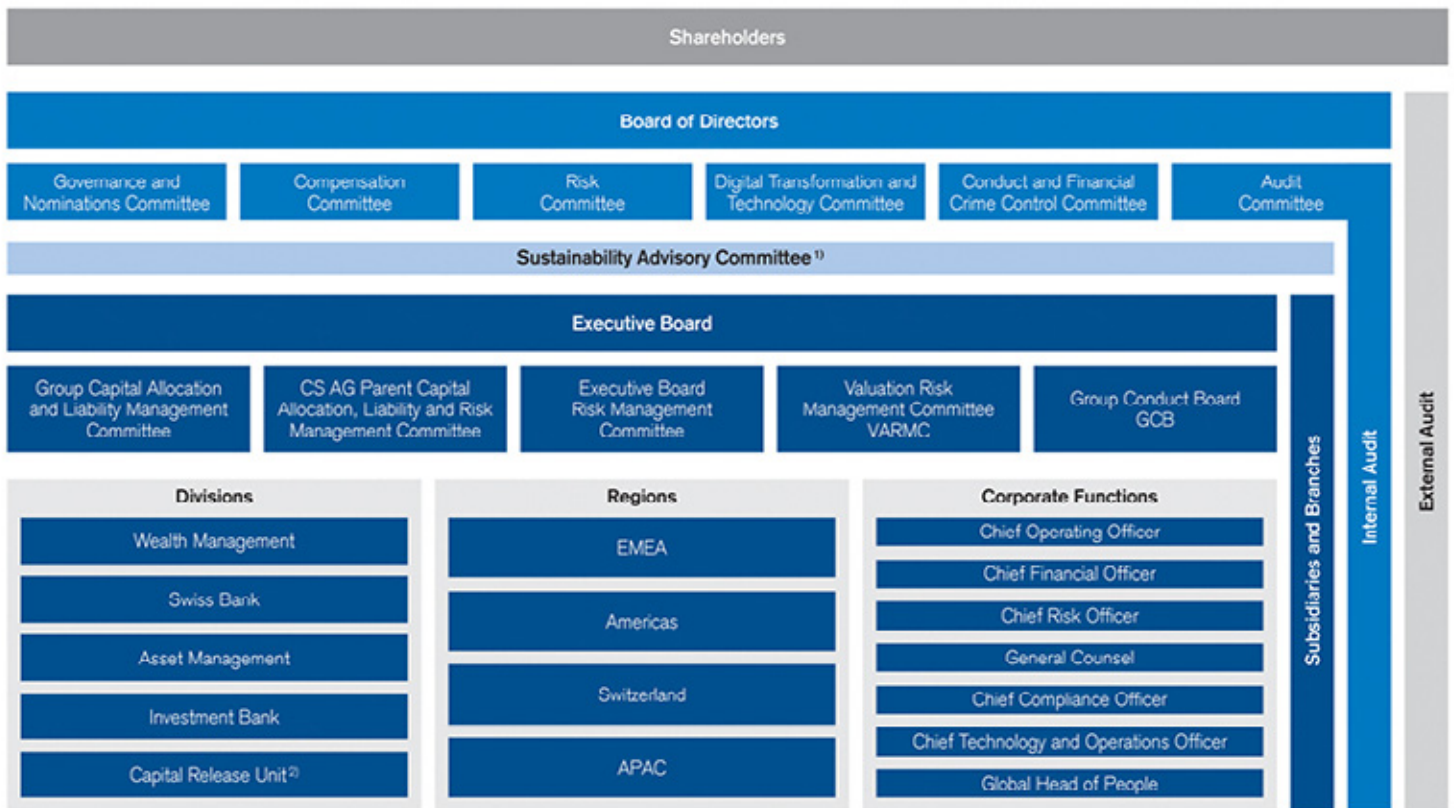

#### **1. Ordinary, authorized, conditional and conversion capital**

- 1.1 The creation and any changes to the ordinary, authorized, conditional and conversion capital require approval by the shareholders upon proposal by the BoD.
- 1.2 The issuance of new shares out of ordinary or authorized capital as well as out of conversion capital may be executed by the BoD. In line with CSG's AoA there is no quorum requirement for the acknowledgment of capital increases and the subsequent changes to the AoA.
- 1.3 The allocation of conditional capital for convertible bonds, contingent convertible bonds, bonds with options, shareholder options or similar instruments as well as for employee compensation plans is the responsibility of the BoD.
- 1.4 The allocation of conversion capital for contingent convertible bonds or similar instruments is the responsibility of the BoD.

### **II. Share register**

- 2.1 The BoD appoints one or several Share Registrars.
- 2.2 The BoD issues or amends regulations governing the shareholders' register.
- 2.3 The BoD shall receive at least annually a report on the shareholder structure according to the share register.

## Annex C – Corporate bodies

1) Interdisciplinary advisory body formed by the Board of Directors, which consists of members of the Board of Directors and senior management.

2) The Capital Release Unit (CRU) is managed by the Chief Financial Officer and shown as a separate reporting segment for reporting purposes.

**CREDIT SUISSE GROUP AG**

Paradeplatz 8

CH-8070 Zurich

Switzerland

## Exhibit 2.2

### DESCRIPTION OF SECURITIES REGISTERED UNDER SECTION 12 OF THE EXCHANGE ACT

As of December 31, 2022, Credit Suisse Group AG (“**Credit Suisse Group**” and the “**Company**”) had shares and American Depositary Shares registered pursuant to Section 12 of the Securities Exchange Act of 1934 and Credit Suisse Group’s subsidiary, Credit Suisse AG (the “**Issuer**,” “**we**,” “**us**,” and “**our**”), had certain Exchange-Traded Notes registered pursuant to Section 12 of the Securities Exchange Act of 1934.

#### REGISTERED SHARES

##### General

The following description of Credit Suisse Group’s registered shares is a summary and does not purport to be complete. The summary describes the material terms of the registered shares of Credit Suisse Group, par value CHF 0.04 per share, which Credit Suisse Group refers to as the Company’s “**shares**.” The summary is subject to and qualified in its entirety by reference to the Company’s Articles of Association, which are incorporated by reference as an exhibit to the Company’s Annual Report on Form 20-F of which this Exhibit 2.2 is a part.

As of December 31, 2022, Credit Suisse Group had fully paid and issued share capital of CHF 160,086,322.48, comprised of 4,002,158,062 registered shares with a par value of CHF 0.04 each.

As of December 31, 2022, Credit Suisse Group had additional authorized share capital in the amount of CHF 5,000,000, authorizing the Board of Directors of Credit Suisse Group (the “**Board of Directors**”) to issue at any time until April 29, 2024 up to 125,000,000 registered shares, to be fully paid in, with a par value of CHF 0.04 each.

Additionally, as of December 31, 2022, Credit Suisse Group had total conditional share capital in the amount of CHF 12,000,000, for the issuance of a maximum of 300,000,000 registered shares with a par value of CHF 0.04 each, reserved for the purpose of increasing share capital through the conversion of bonds or other financial market instruments of Credit Suisse Group or any subsidiary thereof that allow for contingent compulsory conversion into Credit Suisse Group’s shares and that are issued in order to fulfill or maintain compliance with regulatory requirements of Credit Suisse Group and/or any subsidiary thereof (“**contingent convertible bonds**”).

Additionally, as of December 31, 2022, Credit Suisse Group had conversion capital in the amount of CHF 6,000,000 for the issuance of a maximum of 150,000,000 registered shares, to be fully paid in, with a par value of CHF 0.04 each, through the compulsory conversion upon occurrence of the trigger event of claims arising out of contingent convertible bonds of Credit Suisse Group and/or any subsidiary thereof, or other financial market instruments of Credit Suisse Group and/or any subsidiary thereof, that provide for a contingent or unconditional compulsory conversion into shares of Credit Suisse Group.

As of December 31, 2022, Credit Suisse Group, together with its subsidiaries, held 60,907,981 of its own shares, representing 1.52% of its issued shares. The Company’s shares are listed on the SIX Swiss Exchange under the symbol “CSGN” and, in the form of American Depositary Shares, on the New York Stock Exchange under the symbol “CS.”

## Shareholder Rights

### 1. Dividend Rights

Under Swiss law, dividends may be paid out only if and to the extent a corporation has distributable profits from previous financial years or has freely distributable reserves, in each case, as presented on the annual statutory standalone balance sheet of the corporation. Further, dividends may only be fixed after the assignments have been made to the statutory retained earnings. In addition, at least 5% of the annual net profits of a corporation must be retained and booked as statutory retained earnings for so long as these retained earnings, together with the statutory capital reserve, amount to less than 20% of its paid-in share capital. The Company's reserves currently exceed this 20% threshold. In addition, an interim dividend may be paid out based on an interim account. The provisions above governing dividends also apply for such interim dividends. The external auditor must review the interim account before the shareholders approve the interim dividend."

The Board of Directors may propose that a dividend be paid out, but cannot itself set the dividend. The auditors must confirm that the dividend proposal of the Board of Directors conforms to statutory law and the Company's Articles of Association. Dividends may be paid out only after approval of the shareholders. In practice, the shareholders usually approve the dividend proposal of the Board of Directors. Dividends are usually due and payable after the shareholders' resolution approving the payment has been passed, but the shareholders can set a specific due date in the resolution itself. Under Swiss law, the statute of limitations in respect of dividend payments is five years.

### 2. Voting and Transfer

In principle, each share carries one vote at the Company's shareholders' meetings. The shares for which a single shareholder can directly or indirectly exercise voting rights for his or her own shares or as a proxy may not exceed 2% of the total outstanding share capital, except that such restrictions do not apply to (i) the exercise of voting rights by the independent proxy as elected by the shareholders' meeting, (ii) shares in respect of which the holder confirms to the Company in the application for registration in the Company's share register that he or she has acquired the shares in his or her name for his or her own account and further, the Board of Directors will propose to the Annual General Meeting 2023 ("AGM 2023") of the Company that the article in the Company's Articles of Association regarding this shall be amended to the effect that a further declaration is necessary that the shareholder confirms that there is no agreement on the redemption of the relevant shares and that they bear the economic risk associated with the shares and in respect of which the disclosure obligations pursuant to the Swiss Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading dated June 19, 2015, as amended and the relevant ordinances and regulations have been fulfilled or (iii) shares registered in the name of a nominee, provided the nominee furnishes the Company with the name, address and shareholdings of any beneficial owner or group of related beneficial owners on behalf of whom the nominee holds 0.5% or more of the Company's total outstanding share capital. The Board of Directors has the right to conclude agreements with nominees concerning both their disclosure requirement and the exercise of voting rights. Voting rights may be exercised only after a shareholder has been recorded in the share register as a shareholder with voting rights. In order to be registered in the share register, the purchaser must file a share registration form with the depository bank. The registration of shares in the Company's share register may be requested at any time. Failing such registration, the purchaser may not vote or participate in shareholders' meetings. Registration with voting rights is subject to certain restrictions as described below.

Legal entities, partnerships or groups of joint owners or other groups in which individuals or legal entities are related to one another through capital ownership or voting rights or have a common management or are otherwise interrelated, as well as individuals, legal entities or partnerships that act in concert (especially as a syndicate) with intent to evade the limitation on voting rights are considered as one shareholder or nominee.

Each shareholder, whether registered in the Company's share register or not, is entitled to receive the dividends approved by the shareholders. The same principle applies for capital repayments in the event of a reduction of the share capital, and for liquidation proceeds in the event the Company is dissolved or liquidated. Under Swiss law, a shareholder has no liability for capital calls, but is also not entitled to reclaim its capital contribution. Swiss law further requires the Company to apply the principle of equal treatment to all shareholders.

The Company may issue shares in the form of single certificates, global certificates, uncertificated securities and as intermediated securities in the sense of the Federal Act on Intermediated Securities as proposed to the AGM 2023. Intermediated securities in the sense of the Swiss Federal Act on Intermediated Securities dated October 3, 2008, as amended (the "FISA") are fungible claims or membership rights against an issuer that are credited to one or more securities accounts of a custodian within the meaning of the FISA, which must be a regulated entity such as a bank or a securities dealer. The transfer of intermediated securities representing the Company's shares, and the pledging of these intermediated securities as collateral, is governed by, and must be done in accordance with, the FISA. Transfer or pledging these intermediated securities as collateral by means of written assignment is not permitted.

The Company may convert issued shares from one form into another form at any time, without the approval of the shareholders. Shareholders have no right to demand that the Company's shares be converted from one form into another form. Shareholders may, however, at any time request that the Company issue a certification attesting to the shares that they hold according to the Company's share register.

### **3. Pre-Emptive Subscription Rights and Preferential Subscription Rights**

Under Swiss law, any share issue, whether for cash or non-cash consideration, is subject to the prior approval of the shareholders. Shareholders have certain pre-emptive subscription rights (*Bezugsrechte*) to subscribe for new issues of shares as well as preferential subscription rights (*Vorwegzeichnungsrechte*) to subscribe for option bonds, convertible bonds or similar debt instruments with option or convertible rights in proportion to the nominal amount of shares held. A resolution adopted by a majority of at least two-thirds of the votes and the absolute majority of the share capital, in each case, represented at the shareholders' meeting, may limit or exclude pre-emptive subscription rights in certain limited circumstances.

Notwithstanding the above, the Company's Articles of Association provide that, in the case of contingent convertible bonds that provide for the issuance of new shares out of the Company's conditional share capital, in order for the Board of Directors to exclude shareholders' preferential subscription rights, the contingent convertible bonds must be issued on the national or international capital markets (including private placements with selected strategic investors). In such case, (i) the contingent convertible bonds must be issued at prevailing market conditions, (ii) the setting of the issue price of the new shares must take due account of the stock market price of the shares and/or comparable instruments priced by the market at the time of issue or time of conversion, and (iii) conditional conversion features may remain in place indefinitely.

The Board of Directors will propose to the AGM 2023 that the conditional and authorized capital of the Company will be cancelled and replaced with the so called "capital range" (*Kapitalband*). The new corporate law provides for the instrument of the capital range, which functionally corresponds, among other things, to the authorized capital under the former Swiss corporate law. Under the capital range, the general meeting of shareholders may authorize the board of directors to increase or reduce the share capital within a certain range—legally permissible is 150% (upper limit) to 50% (lower limit)—of the share capital entered in the commercial register at the time the capital range was introduced. The maximum authorization is limited by law to five years. The general meeting of shareholders has the right to withdraw shareholders' subscription rights directly or may delegate this right to the board of directors, provided that it expressly states the reasons for the withdrawal of subscription rights in the articles of association.

Shareholders' preferential subscription rights with regards to financial market instruments with conversion features will be granted. If a quick placement of contingent convertible bonds in large tranches is required, the Board of Directors is authorized to exclude shareholders' preferential subscription rights. In such circumstances, these contingent convertible bonds must be issued at prevailing market conditions.

The Board of Directors determines the issue price of the new shares taking due account of the stock market price of the shares and/or comparable instruments.

### **4. Liquidation**

Under Swiss law and the Company's Articles of Association, the Company may be dissolved at any time, by way of liquidation or in the case of a merger in accordance with the Swiss Federal Act on Merger, Demerger, Transformation and Transfer of Assets dated October 3, 2003, as amended, based on a shareholders' resolution, which must be passed by (i) in the case of dissolution by way of liquidation, a supermajority of at least three-quarters of the votes cast at the shareholders' meeting, and (ii) in all other cases, a supermajority of at least two-thirds of the votes, and an absolute majority of the par value of the shares, represented at the shareholders' meeting. As the Company is the Swiss ultimate parent company of a financial group, the Swiss Financial Market Supervisory Authority FINMA ("**FINMA**") is the only competent authority to open restructuring or liquidation (bankruptcy) proceedings with respect to the Company. Under Swiss law, any surplus arising out of liquidation (after the settlement of all claims of all creditors) is distributed to shareholders in proportion to the paid-up par value of shares held.

### **Limitations on Share Ownership**

There are no limitations under Swiss law or the Company's Articles of Association on the rights of shareholders to own shares, subject to certain notification and other review requirements in the case of the direct or indirect acquisition of 10% or more of the Company's banks' capital or voting rights. The rights of any shareholder to vote may, however, be restricted in certain circumstances as described above.

## AMERICAN DEPOSITARY SHARES

### General

The following description of the Company's American Depositary Shares is a summary and does not purport to be complete. The ordinary shares of the Company may be issued in the form of American Depositary Shares, each representing deposited ordinary shares (the "**Ordinary Shares**") of the Company. Each American Depositary Share represents one Ordinary Share deposited or subject to deposit under the Deposit Agreement (as hereafter defined) with a custodian for the Depositary (as hereafter defined) (the "**Custodian**").

The following is a summary of the material terms of the Amended and Restated Deposit Agreement dated as of November 22, 2016 among the Company, The Bank of New York Mellon (the "**Depositary**") and all other Owners and Holders from time to time of American Depositary Shares issued thereunder (the "**Deposit Agreement**"). The summaries and descriptions below do not purport to be complete statements of the relevant provisions of the Deposit Agreement, and are entirely qualified by that document. Please refer to Exhibit 1 on Form F-6 (File No. 333-267962 filed with the SEC on October 20, 2022). Copies of the Deposit Agreement are also available for inspection at the office of the Depositary at 240 Greenwich Street, New York, NY 10286, and at the office of the Custodian.

Terms used but not defined herein have the meaning given to them in the Deposit Agreement.

### Voting Rights

Upon receipt from the Company of notice of any meeting of holders of Ordinary Shares at which holders of Ordinary Shares will be entitled to vote, or a solicitation of proxies or consents of holders of Ordinary Shares, if requested in writing by the Company, the Depositary shall, as soon as practicable thereafter, Disseminate to the Owners a notice, the form of which shall be approved by the Company in advance (such approval not to be unreasonably withheld), that shall contain (i) the information (including, without limitation, solicitation materials) contained in the notice of meeting received by the Depositary, (ii) a statement that the Owners as of the close of business on a specified record date will be entitled, subject to any applicable provision of Swiss law and of the Articles of Association or similar documents of the Company, to instruct the Depositary as to the exercise of the voting rights pertaining to the amount of Ordinary Shares represented by their respective American Depositary Shares, (iii) a statement as to the manner in which those instructions may be given and (iv) the last date on which the Depositary will accept instructions (the "**Instruction Cutoff Date**").

Upon the written request of an Owner of American Depositary Shares, as of the date of the request or, if a record date was specified by the Depositary, as of that record date, received on or before any Instruction Cutoff Date established by the Depositary, the Depositary may, and if the Depositary sent a notice under the preceding paragraph shall, endeavor, in so far as practicable, to vote or cause to be voted the amount of deposited Ordinary Shares represented by those American Depositary Shares in accordance with the instructions set forth in that request. The Depositary shall not vote or attempt to exercise the right to vote that attaches to the Deposited Securities, for purposes of establishing a quorum or otherwise, other than in accordance with instructions given by Owners and received by the Depositary, or exercise any discretion as to voting Deposited Securities.

There can be no assurance that Owners generally or any Owner in particular will receive the notice described above in time to enable Owners to give instructions to the Depositary prior to the Instruction Cutoff Date.

In order to give Owners a reasonable opportunity to instruct the Depositary as to the exercise of voting rights relating to Ordinary Shares, if the Company will request the Depositary to Disseminate a notice as described above, the Company shall give the Depositary notice of the meeting, details concerning the matters to be voted upon and copies of materials to be made available to holders of Ordinary Shares in connection with the meeting not less than 30 days prior to the meeting date.

The Company has informed the Depositary that its Articles of Association and Swiss law require disclosures as a condition of voting by persons holding shares of the Company's capital stock in excess of a specified threshold amount. If the Company instructs the Depositary to send a notice of a meeting of holders of Ordinary Shares as described above, it shall, at the same time, notify the Depositary of the amount of Ordinary Shares that, at the time, constitutes two percent of the Company's outstanding share capital. If the amount of Ordinary Shares held under the Deposit Agreement as of the record date set by the Depositary with respect to that meeting exceeds the amount specified in the Company's notice, the Depositary shall include in its notice to Owners a statement that an Owner may not give voting instructions on its own behalf if it beneficially owns an amount of Ordinary Shares (including Ordinary Shares represented by American Depositary Shares), and a Holder may not give voting instructions as proxy or substitute proxy of an Owner if it beneficially owns an amount of Ordinary Shares (including Ordinary Shares represented by American Depositary Shares),

that constitutes 0.5% or more of the Company's share capital (being one quarter of the amount of Ordinary Shares specified in the Company's notice to the Depositary) unless that Owner, or that Holder, as the case may be, discloses to the Depositary the name, address and total beneficial ownership of Company share capital of that Owner or Holder, as the case may be. For the avoidance of doubt, under no circumstances shall the Depositary be entitled to exercise any discretion as to voting or vote on behalf of any Owner or Holder except in accordance with instructions received from that Owner or Holder. The Depositary shall forward to the Company each disclosure it receives under this paragraph, but will have no duty to verify the accuracy of any disclosure of that kind or any duty or liability if an Owner or Holder fails to disclose as required by this paragraph.

### **Distributions**

Whenever the Depositary receives any cash dividend or other cash distribution on Deposited Securities, the Depositary shall, subject to the provisions of Section 4.5 of the Deposit Agreement, as promptly as practicable, convert that dividend or other distribution into Dollars and distribute the amount thus received (net of the fees and expenses of the Depositary as provided in Section 5.9 of the Deposit Agreement) to the Owners entitled thereto, in proportion to the number of American Depositary Shares representing those Deposited Securities held by them respectively; provided, however, that if the Custodian or the Depositary shall be required by applicable law to withhold and does withhold from that cash dividend or other cash distribution an amount on account of taxes or other governmental charges, the amount distributed to the Owners of the American Depositary Shares representing those Deposited Securities shall be reduced accordingly. However, the Depositary will not pay any Owner a fraction of one cent, but will round each Owner's entitlement to the nearest whole cent.

The Company or its agent will remit to the appropriate governmental agency in each applicable jurisdiction all amounts withheld and owing to such agency. The Depositary will, as promptly as practicable, forward to the Company or its agent such information from its records as the Company may reasonably request to enable the Company or its agent to file necessary reports with governmental agencies. Each Owner and Holder agrees to indemnify the Company, the Depositary, the Custodian and their respective directors, employees, agents and affiliates for, and hold each of them harmless against, any claim by any governmental authority with respect to taxes, additions to tax, penalties or interest arising out of any refund of taxes, reduced withholding at source or other tax benefit received by it.

If a cash distribution would represent a return of all or substantially all the value of the Deposited Securities underlying American Depositary Shares, the Depositary may require surrender of those American Depositary Shares and may require payment of or deduct the fee for surrender of American Depositary Shares (whether or not it is also requiring surrender of American Depositary Shares) as a condition of making that cash distribution. A distribution of that kind shall be a Termination Option Event.

Subject to the provisions of Sections 4.11 and 5.9 of the Deposit Agreement, whenever the Depositary receives any distribution other than a distribution described in Section 4.1, 4.3 or 4.4 of the Deposit Agreement on Deposited Securities (but not in exchange for or in conversion or in lieu of Deposited Securities), the Depositary shall, as promptly as practicable, cause the securities or property received by it to be distributed to the Owners entitled thereto, after deduction or upon payment of any fees and expenses of the Depositary and any taxes or other governmental charges, in proportion to the number of American Depositary Shares representing such Deposited Securities held by them respectively, in any manner that the Depositary reasonably deems equitable and practicable for accomplishing that distribution (which may be a distribution of depository shares representing the securities received); provided, however, that if in the reasonable opinion of the Depositary such distribution cannot be made proportionately among the Owners entitled thereto, or if for any other reason (including, but not limited to, any requirement that the Company or the Depositary withhold an amount on account of taxes or other governmental charges or that securities received must be registered under the Securities Act of 1933 in order to be distributed to Owners or Holders) the Depositary reasonably deems such distribution not to be lawful and feasible, the Depositary may, after consultation with the Company to the extent practicable, adopt such other method as it may deem equitable and practicable for the purpose of effecting such distribution, including, but not limited to, the public or private sale of the securities or property thus received, or any part thereof, and distribution of the net proceeds of any such sale (net of the fees and expenses of the Depositary as provided in Section 5.9 of the Deposit Agreement) to the Owners entitled thereto, all in the manner and subject to the conditions set forth in Section 4.1 of the Deposit Agreement. The Depositary may withhold any distribution of securities under Section 4.2 of the Deposit Agreement if it has not received reasonably satisfactory assurances from the Company that the distribution does not require registration under the Securities Act of 1933. The Depositary may sell, by public or private sale, an amount of securities or other property it would otherwise distribute under Section 4.2 of the Deposit Agreement that is sufficient to pay its fees and expenses in respect of that distribution.

If a distribution under Section 4.2 of the Deposit Agreement would represent a return of all or substantially all the value of the Deposited Securities underlying American Depositary Shares, the Depositary may require surrender of those American Depositary Shares and may require payment of or deduct the fee for surrender of American Depositary Shares (whether or not it is also requiring

surrender of American Depositary Shares) as a condition of making that distribution. A distribution of that kind shall be a Termination Option Event.

Whenever the Depositary receives any distribution on Deposited Securities consisting of a dividend in, or free distribution of, Ordinary Shares, the Depositary may, and shall, if the Company so requests in writing, deliver, as promptly as practicable, to the Owners entitled thereto, in proportion to the number of American Depositary Shares representing those Deposited Securities held by them respectively, an aggregate number of American Depositary Shares representing the amount of Ordinary Shares received as that dividend or free distribution, subject to the terms and conditions of the Deposit Agreement with respect to the deposit of Shares and issuance of American Depositary Shares, including withholding of any tax or governmental charge as provided in Section 4.11 of the Deposit Agreement and payment of the fees and expenses of the Depositary as provided in Section 5.9 of the Deposit Agreement (and the Depositary may sell, by public or private sale, an amount of the Ordinary Shares received (or American Depositary Shares representing those Ordinary Shares) sufficient to pay its fees and expenses in respect of that distribution). In lieu of delivering fractional American Depositary Shares, the Depositary may sell the amount of Ordinary Shares represented by the aggregate of those fractions (or American Depositary Shares representing those Ordinary Shares) and distribute the net proceeds, all in the manner and subject to the conditions described in Section 4.1 of the Deposit Agreement. If and to the extent that additional American Depositary Shares are not delivered and Ordinary Shares or American Depositary Shares are not sold, each American Depositary Share shall thenceforth also represent the additional Ordinary Shares distributed on the Deposited Securities represented thereby.

If the Company declares a distribution in which holders of Deposited Securities have a right to elect whether to receive cash, Ordinary Shares or other securities or a combination of those things, or a right to elect to have a distribution sold on their behalf, the Depositary shall, after consultation with the Company, and to the extent permitted by applicable law, make that right of election available for exercise by Owners in any manner the Depositary considers to be lawful and practical. As a condition of making a distribution election right available to Owners, the Depositary may require satisfactory assurances from the Company that doing so does not require registration of any securities under the Securities Act of 1933. If a right of election is made available to Owners and an Owner elects to receive the proposed dividend (x) in cash, the dividend shall be distributed upon the terms described in Section 4.1 of the Deposit Agreement, or (y) in American Depositary Shares, the dividend shall be distributed upon the terms described in Section 4.3 of the Deposit Agreement. Nothing herein shall obligate the Depositary or the Company to make available to Owners a method to receive the elective dividend in Ordinary Shares (rather than American Depositary Shares). There can be no assurance that Owners generally, or any Owner in particular, will be given the opportunity to receive elective distributions on the same terms and conditions as the holders of Ordinary Shares.

#### **Reports and Other Communications**

On or before the first date on which the Company gives notice, by publication or otherwise, of any meeting of holders of Ordinary Shares, or of any adjourned meeting of those holders, or of the taking of any action in respect of any cash or other distributions or the granting of any rights, the Company agrees to transmit to the Depositary and the Custodian a copy of the notice thereof in English but otherwise in the form given or to be given to holders of Ordinary Shares.

The Company will arrange for the translation into English, if not already in English, to the extent required pursuant to any regulations of the Commission, and the prompt transmittal by the Company to the Depositary and the Custodian of all notices and any other reports and communications which are made generally available by the Company to holders of its Ordinary Shares. If requested in writing by the Company, the Depositary will, as promptly as practicable, Disseminate, at the Company's expense, those notices, reports and communications to all Owners or otherwise make them available to Owners in a manner that the Company specifies as substantially equivalent to the manner in which those communications are made available to holders of Ordinary Shares and compliant with the requirements of any securities exchange on which the American Depositary Shares are listed. The Company will timely provide the Depositary with the quantity of such notices, reports, and communications, as requested by the Depositary from time to time, in order for the Depositary to effect that Dissemination.

#### **Rights**

(a) If rights are granted to the Depositary in respect of deposited Ordinary Shares to purchase additional Ordinary Shares or other securities, the Company and the Depositary shall endeavor to consult as to the actions, if any, the Depositary should take in connection with that grant of rights. The Depositary may, to the extent deemed by it to be lawful and practical (i) if requested in writing by the Company, grant to all or certain Owners rights to instruct the Depositary to purchase the securities to which the rights relate and deliver those securities or American Depositary Shares representing those securities to Owners, (ii) if requested in writing by the Company, deliver the rights to or to the order of certain Owners or (iii) sell the rights to the extent practicable and distribute the net

proceeds of that sale to Owners entitled to those proceeds. To the extent rights are not exercised, delivered or disposed of under (i), (ii) or (iii) above, the Depositary shall permit the rights to lapse unexercised.

(b) If the Depositary will act under (a)(i) above, the Company and the Depositary will enter into a separate agreement setting forth the conditions and procedures applicable to the particular offering. Upon instruction from an applicable Owner in the form the Depositary specified and upon payment by that Owner to the Depositary of an amount equal to the purchase price of the securities to be received upon the exercise of the rights, the Depositary shall, on behalf of that Owner, exercise the rights and purchase the securities. The purchased securities shall be delivered to, or as instructed by, the Depositary. The Depositary shall (i) deposit the purchased Ordinary Shares under the Deposit Agreement and deliver American Depositary Shares representing those Ordinary Shares to that Owner or (ii) deliver or cause the purchased Ordinary Shares or other securities to be delivered to or to the order of that Owner. The Depositary will not act under (a)(i) above unless the offer and sale of the securities to which the rights relate are registered under the Securities Act of 1933 or the Depositary has received an opinion of United States counsel that is reasonably satisfactory to it to the effect that those securities may be sold and delivered to the applicable Owners without registration under the Securities Act of 1933.

(c) If the Depositary will act under (a)(ii) above, the Company and the Depositary will enter into a separate agreement setting forth the conditions and procedures applicable to the particular offering. Upon (i) the request of an applicable Owner to deliver the rights allocable to the American Depositary Shares of that Owner to an account specified by that Owner to which the rights can be delivered and (ii) receipt of such documents as the Company and the Depositary agreed to require to comply with applicable law, the Depositary will deliver those rights as requested by that Owner.

(d) If the Depositary will act under (a)(iii) above, the Depositary will use reasonable efforts to sell the rights in proportion to the number of American Depositary Shares held by the applicable Owners and pay the net proceeds to the Owners otherwise entitled to the rights that were sold, upon an averaged or other practical basis without regard to any distinctions among such Owners because of exchange restrictions or the date of delivery of any American Depositary Shares or otherwise.

(e) Payment or deduction of the fees of the Depositary as provided in Section 5.9 of the Deposit Agreement and payment or deduction of the expenses of the Depositary and any applicable taxes or other governmental charges shall be conditions of any delivery of securities or payment of cash proceeds under Section 4.4 of the Deposit Agreement.

(f) The Depositary shall not be responsible for any failure to determine that it may be lawful or feasible to make rights available to or exercise rights on behalf of Owners in general or any Owner in particular, or to sell rights.

#### **Replacement of Deposited Securities**

If the Depositary is notified of or there occurs any change in nominal value or any subdivision, combination or any other reclassification of the Deposited Securities or any recapitalization, reorganization, sale of assets substantially as an entirety, merger or consolidation affecting the issuer of the Deposited Securities or to which it is a party that is mandatory and binding on the Depositary as a holder of Deposited Securities and, as a result, securities or other property have been or will be delivered in exchange, conversion, replacement or in lieu of, Deposited Securities (a “**Replacement**”), the Depositary shall, if required, surrender the old Deposited Securities affected by that Replacement of Ordinary Shares and hold, as new Deposited Securities under the Deposit Agreement, the new securities or other property delivered to it in that Replacement. However, the Depositary may elect to sell those new Deposited Securities if in the opinion of the Depositary it is not lawful or not practical for it to hold those new Deposited Securities under the Deposit Agreement because those new Deposited Securities may not be distributed to Owners without registration under the Securities Act of 1933 or for any other reason, at public or private sale, at such places and on such terms as it reasonably deems proper and proceed as if those new Deposited Securities had been Redeemed as described in the Deposit Agreement. A Replacement shall be a Termination Option Event.

#### **Amendment and Termination**

The form of the Receipts and any provisions of the Deposit Agreement may at any time and from time to time be amended by written agreement between the Company and the Depositary without the consent of Owners or Holders in any respect that they may deem necessary or desirable. Any amendment that would impose or increase any fees or charges (other than taxes and other governmental charges, registration fees, cable, telex or facsimile transmission costs, delivery costs or other such expenses), or that would otherwise prejudice any substantial existing right of Owners, shall, however, not become effective as to outstanding American Depositary Shares until the expiration of 30 days after notice of that amendment has been Disseminated to the Owners of outstanding American Depositary Shares. Every Owner and Holder, at the time any amendment so becomes effective, shall be deemed, by continuing to hold American Depositary Shares or any interest therein, to consent and agree to that amendment and to be bound by the Deposit

Agreement as amended thereby. Upon the effectiveness of an amendment to the form of Receipt, including a change in the number of Ordinary Shares represented by each American Depositary Share, the Depositary may call for surrender of Receipts to be replaced with new Receipts in the amended form or call for surrender of American Depositary Shares to effect that change of ratio. In no event shall any amendment impair the right of the Owner to surrender American Depositary Shares and receive delivery of the Deposited Securities represented thereby, except in order to comply with mandatory provisions of applicable law. Notwithstanding the foregoing, if any governmental body should adopt new laws, rules or regulations which would require amendment or supplementation of the Deposit Agreement and the Receipts to ensure compliance therewith, the Company and the Depositary may amend or supplement the Deposit Agreement and the Receipts at any time in accordance with such changed laws, rules or regulations. Such amendment or supplement to the Deposit Agreement in such circumstances may become effective before a notice of such amendment or supplement is given to Owners or within any other period of time as required for compliance with such laws, rules or regulations.

The Company may initiate termination of the Deposit Agreement by notice to the Depositary. The Depositary may initiate termination of the Deposit Agreement if (i) at any time 60 days shall have expired after the Depositary delivered to the Company a written resignation notice and a successor depositary has not been appointed and accepted its appointment as provided in Section 5.4 of the Deposit Agreement, (ii) an Insolvency Event or Delisting Event occurs with respect to the Company or (iii) a Termination Option Event has occurred. If termination of the Deposit Agreement is initiated, the Depositary shall Disseminate a notice of termination to the Owners of all American Depositary Shares then outstanding setting a date for termination (the “**Termination Date**”), which shall be at least 90 days after the date of that notice, and the Deposit Agreement shall terminate on that Termination Date.

After the Termination Date, the Company shall be discharged from all obligations under the Deposit Agreement except for its obligations to the Depositary under Sections 5.8, 5.9 and 7.6 of the Deposit Agreement.

At any time after the Termination Date, the Depositary may sell the Deposited Securities then held under the Deposit Agreement and may thereafter hold uninvested the net proceeds of any such sale, together with any other cash then held by it hereunder, unsegregated and without liability for interest, for the pro rata benefit of the Owners of American Depositary Shares that remain outstanding, and those Owners will be general creditors of the Depositary with respect to those net proceeds and that other cash. After making that sale, the Depositary shall be discharged from all obligations under the Deposit Agreement, except (i) to account for the net proceeds and other cash (after deducting, in each case, the fee of the Depositary for the surrender of American Depositary Shares, any expenses for the account of the Owner of such American Depositary Shares in accordance with the terms and conditions of the Deposit Agreement and any applicable taxes or governmental charges) and (ii) for its obligations under Section 5.8 of the Deposit Agreement and (iii) to act as provided below.

After the Termination Date, the Depositary shall continue to receive dividends and other distributions pertaining to Deposited Securities (that have not been sold), may sell rights and other property as provided in the Deposit Agreement and shall deliver Deposited Securities (or sale proceeds) upon surrender of American Depositary Shares (after payment or upon deduction, in each case, of the fee of the Depositary for the surrender of American Depositary Shares, any expenses for the account of the Owner of those American Depositary Shares in accordance with the terms and conditions of the Deposit Agreement and any applicable taxes or governmental charges). After the Termination Date, the Depositary shall not accept deposits of Ordinary Shares or deliver American Depositary Shares. After the Termination Date, (i) the Depositary may refuse to accept surrenders of American Depositary Shares for the purpose of withdrawal of Deposited Securities (that have not been sold) if in its judgment the requested withdrawal would interfere with its efforts to sell the Deposited Securities, (ii) the Depositary will not be required to deliver cash proceeds of the sale of Deposited Securities until all Deposited Securities have been sold and (iii) the Depositary may discontinue the registration of transfers of American Depositary Shares and suspend the distribution of dividends and other distributions on Deposited Securities to the Owners and need not give any further notices or perform any further acts under the Deposit Agreement except as otherwise provided in the Deposit Agreement.

#### **Books of Depositary and List of Owners**

The Depositary shall make available for inspection by Owners at its Office any reports, notices and other communications, including any proxy solicitation material, received from the Company which are both (a) received by the Depositary as the holder of the Deposited Securities and (b) made generally available to the holders of those Deposited Securities by the Company. The Company shall furnish reports and communications, including any proxy soliciting material to which this Section applies, to the Depositary in English, to the extent those materials are required to be translated into English pursuant to any regulations of the Commission.

Upon written request by the Company, the Depositary shall, as promptly as practicable, at the expense of the Company, furnish to it a list, as of a recent date, of the names, addresses and American Depositary Share holdings of all Owners, as such information is reflected in the Depositary's records.

### **Limitations on Delivery, Transfer and Surrender**

As a condition precedent to the delivery, registration of transfer or surrender of any American Depositary Shares or split-up or combination of any Receipt or withdrawal of any Deposited Securities, the Depositary, Custodian or Registrar may require payment from the depositor of Ordinary Shares or the presenter of the Receipt or instruction for registration of transfer or surrender of American Depositary Shares not evidenced by a Receipt of a sum sufficient to reimburse it for any tax or other governmental charge and any stock transfer or registration fee with respect thereto (including any such tax or charge and fee with respect to Ordinary Shares being deposited or withdrawn) and payment of any applicable fees as provided in the Deposit Agreement, may require the production of proof satisfactory to it as to the identity and genuineness of any signature and may also require compliance with any regulations the Depositary may establish consistent with the provisions of the Deposit Agreement, including, without limitation, Section 2.6 of the Deposit Agreement.

The delivery of American Depositary Shares against deposit of Ordinary Shares generally or against deposit of particular Ordinary Shares may be suspended, or the registration of transfer of American Depositary Shares in particular instances may be refused, or the registration of transfer of outstanding American Depositary Shares generally may be suspended, during any period when the transfer books of the Depositary are closed, or if any such action is deemed necessary or advisable by the Depositary or the Company at any time or from time to time because of any requirement of law or of any government or governmental body or commission, or under any provision of the Deposit Agreement, or for any other reason. Notwithstanding anything to the contrary in the Deposit Agreement, the surrender of outstanding American Depositary Shares and withdrawal of Deposited Securities may not be suspended, subject only to (i) temporary delays caused by closing of the transfer books of the Depositary or the Company or the Foreign Registrar, if applicable, or the deposit of Ordinary Shares in connection with voting at a shareholders' meeting, or the payment of dividends, (ii) the payment of fees, taxes and similar charges, and (iii) compliance with any U.S. or foreign laws or governmental regulations relating to the American Depositary Shares or to the withdrawal of the Deposited Securities.

The Depositary shall not knowingly accept for deposit under the Deposit Agreement any Ordinary Shares that, at the time of deposit, are Restricted Securities.

The Depositary shall notify the Company, as promptly as practicable, of any suspension or refusal under Section 2.6 of the Deposit Agreement that is outside the ordinary course of business.

### **Limitations on Liability**

Neither the Depositary nor the Company shall have any obligation or be subject to any liability under the Deposit Agreement to any Holder of American Depositary Shares, but only to the Owner.

Neither the Depositary nor the Company nor any of their respective officers, directors, employees, agents or affiliates shall incur any liability to any Owner or Holder (i) if by reason of any provision of any present or future law or regulation of the United States, Switzerland or any other country, or of any governmental or regulatory authority or stock exchange, or by reason of any provision, present or future, of the Articles of Association or similar document of the Company, or by reason of any provision of any securities issued or distributed by the Company, or any offering or distribution thereof, or by reason of any act of God or war or terrorism or other circumstances beyond its control, the Depositary or the Company is prevented from, forbidden to or delayed in, or could be subject to any civil or criminal penalty on account of doing or performing and therefore does not do or perform, any act or thing that, by the terms of the Deposit Agreement or the Deposited Securities, it is provided shall be done or performed, (ii) by reason of any exercise of, or failure to exercise, any discretion provided for in the Deposit Agreement (including any determination by the Depositary to take, or not take, any action that the Deposit Agreement provides the Depositary may take), (iii) for the inability of any Owner or Holder to benefit from any distribution, offering, right or other benefit that is made available to holders of Deposited Securities but is not, under the terms of the Deposit Agreement, made available to Owners or Holders, or (iv) for any special, consequential or punitive damages for any breach of the terms of the Deposit Agreement. Where, by the terms of a distribution to which Section 4.1, 4.2 or 4.3 of the Deposit Agreement applies, or an offering to which Section 4.4 of the Deposit Agreement applies, or for any other reason, that distribution or offering may not be made available to Owners, and the Depositary may not dispose of that distribution or offering on behalf of Owners and make the net proceeds available to Owners, then the Depositary shall not make that distribution or offering available to Owners, and shall allow any rights, if applicable, to lapse.

Neither the Company nor any of its officers, directors, employees, agents or affiliates assumes any obligation nor shall it or any of them be subject to any liability under the Deposit Agreement to any Owner or Holder, except that the Company agrees to perform its obligations specifically set forth in the Deposit Agreement without negligence or bad faith.

Neither the Depositary nor any of its officers, directors, employees, agents or affiliates assumes any obligation nor shall it or any of them be subject to any liability under the Deposit Agreement to any Owner or Holder (including, without limitation, liability with respect to the validity or worth of the Deposited Securities), except that the Depositary agrees to perform its obligations specifically set forth in the Deposit Agreement without negligence or bad faith.

Neither the Depositary nor the Company nor any of their respective officers, directors, employees, agents or affiliates shall be under any obligation to appear in, prosecute or defend any action, suit or other proceeding in respect of any Deposited Securities or in respect of the American Depositary Shares on behalf of any Owner or Holder or any other person.

Each of the Depositary and the Company and their respective officers, directors, employees, agents or affiliates may rely, and shall be protected in relying upon, any written notice, request, direction or other document believed by it or them to be genuine and to have been signed or presented by the proper party or parties.

Neither the Depositary nor the Company nor any of their respective officers, directors, employees, agents or affiliates shall be liable for any action or non-action by it or them in reliance upon the advice of or information from legal counsel, accountants, any person presenting Ordinary Shares for deposit, any Owner or any other person believed by it or them in good faith to be competent to give such advice or information.

The Depositary shall not be liable for any acts or omissions made by a successor depositary whether in connection with a previous act or omission of the Depositary or in connection with any matter arising wholly after the removal or resignation of the Depositary, provided that in connection with the issue out of which such potential liability arises the Depositary performed its obligations without negligence or bad faith while it acted as Depositary.

The Depositary shall not be liable for the acts or omissions of any securities depository, clearing agency or settlement system in connection with or arising out of book-entry settlement of American Depositary Shares or Deposited Securities or otherwise.

In the absence of bad faith on its part, the Depositary shall not be responsible for any failure to carry out any instructions to vote any of the Deposited Securities, or for the manner in which any such vote is cast or the effect of any such vote.

The Depositary shall have no duty to make any determination or provide any information as to the tax status of the Company or any liability for any tax consequences that may be incurred by Owners or Holders as a result of owning or holding American Depositary Shares.

No disclaimer of liability under the Securities Act of 1933 is intended by any provision of the Deposit Agreement.

## EXCHANGE-TRADED NOTES

The following description of Credit Suisse AG's Exchange-Traded Notes (the "ETNs") is a summary and does not purport to be complete. It is subject to and qualified in its entirety by reference to (i) the senior indenture, dated March 29, 2007, between Credit Suisse AG (formerly Credit Suisse) and The Bank of New York Mellon (formerly known as the Bank of New York) (the "Trustee") (as may be further amended or supplemented from time to time, the "Indenture"), which is incorporated by reference as an exhibit to the Annual Report on Form 20-F of which this Exhibit 2.2 is a part and (ii) each of the notes or supplemental indentures to the Indenture under which each ETN was issued, each of which is incorporated by reference as an exhibit to the Form 8-A filed for such ETN. We encourage you to read the Indenture together with the relevant notes, supplemental indentures and pricing supplements for each ETN.

The ETNs are part of a series of debt securities entitled "Senior Medium-Term Notes" (the "Medium-Term Notes") that may be issued under the Indenture from time to time. The ETNs are senior, unsecured and unsubordinated debt obligations of the Issuer. There is no limitation on the aggregate principal amount of securities which may be authenticated and delivered under the Indenture, and such securities shall rank equally and pari passu with all other unsecured and unsubordinated debt of the Issuer, including the ETNs.

Unless otherwise specified, references to "holders" in this section mean those who own the ETNs registered in their own names, on the books that we or the Trustee, or any successor Trustee, as applicable, maintain for this purpose, and not those who own beneficial interests in the ETNs registered in street name or in the ETNs issued in book-entry form through The Depository Trust Company ("DTC") or another depository.

References to "we," "us" or "our" refer to the Issuer.

### Description of Credit Suisse S&P MLP Index Exchange Traded Notes due December 4, 2034 Linked to the S&P MLP Index

*Defined terms used within this subsection are defined only with respect to the ETNs listed in the subsection heading above and described within this subsection.*

#### General

The return on the Credit Suisse S&P MLP Index Exchange Traded Notes due December 4, 2034 (the "ETNs") will be based on the price return version of the S&P MLP Index (the "Index"), as reflected by their Indicative Value, calculated as set forth below. The Index includes both master limited partnerships ("MLPs") and limited liability companies ("LLCs"), which have a similar legal structure to MLPs and share the same tax characteristics as MLPs (collectively, the "Index Constituents"), that trade on major U.S. exchanges. The Index Constituents are classified in the GICS<sup>®</sup> Energy Sector and GICS<sup>®</sup> Gas Utilities Industry according to the Global Industry Classification Standard<sup>®</sup> ("GICS"). The Index is subject to the policies of S&P Dow Jones Indices LLC (the "Index Sponsor") and is subject to the Index Sponsor's discretion, including with respect to the implementation of, and changes to, the rules governing the Index methodology.

#### Inception, Issuance and Maturity

The "Inception Date" of the ETNs is December 2, 2014. The "Initial Settlement Date" of the ETNs is December 5, 2014. The scheduled "Maturity Date" is initially December 4, 2034, but the maturity of the ETNs may be extended at our option for up to two additional five-year periods.

## Intraday Indicative Value

The “**Intraday Indicative Value**” of the ETNs is designed to reflect the economic value of the ETNs at a given time. The Intraday Indicative Value of the ETNs will be calculated and published by the IV Calculation Agent every fifteen (15) seconds on each Trading Day during normal trading hours under the Bloomberg ticker symbol “MLPOIV” and under the Yahoo! Finance ticker symbol “^MLPO-IV” so long as no Market Disruption Event has occurred or is continuing and will be disseminated over the consolidated tape or other major market data vendor. The Intraday Indicative Value at any time is based on the most recent intraday level of the Index. It is calculated using the same formula as the Closing Indicative Value, except that instead of using the Closing Level of the Index, the calculation is based on the most recent reported level of the Index at the particular time (or, if the day on which such time occurs is not a Trading Day, as determined by the Calculation Agent).

At any time at which a Market Disruption Event has occurred and is continuing, there shall be no Intraday Indicative Value. If the Intraday Indicative Value of the ETNs is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value of the ETNs on that day, and all future days, will be zero.

Neither the Intraday Indicative Value nor the Closing Indicative Value calculation is intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption, a call or termination of a holder’s ETNs, nor will it reflect hedging or transaction costs, credit considerations, market liquidity or bid-offer spreads. The NYSE Arca is responsible for computing and disseminating the ETN’s Indicative Values. Published levels of the Index from the Index Sponsor may occasionally be subject to delay or postponement. Any such delays or postponements will affect the current level of the Index and therefore the Intraday Indicative Value of the ETNs. The actual trading price of the ETNs may be different from their Intraday Indicative Value or Closing Indicative Value.

The actual trading price of the ETNs at any time may vary significantly from the Intraday Indicative Value at such time. The trading prices of the ETNs at any time is the price that holders may be able to sell their ETNs in the secondary market at such time, if one exists.

The trading price of the ETNs at any time is the price at which holders may be able to sell their ETNs in the secondary market at such time, if one exists. In the absence of an active secondary market for the ETNs, the last reported trading price may not reflect the actual price at which holders may be able to sell their ETNs at a particular time. The trading price of the ETNs at any time may vary significantly from the Intraday Indicative Value of and the Closing Indicative Value of the ETNs at such time due to, among other things, imbalances of supply and demand, lack of liquidity, transaction costs, credit considerations and bid-offer spreads. The closing price of the ETNs will be published on each Trading Day under the ticker symbol “MLPO”. Any premium or discount may be reduced or eliminated at any time. Paying a premium purchase price of the ETNs over the Intraday Indicative Value or the Closing Indicative Value of the ETNs could lead to significant losses in the event holders sell their ETNs at a time when such premium has declined or is no longer present in the market place or at maturity or upon early redemption or upon a call of the ETNs, in which case holders will receive a cash payment based on the Closing Indicative Value on the relevant Valuation Date(s).

The ETNs may be redeemed or called, subject to the conditions described herein.

As discussed in “Payment Upon Early Redemption” below, holders may, subject to certain restrictions, provide a Redemption Notice on any Business Day during the term of the ETNs, starting on the Business Day following the Inception Date until November 21, 2034 (or, if the maturity of the ETNs is extended, five scheduled Trading Days prior to the scheduled Final Valuation Date, as extended).

Holders must offer for early redemption at least 10,000 ETNs at one time in order to exercise the right to cause us to redeem the ETNs on any Redemption Settlement Date (the “**Minimum Redemption Amount**”). We reduced the Minimum Redemption Amount from 50,000 to 10,000 ETNs on December 6, 2022. We or CSSU may, at any time and in our sole discretion, make further modifications to the Minimum Redemption Amount, including, among others, to reinstate the minimum redemption amount of 50,000 ETNs for all redemption dates after such further modification. Any such modification will be applied on a consistent basis for all holders of the ETNs at the time the modification becomes effective. If the ETNs undergo a split or reverse split, the minimum number of ETNs needed to exercise the right to cause us to redeem the ETNs will remain the same.

If the number of ETNs being redeemed is less than the Redemption Liquidity Threshold (a “**Small Redemption**”), the “**Redemption Settlement Amount**” will be a cash payment per ETN equal to the greater of (a) zero and (b) (1) the Closing Indicative Value on the applicable Redemption Valuation Date, minus (2) the Redemption Fee Amount.

If the number of ETNs being redeemed is equal to or greater than the Redemption Liquidity Threshold (a “**Large Redemption**”), the Redemption Settlement Amount will be a cash payment per ETN equal to the greater of (a) zero and (b) (1) the arithmetic average,

as determined by the Calculation Agent, of the Closing Indicative Values during the Redemption Valuation Period, minus (2) the Redemption Fee Amount.

A holder may exercise its early redemption right by causing its broker or other person with whom it holds its ETNs to deliver a Redemption Notice (as defined herein) to Credit Suisse.

In the case of a Small Redemption, and where the Redemption Notice is delivered prior to 4:00 p.m. New York City time on any Business Day, the immediately following Trading Day will be the applicable “**Small Redemption Valuation Date**”. If the Redemption Notice is delivered at or after 4:00 p.m. New York City time, the Small Redemption Valuation Date will be the second following Trading Day.

In the case of a Large Redemption, and where the Redemption Notice is delivered prior to 4:00 p.m. New York City time on any Business Day, the immediately following Trading Day will be the first day of the Redemption Valuation Period. If the Redemption Notice is delivered at or after 4:00 p.m. New York City time, the first day of the Redemption Valuation Period will be the second following Trading Day. In either case, the Large Redemption Valuation Date will be the last day of the Redemption Valuation Period.

We have the right to call the ETNs in whole or in part on any Trading Day during the term of the ETNs by providing notice to holders of the ETNs starting on the Trading Day following the Inception Date until the twentieth (20th) calendar day preceding the Maturity Date (the “**Call Notice**”). We will provide notice at least twenty (20) calendar days prior to the Call Settlement Date. Upon exercise of our call right, holders will be entitled to receive a cash payment equal to the Call Settlement Amount, which will be calculated as described herein and paid on the third Business Day following the Call Valuation Date specified in the Call Notice (the “**Call Settlement Date**”). If the amount so calculated is less than zero, the payment upon exercise of the call right will be zero. Unless the scheduled Call Settlement Date is postponed because it is not a Business Day or because there is a Market Disruption Event on the scheduled Call Valuation Date, the final day on which we can issue a Call Notice will be November 14, 2034 (or, if the maturity of the ETNs is extended, twenty (20) calendar days prior to the scheduled Maturity Date, as extended).

#### **Indicative Value**

The “**Indicative Value**” of the ETNs is the Intraday Indicative Value or the Closing Indicative Value of the ETNs, as applicable.

#### **Split or Reverse Split of the ETNs**

We or the Calculation Agent may initiate a split or reverse split of the ETNs on any Trading Day. If we or the Calculation Agent decides to initiate a split or reverse split, we will issue a notice to holders of the ETNs and a press release announcing the split or reverse split, specifying the effective date of the split or reverse split. The Calculation Agent will determine the ratio of such split or reverse split, as the case may be, using relevant market indicia, and will adjust the terms of the ETNs accordingly. Any adjustment of the closing value will be rounded to 8 decimal places.

In the case of a reverse split, we reserve the right to address odd numbers of ETNs (commonly referred to as “partials”) in a manner determined by the Calculation Agent in its sole discretion. A split or reverse split of the ETNs will not affect the aggregate Stated Principal Amount of ETNs held by an investor, other than to the extent of any “partial” ETNs, but it will affect the number of ETNs an investor holds, the denominations used for trading purposes on the exchange and the trading price, and may affect the liquidity, of the ETNs on the exchange.

#### **Coupon**

On each Coupon Payment Date, for each ETN a holder holds on the applicable Coupon Record Date, such holder will be entitled to receive a cash payment on the applicable Coupon Payment Date equal to (a) the Reference Distribution Amount minus the Accrued Investor Fee, each calculated as of the corresponding Coupon Valuation Date (the “**Coupon Amount**”). The final Coupon Amount will be included in the Payment at Maturity if, on the Final Valuation Date, the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred. The Coupon Amount will be paid on the Coupon Payment Date to the holder of an ETN as of the applicable Coupon Record Date.

To the extent the Reference Distribution Amount on a Coupon Valuation Date is less than the Accrued Investor Fee on the corresponding Coupon Valuation Date, there will be no Coupon Amount due or payable on the corresponding Coupon Payment Date, and an amount equal to the Accrued Investor Fee minus the Reference Distribution Amount (the “**Fee Shortfall**”) will be included

in the Accrued Investor Fee for the next Coupon Valuation Date. This process will be repeated to the extent necessary until the Reference Distribution Amount for a Coupon Valuation Date is greater than the Accrued Investor Fee for the corresponding Coupon Valuation Date. If there is a Fee Shortfall as of the last Coupon Valuation Date, that amount will be reflected in the Payment at Maturity.

### **Denomination**

The denomination and the Stated Principal Amount of each ETN is \$25.00. ETNs may be issued at a price higher or lower than the Stated Principal Amount, based on the Indicative Value of the ETNs at that time.

### **Payment at Maturity**

If the ETNs have not previously been redeemed or called, on the Maturity Date holders will be entitled to receive for each ETN a cash payment equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values during the five consecutive Trading Days to and including the Final Valuation Date (the “**Final Valuation Period**”). The “**Final Valuation Date**” is November 29, 2034, subject to postponement if such date is not a Trading Day, or in the event of a Market Disruption Event or an extension of the Maturity Date as described herein. Any Fee Shortfall as of the last Coupon Valuation Date will be reflected in the Payment at Maturity. Any payment on the ETNs is subject to our ability to pay our obligations as they become due. In no event will the Payment at Maturity be less than zero.

If not previously redeemed or called, the ETNs will mature on December 4, 2034, subject to postponement if such date is not a Business Day, in the event of a Market Disruption Event or an extension of the Maturity Date at our option for up to two additional five-year periods. We may only extend the scheduled Maturity Date for five years at a time. If we exercise our option to extend the maturity of the ETNs, we will notify DTC (the holder of the global note for the ETNs) and the trustee at least 45 but not more than 60 calendar days prior to the then-scheduled Maturity Date. We will provide such notice to DTC and the trustee in respect of each five-year extension of the scheduled Maturity Date that we choose to effect.

If the scheduled Maturity Date is not a Business Day, the Maturity Date will be postponed to the first Business Day following the scheduled Maturity Date. If the scheduled Final Valuation Date is not a Trading Day, the Final Valuation Date will be postponed to the next following Trading Day, in which case the Maturity Date will be postponed to the third Business Day following the Final Valuation Date as so postponed. In addition, if a Market Disruption Event occurs or is continuing on any Trading Day during the Final Valuation Period, the Maturity Date will be postponed until the date three (3) Business Days following the Final Valuation Date, as postponed. No interest or additional payment will accrue or be payable as a result of any postponement of the Maturity Date. Any payment on the ETNs is subject to our ability to pay our obligations as they become due.

### **Maturity Date**

If the Maturity Date is not a Business Day, the Maturity Date will be the next following business day. If the third Business Day before this day does not qualify as a Valuation Date (as described above), then the Maturity Date will be the third Business Day following the Final Valuation Date. The Calculation Agent may postpone the Final Valuation Date—and therefore the Maturity Date—if a Market Disruption Event occurs or is continuing on a day that would otherwise be the Final Valuation Date.

In the event that Payment at Maturity is deferred beyond the stated Maturity Date, penalty interest will not accrue or be payable with respect to that deferred payment.

If the Closing Indicative Value is zero, the Payment at Maturity will be zero.

The “**Closing Indicative Value**” for the ETNs on the Inception Date was equal to the Stated Principal Amount. The Closing Indicative Value on any Trading Day after the Inception Date will be calculated by the NYSE Arca and be equal to (a) the product of the Stated Principal Amount and the Index Factor as of such Trading Day plus (b) the Coupon Amount, if any, with respect to the most recent Coupon Valuation Date on or before the current Trading Day if on such Trading Day the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, plus (c) the Stub Coupon Amount as of such Trading Day, if any, minus (d) the Accrued Investor Fee as of such Trading Day. In no event, however, will the Closing Indicative Value be less than zero. Even if the Closing Indicative Value or Intraday Indicative Value is equal to or less than zero at any time, the trading price of the ETNs may remain above zero. Buying the ETNs at such a time will lead to a complete loss of a holder’s investment.

The “**Index Factor**” on any Trading Day, including the Final Valuation Date, will be equal to the Closing Level of the Index on that day divided by the Initial Index Level. The Closing Level of the Index on any Trading Day will be determined by the Index Sponsor and published on the Bloomberg page “SPMLP <Index>” or any successor page on Bloomberg or any successor service, as applicable.

If the ETNs undergo a split or reverse split, the Stated Principal Amount, Closing Indicative Value and Intraday Indicative Value of the ETNs will be adjusted accordingly. Neither the Closing Indicative Value nor the Intraday Indicative Value is the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from the Closing Indicative Value and Intraday Indicative Value of the ETNs at such time.

The Closing Indicative Value will never be less than zero. If the Intraday Indicative Value is equal to or less than zero at any time, the Closing Indicative Value on that day, and all future days, will be zero. The Closing Indicative Value for each Trading Day will be published on such Trading Day under the Bloomberg ticker symbol “MLPOIV”. The NYSE Arca is responsible for computing and disseminating the Closing Indicative Value.

The “**Closing Level**” of the Index on any Trading Day will be the closing level published on Bloomberg under the ticker symbol “SPMLP <Index>” or any successor page on Bloomberg or any successor service, as applicable; provided that if such day is not a Trading Day, the Closing Level of the Index will be deemed to be the Closing Level as of the immediately preceding Trading Day; provided further that in the event a Market Disruption Event exists on a Valuation Date, the Calculation Agent will determine the Closing Level of the Index according to the methodology described below in “Market Disruption Events.”

The “**Annual Investor Fee Rate**” will be equal to 0.95% per annum.

On any Trading Day, including the Final Valuation Date, the “**Accrued Investor Fee**” will be equal to (a) (i) the Annual Investor Fee Rate times (ii) the number of days in the period commencing on, but excluding, the previous Coupon Valuation Date (or, with respect to the first Coupon Period, commencing on but excluding the Inception Date) to, and including, such Trading Day, divided by 365 times by (iii) Stated Principal Amount times (iv) the Index Factor as of such Trading Day, plus (b) the Fee Shortfall from the previous Coupon Valuation Date, if any.

There will be a Fee Shortfall from the previous Coupon Valuation Date if the Reference Distribution Amount on such previous Coupon Valuation Date minus the Accrued Investor Fee on such previous Coupon Valuation Date was negative. In such case, the Fee Shortfall is equal to the absolute value of such negative number.

The Accrued Investor Fee reduces the Coupon Amount and may reduce the amount of a holder’s return at maturity, upon early redemption or upon a call. If the Coupon Amounts (reduced by the Accrued Investor Fee, which includes any applicable Fee Shortfall) and the performance of the Index are not sufficient to offset the applicable fees built into the calculation of the Payment at Maturity, the Redemption Settlement Amount and the Call Settlement Amount, as the case may be, a holder will receive less, and possibly significantly less, at maturity or upon early redemption or upon a call of the ETNs than the amount of such holder’s investment.

The “**Intraday Indicative Value**” of the ETNs will be calculated and published by the IV Calculation Agent every 15 seconds on each Trading Day during normal trading hours under the Bloomberg ticker symbol “MLPOIV” and under the Yahoo! Finance ticker symbol “^MLPO-IV” so long as no Market Disruption Event has occurred or is continuing and will be disseminated over the consolidated tape or other major market data vendor. The Intraday Indicative Value at any time is based on the most recent intraday level of the Index. It is calculated using the same formula as the Closing Indicative Value, except that instead of using the Closing Level of the Index, the calculation is based on the most recent reported level of the Index at the particular time (or, if the day on which such time occurs is not a Trading Day, as determined by the Calculation Agent). If the Intraday Indicative Value of the ETNs is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value on that day, and all future days, will be zero.

We have appointed the NYSE Arca as the “**IV Calculation Agent**” to calculate the Closing Indicative Value and the Intraday Indicative Value of the ETNs. We may, at any time, vary or terminate the appointment of the IV Calculation Agent and appoint a replacement IV Calculation Agent.

A “**Business Day**” is any Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City generally are authorized or obligated by law, regulation or executive order to close.

A “**Trading Day**” is day on which trading is generally conducted on the New York Stock Exchange, the NYSE Arca, Nasdaq and any other exchange which the Index Constituents are traded and published.

The “**Index**” means the price return version of the S&P MLP Index. The Index includes both master limited partnerships (“**MLPs**”) and limited liability companies (“**LLCs**”), which have a similar legal structure to MLPs and share the same tax characteristics as MLPs (collectively, the “**Index Constituents**”), that trade on major U.S. exchanges. The Index Constituents are classified in the GICS® Energy Sector and GICS® Gas Utilities Industry according to the Global Industry Classification Standard® (“**GICS**”).

The ETNs do not guarantee any return of a holder’s investment. If the level of the Index decreases or does not increase sufficiently to offset the Accrued Investor Fee reflected in the Closing Indicative Value of the ETN, a holder will receive less, and possibly significantly less, at maturity or upon early redemption or upon a call of the ETNs than the amount of such holder’s investment. Any payment holders will be entitled to receive is subject to our ability to pay our obligations as they become due.

### **Payment Upon Early Redemption**

Prior to maturity, holders may, subject to certain restrictions described below, offer at least the applicable minimum number (the “**Minimum Redemption Amount**”) of ETNs to us for early redemption by delivering to us a redemption notice (the “**Redemption Notice**”). The minimum redemption amount will be equal to 10,000 ETNs, except that we or CSSU may from time to time reduce, in part or in whole, the minimum redemption amount. Any such reduction will be applied on a consistent basis for all holders of the ETNs at the time such reduction becomes effective. If the ETNs undergo a split or reverse split, the minimum number of ETNs needed to exercise the right to cause us to redeem the ETNs will remain the same.

If a holder elects to offer its ETNs for early redemption and the requirements for acceptance by us are met, such holder will receive on the Redemption Settlement Date a cash payment in an amount equal to the Redemption Settlement Amount for each ETN such holder holds. Investors will be charged the applicable Redemption Fee Amount for ETNs redeemed at such holder’s option. Any payment on the ETNs is subject to our ability to pay our obligations as they become due.

A holder may provide a Redemption Notice on any Business Day during the term of the ETNs, starting on the Business Day following the Inception Date until November 21, 2034 (or, if the maturity of the ETNs is extended, five scheduled Trading Days prior to the scheduled Final Valuation Date, as extended).

If the number of ETNs being redeemed is less than the Redemption Liquidity Threshold (a “**Small Redemption**”), the Redemption Settlement Amount will be a cash payment per ETN equal to the greater of (a) zero and (b) (1) the Closing Indicative Value on the applicable Small Redemption Valuation Date, minus (2) the Redemption Fee Amount.

If the number of ETNs being redeemed is equal to or greater than the Redemption Liquidity Threshold (a “**Large Redemption**”), the Redemption Settlement Amount will be a cash payment per ETN equal to the greater of (a) zero and (b) (1) the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values during the Redemption Valuation Period, minus (2) the Redemption Fee Amount.

A holder may exercise its early redemption right by causing its broker or other person with whom such holder holds its ETNs to deliver a Redemption Notice (as defined herein) to Credit Suisse.

In the case of a Small Redemption, and where the Redemption Notice is delivered prior to 4:00 p.m. New York City time on any Business Day, the immediately following Trading Day will be the applicable “**Small Redemption Valuation Date**”. If the Redemption Notice is delivered at or after 4:00 p.m. New York City time, the Small Redemption Valuation Date will be the second following Trading Day.

In the case of a Large Redemption, and where the Redemption Notice is delivered prior to 4:00 p.m. New York City time on any Business Day, the immediately following Trading Day will be the first day of the Redemption Valuation Period. If the Redemption Notice is delivered at or after 4:00 p.m. New York City time, the first day of the Redemption Valuation Period will be the second following Trading Day. In either case, the Large Redemption Valuation Date will be the last day of the Redemption Valuation Period.

When a holder submits its ETNs for redemption in accordance with the redemption procedures described herein, its ETNs may remain outstanding (and be resold by us or an affiliate) or may be submitted by us for cancellation.

The “**Redemption Settlement Date**” will be the third Business Day following a Redemption Valuation Date.

The “**Redemption Valuation Period**” for Large Redemptions will be a period of five consecutive Trading Days to, and including, the Large Redemption Valuation Date.

In the case of a Small Redemption, the Redemption Fee Amount will be equal to the product of (1) the Closing Indicative Value of the ETNs on the applicable Trading Day times (2) 0.10%.

In the case of a Large Redemption, the Redemption Fee Amount will be equal to the product of (1) the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of the ETNs during the Redemption Valuation Period, times (2) 0.10%.

The “**Redemption Liquidity Threshold**” will be equal to 1,000,000 ETNs.

### **Procedures for Early Redemption**

If a holder wishes to offer its ETNs to Credit Suisse for early redemption, such holder’s broker or other person with whom such holder holds its ETNs must follow the following procedures:

- Deliver a notice of early redemption (the “**Redemption Notice**”), to Credit Suisse via email or other electronic delivery as requested by Credit Suisse. In the case of a Small Redemption, and where the Redemption Notice is delivered prior to 4:00 p.m. New York City time on any Business Day, the immediately following Trading Day will be the applicable “**Small Redemption Valuation Date**”. If the Redemption Notice is delivered at or after 4:00 p.m. New York City time, the Small Redemption Valuation Date will be the second following Trading Day. In the case of a Large Redemption, and where the Redemption Notice is delivered prior to 4:00 p.m. New York City time on any Business Day, the immediately following Trading Day will be the first day of the Redemption Valuation Period. If the Redemption Notice is delivered at or after 4:00 p.m. New York City time, the first day of the Redemption Valuation Period will be the second following Trading Day. In either case, the Large Redemption Valuation Date will be the last day of the Redemption Valuation Period. Credit Suisse or its affiliate must acknowledge to a holder’s broker or other person with whom such holder holds its ETNs acceptance of the Redemption Notice in order for such holder’s early redemption request to be effective;
- Notwithstanding the foregoing, Credit Suisse may, at its option, waive the requirement that the Redemption Notice be delivered as set forth above, if confirmed by Credit Suisse that a written indication of an offer for early redemption has otherwise been accepted by Credit Suisse. Any such written indication that is delivered at or after 4:00 p.m., New York City time, on any Business Day, will be deemed to have been made on the following Business Day. For the avoidance of doubt, a holder may choose to comply with the procedures set forth above in lieu of the procedures in this clause, irrespective of any waiver by Credit Suisse;
- Cause the holder’s DTC custodian to book a delivery versus payment trade with respect to the ETNs on the applicable Redemption Valuation Date at a price equal to the applicable Redemption Settlement Amount, facing us; and
- Cause the holder’s DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. New York City time, on the applicable Redemption Date (the third Business Day following the Redemption Valuation Date).

The holder is responsible for (i) instructing or otherwise causing its broker or other person with whom such holder holds its ETNs to provide the Redemption Notice (unless otherwise waived by Credit Suisse as set forth above) and (ii) its broker satisfying the additional requirements as set forth in the second and third bullets above in order for the early redemption to be effected. Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, a holder should consult the brokerage firm through which it owns its interest in the ETNs in respect of such deadlines. If Credit Suisse does not (i) receive the Redemption Notice from the holder’s broker prior to 4:00 p.m. and (ii) deliver an acknowledgment of such Redemption Notice to such broker accepting such redemption request by 7:30 p.m., on the Business Day prior to the applicable Redemption Valuation Date or the first day of the Redemption Valuation Period, as the case may be, such notice will not be effective for such Business Day and Credit Suisse will treat such Redemption Notice as if it was received on the next Business Day. Any redemption instructions for which Credit Suisse receives a valid confirmation in accordance with the procedures described above will be irrevocable after Credit Suisse confirms a holder’s offer for early redemption.

Because the Redemption Settlement Amount a holder will receive for each ETN will not be determined until the close of trading on the applicable Redemption Valuation Date, a holder will not know the applicable Redemption Settlement Amount at the time such holder exercises its redemption right and will bear the risk that its ETNs will decline in value between the time of such holder’s exercise and the time at which the Redemption Settlement Amount is determined.

### **Issuer Call Right**

We have the right to call the ETNs in whole or in part on any Trading Day during the term of the ETNs by providing notice to holders of the ETNs starting on the Trading Day following the Inception Date until the twentieth (20th) calendar day preceding the Maturity Date (the “**Call Notice**”). We will provide notice at least twenty (20) calendar days prior to the Call Settlement Date.

Upon exercise of our call right, holders will be entitled to receive a cash payment equal to the Call Settlement Amount, which will be calculated as described herein and paid on the third Business Day following the Call Valuation Date specified in the Call Notice (the “**Call Settlement Date**”). If the amount so calculated is less than zero, the payment upon exercise of the call right will be zero.

Unless the scheduled Call Settlement Date is postponed because it is not a Business Day or because there is a Market Disruption Event on the scheduled Call Valuation Date, the final day on which we can issue a Call Notice will be November 14, 2034 (or, if the maturity of the ETNs is extended, twenty (20) calendar days prior to the scheduled Maturity Date, as extended).

### **Market Disruption Events**

As set forth under “Payment at Maturity”, “Payment Upon Early Redemption” and “Issuer Call Right” above, the Index Sponsor will determine the Closing Level of the Index on each Valuation Date, including the Final Valuation Date. Notwithstanding the foregoing, the Calculation Agent will be solely responsible for the determination and calculation of any adjustments to the Index and of any related determinations and calculations with respect to any event described below and its determinations and calculations will be conclusive absent manifest error.

A “**Market Disruption Event**” means the occurrence or existence on any scheduled Trading Day during the one-half hour period that ends at the relevant Valuation Time, of any suspension of or limitation imposed on trading (by reason of movements in price exceeding limits permitted by the relevant exchange or otherwise) on:

- (a) an exchange on which securities that comprise 20% or more of the level of the Index (or a Successor Index) are traded based on a comparison of (1) the portion of the level of the Index (or a Successor Index) attributable to each Index Constituent comprising the Index (or a Successor Index) in which trading is, in the determination of the Calculation Agent, materially suspended or materially limited relative to (2) the overall level of the Index (or a Successor Index), in the case of (1) or (2) immediately before that suspension or limitation;
- (b) a Related Exchange in options contracts on the Index (or a Successor Index); or
- (c) a Related Exchange in futures contracts on the Index (or a Successor Index); and

in the case of (a), (b) or (c) a determination by the Calculation Agent that such suspension or limitation is material.

“**Related Exchange**” means any exchange on which futures or options contracts relating to the Index are traded and any successor to such exchange or any substitute exchange to which trading in futures or options contracts relating to the Index has temporarily relocated.

“**Exchange**” means the principal exchange on which the relevant security is traded.

“**Valuation Time**” means the time at which the Index Sponsor calculates the Closing Level of the Index on any Trading Day.

A Valuation Date will be postponed and thus the determination of the Closing Level of the Index will be postponed if the Calculation Agent reasonably determines that, on such Valuation Date, a Market Disruption Event has occurred or is continuing. In such case, that Valuation Date will be postponed to the next Trading Day on which the Calculation Agent determines that no Market Disruption Event occurs or is continuing, unless in respect of such Valuation Date the Calculation Agent determines that a Market Disruption Event occurs or is continuing on each of the six scheduled Trading Days immediately following the scheduled Valuation Date. In that case, (a) the sixth scheduled Trading Day following the scheduled Valuation Date will be deemed to be the Valuation Date, notwithstanding the Market Disruption Event, and (b) the Calculation Agent will determine the Closing Level for the Index on that deemed Valuation Date in accordance with the formula for and method of calculating the Index last in effect prior to the commencement of the Market Disruption Event using exchange traded prices of the Index Constituents on the relevant exchanges (as determined by the Calculation Agent in its sole and absolute discretion) or, if trading in any Index Constituent has been materially suspended or materially limited, its good faith estimate of the prices that would have prevailed on the exchanges (as determined by the Calculation Agent in its sole and absolute discretion) but for the suspension or limitation, as of the Valuation Time on that deemed Valuation Date, of each Index Constituent (subject to the provisions described under “Discontinuation or Modification of the Index” herein). Any such postponement or determinations by the Calculation Agent may adversely affect the return on the ETNs. In addition, no interest or other payment will be payable as a result of such postponement.

If a scheduled Valuation Date is postponed due to a Market Disruption Event, the corresponding Redemption Settlement Date or the corresponding Call Settlement Date will also be postponed so that such Redemption Settlement Date or such Call Settlement Date, respectively, occurs on the third Business Day following the Valuation Date as postponed. If a scheduled Coupon Valuation Date is postponed due to a Market Disruption Event the corresponding Coupon Payment Date will also be postponed so that such Coupon

Payment Date occurs on the fifteenth Business Day following the Coupon Valuation Date as postponed. If the Final Valuation Date is postponed due to a Market Disruption Event, the Maturity Date will also be postponed so that the Maturity Date occurs on the third Business Day following the Final Valuation Date as postponed.

#### **Default Amount on Acceleration**

For the purpose of determining whether the holders of our senior medium-term notes, of which the ETNs are a part, are entitled to take any action under the indenture, we will treat the Stated Principal Amount of each ETN outstanding as the principal amount of that ETN. Although the terms of the ETNs may differ from those of the other senior medium-term notes, holders of specified percentages in principal amount of all senior medium-term notes, together in some cases with other series of our debt securities, will be able to take action affecting all the senior medium-term notes, including the ETNs. This action may involve changing some of the terms that apply to the senior medium-term notes, accelerating the maturity of the senior medium-term notes after a default or waiving some of our obligations under the indenture.

In case an event of default with respect to ETNs shall have occurred and be continuing, the amount declared due and payable upon any acceleration of the ETNs will be determined by CSI, as the Calculation Agent, and will equal, for each ETN that a holder then holds, the Closing Indicative Value determined by the Calculation Agent occurring on the Trading Day following the date on which the ETNs were declared due and payable.

#### **Further Issuances**

We may, from time to time, without notice to or the consent of the holders of the ETNs, create and issue additional securities having the same terms and conditions as the ETNs, and ranking on an equal basis with the ETNs in all respects.

#### **Discontinuation or Modification of the Index**

If the Index Sponsor discontinues publication of the Index and the Index Sponsor or anyone else publishes a substitute index that the Calculation Agent determines is comparable to the Index, then the Calculation Agent will permanently replace the original Index with that substitute index (the “**Successor Index**”) for all purposes, and all provisions described herein as applying to the Index will thereafter apply to the Successor Index instead. If the Calculation Agent replaces the original Index with a Successor Index, then the Calculation Agent will determine the Redemption Settlement Amount, Call Settlement Amount or Payment at Maturity, as applicable, by reference to the Successor Index.

If the Calculation Agent determines that the publication of the Index is discontinued and there is no Successor Index, the Calculation Agent will determine the level of the Index and thus the applicable Payment Amount, by a computation methodology that the Calculation Agent determines, will as closely as reasonably possible replicate the Index.

If the Calculation Agent determines that the Index, the Index Constituents or the method of calculating the Index is changed at any time in any respect, including whether the change is made by the Index Sponsor under its existing policies or following a modification of those policies, is due to the publication of a Successor Index, is due to events affecting the Index Constituents or is due to any other reason and is not otherwise reflected in the level of the Index by the Index Sponsor pursuant to the Index methodology, then the Calculation Agent will be permitted (but not required) to make such adjustments in the Index or the method of its calculation as it believes are appropriate to ensure that the Closing Level of the Index used to determine the Redemption Settlement Amount, Call Settlement Amount or Payment at Maturity is equitable.

#### **Manner of Payment and Delivery**

Any payment on or delivery of the ETNs at maturity will be made to accounts designated by holders and approved by us, or at the office of the trustee in New York City, but only when the ETNs are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

#### **Role of CSI**

Credit Suisse International (“**CSI**”), an affiliate of ours and the Calculation Agent, will, in its reasonable discretion, make certain calculations and determinations that may impact the value of the ETNs, including determination of the arithmetic average of the Closing Indicative Values where applicable, Redemption Valuation Dates, Trading Days, a split or reverse split of the ETNs, calculation of

default amounts, Market Disruption Events and any Successor Index and any other calculations or determinations to be made by the Calculation Agent as specified herein.

If the Calculation Agent ceases to perform its role, we will either, at our sole discretion, perform such role, appoint another party to do so or call the ETNs.

We may appoint a different Calculation Agent from time to time without consent and without notifying holders.

### **Description of Credit Suisse X-Links® Gold Shares Covered Call ETNs due February 2, 2033**

*Defined terms used within this subsection are defined only with respect to the ETNs listed in the subsection heading above and described within this subsection.*

#### **General**

The return on the X-Links® Gold Shares Covered Call ETNs due February 2, 2033 (“**ETNs**”) will be based on the performance of the Credit Suisse NASDAQ Gold FLOWS™ 103 Index (the “**Index**”), as reflected by their Indicative Value, calculated as set forth below. The Index measures the return of a “covered call” strategy on the shares of the SPDR® Gold Trust (the “**GLD Shares**”) by reflecting changes in the price of the GLD Shares and the notional option premiums received from the notional sale of monthly call options on the GLD Shares less the Notional Transaction Costs incurred in connection with the implementation of the covered call strategy (the “**Notional Transaction Costs**”). These costs reflect the monthly transaction costs of hypothetically buying and selling the call options and selling the GLD Shares and equal 0.03%, 0.03% and 0.01%, respectively, *times* the closing price of the GLD Shares on the date of such notional transactions and, which, on an annual basis, are approximately equal to 0.84%. The actual cost will vary depending on the value of the GLD Shares on the date of such transactions. The Index strategy consists of a hypothetical notional portfolio that takes a “long” position in GLD Shares and sells a succession of notional, approximately one-month, call options on the GLD Shares with a strike price of approximately 103% of the price of the GLD Shares exercisable on the option expiration date (the “**Options**” and together with the long position in GLD Shares, the “**Index Components**”). The notional sale of the Options is “covered” by the notional long position in the GLD Shares. The long position in the GLD Shares and the “short” call options are held in equal notional amounts (i.e., the short position in each Option is “covered” by the long position in the GLD Shares). This strategy is intended to provide exposure to gold through the notional positions in the GLD Shares and the Options that seeks to (i) generate periodic cash flows that a direct long-only ownership position in the GLD Shares would not, (ii) provide a limited offset to losses from downside market performance in the GLD Shares via the cash flows from option premiums and (iii) provide limited potential upside participation in the performance of the GLD Shares. The level of the Index on any day reflects the value of (i) the notional long position in the GLD Shares; (ii) the notional Option premium; and (iii) the notional short position in the Options then outstanding; and net of the Notional Transaction Costs. The ETNs will not participate in the potential upside of the GLD Shares beyond the applicable strike price of the Options and the Notional Transaction Costs. The Index is subject to the policies of CSI and NASDAQ OMX (the “**Index Sponsors**”) and is subject to the Index Sponsors’ discretion, including with respect to the implementation of, and changes to, the rules governing the Index methodology.

#### **Inception, Issuance and Maturity**

The initial issuance of ETNs priced on January 28, 2013 (the “**Inception Date**”) and settled on February 1, 2013 (the “**Initial Settlement Date**”). The “**Maturity Date**” is initially February 2, 2033, but the maturity of the ETNs may be extended at our option for up to two additional five-year periods, as described herein.

#### **Intraday Indicative Value**

The “**Intraday Indicative Value**” of the ETNs is designed to reflect the economic value of the ETNs at a given time. The Intraday Indicative Value of the ETNs will be calculated and published by the Index Calculation Agent every fifteen (15) seconds on each Trading Day during normal trading hours so long as no Market Disruption Event has occurred or is continuing and will be disseminated over the consolidated tape or other major market data vendor. The Intraday Indicative Value of the ETNs at any time is based on the most recent intraday level of the Index. It is calculated using the same formula as the Closing Indicative Value, except that instead of

using the Closing Level of the Index, the calculation is based on the most recent reported level of the Index at the particular time (or, if the day on which such time occurs is not a Trading Day, as determined by the Calculation Agent).

At any time at which a Market Disruption Event has occurred and is continuing, there shall be no Intraday Indicative Value. If the Intraday Indicative Value of the ETNs is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value of the ETNs on that day, and all future days, will be zero.

Neither the Intraday Indicative Value nor the Closing Indicative Value calculation is intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption, acceleration or termination of a holder's ETNs, nor will it reflect hedging or transaction costs, credit considerations, market liquidity or bid-offer spreads. The Index Calculation Agent is responsible for computing and disseminating the ETN's Indicative Values. Published levels of the Index from the Index Calculation Agent may occasionally be subject to delay or postponement. Any such delays or postponements will affect the current level of the Index and therefore the Intraday Indicative Value of the ETNs. The actual trading price of the ETNs may be different from their Intraday Indicative Value or Closing Indicative Value.

The actual trading price of the ETNs at any time may vary significantly from the Intraday Indicative Value at such time. The trading price of the ETNs at any time is the price that holders may be able to buy or sell their ETNs in the secondary market at such time, if one exists.

The trading price of the ETNs at any time is the price at which holders may be able to buy or sell their ETNs in the secondary market at such time, if one exists. In the absence of an active secondary market for the ETNs, the last reported trading price may not reflect the actual price at which holders may be able to buy or sell their ETNs at a particular time. The trading price of the ETNs at any time may vary significantly from their Indicative Value at such time due to, among other things, imbalances of supply and demand, lack of liquidity, transaction costs, credit considerations and bid-offer spreads.

The closing price of the ETNs will be published on each Trading Day under the ticker symbol "GLDI". Any premium or discount may be reduced or eliminated at any time. Paying a premium purchase price of the ETNs over the Intraday Indicative Value or the Closing Indicative Value of the ETNs could lead to significant losses in the event holders sell their ETNs at a time when such premium is no longer present in the market place or such ETNs are redeemed by us (including pursuant to an acceleration at our option), in which case holders will be entitled to receive a cash payment based on the Closing Indicative Value on the relevant Valuation Date(s).

The ETNs may be redeemed or accelerated at any time, subject to the conditions described herein.

As discussed in "Payment Upon Early Redemption" below, a holder may, subject to certain restrictions, provide a Redemption Notice on any Business Day during the term of the ETNs beginning on January 29, 2013 through January 21, 2033 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended) (for an anticipated January 24, 2033 Early Redemption Valuation Date and an anticipated Early Redemption Date of January 27, 2033 or, if the maturity of the ETNs is extended, an Early Redemption Valuation Date four (4) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended, and an Early Redemption Date one scheduled Business Day prior to the scheduled Final Valuation Date, as extended). If a holder elects to offer its ETNs to Credit Suisse for redemption, such must offer at least the applicable Minimum Redemption Amount at one time for redemption on any Early Redemption Date.

In addition, we have the right to accelerate the ETNs in whole or in part at any time on any Business Day occurring on or after the Inception Date or upon the occurrence of certain events described herein. Upon an acceleration of all of the outstanding ETNs, holders will be entitled to receive a cash payment per ETN in an amount (the "**Accelerated Redemption Amount**") equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of such ETNs during the Accelerated Valuation Period. If fewer than all of the outstanding ETNs are accelerated, the Accelerated Redemption Amount will be the Closing Indicative Value on the Accelerated Valuation Date. If less than all the ETNs are to be redeemed pursuant to an Optional Acceleration or an Event Acceleration, the trustee shall select, pro rata, by lot or in such manner as it deems appropriate and fair, the ETNs to be redeemed pursuant to such acceleration. ETNs may be accelerated in part in multiples of 10,000 ETNs, or an integral multiple of 10,000 ETNs in excess thereof.

The last date on which Credit Suisse will redeem the ETNs at a holder's option will be January 27, 2033 (or, if the maturity of the ETNs is extended, one scheduled Business Day prior to the scheduled Maturity Date, as extended). As such, holders must offer their ETNs for redemption no later than January 21, 2033 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended). The daily redemption feature is intended to induce arbitrageurs to counteract any

trading of the ETNs at a premium or discount to their Indicative Value, although there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

### **Indicative Value**

The “**Indicative Value**” of the ETNs is the Intraday Indicative Value or the Closing Indicative Value of the ETNs, as applicable.

### **Split or Reverse Split of the ETNs**

The Calculation Agent may initiate a split or reverse split of the ETNs on any Trading Day. If the Calculation Agent decides to initiate a split or reverse split, the Calculation Agent will issue a notice to holders of the ETNs and a press release announcing the split or reverse split, specifying the effective date of the split or reverse split. The Calculation Agent will determine the ratio of such split or reverse split, as the case may be, using relevant market indicia, and will adjust the terms of the ETNs accordingly. Any adjustment of the closing value will be rounded to 8 decimal places.

In the case of a reverse split, we reserve the right to address odd numbers of ETNs (commonly referred to as “partials”) in a manner determined by the Calculation Agent in its sole discretion. A split or reverse split of the ETNs will not affect the aggregate stated principal amount of ETNs held by an investor, other than to the extent of any “partial” ETNs, but it will affect the number of ETNs an investor holds, the denominations used for trading purposes on the exchange and the trading price, and may affect the liquidity, of the ETNs on the exchange.

If the ETNs undergo a subsequent split or reverse split, the Current Principal Amount, Closing Indicative Value and Intraday Indicative Value of the ETNs will be adjusted accordingly.

Neither the Closing Indicative Value nor the Intraday Indicative Value is the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from the Closing Indicative Value and Intraday Indicative Value of the ETNs at such time.

Credit Suisse implemented a 1-for-20 reverse split, effective September 27, 2022.

### **Coupon Amount**

On each Coupon Payment Date, for each \$400.00 stated principal amount of the ETNs, holders on the Coupon Record Date will be entitled to receive a variable cash payment equal to the Closing Indicative Value on the Index Business Day immediately preceding the relevant Index Distribution Date multiplied by the Coupon Percentage for that Index Distribution Date. The Coupon will be paid on the Coupon Payment Date to the holder of record on the applicable Coupon Record Date. No Coupon Amount will be due or payable in the event a holder elects to offer its ETNs for early redemption or we accelerate the maturity of the ETNs.

The Coupon Percentage in respect of an Index Distribution Date will be the Distribution for such Index Distribution Date divided by the Closing Level of the Index the Index Business Day immediately preceding the Index Distribution Date. The Distribution represents the notional monthly call premium earned on the sale of the call options written on the GLD Shares during the immediately preceding Index Rebalancing Period pursuant to the Index methodology.

The premiums generated from the notional sales of the Options will be subtracted monthly from the Index and paid to holders of the ETNs in the form of a Coupon Amount, the amount of which is determined based on the notional premiums received from the sale of the Options during the preceding Rebalancing Period as described below.

The “**Index Rebalancing Period**” refers to the five (5) consecutive Index Calculation Days beginning on and including the Index Calculation Day that is ten (10) calendar days prior to the Expiry Date (as defined below) of the relevant Options (each, a “**Roll Date**”). The Index will be rebalanced at the end of each Roll Date in accordance with the following steps:

- First, on the Index Calculation Day preceding the first Roll Date of each month, the strike price of the new Option is determined. The strike price will be the lowest listed strike price that is above 103% of the price per Share as of the 4:00 p.m. New York City time on such date of determination. Then, the Index will roll its monthly exposure over the next five (5) consecutive Index Calculation Days. The roll percentage is the proportion of the expiring position being rolled into a new position on each Roll Date.
- At the end of the first Roll Date, and on each successive Roll Date of such Index Rebalancing Period, the Index will notionally sell the new Option. Additionally, as of the end of each such Roll Date, the Index will hypothetically close out through repurchase 20%

(or such greater amount in the event of roll disruptions) of the Options notionally sold during the previous Index Rebalancing Period (the expiring Options); the Index will notionally liquidate GLD Shares Units in an amount sufficient to fund the notional repurchase.

- Finally, on the last Roll Date of such Index Rebalancing Period, the Index will determine the amount of the notional Option premium, which will, on the close of the last Roll Date of the next following Index Rebalancing Period, be subtracted from the Index as a Distribution and paid to holders of the ETNs in the form of the Coupon Amount.

An Index Distribution Date will be the date on which the Distribution is subtracted from the level of the Index pursuant to the rules of the Index, which will occur on the last Roll Date of a given Index Rebalancing Period.

The Coupon Amount is calculated by reference to the notional Distribution from the Index, which will decrease the level of the Index (and therefore the value of the ETNs), as the Distribution comes directly from the notional portfolio reflected by the Index Components. When the Distribution is deducted from the Index on the Index Distribution Date, the Coupon Amount will be added to the Closing Indicative Value and the Intraday Indicative Value of the ETNs. At the market opening on the Ex-Coupon Date, the ETNs will trade on an ex-coupon basis, adjusted for the Coupon Amount, meaning that the Coupon Amount will no longer be included in the Closing Indicative Value or the Intraday Indicative Value of the ETNs. For a holder to receive the upcoming Coupon Amount, the holder must own the ETNs on the Coupon Record Date.

The “**Ex-Coupon Date**” means, with respect to each Coupon Amount, the first Trading Day on which the ETNs trade without the right to receive such Coupon Amount.

### **Denomination**

Prior to September 27, 2022, the denomination and stated principal amount of each ETN was \$20.00. Credit Suisse implemented a 1-for-20 reverse split of the ETNs, effective September 27, 2022. As of September 27, 2022, the denomination and stated principal amount of each ETN is \$400.00. ETNs may be issued at a price that is higher or lower than the stated principal amount, based on the Indicative Value of the ETNs at that time.

### **Payment at Maturity**

At maturity, holders of the ETNs will be entitled to receive a cash payment on February 2, 2033 (the “**Maturity Date**”) (or, if the maturity of the ETNs is extended, on the scheduled Maturity Date, as extended) that is equal to the “**Final Indicative Value**”, which will be the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Value on each of the immediately preceding five (5) Trading Days to and including the Final Valuation Date (the “**Final Valuation Period**”). We refer to the amount of such payment as the “**Maturity Redemption Amount**”. If the scheduled Maturity Date is not a Business Day, the Maturity Date will be postponed to the first Business Day following the scheduled Maturity Date. If the scheduled Final Valuation Date is not a Trading Day, the Final Valuation Date will be postponed to the next following Trading Day, in which case the Maturity Date will be postponed to the third Business Day following the Final Valuation Date as so postponed. In addition, if a Market Disruption Event occurs or is continuing on the Final Valuation Date, the Maturity Date will be postponed until the date three (3) Business Days following the Final Valuation Date, as postponed. No interest or additional payment will accrue or be payable as a result of any postponement of the Maturity Date. Any payment on the ETNs is subject to our ability to pay our obligations as they become due. In no event will the payment at maturity be less than zero.

The scheduled Maturity Date is initially February 2, 2033, but may be extended at our option for up to two (2) additional five-year periods. We may only extend the scheduled Maturity Date for five (5) years at a time. If we exercise our option to extend the maturity of the ETNs, we will notify DTC (the holder of the global note for the ETNs) and the trustee at least 45 but not more than 60 calendar days prior to the then scheduled Maturity Date. We will provide such notice to DTC and the trustee in respect of each five-year extension of the scheduled Maturity Date that we choose to effect.

If the Final Indicative Value is zero, the Maturity Redemption Amount will be zero.

The “**Closing Indicative Value**” on the Inception Date was \$20.00 (the “**Initial Indicative Value**”). The Closing Indicative Value on each calendar day following the Inception Date will be calculated by the Index Calculation Agent and will be equal to (1) the Current Principal Amount for such calendar day *plus* (2) for any day on or after the Index Distribution Date but prior to the Ex-Coupon Date for a given month, any accrued but unpaid Coupon Amount. The Closing Indicative Value will never be less than zero. If the Intraday Indicative Value is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value of the ETNs on that day, and all future days, will be zero. The Closing Indicative Value is not the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly

from their Indicative Value at such time. If the ETNs undergo a subsequent split or reverse split, the Closing Indicative Value of the ETNs will be adjusted accordingly (see “Split or Reverse Split of the ETNs”). Such adjustment may adversely affect the trading price and liquidity of the ETNs. Even if the Closing Indicative Value or Intraday Indicative Value is equal to or less than zero at any time, the trading price of the ETNs may remain above zero. Buying the ETNs at such a time will lead to a complete loss of a holder’s investment.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. Since September 27, 2022, the Closing Indicative Value has been expressed in an amount per denomination and stated principal amount of \$400.00 based on the split-adjusted Current Principal Amount.

The “**Current Principal Amount**” on each calendar day following the Inception Date will be equal to (1)(a) the Current Principal Amount on the immediately preceding calendar day times (b) the Daily Index Factor on such calendar day minus (2) the Daily Investor Fee on such calendar day. The Current Principal Amount on the Inception Date was \$20.00.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. For the purposes of determining the Current Principal Amount on September 27, 2022, the Current Principal Amount on September 26, 2022, multiplied by 20 and rounded to 8 decimal places, shall be used in the formula above. Since September 27, 2022, the Current Principal Amount has been expressed in an amount per denomination and stated principal amount of \$400.00.

A “**Business Day**” is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City or London, England generally are authorized or obligated by law, regulation or executive order to close.

A “**Trading Day**” is a day which is (i) an Index Business Day, (ii) an ETN Business Day and (iii) an Index Component Business Day for each of the Index Components.

An “**Index Business Day**” is a day on which the level of the Index is calculated and published.

With respect to any Index Component, an “**Index Component Business Day**” is a day on which trading is generally conducted on any markets on which such Index Component is traded.

An “**ETN Business Day**” is a day on which trading is generally conducted on the New York Stock Exchange, NYSE Arca and NASDAQ.

The “**Daily Index Factor**” on any Index Business Day will equal (a) the Closing Level of the Index on such Index Business Day divided by (b) the Closing Level of the Index on the immediately preceding Index Business Day. The Daily Index Factor is deemed to be one on any day that is not an Index Business Day.

On any calendar day, the “**Daily Investor Fee**” will be equal to the product of (1)(a) the Current Principal Amount on the immediately preceding calendar day times (b) the Daily Index Factor on such calendar day times (2)(a) the Investor Fee Rate divided by (b) 365. The “Investor Fee Rate” will be equal to 0.65%.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. For the purposes of determining the Daily Investor Fee on September 27, 2022, the Current Principal Amount on September 26, 2022, multiplied by 20 and rounded to 8 decimal places, shall be used in the formula above.

The ETNs do not guarantee any return of a holder’s investment. If the level of the Index decreases or does not increase sufficiently to offset the Daily Investor Fee (and in the case of Early Redemption, the Early Redemption Charge) over the term of the ETNs, a holder will receive less, and possibly significantly less, at maturity or upon early redemption or acceleration of the ETNs than the amount of such holder’s investment.

The “**Closing Level**” of the Index on any Trading Day will be the Closing Level published on Bloomberg under the ticker symbol “QGLDI <Index>” or any successor page on Bloomberg or any successor service, as applicable; provided that in the event a Market Disruption Event exists on a Valuation Date, the Calculation Agent will determine the Closing Level of the Index.

Any payment holders will be entitled to receive is subject to our ability to pay our obligations as they become due.

## Payment Upon Early Redemption

Prior to maturity, holders may, subject to certain restrictions described below, offer at least the applicable Minimum Redemption Amount or more of the ETNs to us for redemption on an Early Redemption Date during the term of the ETNs until January 21, 2033 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended). If a holder elects to offer its ETNs for redemption, and the requirements for acceptance by us are met, such holder will be entitled to receive a cash payment per ETN on the Early Redemption Date equal to the Early Redemption Amount. Any payment holders will be entitled to receive on the ETNs is subject to our ability to pay our obligations as they become due.

A holder may exercise its early redemption right by causing its broker or other person with whom such holder holds its ETNs to deliver a Redemption Notice (as defined herein) to Credit Suisse. If such Redemption Notice is delivered prior to 4:00 p.m., New York City time, on any Business Day, the immediately following Trading Day will be the applicable “**Early Redemption Valuation Date**”. Otherwise, the second following Trading Day will be the applicable Early Redemption Valuation Date. See “Procedures for Early Redemption”.

A holder must offer for redemption at least 10,000 ETNs or an integral multiple of 10,000 ETNs in excess thereof at one time in order to exercise its right to cause us to redeem its ETNs on any Early Redemption Date (the “**Minimum Redemption Amount**”); provided that we or CSi as the Calculation Agent may from time to time reduce, in part or in whole, the Minimum Redemption Amount. Any such reduction will be applied on a consistent basis for all holders of the ETNs at the time the reduction becomes effective. If the ETNs undergo a subsequent split or reverse split, the minimum number of ETNs needed to exercise the right to cause us to redeem the ETNs will remain the same.

When a holder submits its ETNs for redemption in accordance with the redemption procedures described herein, such ETNs may remain outstanding (and be resold by us or an affiliate) or may be submitted by us for cancellation.

The “**Early Redemption Date**” is the third Business Day following an Early Redemption Valuation Date.

The “**Early Redemption Charge**” per ETN will equal 0.125% times the Closing Indicative Value on the Early Redemption Valuation Date.

The “**Early Redemption Amount**” is a cash payment per ETN equal to the greater of (A) zero and (B)(1) the Closing Indicative Value on the applicable Early Redemption Valuation Date minus (2) the Early Redemption Charge, calculated by the Calculation Agent.

## Procedures for Early Redemption

If a holder wishes to offer its ETNs to Credit Suisse for redemption, such holder’s broker or other person with whom such holder holds its ETNs must follow the following procedures:

- Deliver a notice of redemption (the “**Redemption Notice**”), to Credit Suisse via email or other electronic delivery as requested by Credit Suisse. If such Redemption Notice is delivered prior to 4:00 p.m., New York City time, on any Business Day, the immediately following Trading Day will be the applicable “**Early Redemption Valuation Date**”. Otherwise, the second following Trading Day will be the applicable Early Redemption Valuation Date. If Credit Suisse receives a holder’s Redemption Notice no later than 4:00 p.m., New York City time, on any Business Day, Credit Suisse will respond by sending its broker an acknowledgment of the Redemption Notice accepting such redemption request by 7:30 p.m., New York City time, on the Business Day prior to the applicable Early Redemption Valuation Date. Credit Suisse or its affiliate must acknowledge to the holder’s broker acceptance of the Redemption Notice in order for such redemption request to be effective;
- Notwithstanding the foregoing, Credit Suisse may, at its option, waive the requirement that the Redemption Notice be delivered as set forth above, if confirmed by Credit Suisse that a written indication of an offer for early redemption has otherwise been accepted by Credit Suisse. Any such written indication that is delivered after 4:00 p.m., New York City time, on any Business Day, will be deemed to have been made on the following Business Day. For the avoidance of doubt, a holder may choose to comply with the procedures set forth above in lieu of the procedures in this clause, irrespective of any waiver by Credit Suisse;
- Cause the holder’s DTC custodian to book a delivery versus payment trade with respect to the ETNs on the applicable Early Redemption Valuation Date at a price equal to the applicable Early Redemption Amount, facing us; and
- Cause the holder’s DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. New York City time, on the applicable Early Redemption Date (the third Business Day following the Early Redemption Valuation Date).

A holder is responsible for (i) instructing or otherwise causing its broker to provide the Redemption Notice and (ii) its broker satisfying the additional requirements as set forth in the second and third bullets above in order for the redemption to be effected. Different

brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, a holder should consult the brokerage firm through which it owns its interest in the ETNs in respect of such deadlines. If Credit Suisse does not (i) receive the Redemption Notice from the relevant holder's broker by 4:00 p.m. and (ii) deliver an acknowledgment of such Redemption Notice to such broker accepting such redemption request by 7:30 p.m., on the Business Day prior to the applicable Early Redemption Valuation Date, such notice will not be effective for such Business Day and Credit Suisse will treat such Redemption Notice as if it was received on the next Business Day. Any redemption instructions for which Credit Suisse receives a valid confirmation in accordance with the procedures described above will be irrevocable after Credit Suisse confirms a holder's offer for early redemption.

Because the Early Redemption Amount a holder will receive for each ETN will not be determined until the close of trading on the applicable Early Redemption Valuation Date, a holder will not know the applicable Early Redemption Amount at the time such holder exercises its redemption right and will bear the risk that its ETNs will decline in value between the time of such holder's exercise and the time at which the Early Redemption Amount is determined.

#### **Acceleration at Our Option or Upon an Acceleration Event**

We have the right to accelerate the ETNs in whole or in part on any Business Day occurring on or after the Inception Date (an "**Optional Acceleration**"). In addition, if an Acceleration Event (as defined herein) occurs at any time with respect to the ETNs, we will have the right to accelerate all or any portion of the outstanding ETNs (an "**Event Acceleration**"). Upon an acceleration of all of the outstanding ETNs, holders will be entitled to receive a cash payment per ETN in an amount (the "**Accelerated Redemption Amount**") equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of such ETNs during the Accelerated Valuation Period. If fewer than all of the outstanding ETNs are accelerated, the Accelerated Redemption Amount will be the Closing Indicative Value on the Accelerated Valuation Date. If less than all the ETNs are to be redeemed pursuant to an Optional Acceleration or an Event Acceleration, the trustee shall select, pro rata, by lot or in such manner as it deems appropriate and fair, the ETNs to be redeemed pursuant to such acceleration. ETNs may be accelerated in part in multiples of 10,000 ETNs, or an integral multiple of 10,000 ETNs in excess thereof. We will provide at least five (5) Business Days' notice of any ETNs to be accelerated and, in the case of any ETNs selected for partial redemption, the stated principal amount thereof to be redeemed. All provisions relating to the acceleration of the ETNs to be redeemed only in part, relate to the portion of the stated principal amount of ETNs which has been or is to be redeemed pursuant to these acceleration provisions.

In the case of an Optional Acceleration of all outstanding ETNs, the "**Accelerated Valuation Period**" shall be a period of five (5) consecutive Trading Days specified in our notice of Optional Acceleration, the first Trading Day of which shall be at least two (2) Business Days after the date on which we give notice of such Optional Acceleration. In the case of an Event Acceleration of all outstanding ETNs, the "Accelerated Valuation Period" shall be a period of five (5) consecutive Trading Days, the first Trading Day of which shall be the day on which we give notice of such Event Acceleration (or, if such day is not a Trading Day, the next following Trading Day). In the case of an acceleration of less than all outstanding ETNs, the "**Accelerated Valuation Date**" will be the first Trading Day following the date of our notice of acceleration. The Accelerated Redemption Amount will be payable on the third Business Day following the Accelerated Valuation Date or the third Business Day following the last Trading Day in the Accelerated Valuation Period as the case may be (such date the "**Acceleration Date**"). We will give notice of any acceleration of the ETNs through customary channels used to deliver notices to holders of exchange traded notes.

Any payment holders will be entitled to receive is subject to our ability to pay our obligations as they become due.

An "**Acceleration Event**" means:

- (a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located that (i) makes it illegal for CSi to hold, acquire or dispose of options or futures contracts relating to the Index or the GLD Shares or options, futures, swaps or other derivatives on the Index, the GLD Shares or the Options (including but not limited to exchange-imposed position limits), (ii) shall materially increase the cost to the Issuer, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the ETNs, (iii) shall have a material adverse effect on any of these parties' ability to perform their obligations in connection with the ETNs or (iv) shall materially affect our ability to issue or transact in exchange traded notes similar to the ETNs, each as determined by us or CSi, as the Calculation Agent;
- (b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after the Inception Date that (i) makes it illegal for CSi to hold, acquire or dispose of options or futures contracts relating to the Index or the GLD Shares or options, futures, swaps or other derivatives on the Index or the futures contracts relating to the Index, the GLD Shares or the Options (including but not limited to exchange-imposed position limits), (ii) shall materially increase the cost to the Issuer, our affiliates, third parties with

whom we transact or similarly situated third parties in performing our or their obligations in connection with the ETNs, (iii) shall have a material adverse effect on the ability of the Issuer, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the ETNs or (iv) shall materially affect our ability to issue or transact in exchange traded notes similar to the ETNs, each as determined by us or CSI, as the Calculation Agent;

- (c) any event that occurs on or after the Inception Date that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for CSI to hold, acquire or dispose of options contracts relating to the Index or the GLD Shares or options, futures, swaps or other derivatives on the Index, the GLD Shares or the Options (including but not limited to exchange-imposed position limits), (ii) for the Issuer, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the ETNs or (iii) for us to issue or transact in exchange traded notes similar to the ETNs, each as determined by us or CSI, as the Calculation Agent;
- (d) any event, as determined by us or CSI, as the Calculation Agent, that we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the ETNs, or realize, recover or remit the proceeds of any such transaction or asset;
- (e) if at any point, the Intraday Indicative Value is equal to or less than five percent (5%) of the prior day's Closing Indicative Value of such ETNs; or
- (f) as determined by the Calculation Agent, the primary exchange or market for trading for the ETNs, if any, announces that pursuant to the rules of such exchange or market, as applicable, the ETNs cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

**“Primary Exchange”** means the primary exchange on which options or futures contracts relating to the Index or the GLD Shares are traded, as determined by the Calculation Agent, which is initially the Chicago Board Options Exchange (CBOE).

**“Related Exchange”** means each exchange or quotation system where trading has a material effect (as determined by the Calculation Agent) for the overall market for futures or options contracts relating to the Index or the GLD Shares.

#### **Market Disruption Events**

The Calculation Agent will be solely responsible for the determination and calculation of any adjustments to any Index Component and of any related determinations and calculations with respect to any event described below and its determinations and calculations will be conclusive absent manifest error.

A **“Market Disruption Event”** is:

- (a) the occurrence or existence of a suspension, absence or material limitation of trading of the Index Components on the relevant exchange for such Index Component for more than two hours of trading or during the one-half hour period preceding the close of the principal trading session on such relevant exchange;
- (b) a breakdown or failure in the price and trade reporting systems of the relevant exchange for any Index Component, as a result of which the reported trading prices for the Index Component during the last one-half hour preceding the close of the principal trading session on such relevant exchange are materially inaccurate;
- (c) the occurrence or existence of a suspension, absence or material limitation of trading on the primary related exchange or market for trading in futures or options contracts related to any Index Component for more than two hours of trading during, or during the one-half hour period preceding the close of the principal trading session for such related exchange or market;
- (d) a decision to permanently discontinue trading in those related futures or options contracts; or
- (e) failure of the Index Calculation Agent to publish the level of the Index, including as a result of any disruption of the Index Components;

in each case, as determined by the Calculation Agent in its sole discretion; and in each case a determination by the Calculation Agent in its sole discretion that any event described above materially interfered with our ability or the ability of any of our affiliates to effect transactions in the Index Component or any instrument related to the Index Component or to adjust or unwind all or a material portion of any hedge position in the Index Component with respect to the ETNs.

For the purpose of determining whether a market disruption event in respect of an Index Component has occurred:

- (a) a limitation on the hours or number of days of trading will not constitute a market disruption event if it results from an announced change in the regular business hours of the relevant exchange for such Index Component or the primary related exchange or market for trading in futures or options contracts related to such Index Component;
- (b) limitations pursuant to NYSE Rule 80B (or any applicable rule or regulation enacted or promulgated by the NYSE, any other U.S. self-regulatory organization, the SEC or any other relevant authority of scope similar to NYSE Rule 80B) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading; and
- (c) a suspension of trading in futures or options contracts related to such Index Component by the primary related exchange or market for trading in such contracts, if available, by reason of:
  - (i) a price change exceeding limits set by such exchange or market;
  - (ii) an imbalance of orders relating to such contracts; or
  - (iii) a disparity in bid and ask quotes relating to such contracts;
 will, in each such case, constitute a suspension, absence or material limitation of trading in futures or options contracts related to such Index Component; and
- (d) a “suspension, absence or material limitation of trading” on the primary related exchange or market on which futures or options contracts related to such Index Component are traded will not include any time when such exchange or market is itself closed for trading under ordinary circumstances;

in each case, as determined by the Calculation Agent in its sole discretion.

If the Calculation Agent determines that a Market Disruption Event occurs or is continuing on any Valuation Date (including, without limitation, the Final Valuation Date, the Early Redemption Valuation Date, or any Valuation Date in the Accelerated Valuation Period or Final Valuation Period), that Valuation Date will be postponed until the first Trading Day on which no Market Disruption Event occurs or is continuing, unless a Market Disruption Event occurs or is continuing for each of the five (5) Trading Days following the applicable scheduled Valuation Date. In that case, the fifth Trading Day following the applicable scheduled Valuation Date shall be deemed to be the applicable Valuation Date, notwithstanding the fact that a Market Disruption Event occurred or was continuing on such Trading Day, and the Calculation Agent will determine the applicable Closing Indicative Value using an appropriate Closing Level of the Index on that deemed Valuation Date taking into account the nature and duration of such Market Disruption Event. If any Valuation Date in the Accelerated Valuation Period or Final Valuation Period is postponed as described above, each subsequent Valuation Date in the Accelerated Valuation Period or Final Valuation Period will be postponed by the same number of Trading Days. In addition, if the Final Valuation Date, the Valuation Date corresponding to an Early Redemption Date or the last scheduled Valuation Date in the Accelerated Valuation Period is postponed, the Maturity Date, the corresponding Early Redemption Date or the Acceleration Date, as the case may be, will be postponed until the date three (3) Business Days following such Valuation Date, as postponed.

#### **Default Amount on Acceleration**

For the purpose of determining whether the holders of our senior medium-term notes, of which the ETNs are a part, are entitled to take any action under the indenture, we will treat the stated principal amount of each ETN outstanding as the stated principal amount of that ETN. Although the terms of the ETNs may differ from those of the other senior medium-term notes, holders of specified percentages in stated principal amount of all senior medium-term notes, together in some cases with other series of our debt securities, will be able to take action affecting all the senior medium-term notes, including the ETNs. This action may involve changing some of the terms that apply to the senior medium-term notes, accelerating the maturity of the senior medium-term notes after a default or waiving some of our obligations under the indenture.

In case an event of default with respect to ETNs shall have occurred and be continuing, the amount declared due and payable upon any acceleration of the ETNs will be determined by the Calculation Agent, and will equal, for each ETN that a holder then holds, the Closing Indicative Value determined by the Calculation Agent occurring on the Trading Day following the date on which the ETNs were declared due and payable.

#### **Further Issuances**

We may, from time to time, without notice to or the consent of the holders of the ETNs, create and issue additional securities having the same terms and conditions as the ETNs, and ranking on an equal basis with the ETNs in all respects.

#### **Discontinuation or Modification of the Index**

If the Index Sponsors discontinue publication of the Index and the Index Sponsors or anyone else publishes a substitute index that the Calculation Agent determines is comparable to the Index, then the Calculation Agent will permanently replace the original Index

with that substitute index (the “**Successor Index**”) for all purposes, and all provisions described herein as applying to the Index will thereafter apply to the Successor Index instead. If the Calculation Agent replaces the original Index with a Successor Index, then the Calculation Agent will determine the Early Redemption Amount, Accelerated Redemption Amount or Maturity Redemption Amount (each, a “**Redemption Amount**”) and the Coupon Amount, as applicable, by reference to the Successor Index.

If the Calculation Agent determines that the publication of the Index is discontinued and there is no successor index, the Calculation Agent will determine the level of the Index, and thus the applicable Redemption Amount, by a computation methodology that the Calculation Agent determines will as closely as reasonably possible replicate the Index.

If the Calculation Agent determines that the Index, the Options or the method of calculating the Index is changed at any time in any respect, including whether the change is made by the Index Sponsors under their existing policies or following a modification of those policies, is due to the publication of a successor index, is due to events affecting the GLD Shares or the Options, or is due to any other reason and is not otherwise reflected in the level of the Index by the Index Sponsors pursuant to the Index methodology, then the Calculation Agent will be permitted (but not required) to make such adjustments in the Index or the method of its calculation as it believes are appropriate to ensure that the Closing Level of the Index used to determine the applicable Redemption Amount is equitable.

### **Manner of Payment and Delivery**

Any payment on or delivery of the ETNs at maturity will be made to accounts designated by holders and approved by us, or at the office of the trustee in New York City, but only when the ETNs are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depository.

### **Role of the Calculation Agent**

Credit Suisse International (“**CSI**”), an affiliate of ours and the Calculation Agent, will, in its reasonable discretion, make certain calculations and determinations that may impact the value of the ETNs, including determination of the arithmetic average of the Closing Indicative Values where applicable, a split or reverse split of the ETNs, calculation of default amounts, Market Disruption Events, any Successor Index, Business Days and Trading Days, the Current Principal Amount, the Daily Investor Fee amount, the Daily Index Factor, the Coupon Amount, the Closing Level of the Index on any Trading Day, the Maturity Date, any Early Redemption Dates, the Acceleration Date, the amount payable in respect of a holder’s ETNs at maturity, upon early redemption or acceleration and any other calculations or determinations to be made by the Calculation Agent as specified herein.

If the Calculation Agent ceases to perform its role, we will either, at our sole discretion, perform such role, appoint another party to do so or accelerate the ETNs.

We may appoint a different Calculation Agent from time to time without consent and without notifying holders.

### **Role of the Index Calculation Agent**

We have initially appointed NASDAQ OMX as an Index Calculation Agent. The Index Calculation Agent will have the sole responsibility to calculate and disseminate the Closing Indicative Value and the Intraday Indicative Value of the ETNs. The Index Sponsors may appoint a different Index Calculation Agent from time to time without consent and without notifying holders.

### **Description of Credit Suisse X-Links Silver Shares Covered Call ETNs due April 21, 2033**

*Defined terms used within this subsection are defined only with respect to the ETNs listed in the subsection heading above and described within this subsection.*

### **General**

The return on the Credit Suisse X-Links Silver Shares Covered Call ETNs due April 21, 2033 (“**ETNs**”) will be based on the performance of the Credit Suisse NASDAQ Silver FLOWST<sup>™</sup> 106 Index (the “**Index**”), as reflected by their Indicative Value, calculated

as set forth below. The Index measures the return of a “covered call” strategy on the shares of the iShares<sup>®</sup> Silver Trust (the “**SLV Shares**”) by reflecting changes in the price of the SLV Shares and the notional option premiums received from the notional sale of monthly call options on the SLV Shares less notional transaction costs incurred in connection with the covered call strategy. The Index strategy consists of a hypothetical notional portfolio that takes a “long” position in SLV Shares and sells a succession of notional, approximately one-month, call options on the SLV Shares with a strike price of approximately 106% of the price of the SLV Shares exercisable on the option expiration date (the “**Options**” and together with the long position in SLV Shares, the “**Index Components**”). The notional sale of the Options is “covered” by the notional long position in the SLV Shares. The long position in the SLV Shares and the “short” call options are held in equal notional amounts (i.e., the short position in each Option is “covered” by the long position in the SLV Shares). This strategy is intended to provide exposure to silver through the notional positions in the SLV Shares and the Options that seeks to (i) generate periodic cash flows that a direct long-only ownership position in the SLV Shares would not, (ii) provide a limited offset to losses from downside market performance in the SLV Shares via the cash flows from option premiums and (iii) provide limited potential upside participation in the performance of the SLV Shares. The level of the Index on any day reflects the value of the notional long position in the SLV Shares and the notional Option premium, reduced based on the value of the Options then outstanding. The ETNs will not participate in the potential upside of the SLV Shares beyond the applicable strike price of the Options and notional transaction costs. The Index is subject to the policies of CSI and Nasdaq, Inc. (the “**Index Sponsors**”) and is subject to the Index Sponsors’ discretion, including with respect to the implementation of, and changes to, the rules governing the Index methodology.

### **Inception, Issuance and Maturity**

The initial issuance of ETNs priced on April 16, 2013 (the “**Inception Date**”) and settled on April 19, 2013 (the “**Initial Settlement Date**”). The “**Maturity Date**” is initially April 21, 2033, but the maturity of the ETNs may be extended at our option for up to two additional five-year periods, as described herein.

### **Intraday Indicative Value**

The “**Intraday Indicative Value**” of the ETNs is designed to reflect the economic value of the ETNs at a given time. The Intraday Indicative Value of the ETNs will be calculated and published by the Index Calculation Agent every fifteen (15) seconds on each Trading Day during normal trading hours so long as no Market Disruption Event has occurred or is continuing and will be disseminated over the consolidated tape or other major market data vendor. The Intraday Indicative Value of the ETNs at any time is based on the most recent intraday level of the Index. It is calculated using the same formula as the Closing Indicative Value, except that instead of using the Closing Level of the Index, the calculation is based on the most recent reported level of the Index at the particular time (or, if the day on which such time occurs is not a Trading Day, as determined by the Calculation Agent).

At any time at which a Market Disruption Event has occurred and is continuing, there shall be no Intraday Indicative Value. If the Intraday Indicative Value of the ETNs is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value of the ETNs on that day, and all future days, will be zero.

Neither the Intraday Indicative Value nor the Closing Indicative Value calculation is intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption, acceleration or termination of a holder’s ETNs, nor will it reflect hedging or transaction costs, credit considerations, market liquidity or bid-offer spreads. The Index Calculation Agent is responsible for computing and disseminating the ETN’s Indicative Values. Published levels of the Index from the Index Calculation Agent may occasionally be subject to delay or postponement. Any such delays or postponements will affect the current level of the Index and therefore the Intraday Indicative Value of the ETNs. The actual trading price of the ETNs may be different from their Intraday Indicative Value or Closing Indicative Value.

The actual trading price of the ETNs at any time may vary significantly from the Intraday Indicative Value at such time. The trading price of the ETNs at any time is the price that holders may be able to buy or sell their ETNs in the secondary market at such time, if one exists.

The trading price of the ETNs at any time is the price at which a holder may be able to buy or sell its ETNs in the secondary market at such time, if one exists. In the absence of an active secondary market for the ETNs, the last reported trading price may not reflect the actual price at which a holder may be able to buy or sell its ETNs at a particular time. The trading price of the ETNs at any time may vary significantly from their Indicative Value at such time due to, among other things, imbalances of supply and demand, lack of liquidity, transaction costs, credit considerations and bid-offer spreads.

The closing price of the ETNs will be published on each Trading Day under the ticker symbol “SLVO”. Any premium or discount may be reduced or eliminated at any time. Paying a premium purchase price of the ETNs over the Intraday Indicative Value or the Closing Indicative Value of the ETNs could lead to significant losses in the event holders sell their ETNs at a time when such premium is no longer present in the market place or such ETNs are redeemed by us (including pursuant to an acceleration at our option), in which case holders will be entitled to receive a cash payment based on the Closing Indicative Value on the relevant Valuation Date(s).

The ETNs may be redeemed or accelerated at any time, subject to the conditions described herein.

As discussed in “Payment Upon Early Redemption” below, a holder may, subject to certain restrictions, provide a Redemption Notice on any Business Day during the term of the ETNs beginning on April 17, 2013 through April 7, 2033 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended) (for an anticipated April 8, 2033 Early Redemption Valuation Date and an anticipated Early Redemption Date of April 13, 2033 or, if the maturity of the ETNs is extended, an Early Redemption Valuation Date four (4) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended, and an Early Redemption Date one scheduled Business Day prior to the scheduled Final Valuation Date, as extended). If a holder elects to offer its ETNs to Credit Suisse for redemption, such holder must offer at least the applicable Minimum Redemption Amount at one time for redemption on any Early Redemption Date.

In addition, we have the right to accelerate the ETNs in whole or in part at any time on any Business Day occurring on or after the Inception Date or upon the occurrence of certain events described herein. Upon an acceleration of all of the outstanding ETNs, holders will be entitled to receive a cash payment per ETN in an amount (the “**Accelerated Redemption Amount**”) equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of such ETNs during the Accelerated Valuation Period. If fewer than all of the outstanding ETNs are accelerated, the Accelerated Redemption Amount will be the Closing Indicative Value on the Accelerated Valuation Date. If less than all the ETNs are to be redeemed pursuant to an Optional Acceleration or an Event Acceleration, the trustee shall select, pro rata, by lot or in such manner as it deems appropriate and fair, the ETNs to be redeemed pursuant to such acceleration. ETNs may be accelerated in part in multiples of 10,000 ETNs, or an integral multiple of 10,000 ETNs in excess thereof.

The last date on which Credit Suisse will redeem the ETNs at a holder’s option will be April 13, 2033 (or, if the maturity of the ETNs is extended, one scheduled Business Day prior to the scheduled Maturity Date, as extended). As such, a holder must offer its ETNs for redemption no later than April 7, 2033 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended). The daily redemption feature is intended to induce arbitrageurs to counteract any trading of the ETNs at a premium or discount to their Indicative Value, although there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

### **Indicative Value**

The Indicative Value of the ETNs is the Intraday Indicative Value or the Closing Indicative Value of the ETNs, as applicable.

### **Split or Reverse Split of the ETNs**

The Calculation Agent may initiate a split or reverse split of the ETNs on any Trading Day. If the Calculation Agent decides to initiate a split or reverse split, the Calculation Agent will issue a notice to holders of the ETNs and a press release announcing the split or reverse split, specifying the effective date of the split or reverse split. The Calculation Agent will determine the ratio of such split or reverse split, as the case may be, using relevant market indicia, and will adjust the terms of the ETNs accordingly. Any adjustment of the closing value will be rounded to 8 decimal places.

In the case of a reverse split, we reserve the right to address odd numbers of ETNs (commonly referred to as “**partials**”) in a manner determined by the Calculation Agent in its sole discretion. A split or reverse split of the ETNs will not affect the aggregate stated principal amount of ETNs held by an investor, other than to the extent of any “partial” ETNs, but it will affect the number of ETNs an investor holds, the denominations used for trading purposes on the exchange and the trading price, and may affect the liquidity, of the ETNs on the exchange.

If the ETNs undergo a subsequent split or reverse split, the Current Principal Amount, Closing Indicative Value and Intraday Indicative Value of the ETNs will be adjusted accordingly.

Neither the Closing Indicative Value nor the Intraday Indicative Value is the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from the Closing Indicative Value and Intraday Indicative Value of the ETNs at such time.

Credit Suisse implemented a 1-for-20 reverse split, effective September 27, 2022.

### **Coupon Amount**

On each Coupon Payment Date, for each \$400.00 stated principal amount ETN, holders on the Coupon Record Date will be entitled to receive a variable cash payment equal to the Closing Indicative Value on the Index Business Day immediately preceding the relevant Index Distribution Date multiplied by the Coupon Percentage for that Index Distribution Date. The Coupon will be paid on the Coupon Payment Date to the holder of record on the applicable Coupon Record Date. No Coupon Amount will be due or payable in the event a holder elects to offer its ETNs for early redemption or we accelerate the maturity of the ETNs.

The Coupon Percentage in respect of an Index Distribution Date will be the Distribution for such Index Distribution Date divided by the Closing Level of the Index the Index Business Day immediately preceding the Index Distribution Date. The Distribution represents the notional monthly call premium earned on the sale of the call options written on the SLV Shares during the immediately preceding Index Rebalancing Period pursuant to the Index methodology.

The premiums generated from the notional sales of the Options will be subtracted monthly from the Index and paid to holders of the ETNs in the form of a Coupon Amount, the amount of which is determined based on the notional premiums received from the sale of the Options during the preceding Rebalancing Period as described below.

The “**Index Rebalancing Period**” refers to the five (5) consecutive Index Calculation Days beginning on and including the Index Calculation Day that is ten (10) calendar days prior to the Expiry Date (as defined below) of the relevant Options (each, a “**Roll Date**”). The Index will be rebalanced at the end of each Roll Date in accordance with the following steps:

- First, on the Index Calculation Day preceding the first Roll Date of each month, the strike price of the new Option is determined. The strike price will be the lowest listed strike price that is above 106% of the price per Share as of the 4:00 p.m. New York City time on such date of determination. Then, the Index will roll its monthly exposure over the next five (5) consecutive Index Calculation Days. The roll percentage is the proportion of the expiring position being rolled into a new position on each Roll Date.
- At the end of the first Roll Date, and on each successive Roll Date of such Index Rebalancing Period, the Index will notionally sell the new Option. Additionally, as of the end of each such Roll Date, the Index will hypothetically close out through repurchase 20% (or such greater amount in the event of roll disruptions) of the Options notionally sold during the previous Index Rebalancing Period (the expiring Options); the Index will notionally liquidate SLV Shares Units in an amount sufficient to fund the notional repurchase.
- Finally, on the last Roll Date of such Index Rebalancing Period, the Index will determine the amount of the notional Option premium, which will, on the close of the last Roll Date of the next following Index Rebalancing Period, be subtracted from the Index as a Distribution and paid to holders of the ETNs in the form of the Coupon Amount.

An Index Distribution Date will be the date on which the Distribution is subtracted from the level of the Index pursuant to the rules of the Index, which will occur on the last Roll Date of a given Index Rebalancing Period.

The Coupon Amount is calculated by reference to the notional Distribution from the Index, which will decrease the level of the Index (and therefore the value of the ETNs), as the Distribution comes directly from the notional portfolio reflected by the Index Components. When the Distribution is deducted from the Index on the Index Distribution Date, the Coupon Amount will be added to the Closing Indicative Value and the Intraday Indicative Value of the ETNs. At the market opening on the Ex-Coupon Date, the ETNs will trade on an ex-coupon basis, adjusted for the Coupon Amount, meaning that the Coupon Amount will no longer be included in the Closing Indicative Value or the Intraday Indicative Value of the ETNs. For a holder to receive the upcoming Coupon Amount, the holder must own the ETNs on the Coupon Record Date.

The “**Ex-Coupon Date**” means, with respect to each Coupon Amount, the first Trading Day on which the ETNs trade without the right to receive such Coupon Amount.

### **Denomination**

Prior to September 27, 2022, the denomination and stated principal amount of each ETN was \$20.00. Credit Suisse implemented a 1-for-20 reverse split of the ETNs, effective September 27, 2022. As of September 27, 2022, the denomination and stated principal

amount of each ETN is \$400.00. ETNs may be issued at a price that is higher or lower than the stated principal amount, based on the Indicative Value of the ETNs at that time.

### **Payment at Maturity**

At maturity, holders of the ETNs will be entitled to receive a cash payment on April 21, 2033 (the “**Maturity Date**”) (or, if the maturity of the ETNs is extended, on the scheduled Maturity Date, as extended) that is linked to the percentage change in the Closing Level of the Index from the Inception Date to the Closing Level calculated on the Final Valuation Date. Such holder’s cash payment at maturity will be equal to the “**Final Indicative Value**”, which will be the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Value on each of the immediately preceding five (5) Trading Days to and including the Final Valuation Date (the “**Final Valuation Period**”). We refer to the amount of such payment as the “**Maturity Redemption Amount**”. If the scheduled Maturity Date is not a Business Day, the Maturity Date will be postponed to the first Business Day following the scheduled Maturity Date. If the scheduled Final Valuation Date is not a Trading Day, the Final Valuation Date will be postponed to the next following Trading Day, in which case the Maturity Date will be postponed to the third Business Day following the Final Valuation Date as so postponed. In addition, if a Market Disruption Event occurs or is continuing on the Final Valuation Date, the Maturity Date will be postponed until the date three (3) Business Days following the Final Valuation Date, as postponed. No interest or additional payment will accrue or be payable as a result of any postponement of the Maturity Date. Any payment on the ETNs is subject to our ability to pay our obligations as they become due. In no event will the payment at maturity be less than zero.

The scheduled Maturity Date is initially April 21, 2033, but may be extended at our option for up to two (2) additional five-year periods. We may only extend the scheduled Maturity Date for five (5) years at a time. If we exercise our option to extend the maturity of the ETNs, we will notify DTC (the holder of the global note for the ETNs) and the trustee at least 45 but not more than 60 calendar days prior to the then scheduled Maturity Date. We will provide such notice to DTC and the trustee in respect of each five-year extension of the scheduled Maturity Date that we choose to effect.

If the Final Indicative Value is zero, the Maturity Redemption Amount will be zero.

The “**Closing Indicative Value**” on the Inception Date was \$20.00 (the “**Initial Indicative Value**”). The Closing Indicative Value on each calendar day following the Inception Date will be calculated by the Index Calculation Agent and will be equal to (1) the Current Principal Amount for such calendar day plus (2) for any day on or after the Index Distribution Date but prior to the Ex-Coupon Date for a given month, any accrued but unpaid Coupon Amount. The Closing Indicative Value will never be less than zero. If the Intraday Indicative Value is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value on that day, and all future days, will be zero. The Closing Indicative Value is not the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from their Indicative Value at such time. If the ETNs undergo a subsequent split or reverse split, the Closing Indicative Value of the ETNs will be adjusted accordingly (see “**Split or Reverse Split of the ETNs**”). Such adjustment may adversely affect the trading price and liquidity of the ETNs. Even if the Closing Indicative Value or Intraday Indicative Value is equal to or less than zero at any time, the trading price of the ETNs may remain above zero. Buying the ETNs at such a time will lead to a complete loss of a holder’s investment.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. Since September 27, 2022, the Closing Indicative Value has been expressed in an amount per denomination and stated principal amount of \$400.00 based on the split-adjusted Current Principal Amount.

The “**Current Principal Amount**” on each calendar day following the Inception Date will be equal to (1)(a) the Current Principal Amount on the immediately preceding calendar day times (b) the Daily Index Factor on such calendar day minus (2) the Daily Investor Fee on such calendar day. The Current Principal Amount on the Inception Date was \$20.00.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. For the purposes of determining the Current Principal Amount on September 27, 2022, the Current Principal Amount on September 26, 2022, multiplied by 20 and rounded to 8 decimal places, shall be used in the formula above. Since September 27, 2022, the Current Principal Amount has been expressed in an amount per denomination and stated principal amount of \$400.00.

A “**Business Day**” is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City or London, England generally are authorized or obligated by law, regulation or executive order to close.

A “**Trading Day**” is a day which is (i) an Index Business Day, (ii) an ETN Business Day and (iii) an Index Component Business Day for each of the Index Components.

An “**Index Business Day**” is a day on which the level of the Index is calculated and published.

With respect to any Index Component, an “**Index Component Business Day**” is a day on which trading is generally conducted on any markets on which such Index Component is traded.

An “**ETN Business Day**” is a day on which trading is generally conducted on the New York Stock Exchange, NYSE Arca and Nasdaq.

The “**Daily Index Factor**” on any Index Business Day will equal (a) the Closing Level of the Index on such Index Business Day divided by (b) the Closing Level of the Index on the immediately preceding Index Business Day. The Daily Index Factor is deemed to be one on any day that is not an Index Business Day.

On any calendar day, the “**Daily Investor Fee**” will be equal to the product of (1)(a) the Current Principal Amount on the immediately preceding calendar day times (b) the Daily Index Factor on such calendar day times (2)(a) the Investor Fee divided by (b) 365. The “Investor Fee” will be equal to 0.65%.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. For the purposes of determining the Daily Investor Fee on September 27, 2022, the Current Principal Amount on September 26, 2022, multiplied by 20 and rounded to 8 decimal places, shall be used in the formula above.

The ETNs do not guarantee any return of a holder’s investment. If the level of the Index decreases or does not increase sufficiently to offset the Daily Investor Fee (and in the case of Early Redemption, the Early Redemption Charge) over the term of the ETNs, a holder will receive less, and possibly significantly less, at maturity or upon early redemption or acceleration of the ETNs than the amount of such holder’s investment.

The “**Closing Level**” of the Index on any Trading Day will be the Closing Level published on Bloomberg under the ticker symbol “**QSLVO <Index>**” or any successor page on Bloomberg or any successor service, as applicable; provided that in the event a Market Disruption Event exists on a Valuation Date, the Calculation Agent will determine the Closing Level of the Index.

Any payment holders will be entitled to receive is subject to our ability to pay our obligations as they become due.

#### **Payment Upon Early Redemption**

Prior to maturity, a holder may, subject to certain restrictions described below, offer at least the applicable Minimum Redemption Amount or more of its ETNs to us for redemption on an Early Redemption Date during the term of the ETNs until April 7, 2033 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended). If a holder elects to offer its ETNs for redemption, and the requirements for acceptance by us are met, such holder will be entitled to receive a cash payment per ETN on the Early Redemption Date equal to the Early Redemption Amount. Any payment holders will be entitled to receive on the ETNs is subject to our ability to pay our obligations as they become due.

A holder may exercise its early redemption right by causing its broker or other person with whom such holder holds its ETNs to deliver a Redemption Notice (as defined herein) to Credit Suisse. If such Redemption Notice is delivered prior to 4:00 p.m., New York City time, on any Business Day, the immediately following Trading Day will be the applicable “**Early Redemption Valuation Date**”. Otherwise, the second following Trading Day will be the applicable Early Redemption Valuation Date. See “Procedures for Early Redemption”.

A holder must offer for redemption at least 10,000 ETNs or an integral multiple of 10,000 ETNs in excess thereof at one time in order to exercise the right to cause us to redeem such holder’s ETNs on any Early Redemption Date (the “**Minimum Redemption Amount**”); provided that we or CSi as the Calculation Agent may from time to time reduce, in part or in whole, the Minimum Redemption Amount. Any such reduction will be applied on a consistent basis for all holders of the ETNs at the time the reduction becomes effective. If the ETNs undergo a subsequent split or reverse split, the minimum number of ETNs needed to exercise the right to cause us to redeem the ETNs will remain the same.

When a holder submits its ETNs for redemption in accordance with the redemption procedures described herein, such ETNs may remain outstanding (and be resold by us or an affiliate) or may be submitted by us for cancellation.

The “**Early Redemption Date**” is the third Business Day following an Early Redemption Valuation Date.

The “**Early Redemption Charge**” will equal up to 0.125% times the Closing Indicative Value on the Early Redemption Valuation Date.

The “**Early Redemption Amount**” is a cash payment per ETN equal to the greater of (A) zero and (B)(1) the Closing Indicative Value on the applicable Early Redemption Valuation Date minus (2) the Early Redemption Charge, if applicable, calculated by the Calculation Agent.

### **Procedures for Early Redemption**

If a holder wishes to offer its ETNs to Credit Suisse for redemption, such holder’s broker or other person with whom such holder holds its ETNs must follow the following procedures:

- Deliver a notice of redemption (the “**Redemption Notice**”), to Credit Suisse via email or other electronic delivery as requested by Credit Suisse. If such Redemption Notice is delivered prior to 4:00 p.m., New York City time, on any Business Day, the immediately following Trading Day will be the applicable “**Early Redemption Valuation Date**”. Otherwise, the second following Trading Day will be the applicable Early Redemption Valuation Date. If Credit Suisse receives such Redemption Notice no later than 4:00 p.m., New York City time, on any Business Day, Credit Suisse will respond by sending such holder’s broker an acknowledgment of the Redemption Notice accepting such redemption request by 7:30 p.m., New York City time, on the Business Day prior to the applicable Early Redemption Valuation Date. Credit Suisse or its affiliate must acknowledge to such holder’s broker acceptance of the Redemption Notice in order for such redemption request to be effective;
- Notwithstanding the foregoing, Credit Suisse may, at its option, waive the requirement that the Redemption Notice be delivered as set forth above, if confirmed by Credit Suisse that a written indication of an offer for early redemption has otherwise been accepted by Credit Suisse. Any such written indication that is delivered after 4:00 p.m., New York City time, on any Business Day, will be deemed to have been made on the following Business Day. For the avoidance of doubt, a holder may choose to comply with the procedures set forth above in lieu of the procedures in this clause, irrespective of any waiver by Credit Suisse;
- Cause the holder’s DTC custodian to book a delivery versus payment trade with respect to the ETNs on the applicable Early Redemption Valuation Date at a price equal to the applicable Early Redemption Amount, facing us; and
- Cause the holder’s DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. New York City time, on the applicable Early Redemption Date (the third Business Day following the Early Redemption Valuation Date).

A holder is responsible for (i) instructing or otherwise causing its broker to provide the Redemption Notice and (ii) its broker satisfying the additional requirements as set forth in the second and third bullets above in order for the redemption to be effected. Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, a holder should consult the brokerage firm through which it owns its interest in the ETNs in respect of such deadlines. If Credit Suisse does not (i) receive the Redemption Notice from the relevant holder’s broker by 4:00 p.m. and (ii) deliver an acknowledgment of such Redemption Notice to such holder’s broker accepting such redemption request by 7:30 p.m., on the Business Day prior to the applicable Early Redemption Valuation Date, such notice will not be effective for such Business Day and Credit Suisse will treat such Redemption Notice as if it was received on the next Business Day. Any redemption instructions for which Credit Suisse receives a valid confirmation in accordance with the procedures described above will be irrevocable after Credit Suisse confirms a holder’s offer for early redemption.

Because the Early Redemption Amount a holder will receive for each ETN will not be determined until the close of trading on the applicable Early Redemption Valuation Date, a holder will not know the applicable Early Redemption Amount at the time such holder exercises its redemption right and will bear the risk that its ETNs will decline in value between the time of such holder’s exercise and the time at which the Early Redemption Amount is determined.

### **Acceleration at Our Option or Upon an Acceleration Event**

We have the right to accelerate the ETNs in whole or in part on any Business Day occurring on or after the Inception Date (an “**Optional Acceleration**”). In addition, if an Acceleration Event (as defined herein) occurs at any time with respect to the ETNs, we will have the right to accelerate all or any portion of the outstanding ETNs (an “**Event Acceleration**”). Upon an acceleration of all of the outstanding ETNs, holders will be entitled to receive a cash payment per ETN in an amount (the “**Accelerated Redemption Amount**”) equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of such ETNs during the Accelerated Valuation Period. If fewer than all of the outstanding ETNs are accelerated, the Accelerated Redemption Amount will be the Closing Indicative Value on the Accelerated Valuation Date. If less than all the ETNs are to be redeemed pursuant to an Optional Acceleration or an Event Acceleration, the trustee shall select, pro rata, by lot or in such manner as it deems appropriate and fair, the ETNs to be redeemed pursuant to such acceleration. ETNs may be accelerated in part in multiples of 10,000 ETNs, or an integral multiple of 10,000 ETNs in excess thereof. We will provide at least five (5) Business Days’ notice of any ETNs to be accelerated and, in the case of any ETNs selected for partial redemption, the stated principal amount thereof to be redeemed. All

provisions relating to the acceleration of the ETNs to be redeemed only in part, relate to the portion of the stated principal amount of ETNs which has been or is to be redeemed pursuant to these acceleration provisions.

In the case of an Optional Acceleration of all outstanding ETNs, the “**Accelerated Valuation Period**” shall be a period of five (5) consecutive Trading Days specified in our notice of Optional Acceleration, the first Trading Day of which shall be at least two (2) Business Days after the date on which we give notice of such Optional Acceleration. In the case of an Event Acceleration of all outstanding ETNs, the “Accelerated Valuation Period” shall be a period of five (5) consecutive Trading Days, the first Trading Day of which shall be the day on which we give notice of such Event Acceleration (or, if such day is not a Trading Day, the next following Trading Day). In the case of an acceleration of less than all outstanding ETNs, the “**Accelerated Valuation Date**” will be the first Trading Day following the date of our notice of acceleration. The Accelerated Redemption Amount will be payable on the third Business Day following the Accelerated Valuation Date or the third Business Day following the last Trading Day in the Accelerated Valuation Period as the case may be (such date the “**Acceleration Date**”). We will give notice of any acceleration of the ETNs through customary channels used to deliver notices to holders of exchange traded notes.

Any payment holders will be entitled to receive is subject to our ability to pay our obligations as they become due.

An “**Acceleration Event**” means:

- (a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located that (i) makes it illegal for CSi to hold, acquire or dispose of options or futures contracts relating to the Index or the SLV Shares or options, futures, swaps or other derivatives on the Index, the SLV Shares or the Options (including but not limited to exchange-imposed position limits), (ii) shall materially increase the cost to the Issuer, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the ETNs, (iii) shall have a material adverse effect on any of these parties’ ability to perform their obligations in connection with the ETNs or (iv) shall materially affect our ability to issue or transact in exchange traded notes similar to the ETNs, each as determined by us or CSi, as the Calculation Agent;
- (b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after the Inception Date that (i) makes it illegal for CSi to hold, acquire or dispose of options or futures contracts relating to the Index or the SLV Shares or options, futures, swaps or other derivatives on the Index or the futures contracts relating to the Index, the SLV Shares or the Options (including but not limited to exchange-imposed position limits), (ii) shall materially increase the cost to the Issuer, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the ETNs, (iii) shall have a material adverse effect on the ability of the Issuer, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the ETNs or (iv) shall materially affect our ability to issue or transact in exchange traded notes similar to the ETNs, each as determined by us or CSi, as the Calculation Agent;
- (c) any event that occurs on or after the Inception Date that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for CSi to hold, acquire or dispose of options contracts relating to the Index or the SLV Shares or options, futures, swaps or other derivatives on the Index, the SLV Shares or the Options (including but not limited to exchange-imposed position limits), (ii) for the Issuer, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the ETNs or (iii) for us to issue or transact in exchange traded notes similar to the ETNs, each as determined by us or CSi, as the Calculation Agent;
- (d) any event, as determined by us or CSi, as the Calculation Agent, that we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the ETNs, or realize, recover or remit the proceeds of any such transaction or asset;
- (e) if at any point, the Intraday Indicative Value is equal to or less than five percent (5%) of the prior day’s Closing Indicative Value of such ETNs; or
- (f) as determined by the Calculation Agent, the primary exchange or market for trading for the ETNs, if any, announces that pursuant to the rules of such exchange or market, as applicable, the ETNs cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

“**Primary Exchange**” means the primary exchange on which options or futures contracts relating to the Index or the SLV Shares are traded, as determined by the Calculation Agent, which is initially the Chicago Board Options Exchange (CBOE).

“**Related Exchange**” means each exchange or quotation system where trading has a material effect (as determined by the Calculation Agent) for the overall market for futures or options contracts relating to the Index or the SLV Shares.

Any ETNs accelerated following an Acceleration Event will be cancelled on the Acceleration Date. Consequently, as of such Acceleration Date, the ETNs will no longer be considered outstanding.

### **Market Disruption Events**

The Calculation Agent will be solely responsible for the determination and calculation of any adjustments to any Index Component and of any related determinations and calculations with respect to any event described below and its determinations and calculations will be conclusive absent manifest error.

A “**Market Disruption Event**” is:

- (a) the occurrence or existence of a suspension, absence or material limitation of trading of the Index Components on the relevant exchange for such Index Component for more than two hours of trading or during the one-half hour period preceding the close of the principal trading session on such relevant exchange;
- (b) a breakdown or failure in the price and trade reporting systems of the relevant exchange for any Index Component, as a result of which the reported trading prices for the Index Component during the last one-half hour preceding the close of the principal trading session on such relevant exchange are materially inaccurate;
- (c) the occurrence or existence of a suspension, absence or material limitation of trading on the primary related exchange or market for trading in futures or options contracts related to any Index Component for more than two hours of trading during, or during the one-half hour period preceding the close of the principal trading session for such related exchange or market;
- (d) a decision to permanently discontinue trading in those related futures or options contracts; or
- (e) failure of the Index Calculation Agent to publish the level of the Index, including as a result of any disruption of the Index Components;

in each case, as determined by the Calculation Agent in its sole discretion; and in each case a determination by the Calculation Agent in its sole discretion that any event described above materially interfered with our ability or the ability of any of our affiliates to effect transactions in the Index Component or any instrument related to the Index Component or to adjust or unwind all or a material portion of any hedge position in the Index Component with respect to the ETNs.

For the purpose of determining whether a market disruption event in respect of an Index Component has occurred:

- (a) a limitation on the hours or number of days of trading will not constitute a market disruption event if it results from an announced change in the regular business hours of the relevant exchange for such Index Component or the primary related exchange or market for trading in futures or options contracts related to such Index Component;
- (b) limitations pursuant to NYSE Rule 80B (or any applicable rule or regulation enacted or promulgated by the NYSE, any other U.S. self-regulatory organization, the SEC or any other relevant authority of scope similar to NYSE Rule 80B) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading; and
- (c) a suspension of trading in futures or options contracts related to such Index Component by the primary related exchange or market for trading in such contracts, if available, by reason of:
  - (i) a price change exceeding limits set by such exchange or market;
  - (ii) an imbalance of orders relating to such contracts; or
  - (iii) a disparity in bid and ask quotes relating to such contracts;

will, in each such case, constitute a suspension, absence or material limitation of trading in futures or options contracts related to such Index Component; and

- (d) a “suspension, absence or material limitation of trading” on the primary related exchange or market on which futures or options contracts related to such Index Component are traded will not include any time when such exchange or market is itself closed for trading under ordinary circumstances;

in each case, as determined by the Calculation Agent in its sole discretion.

If the Calculation Agent determines that a Market Disruption Event occurs or is continuing on any Valuation Date (including, without limitation, the Final Valuation Date, the Early Redemption Valuation Date, or any Valuation Date in the Accelerated Valuation Period or Final Valuation Period), that Valuation Date will be postponed until the first Trading Day on which no Market Disruption Event occurs or is continuing, unless a Market Disruption Event occurs or is continuing for each of the five (5) Trading Days following the applicable scheduled Valuation Date. In that case, the fifth Trading Day following the applicable scheduled Valuation Date shall be deemed to be the applicable Valuation Date, notwithstanding the fact that a Market

Disruption Event occurred or was continuing on such Trading

Day, and the Calculation Agent will determine the applicable Closing Indicative Value using an appropriate Closing Level of the Index on that deemed Valuation Date taking into account the nature and duration of such Market Disruption Event. If any Valuation Date in the Accelerated Valuation Period or Final Valuation Period is postponed as described above, each subsequent Valuation Date in the Accelerated Valuation Period or Final Valuation Period will be postponed by the same number of Trading Days. In addition, if the Final Valuation Date, the Valuation Date corresponding to an Early Redemption Date or the last scheduled Valuation Date in the Accelerated Valuation Period is postponed, the Maturity Date, the corresponding Early Redemption Date or the Acceleration Date, as the case may be, will be postponed until the date three (3) Business Days following such Valuation Date, as postponed.

#### **Default Amount on Acceleration**

For the purpose of determining whether the holders of our senior medium-term notes, of which the ETNs are a part, are entitled to take any action under the indenture, we will treat the stated principal amount of each ETN outstanding as the stated principal amount of that ETN. Although the terms of the ETNs may differ from those of the other senior medium-term notes, holders of specified percentages in stated principal amount of all senior medium-term notes, together in some cases with other series of our debt securities, will be able to take action affecting all the senior medium-term notes, including the ETNs. This action may involve changing some of the terms that apply to the senior medium-term notes, accelerating the maturity of the senior medium-term notes after a default or waiving some of our obligations under the indenture.

In case an event of default with respect to ETNs shall have occurred and be continuing, the amount declared due and payable upon any acceleration of the ETNs will be determined by the Calculation Agent, and will equal, for each ETN that a holder then holds, the Closing Indicative Value determined by the Calculation Agent occurring on the Trading Day following the date on which the ETNs were declared due and payable.

#### **Further Issuances**

We may, from time to time, without notice to or the consent of the holders of the ETNs, create and issue additional securities having the same terms and conditions as the ETNs, and ranking on an equal basis with the ETNs in all respects.

#### **Discontinuation or Modification of the Index**

If the Index Sponsors discontinue publication of the Index and the Index Sponsors or anyone else publishes a substitute index that the Calculation Agent determines is comparable to the Index, then the Calculation Agent will permanently replace the original Index with that substitute index (the “**Successor Index**”) for all purposes, and all provisions described herein as applying to the Index will thereafter apply to the Successor Index instead. If the Calculation Agent replaces the original Index with a Successor Index, then the Calculation Agent will determine the Early Redemption Amount, Accelerated Redemption Amount or Maturity Redemption Amount (each, a “**Redemption Amount**”) and the Coupon Amount, as applicable, by reference to the Successor Index.

If the Calculation Agent determines that the publication of the Index is discontinued and there is no successor index, the Calculation Agent will determine the level of the Index, and thus the applicable Redemption Amount, by a computation methodology that the Calculation Agent determines will as closely as reasonably possible replicate the Index.

If the Calculation Agent determines that the Index, the Options or the method of calculating the Index is changed at any time in any respect, including whether the change is made by the Index Sponsors under their existing policies or following a modification of those policies, is due to the publication of a successor index, is due to events affecting the SLV Shares or the Options, or is due to any other reason and is not otherwise reflected in the level of the Index by the Index Sponsors pursuant to the Index methodology, then the Calculation Agent will be permitted (but not required) to make such adjustments in the Index or the method of its calculation as it believes are appropriate to ensure that the Closing Level of the Index used to determine the applicable Redemption Amount is equitable.

#### **Manner of Payment and Delivery**

Any payment on or delivery of the ETNs at maturity will be made to accounts designated by holders and approved by us, or at the office of the trustee in New York City, but only when the ETNs are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depository.

### **Role of the Calculation Agent**

Credit Suisse International (“CSi”), an affiliate of ours and the Calculation Agent, will, in its reasonable discretion, make certain calculations and determinations that may impact the value of the ETNs, including determination of the arithmetic average of the Closing Indicative Values where applicable, a split or reverse split of the ETNs, calculation of default amounts, Market Disruption Events, any Successor Index, Business Days and Trading Days, the Current Principal Amount, the Daily Investor Fee amount, the Daily Index Factor, the Coupon Amount, the Closing Level of the Index on any Trading Day, the Maturity Date, any Early Redemption Dates, the Acceleration Date, the amount payable in respect of a holder’s ETNs at maturity, upon early redemption or acceleration and any other calculations or determinations to be made by the Calculation Agent as specified herein.

If the Calculation Agent ceases to perform its role, we will either, at our sole discretion, perform such role, appoint another party to do so or accelerate the ETNs.

We may appoint a different Calculation Agent from time to time without consent and without notifying holders.

### **Role of the Index Calculation Agent**

We have initially appointed Nasdaq, Inc. as an Index Calculation Agent. The Index Calculation Agent will have the sole responsibility to calculate and disseminate the Closing Indicative Value and the Intraday Indicative Value of the ETNs. The Index Sponsors may appoint a different Index Calculation Agent from time to time without consent and without notifying holders.

### **Description of Credit Suisse X-Links<sup>®</sup> Crude Oil Shares Covered Call ETNs due April 24, 2037**

*Defined terms used within this subsection are defined only with respect to the ETNs listed in the subsection heading above and described within this subsection.*

#### **General**

The return on the Credit Suisse X-Links<sup>®</sup> Crude Oil Shares Covered Call ETNs due April 24, 2037 (“**ETNs**”) will be based on the performance of the price return version of the Credit Suisse Nasdaq WTI Crude Oil FLOWS<sup>™</sup> 106 Index (the “**Index**”), as reflected by their Indicative Value, calculated as set forth below. The Index measures the return of a “covered call” strategy on the shares of the United States Oil Fund<sup>®</sup> (the “**Oil Fund**”, and such shares the “**Reference Oil Shares**”) by reflecting changes in the price of the Reference Oil Shares and the notional option premiums received from the notional sale of monthly call options on the Reference Oil Shares less notional costs incurred in connection with the implementation of the covered call strategy (the “**Notional Transaction Costs**”). The Notional Transaction Costs reflect the monthly transaction costs of hypothetically buying and selling the call options and selling the Reference Oil Shares and equal 0.03%, 0.03% and 0.01%, respectively, *times* the closing price of the Reference Oil Shares on the date of such notional transactions and, which, on an annual basis, are expected to be approximately 0.84%. The actual cost will vary depending on the value of the Reference Oil Shares on the date of such transactions. The Index strategy consists of a hypothetical notional portfolio that takes a “long” position in Reference Oil Shares and sells a succession of notional, approximately one-month, call options on the Reference Oil Shares with a strike price of approximately 106% of the price of the Reference Oil Shares exercisable on the option expiration date (the “**Options**” and together with the long position in Reference Oil Shares, the “**Index Components**”). The notional sale of the Options is “covered” by the notional long position in the Reference Oil Shares. The long position in the Reference Oil Shares and the “short” call options are held in equal notional amounts (i.e., the short position in each Option is “covered” by the long position in the Reference Oil Shares). This strategy is intended to provide exposure to West Texas Intermediate light sweet crude oil (“**WTI crude oil**”) futures contract prices through the notional positions in the Reference Oil Shares and the Options that together seek to (i) generate periodic cash flows that a direct long-only ownership position in the Reference Oil Shares would not, (ii) provide a limited offset to losses from downside market performance in the Reference Oil Shares via the cash flows from option premiums and (iii) provide limited potential upside participation in the performance of the Reference Oil Shares. The level of the Index on any day reflects the value of (i) the notional long position in the Reference Oil Shares; (ii) the notional Option premium; and (iii) the notional short position in the Options then outstanding; net of the Notional Transaction Costs. The ETNs will not participate in the potential upside of the Reference Oil Shares beyond the applicable strike price of the Options and the level of the Index will be reduced by the Notional Transaction Costs. The Index is subject to the policies of CSi and Nasdaq, Inc. (the “**Index**”).

Sponsors”) and is subject to the Index Sponsors’ discretion, including with respect to the implementation of, and changes to, the rules governing the Index methodology.

### **Inception, Issuance and Maturity**

The initial issuance of ETNs priced on April 25, 2017 (the “**Inception Date**”) and settled on April 28, 2017 (the “**Initial Settlement Date**”). The scheduled maturity date is initially April 24, 2037, but the maturity of the ETNs may be extended at our option for up to two additional five-year periods, as described herein.

### **Intraday Indicative Value**

The “**Intraday Indicative Value**” of the ETNs is designed to reflect the economic value of the ETNs at a given time. The Intraday Indicative Value of the ETNs will be calculated and published by the Index Calculation Agent every fifteen (15) seconds on each Trading Day during normal trading hours so long as no Market Disruption Event has occurred or is continuing and will be disseminated over the consolidated tape or other major market data vendor. The Intraday Indicative Value of the ETNs at any time is based on the most recent intraday level of the Index. It is calculated using the same formula as the Closing Indicative Value, except that instead of using the Closing Level of the Index, the calculation is based on the most recent reported level of the Index at the particular time (or, if the day on which such time occurs is not a Trading Day, as determined by the Calculation Agent).

At any time at which a Market Disruption Event has occurred and is continuing, there shall be no Intraday Indicative Value. If the Intraday Indicative Value of the ETNs is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value of the ETNs on that day, and all future days, will be zero.

If the ETNs undergo a subsequent split or reverse split, the Current Principal Amount, Closing Indicative Value and Intraday Indicative Value of the ETNs will be adjusted accordingly. Neither the Closing Indicative Value nor the Intraday Indicative Value is the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from the Closing Indicative Value and Intraday Indicative Value of the ETNs at such time.

Neither the Intraday Indicative Value nor the Closing Indicative Value calculation is intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption, acceleration or termination of a holder’s ETNs, nor will it reflect hedging or transaction costs, credit considerations, market liquidity or bid-offer spreads. The Index Calculation Agent is responsible for computing and disseminating the ETN’s Indicative Values. Published levels of the Index from the Index Calculation Agent may occasionally be subject to delay or postponement. Any such delays or postponements will affect the current level of the Index and therefore the Intraday Indicative Value of the ETNs. The actual trading price of the ETNs may be different from their Intraday Indicative Value or Closing Indicative Value.

The actual trading price of the ETNs at any time may vary significantly from the Indicative Value at such time. The trading price of the ETNs at any time is the price that holders may be able to buy or sell their ETNs in the secondary market at such time, if one exists.

The trading price of the ETNs at any time is the price at which holders may be able to buy or sell their ETNs in the secondary market at such time, if one exists. In the absence of an active secondary market for the ETNs, the last reported trading price may not reflect the actual price at which holders may be able to buy or sell their ETNs at a particular time. The trading price of the ETNs at any time may vary significantly from their Indicative Value at such time due to, among other things, imbalances of supply and demand, lack of liquidity, transaction costs, credit considerations and bid-offer spreads.

The closing price of the ETNs will be published on each Trading Day under the ticker symbol “USOI”. Any premium or discount may be reduced or eliminated at any time. Paying a premium purchase price of the ETNs over the Intraday Indicative Value or the Closing Indicative Value of the ETNs could lead to significant losses in the event holders sell their ETNs at a time when such premium has declined or is no longer present in the market place or at maturity or upon early redemption or acceleration, in which case holders will be entitled to receive a cash payment based on the Closing Indicative Value on the relevant Valuation Date(s).

The ETNs may be redeemed or accelerated at any time, subject to the conditions described herein.

As discussed in “Payment Upon Early Redemption” below, holders may, subject to certain restrictions, provide a Redemption Notice on any Business Day during the term of the ETNs beginning on April 26, 2017 through April 14, 2037 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended). Notwithstanding the foregoing, we will not accept a Redemption Notice submitted to us on any day after the Trading Day preceding the start of the Accelerated

Valuation Period. If a holder elects to offer its ETNs to Credit Suisse for redemption, such holder must offer at least the applicable Minimum Redemption Amount at one time for redemption on any Early Redemption Date. The daily redemption feature is intended to induce arbitrageurs to counteract any trading of the ETNs at a premium or discount to their Indicative Value, although there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

In addition, on any Business Day on or after May 9, 2017, we have the right to accelerate all, but not less than all, of the issued and outstanding ETNs (an “**Optional Acceleration**”). Upon an Optional Acceleration, holders will be entitled to receive a cash payment per ETN in an amount (the “**Accelerated Redemption Amount**”) equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of such ETNs during the Accelerated Valuation Period. The “**Accelerated Valuation Period**” shall be a period of five (5) consecutive Trading Days specified in our notice of Optional Acceleration, the first Trading Day of which shall be at least two (2) Business Days after the date on which we give notice of such Optional Acceleration. The Accelerated Redemption Amount will be payable on the third Business Day following the last Trading Day in the Accelerated Valuation Period (such payment date the “**Acceleration Date**”). We will give notice of any Optional Acceleration of the ETNs through customary channels used to deliver notices to holders of exchange traded notes.

Any payment holders will be entitled to receive on the ETNs is subject to our ability to pay our obligations as they become due.

### **Indicative Value**

The “**Indicative Value**” of the ETNs is the Intraday Indicative Value or the Closing Indicative Value of the ETNs, as applicable.

### **Split or Reverse Split of the ETNs**

The Calculation Agent may initiate a split or reverse split of the ETNs on any Trading Day. If the Calculation Agent decides to initiate a split or reverse split, the Calculation Agent will issue a notice to holders of the ETNs and a press release announcing the split or reverse split, specifying the effective date of the split or reverse split. The Calculation Agent will determine the ratio of such split or reverse split, as the case may be, using relevant market indicia, and will adjust the terms of the ETNs accordingly. Any adjustment of the closing value will be rounded to 8 decimal places.

In the case of a reverse split, we reserve the right to address odd numbers of ETNs (commonly referred to as “**partials**”) in a manner determined by the Calculation Agent in its sole discretion. A split or reverse split of the ETNs will not affect the aggregate stated principal amount of ETNs held by an investor, other than to the extent of any “partial” ETNs, but it will affect the number of ETNs an investor holds, the Current Principal Amount, the denominations used for trading purposes on the exchange and the trading price, and may affect the liquidity, of the ETNs on the exchange.

If the ETNs undergo a subsequent split or reverse split, the Current Principal Amount, Closing Indicative Value and Intraday Indicative Value of the ETNs will be adjusted accordingly.

Neither the Closing Indicative Value nor the Intraday Indicative Value is the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from the Closing Indicative Value and Intraday Indicative Value of the ETNs at such time.

Credit Suisse implemented a 1-for-20 reverse split, effective September 27, 2022.

### **Coupon Amount**

On each Coupon Payment Date, for each \$500.00 stated principal amount of the ETNs, holders on the Coupon Record Date will be entitled to receive a variable cash payment equal to the Closing Indicative Value on the Index Business Day immediately preceding the relevant Index Distribution Date multiplied by the Coupon Percentage for that Index Distribution Date. The Coupon will be paid on the Coupon Payment Date to the holder of record on the applicable Coupon Record Date. No Coupon Amount will be due or payable in the event a holder elects to offer its ETNs for early redemption or we accelerate the maturity of the ETNs. The initial Index Distribution Date was May 15, 2017 and the initial Coupon Payment Date was May 25, 2017.

The Coupon Percentage in respect of an Index Distribution Date will be the Distribution for such Index Distribution Date divided by the Closing Level of the Index the Index Business Day immediately preceding the Index Distribution Date. The Distribution represents

the notional monthly call premium earned on the sale of the call options written on the Reference Oil Shares during the immediately preceding Index Rebalancing Period pursuant to the Index methodology.

The premiums generated from the notional sales of the Options will be subtracted monthly from the Index and paid to holders of the ETNs in the form of a Coupon Amount, the amount of which is determined based on the notional premiums received from the sale of the Options during the preceding Rebalancing Period as described below.

The “**Index Rebalancing Period**” refers to the five (5) consecutive Index Calculation Days beginning on and including the Index Calculation Day that is ten (10) calendar days prior to the Expiry Date (as defined below) of the relevant Options (each, a “**Roll Date**”). The Index will be rebalanced at the end of each Roll Date in accordance with the following steps:

- First, on the Index Calculation Day preceding the first Roll Date of each month, the strike price of the new Option is determined. The strike price will be the lowest listed strike price that is above the Target Strike multiplied by the price per Reference Oil Share as of the 4:00 p.m. New York City time on such date of determination. Then, the Index will roll its monthly exposure over the next five (5) consecutive Index Calculation Days. The roll percentage is the proportion of the expiring position being rolled into a new position on each Roll Date.
- At the end of the first Roll Date, and on each successive Roll Date of such Index Rebalancing Period, the Index will notionally sell the new Option. Additionally, as of the end of each such Roll Date, the Index will hypothetically close out through repurchase 20% (or such greater amount in the event of roll disruptions) of the Options notionally sold during the previous Index Rebalancing Period (the expiring Options); the Index will notionally liquidate Reference Oil Shares in an amount sufficient to fund the notional repurchase.
- Finally, on the last Roll Date of such Index Rebalancing Period, the Index will determine the amount of the notional Option premium, which will, on the close of the last Roll Date of the next following Index Rebalancing Period, be subtracted from the Index as a Distribution and paid to holders of the ETNs in the form of the Coupon Amount.

An “**Index Distribution Date**” will be the date on which the Distribution is subtracted from the level of the Index pursuant to the rules of the Index, which will occur on the last Roll Date of a given Index Rebalancing Period.

The Coupon Amount is calculated by reference to the notional Distribution from the Index, which will decrease the level of the Index (and, therefore, the value of the ETNs), as the Distribution comes directly from the notional portfolio reflected by the Index Components. When the Distribution is deducted from the Index on the Index Distribution Date, the Coupon Amount will be added to the Closing Indicative Value and the Intraday Indicative Value of the ETNs. At the market opening on the Ex-Coupon Date, the ETNs will trade on an ex-coupon basis, adjusted for the Coupon Amount, meaning that the Coupon Amount will no longer be included in the Closing Indicative Value or the Intraday Indicative Value of the ETNs. For a holder to receive the upcoming Coupon Amount, the holder must own the ETNs on the Coupon Record Date.

The “**Ex-Coupon Date**”, with respect to each Coupon Amount, will be the first Trading Day on which the ETNs trade without the right to receive such Coupon Amount.

### **Denomination**

Prior to September 27, 2022, the denomination and stated principal amount of each ETN was \$25.00. Credit Suisse implemented a 1-for-20 reverse split of the ETNs, effective September 27, 2022. As of September 27, 2022, the denomination and stated principal amount of each ETN is \$500.00. ETNs may be issued at a price that is higher or lower than the stated principal amount, based on the Indicative Value of the ETNs at that time.

### **Payment at Maturity**

At maturity, holders of the ETNs will receive a cash payment on April 24, 2037 (the “**Maturity Date**”) (or, if the maturity of the ETNs is extended, on the scheduled Maturity Date, as extended). Such holder’s Payment at Maturity will be equal to the “**Final Indicative Value**”, which will be the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Value on each of the immediately preceding five (5) Trading Days to and including the Final Valuation Date (the “**Final Valuation Period**”). We refer to the amount of such payment as the “**Maturity Redemption Amount**”. If the scheduled Maturity Date is not a Business Day, the Maturity Date will be postponed to the first Business Day following the scheduled Maturity Date.

The “**Final Valuation Date**” is initially April 21, 2037, subject to extension as described below and postponement as a result of a Market Disruption Event as discussed under “**Market Disruption Events**”. If the scheduled Final Valuation Date is not a Trading Day, the Final Valuation Date will be postponed to the next following Trading Day, in which case the Maturity Date will be postponed to the third

Business Day following the Final Valuation Date, as so postponed. In addition, if a Market Disruption Event occurs or is continuing on the Final Valuation Date, the Maturity Date will be postponed until the date three (3) Business Days following the Final Valuation Date, as postponed. No interest or additional payment will accrue or be payable as a result of any postponement of the Maturity Date. Any payment on the ETNs is subject to our ability to pay our obligations as they become due. In no event will the Payment at Maturity be less than zero.

The scheduled Maturity Date is April 24, 2037, but may be extended at our option for up to two (2) additional five-year periods. We may only extend the scheduled Maturity Date for five (5) years at a time. If we exercise our option to extend the maturity of the ETNs, the Final Valuation Date for the ETNs will be the third scheduled Business Day prior to the scheduled Maturity Date, as extended. If we exercise our option to extend the maturity of the ETNs, we will notify DTC (the holder of the global note for the ETNs) and the trustee at least 45 but not more than 60 calendar days prior to the then scheduled Maturity Date. We will provide such notice to DTC and the trustee in respect of each five-year extension of the scheduled Maturity Date that we choose to effect.

If the Final Indicative Value is zero, the Maturity Redemption Amount will be zero.

The “**Closing Indicative Value**” on the Inception Date was equal to \$25.00 (the “**Initial Indicative Value**”). The Closing Indicative Value on each calendar day following the Inception Date will be calculated by the Index Calculation Agent and will be equal to (1) the Current Principal Amount for such calendar day *plus* (2) for any day on or after the Index Distribution Date but prior to the Ex-Coupon Date for a given month, any accrued but unpaid Coupon Amount. The Closing Indicative Value will never be less than zero. If the Intraday Indicative Value is equal to or less than zero at any time or the Closing Indicative Value is equal to zero on any Trading Day, the Closing Indicative Value of the ETNs on that day, and all future days, will be zero. The Closing Indicative Value is not the same as the closing price or any other trading price of the ETNs in the secondary market. The trading price of the ETNs at any time may vary significantly from their Indicative Value at such time. If the ETNs undergo a subsequent split or reverse split, the Closing Indicative Value (including the Current Principal Amount) of the ETNs will be adjusted accordingly. Such adjustment may adversely affect the trading price and liquidity of the ETNs. Even if the Closing Indicative Value or Intraday Indicative Value is equal to or less than zero at any time, the trading price of the ETNs may remain above zero. Buying the ETNs at such a time will lead to a complete loss of a holder’s investment.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. Since September 27, 2022, the Closing Indicative Value has been expressed in an amount per denomination and stated principal amount of \$500.00 based on the split-adjusted Current Principal Amount.

The “**Current Principal Amount**” on each calendar day following the Inception Date will be equal to (1)(a) the Current Principal Amount on the immediately preceding calendar day times (b) the Daily Index Factor on such calendar day minus (2) the Daily Investor Fee on such calendar day. The Current Principal Amount on the Inception Date was \$25.00.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. For the purposes of determining the Current Principal Amount on September 27, 2022, the Current Principal Amount on September 26, 2022, multiplied by 20 and rounded to 8 decimal places, shall be used in the formula above.

A “**Business Day**” is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City or London, England generally are authorized or obligated by law, regulation or executive order to close.

A “**Trading Day**” is a day which is (i) an Index Business Day, (ii) an ETN Business Day and (iii) an Index Component Business Day for each of the Index Components.

An “**Index Business Day**” is a day on which the level of the Index is calculated and published.

With respect to any Index Component, an “**Index Component Business Day**” is a day on which trading is generally conducted on any markets on which such Index Component is traded.

An “**ETN Business Day**” is a day on which trading is generally conducted on the New York Stock Exchange, NYSE Arca and NASDAQ.

The “**Daily Index Factor**” on any Index Business Day will equal (a) the Closing Level of the Index on such Index Business Day divided by (b) the Closing Level of the Index on the immediately preceding Index Business Day. The Daily Index Factor is deemed to be one on any day that is not an Index Business Day.

On any calendar day, the “**Daily Investor Fee**” will be equal to the product of (1)(a) the Current Principal Amount on the immediately preceding calendar day times (b) the Daily Index Factor on such calendar day times (2)(a) the Investor Fee Rate divided by (b) 365. The “Investor Fee Rate” will be equal to 0.85%.

The ETNs underwent a 1-for-20 reverse split, effective September 27, 2022. For the purposes of determining the Daily Investor Fee on September 27, 2022, the Current Principal Amount on September 26, 2022, multiplied by 20 and rounded to 8 decimal places, shall be used in the formula above.

The ETNs do not guarantee any return of a holder’s investment. If the level of the Index decreases or does not increase sufficiently to offset the Daily Investor Fee (and in the case of early redemption, the Early Redemption Charge) over the term of the ETNs, a holder will receive less, and possibly significantly less at maturity or upon early redemption or acceleration of the ETNs than the amount of such holder’s investment.

The “**Closing Level**” of the Index on any Trading Day will be the Closing Level published on Bloomberg under the ticker symbol “QUSOI <Index>” or any successor page on Bloomberg or any successor service, applicable; provided that in the event a Market Disruption Event exists on a Valuation Date (as defined below), the Calculation Agent will determine the Closing Level of the Index, if necessary.

### **Payment Upon Early Redemption**

Prior to maturity, a holder may, subject to certain restrictions described below, offer at least the applicable Minimum Redemption Amount or more of its ETNs to us for redemption on an Early Redemption Date during the term of the ETNs until April 14, 2037 (or, if the maturity of the ETNs is extended, five (5) scheduled Trading Days prior to the scheduled Final Valuation Date, as extended). Notwithstanding the foregoing, we will not accept a Redemption Notice submitted to us on any day after the Trading Day preceding the start of the Accelerated Valuation Period related to the acceleration of all outstanding ETNs. If a holder elects to offer its ETNs for redemption, and the requirements for acceptance by us are met, such holder will be entitled to receive a cash payment per ETN on the Early Redemption Date equal to the Early Redemption Amount. Any payment holders will be entitled to receive on the ETNs is subject to our ability to pay our obligations as they become due.

A holder may exercise its early redemption right by causing its broker or other person with whom such holder holds its ETNs to deliver a Redemption Notice (as defined herein) to Credit Suisse. If such Redemption Notice is delivered prior to 4:00 p.m., New York City time, on any Business Day, the immediately following Trading Day will be the applicable “**Early Redemption Valuation Date**”. Otherwise, the second following Trading Day will be the applicable Early Redemption Valuation Date. See “Procedures for Early Redemption”.

A holder must offer for redemption at least 10,000 ETNs at one time in order to exercise the right to cause us to redeem such holder’s ETNs on any Early Redemption Date (the “**Minimum Redemption Amount**”); provided that we or CSi as the Calculation Agent may from time to time reduce, in part or in whole, the Minimum Redemption Amount. Any such reduction will be applied on a consistent basis for all holders of the ETNs at the time the reduction becomes effective. If the ETNs undergo a subsequent split or reverse split, the minimum number of ETNs needed to exercise the right to cause us to redeem the ETNs will remain the same.

When a holder submits its ETNs for redemption in accordance with the redemption procedures described below under “Procedures for Early Redemption,” such ETNs may remain outstanding (and be resold by us or an affiliate) or may be submitted by us for cancellation.

The “**Early Redemption Date**” is the third Business Day following an Early Redemption Valuation Date.

The “**Early Redemption Charge**” per ETN will equal 0.125% times the Closing Indicative Value on the Early Redemption Valuation Date.

The “**Early Redemption Amount**” is a cash payment per ETN equal to the greater of (A) zero and (B)(1) the Closing Indicative Value on the applicable Early Redemption Valuation Date minus (2) the Early Redemption Charge, calculated by the Calculation Agent.

### **Procedures for Early Redemption**

If a holder wishes to offer its ETNs to Credit Suisse for redemption, its broker or other person with whom such holder holds its ETNs must follow the following procedures:

- Deliver a notice of redemption (the “**Redemption Notice**”), to Credit Suisse via email or other electronic delivery as requested by Credit Suisse. If such Redemption Notice is delivered prior to 4:00 p.m., New York City time, on any Business Day, the immediately following Trading Day will be the applicable “**Early Redemption Valuation Date**”. Otherwise, the second following Trading Day will be the applicable Early Redemption Valuation Date. If Credit Suisse receives such Redemption Notice no later than 4:00 p.m., New York City time, on any Business Day, Credit Suisse will respond by sending the relevant holder’s broker an acknowledgment of the Redemption Notice accepting such redemption request by 7:30 p.m., New York City time, on the Business Day prior to the applicable Early Redemption Valuation Date. Credit Suisse or its affiliate must acknowledge to such holder’s broker acceptance of the Redemption Notice in order for the holder’s redemption request to be effective;
- Notwithstanding the foregoing, Credit Suisse may, at its option, waive the requirement that the Redemption Notice be delivered as set forth above, if confirmed by Credit Suisse that a written indication of an offer for early redemption has otherwise been accepted by Credit Suisse. Any such written indication that is delivered after 4:00 p.m., New York City time, on any Business Day, will be deemed to have been made on the following Business Day. For the avoidance of doubt, a holder may choose to comply with the procedures set forth above in lieu of the procedures in this clause, irrespective of any waiver by Credit Suisse.
- Cause the holder’s DTC custodian to book a delivery versus payment trade with respect to the ETNs on the applicable Early Redemption Valuation Date at a price equal to the applicable Early Redemption Amount, facing us; and
- Cause the holder’s DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. New York City time, on the applicable Early Redemption Date (the third Business Day following the Early Redemption Valuation Date).

The holder is responsible for (i) instructing or otherwise causing its broker to provide the Redemption Notice and (ii) its broker satisfying the additional requirements as set forth in the second and third bullets above in order for the redemption to be effected. Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, a holder should consult the brokerage firm through which it owns its interest in the ETNs in respect of such deadlines. If Credit Suisse does not (i) receive the Redemption Notice from the holder’s broker by 4:00 p.m. and (ii) deliver an acknowledgment of such Redemption Notice to such broker accepting such redemption request by 7:30 p.m., on the Business Day prior to the applicable Early Redemption Valuation Date, such notice will not be effective for such Business Day and Credit Suisse will treat such Redemption Notice as if it was received on the next Business Day. Any redemption instructions for which Credit Suisse receives a valid confirmation in accordance with the procedures described above will be irrevocable after Credit Suisse confirms a holder’s offer for early redemption.

Because the Early Redemption Amount a holder will receive for each ETN will not be determined until the close of trading on the applicable Early Redemption Valuation Date, a holder will not know the applicable Early Redemption Amount at the time such holder exercises its redemption right and will bear the risk that its ETNs will decline in value between the time of such holder’s exercise and the time at which the Early Redemption Amount is determined.

### **Optional Acceleration**

On any Business Day on or after May 9, 2017, we have the right to accelerate all, but not less than all, of the issued and outstanding ETNs (an “**Optional Acceleration**”). Upon an Optional Acceleration, holders will be entitled to receive a cash payment per ETN in an amount (the “**Accelerated Redemption Amount**”) equal to the arithmetic average, as determined by the Calculation Agent, of the Closing Indicative Values of such ETNs during the Accelerated Valuation Period.

The “**Accelerated Valuation Period**” shall be a period of five (5) consecutive Trading Days specified in our notice of Optional Acceleration, the first Trading Day of which shall be at least two (2) Business Days after the date on which we give notice of such Optional Acceleration. The Accelerated Redemption Amount will be payable on the third Business Day following the last Trading Day in the Accelerated Valuation Period (such payment date the “**Acceleration Date**”). We will give notice of any Optional Acceleration of the ETNs through customary channels used to deliver notices to holders of exchange traded notes. Any payment holders will be entitled to receive on the ETNs is subject to our ability to pay our obligations as they become due.

### **Market Disruption Events**

The Calculation Agent will be solely responsible for the determination and calculation of any adjustments to any Index Component and of any related determinations and calculations with respect to any event described below and its determinations and calculations will be conclusive absent manifest error.

A “**Market Disruption Event**” is:

- (a) the occurrence or existence of a suspension, absence or material limitation of trading of the Index Components on the relevant exchange for such Index Component for more than two hours of trading or during the one-half hour period preceding the close of the principal trading session on such relevant exchange;

- (b) a breakdown or failure in the price and trade reporting systems of the relevant exchange for any Index Component, as a result of which the reported trading prices for the Index Component during the last one-half hour preceding the close of the principal trading session on such relevant exchange are materially inaccurate;
- (c) the occurrence or existence of a suspension, absence or material limitation of trading on the primary related exchange or market for trading in futures or options contracts related to any Index Component for more than two hours of trading during, or during the one-half hour period preceding the close of the principal trading session for such related exchange or market;
- (d) a decision to permanently discontinue trading in those related futures or options contracts; or
- (e) failure of the Index Calculation Agent to publish the level of the Index, including as a result of any disruption of the Index Components;

in each case, as determined by the Calculation Agent in its sole discretion; and in each case a determination by the Calculation Agent in its sole discretion that any event described above materially interfered with our ability or the ability of any of our affiliates to effect transactions in the Index Component or any instrument related to the Index Component or to adjust or unwind all or a material portion of any hedge position in the Index Component with respect to the ETNs.

For the purpose of determining whether a market disruption event in respect of an Index Component has occurred:

- (a) a limitation on the hours or number of days of trading will not constitute a market disruption event if it results from an announced change in the regular business hours of the relevant exchange for such Index Component or the primary related exchange or market for trading in futures or options contracts related to such Index Component;
- (b) limitations pursuant to NYSE Rule 80B (or any applicable rule or regulation enacted or promulgated by the NYSE, any other U.S. self-regulatory organization, the SEC or any other relevant authority of scope similar to NYSE Rule 80B) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading; and
- (c) a suspension of trading in futures or options contracts related to such Index Component by the primary related exchange or market for trading in such contracts, if available, by reason of:
  - (i) a price change exceeding limits set by such exchange or market;
  - (ii) an imbalance of orders relating to such contracts; or
  - (iii) a disparity in bid and ask quotes relating to such contracts;

will, in each such case, constitute a suspension, absence or material limitation of trading in futures or options contracts related to such Index Component; and

- (d) a “suspension, absence or material limitation of trading” on the primary related exchange or market on which futures or options contracts related to such Index Component are traded will not include any time when such exchange or market is itself closed for trading under ordinary circumstances;

in each case, as determined by the Calculation Agent in its sole discretion.

If the Calculation Agent determines that a Market Disruption Event occurs or is continuing on any Valuation Date, that Valuation Date will be postponed until the first Trading Day on which no Market Disruption Event occurs or is continuing, unless a Market Disruption Event occurs or is continuing for each of the five (5) Trading Days following the applicable scheduled Valuation Date. In that case, the fifth Trading Day following the applicable scheduled Valuation Date shall be deemed to be the applicable Valuation Date, notwithstanding the fact that a Market Disruption Event occurred or was continuing on such Trading Day, and the Calculation Agent will determine the applicable Closing Indicative Value using an appropriate Closing Level of the Index on that deemed Valuation Date taking into account the nature and duration of such Market Disruption Event. If any Valuation Date in the Accelerated Valuation Period or Final Valuation Period is postponed as described above, each subsequent Valuation Date in the Accelerated Valuation Period or Final Valuation Period will be postponed by the same number of Trading Days. In addition, if the Final Valuation Date, the Early Redemption Valuation Date or the last scheduled Valuation Date in the Accelerated Valuation Period is postponed, the Maturity Date, the corresponding Early Redemption Date or the Acceleration Date, as the case may be, will be postponed until the date three (3) Business Days following such Valuation Date, as postponed.

“**Valuation Date**” is any Trading Day in the Final Valuation Period or the Accelerated Valuation Period and any Early Redemption Valuation Date, as applicable.

#### **Default Amount on Acceleration**

For the purpose of determining whether the holders of our senior medium-term notes, of which the ETNs are a part, are entitled to take any action under the indenture, we will treat the stated principal amount of each ETN outstanding as the stated principal amount of that ETN. Although the terms of the ETNs may differ from those of the other senior medium-term notes, holders of specified percentages in stated principal amount of all senior medium-term notes, together in some cases with other series of our debt

securities, will be able to take action affecting all the senior medium-term notes, including the ETNs. This action may involve changing some of the terms that apply to the senior medium-term notes, accelerating the maturity of the senior medium-term notes after a default or waiving some of our obligations under the indenture.

In case an event of default with respect to ETNs shall have occurred and be continuing, the amount declared due and payable upon any acceleration of the ETNs will be determined by the Calculation Agent, and will equal, for each ETN that a holder then holds, the Closing Indicative Value determined by the Calculation Agent occurring on the Trading Day following the date on which the ETNs were declared due and payable.

#### **Further Issuances**

We may, from time to time, without notice to or the consent of the holders of the ETNs, create and issue additional securities having the same terms and conditions as the ETNs, and ranking on an equal basis with the ETNs in all respects.

#### **Discontinuation or Modification of the Index**

If the Index Sponsors discontinue publication of the Index and the Index Sponsors or anyone else publishes a substitute index that the Calculation Agent determines is comparable to the Index, then the Calculation Agent will permanently replace the original Index with that substitute index (the “**Successor Index**”) for all purposes, and all provisions described herein as applying to the Index will thereafter apply to the Successor Index instead. If the Calculation Agent replaces the original Index with a Successor Index, then the Calculation Agent will determine the Early Redemption Amount, Accelerated Redemption Amount or Maturity Redemption Amount (each, a “**Redemption Amount**”) and the Coupon Amount, as applicable, by reference to the Successor Index.

If the Calculation Agent determines that the publication of the Index is discontinued and there is no successor index, the Calculation Agent will determine the level of the Index, and thus the applicable Redemption Amount, by a computation methodology that the Calculation Agent determines will as closely as reasonably possible replicate the Index.

If the Calculation Agent determines that the Index, the Options or the method of calculating the Index is changed at any time in any respect, including whether the change is made by the Index Sponsors under their existing policies or following a modification of those policies, is due to the publication of a successor index, is due to events affecting the Reference Oil Shares or the Options, or is due to any other reason and is not otherwise reflected in the level of the Index by the Index Sponsors pursuant to the Index methodology, then the Calculation Agent will be permitted (but not required) to make such adjustments in the Index or the method of its calculation as it believes are appropriate to ensure that the Closing Level of the Index used to determine the applicable Redemption Amount is equitable.

#### **Manner of Payment and Delivery**

Any payment on or delivery of the ETNs at maturity will be made to accounts designated by holders and approved by us, or at the office of the trustee in New York City, but only when the ETNs are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depository.

#### **Role of the Calculation Agent**

Credit Suisse International (“**CSI**”), an affiliate of ours and the Calculation Agent, will, in its reasonable discretion, make certain calculations and determinations that may impact the Closing Indicative Value of the ETNs, including determination of the arithmetic average of the Closing Indicative Values where applicable, a split or reverse split of the ETNs, calculation of default amounts, Market Disruption Events, any Successor Index, Business Days and Trading Days, the Current Principal Amount, the Daily Investor Fee amount, the Daily Index Factor, the Coupon Amount, the Closing Level of the Index on any Trading Day, the Maturity Date, any Early Redemption Dates, the Acceleration Date, the amount payable in respect of a holder’s ETNs at maturity or upon early redemption or acceleration and any other calculations or determinations to be made by the Calculation Agent as specified herein.

If the Calculation Agent ceases to perform its role, we will either, at our sole discretion, perform such role, appoint another party to do so or accelerate the ETNs.

We may appoint a different Calculation Agent from time to time without consent and without notifying holders.

## **Role of the Index Calculation Agent**

We have appointed Nasdaq, Inc. as an Index Calculation Agent. The Index Calculation Agent will have the sole responsibility to calculate and disseminate the Closing Indicative Value and the Intraday Indicative Value of the ETNs. The Index Sponsors may appoint a different Index Calculation Agent from time to time without consent and without notifying holders.

## **General Terms of the ETNs**

### **Business Days**

The term “**Business Day**” means, unless otherwise specified in the applicable prospectus supplement, any day that is not a Saturday or Sunday and that is not a day on which banking institutions are generally authorized or obligated by law, regulation or executive order to close in The City of New York and any other place of payment with respect to the applicable series of ETNs and is a day on which dealings in deposits in any currency specified in the applicable prospectus supplement are transacted, or with respect to any future date are expected to be transacted, in the London interbank market.

## **Events of Default; Limitations on Suits**

### **Events of Default**

Unless otherwise specified in a prospectus supplement, an “**event of default**” with respect to a series of ETNs occurs upon:

- a default in payment of the principal or any premium on any ETN of that series when due;
- a default in payment of interest when due on any ETN of that series for 30 days;
- a default in performing any other covenant in the Indenture for 60 days after written notice from the Trustee or from the holders of 25% in principal amount of the outstanding ETNs of such series; or
- certain events of bankruptcy, insolvency or reorganization of the Issuer.

Any additional or different events of default applicable to a particular series of ETNs will be described in the prospectus supplement relating to such series.

The Trustee may withhold notice to the holders of ETNs of any default (except in the payment of principal, premium or interest) if it considers such withholding of notice to be in the best interests of the holders. A default is any event which is an event of default described above or would be an event of default but for the giving of notice or the passage of time.

Unless otherwise specified in the applicable prospectus supplement, if an event of default occurs and continues, the Trustee or the holders of the aggregate principal amount of the ETNs specified below may require the Issuer to repay immediately, or accelerate:

- the entire principal of the ETNs of such series; or
- if the ETNs are original issue discount securities, such portion of the principal as may be described in the applicable prospectus supplement.

Unless otherwise specified in the applicable prospectus supplement, if the event of default occurs because of a default in a payment of principal or interest on the ETNs, then the Trustee or the holders of at least 25% of the aggregate principal amount of ETNs of that series can accelerate that series of ETNs. If the event of default occurs because of a failure to perform any other covenant in the Indenture for the benefit of one or more series of ETNs, then the Trustee or the holders of at least 25% of the aggregate principal amount of ETNs of all series affected, voting as one class, can accelerate all of the affected series of ETNs. If the event of default occurs because of bankruptcy proceedings, then all of the ETNs under the Indenture will be accelerated automatically. Therefore, except in the case of a default on a payment of principal or interest on the ETNs of your series or a default due to bankruptcy or insolvency of the Issuer, it is possible that you may not be able to accelerate the ETNs of your series because of the failure of holders of other series to take action.

The holders of a majority of the aggregate principal amount of the ETNs of all affected series, voting as one class, can rescind this accelerated payment requirement or waive any past default or event of default or allow noncompliance with any provision of the Indenture. However, they cannot waive a default in payment of principal of, premium, if any, or interest on, any of the ETNs.

After an event of default, the Trustee must exercise the same degree of care a prudent person would exercise under the circumstances in the conduct of her or his own affairs. Subject to these requirements, the Trustee is not obligated to exercise any of its rights or

powers under the Indenture at the request, order or direction of any holders, unless the holders offer the Trustee reasonable indemnity. If they provide this reasonable indemnity, the holders of a majority in principal amount of all affected series of ETNs, voting as one class, may direct the time, method and place of conducting any proceeding or any remedy available to the Trustee, or exercising any power conferred upon the Trustee, for any series of ETNs.

We are required to furnish to the Trustee annually a brief certificate as to our compliance with all conditions and covenants under the Indenture.

#### **Limitations on Suits**

The holders of any ETNs may not institute any proceeding, judicial or otherwise, with respect to the Indenture or such ETNs, or for the appointment of a receiver or trustee, or for any other remedy, unless:

- (a) such holder has previously given to the Trustee written notice of a continuing event of default with respect to such ETNs;
- (b) the holders of at least 25% in aggregate principal amount of such ETNs outstanding and affected will have made written request to the Trustee to institute proceedings with respect to such event of default in its own name as Trustee;
- (c) such holder or holders have offered to the Trustee indemnity reasonably satisfactory to the Trustee against any costs, liabilities or expenses to be incurred in compliance with such request;
- (d) the Trustee for 60 days after its receipt of such offer of indemnity has failed to institute any such proceeding;
- (e) during such 60-day period, the holders of a majority in aggregate principal amount of such ETNs outstanding and affected have not given the Trustee a direction that is inconsistent with such written request.

#### **Consolidation, Merger or Sale**

The Issuer has agreed in the Indenture not to consolidate with or merge with or into any other person or convey or transfer all or substantially all of its properties and assets to any person unless:

- it is the continuing person; or
- the successor expressly assumes by supplemental indenture its obligations under the Indenture.

In either case, the Issuer will also have to deliver a certificate to the Trustee stating that after giving effect to the merger there will not be any defaults under the Indenture and, if the Issuer is not the continuing person, an opinion of counsel stating that the merger and the supplemental indentures comply with these provisions and that the supplemental indentures are legal, valid and binding obligations of the successor corporation enforceable against it.

Credit Suisse or Credit Suisse Group may issue ETNs directly or through one or more branches and Credit Suisse may, at any time, transfer its obligations under the ETNs from the head office to any branch of Credit Suisse or from any branch of Credit Suisse to another branch or to its head office.

#### **Modification of the Indenture**

In general, rights and obligations of the Issuer and the holders under the Indenture may be modified if the holders of a majority in aggregate principal amount of the outstanding ETNs of each series affected by the modification consent to such modification. However, the Indenture provides that, unless each affected holder agrees, an amendment cannot:

- make any adverse change to any payment term of an ETN such as extending the maturity date, extending the date on which the Issuer has to pay interest or make a sinking fund payment, reducing the interest rate, reducing the amount of principal the Issuer has to repay, reducing the amount of principal of an ETN issued with original issue discount that would be due and payable upon an acceleration of the maturity thereof or the amount thereof provable in bankruptcy, insolvency or similar proceeding, changing the currency or place in which the Issuer has to make any payment of principal, premium or interest, modifying any redemption or repurchase right to the detriment of the holder, modifying any right to convert or exchange the ETNs for another security to the detriment of the holder, and impairing any right of a holder to bring suit for payment;
- reduce the percentage of the aggregate principal amount of ETNs needed to make any amendment to the Indenture or to waive any covenant or default;
- waive any payment default; or
- make any change to the amendment provisions of the Indenture.

However, other than in the circumstances mentioned above, if the Issuer and the Trustee agree, the Indenture may be amended without notifying any holders or seeking their consent if the amendment does not materially and adversely affect any holder.

In particular, if the Issuer and the Trustee agree, the Indenture may be amended without notifying any holders or seeking their consent to add a guarantee from a third party on the outstanding and future ETNs to be issued under the Indenture.

**Governing Law**

Unless specified otherwise, the ETNs and Indenture will be governed by and construed in accordance with the laws of the State of New York.

**Material U.S. Federal Income Tax Considerations**

Our ETNs should be treated for U.S. federal income tax purposes as prepaid forward contracts or prepaid financial contracts that are not debt instruments. Under this treatment, no original issue discount (“**OID**”) will be accrued on our ETNs. However, the Internal Revenue Service might assert that any of our ETNs should be treated as debt instruments subject to the special tax rules governing contingent payment debt instruments. In that event, U.S. holders of the ETNs would be required to accrue OID over the term of the ETNs based upon the yield at which we would issue a non-contingent fixed-rate debt instrument with other terms and conditions similar to the applicable ETNs.

## Exhibit 12.1

I, Ulrich Körner, certify that:

1. I have reviewed this annual report on Form 20-F of Credit Suisse Group AG and Credit Suisse AG;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrants as of, and for, the periods presented in this report;
4. The registrants' other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrants and we have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrants, including their consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrants' disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrants' internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is likely to materially affect, the registrants' internal control over financial reporting; and
5. The registrants' other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrants' auditors and the audit committee of each of the registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrants' ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrants' internal control over financial reporting.

Title: Chief Financial Officer of Credit Suisse Group AG and Credit Suisse AG

**Exhibit 13.1**

**Annual Certification**

**Pursuant to Section 906 of the Sarbanes – Oxley Act of 2002**

Pursuant to subsections (a) and (b) of Section 1350, Chapter 63 of Title 18, United States Code, each of the undersigned officers of Credit Suisse Group AG and Credit Suisse AG, incorporated in Switzerland (the “Companies”), does hereby certify, to such officer’s knowledge, that:

The Annual Report on Form 20-F for the year ended December 31, 2022 of the Companies fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934 and the information contained in this Annual Report fairly presents, in all material respects, the financial condition and results of operations of the Companies for such period presented.

## Credit Suisse Group AG publishes results of the 2023 Annual General Meeting

Zurich, April 4, 2023 – **The shareholders of Credit Suisse Group AG (Credit Suisse) today voted on the proposals of the Board of Directors (Board) at the Annual General Meeting of Shareholders (AGM) in Zurich. Axel P. Lehmann was re-elected as Chairman of the Board for a further term until the closing of the planned merger with UBS Group AG (UBS). Five members of the Board did not stand for re-election. All other Board members were re-elected for a further term until the closing of the planned merger with UBS.**

### **Election of the members of the Board and the Compensation Committee**

With a majority of 55.67% of the votes represented, shareholders re-elected Axel P. Lehmann as Chairman of the Board for a further term until the closing of the planned merger with UBS. Following his re-election to the Board, Christian Gellerstad was appointed as Vice-Chair and Lead Independent Director.

The following Board members did not stand for re-election at the 2023 AGM:

- Shan Li
- Seraina Macia
- Blythe Masters
- Richard Meddings
- Ana Paula Pessoa

Iris Bohnet, Christian Gellerstad and Amanda Norton were re-elected as members of the Compensation Committee.

The composition of the Board can be found at: <https://www.credit-suisse.com/about-us/en/our-company/our-management/board-of-directors.html>.

### **Further voting results**

- Shareholders approved the 2022 management report, the 2022 parent company financial statements and the 2022 Credit Suisse consolidated financial statements by 61.41% of the shareholder votes represented.
- Shareholders approved the proposal on appropriation of retained earnings by 79.81% of the shareholder votes represented.
- Shareholders approved the proposed maximum aggregate compensation of the Board for the period of one term by 50.42% of the shareholder votes represented. The compensation amount will be prorated from the date of the AGM 2023 until the date of the closing of the planned merger with UBS.
- Shareholders rejected the proposed maximum aggregate compensation of the Executive Board for the period of one term by 48.43% of the shareholder votes represented. The Board will assess this result and will determine potential further measures.
- Shareholders accepted the 2022 Compensation Report in a consultative vote, with 50.06% of the shareholder votes represented.
- Shareholders accepted Credit Suisse's climate strategy as outlined in the Strategy chapter of the 2022 Task Force on Climate-related Financial Disclosures Report in a consultative vote, with 53.07% of the shareholder votes represented.
- Some of the proposed amendments to the Articles of Association were not adopted due to a lack of the required quorum.

The detailed voting results of the 2023 AGM as well as the speeches of Axel P. Lehmann, Chairman of the Board, and Ulrich Körner, Chief Executive Officer, are available online at: [www.credit-suisse.com/agm](http://www.credit-suisse.com/agm).

### Credit Suisse

Credit Suisse is one of the world's leading financial services providers. The bank's strategy is built on its leading Wealth Management and Swiss Bank franchises, with strong Asset Management as well as Markets capabilities. Credit Suisse seeks to follow a balanced approach to wealth management, aiming to capitalize on both the large pool of wealth within mature markets as well as the significant growth in wealth in Asia Pacific and other emerging markets, while also serving key developed markets with an emphasis on Switzerland. The bank employs more than 50,000 people. The registered shares (CSGN) of Credit Suisse Group AG are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found [www.credit-suisse.com](http://www.credit-suisse.com).

### Cautionary statement regarding forward-looking information

This document contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our statements as to the proposed transaction between Credit Suisse and UBS;
- our plans, targets or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as "may," "could," "achieves," "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, targets, goals, expectations, estimates and intentions expressed in such forward-looking statements. Additionally, many of these factors are beyond our control.

These factors include, but are not limited to:

- the consummation of the proposed transaction between Credit Suisse and UBS, and the timing and implementation thereof;
- the ability to maintain sufficient liquidity and access capital markets;
- market volatility, increases in inflation and interest rate fluctuations or developments affecting interest rate levels;
- the ongoing significant negative consequences, including reputational harm, of the Archegos and supply chain finance funds matters, as well as other recent events, and our ability to successfully resolve these matters;
- the impact of media reports and social media speculation about our business and its performance;
- the extent of outflows of deposits and assets or future net new asset generation across our divisions;
- our ability to improve our risk management procedures and policies and hedging strategies;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular, but not limited to, the risk of negative impacts of COVID-19 on the global economy and financial markets, Russia's invasion of Ukraine, the resulting sanctions from the US, EU, UK, Switzerland and other countries and the risk of continued slow economic recovery or downturn in the EU, the US or other developed countries or in emerging markets in 2023 and beyond;
- the emergence of widespread health emergencies, infectious diseases or pandemics, such as COVID-19, and the actions that may be taken by governmental authorities to contain the outbreak or to counter its impact;
- potential risks and uncertainties relating to the severity of impacts from the COVID-19 pandemic, including potential material adverse effects on our business, financial condition and results of operations;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;

- the ability to achieve our strategic initiatives, including those related to our targets, ambitions and goals, such as our financial ambitions as well as various goals and commitments to incorporate certain environmental, social and governance considerations into our business strategy, products, services and risk management processes;

- our ability to achieve our announced comprehensive new strategic direction for the Group and significant changes to its structure and organization;
- our ability to successfully implement the divestment of any non-core business;
- the future level of any impairments and write-downs resulting from strategy changes and their implementation;
- the ability of counterparties to meet their obligations to us and the adequacy of our allowance for credit losses;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies;
- the effects of currency fluctuations, including the related impact on our business, financial condition and results of operations due to moves in foreign exchange rates;
- geopolitical and diplomatic tensions, instabilities and conflicts, including war, civil unrest, terrorist activity, sanctions or other geopolitical events or escalations of hostilities, such as Russia's invasion of Ukraine;
- political, social and environmental developments, including climate change and evolving ESG-related disclosure standards;
- the ability to appropriately address social, environmental and sustainability concerns that may arise from our business activities;
- the effects of, and the uncertainty arising from, the UK's withdrawal from the EU;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyber attacks, information or security breaches or technology failures on our reputation, business or operations, the risk of which is increased while large portions of our employees work remotely;
- the adverse resolution of litigation, regulatory proceedings and other contingencies;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting or tax standards, policies or practices in countries in which we conduct our operations;
- the discontinuation of LIBOR and other interbank offered rates and the transition to alternative reference rates;
- the potential effects of changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to protect our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes instituted by us, our counterparties or competitors;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in "Risk factors" in *Information on the company* in our Annual Report 2022.

## Explanatory note

On April 24, 2023, the Credit Suisse Earnings Release 1Q23 was published. A copy of the Earnings Release is attached as an exhibit to this report on Form 6-K. This report on Form 6-K (including the exhibit hereto) is hereby (i) incorporated by reference into the Registration Statement on Form F-3 (file no. 333-238458) and the Registration Statements on Form S-8 (file nos. 333-101259, 333-208152, 333-217856, and 333-268336), and (ii) shall be deemed to be “filed” for purposes of the Securities Exchange Act of 1934, as amended, except, in the case of both (i) and (ii), the information under “Group and Bank differences” and “Selected financial data – Bank” shall not be incorporated by reference into, or be deemed “filed”, with respect to the Registration Statements on Form S-8 (file nos. 333-101259, 333-208152, 333-217856 and 333-268336).

Credit Suisse Group AG and Credit Suisse AG file an annual report on Form 20-F and file quarterly reports, including unaudited interim financial information, and furnish or file other reports on Form 6-K with the US Securities and Exchange Commission (SEC) pursuant to the requirements of the Securities Exchange Act of 1934, as amended. The SEC reports of Credit Suisse Group AG and Credit Suisse AG are available to the public over the internet at the SEC’s website at [www.sec.gov](http://www.sec.gov). The SEC reports of Credit Suisse Group AG and Credit Suisse AG are also available under “Investor Relations” on Credit Suisse Group AG’s website at [www.credit-suisse.com](http://www.credit-suisse.com) and at the offices of the New York Stock Exchange, 20 Broad Street, New York, NY 10005.

Unless the context otherwise requires, references herein to “Credit Suisse Group,” “Credit Suisse,” “the Group,” “we,” “us” and “our” mean Credit Suisse Group AG and its consolidated subsidiaries and the term “the Bank” means Credit Suisse AG, the direct bank subsidiary of the Group, and its consolidated subsidiaries.

SEC regulations require certain information to be included in registration statements relating to securities offerings. Such additional information for the Group and the Bank is included in this report on Form 6-K, which should be read together with the Group’s and the Bank’s annual report on Form 20-F for the year ended December 31, 2022 (Credit Suisse 2022 20-F) filed with the SEC on March 14, 2023, and the Group’s earnings release for the first quarter of 2023 (Credit Suisse Earnings Release 1Q23), filed with the SEC as Exhibit 99.1 hereto.

This report filed on Form 6-K also contains certain information about Credit Suisse AG relating to its results as of and for the three months ended March 31, 2023. Credit Suisse AG, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. Credit Suisse AG’s registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to “CHF” are to Swiss francs.

## Forward-looking statements

This Form 6-K and the information incorporated by reference in this Form 6-K include statements that constitute forward-looking statements. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Credit Suisse 2022 20-F, subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC, the Group’s and the Bank’s reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

# Group and Bank differences

The business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Wealth Management, Swiss Bank, Asset Management, Investment Bank and the Capital Release Unit segments. These segment results are included in Core Results, except for the Capital Release Unit, which is part of the Credit Suisse results. Core Results also includes certain Corporate Center activities of the Group, such as hedging activities relating to share-based compensation awards, which are not applicable to the Bank. Certain other assets, liabilities and results of operations, primarily relating to Credit Suisse Services AG (our Swiss service company) and its subsidiary, are managed as part of the activities of the Group's segments. However, they are legally owned by the Group and are not part of the Bank's consolidated financial statements.

<sup>1</sup> Represent revenues on a product basis which are not representative of business results within our business segments as segment results utilize financial instruments across various product types

## Credit Suisse reporting structure

Effective January 1, 2023, Credit Suisse includes the results of our five reporting segments, including the Capital Release Unit, and the Corporate Center. Core does not include the Capital Release Unit.

## Results summary

### 1Q23 results

In 1Q23, we reported net income attributable to shareholders of CHF 12,432 million, compared to a net loss attributable to shareholders of CHF 273 million in 1Q22 and a net loss attributable to shareholders of CHF 1,393 million in 4Q22. 1Q23 primarily reflected the write-down to zero of CHF 15 billion of additional tier 1 capital notes as ordered by the Swiss Financial Market Supervisory Authority FINMA (FINMA). In 1Q23, we reported income before taxes of CHF 12,764 million, compared to a loss before taxes of CHF 428 million in 1Q22 and a loss before taxes of CHF 1,315 million in 4Q22. Adjusted loss before taxes in 1Q23 was CHF 1,316 million compared to adjusted income before taxes of CHF 300 million in 1Q22 and an adjusted loss before taxes of CHF 1,015 million in 4Q22.

> Refer to "Credit Suisse and UBS to merge" in "Other information" for further information relating to the merger announcement and the additional tier 1 capital notes write-down.

In 1Q23, and described further below, Credit Suisse experienced significant withdrawals of cash deposits, non-renewal of maturing time deposits and net asset outflows across Wealth Management, Swiss Bank and Asset Management. The corresponding reduction in assets under management and deposits is expected to lead to reduced net interest income and recurring commissions and fees. In particular, this will likely lead to a substantial loss in Wealth Management in 2Q23.

In light of the merger announcement, the adverse revenue impact from the previously disclosed exit from non-core businesses and exposures, restructuring charges and funding costs, Credit Suisse would also expect the Investment Bank and the Group to report a substantial loss before taxes in 2Q23 and 2023. The Group's actual results will depend on a number of factors, including the performance of the Investment Bank and Wealth Management divisions; deposit or net asset flows; the continued exit of non-core positions; goodwill, software and other impairments; litigation; regulatory actions; credit spreads and related funding costs; the usage and availability of the Swiss National Bank (SNB) liquidity facilities; the impact of continued voluntary and involuntary employee attrition; and the outcome of certain other items, including potential real estate sales. We are taking proactive measures to protect our client franchise, manage risks and facilitate operational stability.

## Results details

### Net revenues

In 1Q23, we reported net revenues of CHF 18,467 million, which increased 319% compared to 1Q22, driven by higher net revenues in the Corporate Center and in the Capital Release Unit, partially offset by lower net revenues in the Investment Bank, Wealth Management, Swiss Bank and Asset Management. The increase in net revenues in the Corporate Center was primarily driven by treasury results, which reflected the write-down of additional tier 1 capital notes ordered by FINMA. The increase in the Capital Release Unit primarily reflected a gain of CHF 726 million from the sale of a significant part of the Securitized Products Group (SPG) (Apollo transaction) to entities and funds managed by affiliates of Apollo Global Management (collectively, Apollo), partially offset by a loss of revenues from businesses transferred from the Investment Bank, particularly from SPG. The decrease in the Investment Bank was driven by low client activity and less favorable conditions, particularly in our equity sales and trading, capital markets and advisory franchises. The decrease in Wealth Management mainly reflected lower net interest income, lower transaction- and performance-based revenues and lower recurring commissions and fees. The decrease in the Swiss Bank reflected lower revenues across all major revenue categories. The decrease in Asset Management was mainly driven by decreased investment and partnership income and reduced management fees.

Compared to 4Q22, net revenues were significantly higher, primarily reflecting higher net revenues in the Corporate Center, the Capital Release Unit and the Investment Bank, partially offset by lower net revenues in Wealth Management, Asset Management

and Swiss Bank. The increase in the Corporate Center was primarily driven by treasury results, which reflected the write-down of additional tier 1 capital notes. The increase in the Capital Release Unit mainly reflected the gain on the Apollo transaction. Net revenues in the Investment Bank increased compared to low levels in 4Q22 and included gains on increased buyback activity principally in our structured notes portfolio across equities and fixed income at prices reflecting significantly wider own credit spreads. The decrease in Wealth Management mainly reflected lower other revenues and lower net interest income. The decrease in Asset Management was driven by decreased investment and partnership income, partially offset by higher performance and transaction revenues. The decrease in Swiss Bank was primarily driven by lower other revenues and lower net interest income.

#### **Provision for credit losses**

In 1Q23, provision for credit losses of CHF 83 million were mainly related to CHF 40 million in the Swiss Bank, CHF 21 million in Wealth Management and CHF 18 million in the Investment Bank and reflected an increase in specific provisions and an increase in non-specific provisions for expected credit losses compared to 1Q22.

#### **Total operating expenses**

Compared to 1Q22, total operating expenses of CHF 5,620 million increased 14%, mainly reflecting a goodwill impairment charge of CHF 1,324 million in 1Q23, which was mostly recognized in Wealth Management and increased restructuring expenses, partially offset by lower general and administrative expenses and lower compensation and benefits. 1Q23 included restructuring expenses of CHF 299 million. General and administrative expenses decreased 35%, mainly due to lower litigation expenses compared to 1Q22. Net litigation expenses of CHF 703 million in 1Q22 were primarily related to developments in a number of previously disclosed legal matters, mainly in the Corporate Center and Wealth Management. Compared to 1Q22, compensation and benefits decreased 2%, mainly reflecting lower variable compensation. Adjusted total operating expenses in 1Q23 of CHF 3,966 million decreased 6% compared to CHF 4,237 million in 1Q22.

Compared to 4Q22, total operating expenses increased 30%, mainly reflecting the goodwill impairment charge in 1Q23 and increases in compensation and benefits, partially offset by lower general and administrative expenses and lower restructuring expenses. Compensation and benefits increased 16%, including the acceleration of deferred compensation expenses due to the cancellation of outstanding deferred compensation awards. General and administrative expenses decreased 19%, primarily reflecting lower litigation expenses. Adjusted total operating expenses were stable compared to 4Q22.

> Refer to "Compensation" and "Goodwill" in "Other information" for further information relating to these matters.

#### **Income tax**

The Group has used a year-to-date effective tax rate (discrete method) as the best estimate of the annual effective tax rate to calculate the 1Q23 income tax expense. This is mainly due to the inability to forecast for 2023 related to the previously disclosed issues affecting Credit Suisse.

In 1Q23, the Group incurred an income tax expense of CHF 345 million on pre-tax income of CHF 12,764 million. This primarily reflected the impact of CHF 218 million from the geographical mix of results adjusted by certain non-deductible expenses. Additionally, we recorded a valuation allowance of CHF 109 million reflecting the reassessment of deferred tax assets due to the Group's performance. The impact of the gain from the write-down of additional tier 1 capital notes, on which the Group utilized significant tax losses from prior years, resulted in a tax expense of CHF 18 million.

Overall, net deferred tax liabilities decreased CHF 437 million from CHF 1,073 million in 4Q22 to CHF 636 in 1Q23, primarily driven by a reduction in deferred tax liability associated with the additional tier 1 capital notes write-down, partially offset by the reassessment of the deferred tax assets.

#### **Regulatory capital**

As of the end of 1Q23, our Bank for International Settlements (BIS) common equity tier 1 (CET1) ratio was 20.3% and our risk-weighted assets (RWA) were CHF 243.4 billion.

#### **Core results**

In 1Q23, Core net revenues of CHF 18,122 million increased 329% compared to 1Q22, reflecting higher net revenues in the Corporate Center, partially offset by lower net revenues in the Investment Bank, Wealth Management, Swiss Bank and Asset Management. Provision for credit losses was CHF 79 million, primarily related to provision for credit losses of CHF 40 million in Swiss Bank, CHF 21 million in Wealth Management and CHF 18 million in the Investment Bank. Total operating expenses of CHF 4,880 million increased 16% compared to 1Q22, mainly reflecting the goodwill impairment charge in 1Q23 and significantly increased restructuring expenses, partially offset by a 42% decrease in general and administrative expenses.

Compared to 4Q22, Core net revenues increased 466% compared to 4Q22, primarily reflecting increased net revenues in the Corporate Center and in the Investment Bank, partially offset by lower net revenues in Wealth Management, Asset Management and Swiss Bank. Total operating expenses increased 35% compared to 4Q22, primarily reflecting the goodwill impairment charge in 1Q23 and a 14% increase in compensation and benefits, partially offset by a 18% decrease in general and administrative expenses and a 35% decrease in restructuring expenses.

## Other information

### **Credit Suisse and UBS to merge**

On March 19, 2023, Credit Suisse Group AG (Credit Suisse) and UBS Group AG (UBS) entered into a merger agreement following the intervention of the Swiss Federal Department of Finance, the SNB and FINMA. UBS will be the surviving entity upon closing of the merger transaction. Under the terms of the merger agreement all shareholders of Credit Suisse will receive 1 share in UBS for 22.48 shares in Credit Suisse. This exchange ratio reflected a merger consideration of approximately CHF 3 billion for all shares in Credit Suisse at a price of CHF 17.11 per UBS share as of the close on March 17, 2023 at the SIX Swiss Exchange. The exchange ratio is fixed and will not be adjusted to reflect changes in the price of shares in UBS or Credit Suisse prior to completion. In connection with the merger, Credit Suisse's shares and American Depositary Shares will be delisted from stock exchanges. The SNB has granted Credit Suisse access to significant credit facilities that provide substantial liquidity support to Credit Suisse, a portion of which are supported by default guarantees provided by the Swiss government. As of March 31, 2023 the net amount of borrowings under these facilities amounted to CHF 108 billion after repayments of CHF 60 billion in the quarter, with further repayments of CHF 10 billion as of the date of this report. Pursuant to an emergency ordinance which was issued by the Swiss Federal Council, the merger transaction will be implemented without the need for the approval of the shareholders of Credit Suisse or UBS. We will work closely with UBS to ensure that the transaction is completed in a timely manner. The consummation of the merger remains subject to customary closing conditions.

> Refer to "Risk factors" for further information on risks that may arise in relation to these matters.

In addition, FINMA ordered that Credit Suisse's outstanding amount of additional tier 1 capital notes of nominal value of approximately CHF 16 billion and a fair value of approximately CHF 15 billion be written down to zero. This led to a corresponding gain recognized in 1Q23 of CHF 15,007 million.

### **Annual General Meeting**

As a result of the announced planned merger between Credit Suisse and UBS, the Board of Directors of Credit Suisse (Board) announced on March 29, 2023 the withdrawal of certain previously disclosed proposals to the 2023 Annual General Meeting (AGM). The withdrawals pertained to the proposed discharge of members of the Board and the Executive Board for the financial year 2022 and the proposed Transformation Award as it related to compensation for the Executive Board. In addition, the Board further informed shareholders on its proposal regarding the appropriation of retained earnings and ordinary distribution of a dividend. Pursuant to the emergency ordinance, Credit Suisse was not permitted to resolve on and distribute a dividend for the financial year 2022, and the proposal for distribution of a dividend was withdrawn, although under Swiss law shareholders would still need to vote on the appropriation of retained earnings.

On April 4, 2023 at the AGM, the shareholders of Credit Suisse approved all remaining proposals of the Board at the AGM in Zurich, with two exceptions. The shareholders did not approve the proposed maximum aggregate compensation of the Executive Board for a term until the closing of the planned merger with UBS, which compensation would have been pro-rated for such term, and certain proposed amendments to the Articles of Association were not adopted due to a lack of the required quorum. Shareholders elected Axel P. Lehmann as Chairman of the Board for a term until the closing of the planned merger with UBS. Following his re-election to the Board, Christian Gellerstad was appointed as Vice-Chair and Lead Independent Director. Shan Li, Seraina Macia, Blythe Masters, Richard Meddings and Ana Paula Pessoa did not stand for re-election at the 2023 AGM. Shareholders confirmed all other members of the Board who stood for re-election for a term until the closing of the planned merger with UBS.

### **Securitized Products Group**

On November 15, 2022, Credit Suisse announced that it entered into definitive transaction agreements for the Apollo transaction. This transaction involves phased closings through the first half of 2023. On February 7, 2023, the parties completed the first closing of such transaction, and the majority of the assets and professionals associated with the transaction are now part of or managed by ATLAS SP Partners, a new standalone credit firm focused on asset-backed financing and capital markets solutions. Following this first closing, there were three subsequent closings in 1Q23 with further assets transferred. These closings, together with the recently completed sales of other portfolio assets to Apollo and other third parties and certain business reductions, resulted in a total reduction of the asset equivalent exposures of SPG and related financing businesses from USD 74 billion as of September 30, 2022 to approximately USD 26 billion as of March 31, 2023. In 1Q23, Credit Suisse recognized a pre-tax gain of USD 0.8 billion as a result of the Apollo transaction, partially offset by losses on the valuation of certain financing arrangements associated with the Apollo transaction.

In connection with the initial closing of this transaction, Credit Suisse and Apollo entered into various ancillary agreements related to the transaction, including an investment management agreement, certain financing arrangements and a transition services agreement.

> Refer to "Strategy" in I – Information on the company in the Credit Suisse Annual Report 2022 for further information regarding these agreements.

### **Liquidity issues in 1Q23**

In the second half of March 2023, Credit Suisse experienced significant withdrawals of cash deposits as well as non-renewal of maturing time deposits. Customer deposits declined by CHF 67 billion in 1Q23. These outflows, which were most acute in the days immediately preceding and following the announcement of the merger, stabilized to much lower levels, but had not yet reversed as of the date of this report. The Group's three-month average daily LCR was 178% as of the end of 1Q23, improved from lower levels earlier in the quarter after benefitting from the liquidity facilities from the SNB. Prior to the significantly increased outflows, on March 14, 2023 our quarter to date daily average LCR was approximately 153%, improved from the three-month average daily LCR of 144% at the end of 2022.

### **Outflows in assets under management in 1Q23**

At the Group level, net asset outflows in 1Q23 were CHF 61 billion or 5% of assets under management as of the end of 4Q22, in particular following net asset outflows in the second half of March 2023 across all businesses. In Wealth Management, these outflows in 1Q23 represented 9% of assets under management reported as of the end of 4Q22. In the Swiss Bank, these outflows in 1Q23 represented 1% of assets under management reported as of the end of 4Q22. In Asset Management, these outflows in 1Q23 represented 3% of assets under management reported as of the end of 4Q22. These outflows have moderated but have not yet reversed as of the date of this report. Deposit outflows represented 57% of Wealth Management and Swiss Bank net asset outflows in 1Q23.

### **CS First Boston**

Credit Suisse Group AG, and M. Klein & Co LLC have mutually agreed to terminate the acquisition of The Klein Group, LLC (i.e., the investment banking business of M. Klein & Co. LLC) by Credit Suisse considering Credit Suisse's recently announced merger with UBS Group AG.

### **Goodwill**

Following a review of the Group's financial plans to reflect the deposit and assets under management outflows in 1Q23, the Group concluded that the estimated fair value of the Wealth Management reporting unit was below its related carrying value and as a result a goodwill impairment charge of CHF 1.3 billion was recorded for the quarter, resulting in a goodwill balance of zero for that reporting unit. The fair value of the remaining reporting units with goodwill (Swiss Bank and Asset Management) exceeded their related carrying values and no further impairments were necessary as of March 31, 2023.

The fair value of the Asset Management reporting unit exceeded its related carrying value by less than 10%. The reporting unit has experienced a significant level of assets under management outflows. The goodwill allocated to this reporting unit has become more sensitive to an impairment due to these outflows, and there is a significant risk of a future goodwill impairment for this reporting unit if its future performances does not achieve the financial projections contained within our financial plan.

As a result of the announced strategy and organizational changes, the Private Fund Group business in the Asset Management reporting unit was transferred to the Investment Bank reporting unit effective January 1, 2023, resulting in a transfer of CHF 30 million of goodwill between the reporting units. The Group fully impaired this goodwill in 1Q23.

### **Impairment of capitalized internally developed software costs**

Following an assessment of the balance sheet carrying value of internally developed software costs, an impairment of CHF 65 million was recorded as restructuring expenses in 1Q23 relating to the Investment Bank.

### **Compensation**

On April 5, 2023, the Swiss Federal Council instructed the Swiss Federal Department of Finance to cancel or reduce the outstanding variable remuneration for the top three levels of management at Credit Suisse. Under US GAAP accounting guidance, the nature of such a cancellation of deferred compensation required an acceleration of deferred compensation expense in 1Q23 for the outstanding share-based portion of the compensation awards with a corresponding credit to shareholders' equity, and for the smaller impact from the cancellation of cash-based awards a credit to the income statement for previously accrued expenses.

### **Credit ratings**

Following the announcement of the merger, all three major rating agencies revised their credit outlooks. On March 20, 2023, Moody's Investor Service placed on review for upgrade all long-term ratings of Credit Suisse Group AG and Credit Suisse AG, as well as the short-term ratings of Credit Suisse AG, and at the same time revised the outlook for Credit Suisse Group AG and Credit Suisse AG to "Ratings under review" from "Negative". Also on March 20, 2023, S&P Global Ratings placed the long- and short-term issuer credit ratings of Credit Suisse Group AG and Credit Suisse AG on "CreditWatch Positive" from "Stable". On March 21, 2023, Fitch Ratings placed Credit Suisse Group AG's Long-Term Issuer Default Rating and the Long-Term and Short-Term Issuer Default Ratings of Credit Suisse AG on "Rating Watch Evolving" from "Negative".

### **Public tender offers for debt securities**

Credit Suisse also announced on March 16, 2023 that it was making a cash tender offer in relation to ten US dollar denominated senior debt securities for an aggregate consideration of up to USD 2.5 billion. Concurrently, Credit Suisse also announced a separate cash tender offer in relation to four Euro denominated senior debt securities for an aggregate consideration of up to EUR 500 million. The offers expired on March 22, 2023, and pursuant to the tender offers, we repurchased USD 0.6 billion and EUR 2.0 billion of such debt securities.

**Material weakness of internal control over financial reporting**

In March 2023, the Group reported material weaknesses of internal control over financial reporting as disclosed and detailed in the 2022 Annual Report audited financial statements in the section entitled "Controls and procedures". Management is committed to maintaining a strong internal control environment and implementing measures designed to ensure that the material weaknesses are remediated as soon as possible.

**Supply chain finance funds matter**

As previously reported, in early March 2021, the boards of four supply chain finance funds (SCFF) managed by certain Group subsidiaries decided to suspend redemptions and subscriptions of those funds to protect the interests of the funds' investors, to terminate the SCFF and to proceed to their liquidation. Credit Suisse Asset Management (Schweiz) AG (CSAM) acts as the portfolio manager of the SCFF.

Beginning in 4Q21, we introduced a fee waiver program for clients impacted by this matter wherein certain commissions and fees arising from current and future business transactions may be reimbursed on a quarterly basis, provided certain conditions are met. We incurred negative revenues of CHF 13 million in 1Q23 relating to this fee waiver program, primarily in Wealth Management.

**Significant negative consequences of the Archegos and supply chain finance funds matters**

In prior financial reports, we have outlined the losses associated with the Archegos matter and the legal and regulatory consequences of that matter and the SCFF matter. There can be no assurance that any additional losses, damages, costs and expenses, as well as any further regulatory and other investigations and actions or any further downgrade of our credit ratings, will not be material to us, including from any impact on our business, financial condition, results of operations, prospects, liquidity, capital position or reputation. For example, we have suffered and may continue to suffer reputational harm and reductions in certain areas of our business, such as outflows of assets, attributable, at least in part, to these matters. The ongoing effect of these matters, and this harm and these reductions, can continue to affect our business overall, including our ability to attract and retain customers, clients, investors and employees and to conduct business transactions with our counterparties. Our employee attrition has been higher over the last year, undoubtedly owing at least in part to these matters. While steps we have taken in response to the Archegos and SCFF matters are designed to reduce the Group's risks, some of these changes will constrain certain areas of our business, thereby impacting negatively our results of operations. These challenges are taking place in the context of worsening macroeconomic and market conditions, potentially amplifying some of the negative consequences noted above.

> Refer to "Risk factors" in I – Information on the company and "Note 40 - Litigation" in VI – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2022 for further information on risks that may arise in relation to these matters and for a description of the regulatory and legal developments relating to these matters.

**Format of presentation**

In managing our business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, specific individual revenue categories in isolation may not be indicative of performance. Certain reclassifications have been made to prior periods to conform to the current presentation.

**Performance measures**

Credit Suisse measures firm-wide returns against total shareholders' equity and tangible shareholders' equity, a non-GAAP financial measure also known as tangible book value. Tangible shareholders' equity is calculated by deducting goodwill and other intangible assets from total shareholders' equity as presented in our balance sheet. In addition, Credit Suisse also measures the efficiency of the firm and its divisions with regard to the usage of regulatory capital. Regulatory capital is calculated as the average of 13.5% of RWA and 4.25% of leverage exposure and return on regulatory capital, a non-GAAP financial measure, is calculated using income/(loss) after tax and assumes a tax rate of 30% for periods prior to 2020 and 25% from 2020 onward. For the Investment Bank, return on regulatory capital is based on US dollar denominated numbers. Return on regulatory capital excluding certain items included in our reported results is calculated using results excluding such items, applying the same methodology. Adjusted return on regulatory capital excluding certain items included in our reported results is calculated using results excluding such items, applying the same methodology.

Management believes that these metrics are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

## Risk factors

**The merger we previously announced with UBS is subject to closing conditions that, if not satisfied or, to the extent waivable, waived, would result in the merger not being completed, which could seriously jeopardize our financial viability and raise substantial doubt about our ability to continue as a going concern**

The merger is subject to the satisfaction (or waiver, to the extent waivable, by UBS) of a number of conditions as set forth in the merger agreement, including, among others, (i) receipt of approval of the transaction by FINMA and granting by FINMA of arrangements separately agreed upon and such decisions and arrangements remaining in full force and effect and not having been amended, conditioned or revoked before completion, (ii) receipt of certain other regulatory approvals that are not subject to any condition, restriction or undertaking that would reasonably be capable of causing a material adverse effect on us, UBS, any of our or UBS's subsidiaries or other affiliates, or the combined group and (iii) receipt of certain governmental approvals that are not subject to any condition, restriction, obligation or undertaking that would result in any disposal of any UBS asset or business or that would reasonably be capable of causing a material adverse effect on us, UBS, any of our or UBS's subsidiaries or other affiliates, or the combined group. There can be no assurance as to when these conditions to the transaction will be satisfied (or, to the extent waivable, waived by UBS), if at all, or that other events will not intervene to delay or result in the failure to complete the transaction. While Credit Suisse believes these conditions will be satisfied and that the merger will be successfully consummated, if the merger were not to be completed, our financial viability could be jeopardized, which would raise substantial doubt regarding our ability to continue as a going concern.

**Until the merger is consummated, the risks to our business and operations are exacerbated**

In light of the announced merger and other recent events leading to it, many of the risks contained under "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2022 filed with the Securities and Exchange Commission on March 14, 2023, are exacerbated. These risks include, among others, risks to our operations, the loss of clients, higher employee attrition, additional net asset and deposit outflows and further asset impairments, including subsidiary participation valuations (with potential impacts on Bank Parent capital), IT impairments and goodwill. For example, recent developments have already increased our employee attrition. Delays in the timely consummation of the merger could therefore have a material adverse effect on our business.

> Refer to "Risk factor" in I – Information on the company in the Credit Suisse Annual Report 2022 for further information on risks that could adversely affect our businesses, results of operations and financial condition.

## Reconciliation of adjustment items

Results excluding certain items included in our reported results are non-GAAP financial measures. Management believes that such results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

# Wealth Management

In 1Q23, we reported a loss before taxes of CHF 1,461 million, mainly reflecting a goodwill impairment charge of CHF 1,294 million, compared to a loss before taxes of CHF 2 million in 1Q22. Net revenues of CHF 893 million decreased 33% compared to 1Q22.

## Results summary

### 1Q23 results

In 1Q23, we reported a loss before taxes of CHF 1,461 million compared to a loss before taxes of CHF 2 million in 1Q22. Net revenues of CHF 893 million decreased 33%, mainly reflecting lower net interest income, lower transaction- and performance-based revenues and lower recurring commissions and fees. We recorded a provision for credit losses of CHF 21 million compared to a provision for credit losses of CHF 26 million in 1Q22. Total operating expenses of CHF 2,333 million increased 77%, mainly driven by a goodwill impairment charge of CHF 1,294 million in 1Q23.

We reported a loss before taxes of CHF 1,461 million compared to a loss before taxes of CHF 65 million in 4Q22. Net revenues decreased 18%, mainly reflecting lower other revenues and lower net interest income. We recorded a provision for credit losses of CHF 21 million compared to a release of provision for credit losses of CHF 5 million in 4Q22. Total operating expenses increased 100%, mainly driven by the goodwill impairment charge.

### Capital and leverage metrics

As of the end of 1Q23, we reported RWA of CHF 46.3 billion, a decrease of CHF 0.9 billion compared to the end of 4Q22, mainly due to movements in risk levels in credit risk, driven by a decrease in lending exposures, partially offset by positive impacts from external and internal model and parameter updates in credit risk. Leverage exposure of CHF 133.4 billion was CHF 7.0 billion lower compared to the end of 4Q22, mainly driven by lower business usage and a decrease in high-quality liquid assets (HQLA).

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction- and performance-based income.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

## Results details

### Net revenues

Compared to 1Q22, net revenues of CHF 893 million decreased 33%, reflecting lower net interest income, lower transaction- and performance-based revenues, lower recurring commissions and fees and lower other revenues. Net interest income of CHF 345 million decreased 37%, mainly reflecting lower loan margins on lower average loan volumes, higher costs related to interest rate management, higher funding costs due to significant deposit outflows and lower funding benefits. These results were partially offset by the impact of higher deposit margins despite significantly lower average deposit volumes. Transaction- and performance-based revenues of CHF 206 million decreased 43%, mainly driven by lower client activity and lower corporate advisory fees. Recurring commissions and fees of CHF 342 million decreased 17%, adversely impacted by lower average assets under management, and mainly reflected in lower discretionary mandate fees, lower investment product fees, lower security account and custody services fees and lower investment advisory fees. Other revenues were zero in 1Q23 compared to other revenues of CHF 20 million in 1Q22, mainly reflecting gains on the sale of real estate of CHF 20 million.

Compared to 4Q22, net revenues decreased 18%, reflecting lower other revenues, lower net interest income and lower recurring commissions and fees, partially offset by higher transaction- and performance-based revenues. Other revenues were zero in 1Q23 compared to other revenues of CHF 114 million in 4Q22, mainly reflecting a gain on the sale of real estate of CHF 122 million. Net interest income decreased 21%, mainly reflecting lower deposit margins on significantly lower average deposit volumes, stable loan margins on lower average loan volumes, higher costs related to interest rate management and higher funding costs due to significant deposit outflows. Recurring commissions and fees decreased 3%, reflecting the impact of lower average assets under management, and mainly driven by lower discretionary mandate fees, lower investment product fees and lower security account and custody services fees and lower investment advisory fees. Transaction- and performance-based revenues increased 9%, mainly driven by higher client activity, partially offset by lower corporate advisory fees.

> Refer to "Outflows in assets under management in 1Q23" in Credit Suisse for further information.

### Provision for credit losses

The loan portfolio is comprised of lombard lending, mortgages, ship finance, export finance, aviation and yacht finance and structured lending.

In 1Q23, we recorded a provision for credit losses of CHF 21 million compared to a provision for credit losses of CHF 26 million in 1Q22 and a release of provision for credit losses of CHF 5 million in 4Q22. The provision in 1Q23 was primarily driven by one case in the real estate sector and an increase in non-specific provisions for expected credit losses.

### Total operating expenses

Compared to 1Q22, total operating expenses of CHF 2,333 million increased 77%, mainly driven by the goodwill impairment charge of CHF 1,294 million and higher restructuring expenses of CHF 46 million in 1Q23, partially offset by lower general and administrative expenses. General and administrative expenses of CHF 299 million decreased 50%, as 1Q22 included significantly higher litigation expenses and lower allocated corporate function costs and lower professional services fees in 1Q23. Compensation and benefits of CHF 650 million were stable, with higher allocated corporate function costs offset by lower discretionary compensation expenses.

Compared to 4Q22, total operating expenses increased 100%, mainly driven by the goodwill impairment charge, partially offset by lower general and administrative expenses and lower restructuring expenses. General and administrative expenses decreased 29%, primarily driven by lower allocated corporate function costs, lower professional services fees, lower litigation expenses and lower advertising and marketing expenses. Compensation and benefits increased 2%, mainly from higher allocated corporate function costs and higher deferred compensation expenses from prior year awards, partially offset by lower discretionary compensation expenses.

### Margins

Our **gross margin** was 66 basis points in 1Q23, a decrease of eight basis points compared to 1Q22, mainly driven by lower net interest income, lower transaction- and performance-based revenues and lower recurring commissions and fees, partially offset by a 25.3% decrease in average assets under management.

Compared to 4Q22, our gross margin was nine basis points lower, mainly reflecting lower other revenues and lower net interest income, partially offset by a 7.2% decrease in average assets under management.

> Refer to "Assets under management" for further information.

Our **net margin** was negative 108 basis points in 1Q23, a decrease of 108 basis points and 103 basis points compared to 1Q22 and 4Q22, respectively. These decreases mainly reflected higher total operating expenses, driven by the goodwill impairment charge in 1Q23, and lower net revenues.

## Assets under management

As of the end of 1Q23, assets under management of CHF 502.5 billion were CHF 38.0 billion lower compared to the end of 4Q22, mainly driven by significant net asset outflows, partially offset by favorable market-related movements. Net asset outflows of CHF 47.1 billion were driven by outflows across all regions.

> Refer to "Outflows in assets under management in 1Q23" in Credit Suisse for further information.

# Swiss Bank

In 1Q23, we reported income before taxes of CHF 287 million compared to income before taxes of CHF 479 million in 1Q22. Net revenues of CHF 973 million decreased 15% compared to 1Q22, reflecting lower revenues across all major revenue categories.

## Results summary

### 1Q23 results

In 1Q23, income before taxes of CHF 287 million decreased 40% compared to 1Q22. Net revenues of CHF 973 million decreased 15%, reflecting lower revenues across all major revenue categories. Other revenues in 1Q22 included gains on the sale of real estate of CHF 84 million. Provision for credit losses was CHF 40 million compared to CHF 23 million in 1Q22. Total operating expenses of CHF 646 million were stable, mainly reflecting higher restructuring expenses, offset by lower general and administrative expenses.

Compared to 4Q22, income before taxes decreased 6%. Net revenues decreased 4%, primarily reflecting lower other revenues and lower net interest income. Other revenues in 4Q22 included gains on the sale of real estate of CHF 51 million, partially offset by a loss on the equity investment in SIX Swiss Exchange (SIX) of CHF 10 million. Provision for credit losses was CHF 40 million compared to CHF 28 million in 4Q22. Total operating expenses decreased 5%, mainly reflecting lower general and administrative expenses, partially offset by higher restructuring expenses.

### Capital and leverage metrics

As of the end of 1Q23, we reported RWA of CHF 70.4 billion, CHF 0.8 billion higher compared to the end of 4Q22, mainly related to internal model and parameter updates in credit risk, mainly due to model updates for income producing real estate, partially offset by a negative foreign exchange impact. Leverage exposure of CHF 231.5 billion increased CHF 10.7 billion compared to the end of 4Q22, primarily reflecting higher HQLA, reflecting an increase in cash held at central banks.

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction-based revenues arise primarily from brokerage fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction-based income. Other revenues include fair value gains/(losses) on synthetic securitized loan portfolios and other gains and losses.

## Results details

### Net revenues

Compared to 1Q22, net revenues of CHF 973 million decreased 15%, reflecting lower revenues across all major revenue categories. Net interest income of CHF 514 million decreased 11%, primarily driven by lower treasury revenues, mainly reflecting the absence of Swiss National Bank (SNB) threshold benefits following the SNB increase of interest rates, and lower loan margins on slightly lower average loan volumes, partially offset by higher deposit margins on lower average deposit volumes. Other revenues in 1Q22 included the gains on the sale of real estate. Recurring commissions and fees of CHF 308 million decreased 8%, mainly driven by lower discretionary mandate management fees, lower security account and custody services fees as well as lower banking services fees. Transaction-based revenues of CHF 151 million decreased 12%, mainly reflecting lower client activity as well as lower revenues from our Swiss investment banking business.

Compared to 4Q22, net revenues decreased 4%, primarily reflecting lower other revenues and lower net interest income. Other revenues in 4Q22 included the gains on the sale of real estate, partially offset by the loss on the equity investment in SIX. Net interest income decreased 2%, mainly driven by a negative impact from other banking book positions and lower loan margins on slightly lower average loan volumes, partially offset by higher deposit margins on lower average deposit volumes and higher treasury revenues. Transaction-based revenues decreased 4%, mainly reflecting lower revenues from our Swiss investment banking business, partially offset by higher brokerage and product issuing fees. Recurring commissions and fees increased 3%, primarily reflecting higher fees from lending activities.

### Provision for credit losses

The loan portfolio is substantially comprised of residential mortgages in Switzerland, loans secured by real estate, securities and other financial collateral as well as unsecured loans to commercial clients and, to a lesser extent, consumer finance loans.

In 1Q23, we recorded provision for credit losses of CHF 40 million compared to CHF 23 million in 1Q22 and CHF 28 million in 4Q22. The provisions in 1Q23 mainly included specific provisions reflecting several individual cases across various industries and non-specific provisions for credit losses of CHF 19 million.

### Total operating expenses

Compared to 1Q22, total operating expenses of CHF 646 million were stable, mainly reflecting higher restructuring expenses, offset by lower general and administrative expenses. In 1Q23, we incurred restructuring expenses of CHF 27 million. Compensation and benefits of CHF 413 million were stable, mainly reflecting higher deferred compensation expenses from prior-year awards, higher salary expenses as well as higher social security expenses, offset by lower discretionary compensation expenses. General and administrative expenses of CHF 178 million decreased 10%, primarily reflecting lower allocated corporate function costs.

Compared to 4Q22, total operating expenses decreased 5%, mainly reflecting lower general and administrative expenses, partially offset by higher restructuring expenses. General and administrative expenses decreased 22%, mainly reflecting lower allocated corporate function costs as well as lower advertising and marketing expenses. Compensation and benefits were stable, mainly reflecting higher social security expenses, higher deferred compensation expenses from prior-year awards as well as higher allocated corporate function costs, offset by lower discretionary compensation expenses and lower pension expenses.

### Margins

Our **gross margin** was 73 basis points in 1Q23, a decrease of five basis points compared to 1Q22, reflecting lower revenues across all major revenue categories, partially offset by a 9.2% decrease in average assets under management. Compared to 4Q22, our gross margin was four basis points lower, mainly driven by lower other revenues and lower net interest income with stable average assets under management.

> Refer to "Assets under management" for further information.

Our **net margin** was 21 basis points in 1Q23, a decrease of twelve basis points compared to 1Q22, mainly driven by lower net revenues, partially offset by the lower average assets under management. Compared to 4Q22, our net margin was two basis points lower, driven by lower net revenues on stable average assets under management, partially offset by lower total operating expenses.

## Assets under management

As of the end of **1Q23**, assets under management of CHF 526.6 billion were stable compared to the end of 4Q22, mainly reflecting favorable market movements, offset by net asset outflows. Net asset outflows of CHF 6.9 billion mainly reflected outflows in our private clients business.

> Refer to "Outflows in assets under management in 1Q23" in Credit Suisse for further information.

# Asset Management

In 1Q23, we reported a loss before taxes of CHF 31 million and net revenues of CHF 187 million. Net revenues decreased 45% and 28% compared to 1Q22 and 4Q22, respectively.

## Results summary

### 1Q23 results

In 1Q23, we reported a loss before taxes of CHF 31 million, compared to income before taxes of CHF 57 million in 1Q22, reflecting reduced net revenues. Net revenues of CHF 187 million decreased 45% compared to 1Q22, driven mainly by decreased investment and partnership income and reduced management fees. Total operating expenses of CHF 218 million decreased 23% compared to 1Q22, primarily driven by lower general and administrative expenses and lower compensation and benefits.

Our 1Q23 loss before taxes of CHF 31 million compared to a loss of CHF 28 million in 4Q22, reflecting lower net revenues, partially offset by lower total operating expenses. Net revenues decreased 28%, driven by decreased investment and partnership income, partially offset by higher performance and transaction revenues. Total operating expenses decreased 24%, mainly reflecting lower general and administration expenses and reduced compensation and benefits.

### Capital and leverage metrics

As of the end of 1Q23, RWA of CHF 8.1 billion were stable compared to the end of 4Q22. Leverage exposure of CHF 2.3 billion decreased CHF 0.2 billion compared to the end of 4Q22.

Management fees include fees on assets under management and asset administration revenues. Performance revenues relate to the performance or return of the funds being managed and includes investment-related gains and losses from proprietary funds. Transaction fees relate to the acquisition and disposal of investments in the funds being managed. Investment and partnership income includes equity participation income from seed capital returns and from minority investments in third-party asset managers, income from strategic partnerships and distribution agreements and other revenues.

## Results detail

### Net revenues

Compared to 1Q22, net revenues of CHF 187 million decreased 45%, reflecting decreased investment and partnership income and reduced management fees, partially offset by higher performance and transaction revenues. The decrease in investment and partnership income was mainly due to a currency translation adjustment and impairment on the planned partial disposal of an investment. Management fees of CHF 234 million decreased 14%, reflecting a combination of lower average assets under management and increased investor bias towards passive products. Performance and transaction revenues of CHF 27 million increased 8%, mainly driven by investment-related gains.

Compared to 4Q22, net revenues decreased 28%, driven by decreased investment and partnership income, partially offset by higher performance and transaction revenues. The decrease in investment and partnership income was mainly due to a currency translation adjustment and impairment on the planned partial disposal of an investment. Performance and transaction revenues increased by CHF 24 million, mainly driven by higher investment-related gains. Management fees were stable.

## Total operating expenses

Compared to 1Q22, total operating expenses of CHF 218 million decreased 23%, mainly reflecting lower general and administrative expenses and reduced compensation and benefits. General and administrative expenses of CHF 66 million decreased 41%, mainly reflecting reduced professional services fees related to the wind down and administration of the SCFF. Compensation and benefits of CHF 128 million decreased 10%, mainly reflecting lower discretionary compensation expenses. In 1Q23, we incurred restructuring expenses of CHF 4 million.

Compared to 4Q22, total operating expenses decreased 24%, mainly reflecting lower general and administrative expenses and reduced compensation and benefits. General and administrative expenses decreased 41%, mainly reflecting lower allocated corporate function costs and reduced professional services fees related to the wind down and administration of the SCFF. Compensation and benefits decreased 10%, mainly reflecting lower discretionary compensation expenses.

## Assets under management

As of the end of 1Q23, assets under management of CHF 399.4 billion were CHF 3.0 billion lower compared to the end of 4Q22, mainly reflecting net asset outflows, partially offset by favorable market movements. Net asset outflows of CHF 11.6 billion were driven by outflows from traditional investments, in particular fixed income and index solutions, and from alternative investments, primarily related to outflows in credit.

> Refer to "Outflows in assets under management in 1Q23" in Credit Suisse for further information.

<sup>1</sup> Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned.

# Investment Bank

In 1Q23, we reported a loss before taxes of CHF 448 million compared to income before taxes of CHF 162 million in 1Q22. Net revenues of CHF 1,017 million decreased 37% compared to 1Q22, reflecting continued challenging market conditions. Performance was impacted by weak client activity in light of previously disclosed issues affecting Credit Suisse.

## Results summary

### 1Q23 results

In 1Q23, we reported a loss before taxes of CHF 448 million compared to income before taxes of CHF 162 million in 1Q22. Net revenues of CHF 1,017 million decreased 37% compared to 1Q22, mainly driven by low client activity and less favorable conditions, particularly in our equity sales and trading, capital markets and advisory franchises. These declines were partially offset by gains of CHF 236 million (USD 257 million) on increased buyback activity principally in our structured notes portfolio across equities and fixed income at prices reflecting significantly wider own credit spreads. In 1Q23, we recorded provision for credit losses of CHF 18 million compared to a release of CHF 3 million in 1Q22. Total operating expenses of CHF 1,447 million were stable compared to 1Q22, reflecting reduced compensation and benefits and lower general and administrative expenses, offset by increased restructuring expenses and a goodwill impairment charge. In light of our strategic actions, total operating expenses included CHF 106 million of restructuring expenses in 1Q23. Adjusted total operating expenses decreased 9% compared to 1Q22.

In 1Q23, we reported a loss before taxes of CHF 448 million compared to a loss of CHF 775 million in 4Q22. Net revenues increased 64% compared to low levels in 4Q22 and included gains on the buyback activity principally in our structured notes portfolio. We recorded a provision for credit losses of CHF 18 million compared to a provision of CHF 2 million in 4Q22. Total operating expenses increased 4%, mainly due to higher compensation and benefits, partially offset by lower restructuring expenses and lower general and administrative expenses. Adjusted total operating expenses increased 8% compared to 4Q22.

### Capital and leverage metrics

As of the end of 1Q23, RWA of USD 43.4 billion increased USD 0.6 billion compared to the end of 4Q22, mainly driven by an increase in movements in risk levels in operational risk, primarily reflecting a reduction in operational risk insurance, partially offset by a decrease in movements in risk levels in market risk, including reduced rates exposure. Leverage exposure of USD 129.4 billion decreased USD 10.3 billion compared to the end of 4Q22, largely driven by timing on settlement of US treasury auctions, partially offset by reduced collateral utilization.

## Results details

### Fixed income sales and trading

In 1Q23, fixed income revenues of CHF 278 million decreased 5% compared to 1Q22, as low client activity across most businesses was partially offset by constructive market conditions in global credit products and rates. We had lower revenues in our foreign exchange and credit investor products franchises, mainly due to less favorable trading conditions. These decreases were partially offset by higher revenues in global credit products, mainly driven by a significant increase in investment grade trading revenues due to heightened volatility. Revenues in our rates franchise increased, driven by strong interest rate volatility coupled with gains on the buyback activity principally in our structured notes portfolio.

Compared to 4Q22, fixed income revenues increased 40%, reflecting improved performance across most products, albeit from low levels. We had higher revenues in credit investor products compared to a weak 4Q22 performance, driven by increased client activity and higher new issuance volumes. Revenues in global credit products increased significantly, mainly driven by a substantial increase in investment grade trading revenues. We also had higher revenues in our foreign exchange franchise. We saw lower revenues in our rates franchise compared to a strong 4Q22 performance despite gains on the buyback activity principally in our structured notes portfolio.

### Equity sales and trading

In 1Q23, equity sales and trading revenues of CHF 420 million decreased 36% compared to a strong 1Q22, which benefitted from more favorable market conditions, including high levels of volatility, which led to strong trading volumes. Equity derivatives revenues decreased significantly compared to a strong 1Q22 mainly reflecting lower results in flow derivatives and structured equity derivatives, despite significant gains on the buyback activity principally in our structured notes portfolio. Cash equities revenues declined, consistent with the lower trading volumes across regions.

Compared to 4Q22, equity sales and trading revenues increased significantly from very low levels. The increase was primarily driven by higher equity derivatives revenues, particularly in our structured equity derivatives franchise, which was significantly impacted by gains on the buyback activity principally in our structured notes portfolio. In 4Q22, structured equity derivatives were significantly adversely impacted by low client activity, including as a result of the Group's credit rating downgrades in the quarter. Cash equities revenues declined due to lower revenues in EMEA and the Americas.

### Capital markets

In 1Q23, capital markets revenues of CHF 241 million decreased 45% compared to 1Q22, reflecting significantly lower street fees across products, challenging market conditions and lower market share, partially offset by a recovery on unrealized mark-to-market losses in our leveraged finance underwriting portfolio. Debt capital markets revenues decreased, reflecting reduced issuance activity, particularly in leveraged finance. In addition, equity capital markets revenues decreased significantly, reflecting continued subdued street fees and lower market share.

Compared to 4Q22, capital markets revenues increased 41%, driven by significantly higher debt capital markets revenues reflecting the recovery on unrealized mark-to-market losses in our leveraged finance underwriting portfolio. This was partially offset by lower revenues in equity capital markets due to a prolonged downturn in issuance activity.

### Advisory and other fees

In 1Q23, advisory revenues of CHF 77 million decreased 63%, reflecting reduced industry-wide activity and lower market share.

Compared to 4Q22, advisory revenues decreased 58%, reflecting reduced industry-wide activity and lower market share.

### Provision for credit losses

In 1Q23, we recorded provision for credit losses of CHF 18 million compared to a release of CHF 3 million in 1Q22 and provision for credit losses of CHF 2 million in 4Q22. Provision for credit losses in 1Q23 mainly included higher non-specific provisions for expected credit losses.

### Total operating expenses

In 1Q23, total operating expenses of CHF 1,447 million were stable compared to 1Q22, reflecting reduced compensation and benefits and lower general and administrative expenses, offset by increased restructuring expenses and a goodwill impairment charge. Compensation and benefits of CHF 789 million decreased 9%, reflecting lower discretionary compensation expenses and reduced deferred compensation expenses from prior year awards, partially offset by higher salary expenses reflecting the impact of deferred fixed cash compensation granted to certain employees in 2Q22. General and administrative expenses of CHF 432 million decreased 7%, mainly reflecting lower consulting expenses. In 1Q23, we incurred restructuring expenses of CHF 106 million, which included an impairment of internally developed software costs, compared to CHF 4 million in 1Q22. Adjusted total operating expenses decreased 9% compared to 1Q22.

Compared to 4Q22, total operating expenses increased 4%, mainly due to higher compensation and benefits, partially offset by lower restructuring expenses and lower general and administrative expenses. Compensation and benefits increased 20%, as 4Q22 mainly reflecting the acceleration of deferred compensation expenses due to the cancellation of outstanding deferred compensation awards. In 1Q23, we incurred restructuring expenses of CHF 106 million compared to CHF 165 million in 4Q22. General and administrative expenses decreased 12%, reflecting reduced allocated corporate function costs and consulting expenses. Adjusted total operating expenses increased 8% compared to 4Q22.

### Investment banking & capital markets fees

In order to reflect the performance and capabilities of the capital markets and advisory business and for enhanced comparability versus peers, the table below shows advisory, debt capital markets and equity capital markets fees in US dollar terms. Fees are defined as gross revenues generated from advisory and capital markets activity as well as derivatives in connection with such activity, before allocated funding costs, and excludes mark-to-market movements in debt underwriting, including leveraged finance.

	1Q23	4Q22	in 1Q22	QoQ	% change YoY
<b>Investment banking &amp; capital markets fees (USD million)</b>					
Advisory	98	187	228	(48)	(57)
Debt capital markets <sup>1</sup>	162	169	347	(4)	(53)
Equity capital markets	56	100	117	(44)	(52)
<b>Investment banking &amp; capital markets fees</b>	<b>316</b>	<b>456</b>	<b>692</b>	<b>(31)</b>	<b>(54)</b>

<sup>1</sup> Excludes mark-to-market movements of USD 80 million in 1Q23, USD (50) million in 4Q22 and USD (2) million 1Q22.

# Corporate Center

In 1Q23, we reported income before taxes of CHF 14,816 million compared to losses of CHF 730 million in 1Q22 and income before taxes of CHF 113 million in 4Q22.

## Corporate Center composition

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group, including costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements, and certain other expenses and revenues that have not been allocated to the segments. Corporate Center results also include legacy funding costs, legacy litigation expenses, a specific client compliance function and noncontrolling interests without significant economic interest. Corporate Center further includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Treasury results include the impact of volatility in the valuations of certain central funding transactions such as structured notes issuances and swap transactions. Treasury results also include additional interest charges from transfer pricing to align funding costs to assets held in the Corporate Center and legacy funding costs. Other revenues primarily include required elimination adjustments associated with trading in own shares, treasury commissions charged to divisions, the cost of certain hedging transactions executed in connection with the Group's RWA and valuation hedging impacts from long-dated legacy deferred compensation and retirement programs mainly relating to former employees.

Compensation and benefits include fair value adjustments on certain deferred compensation plans not allocated to the segments and fair value adjustments on certain other long-dated legacy deferred compensation and retirement programs mainly relating to former employees.

## Results summary

### 1Q23 results

In 1Q23, we reported income before taxes of CHF 14,816 million compared to losses before taxes of CHF 730 million in 1Q22 and income before taxes of CHF 113 million in 4Q22. Net revenues of CHF 15,052 million in 1Q23 were primarily driven by treasury results, which reflected the additional tier 1 capital notes write-down ordered by FINMA. Total operating expenses of CHF 236 million decreased 54% compared to 1Q22, mainly reflecting lower general and administrative expenses. Compared to 4Q22, total operating expenses increased 146%, primarily driven by higher compensation and benefits.

### Capital and leverage metrics

As of the end of 1Q23, RWA of CHF 39.3 billion was stable compared to the end of 4Q22, as increases in movements in risk levels in credit risk, including the usage of liquidity facilities, were offset by the de-risking of our securitized products business in operational risk. Leverage exposure was CHF 48.3 billion as of the end of 1Q23, an increase of CHF 24.0 billion compared to the end of 4Q22, mainly driven by an increase in our centrally held balance of HQLA, reflecting liquidity facilities, and higher business usage.

## Results details

### Net revenues

In 1Q23, we reported net revenues of CHF 15,052 million compared to negative net revenues of CHF 213 million in 1Q22 and net revenues of CHF 209 million in 4Q22.

Treasury results of CHF 15,009 million in 1Q23 primarily reflected revenues of CHF 14,988 million relating to funding activities, primarily due to the gains from the write-down of the additional tier 1 capital notes. In 1Q22, negative treasury results of CHF 255 million primarily reflected losses of CHF 135 million from fair value option volatility on own debt and volatility arising from hedging of that debt, losses of CHF 50 million with respect to structured notes volatility, losses of CHF 38 million relating to fair-valued money market instruments and losses of CHF 30 million relating to funding activities. In 4Q22, treasury results of CHF 212 million primarily reflected gains of CHF 94 million relating to fair-valued money market instruments, gains of CHF 58 million with respect to structured notes volatility, revenues of CHF 43 million relating to funding activities, as well as net gains of CHF 18 million from fair value option volatility on own debt and volatility arising from hedging of that debt.

### Total operating expenses

Total operating expenses of CHF 236 million decreased CHF 282 million compared to 1Q22, mainly reflecting a decrease in general and administrative expenses, partially offset by an increase in compensation and benefits. General and administrative expenses of CHF 96 million decreased CHF 377 million, mainly reflecting lower litigation expenses. 1Q23 included litigation expenses of CHF 30 million and 1Q22 included litigation expenses of CHF 435 million, mainly legacy litigation expenses in connection with mortgage-related matters. In 1Q23, compensation and benefits increased CHF 75 million, mainly driven by higher deferred compensation and expenses from prior-year awards and higher expenses for long-dated deferred compensation and retirement programs. We incurred restructuring expenses of CHF 17 million.

Compared to 4Q22, total operating expenses increased CHF 140 million, mainly reflecting increases in compensation and benefits and general and administrative expenses, partially offset by a decrease in restructuring expenses. Compensation and benefits increased CHF 126 million, mainly driven by higher deferred compensation and expenses from prior-year awards. General and administrative expenses increased CHF 37 million, mainly reflecting expenses in relation to certain projects funded by the Corporate Center.

# Capital Release Unit

In 1Q23, we reported a loss before taxes of CHF 399 million compared to a loss before taxes of CHF 394 million in 1Q22. We reduced RWA and leverage exposure by CHF 6.5 billion and CHF 13.8 billion, respectively, compared to 4Q22.

## Capital Release Unit composition

As previously announced, as of 1Q23 the Capital Release Unit comprises our Non-Core Unit and the residual of our SPG businesses. The Non-Core Unit includes assets, operating expenses and funding costs associated with the following businesses and activities: the remaining global prime services business, select European lending and capital markets activities, non-Wealth Management-related lending in emerging markets, our global trust business, select trading assets from our Markets business and residual assets transferred from the Asset Resolution Unit. Transfers from the Investment Bank division included corporate bank and emerging markets loans, equity swaps, fixed income trading, rates and foreign exchange, legacy life finance business and minority interest investments.

## Results summary

### 1Q23 results

In 1Q23, we reported a loss before taxes of CHF 399 million compared to a loss before taxes of CHF 394 million in 1Q22. Net revenues of CHF 345 million increased 81%, primarily reflecting a gain from the Apollo transaction of CHF 726 million, partially offset by a loss of revenues from businesses transferred from the Investment Bank, particularly from SPG. Net revenues in 1Q22 included a loss of CHF 353 million on the equity investment in Allfunds Group. Provision for credit losses in 1Q23 was CHF 4 million compared to a release of provision for credit losses of CHF 155 million in 1Q22 which reflected an assessment of the future recoverability of receivables related to Archegos. Total operating expenses of CHF 740 million were stable, as higher restructuring expenses and higher general and administrative expenses were offset by lower compensation and benefits and lower commission expenses.

Our 1Q23 loss before taxes of CHF 399 million compared to a loss before taxes of CHF 866 million in 4Q22. Net revenues increased CHF 486 million, mainly reflecting the gain on the Apollo transaction. Provision for credit losses of CHF 4 million compared to CHF 15 million in 4Q22. Total operating expenses increased 4%, mainly reflecting higher compensation and benefits and higher restructuring expenses, partially offset by lower general and administrative expenses.

Adjusted results are non-GAAP financial measures. Refer to "Reconciliation of adjustment items" in Credit Suisse for further information.

### Capital and leverage metrics

As of the end of 1Q23, we reported RWA of CHF 39.7 billion, CHF 6.5 billion lower compared to the end of 4Q22, mainly due to movements in risk levels in credit risk and market risk, reflecting the Apollo transaction, the sale of residual assets and de-risking activities across the Non-Core Unit. Leverage exposure of CHF 119.6 billion decreased CHF 13.8 billion compared to the end of 4Q22. The reductions in leverage exposure related to the Apollo transaction, the sale of residual assets and de-risking activities across the Non-Core Unit, partially offset by an increase in HQLA allocations.

## Results details

### Net revenues

Compared to 1Q22, net revenues of CHF 345 million increased 81%, primarily reflecting a gain from the Apollo transaction of CHF 726 million, partially offset by a loss of revenues from businesses transferred from the Investment Bank, particularly from SPG. Net revenues in 1Q23 also included losses on the valuation of certain financing arrangements associated with the Apollo transaction. In 1Q22, net revenues included a loss of CHF 353 million on the equity investment in Allfunds Group.

Compared to 4Q22, net revenues increased CHF 486 million, mainly reflecting higher net revenues from the gain on the Apollo transaction. In 4Q22, negative net revenues primarily reflected a combination of lower trading revenues observed after the strategy announcement and costs incurred to de-leverage the portfolio in response to the Group's significant deposit outflows.

### Provision for credit losses

In 1Q23, we recorded provision for credit losses of CHF 4 million compared to a release of provision for credit losses of CHF 155 million in 1Q22 and provision for credit losses of CHF 15 million in 4Q22. The release of provisions in 1Q22 reflected an assessment of the future recoverability of receivables related to Archegos.

### Total operating expenses

Compared to 1Q22, total operating expenses of CHF 740 million were stable, as higher restructuring expenses and higher general and administrative expenses were offset by lower compensation and benefits and lower commission expenses. Restructuring expenses of CHF 99 million increased CHF 66 million, mainly reflecting SPG-related expenses. General and administrative expenses of CHF 321 million increased 8%, mainly driven by professional services. Compensation and benefits of CHF 302 million decreased 13%, reflecting lower discretionary compensation expenses and lower salary expenses, primarily relating to the exit of prime services. Commission expenses of CHF 18 million decreased 70%, mainly driven by reduced trading activity, most notably from our prime services business.

Compared to 4Q22, total operating expenses increased 4%, mainly reflecting higher compensation and benefits and higher restructuring expenses, partially offset by lower general and administrative expenses. Compensation and benefits increased 32%, as 4Q22 included lower deferred compensation relating to a downward adjustment to performance share awards as a result of the full year 2022 Investment Bank loss and forfeitures on staff departures. Restructuring expenses increased CHF 55 million, mainly reflecting SPG-related expenses. General and administrative expenses decreased 21%, mainly reflecting lower corporate function allocations and lower litigation expenses.

# Assets under management

As of the end of 1Q23, assets under management were CHF 1,252.6 billion, 3.2% lower compared to the end of 4Q22, with net asset outflows of CHF 61.2 billion in 1Q23.

## Assets under management, client assets and net new assets

<sup>1</sup> Represents assets managed by Asset Management for the other businesses.

<sup>2</sup> Client assets is a broader measure than assets under management as it includes transactional accounts and assets under custody (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

<sup>3</sup> Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned.

## Results summary

In 1Q23, Credit Suisse experienced significant net outflows of assets under management.

> Refer to "Outflows in assets under management in 1Q23" in Credit Suisse for further information.

> Refer to "Wealth Management", "Swiss Bank" and "Asset Management" for further information.

### 1Q23 results

As of the end of 1Q23, assets under management of CHF 1,252.6 billion decreased CHF 41.0 billion compared to the end of 4Q22. The decrease was mainly driven by net asset outflows of CHF 61.2 billion, partially offset by favorable market movements of CHF 28.4 billion.

Net asset outflows of CHF 61.2 billion in 1Q23 mainly reflected outflows across the following businesses. Net asset outflows of CHF 47.1 billion in Wealth Management were driven by outflows across all regions. Net asset outflows of CHF 11.6 billion in Asset Management were driven by outflows from traditional investments, in particular fixed income and index solutions, and from alternative investments, primarily related to outflows in credit. Net asset outflows of CHF 6.9 billion in Swiss Bank mainly reflected outflows in the private clients business.

# Additional financial metrics

## Balance sheet

As of the end of 1Q23, total assets of CHF 540.3 billion increased 2% compared to 4Q22, reflecting higher operating activities, partially offset by a foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets increased CHF 12.6 billion, mainly reflecting significant increases in cash and due from banks, including central bank liquidity facilities, partially offset by decreases in trading assets and brokerage receivables.

## Litigation

The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for certain proceedings for which the Group believes an estimate is possible was zero to CHF 1.2 billion as of the end of 1Q23. Net litigation provisions recorded in 1Q23 were CHF 76 million.

## Total shareholders' equity

The Group's total shareholders' equity was CHF 54.1 billion as of the end of 1Q23 compared to CHF 45.1 billion as of the end of 4Q22. Total shareholders' equity was positively impacted by net income attributable to shareholders, partially offset by losses on fair value elected liabilities relating to credit risk and foreign exchange-related movements on cumulative translation adjustments.

## Liquidity metrics

Our three-month daily average LCR was 178% as of the end of 1Q23, an increase compared to 144% at the end of 4Q22. The increase in the LCR compared to 4Q22 was driven by a reduction in net cash outflows, partially offset by a small decrease in HQLA. The decrease in net cash outflows primarily resulted from a decrease in cash outflows from unsecured wholesale funding, mainly driven by decreases in non-operational deposits and unsecured debt as well as a decrease in outflows from credit and liquidity facilities mainly provided to other financial institutions. The net HQLA reduction is inclusive of offsetting gross movements driven by the aforementioned deposit outflows and subsequent liquidity assistance.

> Refer to "Credit Suisse and UBS to merge" in Credit Suisse for further information.

The NSFR was 108% as of the end of 1Q23 compared to 117% as of the end of 4Q22. The decrease in the NSFR reflects a decrease in available stable funding mainly attributed to a decrease in our deposits, partially offset by a decrease in required stable funding, primarily related to a decrease in our securities portfolio and our loans portfolio.

> Refer to "Liquidity issues in 1Q23" in Credit Suisse for further information.

## Capital metrics

The CET1 ratio was 20.3% as of the end of 1Q23 compared to 14.1% as of the end of 4Q22. The tier 1 ratio was 20.3% as of the end of 1Q23 compared to 20.0% as of the end of 4Q22. The total capital ratio was 20.3% as of the end of 1Q23 compared to 20.0% as of the end of 4Q22.

CET1 capital of CHF 49.4 billion as of the end of 1Q23 increased 40% compared to CHF 35.3 billion as of the end of 4Q22, mainly due to the net income attributable to shareholders, which included the impact of the additional tier 1 capital notes write-down.

Additional tier 1 capital decreased from CHF 14.7 billion as of the end of 4Q22 to CHF 0.0 billion as of the end of 1Q23 due to the additional tier 1 capital notes write-down. Total eligible capital of CHF 49.4 billion as of the end of 1Q23 was stable compared to the end of 4Q22.

RWA of CHF 243.4 billion as of the end of 1Q23 decreased 3% compared to CHF 250.5 billion as of the end of 4Q22, mainly due to movements in risk levels and a negative foreign exchange impact. The movements in risk levels were mainly due reduced secured financing, securitizations and derivatives exposures in credit risk and de-risking of our securitized products portfolio in market risk, primarily in the Capital Release Unit.

## BIS capital and leverage metrics

end of	1Q23	4Q22
<b>Capital metrics</b>		
Risk-weighted assets (CHF billion)	243.4	250.5
CET1 ratio (%)	20.3	14.1
Tier 1 ratio (%)	20.3	20.0
Total capital ratio (%)	20.3	20.0
<b>Leverage metrics</b>		
Leverage exposure (CHF billion)	653.0	650.6
CET1 leverage ratio (%)	7.6	5.4
Tier 1 leverage ratio (%)	7.6	7.7

Refer to the Appendix for additional information on BIS and Swiss capital and leverage metrics.

## Leverage metrics

The BIS tier 1 leverage ratio was 7.6% as of the end of 1Q23, with a BIS CET1 component of 7.6%.

Leverage exposure of CHF 653.0 billion as of the end of 1Q23 was stable compared to CHF 650.6 billion as of the end of 4Q22, as higher HQLA across most divisions, reflecting the liquidity facilities was offset by lower leverage exposure in the Investment Bank, mainly driven by timing on settlement of US treasury auctions, and in the Capital Release Unit, related to the Apollo transaction, the sale of residual assets and de-risking activities across the Non-Core Unit.

## Credit Suisse AG – parent company

Information on Credit Suisse AG (Bank parent company)'s capital position and ratios will be available in accordance with our ordinary Pillar 3 reporting requirements in May 2023 and may reflect participation impairments.

# Important information

The Group's independent registered public accounting firm has not completed a review of the financial information in this Earnings Release. Any subsequent completion of a review may result in changes to that information. Certain reclassifications have been made to prior periods to conform to the current presentation.

For purposes of this Earnings Release, unless the context otherwise requires, the terms "Credit Suisse", "the Group", "we", "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the direct bank subsidiary of the Group, is substantially similar to the Group, and these terms are used to refer to both when the subject is the same or substantially similar. The term "the Bank" is used when referring to Credit Suisse AG and its consolidated subsidiaries.

Information referenced in this Earnings Release, whether via website links or otherwise, is not incorporated into this Earnings Release.

Credit Suisse is subject to the Basel framework, as implemented in Switzerland, as well as Swiss legislation and regulations for systemically important banks (Swiss Requirements) (in each case, subject to certain phase-in periods), which include capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Credit Suisse adopted the BIS leverage ratio framework, as issued by the Basel Committee on Banking Supervision and implemented in Switzerland by the Swiss Financial Market Supervisory Authority FINMA.

Unless otherwise noted, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments. The tier 1 leverage ratio and CET1 leverage ratio are calculated as BIS tier 1 capital and CET1 capital, respectively, divided by period-end leverage exposure. Swiss leverage ratios are measured on the same period-end basis as the leverage exposure for the BIS leverage ratio.

We may not achieve all of the expected benefits of our strategic initiatives, such as in relation to the proposed transaction between Credit Suisse and UBS, our intended reshaping of the bank, cost reductions and strengthening and reallocating capital. Factors beyond our control, including but not limited to the market and economic conditions (including macroeconomic and other challenges and uncertainties, for example, resulting from Russia's invasion of Ukraine), the reaction by our clients, employees and others to our proposed initiatives, enhanced risks to our businesses during the contemplated transitions, changes in laws, rules or regulations and other challenges discussed in our public filings, such as reputational harm resulting from prior events or reactions to our strategic initiatives, could limit our ability to achieve some or all of the expected benefits of these initiatives. Our ability to implement our strategy objectives could also be impacted by timing risks, obtaining all required approvals and other factors. See also "Cautionary statement regarding forward-looking information" in Appendix, "Risk factors" in Credit Suisse and "Risk factors" in I – Information on the company in our Annual Report 2022 for further information.

The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions which is discussed above relates only to those proceedings for which the Group believes an estimate is possible and which are discussed in the litigation note to the Consolidated Financial Statements in the Group's Annual Report on Form 20-F and updated in its quarterly reports. It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. For additional details, see the litigation note to the Consolidated Financial Statements in the Group's Annual Report on Form 20-F and in each of its quarterly Financial Reports.

Investors and others should note that we announce important company information (including quarterly earnings releases and financial reports as well as our annual sustainability report) to the investing public using press releases, US Securities and Exchange Commission (SEC) and Swiss ad hoc filings, our website and public conference calls and webcasts. We also routinely use our Twitter account @creditsuisse (<https://twitter.com/creditsuisse>), our LinkedIn account (<https://www.linkedin.com/company/credit-suisse/>), our Instagram accounts ([https://www.instagram.com/creditsuisse\\_careers/](https://www.instagram.com/creditsuisse_careers/) and [https://www.instagram.com/creditsuisse\\_ch/](https://www.instagram.com/creditsuisse_ch/)), our Facebook account (<https://www.facebook.com/creditsuisse/>) and other social media channels as additional means to disclose public information, including to excerpt key messages from our public disclosures, including earnings releases. Excludes risks associated with counterparty and own credit exposures. Risk management VaR measures the Group's risk exposure managed under the market risk framework and generally includes the trading book positions and banking book positions held at fair value.

<sup>1</sup> Diversification benefit represents the reduction in risk that occurs when combining different, not perfectly correlated risk types in the same portfolio and is measured as the difference between the sum of the individual risk types and the risk calculated on the combined portfolio.

<sup>2</sup> As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

1 Distributions to owners in funds included the return of original capital invested and any related dividends.

2 Transactions with and without ownership changes related to fund activity were all displayed under "not changing ownership".

## Earnings per share

in	1Q23	4Q22	1Q22
<b>Basic net income/(loss) attributable to shareholders (CHF million)</b>			
Net income/(loss) attributable to shareholders for basic earnings per share	12,432	(1,393)	(273)
Available for common shares	12,432	(1,393)	(273)
<b>Diluted net income/(loss) attributable to shareholders (CHF million)</b>			
Net income/(loss) attributable to shareholders for diluted earnings per share	12,432	(1,393)	(273)
Available for common shares	12,432	(1,393)	(273)
<b>Weighted-average shares outstanding (million)</b>			
For basic earnings per share available for common shares	4,011.2	3,039.0	2,785.0
Dilutive share options and warrants	8.8	0.0	0.0
Dilutive share awards	20.0	0.0	0.0
For diluted earnings per share available for common shares <sup>1</sup>	4,040.0	3,039.0 <sup>2</sup>	2,785.0 <sup>2</sup>
<b>Earnings/(loss) per share available for common shares (CHF)</b>			
<b>Basic earnings/(loss) per share available for common shares</b>	<b>3.10</b>	<b>(0.46)</b>	<b>(0.10)</b>
<b>Diluted earnings/(loss) per share available for common shares</b>	<b>3.08</b>	<b>(0.46)</b>	<b>(0.10)</b>

1 Weighted-average potential common shares related to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 11.1 million, 9.9 million and 14.5 million for 1Q23, 4Q22 and 1Q22, respectively.

2 Due to the net losses in 4Q22 and 1Q22, 7.8 million and 0.8 million, respectively, of weighted-average share options and warrants outstanding and 31.1 million and 64.8 million, respectively, of weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

## Restructuring expenses

of which pension expenses	19	25	0
<b>Total restructuring expenses</b>	<b>299</b>	<b>352</b>	<b>46</b>

## Cautionary statement regarding forward-looking information

This document contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our statements as to the proposed transaction between Credit Suisse and UBS;
- our plans, targets or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “may,” “could,” “achieves,” “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, targets, goals, expectations, estimates and intentions expressed in such forward-looking statements. Additionally, many of these factors are beyond our control. These factors include, but are not limited to:

- the consummation of the proposed transaction between Credit Suisse and UBS, and the timing and implementation thereof;
- the ability to maintain sufficient liquidity and access capital markets;
- market volatility, increases in inflation and interest rate fluctuations or developments affecting interest rate levels;
- the ongoing significant negative consequences, including reputational harm, of the Archegos and supply chain finance funds matters, as well as other recent events, and our ability to successfully resolve these matters;
- the impact of media reports and social media speculation about our business and its performance;
- the extent of outflows of deposits and assets or future net new asset generation across our divisions;
- our ability to improve our risk management procedures and policies and hedging strategies;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular, but not limited to, the risk of negative impacts of COVID-19 on the global economy and financial markets, Russia's invasion of Ukraine, the resulting sanctions from the US, EU, UK, Switzerland and other countries and the risk of continued slow economic recovery or downturn in the EU, the US or other developed countries or in emerging markets in 2023 and beyond;
- the emergence of widespread health emergencies, infectious diseases or pandemics, such as COVID-19, and the actions that may be taken by governmental authorities to contain the outbreak or to counter its impact;
- potential risks and uncertainties relating to the severity of impacts from the COVID-19 pandemic, including potential material adverse effects on our business, financial condition and results of operations;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic initiatives, including those related to our targets, ambitions and goals, such as our financial ambitions as well as various goals and commitments to incorporate certain environmental, social and governance considerations into our business strategy, products, services and risk management processes;
- our ability to achieve our announced comprehensive new strategic direction for the Group and significant changes to its structure and organization;
- our ability to successfully implement the divestment of any non-core business;
- the future level of any impairments and write-downs resulting from strategy changes and their implementation;
- the ability of counterparties to meet their obligations to us and the adequacy of our allowance for credit losses;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies;
- the effects of currency fluctuations, including the related impact on our business, financial condition and results of operations due to moves in foreign exchange rates;
- geopolitical and diplomatic tensions, instabilities and conflicts, including war, civil unrest, terrorist activity, sanctions or other geopolitical events or escalations of hostilities, such as Russia's invasion of Ukraine;
- political, social and environmental developments, including climate change and evolving ESG-related disclosure standards;
- the ability to appropriately address social, environmental and sustainability concerns that may arise from our business activities;
- the effects of, and the uncertainty arising from, the UK's withdrawal from the EU;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyber attacks, information or security breaches or technology failures on our reputation, business or operations, the risk of which is increased while large portions of our employees work remotely;
- the adverse resolution of litigation, regulatory proceedings and other contingencies;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting or tax standards, policies or practices in countries in which we conduct our operations;
- the discontinuation of LIBOR and other interbank offered rates and the transition to alternative reference rates;
- the potential effects of changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to protect our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes instituted by us, our counterparties or competitors;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in *I – Information on the company* in our Annual Report 2022 and in “Risk factors” in *Credit Suisse* in our 1Q23 Earnings Release.

## **Credit Suisse receives Notice of Non-Compliance with NYSE Share Price Listing Rule**

Zurich, May 31, 2023 - Credit Suisse Group AG (Credit Suisse) announced today that the New York Stock Exchange (NYSE) notified Credit Suisse on May 1, 2023, that it is no longer in compliance with the NYSE's continued listing minimum price criteria set forth in the NYSE Listed Company Manual, which requires listed companies to maintain an average closing share price of at least \$1.00 over a consecutive 30 trading-day period.

In accordance with NYSE rules, Credit Suisse must disclose receipt of the notice and has six months to regain compliance with the NYSE's continued listing minimum price criteria. Credit Suisse expects that the deficiency will be cured upon completion of the acquisition by UBS Group AG (UBS) of Credit Suisse that was announced on March 19, 2023. Upon consummation of the acquisition, UBS will be the surviving entity. In connection with the acquisition, Credit Suisse's ordinary shares underlying its American Depositary Shares will be exchanged for the right to receive a fraction of a UBS ordinary share and as a result delisted from the NYSE.

### **Credit Suisse**

Credit Suisse is one of the world's leading financial services providers. The bank's strategy is built on its leading Wealth Management and Swiss Bank franchises, with strong Asset Management as well as Markets capabilities. Credit Suisse seeks to follow a balanced approach to wealth management, aiming to capitalize on both the large pool of wealth within mature markets as well as the significant growth in wealth in Asia Pacific and other emerging markets, while also serving key developed markets with an emphasis on Switzerland. The bank employs more than 45,000 people. The registered shares (CSGN) of Credit Suisse Group AG are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found at [www.credit-suisse.com](http://www.credit-suisse.com).

### **Cautionary statement regarding forward-looking information**

**PART II**  
**INFORMATION NOT REQUIRED IN PROSPECTUS**

**Item 20. Indemnification of Directors and Officers**

Under Swiss law, directors and senior officers acting in violation of their statutory duties, whether dealing with bona fide third parties or performing any other acts on behalf of the company, may become liable to the company, its shareholders and (in bankruptcy) its creditors for damages. The directors' liability is joint and several but only to the extent the damage is attributable to each director based on willful or negligent violation of duty. If the board of directors lawfully delegated the power to carry out day-to-day management to a different corporate body, such as an executive board, the board of directors is not vicariously liable for the acts of the members of the executive board. Instead, the directors can be held liable for their failure to properly select, instruct or supervise the executive board members. If directors and officers enter into a transaction on behalf of the company with bona fide third parties in violation of their statutory duties, the transaction is nevertheless valid as long as it is not excluded by the company's business purpose.

Under Swiss law, a company may indemnify a director or officer of the company against losses and expenses (unless such losses and expenses result from a culpable breach of such director's or officer's fiduciary duties under Swiss law), including attorney's fees, judgments, fines and settlement amounts actually and reasonably incurred in a civil or criminal action, suit or proceeding by reason of having been the representative of or serving at the request of the company.

The UBS Group AoA do not contain provisions regarding the indemnification of directors and officers but, according to general principles of Swiss employment law, an employer may, under certain circumstances, be required to indemnify an employee against losses and expenses incurred by him in the execution of his duties under the employment agreement, unless the losses and expenses arise from the employee's gross negligence or willful misconduct.

Insofar as indemnification for liabilities arising under the U.S. Securities Act may be permitted to directors, officers or persons controlling UBS Group AG pursuant to the foregoing provisions, UBS Group AG has been informed that in the opinion of the SEC such indemnification is against public policy as expressed in the U.S. Securities Act and is therefore unenforceable.

**Item 21. Exhibits and Financial Statements Schedules**

A list of the exhibits included as part of this registration statement is set forth in the Exhibit Index that immediately precedes such exhibits and is incorporated herein by reference.

**Item 22. Undertakings**

The undersigned registrant hereby undertakes:

- (1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:
  - i. To include any prospectus required by Section 10(a)(3) of the U.S. Securities Act of 1933;
  - ii. To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of a prospectus filed with the SEC pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and

- iii. To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.
- (2) That, for the purpose of determining any liability under the U.S. Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.
- (3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.
- (4) To file a post-effective amendment to the registration statement to include any financial statements required by Item 8.A of Form 20-F at the start of any delayed offering or throughout a continuous offering. Financial statements and information otherwise required by Section 10(a)(3) of the U.S. Securities Act of 1933 need not be furnished, provided that the registrant includes in the prospectus, by means of a post-effective amendment, financial statements required pursuant to this paragraph (4) and other information necessary to ensure that all other information in the prospectus is at least as current as the date of those financial statements.
- (5) That, for the purpose of determining liability under the U.S. Securities Act of 1933 to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness; provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.
- (6) That, for the purpose of determining liability of the registrant under the U.S. Securities Act of 1933 to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:
  - i. any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;
  - ii. any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;
  - iii. the portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and
  - iv. any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.
- (7) That, for purposes of determining any liability under the U.S. Securities Act of 1933, each filing of the registrant's annual report pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

- (8) That, prior to any public reoffering of the securities registered hereunder through use of a prospectus which is a part of this registration statement, by any person or party who is deemed to be an underwriter within the meaning of Rule 145(c), the issuer undertakes that such reoffering prospectus will contain the information called for by the applicable registration form with respect to reofferings by persons who may be deemed underwriters, in addition to the information called for by the other Items of the applicable form.
- (9) That every prospectus: (a) that is filed pursuant to the immediately preceding paragraph, or (b) that purports to meet the requirements of Section 10(a)(3) of the U.S. Securities Act of 1933 and is used in connection with an offering of securities subject to Rule 415, will be filed as a part of an amendment to the registration statement and will not be used until such amendment is effective, and that, for purposes of determining any liability under the U.S. Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.
- (10) Insofar as indemnification for liabilities arising under the U.S. Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that, in the opinion of the SEC, such indemnification is against public policy as expressed in the U.S. Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the U.S. Securities Act of 1933 and will be governed by the final adjudication of such issue.
- (11) To respond to requests for information that are incorporated by reference into the prospectus pursuant to Items 4, 10(b), 11 or 13 of this Form, within one business day of receipt of such request, to send the incorporated documents by first class mail or other equally prompt means and to arrange or provide for a facility in the United States for the purpose of responding to such requests. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.
- (12) To supply by means of a post-effective amendment all information concerning a transaction, and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.

## EXHIBIT INDEX

- 2.1†\* Amended and Restated Merger Agreement, dated as of March 19, 2023 and amended on April 6, 2023 and May 22, 2023, by and between UBS Group AG and Credit Suisse Group AG
- 3.1\* Articles of Association of UBS Group AG, dated as of 5 April 2023
- 3.2\* Organization Regulations of UBS Group AG dated as of 1 January 2023

**THIS LOSS PROTECTION AGREEMENT** is dated on the date stated at the beginning of this Agreement, effective as of the Effective Date and made between:

- (A) **THE SWISS CONFEDERATION**, represented by the Federal Department of Finance, Bundesgasse 3, 3003 Berne, Switzerland (“**Confederation**”); and
- (B) **UBS GROUP AG**, a stock corporation (*Aktiengesellschaft*) incorporated in Switzerland with registered number CHE-395.345.924, whose registered office is at Bahnhofstrasse 45, 8001 Zurich, Switzerland (“**UBS**”)

(the Confederation and UBS each a “**Party**” and collectively the “**Parties**”).

**WHEREAS:**

- (1) Pursuant to article 14a of the Federal Additional Liquidity Ordinance, the Confederation may grant a loss protection guarantee (*Garantie zur Verlustabsicherung abzuwickelnder Aktiven der übernommenen Bank*) to the acquiring bank in connection with transactions pursuant to the Swiss Merger Act between banks supervised by the Swiss Financial Market Supervisory Authority (FINMA) which are systemically important or part of a systemically important financial group in accordance with article 7 of the Banking Act and which have international operations.
- (2) On 19 March 2023, on the basis of confirmations from the representatives of the Swiss Government, FINMA and the Swiss National Bank (SNB) that appropriate stabilisation and other measures would be taken in connection with the merger, UBS and Credit Suisse Group AG entered into a merger agreement with UBS as acquiring entity, as the same was subsequently amended on 6 April 2023 and 22 May 2023 (“**Merger**”). The confirmations from the representatives of the Swiss Government included a commitment to grant a loss protection guarantee to UBS pursuant to the Federal Additional Liquidity Ordinance.
- (3) As background to the entering into this Agreement, UBS acknowledges and understands, at the date hereof and without compromising in any way its legal and regulatory obligations, including its fiduciary duties to and the rights / interests of its shareholders, the significance of (i) the enlarged UBS Group to the importance of Switzerland as a financial centre whose development it has an intention to support and (ii) having its headquarters in Switzerland and confirms its intention of keeping its headquarters in Switzerland during the term of the Loss Protection Guarantee.
- (4) On the basis of its commitment made on 19 March 2023, the Confederation wishes to grant a loss protection guarantee to UBS pursuant to article 14a of the Federal Additional Liquidity Ordinance in accordance with and subject to the terms and conditions of this Agreement.

IT IS AGREED as follows:

**PART I**  
**GENERAL PROVISIONS**

**1. DEFINITIONS, INTERPRETATION AND CALCULATION OF TIME PERIODS**

**1.1 Definitions**

Words defined in **Schedule 1** (*Definitions Schedule*), as the same may be further amended, restated, varied, supplemented and/or replaced from time to time with the written consent (email suffices) of the Parties shall, except as indicated otherwise herein or as far as the context otherwise requires, have the same meaning throughout this Agreement.

**1.2 Interpretation**

- (a) Unless a contrary indication appears, a reference in this Agreement to:
- (i) any Party or any other person shall be construed so as to include its successors in title, permitted assigns and permitted transferees to, or of, its rights and/or obligations under the LPG Documents;
  - (ii) a Covered Asset shall be construed so as to also include a reference to a group of Covered Assets;
  - (iii) the Confederation includes, in particular, without limitation, the SFAO for the purposes of information, audit and similar rights as well as cost reimbursement obligations of UBS under this Agreement;
  - (iv) a document in agreed form is a document which is previously agreed in writing by or on behalf of the Confederation and UBS;
  - (v) an LPG Document or any other agreement or instrument is a reference to that LPG Document or other agreement or instrument as amended, supplemented, extended or restated (however fundamentally and whether or not more onerously) or replaced;
  - (vi) a person includes any individual, firm, company, corporation, government, state or agency of a state or any association, trust, joint venture, consortium, partnership or other entity (whether or not having separate legal personality);
  - (vii) a regulation includes any regulation, rule, official directive, decree, ruling or guideline (whether or not having the force of law) of any governmental, intergovernmental or supranational body, agency, department or of any regulatory, self-regulatory or other authority or organisation;
  - (viii) a provision of law is a reference to that provision as amended or re-enacted (including, with respect to the Federal Additional Liquidity Ordinance, any replacement or successor statute, ordinance, regulation or other law enacted by the Confederation or any Government Entity); and
  - (ix) a time of day is a reference to Swiss time.

- (b) A breach, default or Termination Event is “continuing” if it has not been waived by the Confederation (and, for the avoidance of doubt, any default in respect of a failure to deliver any certificate, notice, document, report, financial statement or other information or to take any other action within a time period prescribed in an LPG Document shall no longer be continuing upon performance of such obligation even though such performance is not within the prescribed period specified in any LPG Document).
- (c) Unless a contrary indication appears, a term used in any other LPG Document or in any notice given under or in connection with any LPG Document has the same meaning in that LPG Document or notice as in this Agreement.
- (d) Unless otherwise stipulated in this Agreement, where this Agreement provides for several rights of a Party based on the occurrence of certain events, that Party shall be free to decide which rights it wants to exercise (and exercising any of such rights shall not be construed as a waiver of any other right under or in connection with this Agreement).
- (e) If provisions in this Agreement include English terms after which either in the same provision or elsewhere in this Agreement German terms have been inserted in parentheses and/or italics, the respective German terms alone and not the English ones shall be authoritative for the interpretation of the respective provisions and, therefore, shall prevail.
- (f) Any reference in this Agreement to UBS’ or its Representatives’ confidentiality obligations shall only include confidentiality obligations which are not overridden or displaced by applicable Swiss banking or supervisory laws.
- (g) Any provision of this Agreement shall be interpreted so as to comply with Applicable Law, in particular with the Federal Additional Liquidity Ordinance.

### **1.3 Calculation of time periods**

In this Agreement, in respect of the computation of periods of time from a specified date to a later specified date, the word “from” means “from and including” and the words “to” and “until” each mean “to and including”. Periods of days referred to in this Agreement shall be counted in calendar days unless Business Days are expressly prescribed.

## **2. LOSS PROTECTION GUARANTEE PRINCIPLES**

### **2.1 General**

- (a) The LPG Principles are intended to serve for context and interpretational purposes only. They intentionally do not use terms defined elsewhere in this Agreement.
- (b) In the event of any inconsistency between the other terms and conditions set forth in this Agreement and the LPG Principles, those other terms and conditions shall prevail.

- (c) In the event of a dispute regarding the construction of this Agreement, the Parties and any competent court or Expert shall have regard to the LPG Principles in seeking to construe any relevant provisions of this Agreement and to ascertain the common intention of the Parties.

## **2.2 LPG Principles**

The key principles that apply for the Loss Protection Guarantee (“**LPG Principles**”) are the following:

### **2.2.1 Main principle**

The Confederation is supporting UBS by granting a loss protection guarantee in the amount of up to CHF 9,000,000,000 for certain assets acquired by UBS by way of its merger with CSG. UBS will apply diligent and prudent asset and risk management principles bearing in mind its own circumstances and the interests of the Confederation in order to minimise losses.

### **2.2.2 Covered assets**

- (a) Generally, UBS shall be protected under this loss protection guarantee against losses arising from certain assets and exposures of CSG that are considered non-core by UBS and require tail risk protection that was difficult to assess at the time of the agreement on the merger between UBS and CSG.
- (b) Coverage will be provided in respect of qualified covered entities and for a pre-defined static perimeter of assets and exposures (“**covered assets**”) which are clearly, transparently and unambiguously identified and determined (line-by-line) on the signing date in the asset pool schedule, it being understood that certain limited covered assets are dynamic in nature. In the asset pool schedule, each covered asset is allocated to one “**covered asset class**”. Such identification and allocation affects the treatment of covered assets under this loss protection guarantee and should not be subject to adverse selection to the disadvantage of either party.

### **2.2.3 Initial valuation and financial projections**

The initial valuation of each covered asset shall be equal to the value as represented in UBS’ accounts as per the valuation date reflecting their market value following accounting principles and market valuation standards. Any losses on the covered assets realised or unrealised before such date are borne by UBS and are not part of the shared loss amount. Any existing provisions or valuation reserves will be allocated to the relevant covered asset. The parties will agree on a business plan for the realisation of the covered assets with transparent financial loss projections, it being understood that the agreement on a business plan shall not be a condition precedent to UBS realising the covered assets.

### **2.2.4 Losses**

- (a) This loss protection guarantee shall only cover final financial loss in value of the covered assets and exposures in the future after the valuation date which loss is realised during the term of this loss protection guarantee.

- (b) Except for reasonable legal recovery, hedging and realisation costs for covered assets, no costs, including, without limitation, operational and funding costs shall be covered under this loss protection guarantee.
- (c) There must be no double-counting of elements for the purpose of the calculation of losses.

#### **2.2.5 Asset management**

UBS shall carefully, diligently and prudently manage and administer the covered assets in a commercially sensible manner. UBS shall apply due care in accordance with its own standards and good industry practice.

#### **2.2.6 Realisations and loss share**

- (a) UBS shall realise the covered assets within a reasonable time frame with a view to preserving value, whereby the losses incurred in the realisation of each covered asset shall be minimised and the proceeds from the realisation of the covered assets shall be maximised, taking into account the principle set out in Clause 2.2.8.
- (b) If the realisation of all covered assets results in a net loss, the first loss in the amount of CHF 5,000,000,000 (in words: five billion Swiss francs) shall be borne by UBS. The Confederation shall bear the amount of any subsequent losses (if any) up to (and capped at) an amount of CHF 9,000,000,000 (in words: nine billion Swiss francs).

#### **2.2.7 Governance**

- (a) The governance for the management and realisation of the covered assets shall provide for incentives for UBS to (i) preserve the value of the covered assets, maximise realisation proceeds as well as minimise losses, taking into account the principle set out in Clause 2.2.8, and (ii) fostering the implementation of the principles of this loss protection guarantee.
- (b) Subject to any secrecy or confidentiality obligations of UBS which are not overridden or displaced by Swiss Applicable Law, the Confederation (including the SFAO) shall have comprehensive information, audit and investigation rights to protect its interests.

#### **2.2.8 Commercial sensibility**

The parties acknowledge that UBS incurs, and has to bear, operational and funding costs for holding and managing the covered assets in order to preserve their value, in connection with realisations and related to governance, and that in the determination and interpretation of UBS' obligations under this agreement these costs shall reasonably be taken into account in view of the purpose and importance of the respective obligation and the size and nature of the loss protection guarantee.

#### **2.2.9 Guarantee fees**

The value of the guarantee and the risks and costs assumed by the Confederation shall be adequately compensated by UBS through guarantee fees.

**PART II**  
**LOSS PROTECTION GUARANTEE**

**3. EFFECTIVENESS**

- (a) This Agreement shall become effective and binding on the Parties upon (x) receipt by the Confederation (or the waiver by the Confederation of the requirement to receive) all of the documents and other evidence listed in **Part I of Schedule 2** (*Conditions Precedent*) and (y) receipt by UBS (or the waiver by UBS of the requirement to receive) all of the documents and other evidence listed in **Part II of Schedule 2** (*Conditions Precedent*) (the date of the fulfilment of these requirements, “**Effective Date**”). Each Party shall notify the other Party promptly upon receipt of the relevant documents and evidence, such notification to constitute confirmation of fulfilment of the relevant conditions precedent.
- (b) Before the Effective Date, this Agreement shall have no effect.

**4. COVERED ASSETS**

**4.1 Identification and determination of Covered Assets**

**4.1.1 Identification**

- (a) The “**Asset Pool**” includes (i) the assets and exposures as specified, individualised and listed in **Schedule 3** (*Asset Pool Schedule*) (“**Asset Pool Schedule**”) and (ii) any Closely Related Hedges. The Asset Pool Schedule shall specify to which Portfolio the relevant asset or exposure as well as any Closely Related Hedge belongs.
- (b) Within 90 days after the Closing Date, both Parties shall further review the Asset Pool Schedule in order to identify any data quality issues and, on the basis of such review, discuss in good faith whether any assets or exposures should be added to or removed from the Asset Pool Schedule or be allocated to a different Portfolio within the Asset Pool Schedule. Any such addition, removal or allocation shall be subject to an agreement among the Parties evidenced by a written instrument. Any references in this Agreement to “Asset Pool Schedule” shall be references to the Asset Pool Schedule taking into account any additions, removals or allocations made in accordance with this paragraph (b).
- (c) No asset or exposure held by any Group Company at any time that is not identified as being part of the Asset Pool in accordance with paragraph (a) or paragraph (b) shall be part of the Asset Pool.

**4.1.2 Non-Covered Assets**

(a) *Asset Exclusion Criteria*

Notwithstanding anything to the contrary set forth in any LPG Document (including, without limitation, the inclusion of any asset or exposure in the Asset Pool Schedule), any asset or exposure, including, without limitation, any Closely Related Hedge, meeting at any given point in time any one or more of the following criteria (“**Asset Exclusion Criteria**”) is permanently excluded from the Asset Pool (each such asset or exposure, a “**Non-Covered Asset**”):

- (i) it was not Economically Owned by one or more Covered Entities on 31 March 2023 and on the Closing Date;

- (ii) it has not been Economically Owned by one or more Covered Entities at any point in time from the Closing Date until the respective Realisation Date;
  - (iii) any Counterparty of which is, or is Controlled by, a Covered Entity or a Group Company at any point in time from the Signing Date until the respective Realisation Date (unless any such Covered Entity is a Counterparty to a Hedge as identified in the Asset Pool or as may be entered into from time to time in accordance with the Hedging Policy);
  - (iv) any Counterparty of which is, or is Controlled by, at the Closing Date, an Excluded Person;
  - (v) subject to the procedure set out in paragraph (c) below, it does not comply with all Applicable Laws in all material respects or has, following the Closing Date, not been marketed or distributed by any Group Company in all material respects in accordance with Applicable Laws;
  - (vi) it is an asset or exposure listed in or meeting the criteria set forth in **Schedule 5** (*Excluded Assets*);
  - (vii) it relates to Litigation, except for Permitted Litigation; or
  - (viii) it is deemed to be a Non-Covered Asset by operation of any other applicable provision of this Agreement.
- (b) If an Asset Exclusion Criterion applies with respect to only part of a Covered Asset, then that otherwise Covered Asset as a whole shall be deemed to be a Non-Covered Asset.
- (c) If UBS or any other Group Company becomes aware that a Covered Asset does not comply with all Applicable Laws in all material respects, UBS shall notify the Confederation promptly upon becoming aware and the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on the further treatment of that Covered Asset as Covered Asset or as Non-Covered Asset. In case the Parties disagree whether or not any relevant non-compliance is material, the procedure pursuant to Clause 25 shall apply.
- (d) UBS may, at any time, exclude particular Covered Assets from the pool of Covered Assets by delivery of a notice to the Confederation to that effect which includes a confirmation that in UBS' reasonable opinion, having made an assessment of the realistic realisation scenarios with respect to each Covered Asset listed in the relevant notice in accordance with Good Industry Practice, the Realisation of such Covered Asset, were it to remain in the pool of Covered Assets, would more likely than not result in a positive Net Loss Amount. If the Confederation does not agree with UBS'

opinion and the relevant assessment, it shall so notify UBS within 30 Business Days of receipt of UBS' notice and the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on the further treatment of the relevant Covered Asset(s) as Covered Asset(s) or as Non-Covered Asset(s). Should the Parties not reach an agreement within that period, the procedure pursuant to Clause 25 shall apply, provided that in case of a submission to an Expert, the Expert Question shall be whether or not the Realisation of the relevant Covered Asset, were it to remain in the pool of Covered Assets, would more likely than not result in a positive Net Loss Amount. In accordance with the relevant Expert determination the respective Covered Asset shall either be excluded from, and constitute a Non-Covered Asset, or stay part of the pool of Covered Assets.

#### 4.2 Covered Asset Data

- (a) The Asset Pool Schedule as well as any information provided in accordance with Clause 10.2 shall comprise all data (with such redactions or other safeguard measures as may be necessary for UBS to comply with its confidentiality obligations (which are not overridden or displaced by Swiss Applicable Law) subject to there being the required measures in place for the Confederation to be able to clearly identify the relevant Covered Assets) on the Covered Assets relevant for the purposes of the Loss Protection Guarantee, together with any Closely Related Hedges as are relevant, in particular with a view to identifying and valuating the Covered Assets, monitoring compliance with the Asset Exclusion Criteria, the allocation of each Covered Asset to a specific Covered Asset Class and the determination and allocation of Closely Related Hedges. The data details comprised in the Asset Pool Schedule shall serve as sole source of information for the purpose of identifying the Covered Assets and the allocation of each Covered Asset to a specific Covered Asset Class. Identification of any such data in the Asset Pool Schedule shall not be taken as (i) evidence for compliance with the Asset Exclusion Criteria, (ii) the Confederation's acceptance or agreement that any of the factual Information contained in the Asset Pool Schedule in relation to a Covered Asset is correct, or (iii) the Confederation's agreement to waive any breach under an LPG Document.
- (b) Upon becoming aware of any material incompleteness, error or inaccuracy in the Asset Pool Schedule, UBS shall notify the Confederation and provide the Confederation with details of any proposed correction or modification. If as a result of any such proposed correction or modification to the Asset Pool Schedule any asset or exposure meets an Asset Exclusion Criteria and/or the maximum financial exposure of the Confederation under the Loss Protection Guarantee is greater than the maximum financial exposure of the Confederation on the basis of the Asset Pool Schedule agreed upon in accordance with this Agreement, the Covered Asset(s) to which the proposed correction or modification relates shall, upon a corresponding request of the Confederation, be permanently excluded from the pool of Covered Assets. Should UBS, following such a request of the Confederation, believe that the relevant correction or modification does not have the effect stipulated above, this shall be determined in accordance with the procedure pursuant to Clause 25.

- (c) In respect of the Asset Pool, UBS may satisfy any requirement to identify the assets and exposures that constitute Covered Assets as set out in this Clause 4 by providing information on a wider portfolio of assets and liabilities (consisting both of (i) assets and exposures that are Covered Assets and (ii) assets and exposures that are Non-Covered Assets) as long as UBS clearly identifies those assets and exposures that are Non-Covered Assets to the reasonable satisfaction of the Confederation (and the assets and exposures in the Asset Pool shall be those assets and exposures other than those falling within sub-paragraph (ii)).

#### 4.3 **Determination of Portfolios**

For the purpose of the LPG Documents, a “**Portfolio**” shall be any of the portfolios of Covered Assets listed in **Schedule 4** (*Portfolios*) (“**Portfolio Schedule**”). No Party may make any unilateral change or modification to the number, scope or nature of any of the Portfolios listed in the Portfolio Schedule.

#### 4.4 **Virtual Data Room**

UBS shall ensure that no later than within five Business Days after the Closing Date, the Confederation (or, if required in view of confidentiality or secrecy obligations existing at the Closing Date, the Confederation’s advisors which have been cleared for such purposes) receive a copy of the Virtual Data Room, together with a confirmation by the data room provider that this copy reflects the content of the data room as of 7 June 2023.

### 5. **INITIAL VALUATION**

#### 5.1 **Definition**

The initial valuation of a Covered Asset as per the Valuation Date (“**Initial Valuation**”) corresponds to the amount in U.S. Dollars which has been determined for such Covered Asset in accordance with Clause 5.3 and Clause 5.4.

#### 5.2 **FX fluctuation after Initial Valuation**

Any part of the Shared Loss Amount received or paid by a Group Company shall be booked in U.S. Dollars, in alignment with the reporting currency used by UBS for operational management and accounting purposes of the Covered Assets. The Net Loss Amount will be converted to CHF pursuant to paragraph (d) of Clause 8.1.

#### 5.3 **Proposed Initial Valuation**

- (a) UBS shall make a proposal for the Initial Valuation of each Covered Asset or group of Covered Assets as per the Valuation Date within 120 days after the Closing Date.
- (b) The proposals made by UBS pursuant to paragraph (a) shall (i) be made according to IFRS taking into account the results of an independent valuation conducted by KPMG LLP, (ii) reflect at least the decrease in valuation compared to the CS Book Value as communicated to the Confederation prior to the Signing Date and taking into account the effects of the Merger and (iii) be based upon UBS’ prevailing fair market value valuation methodologies, as used in the preparation of UBS’ financial statements, including, without limitation, any valuation adjustments through credit provisions and valuation reserves used for funding valuation adjustments (FVA), counterparty valuation adjustments (CVA), other valuation adjustments to cover model risk, liquidity or other valuation risks applying such market standard valuation practices and

methods and well supported market data inputs or, where such market data inputs are not available, sound assumptions or proxies used as input to valuation models (including independent price verification and model validation processes) as are reasonably necessary for the valuation of the relevant Covered Asset.

#### **5.4 Disagreement on Initial Valuation**

The Confederation will review the adequacy of UBS' proposed Initial Valuation. If the Confederation does not accept the Initial Valuation for a Covered Asset proposed by UBS, it shall notify UBS, and the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on the Initial Valuation. Should the Parties not reach an agreement within that period, the Initial Valuation of such Covered Asset shall be determined in accordance with the procedure pursuant to Clause 25.

#### **5.5 Errors in determination of Initial Valuation**

Upon becoming aware of any material error or inaccuracy of any Initial Valuation, UBS shall notify the Confederation and provide it with details of any proposed correction or modification. If the Confederation does not accept the proposed correction or modification and determines that the disagreement over that correction or modification has a material impact on the Loss Protection Guarantee, it shall notify UBS, and the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on a correction or modification. Should the Parties not reach an agreement within that period, the existence of a material error or inaccuracy of an Initial Valuation, the impact of such (potential) material error or inaccuracy on the Initial Valuation and the corresponding (potential) adjustment to the Initial Valuation of the respective Covered Asset shall be determined in accordance with the procedure pursuant to Clause 25.

### **6. LOSS BUDGET AND BUSINESS PLAN**

(a) UBS undertakes to make proposals for the following documents (each a "**Plan Proposal**"):

- (i) for each Portfolio, a loss budget for the aggregate of the Net Loss Amounts of the Covered Assets comprised therein; and
- (ii) for each Portfolio, a business plan for the Realisation of the Covered Assets comprised therein,

it being understood that the Plan Proposal for a loss budget (and upon agreement in accordance with paragraph (d), the Loss Budget) for a particular Portfolio may be comprised in and constitute a part of the Plan Proposal for a business plan (and upon agreement in accordance with paragraph (d), the Business Plan) for a particular Portfolio.

- (b) Each Plan Proposal shall be submitted by UBS to the Confederation within 120 days after the Closing Date and:
  - (i) with respect to a Loss Budget, shall include an estimated loss forecast based on the financial plan and the selected exit/unwinding strategy both under baseline and adverse (stress) scenarios;
  - (ii) with respect to a Business Plan, shall include a plan for a time period of five years after the Closing Date covering, *inter alia*, the following items:
    - (A) *Financial projections*: full detailed profit and loss balance sheet and capital financial forecasts by Portfolio including annual estimates under baseline and adverse scenarios with the financial metrics to be projected to include book value, leverage exposure, risk weighted assets (RWA), MTM, provisions, valuation reserves, P&L, Realisation Expenses, VaR and stress losses;
    - (B) *Capital plan*: capital requirements and RWA forecasts including potential losses by Portfolio under baseline and adverse scenarios; and
    - (C) *Exit/unwinding strategies*: exit and/or unwinding strategies selected for the Portfolio including portfolio / position sales, business divestitures, hold to maturity, novation / transfer to new dealer, close out position through hedging, recovery under default scenario and loss mitigation strategies; and
  - (iii) be prepared by UBS:
    - (A) in accordance with the LPG Principles;
    - (B) in good faith;
    - (C) in accordance with any provisions of the Loss Protection Guarantee and the LPG Documents; and
    - (D) in accordance with the banking policies, practices and procedures of UBS or other relevant Group Companies, to the extent consistent with Good Industry Practice (based on an understanding that (x) a plan of that nature is subjective and relies on a number of assumptions and methodology applied in good faith, but which may not accurately reflect actual events over the relevant plan period) and (y) information provided for the immediate term within any period may be more detailed than information provided for a later term within that period.
- (c) Notwithstanding paragraph (b), UBS has the right to revise any Plan Proposal until the date falling 120 days after the Closing Date.
- (d) Upon receipt of any Plan Proposal, or any revised version thereof in accordance with paragraph (c), by the Confederation, the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on the content of the relevant Plan Proposal, with neither of them being obliged to accept any Plan Proposal or any part thereof. Any agreed version of the Plan Proposal for a business plan and a loss budget, respectively, if and once agreed among the Parties, shall become the “Business Plan” and a “Loss Budget” for the purposes of the LPG Documents.
- (e) UBS shall review the Business Plan and each Loss Budget once a year. Any material amendment, modification, supplementation or restatement of any Business Plan or any Loss Budget requires the prior written consent of both Parties.

## 7. REALISATIONS

### 7.1 Main obligations

- (a) Subject to the LPG Principles, UBS shall use its commercially reasonable efforts and apply due care to minimise the Net Loss Amount incurred in the Realisation of each Covered Asset and to maximise Net Realisation Proceeds.
- (b) Without limiting the generality of the foregoing, UBS shall use commercially reasonable efforts to, with regard to any Covered Asset or any relevant group of Covered Assets:
  - (i) (x) ensure that the relevant Covered Asset or group of Covered Assets is covered by a Business Plan which has been adopted by UBS in accordance with this Agreement, or, as long as no Business Plan has been adopted in accordance with this Agreement for the Portfolio such Covered Asset or group of Covered Assets belongs to, develop and implement a strategy for Realisations and (y) plan and organise Realisations;
  - (ii) seek to identify and give due consideration to any potential Realisation;
  - (iii) aim at closing Realisations of Covered Assets as a group of Covered Assets when Realisation as a group is commercially reasonable;
  - (iv) determine the right timing in view of loss minimisation for its Realisation within the term of the Loss Protection Guarantee;
  - (v) evaluate and give due consideration to suitable potential purchasers, prioritise them and solicit offers from purchasers based on this determination;
  - (vi) provide interested purchasers (as determined in accordance with sub-paragraph (v)) with adequate Information reasonably necessary to assess its value and answer in good faith any relevant questions from such interested purchaser within reasonable time upon request;
  - (vii) (subject to the determination set out above) negotiate or determine the terms and conditions of the purchase in good faith and in accordance with Good Industry Practice; and
  - (viii) collect Asset Repayments and Hedging Benefits in accordance with Good Industry Practice.

## 7.2 Permitted Realisations

- (a) UBS shall, and shall be permitted to, conduct Permitted Realisations of the Covered Assets.
- (b) A Realisation of a Covered Asset is permitted (each a “**Permitted Realisation**”) if:
  - (i) the Realisation is:
    - (A) a direct Realisation; or
    - (B) an indirect Realisation by sale or other disposal of a Covered Entity or the Holding Company of a Covered Entity either as permitted in compliance with the Governance Policy or if there is no Governance Policy, with the prior written consent of the Confederation, such consent not to be unreasonably withheld or delayed; and
  - (ii) one of the following requirements is fulfilled:
    - (A) an Initial Valuation of such Covered Asset has been finally determined in accordance with Clause 5.1 before the Realisation Date, or, if no such Initial Valuation has been finally determined before the Realisation Date:
      - (1) the Realisation is closed within 120 days of the Closing Date; and
      - (2) the Net Loss Amount resulting from such Realisation (when aggregated with the Net Loss Amount resulting from the Realisations of all other Covered Assets for which no Initial Valuation has been determined in accordance with Clause 5.1 before the respective Realisation Dates) does not exceed CHF 200,000,000 (or such higher amount as the Parties may agree);
    - (B) (without prejudice to paragraph (a)(v) of Clause 4.1.2) UBS reasonably determines that its continued Economic Ownership of that Covered Asset would or will likely result in a breach of Applicable Law; or
    - (C) UBS reasonably determines that its continued Economic Ownership of that Covered Asset would or will likely result in a material reputational risk to UBS.
- (c) If a Realisation is closed that is not a Permitted Realisation, the relevant Covered Asset shall be deemed to have been permanently excluded from the pool of Covered Assets and constitutes a Non-Covered Asset, and any related Net Loss Amounts from the Realisation of such Covered Assets shall not be counted as Shared Loss Amount.

### 7.3 Gross Realisation Proceeds and Net Realisation Proceeds

- (a) “**Gross Realisation Proceeds**” means the sum of all gross considerations and benefits received on or after the Valuation Date other than Asset Repayments (without double-counting) in connection with the Realisation of a Covered Asset, including, without limitation:
- (i) any direct or indirect consideration, purchase price, proceeds, assets, receipts, realisations, recoveries, liquidation proceeds, rights, interests and any other payment or benefits whether received or to be received prior to or after the Realisation Date;
  - (ii) any final reduction in or discharge of obligations owed to (or by) any Applicable Entity as a result of: (i) setting off against or netting with obligations owed by (or to) any Applicable Entity, or (ii) any other process or arrangement (including counterclaim when finally settled) having a substantially similar effect;
  - (iii) any asset received that is not cash (including any debt or equity security received in a restructuring or otherwise) and all receipts, realisations, recoveries, rights, interests and benefits with respect to, resulting from or arising out of each such non-cash asset (which may include rent and dividends), and any Gross Realisation Proceeds received for a Realisation of such non-cash asset;
  - (iv) the proceeds of any insurance claim under any insurance related to such Covered Asset;
  - (v) the proceeds of any claim against any person (including any Representative to which any responsibilities, duties or obligations in connection with the Management and Administration of any Covered Asset may have been transferred) related to a Covered Asset, including any claim for negligence, misrepresentation, breach of warranty, breach of contract, breach of duty, fraud, bad faith or wilful default;
  - (vi) the proceeds of enforcement of, or any other asset, receipt, realisation, recovery, right, interest or benefit with respect to, resulting from or arising out of, any Security securing any claims under any Covered Asset and/or its Underlying Documentation;
  - (vii) the proceeds of any claim under an indemnity; and
  - (viii) without limitation of any of the foregoing, any refunds of or payments received in respect of any withholdings, deductions or Tax credits (except to the extent that any Applicable Entity is obliged to account for the same to any Counterparty in respect of that Covered Asset), and any amounts received in respect of any VAT or Stamp Duty to the extent these are directly attributable to the relevant Covered Asset.
- (b) In the context of a Derivatives Instrument, “**Gross Realisation Payments**” means the sum of all gross considerations and benefits paid by a Group Company on or after the Valuation Date other than Asset Repayments (without double-counting) in connection with the Realisation of that Covered Asset, including any amounts as listed in paragraph (a)(i) to (viii) of this Clause 7.3, provided that such amounts shall be paid or payable rather than received or receivable.

- (c) Other than in respect of a Derivatives Instrument, Net Realisation Proceeds may not be a negative amount. Net Realisation Proceeds shall not include any deduction for, or be decreased due to, any Excluded Losses and Costs or Operational Losses.

#### **7.4 Realisation procedures**

- (a) The Asset Management Framework shall include rules relating to the maximization of the Net Realisation Proceeds. Except as set forth otherwise in a Policy approved by the Confederation, any Realisation (i) relating to a Major Transaction requires that at least three market bids were obtained or explanations are provided why there was no such second and/or third best bidder and (ii) relating to a Material Transaction requires that in case of Conflict relating to any Covered Asset Purchaser, procedures are applied that ensure that the Gross Realisation Proceeds and the Gross Realisation Payments are at arm's length.
- (b) For the purposes of the calculation of the relevant thresholds in the definition of "Material Transaction" and "Major Transaction", the Realisation of a group of Covered Assets is deemed to be, and treated as, one transaction in respect of a Covered Asset, regardless of whether such Realisation is entered into or closed as one or a series of separate transactions, if either:
  - (i) they are in the same Covered Asset Class; or
  - (ii) they are in different Covered Asset Classes but sold in a package,and subject to a Realisation at a similar time to the same Covered Asset Purchaser or group of Covered Asset Purchasers in connection with a single or a series of related transactions. For the avoidance of doubt, parallel transactions with the same Covered Asset Purchaser that are not related will not be taken into account for the purpose of this paragraph (b).
- (c) Where a Covered Asset and any other asset are sold as a package under a single transaction at a single price, UBS shall use commercially reasonable efforts to ensure that the price is being split in the Realisation Documentation to allow the determination of the amount of any Gross Realisation Proceeds attributable to the Covered Asset, and that this amount is determined in a commercially reasonable manner.

#### **7.5 Realisation Documentation**

- (a) Each Realisation Documentation shall comply with the following requirements, unless there are justified reasons for a deviation as documented and adequately proven by UBS:
  - (i) all Gross Realisation Proceeds shall be exclusively provided for in the Realisation Documentation; and
  - (ii) the consideration shall not be reduced as compensation for any item that qualifies as Excluded Losses and Costs.
- (b) The Parties acknowledge and agree that in case of a Realisation of a group of Covered Assets, a Covered Asset Class or a Portfolio, the Realisation of such group of Covered Assets, Covered Asset Class or Portfolio may be subject to the same Realisation Documentation.

## 7.6 Qualified reporting

- (a) Upon a Realisation of a Covered Asset or a group of Covered Assets (the election of whether to report on a Covered Asset-basis or on a “group-of-Covered-Assets”-basis being at UBS’ discretion), UBS shall provide the Confederation with the following Information (cumulatively, if applicable), together with the Quarterly Statements:
  - (i) for each Covered Asset (x) attributable to a Portfolio in respect of which a Level 1 Trigger Event was triggered and whose Realisation constitutes a Material Transaction or (y) whose Realisation constitutes a Major Transaction:
    - (A) statement and explanation that the Gross Realisation Proceeds received for, and the Gross Realisation Payments paid due to, the Realisation of such Covered Assets were in the opinion of UBS in line with the LPG Principles;
    - (B) short elaboration that the Asset Repayments and Hedging Benefits of such Covered Assets were collected in accordance with Good Industry Practice;
    - (C) short explanation why the Enforcement Costs, if any, incurred in connection with the Realisation of each respective Covered Asset were reasonably necessary and adequate to enforce the respective Gross Realisation Proceeds under the circumstances;
    - (D) a Conflicts Certificate for such Covered Assets; and
    - (E) a summary of the offer of the second and third best bidder for the respective Covered Assets in reasonable detail, with reasoning on which grounds the offers were qualified in such order or explanations why there was no such second and/or third best bidder;
  - (ii) for each Covered Asset or group of such Covered Assets where before the Realisation Date no Initial Valuation has been determined in accordance with the terms of this Agreement (in case of a group of Covered Assets for all these Covered Assets), additionally (to sub-paragraph (i)) with explanations why the Gross Realisation Proceeds received for, and the Gross Realisation Payments paid due to, the Realisation of such Covered Asset(s) and, in particular, the timing of the Realisation of such Covered Asset(s) were reasonable under the circumstances.
- (b) In each case of sub-paragraphs (a)(i) and (a)(ii), respectively, the Confederation shall have the right to request that UBS, and UBS shall, within 20 days upon such request, document and provide the necessary proof to the Confederation that:
  - (i) UBS complied with the LPG Principles with regard to the Realisation of such Covered Asset(s);

- (ii) UBS complied with any procedures that may be stipulated in the Business Plan in relation to such Covered Assets (if any); and
  - (iii) UBS complied in relation to such Covered Assets with the obligations set forth in Clauses 7.1 to 7.6.
- (c) In each case of sub-paragraphs (a)(i) and (a)(ii), respectively, the Confederation shall have the right to request any and all underlying documentation relating to the respective Realisation in order to investigate whether UBS has complied with all applicable requirements set forth in Clauses 7.1 to 7.6. If, following such investigation, the Confederation concludes that in relation to any Covered Asset there is a violation by UBS of any relevant requirement and such violation materially increased the Net Loss Amount, the Confederation may notify UBS that the respective Net Loss Amount of the respective Covered Asset shall be reduced by 50% (or any higher amount if caused by such violation) (and the amount by which the Net Loss Amount is reduced shall, with effect as of such notification, not be counted towards the Shared Loss Amount) (“**Shared Loss Discount**”). If UBS does not agree with such determination and the application of the Shared Loss Discount, it may initiate the procedure pursuant to Clause 25 for the purpose of determining whether the application of the Shared Loss Discount was justified.
- (d) If there is no Loss Budget for an individual Covered Asset, but such Covered Asset is part of a group of Covered Assets, a Covered Asset Class or a Portfolio for which a Loss Budget has been agreed, such Loss Budget shall apply as Loss Budget for such Covered Asset, and the relevant amount shall be allocated pro rata of the Initial Valuation of such Covered Asset in relation to the aggregate amount of all Initial Valuations of the Covered Assets to which such Loss Budget applies. If there is only a Loss Budget on the level of all Covered Assets, such Loss Budget shall be deemed not to be a Loss Budget for any purpose and all Covered Assets shall be treated under the assumption that there is no Loss Budget.

## 7.7 Residual Positions

- (a) If, after the fifth anniversary of the Closing Date:
- (i) the aggregate amount of the Initial Valuations of all remaining Covered Assets (that have not been subject to a Realisation) represents less than 20% of the aggregate amount of the Initial Valuations of all Covered Assets;
  - (ii) there have been commercially reasonable efforts by UBS to effect Realisations of such remaining Covered Assets; and
  - (iii) despite such efforts, UBS has not been able to effect such Realisations in accordance with the terms of this Agreement,
- (each remaining Covered Asset, a “**Residual Position**”), and if UBS or the Confederation so requests, the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to identifying and agreeing on a solution to exclude the Residual Positions from the Asset Pool at a value to be agreed by the Parties or to otherwise effect a Realisation or deemed Realisation with respect to the Residual Positions that complies with Applicable Laws.

- (b) Should the Parties not reach an agreement within that period, UBS may effect an exclusion of all, but not only part of, the Residual Positions from the Asset Pool by written request to the Confederation (“**Residual Request**”):
  - (i) in accordance with the procedure set out in paragraph (d) of Clause 4.1.2 (including the procedure pursuant to Clause 25) with respect to each Residual Position whose Realisation would, in UBS’ reasonable opinion and having made an assessment of the realistic realisation scenarios in accordance with Good Industry Practice, more likely than not result in a positive Net Loss Amount; and
  - (ii) with respect to (x) each other Residual Position and (y) each Residual Position to which paragraph (i) above applies and the Expert determines that it is less likely than not that the Realisation of this Residual Position would result in a positive Net Loss Amount, the following shall apply:
    - (A) the Covered Asset constituting the relevant Residual Position shall be permanently excluded from the pool of Covered Assets and constitute a Non-Covered Asset; and
    - (B) the amount that would be determined as a Net Loss Amount on any Realisation as determined in accordance with paragraph (a) of Clause 8.1, provided that for these purposes, the reference to the “Net Realisation Proceeds” shall be deemed to be a reference to the (mark-to-market) book value of such Covered Asset as per the end of the last calendar quarter before the date of the Residual Request (as reflected in the Books and Records of the relevant Group Company holding the relevant Covered Asset), shall (x) if such amount is negative, be accounted for as a gain for the purpose of calculating the Shared Loss Amount and (y) if such amount is positive, not be considered for the calculation of the Shared Loss Amount.

## 8. LOSSES

### 8.1 Net Loss Amount and Shared Loss Amount

- (a) In respect of each Covered Asset whose Realisation has been completed, the “**Net Loss Amount**” shall be an amount equal to the sum of the following components relating to such Covered Asset (without double-counting):
  - (i) the Initial Valuation;
  - (ii) *minus* the “**Net Realisation Proceeds**” which are equal to:
    - (A) the Gross Realisation Proceeds (if any);
    - (B) *minus* any Gross Realisation Payments (in respect of any Derivatives Instrument);

- (C) *minus* Enforcement Costs; and
  - (D) *minus* Realisation Expenses;
  - (iii) *plus* payables / *minus* receivables resulting from any award in a Permitted Litigation;
  - (iv) *minus* Asset Repayments;
  - (v) *minus* Hedging Benefits;
  - (vi) *plus* Hedging Costs;
  - (vii) *minus* (if the Initial Valuation is higher than the respective CS Book Value) the Initial CS Difference, if the Net Loss Amount would otherwise be positive absent this sub-paragraph (vii) and then only to the extent that the resulting Net Loss Amount would then be equal to or higher than zero;
  - (viii) *plus* (if the Initial Valuation is lower than the respective CS Book Value) the Initial CS Difference, if the Net Loss Amount would otherwise be negative absent this sub-paragraph (viii) and then only to the extent that the resulting Net Loss Amount would then be equal to or less than zero.
- (b) The Net Loss Amount may be a positive or a negative amount (with a negative Net Loss Amount being accounted for as a gain).
  - (c) The loss to be shared by the Parties under this Agreement is the sum of the (positive or negative) Net Loss Amounts of all Covered Assets, denominated in the Base Currency (“**Shared Loss Amount**”).
  - (d) For the purposes of the calculation and determination of the Shared Loss Amount and any components thereof, the following principles shall apply:
    - (i) the relevant amounts have to be paid or received between the Valuation Date and the Realisation Date of the relevant Covered Asset, except for:
      - (A) Gross Realisation Proceeds, which shall account for accruals and future benefits and provisions that can be valued on the date of the Demand for Payment (including, without limitation, with respect to any liquidation proceeds, recoveries and earn-out payments but excluding any accrued interest not yet paid); and
      - (B) Enforcement Costs, which are taken into account if and to the extent that they accrue after the Valuation Date and before the date of the Demand for Payment; and
    - (ii) the Net Loss Amount in respect of each Covered Asset (and any element thereof) shall be converted into the Base Currency at the Applicable Exchange Rate, the Exchange Date being the Realisation Date of such Covered Asset.

## 8.2 Excluded Losses and Costs

For the purposes of calculating the Net Loss Amount, no amount that qualifies as Excluded Losses and Costs shall be deducted from amounts received, or added to amounts paid or accounted for, by UBS or any Group Company, including where such Excluded Losses and Costs were (implicitly or explicitly) included in the consideration paid in connection with any Realisation.

## 8.3 Disagreement on the calculation of any Net Loss Amount

If there is a disagreement between the Parties with respect to the calculation of any Net Loss Amount, they shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on the relevant Net Loss Amount. Should the Parties not reach an agreement within that period, the relevant Net Loss Amount shall be determined in accordance with the procedure pursuant to Clause 25.

## 9. DRAWDOWN

### 9.1 Undertaking to pay

Subject to the conditions set forth in this Clause 9 and the other provisions of this Agreement, the Confederation undertakes to pay to UBS a positive amount equal to the lower of (i) the difference resulting from the Shared Loss Amount minus CHF 5,000,000,000 (in words: five billion Swiss francs) and (ii) CHF 9,000,000,000 (in words: nine billion Swiss francs) (such lower amount, “**Guaranteed Amount**”). If the difference resulting from the Shared Loss Amount minus CHF 5,000,000,000 (in words: five billion Swiss francs) is less than zero, the Guaranteed Amount shall be zero.

### 9.2 Drawdown and FINMA Confirmation

- (a) Following the final Realisations of all Covered Assets, UBS shall be entitled to demand payment from the Confederation of the Guaranteed Amount (“**Demand for Payment**”). The Demand for Payment shall set forth the Net Loss Amount of each Covered Asset, the Shared Loss Amount and the Guaranteed Amount and confirm that the Realisations of all Covered Assets have occurred in compliance with this Agreement.
- (b) Upon receipt of the Demand for Payment, the Confederation shall submit the Demand for Payment without delay to FINMA. Based on the Demand for Payment and such other Information as FINMA may request in accordance with paragraph (b) of Clause 14.1, FINMA shall, based on and in accordance with the Ordinance, issue a written confirmation pursuant to article 14a para. 3 lit. c of the Ordinance (“**FINMA Confirmation**”). FINMA may consult with advisors or other third parties as it deems necessary or desirable for the purpose of making verifications in connection with issuing the FINMA Confirmation and/or reviewing the satisfaction of the requirements set forth in the Ordinance.
- (c) UBS may enforce the issuance of the FINMA Confirmation by submitting the matter to the Federal Administrative Court asking for a decision based on which FINMA is directed to issue the FINMA Confirmation in accordance with this Agreement and the Ordinance.

### 9.3 Payment of Guaranteed Amount

Upon receipt by the Confederation of (i) a Demand for Payment made in accordance with Clause 9.2 and (ii) the FINMA Confirmation, the Confederation shall pay to UBS the Guaranteed Amount no later than nine months after the date of receipt of the FINMA Confirmation.

## PART III ASSET MANAGEMENT

### 10. ASSET MANAGEMENT

#### 10.1 Asset Management Principles

- (a) UBS shall ensure that (i) the Portfolio of Covered Assets as a whole and (ii) each Covered Asset is, in each case, Managed and Administered at all times and in all respects:
  - (i) in accordance with Applicable Law;
  - (ii) in accordance with the LPG Principles;
  - (iii) diligently and in good faith;
  - (iv) in accordance with the Asset Management Objective;
  - (v) in such a way so as to ensure that there is no prejudice to, discrimination against or disproportionate and adverse effect on the Covered Assets when compared with the management and administration of assets and exposures which are not Covered Assets in comparable situations, save as may be the result of (i) requirements under an LPG Document or (ii) the Covered Assets being non-strategic to UBS;
  - (vi) in accordance with any provisions of the Loss Protection Guarantee and the LPG Documents relating to the Management and Administration of the Covered Assets (including the Asset Management Framework and the Conflicts Management Policy);
  - (vii) in a manner which facilitates compliance with the Monitoring and Reporting Provisions and the Governance and Organisational Provisions; and
  - (viii) in accordance with the banking policies, practices and procedures of UBS or other relevant Group Companies, to the extent consistent with Good Industry Practice.
- (b) In the event of a conflict between the requirements of any of the above sub-paragraphs, the requirements shall apply in the order of priority in which they appear in paragraph (a).

## 10.2 Hedging

- (a) By no later than 120 days after the Closing Date UBS shall, within the Asset Pool, identify as “**Closely Related Hedges**” in respect of a Covered Asset or group of Covered Assets in the Asset Pool Schedule such assets, agreements, instruments and arrangements existing at the Signing Date that are hedging arrangements, including any credit default swap, FX swap, interest rate swap, credit-linked bond or note, sub-participation agreement, guarantee or similar swap or credit risk mitigant, and which have resulted in the credit and market risk management function of the relevant Group Company or the Group:
- (i) recording a reduction (or not recording an increase) in its credit risk, unhedged credit risk or equivalent measure to any Counterparty with respect to that Covered Asset or group of Covered Assets;
  - (ii) recording an increase (or not recording a reduction) in its credit line, trading line or equivalent measure to any Counterparty with respect to that Covered Asset or Group of Covered Assets; or
  - (iii) otherwise providing for a hedging of an exposure to any relevant market risk (including in particular any FX or rates risk) associated with that Covered Asset or group of Covered Assets,

where such Closely Related Hedge is held in a specific book or other organisational construct under which the specific Covered Assets or group of Covered Assets (along with other assets or liabilities which are not Covered Assets) is maintained.

- (b) For the purposes of the obligations of UBS under the Asset Management Provisions, Closely Related Hedges and Portfolio Hedges shall be treated by UBS in the same manner as Covered Assets.
- (c) UBS shall enter into, and maintain, any hedges required in accordance with UBS’ internal standards for any comparable situations and consistent with Good Industry Practice for the following hedging strategies (which may be external or internal, provided that the Hedging Cost of internal Hedges is at market prices) (“**Hedges**”), having the ability to modify, and replace existing and establish new Closely Related Hedges and Portfolio Hedges, as further set out in a separate hedging policy (“**Hedging Policy**”):

<u>Hedging Strategy</u>	<u>Hedging Activity and Purpose</u>	<u>Hedging Cost / Hedging Benefits</u>
Dynamic	Hedging instruments used to cover market and credit risk of individual Portfolios clearly allocated to Portfolios and executed on a daily basis in liquid markets for portfolio rebalancing and risk management purposes, including, without limitation, FX Specific Risk Portfolio Hedges, including Closely Related Hedges	Costs and Expenses are Hedging Cost Benefits are Hedging Benefits

Macro	Hedging instruments used to cover market or credit risks across Portfolios at balance sheet level	Allocation of Costs and Expenses to Hedging Cost and benefits to Hedging Benefits to the extent these hedges are used to (partially) manage the risks of the Covered Assets using an appropriate allocation mechanism to the covered Portfolios
Close-out	Hedging instruments used to protect against financial risks of a Covered Asset or a Portfolio with the intention to economically close out market or credit risks, provided that such instruments are part of the Business Plan applicable for the relevant Portfolio, including, without limitation, credit protection in a single name loan, bond or CDS position or long term derivative hedges in illiquid markets	Allocation of Costs and Expenses to Hedging Cost and benefits to Hedging Benefits to the extent these hedges are entered into, and maintained, in accordance with this Clause 10.2
FX structural risk	Hedging instruments used with regards to currency exposures other than US\$, to be hedged back to US\$, except for FX Specific Risk Portfolio Hedges	Costs and Expenses to be borne by UBS; benefits to accrue to UBS

### 10.3 Compliance with Underlying Documentation

Without prejudice to Clause 10.1 (other than paragraph (a)(iv) thereof), UBS' obligations to ensure that the Covered Assets are Managed and Administered in accordance with the Asset Management Objective shall not apply if and to the extent that this would require any member of the Group (or its Representatives) to breach any of the terms of an Underlying Documentation of a Covered Asset in effect at the relevant time if and to the extent that:

- (a) such terms were put into effect at any time before the Signing Date; or
- (b) the formation of such terms, or the amendment which gave rise to them, was effected on or after the Signing Date, but in accordance with the requirements of the LPG Documents (including Clause 10.1).

### 10.4 Asset Management Framework and Conflicts Management Policy

#### 10.4.1 Establishment of Asset Management Framework and Conflicts Management Policy

UBS shall establish and enact an Asset Management Framework and a Conflicts Management Policy within 90 days after the Closing Date and provide a copy thereof to the Confederation.

#### **10.4.2 Content of Asset Management Framework**

Subject to Clause 17.5, UBS shall ensure that the Asset Management Framework:

- (a) is prepared in a way which takes into account the relevant Covered Asset Class or on such other basis as the Confederation may agree with UBS from time to time;
- (b) complies with Applicable Law;
- (c) (unless and to the extent that the Confederation agrees otherwise in writing) is consistent with the other provisions of the LPG Documents (including the Asset Management Objective and the other Asset Management Provisions); and
- (d) sets out:
  - (i) the framework, including internal governance arrangements, for the Management and Administration by UBS and its Group Companies of the Covered Assets (including the management of credit risk in relation thereto); and
  - (ii) procedures for regular review and internal reporting of the Covered Assets.
- (e) The Confederation (acting reasonably) may propose to UBS the adoption in the Asset Management Framework of (additional) appropriate arrangements for enhancing and increasing the level and frequency of review of, and internal reporting in respect of, the Covered Assets and for considering and taking appropriate remedial management steps, as Net Loss Amounts, or the likelihood of any or further Net Loss Amounts, increase (which arrangements may include or be based on any “watch list” or similar systems, controls or processes of UBS and its Group Companies established prior to the Signing Date for the purpose of monitoring distressed assets or exposures), and UBS shall consider and respond to such proposals in good faith.

#### **10.4.3 Content and application of Conflicts Management Policy**

- (a) Subject to Clause 17.5, UBS shall ensure that the Conflicts Management Policy:
  - (i) sets out details of the systems, controls and processes (reasonably consistent with UBS’ internal standards for any comparable requirement and consistent with Good Industry Practice) for the purposes of (A) (where possible) avoiding Conflicts; (B) identifying Conflicts as early as possible; (C) monitoring, managing and mitigating Conflicts that arise from time to time; (D) disclosing Conflicts to the Confederation that cannot be avoided and might disadvantage the Confederation; and (E) preventing conduct (whether in relation to a Covered Asset or otherwise) which is intended to circumvent or otherwise avoid (or has the effect of circumventing or otherwise avoiding) the application of the Conflicts Management Policy;
  - (ii) complies with Applicable Law;

- (iii) (unless and to the extent that the Confederation agrees otherwise in writing) is consistent with the other provisions of the LPG Documents (including the Asset Management Objective and the other Asset Management Provisions); and
  - (iv) requires that with respect to any Conflict that is identified, appropriate actions are taken in order to resolve the Conflict and that such actions are recorded in writing.
- (b) The Conflicts Management Policy shall apply in respect of the monitoring, management and mitigation of any Conflicts, irrespective of whether they arose prior to the Signing Date or thereafter.
- (c) The Conflicts Management Policy may be incorporated within the Asset Management Framework or other policies or strategies but shall be subject to the requirements set out in this Clause 10.

#### **10.4.4 Review of Asset Management Framework and Conflicts Management Policy**

UBS shall ensure that each of the Asset Management Framework and the Conflicts Management Policy is reviewed no less frequently than annually by the SOC in accordance with the Governance and Organisational Provisions, to determine any modifications thereto that the SOC reasonably considers to be necessary or appropriate for the purpose of ensuring that the Asset Management Framework and the Conflicts Management Policy comply with the Loss Protection Guarantee and the LPG Documents. UBS shall provide the Confederation with each final report on each such review once available.

#### **10.4.5 Arm's length undertaking**

UBS will, and shall ensure that each Group Company will, enter into any Hedge between Group Companies and into any Realisation with a Group Company as Covered Asset Purchaser in accordance with UBS' internal standards and at a price which is the same as would be agreed in a comparable transaction between two unrelated parties (market price).

### **11. TRANSFER OF ASSET MANAGEMENT RESPONSIBILITIES**

- (a) UBS shall ensure that no Group Company shall transfer to any person other than a Group Company, whether by way of novation, sub-contract, delegation or otherwise, any duties and responsibilities of the NCL Unit Management Team in connection with the Management and Administration of the Covered Assets except with the prior written consent of the Confederation (such consent not to be unreasonably withheld).
- (b) Any transfer pursuant to this Clause 11 shall be without prejudice to UBS' liabilities, responsibilities, duties and obligations under the LPG Documents.
- (c) For the avoidance of doubt, this Clause 11:
- (i) shall not apply to a transfer of the rights, responsibilities, duties or obligations in connection with the Management and Administration of a Covered Asset if and to the extent that Covered Asset itself (or part thereof) is Realised; and
  - (ii) shall not restrict UBS in outsourcing any non-front office functions.

## 12. RESTRICTED CONDUCT

- (a) UBS shall not, and shall ensure that no Covered Entity or other Group Company will, enter into any Restricted Conduct relating to a Covered Asset as from the Signing Date unless:
  - (i) the Confederation has given its prior written consent (such consent not to be unreasonably withheld or delayed);
  - (ii) as may be agreed to be permitted in accordance with the Governance Policy; or
  - (iii) until such time as a Governance Policy is implemented in accordance with this Agreement, but not for any such conduct entered into after 90 days after the Closing Date, any such conduct is:
    - (A) in accordance with the banking policies, practices and procedures of UBS or other relevant Group Companies, to the extent consistent with Good Industry Practice;
    - (B) in compliance with UBS' obligation under the LPG Documents to preserve or protect the value of the Covered Assets (or any of them) in line with the LPG Principles; or
    - (C) required in connection with a Realisation or under Applicable Law or under the Underlying Documentation.
- (b) "**Restricted Conduct**" means any conduct relating to a Covered Asset which constitutes or causes:
  - (i) any Specified Action (except for any Realisation);
  - (ii) any release of any Security, guarantee, indemnity or collateral held by, or given for the benefit of, any Covered Entity or other person for a Covered Asset; or
  - (iii) granting any guarantee, indemnity or collateral by any Covered Entity for the benefit of any person which is not a Group Company for a Covered Asset.

## PART IV

### MONITORING AND REPORTING

## 13. MONITORING

- (a) UBS shall engage in a constructive, open and transparent dialogue with the Confederation and any relevant Government Entities in relation to the Loss Protection Guarantee and the LPG Documents and UBS' compliance therewith.
- (b) UBS shall act in accordance with its standard internal processes and governance in continuously monitoring and assessing compliance by UBS, the NCL Unit and each other Group Company (and their Representatives) with the LPG Documents, in particular, without limitation, regarding:
  - (i) the Management and Administration of the Covered Assets;

- (ii) the planning, organisation and implementation of Realisations of the Covered Assets;
  - (iii) the provision of information to the Confederation;
  - (iv) planning, organisation and implementation of the governance and organisational requirements; and
  - (v) compliance with covenants and representations.
- (c) UBS shall, and shall ensure that the NCL Unit and any other Group Company will:
- (i) develop and maintain such reporting systems, controls and processes as are reasonably necessary and required under Good Industry Practice to ensure that UBS, the NCL Unit and each other Group Company (and their Representatives) comply with the LPG Documents (including by (i) identifying each Covered Asset as such in its systems and attributes of such Covered Assets which are relevant to compliance with the LPG Documents and (ii) taking all measures necessary to ensure the accurate quantification of payments or other benefits to be received or made in accordance with the LPG Documents), taking into account that the Covered Assets are non-core to UBS; and
  - (ii) ensure that it has the ability to report internally and to the Confederation or any relevant Government Entity on Covered Assets, Closely Related Hedges and Portfolio Hedges on an aggregate basis separately from other assets and exposures.

## **14. INFORMATION UNDERTAKINGS / REPORTING**

### **14.1 General information obligations**

- (a) UBS shall provide to the Confederation:
- (i) such Information in connection with the Loss Protection Guarantee and the LPG Documents as the Confederation may reasonably request from time to time (including, without limitation, in order to be in a position to protect its interests under the LPG Documents); and
  - (ii) access to its Representatives, including, if appropriate, senior management, and enable the Confederation to engage in discussions and ask questions in connection with the Loss Protection Guarantee and the LPG Documents as the Confederation may reasonably request from time to time.

- (b) In addition to the above, in order for FINMA to fulfil its duties under article 14a para. 3 lit. c of the Federal Additional Liquidity Ordinance, UBS shall provide FINMA promptly with all information necessary for its monitoring and confirmation duties. For the avoidance of doubt and independent of the obligations under supervisory law (in particular article 29 FINMASA), UBS will promptly provide FINMA with all information requested, grant it unlimited access to all Books and Records, and allow it at any time to request meetings and conduct interviews at any of UBS' premises.

## **14.2 Quarterly reporting**

### **14.2.1 Preparation and delivery of Quarterly Statements**

Subject to Clauses 14.2.2 to 14.2.5, on or before the date falling 90 days after each Quarter Date (each such date, a "**Quarterly Statement Date**"), UBS shall deliver to the Confederation a Quarterly Statement for that quarter ("**Quarterly Statement Period**").

### **14.2.2 Initial Quarterly Statement**

The first Quarterly Statement shall be provided in respect of the period from (and including) the Valuation Date to (and including) 30 September 2023. That period shall be the "**Quarterly Statement Period**" for the first Quarterly Statement and be treated as a "quarter" for the purposes of these Clauses, and 30 September 2023 shall be the last day of that quarter. The first Quarterly Statement shall be delivered to the Confederation on or before the date falling 90 days after the last date of the relevant quarter (which date shall be the "**Quarterly Statement Date**" for that Quarterly Statement).

### **14.2.3 QS Compliance**

UBS shall deliver to the Confederation, at the same time as it delivers each Quarterly Statement a certificate signed by two senior members of the NCL Unit Management Team confirming that such Quarterly Statement, and any supporting data delivered pursuant to Clause 14.2.1 is, to the best of their knowledge and having made all due and reasonable enquiries, true and accurate, fairly presents the Information it contains and is not misleading for the purpose for which it is prepared.

### **14.2.4 Contents of Quarterly Statements and Quarterly Statements Data**

A "**Quarterly Statement**" means a statement in the agreed form, each of which when taken together with the Quarterly Statement Data delivered at the same time must set out as at the relevant Quarterly Statement Date all Information necessary to verify and evaluate the Net Realisation Proceeds and Net Loss Amounts development, and shall include the following Information:

#### *A. Net Realisation Proceeds*

- (a) in respect of each Realisation made on a Covered Asset during the Quarterly Statement Period (and, if there was/were (partial) Realisation(s) of such Covered Assets in previous Quarterly Statement Periods since the Valuation Date, such Realisations for that Covered Asset are to be included within the Net Realisation Proceeds for that Covered Asset):
- (i) details of the Covered Asset to which these Net Realisation Proceeds relate;

- (ii) the Realisation Date;
  - (iii) the US\$ amount of that Net Realisation Proceeds; and
  - (iv) the US\$ amounts and the calculations of the corresponding elements of that Net Realisation Proceeds (i.e. Gross Realisation Proceeds, Gross Realisation Payments, Enforcement Costs and Realisation Expenses); and
- (b) the aggregate US\$ amount of all Net Realisation Proceeds made as well as of all corresponding elements of that Net Realisation Proceeds paid during the Quarterly Statement Period,

provided that, in the case of paragraph (a) and (b) above, if and as long as it is not reasonably practicable for UBS to provide US\$ amounts in respect of the relevant items above due to the limitations of the trading, reporting and data management systems of the Group used for the purpose of producing such information and subject to the relevant reporting remaining transparent and comprehensible, it shall provide the relevant amounts in the Other Currency in which such items are originally denominated.

*B. Net Loss Amount(s)*

- (a) In respect of each Net Loss Amount that has occurred during the Quarterly Statement Period:
- (i) details of the Covered Asset to which that Net Loss Amount relates;
  - (ii) the date on which each component of that Net Loss Amount occurred;
  - (iii) the US\$ amounts of each component of that Net Loss Amount (and, if the underlying currency of any component of that Net Loss Amount is an Other Currency, these amounts in such Other Currency);
  - (iv) the US\$ amounts and calculations of the corresponding elements of that Net Loss Amount (i.e. Initial Valuation, payables/receiveables from Permitted Litigation, Asset Repayments, Hedging Benefits, Hedging Costs and the Initial CS Difference (if applicable)); and
  - (v) the US\$ amount and the Base Currency amount (converted at the Applicable Exchange Rate, the Exchange Date being the relevant Realisation Date) of the Net Loss Amount and the Applicable Exchange Rate used for such conversion.
- (b) the aggregate amount of the total Shared Loss Amounts (in the Base Currency) that have occurred during the Quarterly Statement Period and the aggregate amount of the total Shared Loss Amounts (in the Base Currency) that have occurred since the Valuation Date.

*C. Business Plans*

*For each Portfolio*

- (a) Detailed performance vs. relevant Business Plan, including status and trend analysis of metrics included in the relevant Business Plan;
- (b) P&L reports, including P&L attribution analysis;
- (c) Risk reports;
- (d) Stress testing results; and
- (e) Regulatory capital report.

*D. Valuations*

Updated valuations of each Covered Asset, such valuations being (i) made as per the end of the relevant calendar quarter, (ii) made on the basis of the same method and principles as applied to the Initial Valuations and (iii) presented in such form and detail as is necessary for the Confederation to reflect the relevant transactions in Covered Assets correctly and timely in its Books and Records in accordance with the International Public Sector Accounting Standards, and other Government Entities (including the SFAO) to exercise their functions in this respect.

*E. Hedging*

UBS shall provide information and commentary on material matters relating to Hedges pursuant to Clause 10.2, to include, without limitation, a summary of the material risk factors which UBS anticipates will be subject to dynamic hedging and any material information on close-out or macro hedges relating to the Covered Assets.

**14.2.5 Corrections**

Upon becoming aware of any material incompleteness, error or inaccuracy in any Quarterly Statement or relating to any Quarterly Statement Data, UBS shall notify and document the Confederation with a respective correction.

**14.3 Requested Reports**

- (a) The Confederation may from time to time (acting reasonably) require UBS to produce and deliver reports containing Information relating to:

*Covered Assets*

- (i) the application of any Asset Exclusion Criteria on or with respect to any Covered Asset or group of Covered Assets;
- (ii) details of any Realisation of any Covered Asset, group of Covered Assets or Covered Asset Class (including with respect to the nature and quantum of any Net Loss Amount and its components relating to such Covered Asset or group of Covered Assets);

- (iii) any material Hedges entered into in respect of any Covered Assets, group of Covered Assets or Covered Asset Class, in such granularity as is reasonably possible taking into account the nature of the specific hedging strategy applied;
- (iv) Covered Entities to the extent reasonably relevant for the purposes of the Loss Protection Guarantee;
- (v) any events or circumstances which have materially affected the level of Net Loss Amounts and Net Realisation Proceeds in respect of Covered Assets in aggregate or in respect of Covered Assets within particular Covered Asset Classes, and any events or circumstances considered by UBS to be reasonably likely to occur in future periods which could result in a material increase or decrease, as the case may be, in the level of such of Net Loss Amounts and Net Realisation Proceeds when compared with previous periods;

*Valuation and Asset Management*

- (vi) the valuation (including, without limitation, the Initial Valuation) and performance of any Covered Asset, group of Covered Assets or Covered Asset Class over any period;
- (vii) any circumstances in respect of which the Confederation considers that the Management and Administration of the Covered Assets (or any of them) is failing to comply with the Asset Management Provisions;

*Reporting*

- (viii) overview on any Report, Quarterly Statement Data or Notification Report provided to the Confederation;
- (ix) any material impact (actual or estimated, as appropriate) of any modifications that have occurred or are proposed to be made to, or failures of or deficiencies in, reporting methodologies or any other systems, processes and controls relating to Covered Assets, Conflicts or the LPG Documents;
- (x) any UBS Standard Reports (including the relevant UBS Standard Reports themselves);

*Policies*

- (xi) the impact of any material modifications that have been made, or are proposed to be made, to the Asset Management Framework or any Policy or the manner in which any of them is being implemented;

*Other*

- (xii) Compliance with the LPG Documents (including the systems, controls, processes, practices and policies of UBS and other Group Companies relating to the Covered Assets and Conflicts); or

- (xiii) any consultation with any Authority in relation to any material matter related to or in connection with the Loss Protection Guarantee or the LPG Documents (which may include Information not relating to the Covered Assets or the Loss Protection Guarantee to the extent required in connection with any state aid or other matters within the jurisdiction of the relevant Authority).
- (b) The Confederation may, acting reasonably, require a Requested Report to include a qualitative narrative discussion and analysis in respect of the matters which are the subject of the relevant Report.

#### **14.4 Notification Reports**

UBS shall, as soon as reasonably practicable after becoming aware of the relevant matter, give notice and deliver reasonable details to the Confederation of:

- (a) any extraordinary development of the Shared Loss Amount, including, without limitation, if the Net Loss Amounts realised or reasonably likely to be realised in a Realisation of (i) any Covered Asset, (ii) any group of Covered Assets or (iii) any Covered Asset Class is materially higher than expected;
- (b) any (not already reported) Conflict which could have a material impact on (i) any Covered Asset, (ii) any group of Covered Assets or (iii) any Covered Asset Class;
- (c) the occurrence of any Termination Event and the existence of any circumstances that it considers will or are reasonably likely to result in a Termination Event;
- (d) the occurrence of any Level 1 to Level 4 Trigger Event or circumstance that it considers will or is likely to result in the occurrence of any such event; and
- (e) any material Litigation being commenced by any third party (including any Authority) against any Group Company which UBS reasonably considers is likely to have a material adverse effect on (i) any material Covered Asset, (ii) any group of Covered Assets or (iii) any Covered Asset Class (and a description of that effect), or which UBS reasonably considers is likely to result in UBS or any other Group Company becoming unable to perform any of its material obligations under the LPG Documents (it being understood that Litigation between a Group Company and a Counterparty in relation to a Covered Asset shall not, of itself, require disclosure under this paragraph (e)).

#### **14.5 Format of Information and Information Procedures**

- (a) If and to the extent that any Information required to be produced or delivered to the Confederation or any relevant Government Entity on or before a day pursuant to the LPG Documents constitutes Information which UBS or any other Group Company is required by Applicable Law or Accounting Standards to publish, issue or release on or before that day or include in any reports or accounts published, issued or released by UBS or any other Group Company on or before that day, then UBS shall ensure that any such Information produced or delivered to the Confederation or any relevant Government Entity is prepared to at least the same standard as would be required for such publication, issue, release or inclusion.

- (b) Any Reports and Information shall be produced or delivered in the format specified in the LPG Documents or, if no such format has been so specified (or agreed between the Parties from time to time), in such a format as the Confederation reasonably considers appropriate for the purposes for which the relevant Information is required to be produced or delivered (taking into account any limitations of the trading, reporting and data management systems of the Group used for the purpose of producing any relevant Reports and Information to the extent reasonable in view of the importance of the Report and Information and the size and nature of the Loss Protection Guarantee). Any Requested Reports shall be delivered to the Confederation within 30 days upon request.
- (c) If the Confederation or UBS proposes any modification to a specified or agreed format for production or delivery of any Report, the Parties shall consult with each other in good faith (acting reasonably) to seek to agree such modification.
- (d) Each of the Parties shall liaise with each other in relation to any requests for, and the delivery of any, information to be delivered under or in connection with the LPG Documents and shall seek to establish suitable procedures for logging and tracking any information requests and deliveries.
- (e) The Confederation acknowledges that Information provided pursuant to this Clause 14 may contain estimates or statements of opinion or statements which relate to events or which depend on circumstances outside the control of the Group, or which may be of a subjective nature or subject to different interpretations (such estimates or statements only to the extent that they so relate and/or to the extent only that they are subjective or subject to different interpretations, “**Good Faith Statements**”). No liability will attach to any Group Company or its Representatives under any LPG Document in respect of any Good Faith Statement which is honestly held (to the extent it constitutes an opinion), given in good faith and prepared with reasonable skill and care, having made all due and reasonable enquiries.

#### **14.6 Obligation to disclose**

Notwithstanding any other provision of any LPG Document, neither UBS, nor any member of the Group, nor any of their Affiliates, nor any of their Representatives shall be obliged to disclose any information where such disclosure would be in breach of any Applicable Law or any contractual provision (where such contractual provision was reasonably required to enable a Realisation), except if and to the extent required by Swiss Applicable Law.

#### **14.7 Continuing obligations**

The rights and obligations pursuant to paragraph (a) of Clause 14.1, Clause 14.3 and Clause 14.5 are continuing and shall survive and remain binding for a period of 24 months from the payment of the Guaranteed Amount by the Confederation in accordance with the terms of this Agreement provided that during this time they shall only apply in respect of any information that the Confederation could have reasonably requested in respect of obligations of UBS in respect of this Agreement prior to such payment being made (taking into account the passage of time between such obligation and the request for information).

## 15. ASSURANCE PLAN

- (a) By no later than 31 March 2024, UBS shall deliver to the Confederation, and thereafter maintain, an assurance plan (in a manner which is reasonably consistent with UBS' internal standards for any comparable requirement) which is reasonably satisfactory to the Confederation ("**Assurance Plan**") for a regular review by its internal audit or risk function and, to the extent that UBS considers appropriate, external auditors or other contractors, of:
  - (i) the adequacy of the systems, controls, processes, practices and policies of UBS and other Group Companies for ensuring compliance with the LPG Documents; and
  - (ii) whether, and the extent to which, any Group Company has failed to comply with the LPG Documents.
- (b) The Assurance Plan shall be reviewed by UBS' internal audit or risk function (and, to the extent considered appropriate by UBS, external auditors or other contractors) as per paragraph (a) of this Clause 15 (i) for as long as the pro forma Shared Loss Amount is less than CHF 3,000,000,000 (in words: three billion Swiss francs), every two years, but in any case in the year during which such threshold is met, and (ii) thereafter, annually. The first review of the Assurance Plan shall take place in the calendar year 2024.
- (c) UBS shall prepare and deliver to the SOC and the Confederation, by no later than 30 June in each year in which a review of the Assurance Plan has to take place pursuant to paragraph (b), a report that sets out the results of the review conducted in accordance with the Assurance Plan and any changes to the systems, controls, processes, practices and policies of the members of the Group or other measures which UBS intends to implement, following such review, in order to ensure that it complies with the LPG Documents ("**Assurance Report**").

## PART V

### AUDIT AND INVESTIGATION

## 16. AUDIT AND INVESTIGATION RIGHTS OF THE CONFEDERATION

### 16.1 General audit and investigation rights

- (a) The Confederation and the SFAO (acting in its own right) shall at any time have the right to conduct any audit, investigation or review of, or in relation to, any or all of the following:
  - (i) compliance by UBS or any other Group Company with its obligations under the LPG Documents;
  - (ii) any Reports or other Information provided or delivered pursuant to the LPG Documents or otherwise in connection with the Loss Protection Guarantee;
  - (iii) the payments made or to be made pursuant to the LPG Documents;

- (iv) the Covered Assets and the application of any Asset Exclusion Criteria on such Covered Assets;
  - (v) the Initial Valuations of the Covered Assets and subsequent valuation updates pursuant to sub-paragraph D. (*Valuations*) of Clause 14.2.4;
  - (vi) Realisations and the development of the Shared Loss Amount;
  - (vii) governance;
  - (viii) Conflicts (in particular, without limitation, in each case to the extent necessary to monitor compliance with the LPG Documents);
  - (ix) any other aspect of the Loss Protection Guarantee or the LPG Documents; and
  - (x) any other aspect of the business, financial condition and affairs of any Group Company to the extent that the Confederation considers it necessary (acting reasonably) in connection with monitoring the operation of, and risks relating to, the Loss Protection Guarantee and the Covered Assets or otherwise in connection with the LPG Documents.
- (b) The scope and duration of any such audit, investigation or review shall be determined by the Confederation or the SFAO (in its own right) (acting reasonably). UBS shall bear all external costs and expenses of any such audit, investigation or review in accordance with Clause 21.2.
  - (c) Any such audit, investigation or review shall, where appropriate in the opinion of the Confederation or the SFAO (in its own right), be coordinated with FINMA and its general supervisory activities. FINMA's own supervisory audit, investigation or review rights, and similar rights of other Government Entities, remain reserved and are unaffected by the Confederation's and the SFAO's audit rights in connection with the Loss Protection Guarantee.
  - (d) UBS shall, and shall ensure that the NCL Unit and each Group Company will, subject to the LPG Principles, cooperate in all respects with any such audit, investigation or review, and shall make available to the Confederation such Representatives, premises and Information as the Confederation and its Representatives may reasonably require in connection with such audit, investigation or review, always subject to UBS' confidentiality obligations.
  - (e) In connection with such audit or investigation, UBS shall, and shall ensure that the NCL Unit and each other Group Company will:
    - (i) permit the Representatives of the Confederation to visit UBS' premises and examine any Books and Records relating to the Covered Assets and provide electronic copies thereof (upon the Confederation's request in an electronic virtual data room, including, without limitation, maintaining the Virtual Data Room or making alternative, equivalent arrangements during the lifetime of the Loss Protection Guarantee), pursuant to the obligations under Clause 14;

- (ii) discuss with any such Representative of the Confederation any aspect of such Books and Records as the Confederation may request, and answer any questions that may be raised as part of such discussions; and
- (iii) provide the Representatives of the Confederation access to such of its Representatives, facilities and office space at UBS' premises, IT and other systems, and other resources as the Confederation may require for that purpose.

## **16.2 Appointment of Monitors**

- (a) If the Confederation has reason to believe that UBS is in any material respect not in compliance with this Agreement or any other LPG Document, it may ask any competent Federal authority to appoint a monitor. If such authority refuses to appoint such monitor, the Parties shall discuss in good faith alternative solutions for a period of up to 60 days (or such longer period as the Parties may agree). If the Parties cannot agree on an alternative solution, the Confederation may appoint an appropriate employee or official of the Confederation ("**Monitors**") to attend meetings of any corporate body, committee or other forum of UBS or any other Group Company dealing with aspects of the Loss Protection Guarantee and request such information as it reasonably deems necessary for the purpose of enabling the Confederation to monitor UBS' compliance with its obligations under the Loss Protection Guarantee. UBS shall ensure that any Monitors are permitted to attend such meetings. Clause 32 shall apply *mutatis mutandis* to Monitors.
- (b) If the Confederation notifies UBS that it wishes Monitors to attend any meeting pursuant to paragraph (a), UBS shall give the Confederation and the Monitors the same period of notice of the time, date and location for such meetings as is given to the members of the relevant body, committee or other forum and UBS shall send to the Confederation and the Monitors copies of all documents circulated for the purposes of such meetings and all minutes of those meetings at the same time as they are sent to such members.
- (c) The Monitors may, but shall not be required or obliged to, speak or participate in any way in any such meeting but shall have no voting rights.

## **PART VI**

### **GOVERNANCE AND ORGANIZATIONAL REQUIREMENTS**

## **17. GOVERNANCE**

### **17.1 Establishment of NCL Unit**

- (a) UBS shall, by no later than the date of publication of the next quarterly financial statements immediately following the Signing Date, establish a separate organisational unit for the purpose of the implementation, administration and compliance with UBS' obligations under this Agreement and the other LPG Documents.
- (b) The NCL Unit shall be maintained by UBS for the lifetime of the Loss Protection Guarantee.

## 17.2 Establishment of Policies

UBS shall establish and enact a Governance Policy, subject to the prior written consent of the Confederation (such consent not to be unreasonably withheld or delayed) within 90 days after the Closing Date and provide a copy thereof to the Confederation.

## 17.3 Governance and Organisation of NCL Unit

- (a) UBS shall establish a governance and organisation structure of the NCL Unit that is appropriate, efficient and sufficient to implement the LPG Principles.
- (b) UBS shall ensure that the NCL Unit manages and administers the Covered Assets at all times and in all respects in compliance with the principles set forth in Clause 10.1 and in accordance with this Agreement.
- (c) UBS shall establish and maintain the governance structure of the NCL Unit as required under this Agreement and the Governance Policy, providing in particular for:
  - (i) a senior oversight committee or body (“**SOC**”) with direct access to the senior management of UBS, which has the competence and responsibility for the ultimate management of the NCL Unit and the independent oversight and supervision of the NCL Unit Management Team, in each case in respect of the Covered Assets;
  - (ii) a management team in charge of the day-to-day management and responsibility for the operations of the NCL Unit (“**NCL Unit Management Team**”); and
  - (iii) rules to prevent adverse effects due to any Conflicts.
- (d) The Confederation shall have the right to appoint, at its election, one (if the SOC consists of less than five members) or two (if the SOC consists of five or more members) members or observers to the SOC.
- (e) UBS shall consult the Confederation before any Realisation relating to, or which is reasonably likely to relate to, a Major Transaction.
- (f) The Governance Policy shall provide for governance rights in relation to the NCL Unit, including materiality thresholds and other qualifications for decisions to be taken in connection with Realisations at the level of the SOC.

## 17.4 Enhanced Oversight

- (a) At any time following the occurrence of a Level 1 Trigger Event, a Level 2 Trigger Event, a Level 3 Trigger Event or a Level 4 Trigger Event, the Confederation shall have the right to request (acting reasonably) from UBS, upon reasonable notice, to document and explain material events that contributed to the occurrence of that trigger event and measures taken and envisaged to be taken by UBS in relation to such Portfolio(s) to address these adverse developments.

- (b) If a Level 2 Trigger Event was mainly triggered by a material breach by UBS of a Policy and/or of a material provision of this Agreement and/or Applicable Law, the Confederation shall have the right to provide UBS with proposals of a (revised) Business Plan which complies with the LPG Principles proposing changes in the business strategy in relation to each Portfolio, together with the relevant Loss Budgets adapted accordingly, which proposal UBS shall consider in good faith and not unreasonably refuse.
- (c) If a Level 3 Trigger Event was mainly triggered by a material breach by UBS of a Policy and/or of a material provision of this Agreement and/or Applicable Law, the Confederation shall have the right to provide UBS with proposals of a (revised) Business Plan which complies with the LPG Principles proposing changes in the business strategy in relation to the Covered Assets in the aggregate and for each Portfolio, together with Loss Budgets adapted accordingly, which proposal UBS shall consider in good faith and not unreasonably refuse.
- (d) If a Level 4 Trigger Event was mainly triggered by a material breach by UBS of a Policy and/or of a material provision of this Agreement and/or Applicable Law, the Confederation shall have the right to:
  - (i) provide UBS with proposals of a (revised) Business Plan which complies with the LPG Principles proposing changes in management and business strategy in relation to the NCL Unit or the Covered Assets in the aggregate and for each Portfolio, together with Loss Budgets adapted accordingly, which proposal UBS shall consider in good faith and not unreasonably refuse; and/or
  - (ii) review the Governance Policy and provide UBS with proposals of a revision in compliance with the LPG Principles, in particular expanding rights or lowering applicable thresholds, including, without limitation, require that any Specified Action relating to any Covered Asset be, subject to the prior approval of the SOC, which proposal UBS shall consider in good faith and not unreasonably refuse.

#### **17.5 Adoption of further Policies; Modifications to Asset Management Framework and Policies**

- (a) The Confederation may propose to UBS the adoption of any policy or any other guidelines or the amendment of any Policy, which proposal UBS shall consider in good faith and not unreasonably refuse; in case of any proposal by the Confederation based on results reported in an Assurance Report or for other particular reasons as explained to UBS, UBS shall explain to the Confederation its reasons if it does not implement such proposal.
- (b) No material modification to the Asset Management Framework or any Policy shall be adopted or implemented unless:
  - (i) UBS has given notice to the Confederation of the proposed modification;

- (ii) the proposed modification has been approved in writing by the SOC; and
  - (iii) if a Level 4 Trigger Event has occurred: the proposed modification has been approved by the Confederation in advance in writing (such approval not to be unreasonably withheld or delayed).
- (c) Upon the occurrence of a Level 4 Trigger Event, the Confederation, acting reasonably following consultation with UBS and taking reasonably into account market conditions as well as the expenses, costs and time (to be) incurred by UBS in connection with such adoption or implementation and the size and nature of the Loss Protection Guarantee, may propose the adoption or implementation of such modifications to the Asset Management Framework and/or any Policy as it sees fit, which proposal UBS shall consider in good faith and not unreasonably refuse.

## **18. ORGANISATIONAL REQUIREMENTS**

### **18.1 Sufficient resources for NCL Unit**

UBS undertakes to provide the NCL Unit with sufficient resources (financial and otherwise) to ensure compliance by UBS with its obligations under the LPG Documents.

### **18.2 Right of intervention**

If the Confederation determines that UBS does not comply with its obligations under Clause 18.1, it shall notify UBS and the Parties shall enter into good faith negotiations for a period of up to 60 days (or such longer period as the Parties may agree) with a view to agreeing on any remedial action. Should the Parties not reach an agreement within that period, the procedure pursuant to Clause 25 shall apply.

## **19. REMUNERATION**

With respect to the obligations of UBS in connection with its compensation structure in view of the Loss Protection Guarantee, reference is made to the 2023 Remuneration Decree. Upon a corresponding request of the Confederation, UBS shall, within a reasonable time period following such request, provide to the Confederation the details of the content of its compensation system addressing the obligations of UBS pursuant to the 2023 Remuneration Decree.

**PART VII**  
**REPRESENTATIONS AND WARRANTIES AND COVENANTS**

**20. REPRESENTATIONS**

**20.1 Initial Representations**

Each Party (with respect to itself) makes the following representations and warranties to the other Party on the Signing Date:

**20.1.1 Status**

UBS is a corporation, duly incorporated and validly existing under the law of its jurisdiction of incorporation and has the power to own its assets, and to carry on its business as it is being conducted.

**20.1.2 Binding obligations**

The obligations expressed to be assumed by it in the LPG Documents are, subject to any general principles of law limiting such obligations, legal, valid, binding and enforceable obligations.

**20.1.3 Non-conflict with other obligations**

The entry into and performance by it of, and the transactions contemplated by, the LPG Documents do not conflict with:

- (a) any Applicable Law; or
- (b) in the case of UBS, its constitutional documents.

**20.1.4 Power and authority**

It has the power to enter into, perform and deliver, and has taken all necessary action to authorise its entry into, performance and delivery of, the LPG Documents to which it is a party and the transactions contemplated by such LPG Documents.

**20.1.5 Authorisations**

All Authorisations required:

- (a) to enable it lawfully to enter into, exercise its rights and comply with its obligations under the LPG Documents; and
  - (b) make the LPG Documents admissible in evidence in Switzerland,
- have been obtained or effected and are in full force and effect.

## 20.2 Repeating Representations

UBS represents and warrants to the Confederation on each date a Quarterly Statement is provided to the Confederation in accordance with Clause 14.2 and on each date a Report is provided to the Confederation, in each case by reference to the facts and circumstances then existing, as follows:

- (a) Any factual Information contained in each Quarterly Statement and each Report was true and accurate in all material respects and not misleading as at the date of such Quarterly Statement or Report containing the Information or (as the case may be) as at the date the Information is expressed to be given; and
- (b) the Quarterly Statement Data and the financial Information contained in any Quarterly Statement have been prepared in accordance with UBS' Accounting Standards for its consolidated financial statements.

## PART VIII

### FEES

## 21. FEES, COSTS AND EXPENSES

### 21.1 Guarantee fees

- (a) UBS shall pay to the Confederation:
  - (i) a non-recurring fixed set-up fee ("**Set-up Fee**") in the amount of CHF 40,000,000 payable in two equal instalments on 30 June and on 30 September 2023, serving as compensation to the Confederation for the set up of the Loss Protection Guarantee;
  - (ii) a maintenance fee ("**Maintenance Fee**") in the amount of CHF 36,000,000 per annum, payable on a pro rata basis in arrears in equal instalments on each Quarter Date during the Maintenance Fee Calculation Period and on the last day of the Maintenance Fee Calculation Period; and
  - (iii) an annual drawn portion fee ("**Drawn Portion Fee**") in Swiss francs computed at the "**Drawn Portion Fee Rates**" (as set forth in the table below), calculated on the amount of CHF 9,000,000,000 as at each Quarter Date for each quarter within the Drawn Portion Fee Calculation Period, on a pro rata basis in the case of broken quarters, in which the Relevant Loss Amount is within the range set forth opposite the respective Drawn Portion Fee Rate.

<u>Relevant Loss Amount</u>	<u>Drawn Portion Fee Rate</u>
> CHF 3 billion and ≤ CHF 5 billion	0.40% per annum
> CHF 5 billion and ≤ CHF 6 billion	0.80% per annum
> CHF 6 billion and ≤ CHF 7 billion	1.20% per annum

> CHF 7 billion and ≤ CHF 8 billion	1.60% per annum
> CHF 8 billion and ≤ CHF 9 billion	2.00% per annum
> CHF 9 billion and ≤ CHF 10 billion	2.40% per annum
> CHF 10 billion and ≤ CHF 11 billion	2.80% per annum
> CHF 11 billion and ≤ CHF 12 billion	3.20% per annum
> CHF 12 billion and ≤ CHF 13 billion	3.60% per annum
> CHF 13 billion and ≤ CHF 14 billion	4.00% per annum

The accrued Drawn Portion Fee is payable on the date of payment of the Guaranteed Amount by the Confederation pursuant to Clause 9.3 and shall exclusively be settled by set-off against the Guaranteed Amount paid by the Confederation. In case no Demand for Payment is submitted or no payment of the Guaranteed Amount is made by the Confederation in accordance with this Agreement, the Drawn Portion Fee shall not become due and payable.

(b) For the purpose of this Clause 21:

**“Drawn Portion Fee Calculation Period”** means the period from and including 1 October 2023 to and including the date of the submission of the Demand for Payment in accordance with paragraph (a) of Clause 9.2.

**“Maintenance Fee Calculation Period”** means the period from and including 1 October 2023 to and including the earlier of (i) the date of a Demand for Payment and (ii) the effectiveness of the termination of this Agreement pursuant to Clause 22.

**“Relevant Loss Amount”** means the aggregate of the Shared Loss Amount and the Unrealised Loss Amount, in each case as per the relevant Quarter Date and for the last (pro rata) quarter as per the last day of the Drawn Portion Fee Calculation Period.

**“Unrealised Loss Amount”** means, as per any Quarter Date (and for the last (pro rata) quarter as per the last day of the Drawn Portion Fee Calculation Period) and with respect to all Covered Assets which were not subject to a Realisation as per such Quarter Date (or as per the last day of the Drawn Portion Fee Calculation Period), the amount in the Base Currency (with each underlying US\$ amount converted into the Base Currency at the Applicable Exchange Rate on the relevant Quarter Date (or as per the last day of the Drawn Portion Fee Calculation Period)) that would be determined as a Net Loss Amount on any Realisation as determined in accordance with paragraph (a) of Clause 8.1, provided that for these purposes where the (mark-to-market) book value of such Covered Asset (as reflected in the Books and Records of the relevant Group Company holding the relevant Covered Asset and in line with the principles set forth in paragraph (b)(iii) of Clause 5.3) as per such Quarter Date (or as per the last day of the Drawn Portion Fee Calculation Period):

(i) is a positive, such value shall be applied as “Gross Realisation Proceeds” for the purposes of subparagraph (ii) of paragraph (a) of Clause 8.1 (and the Gross Realisation Payments in respect of such Covered Asset shall be deemed to be zero for the purposes of sub-paragraph (ii)); and

- (ii) is a negative, such value shall be applied as “Gross Realisation Payments” for the purposes of subparagraph (ii) of paragraph (a) of Clause 8.1 (and the Gross Realisation Proceeds in respect of such Covered Asset shall be deemed to be zero for the purposes of sub-paragraph (ii)).

If the Unrealised Loss Amount as so calculated is negative, it shall be accounted for as a gain for the purpose of calculating the Relevant Loss Amount, and if such amount is positive, it shall be accounted for as a loss for the purposes of calculating the Relevant Loss Amount.

## **21.2 Costs and Expenses**

### **21.2.1 Costs of UBS**

UBS shall bear (or shall procure that other Group Companies and their respective Affiliates will bear) all of the costs and expenses incurred by UBS, any other Group Company and their respective Affiliates arising out of or in connection with the Loss Protection Guarantee and/or the LPG Documents.

### **21.2.2 Costs of FINMA and additional costs of the Confederation**

- (a) UBS undertakes vis-à-vis FINMA in the sense of article 112 para. 2 of the CO (*echter Vertrag zugunsten eines Dritten*) to pay to FINMA within the timeline set out in paragraph (c) below the amounts of any and all Transaction Costs pursuant to paragraphs (a), (c) and (d) of the definition of “Transaction Costs” incurred by FINMA.
- (b) If the Transaction Costs incurred by the Confederation (including the SFAO) in 2023 exceed the amount of the Set-up Fee or if the Transaction Costs incurred by the Confederation (including the SFAO) in any other calendar year exceed the amount of the Maintenance Fee payable in such calendar year, UBS shall, within the timeline set out in paragraph (c) below, pay to the Confederation an amount equal to the amount by which the Transaction Costs in the respective calendar year exceed the amount of the Set-up Fee or the Maintenance Fee (as applicable) payable in such calendar year. Transaction Costs incurred by the Confederation in connection with the procedure set out in paragraph (b) of Clause 4.1.1 during the 90 day period set forth in such paragraph shall fall into the Set-up Fee.
- (c) Any payments pursuant to paragraph (a) or paragraph (b) shall be settled within 30 days upon submission to UBS of an invoice or invoices by FINMA or the Confederation, as applicable. UBS will confirm to FINMA or the Confederation, as the case may be, the contact details and (if applicable) reference numbers for such invoices.
- (d) UBS confirms and agrees that the management of FINMA’s and the Confederation’s external advisors is the sole responsibility of FINMA and the Confederation and UBS shall neither directly nor otherwise seek to influence the work of FINMA’s or the Confederation’s advisors. For confidentiality and conflict of interests reasons, other than a copy of the invoice issued to FINMA or the Confederation, no Information with respect to the services rendered or to be rendered to FINMA and the Confederation in connection with the LPG Documents and the Loss Protection Guarantee will be provided to UBS or its advisors.

- (e) The cost reimbursement obligations pursuant to this Clause 21.2.2 shall not prejudice any other cost reimbursement obligations of UBS pursuant to Applicable Law.

**PART IX**  
**REMEDIES**

**22. TERMINATION**

**22.1 Termination Event**

A termination event (“**Termination Event**”) occurs if:

- (a) (i) there is an intentional breach by UBS of any of the following obligations (and, with respect to a breach of the obligation set forth in sub-paragraph (a)(i)(E), such breach takes place repeatedly):
- (A) failure to prepare and deliver the information specifically requested by the Confederation under paragraph (a) or (b) of Clause 7.6 within 60 days upon first request in relation to a Realisation that is a Material Transaction or a Major Transaction, as applicable; or
  - (B) failure to prepare and deliver a Quarterly Statement in accordance with Clause 14.2; or
  - (C) failure to prepare and deliver an Assurance Report in accordance with paragraph (c) of Clause 15; or
  - (D) refusal to comply with the obligation to respond to specific information requests by the Confederation, SFAO or FINMA under paragraph (d) of Clause 16 within 60 days upon first request; or
  - (E) refusal to consult with the Confederation in accordance with paragraph (e) of Clause 17.3; or
  - (F) failure to pay any of the fees when they become due under Clause 21;
- (ii) the Confederation duly notifies UBS of that breach and threatens the occurrence of a Termination Event; and
- (iii) the breach is continuing and remains unremedied by UBS and unwaived by the Confederation for a period of 90 days starting from the Confederation’s notice to UBS set out in sub-paragraph (ii); or
- (b) UBS moves, or resolves to move, its headquarters outside of Switzerland.

## 22.2 Partial termination

- (a) On and at any time after the occurrence of a Termination Event which is continuing, but which relates solely to a particular Covered Asset, or to a group of Covered Assets or to a Portfolio, the Confederation may deliver to UBS a “**Partial Termination Notice**”, in respect of that Covered Asset, or group of Covered Assets or Portfolio (as applicable). A Partial Termination Notice must state that it constitutes a Partial Termination Notice and specify:
  - (i) the matter, event or circumstance giving rise to the Termination Event; and
  - (ii) the Covered Asset, group of Covered Assets or Portfolio (as relevant) to which the Termination Event relates and which the Confederation (subject to Clause 22.3) is designating as “Partial Termination Assets” (the Covered Asset, or group of Covered Assets or Portfolio so designated being “**Partial Termination Assets**”).
- (b) If a Partial Termination Notice is delivered by the Confederation to UBS, then each Covered Asset or group of Covered Assets or Portfolio designated therein as a Partial Termination Asset shall be permanently excluded from the pool of Covered Assets and constitute Non-Covered Assets with immediate effect.
- (c) As an alternative to the delivery to UBS of a Partial Termination Notice, the Confederation may (at its sole discretion) elect to deliver a suspension notice with respect to a particular Covered Asset, or to a group of Covered Assets or to a Portfolio, in which case there shall be deemed no Shared Loss Amount in respect of such Covered Asset, or group of Covered Assets or Portfolio until such time as the breach has been remedied in a manner satisfactory to the Confederation.

## 22.3 Full termination

- (a) On and at any time after the occurrence of a Termination Event which is continuing and which does not relate solely to a particular Covered Asset, or to a group of Covered Assets or to a Portfolio, the Confederation may deliver to UBS a “**Full Termination Notice**”. A Full Termination Notice must state that it constitutes a Full Termination Notice and specify the matter, event or circumstance giving rise to the Termination Event.
- (b) If a Full Termination Notice is delivered by the Confederation to UBS, the obligations of the Parties under the LPG Documents shall, unless expressly stated otherwise in this Agreement, terminate with immediate effect.

## 22.4 Voluntary termination by UBS

- (a) UBS may, at any time before it has delivered a Demand for Payment, deliver to the Confederation a “**Voluntary Termination Notice**”. A Voluntary Termination Notice must state that:
  - (i) it constitutes a Voluntary Termination Notice; and

- (ii) UBS wishes to terminate the obligations of the Parties under the LPG Documents.
- (b) If a Voluntary Termination Notice is delivered by UBS to the Confederation, the obligations of the Parties under the LPG Documents shall, unless expressly stated otherwise in this Agreement, terminate with immediate effect.

**23. DEFAULT INTEREST**

- (a) If UBS or the Confederation fails to pay any sum payable by it under an LPG Document on the due date for payment, interest (“**Default Interest**”) shall accrue on that sum at a rate which is equal to five (5) per cent. for the period from (and including) the date from which default interest becomes due and payable in accordance with article 24 of the SubA to (but excluding) the date of actual payment of that sum (both before and after judgment).
- (b) Default Interest shall accrue from day to day and be calculated on the basis of the actual number of days elapsed and a year of 365 days.

**24. REMEDIES AND WAIVERS**

- (a) No delay or omission by either Party in exercising any right, power or remedy provided by law or under or pursuant to any LPG Document shall (i) affect that right, power or remedy or (ii) operate as a waiver of it, and where no period of the exercise of a right is provided for, such right may be exercised at any time.
- (b) The single or partial exercise by either Party of any right, power or remedy provided by law or under or pursuant to any LPG Document shall not, unless otherwise expressly stated, preclude any other or further exercise of it or the exercise of any other right, power or remedy.
- (c) The exercise by either Party or any of their respective Representatives of any discretion under the terms of the LPG Documents (including in respect of any consent, approval, waiver or agreement that may be given under any LPG Document) shall in no way limit the manner in or extent to which that discretion may be exercised in future or (save as otherwise agreed in writing between the Parties) give rise to any amendment or modification to the LPG Documents or any rights or obligations thereunder.
- (d) Any right of any person under any LPG Document is cumulative and not exclusive of any other right (whether provided under any LPG Document, by law or otherwise), except and to the extent that any such exclusion is expressly stated in the LPG Documents.

**PART X**  
**DISPUTE RESOLUTION**

**25. DISPUTE RESOLUTION**

**25.1 Notice, internal escalation and resolution among Parties**

- (a) If a dispute arises between the Parties and this Agreement stipulates that the procedure pursuant to Clause 25 shall apply, the Confederation and/or UBS shall inform each other as soon as reasonably practicable in writing of such dispute (“**Notice of Dispute**”). Each Party shall upon receipt of such Notice of Dispute provide the other Party with written details of the dispute, the facts and related provision(s) of the LPG Documents in connection with which the dispute has arisen, the nature of the dispute, the Covered Entities and Covered Assets relevant to that dispute (where relevant) and the resolution sought.
- (b) The head of the NCL Unit Management Team (for UBS) and the Deputy Director of the Federal Finance Administration (for the Confederation) shall seek to meet each other as soon as reasonably practicable once a Notice of Dispute was delivered and endeavour to resolve such dispute and any questions related to it in good faith within 10 Business Days (or such other time period as the Parties may agree) from the date of the Notice of Dispute.
- (c) If the head of the NCL Unit Management Team and the Deputy Director of the Federal Finance Administration are for any reason unable to resolve the dispute within the timeframe provided in paragraph (b) or mutually agree to directly escalate the dispute, such dispute shall be referred upon request by any of them to the SOC (for UBS) and the Director of the Federal Finance Administration (for the Confederation) who shall endeavour to resolve the dispute in good faith within 30 Business Days (or such other time period as the Parties may agree) upon expiry of the time period provided in paragraph (b) or the mutual agreement to escalate, as applicable. In case the Confederation has appointed a Representative to the SOC in accordance with paragraph (d) of Clause 17.3, or a Monitor in accordance with paragraph (a) of Clause 16.2, such Representative or Monitor shall not attend or participate in discussions of UBS about such dispute.
- (d) This agreement to negotiate in accordance with paragraphs (b) and (c) in the event of a dispute is binding and creates enforceable obligations. All discussions and meetings between the Parties in connection with such dispute are to be “without prejudice”, and the details of the discussions and any meetings, minutes and/or statements relating to such meetings shall be inadmissible in any court or other proceedings that may follow.

**25.2 Submission to Expert**

- (a) If the SOC and the Director of the Federal Finance Administration have not resolved a dispute within the timeframe of paragraph (c) of Clause 25.1, and the disputes relates to any disputed fact in relation to this Agreement, either Party may in addition to and without prejudice to Clause 25.6, propose to submit the relevant disputed question (“**Expert Question**”) to an Expert for assessment and final determination.

(b) If the Confederation and UBS cannot agree on an Expert within 10 Business Days upon expiry of the time period provided in paragraph (c) of Clause 25.1, the Confederation and UBS shall each designate one person that has the quality of an Expert and those two persons so designated shall agree on an Expert. Any Expert shall be independent and impartial in the meaning of article 34 of the Federal Act on the Federal Supreme Court (*Bundesgesetz über das Bundesgericht*) (SR 173.110).

### 25.3 Expert determination

Following the appointment of an Expert in accordance with Clause 25.2:

- (a) The Confederation and UBS shall have the right to make representations and submissions to the Expert. The Party proposing the appointment of an Expert shall file a statement with all the documents on which it relies within 20 Business Days of the appointment of the Expert and the other Party shall thereafter also file its counter-statement with all the documents on which it relies within 20 Business Days. The Expert shall decide on the further procedure, taking care that both Parties are given equal opportunity to present their point of view.
- (b) The Expert may request any data, Information, submissions or other work papers, schedules, certificates and other documents which he/she/it considers necessary for the determination to be made in connection with the Expert Question and, as determined by the Expert, the Confederation and/or UBS shall comply with such requests as soon as reasonably practicable, except if (and to the extent that) doing so would breach any Applicable Law or contractual obligation. All data, Information, submissions or other documents supplied to the Expert by UBS shall be copied simultaneously to the Confederation and vice versa. When making requests, the Expert shall at all times respect the equal treatment and right to be heard of both parties.
- (c) The Expert shall make the determination on the Expert Question in writing and giving reasons for that determination, as soon as practicable and, in any event, within 60 Business Days following its appointment.
- (d) Analogous to an expert (*Schiedsgutachter*) determination according to article 189 of the Swiss Code of Civil Procedure (*Schweizerische Zivilprozessordnung*), the Expert's determination on the Expert Question shall be final and binding on the Parties unless the Expert's determination on the Expert Question has been stated in a prejudiced manner or is manifestly incorrect or there existed any ground for recusal against the Expert.
- (e) The costs and expenses of the Expert shall be borne equally by the Confederation and UBS.
- (f) All data, Information, submissions and other documents supplied to the Expert shall be strictly confidential and not be used by the Expert, UBS or the Confederation for any other purpose other than the determination of the relevant Expert Question(s). Any such data, Information, submissions and other documents may be disclosed (i) to the Confederation or UBS' Representatives, (ii) if required under Applicable Law or by the rules of any relevant securities exchange, (iii) for the purpose of enforcement of any determination of the relevant Expert Question(s) or (iv) in accordance with other provisions of this Agreement permitting disclosure.

**25.4 Inability to resolve Expert Question**

If the Expert relinquishes its appointment or if it becomes apparent that it will be unable or unwilling to complete the duties specified in its appointment, the Confederation and UBS may agree in writing to appoint an alternative Expert. For such appointment, Clause 25.2 shall apply *mutatis mutandis*.

**25.5 Privileged Information**

Nothing in this Clause 25 shall entitle the Confederation, UBS or the Expert to access any Information or document which is protected by legal professional privilege, provided that neither the Confederation nor UBS shall be entitled to refuse access to such part or parts of documents which are not protected by such legal professional privilege.

**25.6 Court proceedings and other urgency measures reserved**

- (a) If the SOC and the Director of the Federal Finance Administration have not resolved a dispute within the timeframe of paragraph (c) of Clause 25.1, either Party shall have the right to initiate court proceedings regarding such dispute.
- (b) A Party shall always have the right to initiate court or other proceedings or to perform any other act without having to comply with the procedure provided for under this Clause 25 if such initiation of court or other proceedings or the performance of such other act is required to safeguard any of such Party's rights or to comply with any of such Party's obligations, such as in particular, but not limited to, to interrupt a statute of limitations or meet a statutory deadline or any other time limit imposed by a competent court or authority.

**PART XI  
TAXATION**

**26. VALUE ADDED TAXES**

Each sum (including any sum payable pursuant to Clause 21) payable by UBS under or in connection with the LPG Documents is expressed exclusive of any amount in respect of VAT which is chargeable on any supply or supplies for which such sum (or any part thereof) is the whole or part of the consideration for VAT purposes. If the Confederation or any Government Entity, in connection with the LPG Documents, makes (or is deemed to make) any supply for VAT purposes in consideration for such sum (or any part thereof) and VAT is or becomes chargeable in respect of such supply, UBS shall promptly pay to the Confederation or such Government Entity an additional sum equal to the amount of such VAT. If UBS, in connection with the LPG Documents, makes (or is deemed to make) any supply for VAT purposes and VAT is or becomes chargeable in respect of such supply, UBS shall bear such VAT unless such VAT is recoverable by the Confederation or the relevant Government Entity (as applicable) receiving the supply.

**PART XII**  
**MISCELLANEOUS**

**27. RESERVATION OF RIGHTS AND OBLIGATIONS**

The rights and obligations of the Parties under this Agreement (including, without limitation, under Clause 32) shall be without prejudice to any rights or competencies of the Confederation, any Government Entity or any government office or obligations of UBS or any other Group Company under any supervisory laws and other Applicable Law, which rights, competencies and obligations remain reserved in all respects.

**28. CONFIRMATION OF EFFECTIVENESS**

The Confederation undertakes to confirm to UBS, upon a corresponding request of UBS, on the fourth anniversary of the Signing Date and thereafter every four years to be bound by its obligations under the LPG Documents.

**29. NATURE OF PARTIES' RIGHTS AND OBLIGATIONS**

The obligations of the Parties hereunder are contractual in nature and the Parties agree that they do not form, and this Agreement shall not be deemed to constitute, a simple partnership (*einfache Gesellschaft*) pursuant to art. 530 et seq. CO (as the case may be, applied as public law).

**30. PAYMENT MECHANICS**

**30.1 Currency of account**

- (a) Subject to paragraphs (b) and (c), each payment under this Agreement shall be made in Swiss francs.
- (b) Each payment in respect of costs, expenses or Taxes shall be made in the currency in which the costs, expenses or Taxes are incurred, or, at the election of the Confederation, in Swiss francs.
- (c) Any amount expressed in this Agreement to be payable in a currency other than Swiss francs shall be paid in that other currency.

**30.2 No set-off**

Any matured obligation due under Clause 9.3 may be set off against any obligation due and payable under Clause 21 (and *vice versa*). Other than that, all payments required to be made by any person under any LPG Document shall be made without (and free and clear of any deduction for) set-off or counterclaim.

**30.3 Business Days**

Any payment under the LPG Documents which is due to be made on a day that is not a Business Day shall be made on the next Business Day in the same calendar month (if there is one) or the preceding Business Day (if there is none).

### 30.4 Accounts

- (a) Payments to the Confederation shall be made to such account as may be notified to UBS in writing by the Confederation from time to time.
- (b) Payments to UBS shall be made to such account as may be notified to the Confederation by UBS from time to time.
- (c) Any change in the account or account details for payment shall be notified to the party required to make the payment. Any such change shall take effect on the date falling five Business Days after such notice is delivered or, if later, the date specified in the notice.

### 31. ASSIGNMENTS AND TRANSFERS

Except if otherwise provided in this Agreement or any other LPG Document, no person may assign any of its rights or transfer any of its rights and obligations under the LPG Documents, neither by way of a (partially) universal succession (*(partielle) Universalsukzession*) pursuant to the Swiss Merger Act nor otherwise.

### 32. CONFIDENTIAL INFORMATION

#### 32.1 Confidentiality

##### 32.1.1 Confidentiality and limits on use

- (a) Except (w) as expressly set forth in this Agreement or any other LPG Document (including, without limitation, to the extent required for any Party to enforce or safeguard any of its rights under any LPG Document or to initiate the procedure pursuant to Clause 25), (x) as permitted or provided for under any Applicable Law (including, without limitation, the Ordinance and any Swiss banking and supervisory laws), (y) with respect to the Confederation, as is customary in the business between Government Entities, government offices, the Federal Council and/or the Federal Assembly and its commissions or (z) with the prior consent of the other Party, each Party receiving Confidential Information (“**Receiving Party**”) from the other Party or any of such Party’s Affiliates or its or their Representatives (collectively, “**Disclosing Party**”) shall:
  - (i) keep any and all Confidential Information of the Disclosing Party strictly confidential and protect the Confidential Information of the Disclosing Party against disclosure in at least the manner and with at least the degree of care, but not less than a reasonable degree of care, with which it protects its own confidential information of such nature;
  - (ii) not disclose, or otherwise make available any Confidential Information of the Disclosing Party or any of its Affiliates to anyone; and
  - (iii) not use any Confidential Information of the Disclosing Party for any purpose other than in connection with the Loss Protection Guarantee and/or any rights and obligations under any LPG Document or any other purpose as agreed between the Parties from time to time or, with respect to the Confederation, as is required by the legal mandate of any Government Entity or government office receiving Confidential Information.

- (b) Notwithstanding the above, the Confederation may disclose Confidential Information of UBS or its Affiliates if permitted or provided for under any Applicable Law (including, without limitation, the Ordinance and any Swiss banking and supervisory laws) to other Government Entities or government offices (including SNB, FINMA, SFAO, the Federal Assembly and its commissions), and its and their Representatives.

### 32.1.2 Non-confidential information

The obligations set forth in this Clause 32 shall not apply to Confidential Information that:

- (a) is or becomes part of the public domain without breach of confidentiality obligations by the Receiving Party or its Representatives;
- (b) was already lawfully in possession of the Receiving Party (including, with respect to the Confederation, any Government Entity or government office (including the SNB, FINMA, the SFAO, the Federal Assembly and its commissions)) or its or their Representatives prior to disclosure by the Disclosing Party and free of any restrictions as to its use or disclosure, as evidenced by written records;
- (c) was legally received from any third party without breach of confidentiality obligations by that third party or its Representatives;
- (d) was independently developed by or has only been used as a basis of notes and analyses prepared by the Receiving Party (including, with respect to the Confederation, any Government Entity or government office (including the SNB, FINMA, the SFAO, the Federal Assembly and its commissions)) or its Representatives; or
- (e) the Disclosing Party (including, with respect to the Confederation, any Government Entity or government office (including the SNB, FINMA, the SFAO, the Federal Assembly and its commissions)) has notified the Receiving Party or its Representatives in writing, is not of a confidential nature.

### 32.1.3 Required disclosure

- (a) Subject to paragraph (b), in the event that the Receiving Party or its Representatives are requested or required to disclose pursuant to any Applicable Law or by order or decree of any court or tribunal of competent jurisdiction, all or any part of the Confidential Information (a “**Disclosure Requirement**”), the Receiving Party shall, and shall cause its Representatives to, to the extent permissible by the Disclosure Requirement (or, for the avoidance of doubt, other Applicable Law):
  - (i) provide the Disclosing Party with prior written notice as promptly as reasonably practicable of any such Disclosure Requirement, including the details and timing of such request;

- (ii) provide the Disclosing Party with a list of the Confidential Information (and, if applicable, the text of the disclosure language itself) that is intended to be disclosed in response to such Disclosure Requirement and, where possible, consult and cooperate with the Disclosing Party regarding any action that the Disclosing Party may reasonably request from the Receiving Party or its Representatives, including to challenge the validity or to limit the scope of the Disclosure Requirement or the content, timing and manner of such disclosure and to take into account all reasonable requirements of the Disclosing Party in relation thereto; and
  - (iii) disclose only that portion of the Confidential Information that is the minimum legally required or requested to be disclosed (which may be based on legal advice obtained) and to use reasonable efforts to obtain assurances that confidential treatment will be accorded to such disclosed Confidential Information.
- (b) Paragraph (a) shall not apply to any disclosure pursuant to paragraph (b) of Clause 32.1.1 or the Ordinance or applicable banking or supervisory laws (or, for the avoidance of doubt, other Applicable Law) which shall be permissible without any restrictions except as set forth in the Ordinance or such banking, supervisory laws or other Applicable Law.

#### **32.1.4 Securities and other applicable laws and confidentiality obligations**

Each Party acknowledges and agrees that:

- (a) some or all of the Confidential Information is or may be price-sensitive information and that the use of such information may be regulated and prohibited by Applicable Law relating to insider trading, including the FinMIA, and it shall not, shall direct its Representatives not to, disclose nor use any Confidential Information for any unlawful purpose nor to trade in any securities or any other financial instruments of any person in contravention of any Applicable Law;
- (b) a breach of this Clause 32 may constitute a breach of applicable banking, business or official/professional secrecy or data protection laws or regulations; and
- (c) a breach of this Clause 32 may also give rise to claims by third parties towards which the Disclosing Party is under a confidentiality obligation,

provided that in case of each of paragraph (a) and (b), the obligations in this Clause 32 will survive the termination of this Agreement for such longer duration as under such Applicable Law.

## **32.2 Miscellaneous**

### **32.2.1 No rights conferred**

The Parties expressly acknowledge and agree that disclosure of Confidential Information does not and shall not be deemed to confer any rights whatsoever upon the Receiving Party, its Affiliates or its or their Representatives in respect of the Confidential Information disclosed hereunder, and the Disclosing Party shall retain all proprietary and other rights in the Confidential Information.

### 32.2.2 Third party rights

The Receiving Party's obligations under this Clause 32 shall be owed only to the Disclosing Party. The Parties do not require the consent of any person having such right when making any amendments to this Clause 32 or any other provision of this Agreement at any time.

### 32.2.3 No waiver of privilege

The Receiving Party acknowledges and agrees that to the extent that any Confidential Information is protected by legal professional privilege, disclosing such Confidential Information to the Receiving Party or any of its Representatives does not constitute a waiver of privilege or any other rights which the Disclosing Party may have in respect of such Confidential Information. Subject to Applicable Law, the Receiving Party further acknowledges and agrees that it will assert such privilege in response to any attempt to compel disclosure of the Confidential Information.

### 32.2.4 Entire agreement

This Clause 32 constitutes the entire agreement between the Parties in relation to their obligations under the LPG Documents regarding Confidential Information and supersedes any previous agreement, whether express or implied, regarding Confidential Information, including the Confidentiality Agreements (but without prejudice to any accrued rights or obligations under the Confidentiality Agreements at the date of termination).

### 32.2.5 Continuing obligations

The obligations in this Clause 32 are continuing and shall survive and remain binding on each Party for a period of 24 months from the earlier of:

- (a) any termination of this Agreement (including, without limitation, in accordance with Clause 22.3 or Clause 22.4); and
- (b) the payment of the Guaranteed Amount by the Confederation in accordance with the terms of this Agreement.

## 33. DATA PROTECTION

- (a) If and to the extent that the Confederation or any of its Representatives is or becomes a Data Controller in respect of any Personal Data which forms part of any Information provided by UBS pursuant to this Agreement ("**Relevant Personal Data**"), then
  - (i) the Confederation or its Representative (as applicable) shall not disclose Information to third parties in response to a Data Subject access request unless (and to the extent) it reasonably considers that it is obliged to do so by Applicable Law. In any case, the Confederation or its Representatives (as applicable) shall ensure to not disclose Confidential Information in response to a Data Subject access request and maintain secrecy with regard thereto;
  - (ii) prior to the date on which such response must be made pursuant to Applicable Law, the Confederation shall consult with UBS for a period of no less than five Business Days (or for a longer period if reasonably necessary) and take into account all reasonable representations made by UBS concerning whether such disclosure is required and the form of that disclosure;

- (iii) where the Confederation or its Representative reasonably considers that such disclosure is required by Applicable Law, the Confederation shall remove or redact Information and Confidential Information from the material to be disclosed to the fullest extent it reasonably considers permissible or required under Applicable Law; and
  - (iv) if the Confederation determines that disclosure pursuant to Applicable Law is required and UBS has objected to such disclosure or its extent, the Confederation shall give UBS as much prior notice as is reasonably practicable prior to such disclosure being made.
- (b) UBS shall as soon as reasonably practicable (and shall ensure that each relevant Group Company will) provide to each of its or their clients and counterparties in respect of which a Group Company, acting as the Data Controller, holds Personal Data (“**Relevant Persons**”) under Applicable Law including in particular the purposes for which they may process Relevant Personal Data together with such other information as may be necessary under the FADP (and any equivalent obligation under any other Applicable Law) in respect of their processing of Relevant Personal Data pursuant to this Agreement, including to satisfy the obligations of the Confederation and its Representatives. It is the intention of the Parties that the Information to be provided to Relevant Persons pursuant to this Clause 33 shall, to the extent that it is in accordance with Applicable Law, be included as part of the general communications between the relevant Group Company and the Relevant Persons made in the ordinary course of such Group Company’s business.
- (c) To the extent that the Confederation’s exercise of its rights under this Agreement would cause it or any of its Representatives to be subject to any Applicable Law of a jurisdiction other than Switzerland that imposes obligations:
- (i) in respect of the use of Information the same as or similar to Personal Data; or
  - (ii) which are similar in nature to any of those in the FADP but which apply to any Information relating to Relevant Persons that forms part of any Information provided by any Group Company pursuant to this Clause 33,

UBS shall (and shall procure that each Group Company will) do all such things as required and allowed by Applicable Law in order to ensure that access to and use of the Information by the Confederation and its Representatives in accordance with this Agreement complies with that Applicable Law. Without prejudice to the foregoing, UBS shall notify the Confederation of the requirements of any such Applicable Law (to the extent they relate to the Confederation and any of its Representative’s access to and use of the Information in accordance with this Agreement) and shall discuss with it the steps that it intends to take, and shall keep the Confederation informed of the steps it does take, to comply with this Clause 33.

- (d) UBS acknowledges and agrees that nothing in this Agreement shall result or be deemed to result in any Group Company, on the one hand, and the Confederation or any of its Representatives, on the other, becoming joint Data Controllers with respect to any Personal Data and accordingly neither the Confederation nor any of its Representatives shall have any liability with respect to any breach of the obligations of any Group Company as a Data Controller from time to time, and nor shall any Group Company have any liability with respect to any breach of the obligations of the Confederation or any of its Representatives as a Data Controller from time to time (other than to the extent that any such breach of one Party or its Representative's obligations is caused by a violation of the other Party's obligations under this Agreement or an LPG Document).
- (e) To the extent applicable, the provisions of article 6 of the Ordinance and the provisions of any other Swiss Applicable Law relating to the subject matter of this Clause 33 remain reserved.

## **34. NOTICES AND COMMUNICATION**

### **34.1 Notices and declarations in writing or text form**

Any communication to be made under or in connection with the LPG Documents with legal effect, in particular any notices or declarations pursuant to this Agreement, shall be in writing or in text form by e-mail, registered mail or by courier.

### **34.2 Language**

- (a) Any communication or document under or in connection with the LPG Documents with legal effect must be in English.
- (b) Communications or documents without legal effect may be in another language, but either Party may request a certified English translation which will prevail unless the document is a constitutional, statutory or other official document.

### **34.3 Addresses**

The address and email address (and the department or officer, if any, for whose attention the communication is to be made) of each Party for any communication or document to be made or delivered under or in connection with the LPG Documents is:

- (a) for notices to the Confederation:  
Federal Department of Finance  
Bundesgasse 3  
3003 Bern  
Switzerland  
For the attention of: Deputy Director Federal Finance Administration  
E-Mail: EFV-Direktionssekretariat@efv.admin.ch
- (b) for notices to UBS:  
UBS AG, London Branch (on behalf of UBS Group AG)  
5 Broadgate, London  
EC2M 2QS United Kingdom  
For the attention of: Non-Core Unit, UBS Group  
E-Mail: OL-NCL-Guarantee@ubs.com

or any substitute or additional address or e-mail address or department or officer as the Party may notify to the other Party by not less than five Business Days' notice, either in general or for particular subjects or purposes.

#### **34.4 Delivery**

Any communication or document made or delivered by one person to another under or in connection with the LPG Documents will only be effective:

- (a) if by way of e-mail, when it has been received by the addressee; and
- (b) if by way of registered mail or courier (in each case return receipt requested), when it has been delivered by the postal services or the courier to this address or, where applicable, seven days after the first unsuccessful delivery attempt to this address.

#### **35. PUBLICITY**

- (a) Subject to paragraph (b), to the extent permitted under Applicable Law and to the extent practicable in the opinion of the relevant Party, each Party shall consult the other Party before disclosing any LPG Document or making any public statement with respect to the Loss Protection Guarantee.
- (b) The Parties shall use their best efforts to ensure that the content of **Schedules 3–6** is not disclosed in any public filings or other public disclosures.

#### **36. INDEPENDENT ADVICE**

- (a) UBS acknowledges and agrees that neither the Confederation, nor any Government Entity nor any of their respective Representatives is acting as agent or fiduciary of any member of the Group or any of its Affiliates, or any of their respective Representatives. In addition, UBS acknowledges that neither the Confederation, nor any Government Entity nor any of their respective Representatives is advising any member of the Group or any of its Affiliates, or any of their respective Representatives, as to any financial, legal, Tax, investment, accounting or regulatory matters in any jurisdiction. Neither the Confederation, nor any Government Entity nor any of their respective Representatives shall have any responsibility or liability to any member of the Group or any of its Affiliates, or any of their respective Representatives, with respect thereto.
- (b) In the negotiation of this Agreement, each Party has received advice from its own attorneys and advisers. The language used and the content agreed in this Agreement is the language and content chosen by the Parties to express their mutual intent, and no provision of this Agreement shall be interpreted for or against any Party because that Party or its attorney drafted the respective provision.

**37. PARTIAL INVALIDITY**

If, at any time, any provision of the LPG Documents is or becomes illegal, invalid or unenforceable in any respect under any law of any jurisdiction, neither the legality, validity or enforceability of the remaining provisions nor the legality, validity or enforceability of such provision under the law of any other jurisdiction will in any way be affected or impaired. In this case, the Parties shall negotiate in good faith a substitute provision that best reflects the economic intentions of the Parties without being illegal, invalid or unenforceable, and shall execute all agreements and documents required in this connection; whereby it is expressly understood that nothing in this provision shall restrict any right of the Parties to exercise any of its rights under any LPG Document. The same shall apply *mutatis mutandis* in case of omissions.

**38. ENTIRE AGREEMENT AND CONFLICTS**

- (a) This Agreement, including the Schedules and any other agreements and documents referred to herein, constitute the entire agreement and understanding among the Parties with respect to the subject matter hereof, and shall supersede all prior oral and written agreements or understandings of the Parties relating hereto. All references to this Agreement shall be deemed to include the Schedules hereto.
- (b) In case of an inconsistency between any of the provisions of this Agreement and any other LPG Document, the provisions of this Agreement shall prevail.

**39. AMENDMENTS AND WAIVERS**

- (a) Any term of, or right under, the LPG Documents (including this Clause 39) may be amended or waived only with the written consent of each Party.
- (b) If any Party considers at any time that (i) the operation, interpretation or application of any provision of the LPG Documents is in conflict with the LPG Principles, (ii) any provision of the LPG Documents contains a manifest error, (iii) any provision of the LPG Documents does not include such content as is required to ensure that it achieves its intended purpose, (iv) a threshold is not adequate in view of its intended purpose (as it applies in too few instances or in too many instances) or (v) it is necessary to modify any provision of an LPG Document or to introduce a new provision into the LPG Documents in order for the LPG Documents to properly reflect the original intention of the Parties on the basis of the LPG Principles or to take account of any Change in Law (each, an “**LPG Document Inaccuracy**”), such Party shall notify the other Party in writing of such LPG Document Inaccuracy (such notice, a “**Modification Notice**”). Following receipt of a Modification Notice, the Parties shall enter into good faith negotiations (for a period of up to 40 Business Days) with a view to agreeing on any amendments or modifications to the provisions of the LPG Documents (or any of them) the Parties deem necessary to take into account and correct the LPG Document Inaccuracy referred to in such Modification Notice, taking into account the limited information available at Signing Date and the limited time available to negotiate this Agreement.
- (c) Following (i) the fourth anniversary of the Signing Date and (ii) the Realisation of Covered Assets corresponding to more than 70% of the aggregate amount of the Initial Valuations of all Covered Assets, the Parties shall discuss in good faith whether any amendments or modifications shall be made to the provisions of the LPG Documents (or any of them) in light of any changed circumstances.

**40. COUNTERPARTS AND CONCLUSION OF CONTRACT**

- (a) Each LPG Document may be executed in any number of counterparts, and this has the same effect as if the signatures on the counterparts were on a single copy of the LPG Document.
- (b) Each LPG Document may be concluded by an exchange of signed signature pages, attached as an electronic photocopy (.pdf, .tif, etc.) to e-mail.

**PART XIII**

**GOVERNING LAW AND JURISDICTION**

**41. GOVERNING LAW**

This Agreement and the rights, benefits and obligations of the Parties hereunder are of public law nature (*öffentlich-rechtlicher Natur*) and shall be governed by and construed in accordance with substantive public law of Switzerland (i.e. with the exception of conflict of law rules). The provisions of the CO apply subsidiarily as public law.

**42. JURISDICTION**

In case of any dispute, claim or controversy arising under, out of or in connection with or related to this Agreement (or subsequent amendments thereof), including, without limitation, disputes, claims or controversies regarding its existence, validity, interpretation, performance, breach or termination, the Federal Administrative Court decides based on a claim pursuant to article 35 para. a of the Swiss Federal Act on the Federal Administrative Court (*Bundesgesetz über das Bundesverwaltungsgericht*) of 17 June 2005 (SR 173.32). The admissibility of appeals against judgements of the Federal Administrative Court is determined in accordance with the general provisions on the federal administration of justice (*richtet sich nach den allgemeinen Bestimmungen über die Bundesrechtspflege*).

## SCHEDULE 1

### Definitions Schedule

“**2023 Remuneration Decree**” means the decree of the Federal Finance Administration dated 23 May 2023 regarding the ordering of measures in the area of compensation pursuant to article 10a of the Banking Act.

“**Accounting Standards**” means (i) IFRS and (ii) any other accounting standards generally accepted in the jurisdiction of incorporation of the relevant person and approved by the relevant regulatory or other accounting bodies in that jurisdiction and which apply in respect of that person.

“**Affiliate**” means, in relation to any person, a Subsidiary of that person or a Holding Company of that person or any other Subsidiary of that Holding Company.

“**Agreement**” means this agreement including all its Schedules.

“**Applicable Entity**” means (a) any member of the Group and (b) any entity that would be consolidated into the balance sheet of the Group if such balance sheet were to be prepared in accordance with the Static Accounting Standards.

“**Applicable Exchange Rate**” means, with respect to an amount denominated in any Other Currency, the relevant spot rate as determined according to usual market practice.

“**Applicable Law**” means any and all law (whether civil, criminal or administrative), statutes, statutory instruments, treaties, conventions, regulations or rules made thereunder in any applicable jurisdiction, including any rules of any Authority, in each case which are binding on any Party or the relevant other person or in respect of the relevant matter as the context requires.

“**Asset Exclusion Criteria**” has the meaning given to it in paragraph (a) of Clause 4.1.2.

“**Asset Management Framework**” means a written Policy designated as such and setting out the details referred to in Clause 10.4.2.

“**Asset Management Objective**” means, subject to the LPG Principles, in first priority to minimise the Net Loss Amounts and in second priority to maximise the expected net present value of the Covered Assets, including by minimising losses and potential losses and maximising recoveries and potential recoveries in respect thereof.

“**Asset Management Principles**” means the principles set forth in Clause 10.1.

“**Asset Management Provisions**” means the provisions regarding asset management set forth in **Part III** (*Asset Management*).

“**Asset Pool**” has the meaning given to it in paragraph (a) of Clause 4.1.1.

“**Asset Pool Schedule**” has the meaning given to it in paragraph (a) of Clause 4.1.1.

“**Asset Repayments**” means an amount (positive or negative) equal to the sum of any repayments which are received (in which case, positive) or paid (in which case, negative), as the case may be, by any Group Company in connection with a Covered Asset, including repayment of capital, principal or reserves which are received or paid on or after the Valuation Date.

“**Assurance Plan**” has the meaning given to it in paragraph (a) of Clause 15.

“**Assurance Report**” has the meaning given to it in paragraph (b) Clause 15.

“**Authorisations**” means authorisations, consents, approvals, resolutions, licenses, exemptions, filings, notarisations, registrations, orders, recognitions, grants, confirmations, clearances and permissions.

“**Authority**” means (i) any government, (ii) any governmental or quasi-governmental authority, body, agency or association, (iii) any supranational, federal, state or local government, (iv) any statutory, regulatory or self-regulatory body, agency or association, (v) any body, agency or association having the power to impose, collect or administer any Tax and (vi) any court, tribunal or other judicial body.

“**Banking Act**” means the Federal Act on the Banks and Saving Banks (*Bundesgesetz über die Banken und Sparkassen (Bankengesetz, BankG)*) of 8 November 1934 (SR 952.0).

“**Base Currency**” means CHF.

“**Books and Records**” has the meaning given to it under Swiss law and includes all notices, correspondence, orders, enquiries, drawings, plans, books of account and other documents and all computer disks or tapes or other machine-readable programs or other records.

“**Business Day**” means a day other than a Saturday or Sunday on which banks are open for general business in Zurich and Berne, Switzerland.

“**Business Plan**” means the business plan agreed upon between the Parties in accordance with Clause 6.

“**Change in Law**” means the occurrence of any of the following after the Signing Date:

- (a) the enactment or coming into effect of any Applicable Law;
- (b) any amendment, supplement, restatement, re-enactment or replacement of any Applicable Law (whether carried out by primary or secondary legislation or otherwise);
- (c) the publication or announcement by any Authority, following the Signing Date of a change in, or clarification of, the interpretation or application of any Applicable Law; or
- (d) any decision of any court, tribunal or other judicial body relating to the interpretation or application of any Applicable Law,

other than (i) the coming into effect of any Applicable Law (or any amendment, supplement, restatement, re-enactment or replacement thereof) which was enacted, or published or announced in final form, prior to the Signing Date with a commencement date after the Signing Date and (ii) any decision referred to in paragraph (d) above which was made prior to the Signing Date but which takes effect after the Signing Date.

“**CHF**” and “**Swiss francs**” denote the lawful currency of Switzerland.

“**Clause**” means any clause in this Agreement.

“**Closely Related Hedge**” has the meaning given to it in paragraph (a) of Clause 10.2.

“**Closing Date**” means the date of the Closing of the Merger.

“**Closing of the Merger**” means the entry of the Merger in the competent commercial register.

“**CO**” means the Swiss Code of Obligations (*Bundesgesetz betreffend die Ergänzung des Schweizerischen Zivilgesetzbuches (Fünfter Teil: Obligationenrecht)*) of 30 March 1911 (SR 220).

“**Confederation**” means the Swiss Confederation, represented by the Federal Department of Finance (*Eidgenössisches Finanzdepartement*).

“**Confederation Confidential Information**” means (i) all Information relating directly or indirectly to the Confederation or any of its Representatives which any Group Company or its Representatives receives or shall have received from the Confederation, any of its Representatives or any third party who has received the Information from the Confederation or any of its Representatives in connection with this Agreement (including all such Information which any Group Company or any of its Representatives prepares which contains or reflects or is generated from such Information); and (ii) all Information relating to or arising from negotiations, discussions and correspondence in connection with the Agreement between (i) the Confederation or any of its Representatives and (ii) any Group Company or any of its Representatives.

“**Confidential Information**” means Confederation Confidential Information and/or UBS Confidential Information.

“**Confidentiality Agreements**” means (i) the confidentiality agreement between the Confederation and CSG dated 4 April 2023 and (ii) the confidentiality agreement between the Confederation and UBS dated 6 April 2023.

“**Conflict**” means any actual or potential conflict of interests (whether in respect of assets, exposures, rights, interest, duties, liabilities, obligations, risks or otherwise) which may be material (a) between the Confederation and any Group Company, (b) within the Group, (c) between a Group Company and any Counterparty or (d) between a Group Company and any Covered Asset Purchaser.

“**Conflicts Certificate**” means a certificate that:

- (a) identifies the relevant Covered Asset;
- (b) confirms that all agreements, transactions or arrangements entered into or effected either (i) in connection with the Management and Administration of that Covered Asset or (ii) which constitute, create or give rise to any Conflict with respect to that Covered Asset, in either case during the period from and including the Closing Date to and including the Realisation Date (“**relevant period**”) in respect of that Covered Asset were commercially fair and reasonable and on arm’s length terms;
- (c) confirms that UBS has complied with the Conflicts Management Policy and the provision of this Agreement regarding Conflicts in relation to that Covered Asset at all times during the relevant period; and

- (d) is signed by the Head of the NCL Unit Management Team (or another member of the NCL Unit Management Team acceptable to the Confederation) and confirms that to the best of his or her knowledge and belief, having made all due and reasonable enquiries, the Conflicts Certificate is true and accurate, fairly presents the Information it contains and is not misleading for the purpose for which it is prepared.

“**Conflicts Management Policy**” means a written Policy enacted as such in accordance with this Agreement.

“**Control**” means the ability of a person to determine that the affairs of another person are conducted in accordance with the intentions of the first person by way of (i) the holding of shares or other equity securities; (ii) the possession of voting, appointment or instruction rights; or (iii) in any other way whatsoever (in each case whether directly or indirectly). A person will be conclusively deemed to “control” another person if it holds, directly or indirectly, more than 50% of the voting rights entitled to be cast for the appointment of directors or similar managers. “**Controlled**” and “**Controlling**” shall be construed accordingly.

“**Costs and Expenses**” means any external actual expenses paid by any Group Company, including reasonable third party advisory fees, but excluding any Taxes, VAT or Stamp Duty.

“**Counterparty**” means:

- (a) in relation to any asset or exposure, a person with an obligation under the terms of that asset or exposure (whether present or future, actual or contingent and as principal, surety, guarantor or otherwise) to pay or repay money to, or for onward transmission to, the person which Owns or otherwise holds that asset or exposure or to whom payments of that asset or exposure are otherwise due, but excluding any person to the extent acting:
- (i) as lender, facility agent, arranger, security trustee, security agent or other finance party with respect to a facility agreement;
  - (ii) as holder, trustee, security trustee, security agent, fiscal agent, paying agent, calculation agent, servicer, collateral agent, collateral manager, collateral administrator, cash manager or liquidity provider with respect to a debt instrument; or
  - (iii) in a capacity which is analogous to those referred to in sub-paragraphs (i) and (ii) above; and
- (b) in relation to any asset or exposure, a person with a right under the terms of that asset or exposure (whether present or future, actual or contingent) to be paid or repaid money from the person which Owns or otherwise holds that asset or exposure; and
- (c) in relation to any asset or exposure which is a share, equity security or equity interest, the issuer.

“**Covered Asset Class**” means the following mutually exclusive classes of Covered Assets to which each Covered Asset shall be allocated in the Asset Pool Schedule: (i) residential mortgage, (ii) consumer finance, (iii) bond, (iv) loan, (v) lease finance, (vi) project finance, (vii) leveraged finance, (viii) commercial real estate finance, (ix) structured finance or (x) derivatives, (xi) equity, (xii) FX, (xiii) securitization or (xiv) life.

“**Covered Asset Purchaser**” means the counterparty or group of counterparties acting as purchaser(s) under a Realisation Documentation.

“**Covered Assets**” mean assets and exposures of the Asset Pool, to the extent they have not ceased to form part of the Asset Pool pursuant to the terms of the LPG Documents, and excluding in any case any Non-Covered Assets, and “**Covered Asset**” means one of those assets or exposures.

“**Covered Entity**” means any legal entity that (i) at the Closing Date was a Wholly Owned member of the CS Group and (ii) continues to be a Wholly Owned Merged Group Company at the time of the Realisation of any Covered Asset Owned by such legal entity, in each case excluding any Excluded Entity.

“**CS Book Value**” means the valuation of any relevant asset in CSG’s accounts as of 31 March 2023.

“**CS Group**” or “**CS Group Companies**” means CSG and each of its Subsidiaries, from time to time, and “**CS Group Company**” means any of them.

“**CSG**” means Credit Suisse Group AG (CHE-105.884.494).

“**Data Controller**” means private persons or federal bodies that decide on the purpose and content of a data file.

“**Data Subject**” has the meaning given to “data subject” in the FADP.

“**Default Interest**” has the meaning given to it in paragraph (a) of Clause 23.

“**Demand for Payment**” has the meaning given to it in paragraph (a) of Clause 9.2.

“**Derivatives Instrument**” means any Covered Asset which is an instrument that may be an asset or exposure (and which is not an instrument under the terms of which the relevant holder shall only receive payments, such as a security, note, fully drawn loan or similar instrument) under whose terms the relevant Covered Entity may incur a liability, such as a derivative, a commitment under a loan agreement or other similar instrument (and which is not a Hedge).

“**Disclosing Party**” has the meaning given to it in paragraph (a) of Clause 32.1.1.

“**Disclosure Requirement**” has the meaning given to it in paragraph (a) of Clause 32.1.3.

“**Drawn Portion Fee**” has the meaning given to it in paragraph (a) of Clause 21.

“**Drawn Portion Fee Rates**” has the meaning given to it in paragraph (a) of Clause 21.

“**Economically Owned**” (and “**Economic Ownership**”) by one or more Covered Entities, means as regards to an asset or exposure, if those Covered Entities Own the asset or exposure.

“**Effective Date**” has the meaning given to it in Clause 3.

“**Employee**” means any employee, director, board member, secondee or contract worker.

“**Enforcement Costs**” means any Costs and Expenses incurred in connection with Permitted Litigation.

“**Exchange Date**” means, with respect to an amount to be converted into the Base Currency at the Applicable Exchange Rate, the date on which such Applicable Exchange Rate is being fixed.

“**Excluded Entity**” means any legal entity (a) with its registered offices, its seat, its principal place of business or with any permanent establishment in an Excluded Jurisdiction or (b) which does not own all material Authorisations required to enable it lawfully to manage, market, distribute, sell, transfer, assign or otherwise dispose of the Covered Assets Owned by it.

“**Excluded Jurisdiction**” means any Sanctioned Country.

“**Excluded Losses and Costs**” means any loss, including, without limitation, any Costs and Expenses related to:

- (a) Operational Costs (management, operational, and other similar expenses, including HR restructuring);
- (b) costs of funding, including interest expenses incurred, allocated or dedicated to fund Covered Assets;
- (c) FX structural risk, unless it relates to Hedging Costs of FX Specific Risk Portfolio Hedges;
- (d) interest rate risks resulting from asset liability mismatch of any loan portfolios; and
- (e) any positions listed in **Schedule 6** (*Additional Excluded Losses and Costs*).

“**Excluded Person**” means any Sanctioned Person.

“**Expert**” means any independent, internationally recognised firm of public accountants, international investment bank, law firm, risk advisors or any other appropriate person.

“**Expert Question**” has the meaning given to it in Clause 25.2.

“**FADP**” means the Federal Act on Data Protection (*Bundesgesetz über den Datenschutz*) of 19 June 1992, and, as of 1 September 2023, of 25 September 2020 (SR 235.1).

“**Federal Additional Liquidity Ordinance**” (or “**Ordinance**”) means the Ordinance on Additional Liquidity Assistance Loans and the Granting of Federal Default Guarantees for Liquidity Assistance Loans from the Swiss National Bank to Systemically Important Banks (*Verordnung über zusätzliche Liquiditätshilfe-Darlehen und die Gewährung von Ausfallgarantien des Bundes für die Liquiditätshilfe-Darlehen der Schweizerischen Nationalbank an systemrelevante Banken*) of 16 March 2023 (SR 221.301).

“**Federal Administrative Court**” means the Federal Administrative Court (*Bundesverwaltungsgericht*) of Switzerland.

“**Federal Finance Administration**” means the federal finance administration (*Eidgenössische Finanzverwaltung*) of the Swiss government.

“**FINMA**” means the Swiss Financial Market Supervisory Authority (*Eidgenössische Finanzmarkt-aufsicht*).

“**FINMA Confirmation**” has the meaning given to it in paragraph (b) of Clause 9.

“**FINMASA**” means the Federal Act on the Swiss Financial Market Supervisory Authority (*Bundesgesetz über die Eidgenössische Finanzmarktaufsicht*) of 22 June 2007 (SR 956.1).

“**FinMIA**” means the Federal Act on Financial Market Infrastructures and Market Conduct in Securities and Derivatives Trading (*Bundesgesetz über die Finanzmarktinfrastrukturen und das Marktverhalten im Effekten- und Derivatehandel*) of 19 June 2015 (SR 958.1).

“**Full Termination Notice**” has the meaning given to it in Clause 22.3.

“**FX Specific Risk Portfolio Hedges**” means Hedges covering the currency risk of individual Covered Assets entered into, and maintained, in accordance with paragraph (c) of Clause 10.2.

“**Good Faith Statements**” has the meaning given to it in paragraph (e) of Clause 14.

“**Good Industry Practice**” means the level of skill, care, diligence, prudence, foresight, expertise and experience consistent with the standards which would ordinarily be adhered to by a prudent banking institution in the ordinary course of its business, taking account of (i) applicable corporate governance principles, (ii) any published guidance or recommendations (including guidance or recommendations from any Authority) relating to good industry practice in the banking and financial sectors as may be published from time to time, (iii) other guidelines, recommendations, methods, practices or procedures which would be adopted or complied with from time to time by a prudent banking institution in the ordinary course of its business, and (iv) the nature of any asset concerned and its strategic importance (e.g. with respect to the Covered Assets, the fact that they are non-strategic to UBS).

“**Governance and Organisational Provisions**” means the provisions regarding governance and organisation set forth in **Part VI** (*Governance and Organisational Requirements*).

“**Governance Policy**” means a written statement enacted as such in accordance with this Agreement.

“**Government Entity**” means:

- (a) the Federal Council, any department, non-departmental public body, governmental unit, Authority or agency of the Confederation (including, without limitation, FINMA);
- (b) any of the Confederation’s federal councilors (*Bundesräte*);
- (c) any corporate body established by federal statute some or all of the members of which are appointed by the Confederation or a Government Entity pursuant to (a) or (b); and
- (d) any other entity or person directly or indirectly owned by any of the foregoing.

“**Gross Realisation Proceeds**” has the meaning given to it in paragraph (a) of Clause 7.3.

“**Group**” or “**Group Companies**” means UBS and each of its Subsidiaries, from time to time, including, after the Closing of the Merger, CS Group, and “**Group Company**” means any of them.

“**Guaranteed Amount**” has the meaning as defined in Clause 9.1.

“**Hedges**” has the meaning given to it in paragraph (c) of Clause 10.2.

“**Hedging Benefits**” means any benefits received by the Group and to be calculated as Hedging Benefits in accordance with paragraph (c) of Clause 10.2 in each case on or after the Valuation Date.

“**Hedging Costs**” means Costs and Expenses paid by the Group and to be calculated as Hedging Costs in accordance with paragraph (c) of Clause 10.2 in each case on or after the Valuation Date.

“**Hedging Policy**” has the meaning given to it in paragraph (c) of Clause 10.2.

“**Holding Company**” means, in relation to a person, any other person whose Subsidiary it is.

“**Information**” means all information of whatever nature and in whatever form, including in writing, orally, electronically and in a visual or machine-readable medium (including CD-ROM, USB Stick or shared folders, magnetic or digital form) and, in relation to any obligation on any person to provide information pursuant to the Loss Protection Guarantee and any other LPG Documents, shall be limited to such information that is within the control of that person; for these purposes information shall be deemed to be within a person’s control if:

- (a) it is within the possession of that person or any of its Affiliates;
- (b) that person or any of its Affiliates has a right to possession of it; or
- (c) that person or any of its Affiliates has a right to inspect or take copies of it.

“**Initial CS Difference**” means, in respect of any Covered Asset, the amount of any absolute difference between the CS Book Value and the Initial Valuation.

“**Initial Valuation**” has the meaning given to it in Clause 5.1.

“**Level 1 Trigger Event**” means that the pro forma Shared Loss Amount of a Portfolio is in excess of 75% of the Loss Budget of that Portfolio or, if no Loss Budget has been agreed upon for such Portfolio, the pro forma Shared Loss Amount of a Portfolio is in excess of 3% of the aggregate amount of all Initial Valuations of that Portfolio.

“**Level 2 Trigger Event**” means that the pro forma Shared Loss Amount of a Portfolio is in excess of 100% of the Loss Budget of that Portfolio or, if no Loss Budget has been agreed upon for such Portfolio, the pro forma Shared Loss Amount of a Portfolio is in excess of 5% of the aggregate amount of all Initial Valuations of that Portfolio.

“**Level 3 Trigger Event**” means that the pro forma Shared Loss Amount of all Covered Assets is in excess of 75 % of the Loss Budget for all Covered Assets or, if no Loss Budget has been agreed upon for all Covered Assets, the pro forma Shared Loss Amount of all Covered Assets is in excess of 3% of the aggregate amount of all Initial Valuations of all Covered Assets.

“**Level 4 Trigger Event**” means that the pro forma Shared Loss Amount of all Covered Assets is in excess of 100% of the Loss Budget for all Covered Assets or, if no Loss Budget has been agreed upon for all Covered Assets, the pro forma Shared Loss Amount of all Covered Assets is in excess of 5% of the aggregate amount of all Initial Valuations of all Covered Assets.

“**Litigation**” means any litigation, arbitration or administrative proceedings or investigations of, or before, disciplinary or enforcement proceedings by, any court, arbitral body or agency.

“**Loss Budget**” means the budgeted maximum aggregate Net Loss Amount assigned to a Portfolio and all Covered Assets as agreed by the Parties in accordance with the procedures set out in Clause 6.

“**Loss Protection Guarantee**” means the loss protection guarantee granted in accordance with this Agreement.

“**LPG Document(s)**” means this Agreement, any document produced on the basis of it and any other document designated in writing as such by the Parties.

“**LPG Document Inaccuracy**” has the meaning given to it in Clause 39.

“**LPG Principles**” has the meaning given to it in Clause 2.2.

“**Maintenance Fee**” has the meaning given to it in paragraph (a) of Clause 21.

“**Major Transaction**” means, subject to paragraph (b) of Clause 7.4, a transaction in respect of a Covered Asset where the Net Loss Amount is equal or higher than the higher of (i) (x) CHF 150,000,000 or (y), if lower than CHF 150,000,000, 5 per cent. of the difference of CHF 5,000,000,000 minus the aggregate Net Loss Amounts as of the end of the previous quarter and (ii) CHF 50,000,000.

“**Management and Administration**” means, in respect of a Covered Asset, any and all conduct (including any decision whether or not to undertake any particular conduct) relating, whether directly or indirectly, to that Covered Asset, including, without limitation:

- (a) the sale, transfer, assignment or other disposal of that Covered Asset;
- (b) the creation or acquisition of an asset or exposure;
- (c) the amendment, replacement or termination of that Covered Asset, including any amendment to any Underlying Documentation;
- (d) any transaction in relation to that Covered Asset (other than a transaction set forth in paragraph (a) or (b)), including the creation of any Security in favour of a party other than another Group Company, the granting of any guarantee, indemnity or collateral by any Covered Entity for the benefit of any person which is not a Group Company for a Covered Asset, the creation of any trust, the conferring or any interest or participation right, the entering into of any agreement in respect of votes or the right to receive dividends or any other return of value, the renunciation or assignment of any right to subscribe for or receive an asset or exposure or any legal or beneficial interest in an asset or exposure, the entering into of any arrangement having the effect of reducing or mitigating a person’s (which is not a Group Company) legal, beneficial or economic interest in a Covered Asset;
- (e) any conduct which will result in an increased commitment, lending or exposure to a Counterparty (or to an Affiliate of a Counterparty), or any determination as to whether or not (or how) such increased commitment, lending or exposure should be created, including through the provision of or making available additional finance;
- (f) any conduct relating to or constituting a recovery (including the taking of, or refraining from taking, any enforcement action);

- (g) the incurrence of, or commitment to incur, any Realisation Expenses or Enforcement Costs; and
- (h) the exercise of any voting or other rights, but in any case excluding any conduct which consists of delivering any notification, report or Information to the Confederation,

and “**Manage and Administer**” and “**Managed and Administered**” shall be construed accordingly.

“**Material Transaction**” means, subject to paragraph (b) of Clause 7.4, a transaction in respect of a Covered Asset, where the Net Loss Amount amounts to at least CHF 30,000,000.

“**Merged Group**” means UBS and each of its Subsidiaries, from time to time, after the Closing of the Merger, i.e. upon inclusion of the CS Group, and “**Merged Group Company**” means any of them.

“**Merger**” has the meaning given to it in preamble (2).

“**Modification Notice**” has the meaning given to it in paragraph (b) of Clause 39.

“**Monitoring and Reporting Provisions**” means any relevant monitoring and reporting requirement as set out in Part IV (*Monitoring and Reporting*) of this Agreement.

“**Monitors**” has the meaning given to it in paragraph (a) of Clause 16.

“**NCL Unit**” means the non-core and legacy unit of UBS, being the unit within UBS responsible for the implementation, administration and compliance with UBS’ obligations under the LPG Documents to be set up as described and set forth in Clause 17.1.

“**NCL Unit Management Team**” has the meaning given to it in Clause 17.2.

“**Net Loss Amount**” has the meaning given to it in paragraph (a)(ii) of Clause 8.1.

“**Net Realisation Proceeds**” has the meaning given to it in paragraph (c) of Clause 7.3

“**Non-Covered Asset(s)**” has the meaning given to it in paragraph (a) of Clause 4.1.2.

“**Notice of Dispute**” has the meaning given to it in Clause 25.1.

“**Notification Report**” means any notice required to be delivered to the Confederation according to Clause 14.4.

“**Operational Cost**” means any cost incurred by the management and/or operation of the Covered Assets and/or of the NCL Unit, including, without limitation, (a) any salaries or other compensation and related benefits of any Employee (including any bonus, commission or severance arrangements or training, payroll taxes, human resources restructuring or travel- or relocation-related expenses), (b) the cost of office space, the rental of and maintenance of furniture and equipment and expenses for data processing (including the purchase or enhancement of data processing systems), (c) any other overhead or general and administrative expenses and (d) any cost or charges for any services in the sense of paragraphs (a) to (c) provided or benefits in the sense of paragraphs (a) to (c) granted by any Group Company to the NCL Unit.

“**Operational Losses**” means any operational losses incurred by the management and/or operation of the Covered Assets and/or the NCL Unit, including, without limitation, losses in connection with operational process errors, IT losses, fraud, HR issues or any other category covered in operational risk.

“**Other Currency**” means any currency other than the Base Currency.

“**Ownership**” means:

- (a) with respect to an asset, legal and beneficial ownership of that asset; and
- (b) with respect to an exposure (including any undrawn availability of funds, whether committed or uncommitted):
  - (i) having the contractual liability in respect of that exposure and the right to legal and beneficial ownership of an asset resulting from or in respect of the discharge of, or obligation to discharge, the liability represented by that exposure; or
  - (ii) (in the case of an overdraft) having the right to legal and beneficial ownership of an asset resulting from the overdraft being drawn,

provided that where an entity does not have full beneficial ownership of any such asset or exposure (as relevant) as of any date, any such asset or exposure shall only be Owned to the extent of any such beneficial ownership which it does hold, and “**Own**” / “**Owned**” shall be construed accordingly, provided that, for the purpose of this definition a person shall be deemed to be the legal owner of an asset if that asset is owned in dematerialised form through a clearing system or a custodian (excluding any such holding through a prime brokerage account or analogous arrangement) on a basis which would, at the time of determination for the purpose of paragraph (a), be regarded in the applicable market as conventional with respect to the ownership of that asset type.

“**Partial Termination Assets**” has the meaning given to it in paragraph (a) Clause 22.2.

“**Partial Termination Notice**” has the meaning given to it in Clause 22.2.

“**Parties**” has the meaning given to it in the preamble of this Agreement.

“**Permitted Litigation**” means any Litigation initiated by a Group Company for the purposes of the direct enforcement, recovery or protection of:

- (a) any rights under any Underlying Documentation of a Covered Asset; and/or
- (b) any rights under any Realisation Documentation of a Covered Asset.

“**Permitted Realisation**” has the meaning given to it in paragraph (b) of Clause 7.2.

“**Personal Data**” has the meaning given to “personal data” in the FADP.

“**Plan Proposal**” has the meaning given to it in paragraph (a) of Clause 6.

“**Policy**” means the Asset Management Framework, the Governance Policy, the Hedging Policy and any other policy adopted in accordance with Clause 17.5.

“**Portfolio**” has the meaning given to it in Clause 4.3.

“**Portfolio Hedge**” means any assets, agreements, instruments and arrangements that may exist as of the Signing Date or else be entered into by a Covered Entity or any other Group Company from time to time by or in respect of Covered Assets in accordance with paragraph (c) of Clause 10.2, which constitute hedging arrangements in respect of any relevant market or credit risk (including in particular any FX or rates risk) in respect of Covered Assets, including without limitation any credit default swap, FX swap, or interest rate swap, which may be entered into in respect of a portfolio of assets that includes Covered Assets.

“**Portfolio Schedule**” has the meaning given to it in Clause 4.3.

“**Quarter Date**” means each of 31 March, 30 June, 30 September and 31 December.

“**Quarterly Statement**” has the meaning given to it in Clause 14.2.4.

“**Quarterly Statement Data**” means the Information contained in the Quarterly Statement Data Fields, comprising certain terms or features of, or matters pertaining to, certain Covered Assets, together with any other Information designated in this Agreement or by the Parties as Quarterly Statement Data.

“**Quarterly Statement Data Fields**” means the data fields defined by the Parties after the Closing Date which shall include all information reasonably required by the Confederation to monitor compliance with the terms of the LPG Documents.

“**Quarterly Statement Date**” has the meaning given to it in Clause 14.2.1.

“**Quarterly Statement Period**” has the meaning given to it in Clause 14.2.2.

“**Realisation**” means the sale, transfer, assignment or other disposal of a Covered Asset as well as recovery (if any) at maturity or in an insolvency or the liquidation of a Covered Asset or the satisfaction of all terms and obligations of such Covered Asset or other winding-up in full of such Covered Asset, in each case taking place after the Valuation Date. “**Realise**” and “**Realised**” shall be construed accordingly.

“**Realisation Date**” means the date on which the Realisation takes place.

“**Realisation Documentation**” means all of the agreements and other documentation providing for the terms and conditions of the Realisation, including, without limitation, any sale and purchase agreement.

“**Realisation Expenses**” means any Costs and Expenses, including fees for any external advisors, as well as any Taxes, VAT or Stamp Duty incurred in connection with any Realisation to the extent these are directly attributable to the relevant Covered Asset.

“**Receiving Party**” has the meaning given to it in paragraph (a) of Clause 32.1.1.

“**Residual Request**” has the meaning given to it in paragraph (b) of Clause 7.7.

“**Relevant Personal Data**” has the meaning given to it in paragraph (a) of Clause 33.

“**Relevant Persons**” has the meaning given to it in paragraph (b) of Clause 33.

“**Residual Positions**” has the meaning given to it in paragraph (a) of Clause 7.7.

“**Reports**” means any Quarterly Statements, Quarterly Statement Data Fields, UBS Standard Reports, Requested Reports and Notifications Reports, in each case including any attachments thereto, and a “**Report**” means any of them.

“**Representations**” means the representations and warranties set out in Clause 20 and “**Representation**” shall be construed accordingly.

“**Representatives**” means:

- (a) with respect to any person other than the Confederation: directors, officers, Employees, agents, professional advisers, contractors and delegates; and
- (b) with respect to the Confederation: any person listed in article 1 para. 1 of the Federal Act on the Liability of the Federal Government as well as its Civil Servants (*Verantwortlichkeitsgesetz*) dated 14 March 1958 (SR 170.32).

“**Requested Report**” means any Information required to be produced and delivered to the Confederation pursuant to paragraph (a) or (b) of Clause 14.1.

“**Restricted Conduct**” has the meaning given to it in paragraph (b) of Clause 12.

“**Sanctioned Country**” means a country or territory which is, or whose government is, the subject or target of country-wide or territory wide Sanctions (which, as at the Signing Date, *inter alia*, include the Crimea region, the non-government controlled areas of Ukraine in the oblasts of Donetsk, Luhansk, Zaporizhzhia and Kherson, Cuba, Iran, North Korea, Sudan, South Sudan and Syria).

“**Sanctioned Person**” means any person, entity, or any other party, including, without limitation, official or de facto authorities (i) located, domiciled, resident, incorporated or operating in a Sanctioned Country, or (ii) subject to any sanctions lists administered by any Sanctions Authority, or (iii) owned or controlled by a person, entity or any other party as defined in paragraphs (i) and (ii),

“**Sanctions**” means any trade, economic or financial sanction laws, regulations, embargoes, or restrictive measures administered, enacted or enforced by a Sanctions Authority.

“**Sanctions Authority**” means Switzerland, the Security Council of the United Nations, the European Union, the member states of the European Union, the United States of America, the United Kingdom, Japan and the governments and official institutions or agencies of any of these.

“**Schedule**” means any schedule in this Agreement.

“**Security**” means a mortgage, charge, pledge, lien or other security interest securing any obligation of any person or any other agreement or arrangement having a similar effect.

“**Set-up Fee**” has the meaning given to it in paragraph (a) of Clause 21.

“**SFAO**” means Swiss Federal Audit Office (*Eidgenössische Finanzkontrolle*).

“**Shared Loss Amount**” has the meaning given to it in paragraph (c) of Clause 8.1.

“**Shared Loss Discount**” has the meaning given to it in paragraph (c) of Clause 7.6.

“**Signing Date**” means the date of this Agreement.

“**SNB**” means the Swiss National Bank.

“**SOC**” has the meaning given to it in paragraph (c) of Clause 17.3.

“**Specified Action**” means any action or conduct set forth in paragraphs (b), (c), (d) or (e) of the definition of “Management and Administration” other than an action or conduct which relates to a transaction with another Group Company or which is not material to the economic value of the Covered Assets.

“**Stamp Duty**” means any stamp documentary, registration or capital duty or tax (including stamp duty, stamp duty reserve tax and any other similar duty or similar tax) and any fine, penalty, charge, costs or interest relating thereto, and “**Stamp Duties**” shall be construed accordingly.

“**Static Accounting Standards**” means the Accounting Standards as applied for the consolidated financial statements as per 31 December 2022.

“**SubA**” means the Federal Act on Financial Assistance and Compensation (*Bundesgesetz über Finanzhilfen und Abgeltungen*) of 5 October 1990 (SR 616.1).

“**Subsidiary**” means, in relation to any company or corporation, a company or corporation:

- (a) which is controlled, directly or indirectly, by the first mentioned company or corporation;
- (b) more than half the issued share capital of which is beneficially owned, directly or indirectly, by the first mentioned company or corporation;
- (c) which is a Subsidiary of another Subsidiary of the first mentioned company or corporation; or
- (d) which must be consolidated in Group wide financial statements pursuant to the Accounting Standards,

and for this purpose, a company or corporation shall be treated as being controlled by another if that other company or corporation is able to direct its affairs and/or to control the composition of its board of directors or equivalent body.

“**Swiss Code of Civil Procedure**” means the Swiss Civil Procedure Code (Civil Procedure Code) (*Schweizerische Zivilprozessordnung, ZPO*) of 19 December 2008 (SR 272).

“**Swiss Merger Act**” means the Federal Act on Merger, Demerger and Transfer of Assets (Merger Act) (*Bundesgesetz über Fusion, Spaltung, Umwandlung und Vermögensübertragung (Fusionsgesetz, FusG)*) of 3 October 2003 (SR 221.301).

“**Tax**” means any tax and any levy, impost, duty or other charge in the nature of taxation (whether of Switzerland or elsewhere in the world) and any fine, penalty, charge, cost or interest relating to any of the foregoing.

“**Termination Event**” has the meaning given to it in Clause 22.1.

“**Transaction Costs**” means documented external cost and external expenses, including third party advisory and audit fees, reasonably incurred by the relevant person in connection with the LPG Documents and the Loss Protection Guarantee, including, without limitation:

- (a) the due diligence (financial, commercial, legal, etc.) and the evaluation, assessment and analysis of any parameters relating to the Loss Protection Guarantee;
- (b) the negotiation, finalizing and execution of the LPG Documents and the transactions contemplated thereby;
- (c) monitoring, valuation, governance, maintenance, realization, confirmatory and supervisory actions or tasks relating to the Loss Protection Guarantee or any LPG Document; and
- (d) any other actions relating to the Loss Protection Guarantee or any LPG Document taken before, during or, in relation to continuing obligations under Clause 14.7 only, after the lifetime of the Loss Protection Guarantee.

“**UBS**” has the meaning given to it in preamble (B).

“**UBS Confidential Information**” means (i) all Information which the Confederation or any of its Representatives receives or shall have received from a Group Company or any of its Representatives, or from any third party who has received the Information from a Group Company or any of its Representatives, in connection with this Agreement (including all such Information which the Confederation or any of its Representatives prepare which contains or reflects or is generated from such Information) and (ii) all Information relating to or arising from negotiations, discussions and correspondence in connection with the Agreement between (x) the Confederation or any of its Representatives and (y) any Group Company or any of its Representatives, in connection with this Agreement, but excluding in each case any Excluded Information.

“**UBS Standard Report**” means any standardised, UBS internal reports and report formats containing Information relating to the Loss Protection Guarantee.

“**Underlying Documentation**” means all of the agreements and other documentation providing for the terms and conditions of a Covered Asset.

“**US\$**” and “**U.S. Dollars**” denote the lawful currency of the United States of America.

“**Valuation Date**” means 31 May 2023.

“**VAT**” means value added tax and any tax similar or equivalent to value added tax and other taxes related to sales and the rendering of services.

“**Virtual Data Room**” means the virtual data room established by or on behalf of CSG, comprising the information relating to the Covered Assets and the Non-Covered Assets, or any replacement site set up by or on behalf of CSG or UBS which satisfies such requirement.

“**Voluntary Termination Notice**” has the meaning given to it in Clause 22.4.

“**Wholly Owned**” means, direct or indirect, ownership of the entire equity capital and voting rights of a legal entity. For the purpose of defining whether or not a legal entity is Wholly Owned in accordance with this definition, any non-material equity interests or similar instruments that are owned by Employees or directors of such legal entity in order to comply with Applicable Law are not taken into account.

**SCHEDULE 2**  
**Conditions Precedent**

**Part I: Documents and other evidence to be provided by UBS**

**1. Corporate Documents**

- (a) A notarised copy of the up-to-date excerpt from the commercial register (*Handelsregisterauszug*) and a notarised copy of the up-to-date articles of association (*Statuten*) of UBS.
- (b) A copy of a protocol signed by the Chairman of UBS and the minutes keeper confirming that the board of directors of UBS has duly passed resolutions:
  - (i) approving the terms of, and the transactions contemplated by, the LPG Documents and resolving that it executes, and performs its obligations under, the LPG Documents to which it is a party; and
  - (ii) authorising a specified person or persons to execute the LPG Documents to which it is a party on its behalf and to sign and/or dispatch all documents and notices to be signed and/or dispatched by it under or in connection with the LPG Documents to which it is a party.

**2. LPG Documents**

This Agreement duly executed by UBS.

**3. Other Documents and Evidence**

- (a) A certificate signed by an authorised representative of UBS confirming that all Authorisations required for UBS to enter into and perform its obligations under this Agreement have been obtained.
- (b) Evidence that the Closing of the Merger has occurred in the form of a copy of an excerpt from (i) the journal of the commercial register (*Tagebuchauszug*) prior to publication in the Swiss Official Gazette of Commerce or (ii) the commercial register (*Handelsregisterauszug*) prior to publication in the Swiss Official Gazette of Commerce.

**Part II: Documents and other evidence to be provided by the Confederation**

Evidence that the persons signing this Agreement on behalf of the Confederation have the power and authority to legally bind the Confederation.
